Explore the vast realm of human knowledge and innovation through the pages of Ignatian International Journal for Multidisciplinary Research (IIJMR).

Established in 2023, IIJMR aims to provide a venue for the researchers across the globe to get their articles published for network and further study purposes.

This journal is a collection of research articles that transcends the boundaries of individual disciplines to present a harmonious symphony of ideas, insights, and discoveries. It opens exchange of ideas with experts across various fields coming together to unravel the mysteries of our world.

Published monthly, IIJMR bridges the gap between disciplines, fostering a deeper understanding of the complex tapestry of human existence.

Hence, discover the future of research, where collaboration is boundless, networking is borderless, and innovation is limitless.

EDITORIAL BOARD

MARK POL M. CASTRO, CLSSBB
Chairman

Mr. Castro is the Managing Director of Ignatian Center for Continuing Education (ICCE) which oversees the Ignatian International Journal for Multidisciplinary Research (IIJMR). He is a Certified Lean Six Sigma Black Belt whose 12-year leadership & management experience extends from operation, marketing to product development.

ROXAN T. BAYAN, EdD
Vice Chairman

Dr. Bayan is an Associate Professor and currently the Dean of the College of Education of Isabela State University - Jones Campus.

She obtained her post graduate diploma, Doctor of Education in Language Education Major in English at the Isabela State University where her dissertation "Prospective ESL Teachers' International Certification: Input to Language Teacher Education Curriculum" was awarded as Best Research & Best Dissertation.

Her solid 22 years of teaching experience which includes coaching & training Campus Journalists and giving lectures on Basic English to Technical Writing to Research to Basic Grammar even to law students paved the way for her becoming an accreditor under the Accrediting Agency of Chartered Colleges and Universities of the Philippines (AACCUP).

Dr. Bayan's extensive contribution in the academe specifically in the English language teaching stemmed from her being an outstanding student back in her college days at the Philippine Normal University - Northern Luzon Campus where she graduated Cum Laude. Her prowess in writing and speaking can be traced to her multiple awards in Campus Journalism & Extemporaneous Speaking.

FREDERICK EDWARD T. FABELLA, Phd
Editor-in-Chief

Dr. Fabella is the Research Director of Ignatian Center for Continuing Education, Editorial Board of Novelty Journals based in India, and Peer Reviewer of Science PG based in New York, USA,

Being published in 46 studies internationally and in 11 journals made him chosen by the Philippine Outstanding Delegates as the Most Promising International Social Scientist of 2023.

CONTENTS

Articles	Pages
ADDRESSING STRUGGLING READERS DIFFERENTIATED NEEDS THROUGH STRUCTURED ASSESSMENT – Wendi Lhee C. Magbayao	1
AFFECTIVE FILTERS AND ACADEMIC PERFORMANCE OF JUNIOR HIGH SCHOOL STUDENTS: BASIS FOR PROPOSED ENHANCED HOMEROOM GUIDANCE PROGRAM – Jenissi A. Cabigon and Romel R. Costales	14
ANALISIS NG EPIKONG TUWAANG BILANG BATAYAN SA PAGBUO NG MODYUL SA GRADE 8 – Maria Theresa O. Ponce and Freddielyn B. Pontemayor	45
AN EVALUATION OF THE IMPLEMENTATION AND EFFICACY OF MARKETING STRATEGIES IN DUMAGUETE CITY'S HOTEL INDUSTRY: A FRAMEWORK FOR POST-PANDEMIC MARKETING RECOVERY – Lew Francis Martinete Chiu and Romario P. Ybanez	61
A NEXUS BETWEEN COHESION AND WRITING: ANALYZING THE USE OF GRAMMATICAL COHESIVE DEVICES IN SENIOR HIGH ACADEMIC TEXTS – Raymark Anthony P. Saluria and Jasmine Q. Beamish	80
ANG INGAY AT LANGITNGIT NA TAGLAY SA LIKOD NG PAGLALARO NG LATÒ LATO – Herman S. Abanto, Shiena J. Barrameda at Rose Ann DP. Aler	91
A QUALITATIVE STUDY ON THE SLANG WORDS AND SOCIO-CULTURAL EXPRESSIONS OF THE PAMPANGOS – Michael R. Martizano	110
ASSESSING THE CAPABILITY OF COAST GUARD DISTRICT CENTRAL VISAYAS IN MARITIME SEARCH AND RESCUE OPERATIONS TITLE OF THE STUDY – Adonis P. Añasco	125
ASSESSMENT OF COMMUNITY-BASED TRAINING (CBT) GRADUATES AMONG TESDA TECHNOLOGY INSTITUTIONS IN MARINDUQUE FOR C.Y. 2018-2022 – Liberty M. Musnit	161
ASSESSMENT OF THE THREE PILLARS OF THE COMPREHENSIVE DISASTER RISK REDUCTION MANAGEMENT IN BASIC EDUCATION – Alvin Jowell Fernandez Nadal	185
ASSESSMENT ON THE EFFECTIVENESS OF FACEBOOK AS A MARKETING PLATFORM IN ABUYOG, LEYTE – Dulce Amor C. Cutura, Christopher P. Gallos and Las Johansen B. Caluza	209
A SYSTEMATIC REVIEW OF THE TYPES OF QUESTIONS USED BY TEACHERS – Daisy Belle S. Madco	225
ATTITUDES OF TEACHERS, STUDENTS AND PARENTS TOWARDS FLEXIBLE ONLINE LEARNING – Eduardo K. De Guzman	247

BEYOND TASTE: EFFECTIVENESS OF TEAM-BASED AND VIDEO-BASED APPROACHES ON STUDENTS' PLATE PRESENTATION SKILLS – Phoebe D. Alforque 261

BEYOND WORDS: ENHANCING CREATIVE WRITING PROFICIENCY THROUGH SENSORY VISUALIZATION – Michael Lizada Muega 271

BILINGUALISM TOWARDS ENGLISH LANGUAGE DEVELOPMENT – Jayvie J. Dumaat, Charles Justine S. Hontemara, John Alfred A. Inson, Chery Mae C. Inting, Mona Marie C. Mangco, Jessa Faith B. Tuyor and Billy O. Cosares 288

CARERS OF THE CARE-SEEKERS: THE LIVED EXPERIENCES OF PRIMARY CAREGIVERS OF PATIENTS WITH STROKE – Blaise B. Nieve 307

CHANGING LANDSCAPE OF FILIPINO EDUCATION: TEACHERS' PERSPECTIVES ON TRADITIONAL VS. MODERNIZED APPROACHES TO TEACHING FILIPINO – Reymond B. Bantillo and Jaime Boy U. Ngag, Jr. 324

CLIMATE CHANGE: ITS EFFECT TO THE GROWTH OF PLANTS – Jennylaine S. Hadjibun, Fatima Ryza I. Bakil, Arliena A. Balli, Barie T. Hadjimulla, Nur-Shahaana P. Hajiri, Ainul I. Bakil, Jul-asri A. Hadjibun, Maryjoy A. Busaňa and Narsima A. Sabbaha 336

CONTEXTUALIZED AFRO-ASIAN LITERATURE MODULE AND STUDENTS' COMPREHENSION SKILLS – Babyjean S. Mokalid 359

COPING STRATEGIES OF WORKING STUDENTS IN BS MARINE TRANSPORTATION AT SOUTHERN LUZON COLLEGE, DASMARIÑAS CITY, CAVITE – Allan C. Alcantara, Manuel R. Rosos and Marlon D. Andrada 371

CULTIVATING RESILIENCE: THE COPING STRATEGIES OF TEACHERS IN HANDLING MULTI-GRADE CLASSES – Mary Jean M. Jabiñar and Michelle L. Mustacisa 382

DAYALEKTOLOHIYANG PAGDALUMAT NG WIKANG SURIGAONON-CLAVERNON SA MUNISIPALIDAD NG CLAVER, SURIGAO DEL NORTE: ISANG PRELIMINARYONG PAGSUSURI – Denzel Mark A. Ciruela, Christian King E. Pedrosa, Arjelee P. Reambonanza and Archiel E. Laurena 396

DEVELOPING THE READING LEVEL OF GRADE THREE NON-READERS THROUGH PROJECT GRP (Guided Reading Procedure) – Darwin F. Tabernilla 418

DEVELOPMENT AND EVALUATION OF A MODULAR INTEGRATED AMPLIFIER SIMULATOR – Gian Carlo G. Marcelo, Romel B. Cristobal and Reymundo M. Maggay 440

DEVELOPMENT AND EVALUATION OF BASIC ELECTRONICS TRAINER – John Paul R. Cubangbang, Jomel R. Angangan and Allen A. Alejandro 465

DEVELOPMENT AND VALIDATION OF MODULE IN COMBINATORICS AND PROBABILITY FOR GRADE 10 LEARNERS – Judy Ann P. Jandulong and Noel R. Palomares 483

DEVELOPMENT AND VALIDATION OF SUPPLEMENTAL INSTRUCTIONAL MATERIALS IN LINEAR INEQUALITIES – Noemie B. Cuales and Noel R. Palomares 518

DEVELOPMENT, UTILIZATION, AND NUTRITIONAL VALUE OF SUPPLEMENTED TILAPIA (Oreochromis niloticus) FLOUR PASTRY PRODUCTS – Marissa C. Abad and Evelyn B. Cristobal 538

EFFECTIVENESS OF TALKING PEN IN IMPROVING THE MACRO SKILLS OF THE GRADE III LEARNERS – April Rose D. Damasing, Irish Mae D. Damasing and Joel D. Potane 562

EKSPLORATORING PAGSUSURI SA KAKAYAHAN AT SALIK NA NAKAAAPEKTO SA KOMPREHENSIYON SA PAGBASA SA FILIPINO – Benilyn R. Abaigar, Gilbert C. Galit and Annabelle L. Balderian 579

EMPLOYEE ENGAGEMENT TOWARDS ORGANIZATIONAL PERFORMANCE OF COMPANY M – Ma. Melissa D. Paguirigan and Heidi R. Maneclang 605

EMPOWERING INDIGENOUS PEOPLE (IP'S) COMMUNITIES IN ALBAY, PHILIPPINES USING PURPLE SWEET POTATO PLUS FOOD PRODUCTS – Eden M. Llamera and Sienna B. Llamera 618

ENHANCING LEADERSHIP THROUGH GOOGLE APPLICATION TOOLS IN SELECTED PUBLIC AND PRIVATE SCHOOLS – Marvin S. Garrido 638

ENHANCING RETENTION OF BIOLOGY CONCEPT THROUGH VISUAL-BASED PEDAGOGY – Chriscente Jose Campilan Cabungcal, Carla Marie Engaling Capuyan, Ma. Teresa Isabel Ibonia Dechosa, Catherine Suerte Saldua, Darah Faye Ruiz Sabio, Raihana Umpar Toke, Garin Boiser-Come and Melbert Balabat Bernel 658

EVALUATING PROFIT DISPARITIES IN SELLING VEGETABLES: ROLLING STORE VS MARKET STALL – Trinidad De Leon Jose 673

EXPERIENCES OF TEACHERS IN TEACHING MATHEMATICS USING MOTHER TONGUE-BASED MULTILINGUAL INSTRUCTION ACROSS SOUTH LUZON – Grace P. Escolano and Annalyn J, Decena 684

EXPLORING BANANA (Musa balbisiana colla) BLOSSOM WITH FORTIFIED SAGIP NUTRI-PACK FOR MACAROON PRODUCTION – Marcelo M. Salazar, Jr., Crissel Joy V. Pastor and Martina R. Peñalber 734

EXPLORING THE CHALLENGES OF THE TEACHERS IN THE INTEGRATION OF TECHNOLOGY IN EARLY CHILDHOOD CLASSROOM – Maylanie S. Maulana and Amiludin G. Masabpi 765

EXPLORING THE DYNAMICS OF HUMAN- ROBOT INTERACTION(HRI): A MULTIDISCIPLINARY INVESTIGATION – Imelda B. Antonio, Jerwin Sadia, Roe Jr A. Bata-anon, Erwin B. Quendangan and Jeffrey T. Leonen 775

EXPLORING THE IMPACT OF SOCIAL MEDIA ON POLITICAL DISCOURSE: A COMPARATIVE ANALYSIS OF MASS MEDIA COMMUNICATION STRATEGIES – Roe Jr A. Bata-Anon, Jerwin Sadia, Dr. Erwin B. Quendangan, Imelda B. Antonio and Billy G. Tingzon 786

EXPLORING THE POTENTIAL OF MUSTARD LEAVES (Brassica juncea) AND RADISH (Raphanus sativus) AS FOOD FORTIFICATION IN NOODLE MAKING – Aileen L. Flores and Jaimee M. Saladino 803

EXPLORING THE RELATIONSHIP BETWEEN MATHEMATICAL ANXIETY AND SELF-EFFICACY – Edmund B. Ayalin, Jeann B. Flores, Hermie P. Pacardo, Nepche M. Exalose, Loren M. Guerero, Mark B. Bornales, Marvin D. Dologmanding, Robelyn D. Cantos and Rhodora P. Panizal 820

EXPLORING TRANSPARENCY: POLICE OFFICERS' VIEW ON THE USE OF PNP BODY-WORN CAMERA – Jehaidah V. Friginal, Michael Angelo T. Filio, Raymond Jay L. Mazo, Bianca Celest T. Benitez, Marvin S. de la Paz and Raymark G. Valencia 832

FACTORS INFLUENCING THE HABITUAL CONSUMPTION OF DISPOSABLE ELECTRONIC CIGARETTES AS PERCEIVED BY YOUNG ADULTS OF QUEZON CITY – Ma. Jewela P. Cruz, Anthony Austin M. Florida, Alrei Jonelle Q. Panganiban, Kristine Dominique V. San Pedro and Michael John P. Agustin 860

FACTORS OF SKIPPING BREAKFAST AND ITS IMPACT TO ACADEMIC PERFORMANCE OF GRADE-11 GAS STUDENTS IN MSU-SULU SENIOR HIGH SCHOOL – Jupikar J. Janier, Ben-Nasri. A. Halissam, Kristel Joy G. Soliva, Narsima A. Sabbaha 886

FEMALE SCHOOL ADMINISTRATORS IN JOLO: THEIR LEADERSHIP JOURNEY AND CHALLENGES – Al-fahad E. Jadjuli and Rosema G. Lukman 895

FORDA FERSON: A PSYCHOLINGUISTIC ANALYSIS OF PERCEPTIONS AND COMMUNICATION FREQUENCY PATTERNS AMONG GENERATION Z SPEAKERS – Rosille R. Vitancor, Mary M. Tirariray, Rhyza Mary B. Mangmang, Kier D. Labadan and John Louie P. Guimaras 912

GULAYAN SA BAKURAN PROGRAM IN APLAYA NATIONAL HIGH SCHOOL- ANNEX, SANTA ROSA CITY: BASIS FOR ENTREPRENEURIAL PROGRAM – Flaviana Elises De Jesus 926

HOMEROOM GUIDANCE PROGRAM: INSTITUTIONALIZING AN ESSENTIAL NON-ACADEMIC SCHEDULE IN THE CITY SCHOOLS DIVISION OF TANAUAN – Ismael C. Casquejo and Agatona C. Vaydal 952

IDENTIFICATION OF FISH SPECIES IN LAKE LANAO, LANAO DEL SUR: BASIS FOR CONTEXTUALIZED BIODIVERSITY STEM LESSON – Soraima S. Ampaso, Joy B. Bagaloyos, Monera A. Salic-Hairulla, Arlyn Alcopra, Annabeth Aque, Ariel Ellare 962

IMPACT OF LANGUAGE LEARNING RESOURCES ON ENGLISH PROFICIENCY OF SENIOR HIGH SCHOOL STUDENTS IN MINDANAO STATE UNIVERSITY – SULU – Mohammad Ashraf R. Abdulhari, Fatima Shamae A. Abani, Radzmer A. Abdul, Ruhana A. Abdulganih, Fatima Rania A. Abdulhajan, Nurmini U. Supian and Narsima A. Sabbaha 980

IMPLEMENTATION OF ADOPT-A-SCHOOL PROGRAM: SUCCESS STORY OF BUENAVISTA NATIONAL HIGH SCHOOL – Emerica L. Sotto and Noel R. Palomares 1000

IMPLEMENTATION OF SCHOOL-BASED MANAGEMENT AMONG THE CENTRAL SCHOOLS IN MARINDUQUE: BASIS FOR SBM STRATEGIC PLAN – Kayce Joy L. Saliendrez and Menandro M. Merlin 1098

IMPLEMENTATION OF THE MANDATORY HOURS OF WORK AND REST ONBOARD CONTAINER SHIPS – Gilbert Lugtu Castro and Loren Mae M. Naquita 1182

IMPLEMENTATION OF TVET PROGRAM: INPUT TO ACTION PLAN TOWARDS ENHANCED PROGRAM IMPLEMENTATION – Rosacris A. Siena 1207

IMPROVING STUDENTS' CONCEPTUAL UNDERSTANDING IN CHEMISTRY THROUGH STRUCTURED INQUIRY-BASED LEARNING – Irene Hannah Baculio Emborgo, Angelica Salaguste Dela Cruz, Antrian Stephanie Paciente Barnayha, Micaiah Jade Camacho Quita, Rholeine Jane Gumapang Taña, Raihana Umpar Toke and Garin Boiser Come 1229

INSTRUCTIONAL MATERIALS IN ENGLISH LANGUAGE TEACHING: REGISTER AND ACCESS TOWARDS TRANSCENDENCE AMIDST CRISIS – Joseph L. Torres 1239

INSTRUCTIONAL MODULE: ITS EFFECT ON STUDENTS' MATHEMATICS PERFORMANCE – Anelyn P. Montes and Harry R. Palmes 1266

INSTRUCTIONAL PROFICIENCY OF TEACHERS IN BUSINESS COURSES AMONG PRIVATE HIGHER EDUCATION INSTITUTIONS (HEIs): BASIS FOR INTERVENTION MEASURES – Rachel Ann Q. Capacite, Jeffrey G. Capacite and Ma. Razelle Bathan 1280

INTERDISCIPLINARY CONTEXTUALIZATION IN THE DEVELOPMENT OF INSTRUCTIONAL MATERIAL IN GRADE 7 MATHEMATICS – Karen Mae L. Elen 1311

INVESTIGATING THE RELATIONSHIP BETWEEN RESILIENCE AND ACADEMIC PERFORMANCE IN FILIPINO ADOLESCENTS: A QUANTITATIVE ANALYSIS – Annaliza Ebid Pagaoa, Sherrlene Uy-Gomes and Arnold Bernal Antiporda 1320

JOB SATISFACTION OF TEACHERS IN SELECTED PUBLIC ELEMENTARY SCHOOLS IN PANGUTARAN DISTRICT – Abuzamier A. Asanji, Nagder J. Abdurahman, Narsima A. Sabbaha, Norman A. Abdurahman, Nuralyn Asmadi, Nurmini U.Supian, Fatima Shaira Balla and Alden T. Taradji 1349

KASANAYANG PAGBASA SA FILIPINO NG MGA MAG-AARAL – Jingky T. Pumahing 1366

KINDERGARTEN TEACHERS' CLASSROOM MANAGEMENT STYLES AND LEARNERS' LEVEL OF ENGAGEMENT IN THE DIVISION OF LUCENA CITY – Rissabeth Mae C. Altamerano and Walter F. Galarosa 1380

KNOWKALINGA: A KNOWLEDGE MANAGEMENT SYSTEM OF CULTURAL HERITAGE RESEARCH CENTER (CHRC) – Joy Lyn B. Jimenez and Mike Anthony D. Gragasin 1403

LEVEL OF EFFECTIVENESS OF THE COAST GUARD DAMAGE CONTROLMAN RATING COURSE AND TRAINEE ONBOARD PERFORMANCE TOWARD PROGRAM ENHANCEMENT – Julio S. Colarina III 1419

LEVEL OF TEACHER'S MOTIVATION TOWARDS PROFESSIONAL DEVELOPMENT ACROSS GENERATIONS – Rose Ann D. Ortega and Abraham L. Cuevas 1443

LIVED EXPERIENCES OF FORMER PERSONS DEPRIVED OF LIBERTY ON THE WELFARE AND DEVELOPMENT PROGRAM: SOCIAL REINTEGRATION CONTEXT – Romeo G. Sarenas , Christian M. Serabia, Rod Ardery D. Culaban, Angel C. Camitoc, Julius N. Cagara, Vincent E. Pagunsan and John Clark M. Mesias 1466

LIVED EXPERIENCES OF TEDURAY ENGLISH LANGUAGE LEARNERS ON MODULAR DISTANCE LEARNING – Hasma U. Butukan, Haron A. Mohamad Lydia S. Bawa and Nasrudin A. Kandong 1483

MATATAG AGENDA: ANALYZING SCHOOL HEADS' AND TEACHERS' PERSPECTIVES IN LAMBAYONG DISTRICT I – Sealtiel Joy A. Domingo and Amiludin G. Masabpi 1511

MATHEMATICAL PROBLEM-SOLVING SKILLS: BASIS FOR THE DEVELOPMENT OF GAME-BASED ACTIVITY SHEETS – Rachel P. Padrones, Kenneth John B. Hitosa, Areane Marie S. Sanchez, Hillaray P. Pagdato, May Heart L. Porras, Resty C. Panes, Jessie P. Sagra, Robelyn D. Cantos, Rhodora P. Panizal 1521

MEDICAL-SURGICAL NURSES' KNOWLEDGE, PERCEPTION, AND ATTITUDE TOWARDS TELEMEDICINE – Rachelle Gil B. Pangilinan and Joseph Michael D. Manlutac 1540

MODERNIZING AGRICULTURAL EDUCATION: ENHANCING PEDAGOGY and TECHNOLOGY INTEGRATION FOR TEACHING AGRICULTURAL CROP PRODUCTION NC II IN THE 21ST CENTURY – Ronald M. Cristobal 1573

MODULAR TEACHING: EXPERIENCES OF JUNIOR HIGH SCHOOL TEACHERS – Jaquelyn G. Montales and Rex T. Argate 1590

MULTIFACETED OF BAMBOO: ITS IMPACT ON HUMAN WELL-BEING, LIVELIHOOD AND THE ENVIRONMENT IN BARANGAY TANGKUAN, OMAR SULU – Fadzrimhar D. Shammah, Edwin A. Paharul, Ruskhan P. Maulidan, Anita H. Hamsali, Fatimah Razsheena B. Ladja, Zhara-mae M. Isnain, Maryjoy A. Busaña, Mokamar A. Ibno, Roslina J. Rahimulla 1628

ADDRESSING STRUGGLING READERS DIFFERENTIATED NEEDS THROUGH STRUCTURED ASSESSMENT

Wendi Lhee C. Magbayao

Department of Education, Antonio Adricula Sr. Memorial Elementary School, Siniloan, Laguna, Philippines

https://doi.org/10.5281/zenodo.12558824

ABSTRACT

The study aimed to revolutionize the reading assessment process for struggling readers in accordance with the guidelines set forth by the Department of Education intended for the upcoming National Learning Camp for School Year 2023-2024, whereas DO no. 14 s. 2023 (11.d) principle stated that the NLC shall be guided with purposeful assessment that enhances teaching and learning. The researcher crafted a reading assessment tool that directly determined the specific reading level of the struggling learners. The structured assessment categorized reading levels from A to Z (Fountas & Pinnell, 2017). However, as the study focused solely on the struggling or beginning readers, only Level A-I were emphasized. The researcher employed a Mixed-Method Research Design. The study's participants were ten Key Stage 1 teachers from Antonio Adricula Sr. Memorial Elementary School, located in the Siniloan Sub-Office of Schools Division Office of Laguna. Survey and interview questionnaire were used to gather the data needed in the study. Basic descriptive statistics such as simple mean and the weighted mean were also used to determine the level of acceptability of the developed structured assessment. Based on the findings, all the indicators have a mean ranging from 4.8 to 4.9 and a weighted mean of 4.89. Hence, it was interpreted that the developed structured assessment for addressing the learners differentiated reading needs was Highly Acceptable. Furthermore, it was found out that the challenges in implementation included parental involvement issues and the meagerness of some teachers' aptitude in addressing the complexity of learners' diverse needs.

Keywords: *assessment, reading intervention, elementary, learning camp*

INTRODUCTION

Assessment plays a pivotal role in evaluating reading proficiency and understanding the capabilities of readers. It serves as a fundamental tool in educational settings, aiding educators in tailoring instruction to meet the needs of different learners. The significance of assessment in reading instruction cannot be overstated. It provides valuable insights into learners' strengths, weaknesses and progress over time.

This study aimed to revolutionize the reading assessment process for struggling readers in accordance with the guidelines set forth by the Department of Education intended for the upcoming National Learning Camp for School Year 2023-2024, whereas DO no. 14 s. 2023 (11.d) principle stated that the NLC shall be guided with Purposeful Assessment that Enhances Teaching and Learning, in which it mentioned the significance of assessment as a tool for guiding evidence-based teaching to promote learning. It was also emphasized that learners in the Intervention Camp shall experience support to achieve Foundational Mathematics and or English skills, thus the researcher aimed to create a valid and acceptable assessment focused on aligning, leveling and structuring learners reading levels to accurately identify and address the needs of struggling readers where it aided as an additional basis for assessing the learners' reading capabilities and determining the appropriate learning strategy and materials necessary to them. The structured assessment served as a diagnostic tool, allowing teachers to identify learners' current reading levels and areas requiring improvement.

The researcher's creation of a structured reading assessment tool is paramount, aimed at precisely pinpointing the reading proficiency of struggling learners, particularly those falling within the Frustration Reading level of the Post-test Phil-Iri assessment or identified as Full Refresher or Moderate Refresher in the Comprehensive Rapid Literacy Assessment (CRLA). However, as Valencia & Buly (2004) observed the limitations of standardized test scores in providing a complete picture of struggling readers' needs. They emphasized the importance of suing assessment data to inform differentiated instruction and provide targeted support. By discerning the strengths, weaknesses, and specific needs of the learners using the structured assessment, teachers were fully equipped to implement the End-of-School-Year (EOSY) National Learning Camp efficiently. The intervention process involved several key steps:

Assessment Phase. Begun by assessing the learners' current reading levels using the researcher developed structured assessment tool which included the structured standardized test and reading assessment form or inventory. These assessments should cover areas such as decoding, fluency, vocabulary, and comprehension. The data gathered from assessments provided insights into students' strengths, weaknesses, and areas for growth.

Leveling Phase. Based on the assessment results, determined each student's reading level. Reading levels are typically classified using systems such as Level A, Level B and up to Level I.

Structuring Instruction. Once students' reading levels have been determined, appropriate instruction to provide support and scaffolding were targeted. This may involve grouping students with similar reading levels for targeted instruction, using differentiated instruction to meet individual needs, and providing appropriate scaffolding to support students as they develop their reading skills.

Selecting Materials. Choose reading materials that are appropriate for each student's reading level.

Monitoring Progress. Continuously monitor students' progress as they engage with reading instruction and practice. Use formative assessments, progress monitoring tools, and ongoing observation to track students' growth over time and adjust instruction as needed. Celebrate students' achievements and provide feedback to support their continued development.

Providing Support. Offer targeted support and interventions to students who may be struggling to make progress. This may involve small group instruction, one-on-one support from a reading specialist, or additional resources and accommodations to address specific learning needs.

Reading levels for beginners are categorized based on various systems, but a common one used in education is the Fountas and Pinnell Guided Reading Level (F&P). In this system, reading levels are categorized from A to Z, with Level A being the easiest and Level Z being the most advanced. Here's a general breakdown of how these levels are categorized:

Levels A-C: These levels typically represent the earliest stages of reading development. These levels have simple, repetitive text which often focus on basic sight words and simple vocabulary.

Levels D-I: At these levels, texts become slightly more complex. Sentences may be longer, and there may be more variety in vocabulary and sentence structure.

Levels J-M: These levels indicate a transition to longer texts with more complex plots and characters. Vocabulary becomes more varied, and there may be more dialogue and descriptive language.

Levels N-P: At these levels are considered transitional readers. They contain longer chapters, more complex storylines, and fewer illustrations. Vocabulary is more sophisticated, and readers are expected to use context clues to understand unfamiliar words.

Levels Q-S: At these levels are considered proficient readers. They include longer, more challenging texts with advanced vocabulary and complex themes. These require readers to infer meaning, analyze characters and plot, and make connections between the text and their own experiences.

Levels T-Z: These levels represent advanced readers. Books at these levels are typically full-length novels with sophisticated language and complex themes. Readers are expected to demonstrate deep comprehension, critical thinking skills, and the ability to analyze literature on multiple levels.

These categorizations serve as general guidelines, and individual reading programs may use slightly different criteria for assigning levels (Fountas and Finnell, 2017). Hence, as the researcher aimed to target the struggling or beginning readers and learners who need abrupt attention and immediate actions, the structured assessment focused at Levels A – I exclusively. It must be noted that the study was limited to the said structured assessment levels.

Research Questions

To address the issue of structured assessment in evaluating learners reading capabilities, this study aimed to answer the following questions:

1. What is the profile of the participants according to age, teaching position, marital status, grade level advisory and years in teaching at the Department of Education?
2. What is the level of acceptability of the developed structured assessment tool in determining the readers' specific reading capabilities and needs?
3. How does the developed structured assessment contribute to identifying specific areas of learners' weakness or learning gaps?
4. What are the benefits and challenges of implementing the developed structured assessment to support struggling readers in diverse classroom settings?

METHODOLOGY

The researcher used Mixed-Method Research Design. Johnson and Onwuegbuzie (2004) defined mixed methods research as research in which the investigator collects and analyzes data, integrates the findings, and draws inferences using both qualitative and quantitative approaches or methods in a single study or program of inquiry. Meanwhile, the following framework was used in the study.

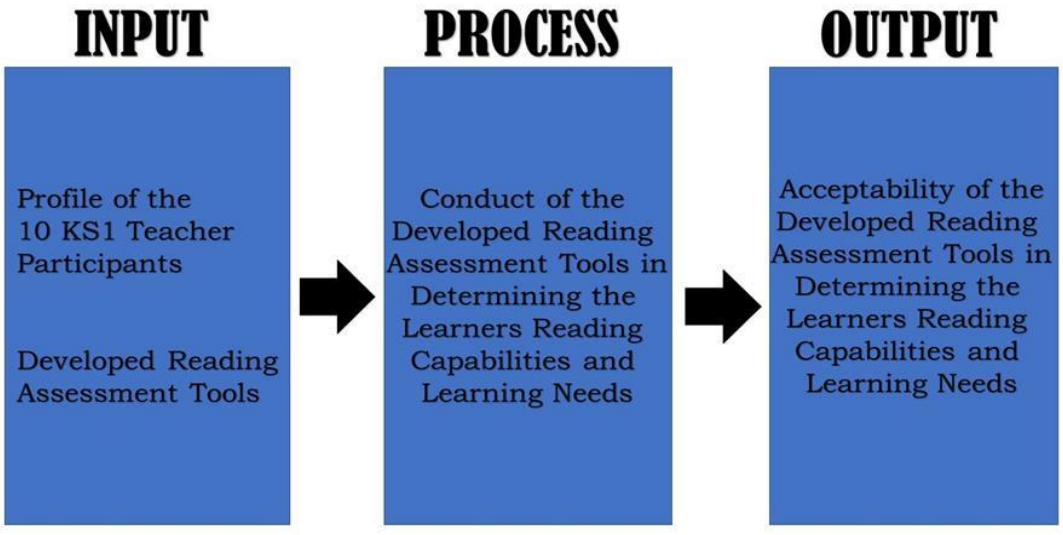

Figure 1. Conceptual Framework of the Action Research

The researcher used the Input-Process-Output model or IPO framework to show the clear relationship and process of her research study. Canonizado (2021) emphasized that IPO is the commonly used approach by researchers in various fields and the IPO model represents all the factors that make up the process thus includes all the material and information that are required in the process itself.

The participants of the study were ten (10) Key Stage 1 or KS1 teachers from Antonio Adricula Sr. Memorial Elementary School in Siniloan Sub-Office, Schools Division Office of Laguna. In the study, the researcher politely asked the ten (10) KS1 teachers Antonio Adricula Sr. Memorial Elementary School in Siniloan Sub-Office, Schools Division Office of Laguna to use and implement the structured assessment developed by the researcher to serve as an assessment in determining the learners' specific reading level and identify their weaknesses or learning gaps. The researcher also gave an online questionnaire and interviewed the teachers about the benefits and challenges of conducting the developed structured assessment to support readers in a diverse classroom setting. The structured assessment was also validated at the school level by three authorized teachers from the school resource validation team such as the content validator, language validator and layout and format validator.

To find the answer to the research questions mentioned above, the researcher used basic descriptive statistics such as simple mean and the weighted mean to summarize the five-point scale Likert scale to determine the acceptability scores given by the teachers for each indicator based on the research questionnaire. The researcher also displayed the results using a bar chart to represent the data. All these data were encoded and generated in software such as MSExcel.

In addition, the answers for the qualitative questions which was asked through questionnaire and interview were also discussed using thematic analysis as Caulfield (2019) explained that it was usually applied to a set of text such as an interview or transcripts, closely examines the data to identify common themes.

RESULTS

For the profile of the participants, the ten (10) Key Stage 1 teachers' data such as age, teaching position, marital status, grade level advisory and years in teaching (DepEd) were shown below.

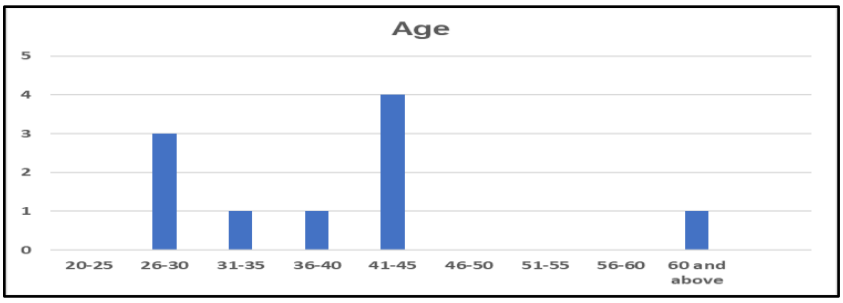

Figure 2. Age of Participants

Based on the graph above, four (4) participants at the age bracket of 41-45 were almost half of the participants population, three (3) were from ages 26-30 and one (1) for each age bracket of 31-35, 36-40 and 60 and above respectively.

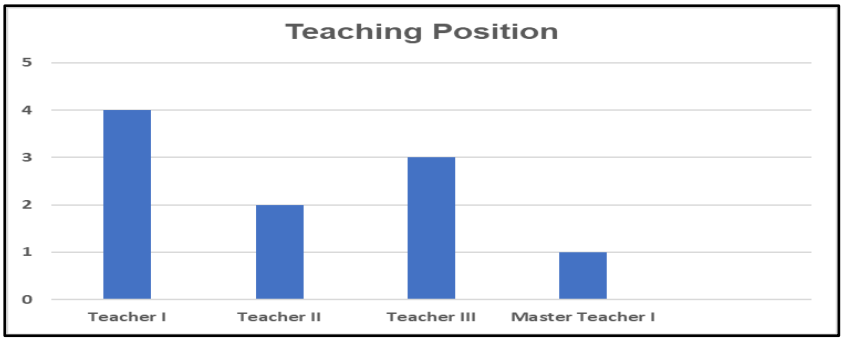

Figure 3. Teaching Position of Participants

For the participants' teaching position, four (4) of them belong to the Teacher I position, two (2) Teacher II, three (3) Teacher III and one (1) Master Teacher I.

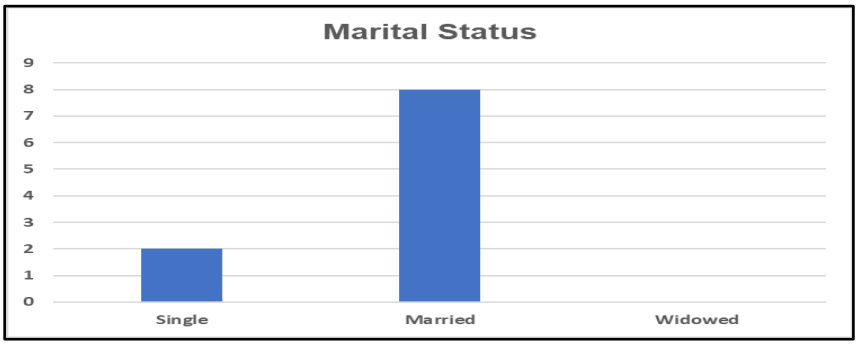

Figure 4. Marital Status of Participants

With regard to the participants' marital status, the majority of them or eight (8) out of ten participants are married and two (2) are single. It was also found out that there was no widow among the participants.

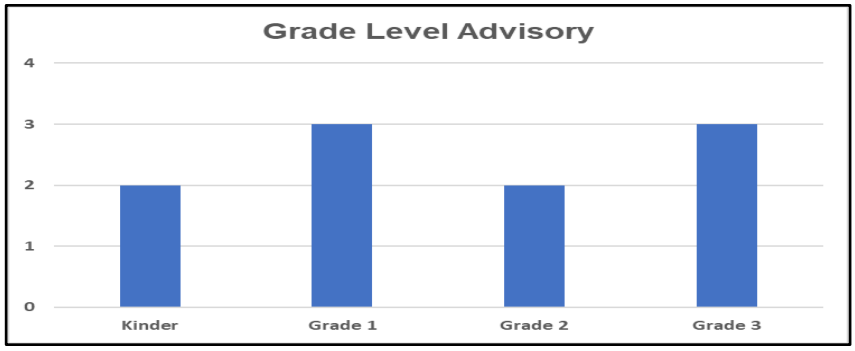

Figure 5. Grade Level Advisory of Participants

Meanwhile, with regards to their respective grade level advisory, the same number of participants were included to the Kindergarten and Grade 2 level which was two (2) participants for each, and the same also goes to the class of Grade 1 and Grade 3 which was composed of three (3) participants as well.

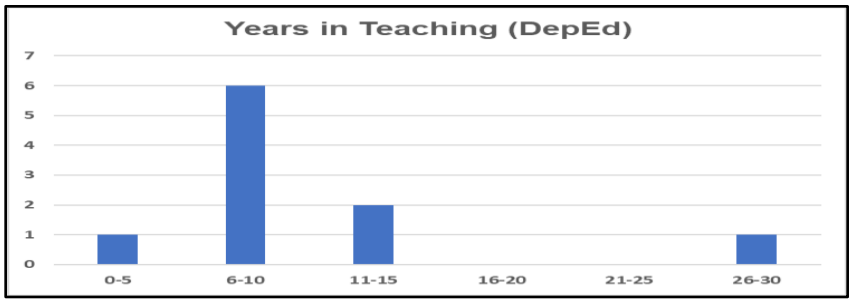

Figure 6. Years in Teaching (DepEd) of Participants

Lastly on the participants profile, their years in teaching at DepEd also varies, more than half or six (6) of them belong to the 6-10 years in teaching, two (2) at the 11-15 years, and one (1) for 0-5 years and 26-30 years respectively.

For the second research question, which is to determine the level of acceptability of the researcher developed a structured assessment. The participants' answers were summarized in the table below.

Participant/ Indicator	Useful in Determining the (Reading) Strength/ Potential of the Learner	Useful in Determining the (Reading)Weakness/ Challenges of the Learner	Readable (size and text appropriate) for the Learner	Suitable to check and record student (reading) performance and output	Reliable to Use as Reading Assessment Tool for key Stage 1 Learners	Helpful for Supporting Struggling Learners	Easy to Use/Administer
Participant 1	5	5	5	5	5	5	5
Participant 2	4	4	4	4	4	4	4
Participant 3	5	5	5	5	5	5	5
Participant 4	5	5	5	5	5	5	5
Participant 5	5	5	5	5	5	5	5
Participant 6	5	5	5	4	5	5	5
Participant 7	5	5	5	5	5	5	5
Participant 8	5	5	5	5	5	5	5
Participant 9	5	5	5	5	5	5	5
Participant 10	5	5	5	5	5	5	5
Mean	**4.9**	**4.9**	**4.9**	**4.8**	**4.9**	**4.9**	**4.9**
Weighted Mean	**4.89**						

Table 1. Level of Acceptability of the Developed Structured Assessment

We can infer from the table above that all the indicators have a mean ranging from 4.8 to 4.9 which can be interpreted as Highly Acceptable based on the Five-Point Likert rating Scale Interpretation, furthermore it can also be supported by its weighted mean of 4.89 which was also further interpreted as Highly Acceptable. Therefore, it can be concluded that the developed structured assessment for addressing the learners differentiated reading needs was Highly Acceptable for the Key Stage 1 teachers view and acknowledgement.

Meanwhile, for the participants response on the research questions, the researcher conducted a survey-interview with the ten (10) Key Stage 1 teachers. Through thematic analysis, their responses at how does the developed structured assessment contribute to identifying learners' weakness or learning gaps. They following themes were discovered:

Determine Learners Weaknesses/Reading Gaps

The findings of the interview revealed that: (a) eight teachers found that the structured assessment can evidently track the learners' weaknesses and learning gaps (reading); (b) some teachers were unable to completely explain how the structured assessment helped them identify the learners weaknesses/learning gaps, but they mentioned that the structured assessment was also helpful to them, such as what mentioned at the second theme below.

Useful in Distinguishing the Learners Reading Level

Participant 4 and 9 particularized that it really helped them distinguished the reading levels of their learners. The remaining participants had similar responses which can be summarized to the usefulness of the structured assessment as it helped them distinguishing their learners' reading levels thus they can strategize or adjust the intervention suited for their learner.

Step-by-Step Process

One particular participant's responses stood out, she answered that as it (structured assessment) was a step-by-step process, she can easily follow the procedure in administering the reading assessment, thus realize the weaknesses of learners.

Based on the participants' responses, it was apparent that the structured assessment was a comprehensive tool that aided in identifying learners' weaknesses and learning gaps. It supported teachers by recognizing the specific reading levels of their learners and its step-by-step process which helped them realize appropriate intervention or support needed to address the differentiated needs of learners.

For the last research question which is about the benefits and challenges in implementing structured assessment to support struggling readers, the responses of the participants were as follows:

Determine the Learners' Specific Reading Level

Based on the participants responses, Participant 1, 4 and 9 highlighted the benefit of using the structured assessment as it served as a guide for teachers to determine the specific reading level of the learners. It helped them realize where they would begin or what appropriate intervention should they provide to their specific learner.

Assess Learners Strengths and Weaknesses

The structured assessment allowed the identification of not just the learners weaknesses or learning needs but also the learners' strength (reading). As Participant 6 and 10 pointed out, the structured assessment also provided opportunities for the learners to showcase their improvement and reading progress. Consequently, if the learners were still found out to be in the lower reading level, the structured assessment could still aid the teacher in developing their individualized support plans, as mentioned by Participant 8.

Lack of Parents Cooperation/Communication

Meanwhile, four participants heavily emphasized the challenges they encountered when administering the structured assessment. They elaborated that as they inform the parents of the struggling readers to the conduct of the project/structured assessment, the politely requested their learners to participate or be present during the day of their assessment, however a lot of them failed to do so, therefore they have to administer it again to those said learners, in which it affected some of the lessons or class schedule of the whole class.

Teachers Aptitude and Time Constraint

A couple of participants alluded that after administering the structured assessment to the struggling readers, a hint of worry was realized due to the challenge of creating the individualized support plan for their learners. They added that assessing each student's specific need can be time-consuming.

In conclusion, as the structured assessment offered significant benefits for teachers and learners such as guiding instruction, identifying needs, providing targeted interventions and supporting learner development. It also presented challenges which includes parental involvement issues and the struggle of some teachers in addressing the complexity of learners' diverse needs through structured process.

DISCUSSION

After the implementation of the study, surely it reveals several key insights, the study made emphasis on the importance of tailoring educational strategies to accommodate the diverse abilities and learning style present in any classroom. By employing structured assessment, teachers can systematically identify individual strengths and areas for improvement, enabling more personalized instruction. Structured assessments provide a clear framework for evaluating reading skill or level of the learner, making it easier to pinpoint specific needs such as phonemic awareness, vocabulary, fluency and comprehension. This targeted approach ensures that interventions are precise and effective, enhancing the likelihood of academic success for the Key Stage 1 learners.

Moreover, the study also highlighted the role of continuous assessment in monitoring progress and adapting teaching methods. As Tomlinson (2001) emphasized the importance of ongoing assessment to tailor instruction to individual student needs and discusses various methods of formative and summative assessment to guide instructional decisions. In essence, the study underscores the critical role of structured assessment in creating an inclusive and responsive educational environment. By recognizing and addressing the varied needs of learners, teachers can foster a more equitable and effective reading instruction framework ultimately leading to improved literacy outcomes.

Moreover, it was recommended that further collaborative planning and providing necessary training and materials to teachers would greatly benefit the learners as the teachers would be highly equipped with knowledge and skills to cater to the complexity of handling diverse struggling readers. The comprehensive understanding of benefits and challenges can help teachers refine and improve the implementation of structured assessment to support struggling readers effectively. One study pointed out that many teachers feel unprepared to effectively support students from diverse background due to lack of proper training and resources. This lack of preparation can lead to feelings of inadequacy and reluctance to address students' needs in the classroom (ACEE, 2023).

Conclusions

Based on the research findings, the following conclusions were drawn for each research questions:

1. The developed structured assessment was found to be highly acceptable from the perspective of the Key Stage 1 teachers. The mean scores ranged from 4.8 – 4.9 on Five-Point Likert rating scale, with a weighted mean of 4.89, all interpreted as “Highly Acceptable”. This demonstrated a strong endorsement of the assessment’s design and utility by the teachers.

2. The structured assessment was effective in identifying specific areas of learners’ weaknesses or learning gaps. Participants reported that it provided feedback on students’ performance, highlighting both strengths and areas needing improvement. This feedback was crucial in understanding learners’ specific needs. The step-by-step level of the assessment helped teachers determine the reading levels and create interventions accordingly, confirming its usefulness in pinpointing and addressing learning gaps.

3. The structured assessment offered several benefits. It guided teachers in addressing the needs of struggling readers by identifying specific learning gaps through a detailed and structured process. Teachers found it highly useful in planning targeted instruction. However, the implementation faced challenges, particularly the lack of cooperation and communication from parents, which hindered the effectiveness of the approach. This highlights the need for strategies to improve parental involvement to fully realize the benefits of the assessment-driven approach.

In conclusion, the structured assessment is highly acceptable to Key Stage 1 teachers, effectively identifies learners’ reading needs, and offers significant instructional benefits though it faces challenges in parental engagement and teachers’ aptitude.

Recommendations

Based on the research findings and conclusions, here are several recommendations:

1. To address the challenge of lack of parental cooperation and communication, school should implement strategies to increase parental involvement. This could include regular parent-teacher meetings, workshops for parents on supporting reading at home and clear communication channels between teachers and parents.

2. Provide continuous professional development opportunities for teachers to effectively use the structured assessment tool. Training should focus on interpreting

assessment results, designing targeted interventions, and utilizing feedback to support differentiated instructions.

3. Foster a collaborative approach among teachers, reading specialists and administrators to support the implementation of the assessment-driven approach. Sharing best practices and successful strategies can enhance the overall effectiveness. Further studies which extends to the limitations of the study was also recommended.

Compliance with Ethical Standards

This is a declaration by the author in her own word and in paragraph form which includes compliance with obtaining informed consent, the respondents' freedom to withdraw from the study at any time, anonymity of the respondents was maintained, the respondents well-being was safeguarded, no conflict of interest exists in the conduct of the study, plagiarism was strictly avoided, there was no bias in the interpretation of findings and that the results were used purely for research.

Acknowledgments

This research study would not have been possible without the invaluable support and assistance of numerous individuals and institutions. The researcher wishes to express her deepest gratitude to all those who contributed to the completion of this research.

First and foremost, the researcher would like to extend her heartfelt thanks to our esteemed principal Sir Ferdinand P. Castro, whose unwavering support and encouragement have been instrumental in the success of this research. Your guidance and commitment in fostering an environment conducive to academic research have been invaluable.

The researcher is also profoundly grateful to Sir Solomon B. Kahulugan, our District Supervisor, for his insightful advice and constant support. Your expertise and dedication to academic excellence have been greatly enriched this research.

Sincere appreciation also goes to Dr. Princess Icy A. Trencio, a member of our District Research Committee. Your meticulous review and constructive feedback have been crucial in refining the quality of this work. Your attention to detail and profound knowledge has significantly enhanced the clarity and coherence of this study,

Furthermore, the researcher would also like to thank all the teachers who participated in this study and the school LR validation team. Your willingness to share your experiences and insights has provided essential data that is at the heart of this study. Your contributions are deeply valued and have been key to the meaningful outcomes of this research.

To all the aforementioned individuals, your support and collaboration have been vital in bringing this research to fruition. THANK YOU.

AFFECTIVE FILTERS AND ACADEMIC PERFORMANCE OF JUNIOR HIGH SCHOOL STUDENTS: BASIS FOR PROPOSED ENHANCED HOMEROOM GUIDANCE PROGRAM

Jenissi A. Cabigon [1] and Romel R. Costales, Ph.D. [2]

[1] Manaring Integrated School, Department of Education, City of Ilagan, Isabela, Philippines
[2] Isabela State University-City of Ilagan Campus, Philippines

https://doi.org/10.5281/zenodo.12230440

ABSTRACT

This study investigated the relationship between affective filters and academic performance among junior high school students in the Philippines, aiming to inform the development of an enhanced homeroom guidance program. A survey was administered to 240 students, measuring their levels of affective filters across four domains: biological, environmental, motivational, and social. The study found a significant positive correlation between the level of affective filters and academic performance, with the environmental variable exhibiting the strongest relationship. Significant differences in affective filters were observed based on sex, ethnicity, parental employment and educational attainment, family income, and family structure. These findings suggest that affective filters are a significant factor influencing academic performance and that interventions should address both individual and environmental factors. The study recommends strengthening homeroom guidance programs to create a more supportive learning environment, foster student motivation, and promote positive social interactions. By addressing these factors, educators can create a more conducive learning environment that supports students' emotional well-being and academic achievement.

Keywords: *Affective filters, Academic performance, Homeroom guidance, Learning environment, Student Motivation*

INTRODUCTION

The principle of learning individuality remains a fundamental educational thrust, addressing the diverse learning styles and backgrounds of students. Modern educational paradigms emphasize the learner-centered approach, particularly in the 21st century, necessitating educational institutions to prioritize students' learning conditions (Darling-Hammond et al., 2020). It is widely recognized that learners' cognitive and affective characteristics influence their learning styles, which vary based on the teaching strategies employed (Ormrod, 2012).

The distinction between cognitive and non-cognitive domains is pivotal in fostering holistic learner development (Good, 2010, as cited in Stalker, 2021). The Department of Education (DepEd) has established policies to support this inclusive approach, addressing learners' affective status, mental health, and other developmental aspects. DepEd Order No. 72 s. 2009 underscores inclusivity, promoting acceptance of all students regardless of their attributes (Department of Education, 2009).

Understanding learners' intellectual and emotional maturity is crucial for effective teaching, aligning with educational principles that incorporate cognitive, psychomotor, and affective domains (Anderson & Krathwohl, 2001). DepEd Memorandum No. 74 s. 2021 further highlights the integration of mental and emotional health concerns into educational programs, acknowledging the impact of varied learning modalities on school policies and instructional goals (Department of Education, 2021).

The shift to modular learning has posed challenges, affecting not only cognitive and intellectual development but also learners' emotional and social conditions (Sarmiento, 2021). Emotional instability among students can disrupt their learning momentum, necessitating initiatives to promote mental resilience. The DepEd's mental health and psychosocial support programs aim to address these issues, recognizing the significant influence of emotional status on academic improvement (Sarmiento, 2021).

Krashen's (2008) concept of the affective filter, as cited by Cabaccan (2022), refers to negative emotional and motivational factors that hinder the reception and processing of comprehensible input. High affective filters, characterized by anxiety, self-consciousness, and low self-esteem, create mental blocks that impede skill acquisition. Factors such as attitude, communication apprehension, and negative evaluation further contribute to the affective filter (Krashen, 2008).

Understanding affective filters is essential for educators, as it informs the selection of appropriate teaching methods that reduce learning barriers and enhance student engagement (Cabaccan, 2022). Identifying current affective filters among students can help assess the effectiveness of existing learning modalities.

As a mental health advocate and guidance counselor, the researcher recognizes the importance of addressing both cognitive and affective learning aspects to improve learning outcomes. This study aims to examine the affective filters of junior high school students and their correlation with academic performance, providing a basis for

enhancing homeroom guidance programs. The findings will offer valuable insights for school administrators, teachers, guidance counselors, and parents, supporting the implementation of a curriculum that benefits learners.

Research Questions

Generally, the study sought to determine the affective filters and their relationship to the academic performance of Junior High School students.

Specifically, it aimed to seek answers to the following questions:

1. What is the profile of the respondents in terms of:
    a. sex;
    b. ethnicity;
    c. sibling order;
    d. parents' employment status;
    e. parents' highest educational attainment;
    f. average monthly family income; and
    g. family structure?
2. What is the level of affective filters among the respondents in terms of:
    a. Affective Biological Variable;
    b. Affective Environmental Variable;
    c. Affective Motivational Variable; and
    d. Affective Social Variable?
3. What is the academic performance of the respondents?
4. Is there a significant difference in the level of affective filters of the respondents when grouped according to their profile variables?
5. Is there a significant relationship between the level of affective filters and the respondents' academic performance?
6. What intervention can be proposed to enhance the homeroom guidance program of the Junior High School students?

METHODOLOGY

Research Design

This study utilized the descriptive-correlational design as it examined the relationship between the level of affective filters and students' academic performance. Creswell (2018) categorically defines this research design as the variables and relationships between and among them. The test of relationship details results including positive, negative, mixed, or no relationship at all but does not establish a causal effect.

Research Locale

The study was conducted in the schools of the identified high schools in the North District of the Schools Division of the City of Ilagan, Isabela in the School Year 2022-2023. Identified schools are categorized as national secondary schools and integrated schools.

Selection and Description of Respondents

The respondents' sample size was calculated using Slovin's Formula [n = N/(1 +Ne2). They were selected through a simple random sampling. The respondents were a pool of students in the Schools Division of the City of Ilagan. Specifically, these students were from the identified secondary schools and integrated schools legally and duly registered in DepEd. The table below shows the list of schools and several students in the Schools Division of the City of Ilagan.

Table 1. Sample Size of the Study

North District	Number of Students	Sample Size (Slovin's Formula)
1. Rang-Ayan National High School	602	104
2. Manaring Integrated School	461	88
3. San Lorenzo Integrated School	331	48
TOTAL	1394	240

Research Instruments

The primary data-gathering instrument used was a structured survey questionnaire comprising two parts. Part I elicits the profile of the respondents in terms of their sex, ethnicity, sibling order, parents' employment status, parents' highest educational attainment, average monthly family income, and family structure. On the other hand, Part II consisting of the items on the affective filter was adopted from Cardona's (2015) study. It is a checklist in a 5-point Likert-type gauge. The checklist is composed of the four affective variables with five (5) items for each variable totaling twenty (20) questions. Items are rated as follows: 5 – Very High; 4 – High; 3 – Moderate; 2 – Low; 1 – Very Low. It was validated in a previous study with an acceptable internal consistency ($\alpha = 0.746$).

Lastly, the academic performance was taken from the grades as reflected in the official records of the respondents for the Second quarter and Third quarter of the SY 2022-2023.

Data Collection Procedure

The researcher sought permission from the school authorities for the conduct of the study. Also, the consent of respondents was obtained. They were informed on the purposes, methodology, and expectations of the study. They were assured that their confidentiality and identity would be maintained.

The researcher floated the questionnaire face-to-face. To ensure 100 percent retrieval of the questionnaire, the researcher supervised carefully the data collection. Furthermore, the grades of the respondents were taken from the official records that are kept by the respective teachers. In compliance with the Data Privacy Act, the researcher

sought first the approval of the respondents and their parents before the grades were obtained.

Data Gathering Tool

All data were tallied and interpreted using different statistical tools. The data were analyzed using the Statistical Probability for Social Sciences (SPSS) version 21.

Statistical Tool

The statistical tools utilized in treating data to be gathered include the following:

For the first research question, descriptive statistics such as mean, frequency count, and percentage were used to treat the profile variables.

Descriptive statistics was utilized in identifying the level of affective filters among the respondents in terms of affective biological variable, affective environmental variable, affective motivational variable, and affective social variable.

Table 2. Interpretation of the Level of Affective Filters

4.20 – 5.00	Very High
3.40 – 4.19	High
2.60 – 3.39	Moderate
1.80 – 2.59	Low
1.00 – 1.79	Very Low

Furthermore, the frequency count, percentage, and mean were utilized in analyzing the academic performance of the respondents. The data was interpreted as follows:

Table 3. Interpretation of Students' Academic Performance

90 – 100	Excellent
85 – 89	Very Satisfactory
80 – 84	Satisfactory
75 – 79	Fairly Satisfactory
Below 75	Did not meet expectations

For research hypothesis 1, it was tested using a T-test and Analysis of Variance (ANOVA) while for research hypothesis 2, the Pearson r shall be employed in determining the significant relationship between the level of affective filters and academic performance of students.

Ethical Considerations

The researcher made sure that during the conduct of the study, the following ethical concerns were followed to necessitate safe, anti-fraud, deliberate, and careful undertakings in the study:

1. The researcher, through proper communications, asked permission from the Division Office, and other concerned offices for the study;
2. The researcher also acknowledged the Department of Education and the Schools Division of the City of Ilagan for allowing her to conduct the study;
3. The researcher informed the respondents of the study through letters and a short orientation to the study. Data and information gathered were treated with utmost respect and confidentiality;
4. The researcher, properly cited gathered information and other relevant studies from authors, books, or any publications through proper citation.

RESULTS AND DISCUSSION

Profile of the Respondents

Table 4. Distribution of the Frequency and Percentage of Respondents' Sex. Ethnicity, and Birth Order

Profile	Frequency	Percent
Sex		
Male	127	59.92
Female	113	40.08
Birth Order		
First-born	78	32.50
Middle-born	79	32.92
Last-born	83	34.58
Ethnicity		
Ibanag	54	22.5
Ilocano	148	61.7
Others	38	15.8
Total	**240**	**100.0**

The table presents the profile of respondents in terms of sex, ethnicity, and birth order. Of the 240 respondents, 127 (59.92%) were male and 113 (40.08%) were female. When considering ethnicity, most of the respondents were Ilocano, accounting for 148 (61.7%) individuals. Regarding sibling order, the data shows that the sample was evenly distributed, with 78 (32.5%) being first-born, and 83 (34.58%) last-born. The Ibanag ethnic group constituted 54 (22.5%) respondents, while 148 (61.7%) belonged to other Ilocano ethnicity.

Table 5. Distribution of the Frequency and Percentage of Respondents' Employment Status of Parents

Profile	Frequency	Percentage
Father's Employment Status		
Government Employee	26	10.83
Private Employee	78	32.5
Self-employed	118	49.17
Unemployed	18	7.50
Mother's Employment Status		
Government Employee	20	8.33
Private Employee	52	21.67
Self-employed	130	54.17
Unemployed	38	15.83
Total	**240**	**100.0**

The table presented above presents the employment status of parents. Moving on to the employment status of the parents, it is evident that the respondents had varying family backgrounds. Among fathers, 118 (49.17%) were self-employed, 78 (32.5%) were private employees and 18 (7.5%) were unemployed. Similarly, for mothers, the highest proportion was self-employed, with 130 (54.17%) respondents and 20 (8.33%) were government employees.

Table 6. Distribution of the Frequency and Percentage of Respondents' Highest Educational Attainment of Parents

Profile	Frequency	Percentage
Highest Educational Attainment (Father)		
Elementary Graduate	112	46.7
Highschool Graduate	104	43.3
College Graduate	20	8.3
Graduate of a Post Baccalaureate Degree	4	1.7
Graduate of a Post Graduate Degree	0	0.0
Highest Educational Attainment (Mother)		
Elementary Graduate	102	42.50
Highschool Graduate	74	30.83
College Graduate	56	23.34
Graduate of a Post Baccalaureate Degree	8	3.33
Graduate of a Post Graduate Degree	0	0.00
Total	**240**	**100.0**

The table reflects the frequency and percentage distribution of the educational attainment of respondents' parents. Regarding the educational attainment of the respondents' fathers, a significant portion had only completed elementary education, accounting for 112 (46.7%) individuals. Only a small percentage, 20 (8.3%), were college graduates, and an even smaller proportion had achieved a post-baccalaureate or postgraduate degree. For mothers' educational attainment, a similar pattern emerged. The largest group completed elementary education, with 102 (42.5%) respondents, and 8 (3.33%) who a post-baccalaureate degree.

Table 7. Distribution of the Frequency and Percentage of Respondents' Family Income and Family Structure

Profile	Frequency	Percentage
Family Income		
15,001 – above	36	15.00
10,001 – 15,000	42	17.50
5,001 – 10,000	58	24.17
5,000 – below	104	43.33
Family Structure		
Nuclear	178	74.17
Extended	62	25.83
Total	**240**	**100.0**

Finally, this table reveals the frequency and percentage distribution of respondents' family income and family structure. Examining the average monthly family income, the data indicates that most respondents fell into the "5,000-below" income bracket, with 104 (43.33%) individuals and 36 (15%) respondents having an income of "15,001 and above."

Finally, looking at the family structure, most respondents came from nuclear families, with 178 (74.17%) belonging to this category. The remaining 62 (25.83%) respondents were from extended families.

In summary, the profile of the respondents reveals a diverse sample in terms of sex, ethnicity, sibling order, parents' employment status, parents' educational attainment, average monthly family income, and family structure. These findings provide insights into the characteristics and backgrounds of the participants involved in the study.

Level of Affective Filters of the Respondents

Table 8. Level of Affective Biological Filters of the Respondents

Factors	Mean	Standard Deviation	Descriptive Interpretation
Factor 1- Affective Biological Variable			
They are willing to learn the concepts of their subjects.	3.77	1.12	Favorable
They are confident in their own learning styles in studying their subjects.	3.53	1.13	Favorable
Whenever they encounter problems inside or outside the school, they relate their learnings to solve such issues.	3.02	1.39	Moderately Favorable
They see learning as an opportunity to help them in their daily tasks.	3.35	1.22	Moderately Favorable
They are committed in my learning of concepts and facts about all their subjects.	3.24	1.33	Moderately Favorable
They don't feel anxious and insecure about their own learnings on their subjects compared to their classmates.	2.73	1.43	Moderately Favorable
Whenever projects are asked by teachers, they don't overthink about the deadline and anxiety doesn't strike me.	2.91	1.34	Moderately Favorable
Overall Mean	**3.22**	**0.60**	**Moderately Favorable**

In the Affective Biological Variable, the respondents displayed moderately favorable level of affective engagement. They expressed a willingness to learn the concepts in their subjects (mean = 3.77) and confidence in their learning styles (mean = 3.53). They also recognized the relevance of their subjects in solving problems (mean = 3.02) and saw it as an opportunity to assist them in their daily tasks (mean = 3.35). Although there was a slight level of anxiety and insecurity compared to their classmates (mean = 2.73), it did not hinder their commitment to learning (mean = 3.24). Overall, the average for this variable indicates a moderately favorable level of affective engagement (mean = 3.22).

This finding implies that the biological factor is a learning hindrance among respondents. Furthermore, according to England (2017), Affective Biological Variable involves those filters that are personal to the individual, including attitude, behavior, and biological features. Therefore, a moderately favorable affective biological variable posits a manageable personal development among the respondents that could hinder learning activities. Students' biological filters self-reported their general class, test, communication, and social anxiety; perceived course difficulty; intention to stay in the major; and demographic variables, as hindering factors toward learning tendencies of

learners. He also indicated that general class anxiety levels differed for students who intended to learn or not.

However, extreme instances may deviate from this general interpretation of the result wherein personal traits of the individual could affect his learning development. This study builds on and expands this former work by investigating biological factors between both general anxiety and a wider variety of anxiety measures and actual student performance and self-reported intention to persist. This, according to Brigati (2019), stated that student anxiety toward active learning could have on these student outcomes.

Low affective filters encourage receptiveness to learning, while high filters hinder acquisition and engagement, with higher filters causing hindered learning transfer and lower classroom engagement.

Table 9. Level of Affective Environmental Filters of the Respondents

Factors	Mean	Standard Deviation	Descriptive Interpretation
Factor 2- Affective Environmental Variable			
The school where they study has easy access to equipment, tools, and resources that facilitate better learning.	3.43	1.26	Favorable
The school where they study has a conducive learning atmosphere resulting to a better understanding.	3.40	1.16	Favorable
They feel that their subjects provided them with enough experiences to grow in their specific strand.	3.44	1.16	Favorable
The boarding house/apartment/ house where they stayed was peaceful and helped me focus during their learning.	3.39	1.37	Moderately Favorable
There is an atmosphere of freedom in the commission of mistake/sin the classroom which strengthens their self-confidence.	2.96	1.46	Moderate Favorable
The school adheres to policies that motivate better learning process.	3.43	1.22	Favorable
The classroom has a TV screen or Projector screen or online classes where they see what they learn that motivates and concretizes our learning.	3.77	1.39	Favorable

Overall Mean	**3.40**	**0.59**	**Favorable**

The table above reflects the level of Affective Filters on the Affective Environmental Variable, the respondents perceived their learning environment in their subjects to be favorable in terms of affective engagement. They acknowledged that their school had easy access to resources and facilities (mean = 3.43) and provided a conducive learning atmosphere (mean = 3.40). The experiences in their subjects contributed to their personal growth (mean = 3.44), and the boarding house or living arrangement they had was peaceful and conducive to focus (mean = 3.39). However, there was a slightly lower perception of an atmosphere of freedom for making mistakes in the classroom (mean = 2.96). The presence of visual aids such as TV or projector screens in the classroom was seen as motivating and enhancing their learning (mean = 3.77). On average, the respondents reported a moderately favorable level of affective engagement in their learning environment (mean = 3.40). Hence, the higher the mean, the higher the affective filters, leading to a greater tendency to hinder the transfer of learning which is caused by disoriented or disturbance.

This finding indicates that the respondents' environmental setting affects their learning development. Boyd (2021) explained that the environmental setting of learners is an important factor in their academic success and total learning development. Jeremiah (2018) also concluded that academic performance is a positive outcome when learners are nourished in a healthy and harmonious environment, including their home and school. However, a favorable level of affective environmental filters is an example of the negative side. Learners with this learning condition are disoriented, malfunctioning, and disturbed. In addition, according to Policay (2021), the physical environment needs to be practical as well as interesting and stimulating. Arranging the desks and chairs in such a way as to facilitate small-group work, individual work and whole-class discussions is a challenge. The ideal structure should cater to different learning styles and consider the teacher's desk situation, either making it accessible or creating additional barriers.

Furthermore, Butac (2020) highlights the significant impact of the learning environment during the implementation of alternative education delivery modality on learners' development and affective filters.

Table 10. Level of Affective Motivational Filters of the Respondents

Factors	**Mean**	**Standard Deviation**	**Descriptive Interpretation**
Factor 3- Affective Motivational Variable			
1. They are eager and motivated to learn in their subjects.	3.52	1.16	Favorable
2. They feel relaxed and confident in learning their subjects.	3.36	1.37	Moderately Favorable

3. They are still motivated to learn concepts in their subjects without moral encouragement.	3.49	1.25	Favorable
4. They are still motivated to learn concepts in subjects without material encouragement.	3.45	1.20	Favorable
5. Their own learning experiences in their subjects help them to learn other subject areas.	3.39	1.06	Moderately Favorable
6. Topics in their subjects make them feel like a real scientist which motivates them to learn even more.	3.45	1.23	Favorable
7. Activities in their subjects make them enjoy learning the concepts even more.	3.30	1.23	Moderately Favorable
Overall Mean	**3.42**	**0.56**	**Moderately Favorable**

Table 4.7 shows the level of Affective Filters in the Affective Motivational Variable, the respondents demonstrated a moderately favorable level of affective engagement. They expressed eagerness and motivation to learn their subjects (mean = 3.52) and felt relaxed and confident in their learning (mean = 3.36). They were self-motivated without relying on external encouragement, both morally (mean = 3.49) and materially (mean = 3.45). They recognized that their learning experiences in their subjects extended to other subject areas (mean = 3.39), and the topics in their subjects motivated them to learn more (mean = 3.45). Although the enjoyment of learning activities in their subjects was slightly lower (mean = 3.30), the average for this variable indicates a moderately high level of affective engagement (mean = 3.42).

Consequently, learners with a moderately favorable level of affective motivational filter lack the necessary motivation, inspiration, confidence, and intrinsic and extrinsic factors such as class goals, habits, and the personal inhibitions of the learners that negatively affect their learning development. Hence, a moderately favorable affective motivational filter may hamper academic success since motivation triggers one's behavior or a drive that comes with a goal or incentive.

Moreover, Cheng (2018) revealed that motivation, as described in the study of educational principles and theories, is a teaching ideal that should focus on the learners themselves. On the other hand, motivations could be greatly hampered by affective filters. Motivational variables are also affective filters that may affect the development of learning of the learners and so as their academic performance in a learning area or course of study. Motivation greatly affects the efficacy of the teacher, rather, it affects the learning development of learners which may hinder or induce their performance. Finally, to fully understand the construct of affective filters, social variables should never be neglected. Mentoring has been identified as a mechanism for supporting instructional improvement and learning development, in the compulsory school and higher education contexts.

Table 10. Level of Affective Social Filters of the Respondents

Factors	Mean	Standard Deviation	Descriptive Interpretation
Factor 4- Affective Social Variable			
1. Their teachers in their subjects help them feel confident and have better learning in the subject.	2.87	1.30	Moderately Favorable
2. Their teachers in subjects provide them with immediate, frequent, and task-related feedback to help them improve their learning and their learning styles in the subjects.	3.35	1.36	Moderately Favorable
3. Their parents support and stimulate their interest in having a better performance in subjects' class.	3.40	1.36	Favorable
4. Their classmates in subjects help them cope with the difficulties that they encounter during the learning process.	2.86	1.30	Moderately Favorable
5. Their classmates, teachers and they have a good relationship inside and outside the subjects	2.92	1.30	Moderately Favorable
6. Their peers initiate learning sessions about their subjects in the group.	2.55	1.27	Least Favorable
7. There is no competition of students within the subjects' classes.	2.63	1.18	Moderately Favorable
Overall Mean	**2.94**	**0.56**	**Moderately Favorable**

Lastly, the table above presents the level of Affective Filters in the Affective Social Variable, the respondents perceived a moderately favorable level of affective engagement. They reported that their subject teachers helped them feel confident and improved their learning (mean = 2.87), and they received immediate, frequent, and task-related feedback from their teachers (mean = 3.35). Their parents also provided support and stimulated their interest in performing better in their subjects (mean = 3.40). While they acknowledged that their classmates helped them cope with learning difficulties (mean = 2.86), there was room for improvement in their relationships with peers (mean = 2.92). The initiation of learning sessions by peers within the group was slightly lower (mean = 2.55), and the absence of competition among students in their classes was also lower (mean = 2.63). Overall, the average for this variable indicates a moderate level of affective engagement (mean = 2.94).

This finding implies that respondents have strong social conditions serving as filters in their academic endeavors. Since Affective Social Environment is anchored in the learners' social environment, which includes their parents, teachers, friends, peers, and other socially relevant and significant individuals to the learners, the COVID-19 pandemic characterized by limited peer and teacher interaction might have contributed to this

scenario. As Umar (2020) claimed, an unfavorable social environment may serve as a piece of baggage for an individual to do well academically.

One of the factors identified by Tehseen & Madi (2015) in their study, Factors Influencing Teachers' Performance and Retention, working conditions have an impact on the student's performance and their retention conditions include facilities defined as the physical workplaces of teachers and the available resources to them. Additionally, research conducted by Jeremiah (2018) stated that physical and social learning environments are contributory factors in learning development among students.

Table 11. Overall Level of Affective Filters of the Respondents

Dimensions of Affective Filters	**Mean**	**Interpretation**
Affective Biological Variable	3.22	Moderate
Affective Environmental Variable	3.40	High
Affective Motivational Variable	3.42	High
Affective Social Variable	2.94	Moderate
Overall	**3.22**	**Moderate**

Legend:
4.20 – 5.00 Very High
3.40 – 4.19 High
2.60 – 3.19 Moderate
1.80 – 2.59 Low
1.00 – 1.79 Very Low

Table 11 reveals the level of affective filters among respondents. In general, the respondents have a moderately favorable affective filter with a mean of 3.22. In the study by Cardona (2015), a moderately high level of affective filters nears a high level of affective filters characterized by strong filters that affect the learning and development of respondents in a particular course of study. These filters are negative walls that hinder the transfer of learning and are further manifested by negative responses and low levels of student engagement in classroom activities. Previous researchers discovered that students' learning development was somewhat hindered by a moderately high level of affective filters (Akinwumi et al., 2016).

Specifically, learners with a moderately favorable level of affective filters are sometimes anxious during instruction, especially while doing activities related to other students and teachers, classroom control, lesson effectiveness, and lesson presentation. Furthermore, they are often anxious about participating in classroom discussions, thus limiting their maximum performance. A moderate level of affective filters is a relatively unsound level of affective filters because it tends to alter and modify the course of learning developments and academic success of learners. As compared to a high level of affective filters, a moderate level is tolerable and mitigated by classroom techniques and methods that resolve identified problems. On the other hand, a high level of affective filters connotes a bigger problem as it already broadened a wider problem regarding negative

filters present among learners such as anxiety, mental health issues, and other relevant problems.

Academic Performance of the Respondents

Table 12. Frequency and Percentage of the Academic Performance of the Respondents

Academic Performance Level	Frequency (n=240)	Percent (100%)
Outstanding (90 – 100)	60	25.0
Very Satisfactory (85 – 89)	50	20.8
Satisfactory (80 – 84)	50	20.8
Fairly Satisfactory (75 – 79)	75	31.3
Did Not Meet Expectations (below 75)	5	2.1
Overall Mean of Academic Performance	**83.92**	**Satisfactory**

The academic performance of the respondents is measured based on their level of achievement in their studies. Table 12 provides the frequency and percentage distribution of the respondents' academic performance levels. Most of the respondents achieved a satisfactory level of academic performance, as indicated by the frequency distribution. Specifically, 60 respondents (25.0%) achieved an outstanding level (90-100), 50 respondents (20.8%) achieved a very satisfactory level (85-89), and another 50 respondents (20.8%) achieved a satisfactory level (80-84). A significant number of respondents, 75 (31.3%), obtained a satisfactory level (75-79). Only a small proportion of respondents, 5 (2.1%), did not meet expectations with a performance below 75.

In summary, the respondents' academic performance can be characterized as satisfactory based on the distribution of performance levels and the mean score. Although there were some variations in individual scores, most respondents achieved a satisfactory level of academic performance.

The result affirms the findings of Policay (2021) on the study of the academic performance of students who perform averagely in their subjects. However, this still falls below the curricular goals of the K–12 curriculum, which focuses on the learners' development based on the identified skills and competencies of the new curriculum. Hence, there is a need to augment instruction through enhanced instructional materials and pedagogical innovations in the learning area.

Further, it should be noted that the average grades obtained through the results of the summative examination were from the first and second quarters of the school year during the implementation of the face-to-face instructional modality as part of DepEd's Learning Continuity Plan. Hence, the respondents' satisfactory academic performance in social studies may be attributed to the learning challenge sand adjustments brought about by the paradigm shift in the education system (Salud, 2022).

Comparison in the Respondents' Level of Affective Filters Grouped by Profile

Table 13. Comparison in the Respondents' Level of Affective Filters when grouped by Sex

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Sex	Affective Biological Variable	0.94	0.39	Accept	Not significant
	Affective Environmental Variable	3.92	0.02*	Reject	Significant
	Affective Motivational Variable	1.79	0.17	Accept	Not Significant
	Affective Social Variable	2.58	0.08	Accept	Not Significant

The table presents the results of the analysis investigating the significant difference in the level of affective filters among respondents when grouped according to their profile variables. The research problem aims to determine if there are variations in the affective filters based on different profiles. The F-value and p-value are provided for each comparison to assess the significance of the differences.

Starting with sex, the analysis indicated that there was no significant difference in the level of affective filters based on sex. The F-value of 0.94 and the p-value of 0.39 suggested that the observed differences were not statistically significant. Consequently, it can be concluded that the level of affective filters does not differ significantly between males and females. The level of affective filters specifically Affective Environmental Filters differs significantly between male and female learners.

In contrast, a related study by Akinsola (2014) found that sex is a factor in students' learning anxiety, claiming that female students have more effective filters than males, attributed to their varied biological, behavioral, and emotional orientations. This point was also affirmed in the study of Payne and Furnham (2016), which claimed that sex significantly influences students' levels of negative emotions. In a parallel study by Cubucko and Donmez (2016), it was found that female students had a higher level of negative emotions in all dimensions of student engagement in the school. In addition, they manifested a higher level of affective filters as they experienced greater mental and emotional walls hindering their learning development.

Additionally, Payne and Furnham (2021) discovered that gender is a significant factor that might change the level of the negative emotions of learners in a particular learning area.

Moreover, Cabaccan's 2022 study found that male students generally perform better academically than female students, indicating a strong influence of affective filters and their profile variables on academic performance.

Table 14. Comparison in the Respondents' Level of Affective Filters when grouped by Ethnicity

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Ethnicity	Affective Biological Variable	1.78	0.17	Accept	Not significant
	Affective Environmental Variable	7.16	0.00*	Reject	Significant
	Affective Motivational Variable	3.88	0.02*	Reject	Significant
	Affective Social Variable	0.15	0.86	Accept	Significant

As for ethnicity, the analysis revealed that there were significant differences in the level of affective filters based on ethnicity. Specifically, the affective filters of environmental and motivational factors showed significant differences. The F-value of 7.16 and the p-value of 0.00 indicated a significant difference between ethnicity and the affective environmental variable. Similarly, the F-value of 3.88 and the p-value of 0.02 suggested a significant relationship between ethnicity and the affective motivational variable.

However, no significant differences were found for the affective filters of biological and social. Therefore, it can be concluded that the level of affective filters differs significantly based on ethnicity, particularly in the environmental and motivational domains. This particularly means that ethnicity influences environmental and motivational levels of affective filters of learners specifically identifying that they are from the Iloko and Ibanag cultural identities. Their ethnic environment and motivational factors brought upon by cultural integration and differentiation are influential in the recognition of present variables towards learning.

In considering learners' ethnic and cultural background for learning development and academic performance, Apolonio (2017), in a local study of Indigenous education,

claimed that the kind of cultural orientation to which the learner adheres determines the likelihood of success in an educational setting. Contrary to this, Osborne (2016) noted that the level of affective filters of learners is affected only if the variables are stated and no other extraneous variables, such as ethnicity or cultural background, influence the study on effective filters.

In contrast, the study by Miller and Wiese (2018) contradicts the findings regarding the relationship between affective filters and ethnicity. They found no significant differences in affective filters based on ethnicity. However, it is important to consider that findings may vary depending on the specific context and sample population.

Table 15. Comparison in the Respondents' Level of Affective Filters when grouped by Birth Order

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Birth Order	Affective Biological Variable	0.40	0.75	Accept	Not Significant
	Affective Environmental Variable	0.49	0.68	Accept	Not Significant
	Affective Motivational Variable	0.83	.480	Accept	Not Significant
	Affective Social Variable	0.17	0.92	Accept	Not Significant

Regarding birth order, the analysis revealed no significant difference in the level of affective filters based on birth order. The F-values ranged from 0.17 to 0.83, and the associated p-values were all greater than the significance level. Consequently, it can be concluded that birth order does not have a significant influence on the level of affective filters.

This result is supported by Semana (2017) who notes that the sibling order of learners in a particular school is not a contributory factor to learners' affective filters. Further, Krashen (2018) revealed that the affective biological filter is not influenced by birth order, particularly in the learning development of learners.

Table 16. Comparison in the Respondents' Level of Affective Filters when grouped by Father's Economic Status

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Father's Economic Status	Affective Biological Variable	2.02	0.09	Accept	Not significant
	Affective Environmental Variable	5.47	0.00*	Reject	Significant
	Affective Motivational Variable	1.68	0.15	Accept	Not significant
	Affective Social Variable	1.18	0.32	Accept	Not significant

In terms of the father's economic status, the analysis indicated a significant difference in the level of affective filters based on the father's economic status. Specifically, the affective filter of the environment showed a significant difference. The F-value of 5.47 and the p-value of 0.00 indicated a significant relationship between the father's economic status and the affective environmental variable. However, no significant differences were found for the affective filters of biological, motivational, and social variables. Therefore, it can be concluded that the level of affective filters differs significantly based on the father's economic status, particularly in the environmental domain

.

This scenario is negated by several pieces of literature navigating the factors affecting students' academic performance in class. One of which is identified is the parents' socioeconomic status relative to their employment status. Jeremiah (2018) narrated that one of the enormous considerations for learners' success in school is the economic support emanating from parents. Thus, paternal support has been tagged as essential in a family for many economic reasons. Concerning students' learning development in school, students with more and better support from their parents are more likely to perform their daily tasks and activities in school.

Table 17. Comparison in the Respondents' Level of Affective Filters when grouped by Mother's Economic Status

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Mother's Economic Status	Affective Biological Variable	0.88	0.47	Accept	Not significant
	Affective Environmental Variable	4.52	0.00*	Reject	Significant
	Affective Motivational Variable	2.94	0.02*	Reject	Significant
	Affective Social Variable	1.78	0.13	Accept	Not significant

For the variable of the mother's economic status, the analysis revealed a significant difference in the level of affective filters based on the mother's economic status. Specifically, the affective filters of Environmental and Motivational showed significant differences. The F-value of 4.52 and the p-value of 0.00 indicated a significant relationship between the mother's economic status and the affective Environmental Variable. Similarly, the F-value of 2.94 and the p-value of 0.02 suggested a significant difference between the mother's economic status and the affective Motivational Variable.

However, no significant differences were found for the affective filters of Biological and Social. Therefore, it can be concluded that the level of affective filters differs significantly based on the mother's economic status, particularly in the Environmental and Motivational domains.

The economic status of maternal support significantly impacts learners' environmental and motivational development, as studies show that high maternal economic support leads to low affective filters in learners' domains.

In the same study by Jeremiah (2018), the unemployment of respondents' mothers negatively impacts children's learning development, but it doesn't guarantee improved school performance when mothers have ample time to teach.

Chen and Zhou's 2017 study reveals significant differences in affective filters among students based on their socioeconomic status, potentially affecting their learning experiences and academic performance.

Table 18. Comparison in the Respondents' Level of Affective Filters when grouped by Father's Highest Educational Attainment

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Highest Educational Attainment (Father)	Affective Biological Variable	1.48	0.22	Accept	Not significant
	Affective Environmental Variable	1.38	0.25	Accept	Not significant
	Affective Motivational Variable	2.73	0.04*	Reject	Significant
	Affective Social Variable	1.10	0.35	Accept	Not significant

Regarding the highest educational attainment of the parents, the analysis indicated a significant difference in the level of affective filters based on the highest educational attainment of both the father and the mother. Specifically, the affective filters of motivation showed significant differences. The F-values ranged from 2.73 to 3.63, and the associated p-values were all below the significance level. However, no significant differences were found for the affective filters of Biological, Environmental, and Social. Therefore, it can be concluded that the level of affective filters differs significantly based on the highest educational attainment of the parents, particularly in the Motivational domain.

The result confirms that paternal education level will not directly affect students' learning conditions and educational outcomes. However, Littkey (2004) as cited by Cardona (2015) revealed that when the family head, who is usually a father, makes efforts to educate the children, there is more likely to be a positive reinforcement of educational goals due to the father's influence in the family. The level of education of fathers could also be determinative of learners' success in classroom processes and activities

.

This learning condition categorically supports the significant difference between the levels of affective filters of the respondents when grouped according to their fathers' educational attainment. As discussed, paternal education affects the learning development of the offspring. This scenario is also characterized by an educational and learning principle wherein the learners' social and parental support are factors to consider learners' continuous development outside the classroom environment. Supporting this point, Akinsola (2017) has established that the higher the father's level of education, the better educational outcomes are deemed expected and realized by their children.

Table 19. Comparison in the Respondents' Level of Affective Filters when grouped by their Mother's Highest Educational Attainment

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Highest Educational Attainment (Mother)	Affective Biological Variable	1.07	0.37	Accept	Not significant
	Affective Environmental Variable	0.90	0.46	Accept	Not significant
	Affective Motivational Variable	0.91	0.45	Accept	Not significant
	Affective Social Variable	1.51	0.20	Accept	Not significant

Table 19 shows a comparison of the respondents' level of affective filters when grouped according to mothers' highest educational attainment. It is shown by the data that there were no significant differences established in the respondents' level of affective filter when grouped by biological variable, environmental variable, motivational variable, and social variable. Thus, it is implied that the respondents have the same level of affective filters across the variables.

Previous studies revealed that paternal education level significantly affects their children's learning development and educational success (Tan, 2017). Besides, Cheng (2018), in her study on parenting and scaffolding, also found the same assertions that mothers who are primarily guidance providers and scaffolding masters are hugely affecting their children's total learning development starting even from the early stages of childhood development. Filial support has been recognized as one of the best informal education methods. In the study by Policay (2021), during the implementation of the alternative modalities in education, it was noted that Filipino mothers provide learning and feedback support to their children who are undertaking such modalities. On the contrary, this was one of the causes of a student's low and diminished academic performance in the present study. Hence, the higher the mother's educational attainment, the more scaffolding techniques are provided to their children. The parents' educational attainment contributes to their children's learning development and complete educational experience.

Table 20. Comparison in the Respondents' Level of Affective Filters when grouped by Family Income

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Family Income	Affective Biological Variable	1.91	0.11	Accept	Not significant
	Affective Environmental Variable	2.24	0.06	Accept	Not significant
	Affective Motivational Variable	2.00	0.09	Accept	Not significant
	Affective Social Variable	3.43	0.01*	Reject	Significant

In terms of family income, the analysis revealed a significant difference in the level of affective filters based on family income. Specifically, the affective filter of society showed a significant difference. The F-value of 3.43 and the p-value of 0.01 indicated a significant difference between family income and the affective Social Variable. However, no significant differences were found for the affective filters of Biological, Environmental, and Motivational. This means that family income cannot be considered as a factor in considering affective filters. The income of the family does not have any influence or effect on the levels of affective filters in the biological, environmental, and motivational aspects. Therefore, it can be concluded that the level of affective filters differs significantly based on family income in the social domain.

This finding indicates that the financial status of the family of learners, as attributed to their monthly net income, significantly contributes to affective social filters. Tehseen & Madi (2015) noted that conditions in the place and budgeting capacity of their families impact the learners' performance and their retention conditions, which include facilities and school support materials present in their homes and available resources as alternatives for learning.

Table 21. Comparison in the Respondents' Level of Affective Filters when grouped by Structure

Profile Variable	Affective Filter Variable	F-computed value	p-value	Decision	Interpretation
Family Structure	Affective Biological Variable	3.83	0.01*	Reject	Significant
	Affective Environmental Variable	1.98	0.12	Accept	Not significant
	Affective Motivational Variable	3.63	0.01*	Reject	Significant
	Affective Social Variable	2.39	0.07	Accept	Not significant

Finally, for the variable of family structure, the analysis indicated a significant difference in the level of affective filters based on family structure. The affective filters of biological and motivational factors showed significant differences. The F-values ranged from 1.98 to 3.83, and the associated p-values were all below the significance level. This means that family structure contributes to the increase or reduction of affective filters of students in their biological and motivational variables. Specifically, when learners are living in extended or nuclear families, the result signifies that this factor influences their personal traits and motivational aspects.

However, no significant differences were found for the affective filter of environmental and social variables. Therefore, it can be concluded that the level of affective filters differs significantly based on family structure, particularly in the biological and motivational domains.

This result is supported by Petren (2015), who explained that family structure determines the level of participation of learners in school. It influences the behavior and thinking of children under such a structure. Specifically, Brown (2016) revealed that the extended family structure adversely affects learners' performance in school due to cited conditions such as no single form of a behavioral model and the adverse effects of multiple parenting.

In a longitudinal study done by Battaglia et al., (2017) they found that children who experienced persistent dependence and meek behavior who were raised in extended families between ages 1.5 and 6 years went on to show more internalizing symptoms, worse overall academic achievement, and poorer physical health later in childhood and preadolescence. While some research suggests nuclear being in isolation may not impact

a student's academic achievement, other research has found a strong correlation between filial ties and academic and social success (Brannlund et al., 2017).

Relationship between the Respondents' Level of Affective Filters and Academic Performance

Table 22. Relationship between the Level of Affective Filters and Academic Performance of the Respondents

Affective Filters	Pearson r – Value	P-value	Interpretation
Biological	0.48	0.00	Significant
Environmental	0.55	0.00	Significant
Motivational	0.46	0.00	Significant
Social	0.38	0.00	Significant

The table provides insights into the relationship between the level of affective filters and the respondents' academic performance.

Starting with the Affective Biological Variable, the Pearson correlation coefficient is 0.48. This indicates a moderately positive relationship between the level of affective filters in the biological domain and the respondents' academic performance. The p-value associated with this relationship is 0.00, which indicates that the relationship is statistically significant. This categorically means that personal traits, features, and characteristics of learners significantly influence and affect their academic performance. When their Affective Biological Variable is low, it is more likely that learners will develop academic success.

Moving to the Affective Environmental Variable, the Pearson correlation coefficient is 0.55. This indicates a strong positive relationship between the level of affective filters in the environmental domain and academic performance. The p-value of 0.00 suggests that this relationship is statistically significant. This result signifies that environmental aspects and circumstances of learners are contributory factors in their academic success and learning development. In a nutshell, learners' physical environment which includes their homes, communities, internal and external premises, classrooms, and school premises, makes a significant contribution to the increase or reduction of learners' academic achievement.

Next, the Affective Motivational Variable exhibits a Pearson correlation coefficient of 0.46. This indicates a positive relationship between the level of affective filters in the motivational domain and academic performance. The p-value of 0.00 indicates that this relationship is statistically significant. The result implies that intrinsic and extrinsic motivation factors exhibited by the learners affect their academic performance.

Lastly, the Affective Social Variable has a Pearson correlation coefficient of 0.38. This indicates a moderately positive relationship between the level of affective filters in

the social domain and academic performance. The p-value of 0.00 confirms the statistical significance of this relationship. In sum, when a positive correlation is obtained between affective social variables and academic performance, this shows that social environment and social circumspect of learners are contributory factors to their academic success. These social factors include but are not limited to their family members, peers, friends, classmates, teachers, or other significant higher authorities.

In summary, the table reveals that there is a significant relationship between the level of affective filters and the academic performance of the respondents. The strength of the relationship varies across the affective filter categories, with the Environmental variable showing the strongest relationship (r = 0.55), followed by Biological (r = 0.48), Motivational (r = 0.46), and Social (r = 0.38). These findings suggest that the affective factors in these domains play a role in influencing the academic performance of the respondents.

The results of the study confirmed the findings of Lingam (2018), which revealed that one of the critical factors that negatively affect students' academic performance is the affective filters in the form of social environments, such as a lack of guidance provided by teachers and academic supervisors. Also, Muwonge et al. (2021) found that poor social support from school administrators and supervisors from the school, too many students in some schools, poor allocation of teaching load in various schools, and being unjustly shifted from their original schools of posting are forms of affective filters that reduce academic performance.

In the context of educational outcomes in the new normal, Salacup (2021) revealed that students' low level of academic performance in their subjects is attributed to various affective filters such as a lack of filial and scaffolding support and insufficiency of teaching provisions. Moreover, it also cited that learners' emotional and social conditions affected their behavior and performance in the subject. Hence, affective filters manifest backlogs in the instruction processes (Nayir, 2020), such as a lack of classroom ambiance and a lack of motivational and social support
.

Finally, as pointed out by Evans (2021), educators are a key factor in improving a learner's mental health and in reducing their affective filters, with much of a learner's time being spent in school, educators are more aware of mental health disorders will be more prepared to better support and implement strategies into their schools and classrooms to support all students. Hence, there should be mechanisms adapted to mitigate the adverse effects of mental health issues and concerns in relation to affective filters as contributory factors in the learning development and academic performance of learners.

Conclusions

In light of the dynamic educational system in the country, the study has established that learners manifest a moderately favorable level of affective filters and satisfactory academic performance. The differences in affective filters are explained by academic

performance and learners' ethnicity, family structure, parents' highest educational attainment, nature of employment, and monthly net family income.

Generally, the study posits that least favorable or low affective filters yield higher academic performance. This notion is congruent with various educational principles modeling the importance of intrinsic and extrinsic factors in the learning development of students, including the social cognitive theory, the principle of behaviorism, physiological factors such as socio-economic status, and the environmental set-up of learning conditions. Hence, academic performance is also affected by learning walls called affective filters, teachers, administrators, parents, and guidance advocates must consider them in their instructional and psychosocial support.

Recommendations

After having analyzed the results of this study, the following are recommended:

1. Since it was found that affective filters are moderately favorable and negatively influence academic performance, it is vital that schools' division and schools develop and establish a supported and contextualized curriculum that centers on the affective needs of the students such as the integration of mental health education in the curriculum and personality education and development in the Junior High School level. Further, learning objectives and competencies must also be aligned with effective learning standards. Teacher-made instructional Materials may also be innovated considering students' unique needs and conditions.

2. Since the Affective Motivational Variable, Affective Biological Variable, and Affective Environmental Variable have a moderately favorable level of affective filters, factors that affect the motivational status and aspects of students' learning must also be strengthened. In schools' guidance and counseling functions, guidance counselors or any guidance advocates in schools may innovate special programs to enhance the motivational and emotional learning conditions of learners. These may be done through school symposia on understanding oneself, and coping mechanisms to stresses, anxiety, and other emotional conditions. School heads, administrators, and supervisors may integrate such programs and innovations in their School Improvement Plan or Annual Improvement Plan for budgeting and supervisory purposes.

3. Since the Affective Social Variable obtained the favorable mean of the Affective Filter Variable, it is recommended that the school's external community, including barangays, as part of the school's external stakeholders, may implement programs and projects on family relations and parenting. The Youth Sector of the barangay may initiate a particular project focusing on educational support for students who are experiencing cognitive and non-cognitive backlogs in their classes. Furthermore, in coordination with the Local Government Unit or Non-Governmental Organizations and private sectors, the barangay may succinctly

establish livelihood projects and employment opportunities for the unemployed and families below the poverty threshold.

4. Finally, the concept of affective filters as a novelty in education research may also be undertaken in other school subjects through different learning modalities. Future studies may also highlight and introduce new effective filters aside from the identified filters from previous studies.

Compliance with Ethical Standards

The author hereby declares that this research was conducted with adherence to ethical standards, ensuring the well-being and privacy of all participants. Informed consent was obtained from all students before data collection, and their anonymity was maintained throughout the study. The data was analyzed with sensitivity and respect for the diverse backgrounds and experiences of the participants. The findings are presented objectively and without bias, aiming to contribute to a better understanding of the role of affective filters in educational settings. All sources used in this research have been properly cited and acknowledged, and no plagiarism has occurred. This research is intended to be used for the advancement of educational practices and to promote the well-being of students.

Acknowledgments

The author extends her deepest gratitude to her research adviser for his unwavering support, insightful guidance, and encouragement throughout this research endeavor. A special thank you goes to the participants in the study for their generous contribution of time and honest reflections, making this research meaningful. The author is also grateful for the support and encouragement of her colleagues, friends, and family, whose belief in her has been invaluable. Finally, the author acknowledges the presence of God's grace and guidance, which has been a source of strength and inspiration throughout this journey.

ABSTRACT

Layunin ng pag-aaral na ito na tukuyin at suriin ang mga *morphological functions* ng Epikong Tuwaang: Pagdalo ng Kasal bilang batayan sa pagbuo ng modyul sa Grade 8 gamit ang teorya ni Propp. Sa pagsusuri, natuklasan na ang Epikong Tuwaang ay naglalaman ng 24 na *morphogical functions* kasama rito ang mahalagang papel ng pangunahing tauhan na si Tuwaang, na nagpapakita ng kapangyarihan at talino sa pagharap sa mga hamon at pagresolba sa mga problema. Batay sa natuklasan sa pag-aaral at ginawang analisis ng epiko, nakabuo ng isang yunit modyul ang mananaliksik na nagtataglay ng mga bahaging *learning competencies, paksa, pasimulang gawain, talakayan at pagbibigay ng pagsasanay na kontrolado at independyente, pagtatasa na kontrolado at independyente.* Batay sa nabuong analisis, inirerekomenda ng pag-aaral ang pagsama ng modyul na binuo sa pagsusuri ng Epikong Tuwaang:Pagdalo ng Kasal sa mga l*earning resources* para sa Grade 8 Filipino.

Susing-salita: *morphological functions, epiko, Tuwaang, yunit modyul*

INTRODUCTION

Ang kakulangan ng maayos na mapagkukunan ay maaaring magdulot ng mga hadlang sa pag-aaral ng mga estraktura at elemento ng mga epiko. Para sa mga mananaliksik at estudyante na nagnanais na maunawaan at suriin ang mga epikong ito, mahalaga ang malalim at tiyak na mga sanggunian upang magkaroon ng mas malawak at masistemang pagsusuri. Ang kakulangang ito ay maaaring humadlang sa pag-unawa at interpretasyon ng mga teksto at maaaring magdulot ng mga pagkakamali o pagkakapalit ng mga detalye o elemento ng mga epiko kapag isinasalin o isinusulat ang mga ito.

Upang malunasan ang suliraning ito, mahalagang gawin ang pagsisikap upang mahanap at mapreserba ang mga maayos na mapagkukunan para sa mga Epikong Tuwaang: Pagdalo ng Kasal. Maaaring isagawa ang sistematikong pananaliksik sa mga komunidad na may alam sa mga epikong ito, ang paghahanap ng mga transkripsiyon o mga kasulatan na nauugnay sa mga epikong ito, at ang pagtatala ng tradisyong oral ng mga kuwento mula sa mga katutubo o mga taong may kaalaman sa mga epiko.

Ang pagbuo ng yunit modyul ay isa sa tunguhan ng pag-aaral na ito upang mas madaling maitaguyod at pahusayin ang epektibong pagtuturo at pagkatuto. Ang paggamit ng mga pang-instruksiyonal na materyales ay iba’t ibang paraan na maaaring suportahan ang mga mag-aaral na mapataas ang kanilang kaalaman at mas mabuting pag-unawa sa nilalaman ng paksa.

Sa pamamagitan ng mga hakbang na ito, malalampasan ang suliranin ng kakulangan ng maayos na mapagkukunan at magiging mas malawak ang kaalaman at pag-unawa sa morpolohiya ng mga Epikong Tuwaang: Pagdalo ng Kasal. Ito ay magbubukas ng mga oportunidad para sa mas malalim na pag-aaral, pagsusuri, at pagpapahalaga sa kultura at tradisyon ng mga Pilipino na konektado sa mga epikong ito.

Popular ang morpolohiya ni Vladimir Propp dahil sa *unique* nitong katangiang kumilatis ukol sa mga elemento at pagkakasunod-sunod ng mga karakter at pangyayari. Ang kaniyang teorya ay kilala bilang *Morpology of the Folktale* o Morpoholohiya ng mga Salaysay ng Bayan. Sa konteksto ng pag-aaral ng Epikong Tuwaang, ang morpolohiya ni Propp ay maaaring magkaroon ng mahalagang papel sa pag-unawa at pagsusuri ng mga pangyayari at mga karakter sa salaysay. Ang pag-aaral ng morpolohiya ay nagbibigay-daan sa atin na mapaghiwalay ang iba't ibang bahagi ng kuwento at malaman ang mga pangunahing tungkulin at mga galaw na ginagampanan ng mga karakter. Katulad ng *The Morphology of Fairy Tales* ni Dundes (1978), isang Amerikanong *folklorist*, ginamit niya ang teorya ni Propp upang maunawaan ang estruktura at mga elementong naratibo ng mga *fairy tale*. Sa *Proppian Analysis of Bollywood Narratives* ni Ray (2007), sinuri niya ang *Bollywood narratives* gamit ang mga konsepto ni Propp upang maunawaan ang mga *function* at karakter. Sa *A Morphological Analysis of Greek Mythology* ni Georganas (2012), ginamit niya ang teorya ni Propp upang suriin ang mga mitolohiyang Griyego at maunawaan ang mga elementong naratibo at estruktura ng mga kuwento.

Sa Epikong Tuwaang, makikilatis ang ilang mga tauhan tulad ng mga pinuno, masamang tao, at bayani. Tinutulungan din nito ang mga karakter na maunawaan ang mga tradisyonal na tungkulin sa kuwento. Sa pamamagitan din nito, madidiskubre ang mahahalagang karakter sa pagpapasulong ng kuwento. Maaaring gumamit din ng isang espesyal na paraan ng pag-aaral na tinatawag na morpolohiya upang maunawaan kung paano nagkakaron ng koneksiyon ang lahat ng mga karakter at pangyayari. Nakatutulong din ang nasabing pagsusuri na mabigyang-linaw ang bawat aksiyon/kilos ng mga tauhan at nagbibigay ng interes at kawilihan sa mambabasa. Maihahambing din ang Epikong Tuwaang sa iba pang mga kuwento mula sa iba't ibang etnikong grupo sa Pilipinas upang maihambing ang pagkakatulad at pagkakaiba ng mga karakter at maging ang konteksto nito. Sa Epikong Tuwaang sa Mindanao, maaaring hindi pa ganap na naibigay ang isang malalim na pagsusuri sa estruktura ng tema at simbolismo na natagpuan sa epikong Mindanao at hindi pa ganap na isinasama ang Epikong Tuwaang sa mga pag-aaral na naglalayong ihambing ito sa iba pang mga epiko mula sa iba't ibang etnikong grupo sa Pilipinas. Ang pagkumparang ito ay maaaring magbukas ng mga ugnayan at pagkakapareho sa pagitan ng mga epiko ng Mindanao at iba pang rehiyon sa bansa.

Sa pag-aaral ni Padilla (2022), ginamit niya ang morpolohiya ni Propp bilang isang metodolohiya sa pagsusuri ng estruktura ng mga mito. Sa pag-aaral ni Dacillo (2021), ginamit ang estruktura ng mga tradisyonal na kuwentong Agusan Manobo at sa pananaw ng mga Manobo. Ang mga pag-aaral na nabanggit ay naglalayong maunawaan ang estruktura ng mga kuwento sa mga mito, epiko, at tradisyonal na kuwento ng Mindanao. Ipinakita nila ang mga ugnayan ng mga kuwento sa mga ideolohiya ng lipunan at mga kultural na halaga. Ang mga pag-aaral na ito ay may malaking ambag sa pagpapahalaga at pangangalaga ng mga mito at kuwentong-bayan bilang mahahalagang bahagi ng kulturang Pilipino.

Batay sa aklat na *Morphology of Folklore* ni Propp, nagbibigay ito ng magandang halimbawa ng paraan ng *orthodox formalist* na ipinakita sa pagsusuri ng istraktura ng mga epikong Mindanaoan. Isa sa mga mahahalagang konsepto na maaaring suriin at maunawaan ay ang *Thirty-One Function*. Ang *Thirty-One Function* ay isang termino na ginagamit sa pag-aaral ng mga epiko na may layuning maunawaan ang iba't ibang mga gamit at kahalagahan nito sa paglalahad ng kuwento. Ito ay isang sistematikong pag-aaral ng mga elemento at mga tungkulin na ginagampanan ng mga karakter at pangyayari sa epiko.

Kaya sa papel na ito, ang paggamit ng morpolohiya ni Vladimir Propp sa Tuwaang - Pagdalo ng Kasal ay masuri ang mga *function* at makabuo ng isang yunit modyul na angkop sa pangangailangan ng mga mag-aaral sa Grade 8.

Research Question

Tinatangka ng pag-aaral na sagutin ang tiyak na katanungang:

Ano-anong mga bahagi ng isang yunit modyul para maiugnay sa *morphological functions* ni Propp sa isang yunit modyul sa Grade 8?

METHODOLOGY

Research Design

Kuwalitatibong disenyo ang ispesipikong ginamit sa pananaliksik upang suriin ang Kuwentong Tuwaang: Pagdalo ng Kasal mula sa prosa ng aklat na *Philippine Folk Literature: The Epics* ni Damiana L. Eugenio nakalap mula sa orihinal na teksto at sa aklat sa Filipino 8. Sa pamamagitan nito, sinuri ang morpolohiya ng kuwentong Tuwaang Pagdalo ng Kasal gayundin ang mga tunggalian (*conflict*) at resolusyon na nakita at inilarawan sa kuwentong ito.

Locale of the Study

Ang pag-aaral na ito ay isinagawa ng guro na nagturo sa asignaturang Filipino sa ikawalong baitang.

Respondents of the Study

Ang pag-aaral na ito ay isang content analysis kaya walang sangkot na mga kabataan o mag-aaral sa pag-aaral na ito.

Sampling Procedure

Isa rin sa naging sanggunian o materyal na ginamit sa pagsusuring ito ang kuwentong Mindanao na natagpuan sa aklat na ginamit sa ikawalong baitang na Panitikang Pilipino sa hayskul na espesyal na ginamit ang Epikong Tuwaang. Naghanap din ng orihinal na kopya mula sa CMU University Library ang mananaliksik upang maging basehan at pagkukumpara sa bersiyong Filipino ang nasabing kuwento. Paglirip sa nilalaman at sistematikong pinag-aralan ang mga teksto upang maunawaan ang mga katangian at kabuuan ng teksto.

Sinuri ng mananaliksik ang mga salita, pangungusap, konsepto, tema, o iba pang mga elemento ng teksto upang matukoy ang mga estruktura at mga ugnayan sa loob ng mga ito.

Instrument of the Study

Ginamit ng mananaliksik ang teorya ni Vladimir Propp na *morphological functions* sa kuwentong Tuwaang: Pagdalo ng Kasal na nagtataglay ng mahabang salaysayin na nakasulat sa wikang Ingles at may salin sa Filipino naman sa ibang sanggunian.

Data Gathering Procedure

Ang mananaliksik ay naghanap ng orihinal na kopya ng epikong Mindanao na Tuwaang upang maging basehan sa kanyang pag-aaral tungkol sa Morphological Function sa Epikong Tuwaang: Pagdalo Ng Kasal. Matapos ang pag-aaral ng mananaliksik na nakabuo ng isang yunit modyul na magamit niya sa pagtuturo sa asignaturang Filipino sa ikawalong baitang. Isinagawa ang pag-aaral sa taong panuruan 2023-2024.

Statistical Treatment of Data

Sa pag-aaral na ito, ginamit ng mananaliksik ang content analysis upang mapag-aral at makabuo ng analisis ng Epikong Tuwaang: Pagdalo Ng Kasal bilang batayan sa pagbuo ng modyul sa Grade 8. Ito ay nagpapalawak ng kaalaman sa guro tungkol sa morphological function sa pagtuturo ng mga kuwentong-bayan sa asignaturang Filipino.

RESULTS AND DISCUSSION

Ano-anong mga bahagi ng isang yunit modyul para maiugnay sa morphological functions ni Propp sa isang yunit modyul sa Grade 8?

Batay sa naging resulta ng analisis na may 24 na *morphological functions* ang Epikong Tuwaang upang maiugnay ang resulta ng morpolohikal na analisis sa unang katanungan. Inilapat ang mga kasunod na sagot sa bahagi ni isang yunit modyul.

Una, ang modyul ay nagtataglay ng mga sumusunod na bahagi. Nariyan ang introduksiyon kung saan kabilang sa bahaging ito ang paglalahad ng kasanayan o kompetensi sa bawat yunit. Ang *learning competencies* sa edukasyon ay tumutukoy sa mga sistemang panturuan, pagtatasa, pagbibigay-grado, at pang-akademikong pag-uulat na batay sa ipinakikita ng mga mag-aaral na natutuhan nila ang kaalaman at kasanayan na inaasahan nilang makukuha habang patuloy silang lumalago sa kanilang edukasyon. Ang mga kakayahan ay mga pagsama-sama ng pangunahing kaalaman, kasanayan, at kakayahan (KSA) na kinakailangan upang makamit ang isang katanggap-tanggap na antas ng pagganap. Ang edukasyong batay sa kakayahan ay isang uri ng pag-aaral na nakatuon sa kung ano ang natututuhan ng mga mag-aaral kaysa sa gaano katagal sila nandoon sa silid-aralan.

Sa paksang epiko, may anim na *competency* ang inaasahan na nakamit ng mag-aaral pagkatapos ng yunit . Narito ang mga sumusunod na kompetensi:

Code	Kompetensi
F8PN-Ig-h-22	Nakikinig nang may pag-unawa upang - mailahad ang layunin ng napakinggan - maipaliwanag ang pagkakaugnay- ugnay ng mga pangyayari
F8PB-Ig-h-24	Napauunlad ang kakayahang umunawa sa binasa sa pamamagitan ng: - paghihinuha batay sa mga idea o pangyayari sa akda - dating kaalaman kaugnay sa binasa
F8PT-Ig-h-21	Nakikilala ang kahulugan ng mga piling salita/pariralang ginamit sa akdang epiko ayon sa: kasingkahulugan at kasalungat na kahulugang talinghaga
F8PD-Ig-h-21	Nauuri ang mga pangyayaring may sanhi at bunga mula sa napanood na *video clip* ng isang balita
F8PS-Ig-h-22	Nagagamit ang iba't ibang teknik sa pagpapalawak ng paksa: - paghahawig o pagtutulad - pagbibigay depinisyon - pagsusuri
F8PU-Ig-h-22	Naisusulat ang talatang: - binubuo ng magkakaugnay at maayos na mga pangungusap - nagpapa-hayag ng sariling palagay o kaisipan - nagpapakita ng simula, gitna, wakas
F8WG-Ig-h-22	Nagagamit ang mga hudyat ng sanhi at bunga ng mga pangyayari (dahil, sapagkat, kaya, bunga nito, iba pa)

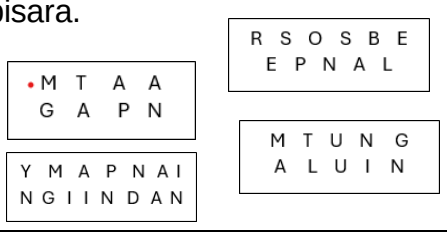
Sa *Competency-Based Curriculum Design* (2020-2022) ito ay pag-aaral tungkol sa integrasyon ng mga *competency* sa pagbuo at implementasyon ng mga kurikulum at modyul. Ito rin ay nakatuon sa paglikha ng mga *learning experience* na nakatuon sa kakayahan at *skill development*.

Sa *Competency-Based Teacher Training* (2018-2021) ito ay pagsulong ng mga programa at estratehiya ng pagsasanay na nakatuon sa pagbuo ng *competency* ng mga guro. Ito ay nakatuon sa aktibong pag-aaral, *hands-on* na mga pagsasanay, at *continuous professional development*.

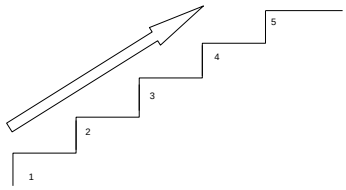
Sa bahaging introduksiyon pa rin, kasama ang pagpapakilala/pagtala sa paksa/*topic* tatalakayin. Ang paksa/*topic* ay ang pangunahing nilalaman o pokus ng Modyul. Ito ay ang sentral na tema o paksang binibigyang-diin at sinusubaybayan sa buong modyul. Ito ang nagbibigay-direksiyon sa mga gawain, materyal, at pagtataya na gagawin. Ito ay espesipikong pag-aaral o paksa na nakatuon sa isang tukoy na aspekto o *subtopic* na kaugnay ng mas malawak na kurso o programa. Ito ay naglalayong magbigay ng detalyadong pag-aaral at pag-unawa sa isang partikular na paksa.

Sa modyul na nabuo ng mananaliksik ang paksa ay tungkol sa epiko.

II. Paksang- Aralin	3.1 Epiko at Elemento nito (Buod ng Tuwaang: Pagdalo ng Kasal) 3.2 Tuwaang: Pagdalo ng Kasal (*Morphological functions)* 3.3. Tuwaang: Pagdalo ng Kasal (Tauhan sa kuwento/uri ng karakter ni Propp) 3.4 Tuwaang: Pagdalo ng Kasal (Sanhi at Bunga)



Ang paksa ng modyul na ito ay naaayon sa pagpapaunlad ng kakayahang pag-iisip at pagsusuri ng mga mag-aaral. Ito ay makatutulong sa kanila na maunawaan ang mga konsepto at teorya, gayundin naman ay ang kakayahang suriin at husgahan ang mga ito sa loob ng kontekstong panlipunan at pampolitika.



Sa modyul na nabuo ng mananaliksik ang paksa ay tungkol sa kaligirang pangkasaysayan at elemento ng epiko. Makita sa *appendices* C ang buod ng Epikong Tuwaang na naging batayan sa pagtalakay at pagsuri sa *morphological functions* ni Propp at ang uri ng karakter sa epiko.

Ang pangalawang bahagi sa modyul ay pamamaraan kung saan ito ay may proseso na kailangang sundin. Sa bahaging ito, hindi maaaring may kaligtaan na proseso. Narito ang proseso sa bahaging pamamaraan:

Una, pagbabalik-aral, ito ay maiugnay ang kasalukuyang aralin sa mga natutunan sa nakaraang aralin sa pamamagitan ng pagsusuri ng mga nakaraang konsepto. Sa modyul, ang pagbablik-aral ay ginawa sa pamamagitan ng pagtatanong hinggil sa paksang natakay. Sa pamamagitan ng pagtatanong, malalaman ang kanilang naunawaan sa paksang natalakay at naihahanda sila sa bagong paksang tatalakayin.

Sa bahaging pamamaraan dito ipakilala ang bagong aralin gamit ang kuwento, aktibidad, tula, awit, sitwasyon o iba pang gawain. Sa modyul na ito gumamit ang mananaliksik ng iba’t ibang estilo o estratehiya para makakuha ng atensiyon sa mag-aaral. Ang sumusunod ang mga ginamit na estilo ng mananaliksik.

Estilo/estratehiya	Kahulugan	Sa Talakayan
1. Word Puzzle	Ang *word puzzle* ay isang uri ng *puzzle* o laro na nakasentro sa mga salita at wika.	Panuto: Kumpletuhin at buuin ang salita na naglalarawan ng isang katangian ng lider. Idikit ito sa pisara. 

<table>
<tr>
<td>2. Ladder concept</td>
<td>Ang ladder concept strategy ay isang estratehiya sa pagtuturo na nakatutulong upang maging mas episyente at epektibo ang pagkatuto ng mga mag-aaral. Ito ay gumagamit ng isang ladder o serye ng mga konsepto na nakakatulong upang maiugnay at matuto ang mga mag-aaral nang mas mabuti.</td>
<td>Ayusin ang ang pagkasunod-sunod ng mga pangyayari sa natalakay na kuwento ni Tuwaang: Pagdalo ng Kasal. Ilagay sa bilang 1 ang unang nangyari , 2 ang sumunod hanggang matapos ang kuwento.
 
</td>
</tr>
<tr>
<td>3. Picture sequencing</td>
<td>Ang mga mag-aaral ay kinakailangan na isaayos o ihanay ang mga larawan ayon sa tamang pagkakasunod-sunod o sequence. Ito ay nakakatulong upang malinang ang kanilang kasanayan sa pagsama-sama sa mga detalye.</td>
<td>Panuto: May mga larawan akong ipapakita at ilagay mo siya sa dapat niyang kalagyan.
  </td>
</tr>
<tr>
<td>4. Sentence building</td>
<td>Ang sentence-building ay isang aktibidad sa pagtuturo na nakatuon sa pagbuo ng mga pangungusap mula sa mga binigay na elemento. Kadalasan, ang mga elemento na ibinibigay ay mga salita, frazes, o mga bahagi ng pangungusap na maaaring gamitin ng mga mag-aaral upang makabuo ng mga kompleto at maayos na pangungusap.</td>
<td>Panuto: Hanapin ang iyong kapareha para mabuo ang isang pangungusap.
<table>
<tr><td>Dahil sa puspusang pagsupo ng mga pulis sa mga ilegal na droga…</td><td>Marami ang nadakip at marami rin ang namatay</td></tr>
<tr><td>Inanunsiyo na ni Miss Universe Pia Wurthzbach na gaganapin sa Pilipinas ang nasabing patimpalak…</td><td>Marami ang nasisiyahan dahil ito ay isa sa mga pamamaraan upang makilala nang husto ang ating bansa at mapuntahan ang maraming</td></tr>
</table>
</td>
</tr>
</table>

			magandang tanawin
		Sinabi ng binata na linisin ang mga kalat sa buong bahay	Kaya ipinaliwanag ni Tuwaang na sila ay may pulang dahon.

Ang paggamit ng iba't ibang estratehiya sa pagtuturo ay pagpapahusay ng *academic performance*, pagpapaunlad ng *critical thinking* at *problem-solving skills*, pagtaas ng motibasyon at *engagement* sa pag-aaral, at pagpapaunlad ng *social* at *communication skills*. Sa kabuuan, ang epektibong paggamit ng iba't ibang estratehiya sa pagtuturo ay nakatutulong upang mapahusay ang kabuuang *learning experience* at *outcome* ng mga mag-aaral, na mahalaga para sa kanilang akademiko at personal na pagsulong.

Isang pag-aaral na inilathala nina Smith & Garcia (2019) sa *Journal of Educational Psychology* ay nagtukoy na ang paggamit ng *word puzzles* ay nakakatulong sa pagpapahusay ng *vocabulary* at *comprehension skills* ng mga mag-aaral. Ang mga mag-aaral na nakasali sa aktibidad ng *word puzzle* ay nagpakita ng mas mataas na *retention* at aplikasyon ng mga bagong *vocabulary* na natutuhan.

Ayon sa isang pag-aaral na inilathala nina Gonzalez & Tanaka (2021) sa *Educational Psychology Review*, ang paggamit ng *ladder concept strategy* ay nakakatulong sa pagpapahusay ng *critical thinking* at *problem-solving skills* ng mga mag-aaral. Ang mga mag-aaral na gumamit ng *ladder concept* ay nagpakita ng mas malalim na pag-unawa sa mga konsepto at mas mahusay na kakayahan sa paglutas ng problema.

Isang pag-aaral na inilathala nina Fernandez & Kim (2020) sa *Journal of Visual Literacy* ay nagpakita na ang paggamit ng *picture sequence strategy* ay nakakatulong sa pagpapahusay ng *reading comprehension* at *sequencing skills* ng mga mag-aaral. Ang mga mag-aaral na nakasali sa aktibidad ng *picture sequence* ay nagpakita ng mas mataas na kakayahan sa pagkakasunod-sunod ng mga pangyayari at detalye.

Ayon sa isang pag-aaral na inilathala nina Patel & Osman (2022) sa *Reading and Writing Quarterly*, ang paggamit ng *sentence building strategy* ay nakakatulong sa pagpapahusay ng *writing skills* at *grammatical accuracy* ng mga mag-aaral. Ang mga mag-aaral na gumamit ng *sentence building* ay nagpakita ng mas mahusay na kakayahan sa pagbuo ng mga kompleto at wastong mga pangungusap.

Sa bahagi pa rin ng pamamaraan, ito ay ang isang aktibidad o proseso sa pagtuturo at pag-aaral kung saan ang mga mag-aaral at guro/tagapagpadaloy ay nakikibahagi sa isang interaktibo at mapagpalaro na pag-uusap tungkol sa isang partikular na paksa o tema. Sa talakayan magkaroon ng mga tanong upang matulungang matuklasan at maintindihan ng mag-aaral ang konseptong itinuro. Ang mga tanong ay itatanong sa isang lohikal na paraan upang makapagbigay ng pang-unawa. Sa modyul gumamit ang mananaliksik ng mga tanong na may kaugnayan sa naunang gawain.

Ang talakayan ay ang maikling pagtalakay sa partikular na aralin. Sa modyul, sa unang araw tinalakay ang kasaysayan ng epiko at elemento nito lalong-lalo ang Epikong Tuwaang: Pagdalo ng Kasal. Sa ikalawa at ikatlong araw, tatalakayin o ipapakilala ng mananaliksik sa mag-aaral ang *morphological functions* ni Propp sa Epikong Tuwaang: Pagdalo ng kasal at susuriin nila ito. Sa ikaapat na araw, susuriin naman ang pitong uri ng karakter na natalakay ni Propp sa kaniyang aklat. Sa huling araw, pag-aaralan ang sanhi at bunga sa epiko.

Paksa	Talakayan
3.1 Epiko at Elemento nito (Buod ng Tuwaang: Pagdalo ng Kasal)	Pagtalakay sa buod ng Epikong Tuwaang: Pagdalo ng Kasal mula sa https://www.kapitbisig.com/philippines/bilingual-tagalog-english-version-of-epics-mga-epiko-tuwaang-epic-of-bagobo-bilingual-tagalog-english-version_794.html Mga Gabay na Tanong: 1. Sino ang pangunahing tauhan sa akda? 2. Paano inilarawan si Tuwaang bilang isang lider? 3. Naging mabuting lider ba si Tuwaang ? Ipaliwanag ang inyong sagot. Pagtalakay sa Kaligirang Pangkasaysayan ng epiko at elemento nito mula sa https://filipino.net.ph/epiko/ Ipakilala si Vladimir Propp. Pagtalakay sa morphological function ni Vladimir Propp.
3.2 Tuwaang: Pagdalo ng kasal (Morphological functions)	Mga Tanong: 1. Ano ang morphological functions ni Propp? 2. Bakit niya ito nabuo? Nakabubuti ba ito? Nakatutulong ba ito sa atin sa pag-aaral ng kuwentong-bayan? Sa anong paraan?
3.3. Tuwaang: Pagdalo ng Kasal (Tauhan sa kuwento/ uri ng karakter ni Propp)	Pagtalakay sa 7 uri ng karakter at mga larangang aksiyon ni Propp sa mga tungkulin ng kuwento." Vladimir Propp 7 Character Types and Narrative Theory (media-studies.com) Mga Tanong: 1. Ano-ano ang pitong uri ng karakter sa larangan ng aksiyon ni Propp? 2. Mahalaga ba ito sa pag-aaral ng kuwento?

3.4 Tuwaang: Pagdalo ng Kasal (Sanhi at bunga)	3. Dapat ba sa isang kuwento na naroon ang pitong uri ng karakter? Ipaliwanag Pagpapanood ng isang vi*deo clip* ng balita ng mga mag-aaral. http://www.youtube.com/watch?v=Zxrz1vah9jg Mga Gabay na Tanong 1. Tungkol saan ang iyong napanood na balita? 2. Ano ang rason kung bakit nangyari ang ganoong sitwasyon? 3. Ano-ano kaya ang magiging mga hakbang para maiwasan ang nagyari? Pagtalakay sa sanhi at bunga. Ikokonekta ang sanhi at bunga sa tunggalin at resolusyon sa *morphological function*.

Ayon sa pag-aaral nina Park & Kim (2023) ang *discussion-based* na pagtuturo ay nakakatulong sa pagpapahusay ng aktibong pakikilahok at motibasyon ng mga mag-aaral. Ang mga mag-aaral na nakasali sa *discussion* ay nagpakita ng mas mataas na antas ng *engagement* at interes sa paksa, na nagreresulta sa mas mataas na *academic performance*.

Kaugnay rin sa pag-aaral nina Kim & Park (2021) ang *discussion-based* na pagtuturo ay nakakatulong sa pagpapahusay ng *academic performance* at *retention* ng mga mag-aaral. Ang mga mag-aaral na aktibong nakikibahagi sa *discussion* ay nagpakita ng mas mataas na antas ng pag-unawa at kakayahang i-apply ang mga natutuhan.

Ang pagtalakay o *discussion* ay isang mahalagang aspekto ng proseso ng pagtuturo at pag-aaral dahil ito ay nakakatulong sa pagpapahusay ng iba't ibang *critical* at *cognitive skills* ng mga mag-aaral. Ang pagtalakay o *discussion* ay nagbibigay-daan sa mga mag-aaral na maging mas aktibo at interesado sa pag-aaral, dahil ito ay nagbibigay-daan sa kanila na maging mas partisipante sa proseso ng pag-aaral.

Sa bahagi ng pamamaraan ang mga pagsasanay ay isang mahalagang bahagi ng proseso ng pag-aaral at pagkatuto. Ito ay tumutukoy sa mga aktibidad na ginagawa ng mga mag-aaral upang palawigin, palakasin, at mapanatili ang kanilang mga kasanayan at kaalaman.

Kontroladong Pagsasanay: Ito ay ang mga pagsasanay na pinangungunahan at kontrolado ng guro. Maaaring magsama ng mga takdang gawain, ehersisyo, at aktibidad na Ito ay ang mga pagsasanay na pinangungunahan at kontrolado ng guro.

Maaaring mag-include ng mga takdang gawain, ehersisyo, at aktibidad na may tukoy na mga instruksiyon at *guidelines*. Nakakatulong ito upang matulungan ang mga

mag-aaral na matutong mabisang magsagawa ng mga gawain. Dito, ang guro ay nagbibigay ng *feedback* at pagwawasto.

Naniniwala si Rosenshine (2012) na ang *controlled practice* ay nagbibigay-daan sa mga mag-aaral na mag-apply ng mga natutuhan sa mga kontrolado at estruktural na sitwasyon, na nakakatulong sa kanilang pag-unawa at kakayahang mag-apply ng mga kasanayan at konsepto.

Ayon kay Tomlinson (2014), ang *controlled practice* ay nagbibigay-daan sa mga guro na mas epektibong i-address ang iba't ibang pangangailangan at antas ng mga mag-aaral.

Kontroladong Pagtatasa: Ito ay ang mga pagtatasa na pinangungunahan at kontrolado ng guro. Maaaring magsama ng mga *quiz*, pagsusuri, at iba pang gawain na may tukoy na mga instruksiyon at *guidelines*. Nakakatulong ito upang matipid at matukoy ang antas ng pag-unawa at kakayahan ng mga mag-aaral. Dito, ang guro ay nagbibigay ng *feedba*ck at nagpapataw ng mga grade.

Bilang susog sa kaisipan ukol sa kontroladong pagtatasa, nabanggit sa pag-aaral ni Wiliam (2011) na ang kontroladong pagtatasa ay nagbibigay-daan sa mga guro na gamitin ang kontrolado at nakatutulong na pagtatasa bilang bahagi ng regular na pagtuturo na pinatotohanan naman batay sa parehong ideyang inilahad sa artikulo ni Bennett (2011). Ito rin ay nagpapakita kung paano ang kontroladong at nakatutulong na pagtatasa ay makakatulong sa pagbuo ng kultura ng pag-aaral sa silid-aralan (Shepard, 2000).

Ang independiyenteng pagsasanay: Ito ay ang mga pagsasanay na ginagawa ng mga mag-aaral nang walang direktang pamamahala ng guro.Maaaring magsama ng mga takdang gawain, proyekto, at iba pang aktibidad na nangangailangan ng pag-iisip at pagsagawa ng mga mag-aaral. Nakakatulong ito upang magkaroon ng mas mataas na lebel ng awtonomiya at pananagutan sa pagkatuto. Dito, ang guro ay nagbibigay ng limitadong *feedback* at suporta.

Para naman kay Hattie (2008), ang independiyenteng pagsasanay kinalalangkapan ng *feedback* at *assessment* na mahalaga sa pagpapahusay ng akademikong pag-unlad. Dagdag pa Marzano (2007), ang ideyang ito ay nagpapakita na ang independiyenteng pagsasanay, kasama ang iba pang estratehiya ay kritikal sa pagpapahusay ng pag-aaral at tagumpay ng mga mag-aaral.

Ayon naman kay Rosenshine (2012) nagpapakita na ang independiyenteng pagsasanay, kasama ang kontroladong pagsasanay ay kritikal sa pagpapahusay ng pag-unawa at kakayahan ng mga mag-aaral.

Ang Independiyenteng Pagtatasa ay isang uri ng pagtatasa na ginagawa ng mga mag-aaral nang walang direktang pamamahala ng guro. Maaaring magsama ng mga pananaliksik, presentasyon, at iba pang aktibidad na nagpapakita ng kanilang pag-unawa

at kakayahan. Nakakatulong ito upang matukoy ang antas ng pag-unawa at pagsisikap ng mga mag-aaral. Dito, ang guro ay nagbibigay ng *feedback* at *grade* sa pangkalahatan.

Ayon kina McMillan & Hearn (2008), ito ay nagpapakita na ang independiyenteng pagtatasa, tulad ng *self-assessment* ay makakatulong sa pagpapataas ng motibasyon at tagumpay ng mga mag-aaral ang ideang ito ay katulad sa pag-aaral nina Andrade & Valtcheva (2009).

Ang kabuuang idea sa pagsasanay na ito ay isang komprehensibo at detalyadong paglalarawan ng iba't ibang uri ng pagsasanay at pagtatasa sa edukasyon. Ang kombinasyon at pagkakaiba-iba ng mga ito ay mahalaga sa proseso ng pagkatuto.

Ang pinadadaloy/kontroladong pagsasanay at pagtatasa ay nagbibigay ng gabay at suporta sa mga mag-aaral habang sila ay nagsasanay. Ito ay nakakatulong upang matutong mabisang magsagawa ng mga gawain at matukoy ang antas ng kanilang pag-unawa.

Ang independiyenteng pagsasanay at pagtatasa ay nagbibigay ng mas malaking awtonomiya at pananagutan sa mga mag-aaral. Ito ay nakakatulong upang lumikha ng mas mataas na antas ng pag-iisip at pagsagawa, at matukoy ang kanilang lebel ng pag-unawa at pagsisikap.

Sa kabuuan, ang kombinasyon ng lahat ng ito ay nagbibigay ng komprehensibong karanasan sa pagkatuto, na nakakatulong upang makamit ang mga layunin sa edukasyon.

Conclusions

Sa pag-aaral ng morphological functions ni Propp sa Epikong Tuwaang: Pagdalo ng Kasal, natuklasan ng mananaliksik na ang pagbuo ng isang yunit na modyul sa Grade 8 ay napakaimportante para mas malawak o malawig ang kanilang pag-unawa sa pagsusuri gamit ang morphological functions ni Propp hindi lamang sa epiko kundi sa ibang kuwento. Ang modyul ay nagbigay ng oportunidad sa mga mag-aaral upang mag-isa nilang matuklasan at matutuhan ang mga konsepto. Ito ay nakakatulong sa pag-unlad ng kanilang kakayahang mag-isa silang mag-aral. Ang modyul na ito ay may maayos na estruktura at proseso na nakakatulong sa pagkatuto at pag-unawa ng mag-aaral sa paksang natatalakay, kabilang ang morphological functions at elemento ng Epikong Tuwaang.

Recommendations

Batay sa naging resulta at kongklusyon ng pag-aaral, inirerekomenda ng pag-aaral ang sumusunod:

Una, Ipatupad ang modyul na ito sa Grade 8 upang mas maunawaan ng mga mag-aaral ang konsepto ng morphological functions.

Pangalawa, Ipalawig ang paggamit ng modyul at konsepto ng morphological functions hindi lamang sa Epikong Tuwaang kundi pati na rin sa iba pang uri ng kuwento at tekstong naratibo.

Pangatlo, Pataasin ang kakayahan ng mga mag-aaral na magamit at mag-analisa ng morphological functions sa iba't ibang konteksto.

Acknowledgements

Nais kong ipahayag ang aking walang katapusang pasasalamat at pagpapahalaga sa mga tao na naging sandalan ko hanggang matapos ang papel na ito.

Una sa lahat, nais kong magpasalamat sa Panginoon sa lahat ng pagpapala, karunungan, at patnubay na ibinigay Niya sa akin. Naramdaman ko ang Kaniyang presenya sa tuwing ako ay panghinaan ng loob at kawalan kompiyansa sa sarili. May mga tao siyang pinadala o instrument para magbigay sa akin ng lakas at paggabay sa lahat ng aking mga plano at desisyon sa pagbuo ng pananaliksik na ito.

Sa aking pamilya, lalo na sa aking magulang at mga kapatid lubos akong nagpapasalamat sa inyong walang-sawang pag-unawa sa mga oras na kinailangan kong ilaan para sa paggawa ng thesis. Sa aking anak na si Faith, salamat sa iyong pag-unawa na sa loob ng dalawang taon nabawasan ang ating oras sa bonding. Kay Glen, hindi ko ito matatapos kung hindi sa lahat ng iyong tulong. Hindi ko ito magagawa kung wala ang iyong buong suporta, oras, panahon at encouragement sa panahon na gusto ko ng sumuko.

Sa aking napakagaling at matalinong *Thesis Adviser na si* (Dr. Freddielyn B. Pontemayor) at sa mga panel member na sina (Ma’am Marbeth at Ma’am Estrella) lubos akong nagpapasalamat sa inyong walang-sawang gabay, suporta, at kaalaman na ibinahagi ninyo sa akin. Kayo ang aking naging lakas at sandigan ko sa paglalakbay na ito. Salamat sa inyong gabay upang mapalawak ang aking kaalaman sa pag-aaral na ito. Ang inyong mga puna, katanungan, at mga rekomendasyon ay nagdulot ng pag-unawa at pagpapabuti sa aking pagsasaliksik.

Sa aking mga kaibigan at katrabaho, nais ko kayong pasalamatan sa inyong suporta, pag-unawa at inspirasyon. Salamat sa mga salitang pampalakas ng loob na ibinigay ninyo sa akin. Nagpapasalamat din ako sa iba pang mga indibidwal na naglaan ng suporta, tulong, at panalangin upang matamo ko ang tagumpay na ito. Buong puso kong pinahahalagahan ang kanilang kontribusyon at ito'y magiging inspirasyon sa akin upang patuloy na magpakabuti at maglingkod sa larangan ng aking pag-aaral.

Complicance with Ethical Standards

Isinaalang-alang ng mananaliksik ang etikal na konsiderasyon upang masiguro ang pagiging wasto at kaayusan ng pag-aaral. Ang pananaliksik na ito ay naglayong suriin at sistematikong pag-aralan ang mga teksto upang maunawaan ang kanilang nilalaman

at mga katangian. Tiniyak din ng mananaliksik na makapag-*apply* ng IERC Permit batay sa pagtalima ng mga kinakailangang dokumento upang maaprubahan.

Ang pagkakasangkot ng mga tao ay hindi naaangkop sa pag-aaral, ngunit sinunod ng mananaliksik ang tamang paraan ng pagsusuri sa napiling epiko batay sa teorya o modelo na nakabatay sa pag-aaral. Tiniyak din na ang mga datos na nakalap ay tiyak at tumpak.

ABSTRACT

The COVID-19 pandemic has presented unprecedented challenges to the hotel industry, particularly impacting establishments in Dumaguete City. However, amidst these adversities, a study aims to explore how hotels in the area have employed marketing strategies to navigate the crisis and lay the groundwork for a resilient recovery. Utilizing a descriptive research approach, the study collected data through questionnaires, interviews, and observations from twenty-four participating hotels. Results tell that despite facing significant hurdles, the majority of these hotels are accredited by the Department of Tourism and maintain a bed capacity of 50 to 99 persons. Despite challenges, they have displayed resilience, maintaining a monthly average occupancy rate of up to 90 percent, reflecting sustained tourist activity. Notably, many hotels have established themselves in the industry, emphasizing their effectiveness and longevity. Marketing strategies have focused on innovative approaches such as local tours, culinary experiences, and wellness activities, driven by personalization to enhance guest satisfaction. Technology adoption, including chatbots and customized emails, has facilitated direct bookings and operational efficiency. Dynamic pricing mechanisms, supported by revenue management systems, have enabled profit optimization and market adaptation. Leveraging social media and content marketing, hotels have enhanced visibility and engagement, aiming for sustainable growth and success in the post-pandemic era.

Keywords: *Pandemic, Hotel Industry, Marketing Strategies, Recovery Framework, Digital Presence*

INTRODUCTION

The world has shifted in unbelievable ways since the pandemic began, and the hotel industry, known for its resilience and agility, has been at the forefront of this transformation. The hotel industry, significantly impacted by COVID-19, requires empirical studies to establish effective marketing strategies that can respond to the pandemic and prepare for recovery. Under Republic Act No. 11469, also known as the Bayanihan to Heal as One Act, the President has the authority to oversee the operations of establishments to reduce the spread of COVID-19 and aid in the recovery of the Philippine economy. Additionally, the Tourism Act of 2009 mandates the Department of Tourism to enforce a comprehensive system of accreditation for tourism enterprises, including hotels and other accommodation establishments.

In the hospitality sector, choosing the right hotel capacity is crucial from a strategic standpoint for stakeholders. Dumaguete City, recognized as the most improved city during the 10th Cities and Municipalities Competitiveness Summit in October 2022, is a fast-growing and competitive town in Negros Oriental. The hotel industry in Dumaguete faced a tremendous crisis during the pandemic, with operations shut down to counter the hazards posed by the virus. Despite this, Dumaguete is home to 33 registered hotels, catering to work, relaxation, official business travel, and excursions, including establishments like Hotel Essencia, Hotel Nicanor, and Bethel Guest House.

During the pandemic, the focus has been on revitalizing marketing strategies for the hotel industry's recovery. The pandemic has drastically altered the demands of the hospitality sector, making it increasingly competitive and highlighting the strategic value of marketing management. Developing a strategic marketing recovery plan is essential for the industry's survival and growth.

This study aims to evaluate how strategic marketing management is implemented and its effectiveness within Dumaguete City's hotel industry. The results will offer guidance to future hotel managers and top executives, particularly in navigating crises like the pandemic. They'll gain crucial understanding into overcoming industry challenges, underscoring the importance of adapting marketing strategies to a constantly evolving landscape.

METHODOLOGY

Research Design

To fulfill the study's objectives, the researcher utilized a descriptive correlational design, distributing self-created survey questionnaires to respondents. Using accessible resources, this method shows the nature of the current situation at the time of the study. The researcher used the 4Ps of Marketing Mix in this investigation, focusing on marketing strategies during the post-pandemic. To further validate the results, self-interviews, and observations were undertaken with the identified key participants.

Research Participants

The participants of the study were managers and supervisors in the hotel industry in Dumaguete City. A total of 86 responses were collected by distributing at least five questionnaires to each of the 24 hotels in Dumaguete City. The data collection took place over four working days, from March 16 to March 20, 2024, and from March 29 to April 2, 2024. Additionally, feedback from hotel receptionists on duty was considered for validation purposes to support the study.

Research Locale

The study took place in Dumaguete City, Negros Oriental, known as the City of Gentle People, and a prominent university town. This lovely city in Central Visayas, Region 7, has become a favorite tourist destination, drawing visitors globally. While diving has long been the main attraction, The city government has also emphasized promoting land-based tourist attractions in Dumaguete and Negros Oriental. The city is subdivided into 30 barangays, the smallest political divisions in a Philippine city.

The respondents for the study were visited at their respective hotel establishments and provided with self-made questionnaires, approved by the managing head. Data collection occurred over four working days, from March 16 to March 20, 2024, and from March 29 to April 2, 2024.

Dumaguete, the capital of Negros Oriental, boasts a population of around 125,000 residents., although this number can double or even triple during the daytime. This vibrant city quickly captivates the hearts of its visitors, making it more than just a gateway to nearby tourist destinations.

Data Gathering Procedure

The study took place in Dumaguete City, Negros Oriental, also known as the City of Gentle People and a well-known university town. This charming city, located in Region 7, Central Visayas, has become a popular tourist hotspot, attracting visitors from around the

world. While diving has long been the main attraction, the city government has also focused on promoting land-based tourist attractions in Dumaguete and Negros Oriental. The city is subdivided into 30 barangays, the smallest political divisions in a Philippine city.

To conduct the study, respondents were visited at their respective hotel establishments and provided with self-made questionnaires, approved by the managing head. Data collection occurred over four working days, from March 16 to March 20, 2024, and from March 29 to April 2, 2024. Dumaguete, the capital of Negros Oriental, has a population of approximately 125,000, although this number can double or even triple during the daytime. This vibrant city quickly captivates the hearts of its visitors, making it more than just a gateway to nearby tourist destinations.

Data Analysis Procedure

Frequency distribution was used to calculate the effectiveness of implementation of strategies. Each entry in the table denotes the frequency or count of occurrences of values within specific groups or intervals, providing a summary of the distribution of values in the sample. Weighted mean, on the other hand, accounts for variation in the relative contribution of individual data values to the mean. Percentage analysis aids in determining the proportion of a specific dataset relative to the whole, enabling the establishment of the hotel industry profile.

Pearson's correlation coefficient measures how strong and in what direction two continuous variables are related. This study looks at how the hotel industry profile relates to how marketing strategies are used, and how the level of strategy implementation affects their effectiveness in Dumaguete City's hotel industry. Regression analysis is used to figure out how important current marketing strategies are and how well they're being used in the industry.

Ethical Considerations

The researcher carefully considered ethical considerations in conducting the research, ensuring transparency, informed consent, voluntary participation, confidentiality, and the well-being of the participants. All necessary ethical considerations and protocols for the entire duration of the study were stringently followed. The researcher also maintained the confidentiality of all data obtained, including the support personnel's identity as well as their ratings. Moreover, the researcher secured ethical approval from the Ethical Committee of the University Research Office.

RESULTS AND DISCUSSION

Table 1. Accreditation with Department of Tourism

Accreditation With the Department of Tourism	Frequency	Percentage
Star Rating (2-5 Star)	35	28.93
Accredited Hotel with Certification	76	62.81
Not Yet Accredited with DOT	10	8.26
For others, please specify	0	0
Total	121	100

The hotel industry in Dumaguete City showcases a high level of compliance with quality and regulatory standards, as demonstrated by the 62.81% accreditation rate from the Department of Tourism (DOT). This significant proportion underscores the industry's commitment to maintaining high standards in service and operations. According to Chen and Chen (2019), accreditation serves as a benchmark for quality assurance, encouraging hotels to adopt best practices in service delivery and operational efficiency. This is corroborated by Mensah and Dei Mensah (2019), who found that accreditation processes prompt hotels to invest in staff training and development, leading to enhanced customer satisfaction and operational effectiveness. Furthermore, Guillet and Kucukusta (2016) highlight that accredited hotels often benefit from preferential treatment in government-led marketing initiatives, increasing their visibility and attractiveness to potential guests, and thereby boosting occupancy rates and revenue.

Recent studies further emphasize the broader benefits of accreditation. Hao, Chon, and Wen (2021) stress that continuous quality assessment and improvement are essential for maintaining high standards in the hospitality industry. This proactive approach not only ensures compliance with current standards but also prepares hotels to meet future needs and expectations of tourists, fostering long-term sustainability and success. Additionally, Yang, Liu, and Li (2020) found that accreditation enhances a hotel's reputation and credibility, which are critical for attracting international tourists. The integration of sustainable practices into hotel operations, as suggested by Sigala (2018), is increasingly important for accreditation, attracting eco-conscious travelers and providing a competitive edge. These insights illustrate that accreditation not only ensures compliance and quality but also drives continuous improvement, marketing advantages, and sustainability, contributing to the robust growth and competitiveness of the hotel industry in Dumaguete City.

2.60 – 3.39	Effective
1.80 – 2.59	Somewhat Effective
1.00 – 1.79	Not Effective

The table above illustrates the goods and services provided by the hotel industry in Dumaguete City to meet customer needs. The data shows that hotels in Dumaguete City prioritize flexibility and responsiveness to customer demands and expectations, achieving the weighted mean of 4.53 (rank 1). In contrast, the use of analytics to gain insights into customer behavior received the lowest weighted mean of 3.81 (rank 5). According to Shi (2021), factors such as organizational culture, location, brand image, and competition

significantly influence hotel managers' strategic decisions. The model of hotel resilience offers a valuable framework for planning and implementing strategies to address external challenges. In challenging times, hotel managers are advised to adopt a range of innovations targeting both internal management and customer service. For instance, the development of chatbots, as noted by Putri et al. (2019), enhances marketing and customer support by offering increased convenience, reducing service and support costs, enabling personalized marketing, and creating new data collection opportunities.

The effectiveness of the hotel industry's products and services in Dumaguete City is evident from the weighted mean scores. The application of various marketing strategies, with a 4.65 weighted mean, indicates that the industry is keenly attuned to client needs and consistently enhances its marketing efforts. Similarly, the delivery of unique and memorable guest experiences through distinct services and offerings also achieved a weighted mean of 4.65. Lei (2024) emphasizes the importance of service customization, which involves tailoring services to meet the specific needs of individual customers, recognizing them as distinct individuals rather than anonymous service users. This approach aligns with the tourism industry's unique characteristic of being dynamic and adaptable to changing conditions and customer preferences, as highlighted by Siwek et al. (2022). These findings underscore the industry's commitment to continuous improvement and responsiveness to customer needs, which are crucial for maintaining competitiveness and customer satisfaction.

Table 2. The extent of Implementation and Level of Effectiveness of Price

B. PRICE	SD	WX	RANK	B. PRICE	SD	WX	RANK
Tools like revenue management systems can aid this process.	0.82	4.21	3	Adopting dynamic pricing maximized our profits by adjusting rates to meet the current market demand.	0.89	4.16	4
Implement customized pricing according to customer loyalty and booking history. Loyalty programs and exclusive deals for members can hel achieve this goal.	0.71	4.45	1	This strategy boosted profitability by enabling us to set prices at the optimal level for each individual, minimizin lost sales during periods of high demand.	0.94	4.16	4
Ensure that all costs, including taxes and service charges, are mentioned during the booking proces to avoid customer dissatisfaction later.	0.86	4.45	1	This approach fostered trust with customers by offering price transparency, enabling them to grasp the value they receive and compare it with competitors.	0.60	4.70	1

When pricing other hotel services like spa treatments, dining experiences, and event spaces, consider offering packages or bundled deals to enhance perceived valu	0.82	4.20	4	This strategy allowed our hot to meet the specific requirements of different clients and enhance custome satisfaction.	0.68	4.44	3
Monitor competitors' pricin strategies and ensure your rates are competitive. Don just compete on price but differentiate based on the value provided to guests.	0.79	4.28	2	It yielded numerous benefits for hotels, ranging from identifying market opportunities to optimizing operational efficiency.	0.69	4.45	2
cwx = 4.32 Very Well Implemented				**cwx = 4.38 Very Effective**			

The hotel industry excels in implementing personalized pricing strategies, earning a commendable weighted mean of 4.45. Personalized pricing hinges on factors like customer loyalty and booking history. Hotels prioritize transparency during the booking process, disclosing all expenses, including taxes and service fees, to mitigate consumer dissatisfaction (weighted mean = 4.45). However, other hotel services like spa treatments received a lower ranking, with a weighted mean of 4.20. According to Koo et al. (2020), implementing loyalty programs significantly enhances customer satisfaction and loyalty, fostering long-term financial success and strengthening the consumer-brand relationship. Thus, loyalty programs emerge as indispensable tools for cultivating patronage.

The efficacy of the pricing strategy is evident from the data. The transparent inclusion of taxes and service fees at the time of booking, with a weighted mean of 4.70, has been shown to develop customer trust. Transparent pricing allows customers to compare prices with competitors and understand the value they are receiving. However, dynamic pricing, which involves adjusting prices based on market conditions, received the lowest weighted mean of 4.16. Bagchi et al. (2021) suggest that hotels can enhance guest satisfaction and improve revenue by selecting appropriate service designs and managing resource flows effectively. Additionally, Chan et al. (2021) emphasize that customer experiences are both emotional and cognitive. Therefore, monitoring guest requirements, preferences, and perceptions is critical to successfully delivering exceptional guest experiences.

Table 3. The extent of Implementation and Level of Effectiveness of Promotion

PROMOTION	SD	WX	RAN	PROMOTION	SD	WX	RANK
Developing a robust content marketing strategy is essential. To attract potential guests, utilize various mediums such as website	0.81	4.12	3	This strategy has increase our brand awareness, improved customer	0.72	4.20	4

content, blogs, videos, and guides focusing on travel and hospitality.				engagement, and higher website traffic.			
Use social media platforms to showcase your hotel's offerings, share guest experiences, and engage with your audience.	0.82	4.49	1	This strategy empowered our hotel to produce and disseminate pertinent content, including promotions, industry news and engaging trivia, fostering brand awareness among potential customer	0.88	4.31	3
Partner with influencers who align with your brand to reach a wider audience. Ensure the content created is authentic and resonate with the influencer's audience.	1.03	3.31	5	This strategy allowed us tap into new audiences an establish their brand as must-visit destination.	1.08	3.60	5
Optimize your website and conten for search engines by incorporatin keywords that potential guests commonly search for, thus boosting visibility.	0.92	4.09	4	It led to more bookings an revenue for the hotel.	0.81	4.41	2
Regularly measure the effectiveness of your promotional strategies and be willing to adapt based on what's working and what's not.	0.81	4.43	2	This strategy raised brand visibility, engage customer build relationships, and increase revenue.	0.76	4.49	1
cwx = 4.09 Well Implemented				**cwx = 4.20 Highly Effective**			

Table 3 illustrates the implementation of promotional strategies by the hotel industry in Dumaguete City. Promotion involves informing customers about the features and advantages of a product. The data indicates that social media use is the most effective promotional strategy, with a weighted mean of 4.49. In contrast, using influencers ranked lowest with a weighted mean of 3.31. According to Krizanova (2019), online marketing communication's broad reach allows advertisements to target a large audience. This approach helps hotels achieve various objectives, such as raising brand recognition, enhancing customer satisfaction and trust, and strengthening brand loyalty.

The effectiveness of these promotional methods is evident in the hotel industry's increased brand visibility, customer engagement, and relationship building, all contributing to higher bookings and revenue, as indicated by the weighted mean of 4.49. Despite the lower ranking of influencer partnerships (weighted mean = 3.60), the interaction facilitated by internet marketing is crucial. Yoga (2019) emphasizes that travelers are significantly influenced by online reviews and comments from previous customers. Potential customers trust reviews from experienced travelers who have already visited the destination more than

those from potential visitors. Albattat (2020) highlights the growing trend of using online social networks to promote goods and services in the hotel sector. This trend underscores the importance of the hospitality industry embracing technological advancements to enhance guest services and provide employees with efficient tools (Legaspi et al., 2023).

Table 4. The extent of Implementation and Level of Effectiveness of Place

PLACE	SD	WX	RANK	PLACE	SD	WX	RANK
Make sure you have a solid online presence on all relevant platforms, including your website, social media, online travel agents, and others.	0.63	4.42	1	It streamlined operations, offered personalized guest services, enhanced communication, and gleaned valuable insights through data analytics.	0.92	4.09	3
Make the booking process seamless, whether it's on your website, mobile app, or through a third-party platform	0.75	4.22	3	Enabled personalized customer service, enhancing the overall gues experience and boosting satisfaction and loyalty.	0.80	4.09	3
Endeavor for consistency in brand messaging and customer experience across all channels.	0.79	4.19	4	It helped our hotel create a strong and memorable brand impression in the minds of your customers	0.68	4.47	2
Consider developing a mobi app for bookings, customer service, and in-stay services	1.14	3.99	5	This strategy of mobile ordering increased efficiency, lowered staff workload, and minimized costs.	0.92	3.99	4
Remember their preferenc and provide consisten personalized service acro all touchpoints.	0.88	4.37	2	Customized experiences made guests feel valued and appreciated, encouraging their return.	0.68	4.67	1
cwx = 4.24 Very Well Implemented				**cwx = 4.26 Very Effective**			

A major factor in drawing visitors was the destination's attractiveness, the hotel's accessibility, and its proximity to popular locations. However, the advent of the digital revolution has led to a new understanding of Place. Place now essentially refers to all the channels via which guests interact with the hotel. Ensuring a strong digital presence across all platforms was very well implemented by hotel industries in Dumaguete City. They made sure to remember their guest’s preferences and provide consistent personalized services across all touchpoints. According to Lei (2024), by increasing perceived value and emotional connection, personalized service has been beneficial in raising customer happiness, trust,

and loyalty. This is because personalized service differs fundamentally from "one-size-fits-all" service. Personalization of services is especially important for younger generations, who are pickier and actively look for the best deal. A personalized offer is also seen as "special" since it gives the customer a sense of exclusivity and highlights the consideration of the service provider. As a result, the personalization impact is not limited to a single transaction; rather, it may help sustain emotional bonds and foster long-term business-customer relationships.

Concerning the effectiveness of the real location of a service or product, it helped hotel industries in Dumaguete City create a strong and memorable brand impression in their minds. Customized experiences made guests feel valued and appreciated, encouraging their return. The customer's experience should be coherent and consistent regardless of the channel they use to interact with the hotel—website, mobile app, phone call, or in-person visit. Customers' preferences are remembered, previous contacts are acknowledged, and their experience is personalized at every touchpoint via an efficient omnichannel strategy. This seamless omnichannel experience is made possible by data, which is essential. Hotels that track customer visits across many media might obtain significant insights into patron behavior and preferences. By using this data, companies can guarantee consistency over all channels, give tailored recommendations, and enhance the consumer's experience.

According to Böhme (2023), an experience is the result of an individual's perception of a cue, which involves reacting to specific elements and interpreting them afterward. Emotions, meanings, and comprehension influence interpretations of experiences.

Table 5. Summary on the Extent of Implementation and Level Effectiveness on the 4Ps of the marketing mix.

EXTENT OF IMPLEMENTATION	WX	LEVEL OF EFFECTIVENESS	WX
Product	4.20	Product	4.45
Price	4.32	Price	4.38
Promotion	4.09	Promotion	4.20
Place	4.24	Place	4.26
cwx = Very Well Implemented	**4.21**	**cwx = Very Effective**	**4.32**

The implementation of marketing strategies in the hotel industry in Dumaguete City achieved a weighted mean of 4.21, indicating that they are very well implemented. The effectiveness of these marketing strategies received a weighted mean of 4.32, interpreted as very effective. These results suggest that the marketing strategies employed by hotels in Dumaguete City are both crucial and effective. According to Shi et al. (2021), the selection of coping measures by managers is influenced by factors such as organizational culture,

location, brand image, and competitors. The model of hotel resilience provides a valuable framework for planning and selecting strategies to address external challenges.

Recent literature supports the importance of adaptive and innovative strategies in the hospitality industry. For example, Sigala (2018) highlights that dynamic marketing strategies, including the use of social media and personalized marketing, are essential for engaging with customers and building brand loyalty. Furthermore, Hao, Chon, and Wen (2021) emphasize the necessity for hotel managers to adopt a variety of innovations aimed at both internal management and customer service, particularly during challenging times. Innovations such as advanced data analytics and customer relationship management (CRM) systems are crucial for understanding customer preferences and enhancing service delivery (Guillet & Kucukusta, 2016). These strategies not only improve operational efficiency but also increase customer satisfaction and loyalty, contributing to the overall resilience and success of hotel businesses.

Table 6. Relationship between the Profile of Hotel Industry and the Extent of Implementation of Marketing Strategies

Variables	rs	p-value	Decision	Remarks
Type of Accredit	0.021	0.686	Fail to reject the null hypothesis	Not Significant
Bed Capacity	0.041	0.005	Reject	Significant
Monthly average	0.032	0.041	Reject	Significant
Year of Operatio	0.022	0.002	Reject	Significant
Spearman Rank Correlation level of Significant =0.05				

Legend:

Correlation Coefficient	*Verbal Description*
± 0.00 – ±0.09	*negligible*
±0.10 – ±0.29	*small*
±0.30 – ±0.49	*medium*
±0.50 – ±1.00	*large*

Source: *Miller & Cohen (2001)*

Table 6 provides insights into how the hotel industry profile relates to the implementation of marketing strategies. Using Spearman Rank Order Correlation, the analysis shows that Bed Capacity, Monthly Average Occupancy Rate, and Number of Years Operating are significantly linked to the extent of marketing strategy implementation, indicating a positive relationship. However, the hotel industry's accreditation type does not exhibit significant association with the extent of marketing strategy implementation.

The findings align with research by Liu (2022), who emphasizes the importance of the monthly average occupancy rate as a key performance metric in evaluating hotel operations. A high occupancy rate signifies efficient space utilization and increased revenue generation, reflecting effective hotel management practices. Conversely, a low occupancy rate may highlight areas for improvement and optimization within the hotel's operations and marketing strategies. By considering these factors, hotel managers can make informed decisions to enhance marketing efforts and overall performance.

Table 7. The Profile of the Hotel Industry and the Level of Effectiveness of Marketing Strategies in its Relationship

Variables	rs	p-value	Decision	Remarks
Type of Accreditation	0.021	0.003	Reject	Significant
Bed Capacity	0.033	0.005	Reject	Significant
Monthly average Occupants	0.032	0.032	Reject	Significant
Year of Operation	0.022	0.002	Reject	Significant

Spearman Rank Correlation level of Significant =0.05

Table 7 presents the data in identifying the relationship between the profile of the hotel industry and the level of effectiveness of marketing strategies. Using Spearman Rank Order Correlation, it shows that the Type of Accreditation, Bed Capacity, Monthly Average Occupancy Rate, and Number of Years Operating are significantly related to the level of effectiveness of marketing strategies. This means that there is a positive relationship between these variables.

Table 8. Relationship between the Level of Implementation and the Level of Effectiveness of Marketing Strategies of Hotel Industries in Dumaguete City.

Variables	***Coefficients***	***SE***	***t Stat***	***P-Value***
Product	601.988	4106.04	0.147	0.884
Price	-10247.981	3537.424	-2.897	**0.005**
Promotion	6594.353	3147.108	2.095	**0.040**
Place	6320.275	2809.295	2.25	**0.028**
R=	0.4604			
R^2=	0.2119			
adjusted R^2 =	0.1656			
F-Ratio=	4.572			
p-value=	**0.002**	**(significant)**		

Table 8 reveals the level of implementation and effectiveness concerning the four Ps of marketing. Through Multiple Regression Analysis, the overall F Test indicates significance (p=0.002), suggesting that some implementations serve as significant predictors of Marketing Strategy Effectiveness. Upon closer examination, the data demonstrate that the implementation of the 4Ps - product (p=0.884), price (p=0.005), promotion (p=0.040), and place (p=0.028) - significantly influences the current marketing strategies. Notably, the negative coefficient (-10,247.981) associated with price implementation suggests that higher levels of price strategy implementation correspond to lower effectiveness of the strategy. This underscores the impact of pricing strategies on overall effectiveness.

Abrate et al. (2019) emphasize the critical role of appropriate pricing in value and revenue generation, particularly in industries like hospitality where products, such as hotel rooms, are perishable goods. Effective pricing strategies involve setting rates according to temporal profiles to maximize revenues. This aligns with the findings, suggesting that while price implementation is essential, there exists a delicate balance between pricing and strategy effectiveness. By understanding these dynamics, hotel businesses can optimize their pricing strategies to enhance overall marketing effectiveness and revenue generation.

Conclusions and Recommendations

The research provides significant insights into the hotel sector in Dumaguete City, highlighting important patterns and dynamics. A substantial proportion of establishments in the sector are accredited by the Department of Tourism, indicating a strong commitment to maintaining regulatory compliance and quality standards. The study also underscores the hotels' resilience and adaptability in dealing with the challenges posed by the pandemic, evidenced by satisfactory monthly average occupancy rates and moderate bed capacity, which help ensure visitor satisfaction and operational sustainability.

The findings reveal that a significant proportion of hotels have demonstrated durability, suggesting their ability to withstand market fluctuations and adapt to new conditions. The examination of marketing strategy execution shows favorable evaluations for all key elements, with a clear link between a proactive approach and effectiveness. This underscores the importance of innovation and strategic adaptation to optimize outcomes.

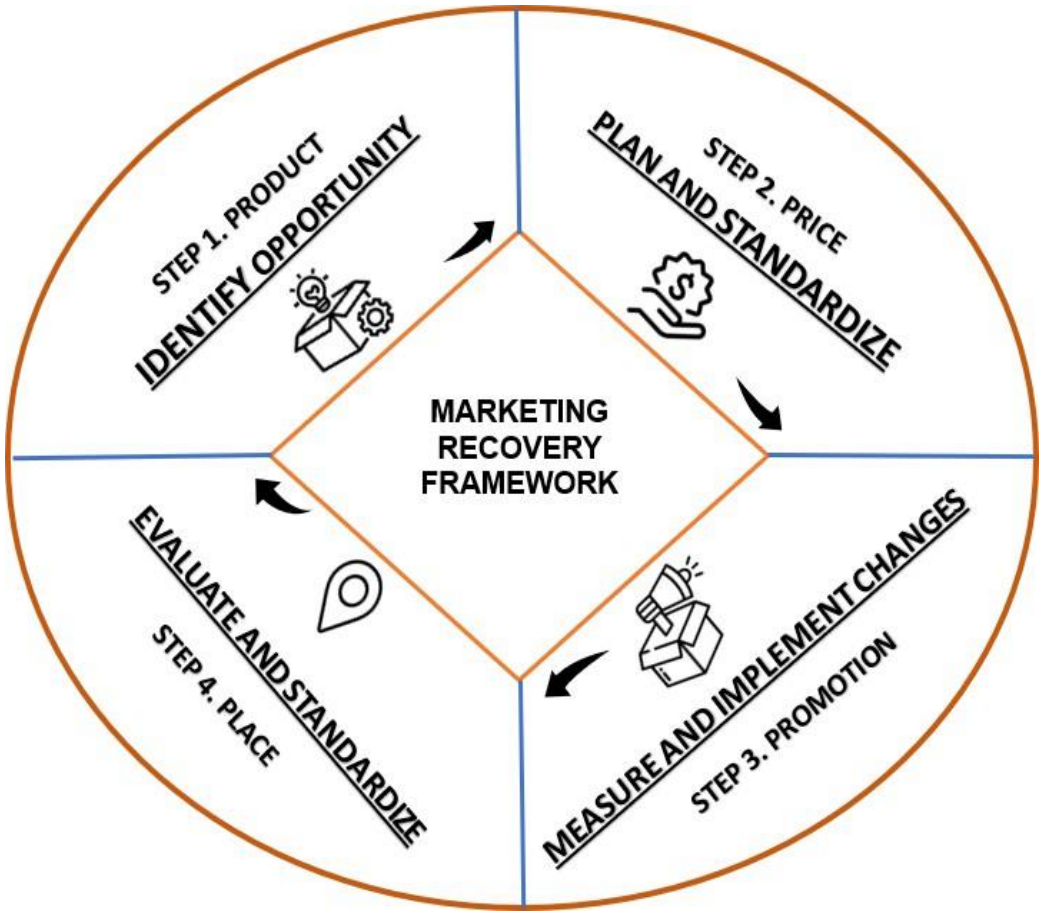
Notably, while the type of accreditation does not significantly affect strategy execution, the profile of the hotel industry does influence the efficacy of marketing efforts. This highlights the importance of understanding regional market intricacies and consumer preferences.

Overall, these observations emphasize the critical need for hotels in Dumaguete City to adapt to changing market dynamics and prioritize customer satisfaction. By leveraging these findings, stakeholders can strategically position themselves for long-term success and growth in the region's ever-evolving hospitality industry.

The following are the recommendations

Firstly, establishing a dedicated individual or team within the marketing department to oversee social media strategies is indeed crucial. However, instead of merely checking if strategies are working, this person or team should be responsible for continuously analyzing social media metrics, engaging with customers, and adapting strategies based on performance data. This proactive approach will ensure that the hotel remains agile in addressing market demands and guest preferences in real time.

Secondly, creating a disaster management team is a prudent step, but it should extend beyond marketing methods to encompass overall crisis preparedness and response. This team should consist of cross-functional members who can swiftly adapt strategies during challenging times, whether it's a crisis in the industry or external factors affecting tourism.



Thirdly, networking with other hotels is valuable, but the focus should be on collaboration rather than competition. By forming partnerships with other establishments, hotels in Dumaguete City can leverage each other's strengths, share resources, and collectively promote tourism in the region. This collaborative approach fosters a supportive community and enhances the overall visitor experience.

Lastly, the proposed Marketing Strategy Framework formulated in this study should be followed.

Compliance with Ethical Standards

The voluntary participation of managers from various hotels in Dumaguete City is of utmost importance. Participants have the right to withdraw from the study at any point, regardless of their age. Informed consent is a fundamental principle in this study, requiring researchers to provide detailed information and assurances about the nature of the study. This ensures that participants fully understand the implications of their involvement and can make an informed decision freely, without any form of coercion.

Proposed Marketing Strategies Framework

Step 1. Product. Identify Opportunity.

Market on your loyal guests. They are critical to segment and match your products to their demands. Create loyalty programs to encourage customers.

Product Innovation. Align the goods and services with the customers' ever-changing demands and expectations. Smart amenities throughout the facility and thoughtful features let guests fully personalize their stay and create the coziest possible environment.

Understanding your guests. Finding and targeting your ideal guest profile for accurate analysis and customer segmentation.

Step 2. Price. Plan and standardize.

Utilize a dynamic pricing strategy. This is used to dynamically modify the price of their goods or services in response to a range of variables, including supply and demand, the time of day, competition pricing, and consumer behavior. Make sure your pricing captures the special and use storytelling and focused marketing to highlight it.

Consider Variable Pricing. Under a variable pricing approach, a product or service's price varies according to demand. This entails modifying room rates in response to a range of variables, including seasonality, events, and booking trends.

Step 3. Promotion. Measure and implement changes.
Collaborate with other hotels. This will develop integrated learning experiences to network.

Create a Disaster Management Team. This will help your hotel industry emphasize marketing strategies and adjust accordingly before any crisis arises.

Seasonal Promotions: To draw customers and fill empty rooms, provide discounts or unique packages during off-peak seasons. Provide early booking incentives, such as discounts or extra benefits, to entice visitors to make bookings.

Step 4. Place. Evaluate and standardize.

Continuously Monitor and Adopt. To continue to keep your offerings appealing and relevant, stay updated on changes in travel reasons, guest feedback, and market trends.

Continuous Improvement. Remaining competitive and surpassing guest expectations requires listening to feedback, keeping up with industry developments, and upholding operational excellence.

Mobile optimization: To cater to the increasing number of guests who use smartphones and tablets to research and book hotels, make sure your website and booking procedure are mobile-friendly.

A NEXUS BETWEEN COHESION AND WRITING: ANALYZING THE USE OF GRAMMATICAL COHESIVE DEVICES IN SENIOR HIGH ACADEMIC TEXTS

Raymark Anthony P. Saluria, Jasmine Q. Beamish

Saint Louis School of Don Bosco, Inc., Dumaguete City, Negros Oriental, Philippines

https://doi.org/10.5281/zenodo.11420445

ABSTRACT

One of the issues encountered by senior high students in their academic writing has always been the attainment of cohesion in their writing. The study sought to analyze the use of grammatical cohesive devices in the academic texts of Senior High. Furthermore, it aimed to evaluate how the grammatical cohesion is attained in the development of senior high academic texts based on the utilization of conjunctions, references, ellipses, and substitution. The study was anchored on the Model of Cohesion by Hasan and Halliday (1976). Ten (10) critique papers with a total of 275 sentences served as the raw data. This study utilized the research method of textual analysis and descriptive research. The findings revealed that 1469 grammatical cohesive devices were used in their critique papers. Additionally, conjunctions and references are more dominant in senior high academic texts. It was also reported that there is a high percentage of use of additives, appositives, and causal-conditional conjunctions while non-selective demonstrative references and existential personal references dominate the senior high academic texts.

Keywords*:* *Grammatical Cohesion, Academic Texts, Writing, Senior High*

INTRODUCTION

Academic writing is one of the most essential writing forms necessitated for senior high students to learn and master in the senior high curriculum. It is evident in various courses such as Reading and Writing Skills (RWS), English for Academic and Professional Purposes (EAPP), and Practical Research. The teachers' selection and

utilization of diverse academic writing tasks provide a myriad of opportunities for the students to hone their skills in this form and style of writing.

Academic writing is characterized to be clear, concise, precise, focused, open-minded, and engaging. Its purpose is to aid the readers' understanding by informing them, making arguments and claims with evidence, and persuading their readers (Hyland & Jiang, 2017).

One of the issues encountered by senior high students in their academic writing has always been the attainment of cohesion in their writing. Students find it difficult to unite the number of sentences in their paragraphs and utilize suitable transition signals in their writing. Furthermore, a comprehension problem may also occur if there is limited background knowledge on the relatedness of sentences in a text. In such cases, readers rely much on a coherent text with appropriate explicit signals to compensate for lack of prior knowledge (Alarcon & Morales, 2011).

Cohesion refers to the use of grammatical and lexical elements on the surface of the text that can form relationships among parts of the text (Tanskanen, 2006). It occurs when the semantic interpretation of some linguistic element in the discourse depends on another. It is the foundation upon which the edifice of coherence is built (Halliday and Hasan, 1985). It is expressed partly through the grammar and partly through the vocabulary (Halliday and Hasan, 1976).

The use of cohesive devices helps tie elements of a text together so that the readers know what is being referred to and how the phrases and sentences relate to each other (Harmer, 2004). The lack of understanding and awareness about cohesion especially on grammatical cohesion leads the students to use inappropriate cohesive devices. This would result to problems regarding the semantic relation among ideas in the text (Afrianto, 2017). Thus, cohesion is a prerequisite feature for any academic text if it aims to achieve its objectives.

When students write compositions, they need to establish clear relations between one sentence and the next by connecting those statements together. Good compositions establish a sense of direction by making explicit connections among their different parts, so that what is said in one sentence or paragraph not only sets up what is to come but is clearly informed by what has already been said (Alarcon & Morales, 2011). Connections can be done by using transition terms, adding pointing words, using key terms and phrases, and repeating words, but with a difference (Birkenstein & Graff, 2018).

However, the study of the concept of cohesion in academic texts has been underexplored in the Philippine research landscape. The present study was conducted to analyze the use of grammatical cohesive devices in the academic texts of Senior High. Furthermore, it sought to evaluate how the grammatical cohesion is attained in the development of senior high academic texts.

Research Questions

The study aimed to analyze the use of grammatical cohesive devices in the academic texts of Senior High students.

Specifically, it sought to answer the following sub-problems:

1. What grammatical cohesive devices are used by Senior High students in their academic texts?
2. What conjunctions are utilized in the development of the academic texts?
3. What references are utilized in the development of the academic texts?

METHODOLOGY

Respondents and Site of Study

The subjects of the study were the Grade 12 students enrolled in the writing course English for Academic and Professional Purposes (EAPP) in the Senior High School Department for the Academic Year 2022 – 2023 at Saint Louis School of Don Bosco. Ten (10) students were taken as participants of the study taking the Science, Technology, Engineering, and Mathematics (STEM) academic track.

Research Design

This study utilized the research method of textual analysis. The purpose of textual analysis is to describe the content, structure, and functions of the messages contained in the text (Caulfield, 2019). This verbal analytical discussion is based on logical statements describing the connections between the academic writers and the texts, in this case are represented by the different sentences systematically obtained from the academic texts. Moreover, it is focused on descriptive analysis of the grammatical cohesion of the writers as mirrored in their academic texts.

This study also utilized the descriptive research design. This is used to describe the variables and use as basis to develop generalizations and formulate principles or theories based on its findings (Calmorin and Calmorin, 2007). Since this study concerned with the determination of the frequency of grammatical cohesive devices such as conjunction, references, ellipsis, and substitution, descriptive research was the most appropriate design.

Sampling Technique and Data-Gathering Procedures

This study used documentation method. Ten (10) academic papers written by senior high students were obtained as raw data. The critique papers were one of the writing activities in the English for Academic and Professional Purposes (EAPP) course. The students were tasked to write a critique on the televised address of Vladimir Putin regarding his plans of conducting a ‘special military operation’ for Ukraine.

The ten (10) critique papers were randomly selected. A total of 275 sentences were utilized as bases of the study. In content thematic analysis, when the researcher begins to hear the same comments again and again, data saturation is being reached. Once saturation is reached, the results must be capable of some degree of generalization (Boddy, 2016). It is believed that data saturation was already achieved with the sample size.

First, each of the sentences was analyzed. The grammatical cohesive devices were identified and classified as conjunction, references, ellipsis and substitution. Next, the conjunctions were categorized as appositive, clarification, additive, variation, spatio-temporal, manner, causal-conditional, or adversative, while the references were codified as personal, demonstrative, or comparative. Finally, the utilization of grammatical cohesive devices in students' writing was analyzed.

Statistical Analysis

Percentage is used to show how the part is related to a whole. It was used in presenting the frequency percentage of the different grammatical cohesive devices.

RESULTS

Table 1
Frequency Percentage of Grammatical Cohesive Devices

Types of Grammatical Cohesive Device	Frequency	Percent
Conjunction	637	43.36
References	822	55.96
Substitution	7	0.48
Ellipsis	3	0.20
Total	1469	100.00

Table 1 presents the frequency percentage of the grammatical cohesive devices utilized in the academic texts. The findings revealed that out of 1469 cohesive devices, 822 (55.96%) are references, 637 (43.36%) are conjunctions, 7 (0.48%) are substitution, and lastly, 3 (0.20%) are ellipsis. In general, the use of references and conjunctions is dominant in the senior academic texts.

Table 2

Frequency Percentage of Conjunctions

Types of Conjunction	Frequency	Percent
Appositive	173	27.16
Clarification	38	5.97
Additive	236	37.05
Variation	25	3.92
Spatio-Temporal	17	2.67
Manner	21	3.30
Causal-Conditional	82	12.87
Adversative	45	7.06
Total	637	100.00

Table 2 shows frequency percentage of conjunctions used in the senior high academic texts. Out of 637 conjunctions, the most commonly used ones are additives with a frequency of 236 (37.05%) followed by appositives with 173 (27.16%) and causal-conditional conjunctions with 82 (12.87%). Other types of conjunctions used were adversative with 45 (7.06%), clarification with 38 (5.97%), variation with 25 (3.92%), manner with 21 (3.30%), and spatio-temporal with 17 (2.67%).

Table 3

Frequency Percentage of References

Types of References	Subtypes	Frequency	Percent
Personal	*Existential*	232	28.22
References	*Possessive*	138	16.78
Demonstrative	*Selective*	80	9.73
References	*Non-Selective*	354	43.06
Comparative	*General*	10	1.21
References	*Specific*	8	0.10
Total		822	100.00

Table 3 showcases the number of the different types and subtypes of references used in the academic texts. Out of 822 references, the most utilized ones are non-selective demonstrative references with a frequency of 354 (43.06%) followed by existential personal references with a frequency of 232 (28.22%) and possessive personal references with a frequency of 138 (16.78%)

DISCUSSION

Utilization of Grammatical Cohesive Devices

The use of references and conjunctions is more dominant in the academic texts over ellipsis and substitution. The findings concurred with the study of Trisnaningrum et al. (2019) where the highest uses of grammatical cohesion devices were reference and conjunction. The data also pointed out that the respondents were more familiar with reference and conjunction use rather than substitution and ellipsis.

The same results are mirrored in the study by Akindele (2011). Based on her study of cohesive devices used in academic papers, it was determined that a meaningful text can only be realized if the different parts of the text are connected together as a unified whole or if it has cohesion with the use of cohesive devices. Two of the cohesive devices that are used frequently in the academic papers of senior high students are references and conjunctions.

References are used to refer to something within or outside a text. It can introduce a piece of new information and keep track of the given information in the text. Reference devices or referring expressions help in uniting the text. Also, it allows writers to avoid unnecessary repetition (Akindele, 2011).

On the other hand, Darweesh and Kadhim (2016) also cited the studies of Ferris (1994) and Field and Oi (1992), which show a positive link between the frequency of cohesive devices and the quality of writing. The studies of Jin (2001) and Liu and Braine (2005) show a significant relationship between the number of conjunctions and the quality of a text. According to Riadi et al. (2023), there is a notable relationship between the use of conjunctions and the writing quality. This is because conjunctions directly impact the clear understanding of the topic and the organization of ideas through logical connection.

Poudel and Dhankuta (2018) posit that cohesive devices contribute for maintaining unity in the paragraphs in academic writing. Texts with cohesive ties and coherence are more comfortable for the readers to comprehend and interpret the message of the writer.

Use of Conjunctions in the Development of Academic Texts

The high percentage of use of additives, appositives, and causal-conditional as cohesive devices can be attributed to the type of essay the students wrote. In argumentative texts, the purpose of the writer is to establish a claim and convince readers that the claim is valid through a set of supporting points. The writers also clearly take a stand and write as if they were trying to persuade readers to adopt new beliefs or behavior. The nature of additives, conditionals, and concessives makes it possible to

strengthen claims by establishing strong connection with their supporting premises (Alarcon & Morales, 2011).

As cohesive devices, additives operate in a succession of two sentences or independent units and establish additive relations while appositives serve to introduce an additional remark to give some examples of what has been said. On the other hand, causal-conditionals function to introduce a presupposing clause that expresses a cause (Tsareva, 2010). These conjunctions are imperative in establishing claims and connections within the text.

Tsareva (2010) notes that the conjunctions are used extensively to establish cohesive relations that hold between sentences. They establish various patterns for the organization of information in the essays. Thus, grammatical cohesion is not discerned only between two adjacent sentences. Cohesive links are often established by grammatical elements that occur in a sequence of sentences that are not adjacent.

In Halliday's (2004) concept of grammatical cohesion, conjunctions are cohesive elements not in themselves but by their specific meanings. They express certain meanings which presuppose the presence of other components in the discourse.

Utilization of References in the Development of Academic Texts

The most dominant references in senior high academic texts are non-selective demonstrative references and existential personal references.

As cited from the study of Maes et al. (2022), Levinson et al. (2018) posit that demonstratives including *this* and *that* are the most frequently used words in the languages of the world. These words help the writer make references within a text to the other portions of the text. Demonstratives give a clear connection between words, sentences, and paragraphs allowing cohesion to be achieved in a specific text.

Gray (2010) cited that style manuals discourage writers from using demonstratives such as *this, that, these, and those* to function as pronouns to attain cohesion. On the contrary, it was also stated that many linguistic investigations determined that demonstratives function as both determiners and pronouns in academic texts.

As asserted by Rustipa (2015), it is explained in the study of Zaki (2011) that demonstratives are essential since they direct the reader to keep the recognition of the intended referent (the word being referred to).

In the pragmatic sense, demonstratives are crucial in the logical organization of information in the text. With or without new information, they can revive the previously stated referents. In the same manner, demonstratives can also establish new referents in the text. In addition, they give a reference to what the writer is implicitly or explicitly writing (Zaki, 2011). There is a need for the careful use of demonstratives as the understanding of their meaning depends largely on context and inference (Rustipa, 2015).

Based on the case study of Rustipa (2015) on the use of demonstrative pronoun and demonstrative determiner *this* in upper-level student writing where she interviewed five graduate students on the use of demonstrative *this*, it was determined that they used demonstratives in their essays to make their text coherent and achieve a unified whole.

Another reason is to establish context for the text that would follow and to maintain the theme-rheme structure. Lastly, demonstratives were used to create a variation in the style of writing to develop a more interesting text.

Moreover, the dominance of existential personal references in the academic texts was crucial in establishing connections within the texts. In the case study of Msuya (2016) that explores the author visibility in academic writing, the impersonal pronouns are the most commonly used type of pronoun even for the sections that authors can be expressive such as acknowledgment. The study concluded that academic writers strictly abide by the norms and conventions of academic writing of being overly formal and restricting the use of first-person pronouns.

Based on the findings of the study of Nurhidayah (2019), personal reference was the reference cohesive device most commonly used by the students in their essays. Additionally, they have categorized these personal references into three types, namely personal pronouns, possessive pronouns, and possessive determiners. Out of the three types, personal pronouns were used the most, followed by the possessive pronouns.

The high frequency of use of reference as cohesive device can be attributed to the fact that types of reference are used grammatically as part of a sentence as either subject, modifier or object. The relationship between things or facts may also be established with the use of reference items. The low frequency of comparison both general and specific as cohesive device could suggest that there is no need to compare ideas or things in an argumentative text or the students might have used other devices to compare aside from *more*, *less*, *other* etc. (Alarcon & Morales, 2011).

Conclusions

Based on the analyses and the findings of the study, the following conclusions were drawn:

a.) As grammatical cohesive devices, conjunctions and references are more dominant in senior high academic texts compared to ellipsis and substitution as they establish connectedness among the different parts of the text and attain meaningful organization of ideas through logical connection.

b.) There is a high percentage of use of additives, appositives, and causal-conditional conjunctions in senior high academic texts. These cohesive devices were largely instrumental for the writers to take a stand and persuade their readers by strengthening their claims and establishing strong connection with their supporting premises.

c.) The most dominant references in senior high academic texts are demonstrative non-selective and personal existential, which are utilized to make references within an academic paper to the other portions of the text and provide a vivid connection among words, sentences, and paragraphs allowing cohesion to be achieved in a specific text.

Recommendations

Since the use of cohesive devices is indicative of the quality of academic writing of senior high students, there is a necessity to reinforce the teaching of grammatical cohesion in English classes in the junior high level. Further, there is a need to explore the lexical cohesion of the texts to further comprehend the challenges of the student writers in utilizing cohesion and coherence in academic texts. The results would supplement the findings of the present study.

Future researchers can extend the present study by using other forms of academic papers as bases of analyses such as research papers or concept papers. Future researchers may also concentrate on other types of texts such as creative, journalistic, or literary texts.

Compliance with Ethical Standards

The authors carefully evaluated all the necessary ethical considerations throughout the duration of the conduct of the study. Information consents were obtained from the participants allowing the researchers to utilize their papers as bases for textual analyses. The anonymity and confidentiality of the participants were also ensured. No conflict of interest existed in the conduct of the study. Furthermore, plagiarism was strictly and firmly avoided and respect for intellectual property was highly achieved. There was no prejudice in the analysis of the results and that, the findings were used purely for research.

Acknowledgments

The authors are grateful for all the unwavering support and ceaseless encouragement they received throughout the conduct of the study.

ABSTRAK

Masiglang halakhakan, namimilog na mga pawis sa katawan at bungisngis na labi kasabay ang tawanan. Mga sámot-sarìng tagpo sa mundo ng mga Tradisyonal na Larong Pilipino na sumasalamin ng mayamang kultura at kasaysayan. Sa pag-usad ng panahon, may mga larong namamatay at mayroon ding ipinapanganak at iniluluwal lalong higit ng *mass media* at Kulturang Popular. Sa pag-aaral na ito, binigyang-tuon ang mga layuning bubuo ng ingay at langitngit sa metodong sikolohikal na pananaliksik; a) ano ang mga kadahilanan sa paglalaro ng latò lato ng ilang mga kabataan, b.) ano ang mga naging epekto ng paglalaro ng latò lato sa kanilang aspetong pisikal (pangangatawan), sosyal (pakikisalamuha), intelektuwal (paraan ng pag-iisip) at pakiramdam *(sense of satisfaction).* Ang pag-aaral na ito ay gumamit ng pamamaraang pagtatanong-tanong at pakikipagkuwentuhan na magiging lunsaran ng resulta at pag-alam sa ingay at langitngit na taglay ng paglalaro ng latò lato. Babaybayin din nito ang kasaysayan at implikasyon ng paglalaro ng latò lato sa ilang aspeto ng buhay ng tao. Tunay ngang, mabilis manganak ang *mass media* ng mga karanasan at kultura na ipinamamalas ng tao sa kani-kanilang komunidad. Pinatotohanan nito na ang paglalaro ng lato lato ay may malalim na kultura at kasaysayan. Sumasalamin ng tradisyon, pumapanday ng mga karanasan at humuhulma ng masasayang alaala tungo sa holistikong paghubog ng isang tao.

Mga Susing Salita: *Latò Lato, Kulturang Popular at Kasaysayan, Mass Media, Tradisyonal na Larong Pilipino*

INTRODUKSIYON

“Pagbilang kong tatlo nakatago na kayo, Isa, Dalawa, Tatlo nakatago na kayo?” Isa sa mga tanyag na pahayag kung pag-uusapan ang Tradisyonal na Larong Pilipino. Mga larong pumanday ng ating kultura, nagpaunlad ng ating mga tradisyon at patuloy na sumasalamin sa mayamang pagkakakilanlan ng ating bansa. Isa sa mga larong tumatak sa lahing Pilipino at patuloy na pumapanday ng mga karanasan ng mga murang kaisipan ng mga kabataang Pilipino na naging bahagi ng kanilang paglago at mga karanasang humubog sa kanilang pagkatao, ito’y isang patunay na naging kaulayaw ng panahon ang mga tanyag na larong Pilipino tulad ng Laro ng Lahi.

Ang "laro ng lahi" ay tumutukoy sa mga tradisyonal na laro o palaro na ipinasa mula sa henerasyon hanggang sa henerasyon sa isang partikular na kultura o lipunan. Ang mga larong ito ay may malalim na ugnayan sa kultural na identidad at kasaysayan ng isang bansa o rehiyon. Ang mga pagtalakay sa laro ng lahi ay nagbibigay-diin sa kahalagahan ng mga ito bilang bahagi ng kultural na pamanang pangkalahatan at sa mga benepisyo na hatid nila sa mga indibiduwal at komunidad. Hango sa *The Traditional Filipino Games Handbook ng Philippine Sports Commission*, hinimay-himay nila ang kahalagahan at implikasyon ng laro ng lahi bilang bahagi ng kulturang Pilipino. Una, Kultural na Identidad na kung ang mga Laro ng Lahi ay mahalaga dahil nagpapakita at nagpapanatili ng kultural na identidad ng isang bansa o komunidad. Ang mga ito ay bahagi ng pinagmulan at kasaysayan ng mga tao sa isang lugar, at naglalaro ng malaking papel sa pagpapahayag at pagpapanatili ng kanilang kultura, tradisyon, at paniniwala.

Ikalawa, Edukasyon at Pag-unlad na nagbibigay ng mga oportunidad para sa edukasyon at pag-unlad ng mga indibiduwal. Sa pamamagitan ng pagsali at paglalaro sa mga tradisyonal na laro, natututuhan ng mga manlalaro ang mga kasanayan tulad ng pagtutulungan, diskarte, pagpaplano, at iba pa. Ito ay maaaring magdulot ng pag-unlad sa pisikal, kognitibo, at sosyal na aspeto ng mga manlalaro. Ikatlo, ang Pananatili ng Malusog na Pamumuhay sapagkat ang mga Laro ng Lahi ay naglalayong mapalakas ang katawan at magbigay ng aktibong pamumuhay. Ito ay maaaring magdulot ng pisikal na paglago at magbigay ng benepisyo sa kalusugan tulad ng pagpapalakas ng mga kalamnan, pagsasanay ng katalinuhan ng *motor*, at pagtibay ng resistensiya.

Ikaapat, Pagpapaunlad ng Pakikipagkapwa na kung saan ang mga Laro ng Lahi ay nagbibigay ng mga pagkakataon para sa pakikipagkapwa at pagkakaisa sa komunidad. Sa pamamagitan ng pagsali sa mga laro, ang mga manlalaro ay natututong makipag-ugnayan, magkaisa, at magtulungan sa isang positibong paraan. Ito ay naglilikha ng magandang samahan at nagpapalakas ng mga ugnayan ng mga tao sa loob ng isang komunidad. At panghuli, ang Pagpapahalaga sa Tradisyon at Pamanang Kultural dahil ang mga Laro ng Lahi ay nagbibigay-diin sa pagpapahalaga at pangangalaga sa mga tradisyon at pamanang kultural ng isang bansa o lipunan. Sa pamamagitan ng paglalaro at pagpapasa ng mga laro sa mga susunod na henerasyon, nagpapatuloy ang mga tradisyon at nakikilala ang kanilang kahalagahan. Ito ay nagbibigay ng patuloy na pagpapalaganap at pagpapahalaga sa mga ito.

Ang mga tampok na laro na patuloy na pinahahalagahan ng mga Pilipino na naging bahagi na ng kanilang paglago at humubog sa kanilang pagkatao at humulma ng mga karanasan at alaala na minsan ng nagpangiti, nagpatawa, nagpaiyak, sumubok o kung minsan naging dahilan ng kanilang pagdapa at muling pagbangon. Ito ang Sungka na kung saan hinahati ng mga mangkakahoy na laruang hilaw sa isang malaking kahon. Ang layunin ng laro ay kunin ang pinakamaraming bato sa kalaban. Kasama rin ang piko na ginagamitan ng isang maliit na piko at isang malaking lupa na hinahati sa iba't ibang kahon. Ang layunin ay malagpasan ang mga hamon sa bawat kahon nang hindi maipatong ang paa sa lupa. Ang masayang paglalaro ng Patintero na kung saan ang mga manlalaro ay nagtatalo sa pamamagitan ng pagtawid sa mga guhit sa lupa na ginawa ng mga kalaban. Ang layunin ay magtagumpay sa pagtawid nang hindi mahawakan ng mga tagapaglaro ang mga guhit o masalubong ang mga kalaban.

Minsan na ding sumubok ang larong Luksong Tinik na kung saan ang mga manlalaro ay magpapalitan ng paglukso sa ibabaw ng mga tinik na nilalagay sa lupa. Ang layunin ay malagpasan ang mga antas ng pagtaas ng mga tinik nang hindi mahawakan o matamaan ang mga ito. Habulan at hiyawan sa larong tumbang preso na ang mga manlalaro ay magtatalo sa pamamagitan ng pagtapon ng tsinelas sa isang bote o lata na ginagawang "preso." Ang layunin ay matamaan ang bote o lata upang manalo.

Kung kayat, sa pag-aaral na ito iinog ang pagtuklas sa mundo ng paglalaro ng latò lato at ang ingay na dulot nito sa tao at komunidad. Ang pahayag na "Ang Ingay at Langitngit na Taglay sa Likod ng Paglalaro ng Latò Lato" ay naglalayong bigyang-pansin ang malalim na kahulugan o epekto ng paglalaro ng Latò Lato na maaaring hindi gaanong napapansin o naiintindihan sa unang tingin. Ang pahayag na ito ay nagmumungkahi na sa likod ng simpleng paglalaro ng Lato Lato, may mga aspeto o kahulugan na nagdudulot ng ingay at langitngit.

Ang "ingay" na tinutukoy ay maaaring tumutukoy sa tunog at kasiyahan na naidudulot ng paglalaro ng Latò Lato. Ang ingay na ito ay maaaring nangangahulugan ng enerhiya, saya, at sigla na nararamdaman ng mga manlalaro habang sila'y naglalaro. Ito ay nagpapahayag ng aktibong pakikilahok at ang pagpapalaganap ng kasiyahan sa mga bata.

Sa kabilang banda, ang "langitngit" ay maaaring tumutukoy sa ingay na nagmumula sa paghampas o pagkilos ng mga lato (tinik na nakapaligid sa bola) kapag ito'y tinatamaan o sinusundan ng mga manlalaro. Ang langitngit na ito ay maaaring magdulot ng tunog o kalabog na nagpapalakas ng kasiyahan at nagpapataas ng antas ng kumpetisyon sa pagitan ng mga manlalaro.

Ang Latò Lato Bilang Isang Tradisyonal Na Larong Pilipino

Ang tradisyonal na larong Pilipino ay tumutukoy sa mga laro na matatagpuan sa kultura at kasaysayan ng mga Pilipino. Ipinapahayag ni Ramos na ito ay mga laro na nagmula at nagpatuloy na nilalaro ng mga Pilipino mula pa noong mga naunang panahon. Ang mga tradisyonal na laro ay bahagi ng kulturang Pilipino at nagpapahayag ng mga kaugalian, tradisyon, at paniniwala ng mga mamamayan (Ramos, 1990). Samakatuwid,

bahagi na ng kalinangan ang pagkakaroon ng mga laro na sumasalamin sa gawi at kilos ng tao maging ng kulturang kanyang kinalakihan. Ito ay nagpapakita ng mayamang tradisyon ng mga Pilipino at pagka-malikhain sa mga bagay na nasa kanilang paligid tungo sa pagkakaroon ng mga libangan tulad ng mga tradisyonal na larong Pilipino.

Hindi maikakaila sa kasaysayan ng tradisyonal na larong Pilipino ang mga larong isports o pampalakasan. Ito ay mga larong patuloy na namamayagpag at humuhulma sa pisikal, *mental,* sosyal at holistikong anyo ng isang manlalaro. Ang Arnis ay isang tradisyonal na *Filipino Martial Art* na nagiging laro rin. Ito ay kilala rin bilang Eskrima o Kali na kinikilala sa ngayon bilang pambansang laro sa Pilipinas. Ang kasaysayan at pagpapakahulugan ng larong Arnis bilang larong Pilipino ay may malalim na kaugnayan sa kasaysayan at kultura ng bansa. Ang Arnis ay hindi lamang isang laro o labanan, ito ay isang komprehensibong sistema ng pagsasanay na naglalaman ng iba't ibang mga teknik at patakaran. Ang mga manlalaro ng Arnis ay tinuturuan ng iba't ibang mga galaw, pagkilos, at pamamaraan ng paggamit ng mga sandata, kadalasang mga maliliit na patpat, tabak, o espada.

Bilang isang laro, ang arnis ay nagbibigay-diin sa mga kasanayan sa paggalaw, katalinuhan, diskarte, at taktika. Ito ay nagpapalawak ng kamalayan sa kapaligiran, nagpapalakas ng katawan at kaisipan, at nagpapalawak ng abilidad sa pag-unawa at pagtugon sa mga sitwasyon. Ito ay naglalayong mapanatili at ipasa ang Pilipinong kultura at kaalaman sa mga susunod na henerasyon. Sumasang-ayon si Cruz, na ito ay isang pagsasama-sama ng kasaysayan, tradisyon, at pagsasanay sa pagtatanggol na nagpapakita ng katapangan, disiplina, at pagiging handa (Cruz, 2018). Isang laro na tumatak na sa pagkakakilanlan ng mga Pilipino at patuloy na humuhulma ng mga panibagong karanasan.

Gayundin, kung pag-uusapan ang mga Isports, hindi mawawala ang sepak-takraw. Ang Sepak Takraw ay isang tradisyonal na laro na nagmula sa mga bansa sa Timog-Silangang Asya, kabilang ang Pilipinas, Thailand, Malaysia, at Indonesia. Ito ay isang kombinasyon ng paglalaro ng bola ng paa (sepak) at takraw na tumutukoy sa mga malalaking pako o bao na ginagamit bilang bola. Ang mga manlalaro ay gumagamit ng kanilang mga paa, tuhod, dibdib, at iba pang bahagi ng katawan upang paluin ang bola, at layunin nilang itapon ito sa kabilang panig ng *court* na may isang *net* sa gitna. Ang laro ay nagtataglay ng bilis, kasanayan sa pagtalon, pagsipa, at iba pang mga aksyon na nangangailangan ng malasakit, pagkakasundo, at kahusayan. Ang Sepak Takraw ay itinuturing bilang isang popular na larong pampalakasan sa Timog-Silangang Asya. Ito ay kadalasang nilalaro sa mga pampublikong lugar, paaralan, at mga palaruan. Ang larong ito ay hindi lamang isang palaro, ngunit nagiging bahagi rin ng kultura at tradisyon ng mga bansa kung saan ito lumaganap (Aleon, Rowena, et. al, 2012).

Sipatin naman natin ang isa sa mga napapahon, tanyag, popular at kilalang laro, ang larong latò lato ay maituturing na isang tradisyonal na laro na pinapaglaruan ng mga bata sa mga komunidad at pamilya sa Pilipinas nang maraming henerasyon. Sinusuportahan ni Bautista na ito ay kadalasang orihinal na laro na ipinapasa mula sa mga nakatatanda sa mga kabataan. Ang mga tradisyunal na laro ay naglalarawan ng

kulturang Pilipino, mga kaugalian, mga tradisyon, at mga pang-araw-araw na pamumuhay (Bautista, 2015). Ang Latò Lato ay isang tradisyunal na laro sa Pilipinas na kadalasang nilalaro ng mga bata. Ito ay isang laro ng paghabol kung saan ang mga manlalaro ay naglalaro gamit ang isang bola na gawa sa mga tinik ng punong lato (latό) na pinupulupot sa pamamagitan ng mga hibla o sinulid.

Ang paglalaro ng Latò Lato ay nagbibigay ng iba't ibang benepisyo at kasiyahan sa mga manlalaro. Ito ay nagpapalakas ng kanilang kasanayang pangkatawan at kinakailangang gumamit ng mga estratehiya at taktika upang maabot at mabunot ang bola ng kalaban. Bukod dito, ito ay isang paraan ng pagkakaroon ng aktibong pamamahayag ng kulturang Pilipino at pagpapasa ng tradisyong ito sa mga susunod na henerasyon (Pamilya ni Aning at Seling Suarez, 2006). Tunay ngang, malaki ang mabuting naidudulot ng paglalaro lalong higit ang paglalaro ng latò lato dahil bukod sa ito ay isang libangan, ito rin ay humahasa ng isipan ng isang manlalaro sa paggamit ng mga Teknik at estratehiya sa paglalaro maging ang pagkamalikhain sa pagbuo ng lato lato mula sa mga kagamitang makikita sa kanilang kapaligiran.

Pagsipat Sa Pinagmulan Ng Paglalaro Ng Latò Lato

Ang tradisyonal na mga laro tulad ng Latò Lato ay nakalipas na mula sa maraming henerasyon at karaniwang inaangkin ng kultura ng isang lipunan. Hango sa nailathala sa *youtube channel* na Kasaysaysan Pinoy, sinasabing ang paglalaro ng latò lato ay unang nagsimula sa Estados Unidos noong 1960’s at tinawag nilang clackers na gawa sa *tempered glass o acrylic*. Lumaganap at naging sikat din ito sa bansang Indonesia kung kaya’t sila ay nagkaroon din ng taunang kompetisyon sa paglalaro ng lato lato. Maging sa bansang Italia ay naging tanyag din ang paglalaro ng lato lato mula sa mga raw material na gawa sa kahoy na hugis bilog at *nylon* na kanilang ginamit bilang tali ng lato lato.

Sinasabi ni Ramos na ang mga lokal na komunidad sa Pilipinas, kung saan ang Latò Lato ay malawakang nilalaro, ay nagkaroon din ng kanilang sariling mga kuwento at paniniwala tungkol sa pinagmulan ng laro. Ang mga oral na tradisyon at mga salaysay sa mga komunidad sa Pilipinas ang nagbigay ng iba't ibang mga paliwanag o mga alamat tungkol sa pinagmulan ng Latò Lato. Maaaring mabanggit ang mga kuwento ng mga ninuno o mga diyos-diyosan na kaugnay sa laro na ito (Ramos, 1990). Pinatutunayan nito na ang paraang pasalindila ay naging epektibong pamamaraan upang lumaganap ang impluwensiya at paglalaro ng lato lato hanggang sa modernong panahon.

Sa mga lokal na perspektibo at mga pagsasaliksik, mayroong ilang mga posibleng pinagmulan ng paglalaro ng Latò Lato, kasama na rito ang Likas na Kapaligiran na kung saan ito ay nagmula sa pangangailangan ng mga bata na maghanap ng mga bagay na magagamit bilang laro. Ang mga tinik ng punong lato (latό) ay maaaring napansin ng mga bata bilang isang magandang materyal na maaaring gawing bola, na naging hudyat ng paglalaro ng Latò Lato, gayundin ang Tradisyonal na Pagsasaka. Sinasabi nito na ang Latò Lato ay maaaring may kaugnayan sa mga tradisyonal na gawain sa pagsasaka, kung saan ang mga tinik ng punong lato ay maaaring nakuha o natitira mula sa mga puno

na ginagamit sa pagsasaka. Ang mga bata ay maaaring naisipang gamitin ang mga ito bilang mga palamuti o bola para sa kanilang mga laro. Kasama rin ang Rituwal at Mga Alamat sapagkat ang iba't ibang mga ritwal at mga alamat na may kaugnayan sa mga puno o kakahuyan ay maaaring maglaman ng mga pagsasalarawan o kahalagahan ng mga laro na may kinalaman sa Latò Lato. Ang mga alamat na ito ay maaaring naglalaman ng mga paliwanag ukol sa pinagmulan at kahalagahan ng laro sa lokal na kultura. Mahihinuha ang mayamang kultura ng mga Pilipino na mula sa mga kapaligiran, uri ng pamumuhay at mga ritwal na isinasagawa ay maaaring masalamin ang pinagmulan ng paglalaro ng latò lato bilang isang libangan at pampalipas oras.

Ang paglalaro ng Latò Lato ay lumaganap at nag-*evolve* sa iba't ibang paraan sa loob ng mga komunidad sa Pilipinas. Bagaman hindi masyadong dokumentado ang proseso ng paglalaganap nito, narito ang ilang mga posibleng salik na nakaimpluwensiya sa pag-unlad ng larong ito: a.) Paglaganap sa mga Komunidad na kung saan ang paglalaro ng Latò Lato ay nakalaganap sa pamamagitan ng tradisyonal na sistema ng pagpapasa ng mga kasanayan at laro mula sa mga nakatatanda patungo sa mga kabataan. Sa pamamagitan ng mga pamilya, mga kaibigan, at mga komunidad, ang laro ay naipasa at naging bahagi ng pang-araw-araw na aktibidad ng mga bata, b.) Interaksiyon sa iba't ibang Komunidad sapagkat ang paglalaro ng Latò Lato ay maaaring lumaganap at nag-*evolve* dahil sa mga interaksiyon ng mga komunidad at ang palitan ng mga laro at karanasan. Sa mga pagsasama-sama ng mga komunidad sa mga pagtitipon, mga selebrasyon, o mga paligsahan, ang Latò Lato ay maaaring maging daan para sa mga manlalaro na matuto at magbahagi ng iba't ibang bersyon, patakaran, o estilo ng paglalaro, c.) Modernisasyon at Globalisasyon, kasama rito ang tradisyonal na mga laro, ang paglalaro ng Latò Lato ay maaaring naapektuhan ng modernisasyon at globalisasyon.

Sa pagdating ng mga modernong teknolohiya at mga palaruan, maaaring may pagbabago sa interes at pagpili ng mga bata sa kanilang mga aktibidad. Gayunpaman, ang paglalaro ng Latò Lato ay maaaring patuloy na ipinapasa at pinahahalagahan ng ilang mga komunidad bilang isang bahagi ng kanilang kultura at tradisyon.

Kahit na may mga aspeto ng pagbabago at modernisasyon, mahalaga rin ang pagpapanatili ng mga tradisyunal na pamamaraan at kahalagahan ng paglalaro ng Latò Lato. Ang mga lokal na komunidad at mga indibidwal ay patuloy na nagpapanatili at nagtataguyod ng laro bilang isang paraan ng pagpapahayag ng kanilang kultura at pagpapasa ng mga tradisyon sa mga susunod na henerasyon.

Sangkap Sa Paglalaro Ng Latò Lato

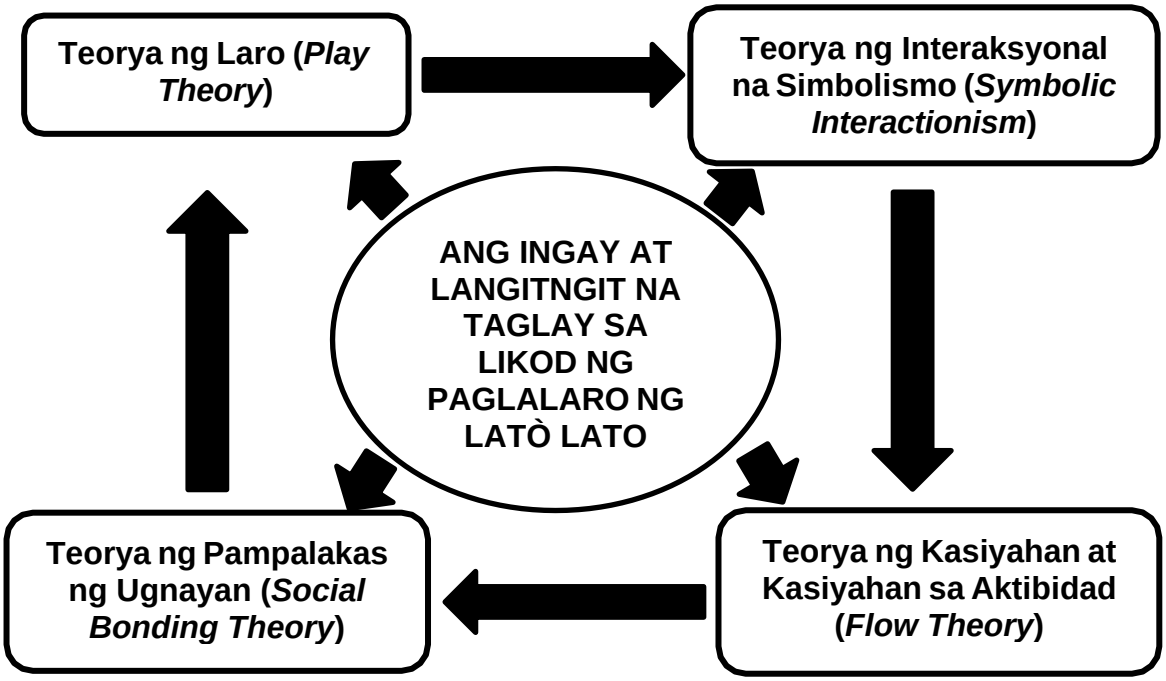
Ang paglalaro ay isang aktibidad na ginagawa ng mga tao, lalo na ng mga bata na may layunin na magkaroon ng kasiyahan, pag-unlad ng kasanayan, pagpapalakas ng samahan, at pagsasagawa ng imahinasyon. Ito ay isang proseso ng pagsasagawa ng mga patakaran o istruktura sa isang laruang konteksto na maaaring may mga layunin o tungkulin na dapat gampanan ng mga manlalaro (Smith, 1990). Ibig sabihin nito, ang paglalaro ng latò lato ay may tunguhin, isang aktibidad na maaaring magbigay ng iba’t

ibang benepisyo sa manlalaro nito gayundin may mekanismo na kailangang sundin upang maging maayos ang pagmamanipula ng latò lato.

Ang layunin ng paglalaro ng Latò Lato ay karaniwang ang magkaroon ng kasiyahan, pagpapalakas ng samahan, pagpapalakas ng mga motorikong kasanayan, o pagpapakita ng katalinuhan at kasanayan sa paglaro. Ang laro ay maaaring may elementong kompetisyon o simpleng pagsasaya at pagbibigay-kasiyahan sa mga manlalaro. Ang Latò Lato ay karaniwang nilalaro ng mga bata, kahit na maaari rin itong laruin ng mga kabataan at matatanda. Maaaring maglaro ng Latò Lato ang isang maliit na grupo ng mga manlalaro, na maaaring binubuo ng dalawa o higit pang mga indibidwal. Ang bilang ng manlalaro ay maaaring magbago depende sa lokasyon, karanasan, at tradisyon ng mga manlalaro.

Sa paglalaro ng Latò Lato, ang mga manlalaro ay gumagamit ng isang bola na gawa sa mga tinik ng punong lato (latό). Ang bawat manlalaro ay may tungkulin na ihagis, saktan, o hulihin ang bola gamit ang iba't ibang mga kasanayan at pamamaraan. Maaaring ito ay may kasamang mga patakaran o pag-uusapan ng mga manlalaro bago magsimula ang laro. Ang Latò Lato ay kadalasang gumagamit ng iba't ibang mga bahagi o elemento sa paglalaro. Ito ay kinabibilangan ng bola na gawa sa mga tinik ng lato, mga hibla o sinulid na ginagamit upang pagsama-samahin ang mga tinik, at mga iba't ibang mga galaw at teknik na ginagamit sa paghabol, paghampas, o pag-iwas sa bola. Upang mabuo ang bola ng Latò Lato, kinakailangan ng mga hibla o sinulid na ginagamit upang pagsama-samahin ang mga tinik ng lato. Ang mga sinulid na ito ay nakakapalibot sa mga tinik at nagbibigay ng anyo at katatagan sa bola.

Tulad ng ibang mga laro, ang paglalaro ng Latò Lato ay maaaring may kasamang mga patakaran o mga kasunduan na sinusunod ng mga manlalaro. Ito ay maaaring magtakda ng mga limitasyon sa galaw, mga papel o tungkulin ng bawat manlalaro, o mga regulasyon upang panatilihing patas at maayos ang laro. Ayon kay Santiago, ang kasiyahan at interaksyon ng mga manlalaro ay mahalagang bahagi ng paglalaro ng Latò Lato. Ito ay naglalaman ng pagtatawanan, pagbibiruan, at pakikipagkompetisyon o pakikipagtulungan sa iba pang mga manlalaro upang maging kasiya-siya at magkaroon ng magandang karanasan sa laro (Santiago, 2014). Samakatuwid, kinakailangang malinaw sa manlalaro ang proseso ng paglalaro at ang layon sa pagsasagawa nito. Gayundin, napapaunlad din nito ang aspetong sosyal sa pamamagitan ng interaksiyon at pakikisalamuha sa iba tulad ng paglalaro, pagtatawanan, pakikipagkompetisyon sa kapwa manlalaro.



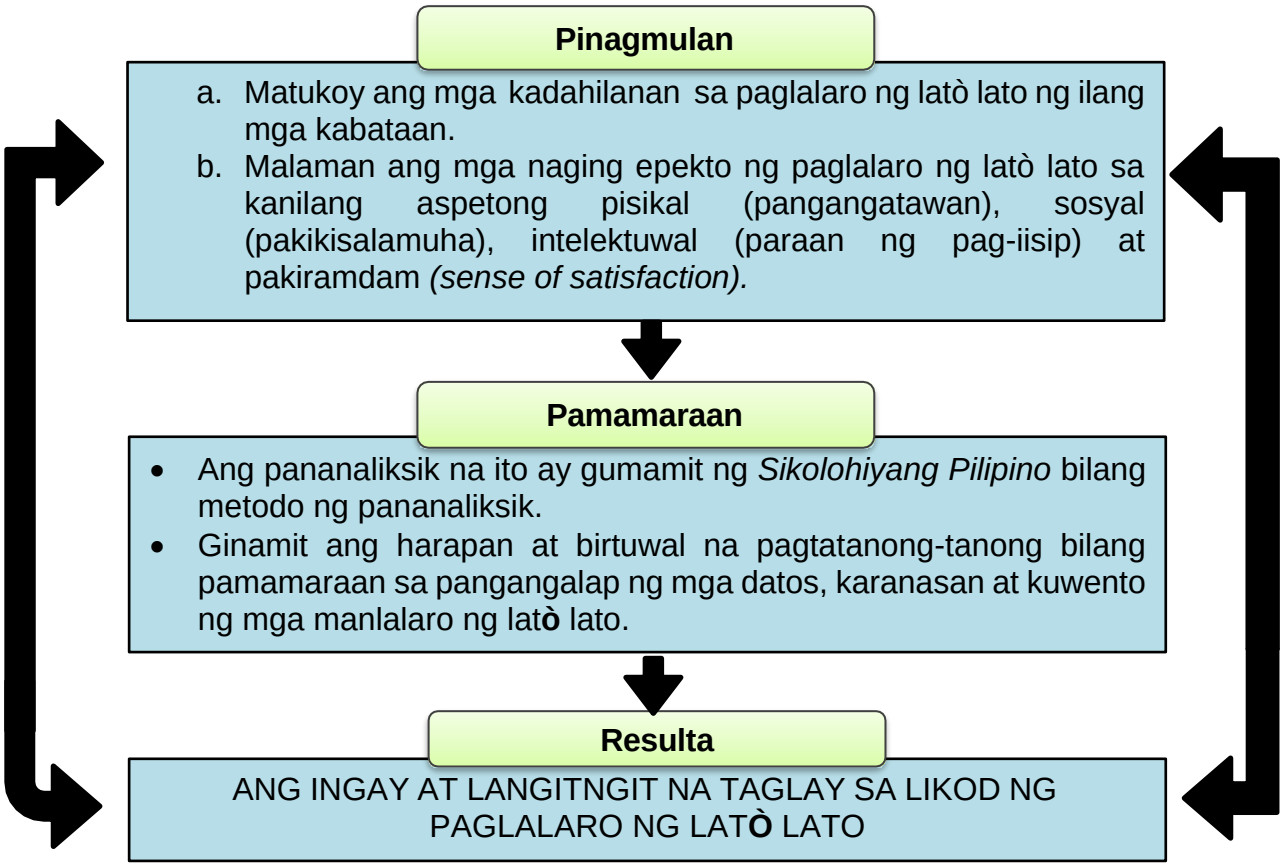
Balangkas Teoretikal

Sa pagpapatibay at pagpapaunlad ng konsepto at daloy ng pag-aaral, gumamit ng mga batayang teorya na may malaking kinalaman sa daloy at sakop ng pag-aaral. Makikita rin ang ugnayan ng mga teorya para sa mas lalong matatag na pag-aaral.

Ang unang teorya ay ang Teorya ng Laro *(Play Theory)* ni Johan Huizinga na nagbibigay-diin sa kahalagahan ng laro sa kultura at lipunan. Ayon kay Huizinga, ang laro

ay hindi lamang isang *pastime* kundi isang mahalagang bahagi ng pagkatao ng tao at nakapaglilinang ng mga kakayahan at pag-unawa sa mundo. Maaaring gamitin ang teoryang ito upang maunawaan ang papel ng Latò Lato bilang isang tradisyunal na larong Pilipino. Ikalawa, ang teorya ng Interaksyonal na Simbolismo *(Symbolic Interactionism)* ni George Herbert Mead na nagpapakita kung paano nakikipag-ugnayan ang mga tao sa pamamagitan ng mga simbolo at kung paano ang mga simbolo ay nagbibigay-kahulugan at nakakaapekto sa mga karanasan at pag-uugali ng mga indibidwal. Sa konteksto ng Latò Lato, ang teoryang ito ay maaaring gamitin upang suriin ang mga simbolikong kahulugan at mga interaksyon ng mga manlalaro habang naglalaro ng Latò Lato maging ang epekto ng simbolo sa ilang aspeto sa buhay ng isa manlalaro.

Ikatlo, ang teorya ng Kasiyahan at Kasiyahan sa Aktibidad *(Flow Theory)* batay sa teorya ni Mihaly Csikszentmihalyi na naglalarawan ng karanasan ng flow o kaligayahan sa pagganap ng isang aktibidad na may sapat na kahusayan at kahirapan. Sa pamamagitan ng teoryang ito, maaaring suriin ang mga karanasan ng mga manlalaro ng Latò Lato at kung paano nila nararamdaman ang kaligayahan at kasiyahan sa pamamagitan ng laro. Panghuli, Teorya ng Pampalakas ng Ugnayan *(Social Bonding Theory)* ni Marko Radenovic na nagpapakita ng kahalagahan ng pampalakas ng ugnayan sa pagitan ng mga tao. Sa pag-aaral ng paglalaro ng Latò Lato, maaaring gamitin ang teoryang ito upang suriin kung paano nakapagpapalakas ng ugnayan at samahan ang laro, lalo na sa komunidad o pangkat na naglalaro nito maging ang mga nabubuong ugnayan at sosyal na pag-unlad sa pagitan ng bawat manlalaro. Ito rin ay magpapatibay ng pag-aaral hinggil sa nabubuong magandang ugnayan ng mga manlalaro at paraan ng kanilang pakikipagkapuwa-tao bilang bahagi ng koordinasyon sa paglalaro ng latò lato.



Pigura 1: Balangkas Teoritikal

KONSEPTUWAL NA BALANGKAS

Nakalahad sa unang kahon ang **Pinagmulan** kung saan ito ang bahaging nagsasabi ng pinag-ugatan ng pagsasagawa ng pananaliksik at mga naging tuon sa mga datos at impormasyong nilalayong makuha. Binibigyang-pansin sa pag-aaral na ito ang mga sumusunod; a.) matukoy ang mga kadahilanan sa paglalaro ng lato lato ng ilang mga kabataan, b.) malaman ang mga naging epekto ng paglalaro ng lato lato sa kanilang aspetong pisikal (pangangatawan), sosyal (pakikisalamuha), intelektuwal (paraan ng pag-iisip) at pakiramdam *(sense of satisfaction).*

Ikalawa, ang kahon ng **Pamamaraan** ay naglalaman ng mga hakbang na ginawa ng mga mananaliksik upang maisakatuparan ang mga kahingian sa kahon ng pinagmulan. Ginamit ang metodong sikolohiyang Pilipino bilang metodo ng pananaliksik sa pagsasagawa ng isang kwalitatibong pag-aaral. Ang pamamaraan ng harapan at birtuwal na pagtanong-tanong ay nakatulong sa pangangalap ng mga impormasyon at mga karanasan ng mga kalahok ng pag-aaral.

Ikatlo, ang kahon ng **Resulta o Kinalabasan** na nagsisilbing tugon sa suliranin ng pananaliksik. Dito natukoy ang mga kadahilanan sa paglalaro ng lato lato, maging ang epekto nito na tumutukoy sa ingay at langitngit na taglay sa likod ng paglalaro ng latò lato maging ang mga posibleng kahinatnan sa patuloy na paglalaro ng latò lato.

Pigura 2: Konseptuwal na Balangkas

Mga Suliranin ng Pag-aaral

1. Ano ang mga kadahilanan sa paglalaro ng latò lato ng ilang mga Kabataan?
2. Ano ang mga naging epekto ng paglalaro ng latò lato sa kanilang aspetong pisikal (pangangatawan), sosyal (pakikisalamuha), intelektuwal (paraan ng pag-iisip) at pakiramdam (*sense of satisfaction*)?

METODOLOHIYA

Ang ginamit na metodo ng pananaliksik ay Sikolohiyang Pilipino. Ang Sikolohiyang Pilipino ay isang perspektibang sikolohikal na naglalayong pag-aralan at maunawaan ang karanasan, kaisipan, at kultura ng mga Pilipino mula sa loob mismo ng kanilang konteksto. Ito ay isang pambansang paraan ng pag-aaral ng sikolohiya na nagtataglay ng mga Pilipinong pagpapahalaga, konsepto, at pamamaraan (Javier, 2016). Sa ilalim ng metodong ito, ginamit ang paraang pagtatanong-tanong bilang paraan ng pangangalap ng mga datos at impormasyong kakailanganin sa pag-aaral.

Ang pagtatanong-tanong at pakikipagkuwentuhan ay mga pamamaraan ng pagkalap ng mga datos na may pakikipagkapuwa. Sa pagsasagawa ng pananaliksik ginagamit ang mga ito dahil gamay na natin ang mga paraang ito ng pagbatid sa nais malaman, matuklasan o matutuhan ((Javier, 2016). Hindi isang salita lamang na tanong ang ginamit sa pagtatanong-tanong, inuulit ang katagang tanong. Ang isang salita na tanong ay pasibo samantalang ang tanong-tanong na may pag-uulit ay aktibo. Isinagawa ang paraang pagtatanong-tanong ng mga posibleng naglalaro ng lato lato mula sa ilang mga kabataan.

Gayundin, nalaman na rin ang iba pang posibleng kapanayamin tungkol sa kanilang karanasan at ang epekto sa kanila ng paglalaro ng lato lato. Sa pagsasagawa ng pagtatanong-tanong, inihanda ang ilang katanungan na nakatuon sa suliranin ng pananaliksik; 1.) Ano ang nagtulak sa iyo sa paglalaro ng latò lato? 2.) Ano ang epekto ng paglalaro ng lato lato sa iyong aspetong pisikal (pangangatawan), sosyal (pakikisalamuha), intelektuwal (paraan ng pag-iisip) at pakiramdam *(sense of satisfaction)?* Ito ang binigyang-pansin sa pangangalap ng mga kuwento hinggil sa kanilang karanasan sa paglalaro ng latò lato at ang mga epekto nito sa kanilang pisikal, sosyal, emosyonal at intelektuwal. Nagkaroon din ng mga impormal na pakikipagkuwentuhan na kung saan ang mga mananaliksik ay hinayaan lamang magkuwento ang mga kalahok tungkol sa kani-kanilang mga karanasan na hindi isinasaalang-alang ang ilang katanungang binuo upang malayang makapagbahagi ang ilang kabataan ng kani-kanilang mga personal na karanasan. Isa rin sa mga pamamaraang isinagawa ay mismong ang mga mananaliksik ang sumubok na maglaro ng nasabing lato lato upang pasukin ang kultura ng paglalaro ng latò lato at magkaroon ng pansariling analisis sa naging implikasyon nito sa ilang ulit na pagsubok sa paglalaro ng latò lato.

RESULTA AT PAGTALAKAY

Lumalabas sa pitong kalahok na tinanong at nakakwentuhan ng mga mananaliksik hinggil sa kadahilanan sa paglalaro ng latò lato. Karamihan sa mga naglalaro ay may pare-parerhong kadahilanan ng paglalaro ng latò lato. Inilahad ang kanilang mga palayaw matapos nilang bigyang-pahintulot ang mananaliksik para sa mas epektibong pagtalakay sa nilalaman ng pag-aaral. Batay sa kanilang mga naging salaysay, sila ay madalas naglalaro lalo na sa mga bakanteng oras bilang pampalipas oras, pantanggal ng pagod o *stress* at bahagyang paglilibang. Narito ang talahanayan ng mga naging kasagutan ng mga kalahok.

Tanong bilang 1: Ano ang nagtulak sa iyo sa paglalaro ng latò lato?	
KALAHOK	**KASAGUTAN**
Kulot	*“Dahil walang magawa sa bahay ha ha at maraming bata ang naglalaro ng lato lato kaya sinubukan ko ito at nagustuhan ko kahit hindi man ako magaling dito at least I tried. Keme!”*
Lance	*“Dahil sa pagsikat ng laruang ito tsaka yun’ ang palaging na pop-up sa notif ko eh.”*
Hanny	*“Dala po ng aking kuryosidad mula sa mga mag-aaral sa elementarya na nakikita kong naglalaro rin nito. Mukha itong madali kapag pinapanood ko ang mga batang naglalaro ng lato lato, ngunit noong ako na po ang nakasubok, napagtanto ko na mahirap pala kaya mas lalo po akong na-challenge na laruin ito”.*
Gab	*“Nakikita ko ito na nilalaro ng mga bata at mag-aaral kaya nahikayat rin ako na subukin ang laruang ito.”*
Russel	*“Nakita ko ang aking pinsan tapos inaya niya akong i-try ang latò lato”*
Tin-tin	*“Marami pong nagtitinda sa aming paaralan, halos lahat po ng kaklase ko ay naglalaro ng latò lato.”*
Alliyah	*“Nakita ko lang po na maraming bata ang naadik sa larong ito kaya po sinubukan ko rin.”*

Talahanayan 1: Mga Kadahilanan sa Paglalaro ng Lato Lato

Mahihinuha mula sa mga naging kasagutan ng mga kalahok na popularidad o napapahon ang isa sa mga pangunahing dahilan ng kanilang paglalaro ng lato lato. Sinuri ni McLuhan (1964) sa kanyang akda na “*Popular Culture and the Mass Media”* ang epekto ng popular na kultura at *media* sa mga tao. Sa kanyang akda, ipinakita niya na ang mga media na nagpapalaganap ng mga popular na kultura, tulad ng mga pelikula, musika, at telebisyon, ay maaaring magdulot ng malaking impluwensiya sa kaisipan at pagkilos ng

mga tao. Ipinapakita ni McLuhan na kapag ang isang tema o produkto ay naging uso at sikat sa *media*, ito ay mas malamang na tatangkilikin ng masa. Gayundin, kahalintulad ng pagsikat ng mga *eGames* kinatigan ni T.L. Taylor (2017) sa kanyang lathala na "*The Rise of eSports: A New Era of Competitive Gaming*" na naglalarawan ng pag-unlad ng eSports bilang isang pamosong industriya ng laro. Ipinapakita niya kung paano ang mga larong tulad ng *Dota 2, League of Legends*, at iba pang kompetisyon ay nakakakuha ng libu-libong manonood at tagahanga sa buong mundo. Ipinapakita rin niya ang pagdami ng mga patimpalak, mga premyo, at ang komunidad ng mga manlalaro na sumusuporta sa mga laro na ito na nagiging daan upang tangkilikin at maging tanyag sa panlasa ng masa.

Sinasang-ayunan din ng pananaliksik nina Ortiz de Gortari at Griffiths (2015) ang pagkakaroon ng *social media* bilang isang pangunahing dahilan ng paglaganap ng mga laro at pagkakaroon ng interes ng masa. Ipinapakita nila kung paano ang pagbabahagi ng mga larong *online* at mga karanasan sa *social media* ay nakaaapekto sa pagiging sikat at kinahihiligan ng isang laro. Kung kaya malaking salik ang *social media* sa pagkakaroon ng kuryosidad ng mga kabataan sa pagdiskubre ng isang laro. Sila ay naeengganyo na subukin ang isang bagay dahil ninanais nilang tuklasin at aktuwal na danasin ang mga ginagawa sa kanilang mga napapanood sa *social media*. Ito rin ay isang mabisang materyal upang hatakin ang interes ng mga manonood o manlalaro lalong higit ang paglalaro ng lato lato. Madaling makuha ang atensiyon ng mga tao kapag aktuwal nila itong nakita o napanood tulad na lamang ng paglathala sa sikat na estasyon na GMA 7 ang Kapuso mo- Jessica Soho (KMJS) ang pagtutok nila sa *segment* na may pamagat na "Bata, nagkapasa-pasa ang braso dahil sa laruan na latò lato? Itinampok dito ang ilang mga kabataang naglalaro ng lato lato sa mga kalsada at iskinita mapa bata man o matanda ay umalingawngaw ang tunog ng latò lato o tinatawag ding *toy cracker*. Dahil sa epekto ng ganitong panoorin mas marami pa rin ang patuloy na naglalaro ng latò lato kahit na sinasabi ng ilang eksperto na ito ay may kaakibat na peligro.

Tanong bilang 2: Ano ang epekto ng paglalaro ng lat**ò** lato sa iyong aspetong pisikal (pangangatawan), sosyal (pakikisalamuha), intelektuwal (paraan ng pag-iisip) at pakiramdam *(sense of satisfaction)*?	
KALAHOK	**KASAGUTAN**
Kulot	*"Actually, nagkaroon ako ng mga pasa sa braso bunga ng pagtama ng lato lato, pero feeling ko mas napagtibay ang aking pakikisalamuha at pakikisama sa kapwa ko gumagamit ng lato lato lalo na sa mga bata, kasi parang bonding ba? mas napapagana ko ang aking isipan sapagkat kinakailangan ko ng presence of mind at nagkaroon ng kakaibang satisfaction sa aking kalooban sa tuwing ako ay nakakagamit ng laruan na ito. "*

Lance	*“Ano ng aba? Tingin ko sa pisikal na aspeto po, masasabi kong negatibo ang naging epektibo nito sapagkat nagkaroon ako ng isang mahaba at malaking pasa sa aking kanang braso dala ng paulit-ulit na pagtama ng laruang ito. Sa sosyal na aspeto naman po, masasabi kong tunay na nakaeengganyo ang paglalaro nito kaya naman nagkasundo kami ng aking mga kaklaseng naglalaro rin nito. Sa intelektuwal na aspeto naman po, tunay na na-challenge ang aking isip sa kung paano ko mapapatagal ang pagtunog ng lato lato lalo na dahil iyon ang pinaka-challenging na parte sa paglalaro nito. Kung sa aspetong pakiramdam naman po, talagang nakararamdam ako ng saya sa tuwing napapatagal ko sa pagtunog ang lato lato na siyang nagtutulak sa akin upang mas laruin pa ito.”*
Hanny	*“It really hurts talaga sir, nagkaroon ako ng maliliit na pasa sa aking wrist mula sa mga nabigong pagsubok sa paglalaro ng lato-lato, wala itong masyadong epekto sa sosyal maliban sa madaliang kasiyahan ng aming kasamahan kapag tuloy tuloy ang tunog ng lato lato. Sa aking kakahayan sa pag obserba sa kadahilanan na dito ko natutunan ang pagpapatunog at pagpapanatili na paggalaw ng laruan, mataas naman ang natatamo ko na satisfaction sa paglalaro ng lato-lato”.*
Gab	*“Marami akong natamong mga pasa sa aking kamay, sa pakikitungo naman sa mga tao, nagawa kong ipagyabang ito dahil marami ang nahihirapang laruin ang lato lato, ang epekto naman ng lato lato sa aking pag-iisip, naging mas matiyaga ako at maingat, sa aking pag-iisip, at noong magaling na akong maglaro ng lato lato, nakaramdam ako ng ginhawa dahil nga marami ang nahihirapang laruin ang lato lato.”*
Russel	*“Sa pisikal naman nagkaroon ako ng mga pasa sa aking kamay at sa sosyal naman, nakisama ako sa mga bata sa aming barangay at naglaro rin ng lato-lato. At sa intelektuwal naman, natuto ako hanapin ang center of mass para ang lato-lato ay malaro ng maayos at sa aking pakiramdam, kapag ako nakakalaro ng lato-lato hindi ko mapigilin ang aking sarili na hindi maglaro kahit nagkakaroon akong mga pasa”*

Tin-tin	*“Nagkaroon po ako ng pasa sa kamay ‘yun lang po sa ngayon.”*
Alliyah	*“Nagkaroon po ng bukol sa braso, pinagalitan po ako, wala po, wala na po.That’s all. Bye”*

Talahanayan 2: Epekto ng Paglalaro ng Latò Lato

Mahihinuha mula sa mga kasagutan ng mga kalahok ang iba’t ibang epekto ng paglalaro ng latò lato na hinati-hati sa ilang aspeto. Sa aspetong pisikal, isa sa mga tinitingnan ng ilang mga pag-aaral at iskolar na ang larong lato lato ay nagdudulot ng mga pasa o sugat sa ilang bahagi ng katawan lalong higit sa kamay at pulso ng manlalaro. Ayon kay Tabago (2014), ang ilang laro ay maaaring pumukaw ng matinding damdamin at pagpapalakas ng kamalayan sa mga kalahok, kaya maaaring magresulta sa mga pasa at sugat dahil sa pagiging aktibo at masigla sa paglalaro. Maaaring maging anyo rin palakasan o kompetisyon kung saan kailangang ipakita ng mga kalahok ang kanilang lakas, tibay, at abilidad sa paglalaro ng latò lato na humahantong sa mga hindi inaasahang marka sa kanilang katawan partikular sa kamay, pulsuhan at daliri.

Isa rin sa mga nakikitang dahilan ni Tabago ay ang kagamitang ginagamit na mula sa mga simpleng materyales tulad ng kahoy, bato, tsinelas at iba pa. Ang mga ito ay maaaring maging sanhi ng mga pasa at sugat kapag nagsusumikap ang mga kalahok na gawin ang mga hamon na kasama sa laro. Subalit, sa positibong pananaw naman makikita ang iba’t ibang magagandang naidudulot ng paglalaro ng latò lato. Isa na rito ang, *Physical Fitness* sapagkat ang paglalaro ng Latò Lato ay isang aktibong laro na nangangailangan ng paggalaw, pagtakbo, pag-akyat, at paglusong.

Sa pamamagitan ng regular na paglalaro ng laro, nagiging mas aktibo at mas malakas ang katawan ng isang manlalaro. Ang aktibidad na ito ay nagpapalakas ng mga kalamnan, nagpapabuti sa *cardiovascular health*, at nagpapababa ng timbang. Ang Latò Lato rin ay nagpapabuti sa mga motorikong kasanayan tulad ng paggalaw, paglusong, at pag-balanse. Ang mga manlalarong naglalaro nito ay kailangang maging maalisto at mabilis sa pagtakbo at pag-igting upang maiwasan ang pagkakabagsak o pagiging "tumbang preso." Sa paglipas ng panahon, nagiging mas magaling at mas matatas ang mga manlalaro sa kanilang motorikong kasanayan. Karagdagan pa, ang Latò Lato ay isang laro na nangangailangan ng mabilis na mga kilos at agarang mga desisyon. Dahil dito, nagiging mas alerto at mabilis ang mga *reflexes* ng mga manlalaro sa pagsagot sa mga sitwasyong nagtatakda ng kanilang pagtakbo, pag-atras, o pagtalon at higit sa lahat ang regular na paglalaro ng Latò Lato ay nagpapalakas sa resistensya at *stamina* ng mga manlalaro. Sa paglipas ng panahon, mas nagiging matagal at mas madaling makayanan nila ang pisikal na mga hamon ng laro (Caluza, 2013).

Sa usaping sosyal naman pagdating sa pakikitungo at pakikisalamuha ng mga manlalaro, naging maayos at kasiya-siya ang naging resulta at impak ng paglalaro ng latò lato. Dahil sa nauuso na rin ang “latò lato *challenge*” sa ilang *social media platforms* tulad ng *tiktok, reels* at *facebook* maging ang mundo ng kulturang popular ay pinasok na rin ng mundo ng latò lato kung kaya’t higit na mas napapaunlad nito ang iba’t ibang kasanayan ng tao sa aspetong sosyal. Una, ang Latò Lato ay kadalasang nilalaro ng isang grupo na kung saan kinakailangan ang kooperasyon ng mga manlalaro upang

tumagal ang paglalaro at pagtunog ng latò lato. Sa pamamagitan ng paglalaro ng Latò Lato, natututo ang mga manlalaro kung paano magtrabaho sa isang grupo, paano makipag-ugnayan sa kanilang kapwa, at paano magtulungan upang makamit ang isang layunin.

Ang mga kasanayang ito ay mahalaga hindi lamang sa larong ito kundi pati na rin sa tunay na buhay at sa iba pang *social settings*. Ikalawa, sa Latò Lato, ang mga manlalaro ay kailangang magkaisa at magkaintindihan upang maiwasan ang mga pagkakamali. Ang mga manlalaro ay nag-uusap at nagbibigay ng mga direksyon sa isa't isa upang maisakatuparan ng maayos ang kanilang mga hakbang. Ang pagsasanay sa pakikinig at pagpapahayag ng kanilang mga ideya ay nagpapabuti sa kanilang abilidad na mag-ugnayan at magkaroon ng malinaw na komunikasyon sa ibang tao. Ikatlo, ang Latò Lato, tulad ng iba pang laro, ay nagtuturo ng pagiging mabuting kalaban at paggalang sa kapwa manlalaro. Kapag naglalaro ng Latò Lato, ang mga manlalaro ay natututong maging mapagpakumbaba sa tagumpay at maging mapagbigay-kaya sa kabiguan. Ang pag-unawa at pagtanggap ng mga limitasyon ng bawat isa at ang respeto sa mga kalahok ay mahalagang aspeto ng *sportsmanship* na nagpapalakas sa pagkakaisa ng grupo at pagpapahalaga sa pakikitungo sa kapwa.

Panghuli, ang mga manlalaro ay nakakaranas ng pakikipag-ugnayan sa iba't ibang tao, kahit na hindi nila kilala nang lubusan. Ito ay nagpapalawak ng kanilang *social circle* at nagbibigay-daan sa kanila na maging mas komportable at kumpiyansa sa pakikipag-usap at pakikitungo sa iba. Ang mga *social skills* na ito ay mahalaga sa personal at propesyonal na aspeto ng buhay (Almo, et.al 2018). Sa kabuoan, ang Latò Lato ay nagpapaunlad ng mga kakayahang *interpersonal* ng mga manlalaro, tulad ng *teamwork, communication, sportsmanship,* at *social skills*. Ito ay nagbibigay-daan sa kanila na maging mas maligaya at matagumpay sa kanilang mga pakikipag-ugnayan sa kapuwa. Ngunit, mahalagang tandaan na ang pag-unlad ng mga kakayahang ito ay hindi lamang bunga ng laro mismo, kundi ng paraan ng pagtuturo at paglalaro ng mga guro at mga magulang. Kaya't ang aktibong pakikilahok at paggabay ng mga matatanda ay mahalaga upang mapalawak ang benepisyo ng Latò Lato at iba pang larong tradisyonal sa pagpapaunlad ng *social skills* ng mga kabataan.

Sa kabilang banda, malaki ang hatak ng paglalaro ng Latò Lato sa aspetong intelektuwal ng mga manlalaro. Ang mga elemento tulad ng diskarte, pag-iisip, at pakikipag-ugnayan sa kapuwa ay isa sa mga pundasyong kognitib sa paglalaro ng latò lato. Isa na rito ang pagpapalakas ng paggamit ng memorya at mga *cognitive skills* tulad ng pagsasalita, pagbasa, at pagbibilang. Ang mga manlalaro ay maaaring gumamit ng mga taktika at mga numerong kasanayan upang matagumpay na mapagtulungan ang laro. Gayundin, ito ay nagbibigay-daan sa mga manlalaro na maging mas intelehensiyang emosyonal. Ang paglalaro ng laro ay nagpapalawak ng kanilang mga karanasan at pakikipag-ugnayan sa iba, kaya't natututo silang mag-unawa at magpakiramdam sa damdamin ng ibang tao. Ito ay nagpapalakas ng kanilang pagiging sensitibo at empatiya sa kapuwa.

Karagdagan pa, ang Latò Lato ay isang mabilis na laro na nangangailangan ng mabilisang reaksyon at pagtugon sa mga pangyayari. Sa pamamagitan ng madalas na

paglalaro nito, natututo ang mga manlalaro na maging *focused* at mas maalam sa pagtutok sa aktuwal na sitwasyon ng laro. Ito ay nagpapabuti sa kanilang kakayahang mag-*concentrate* at makapag-isip nang mabilis sa iba pang mga larangan ng buhay. Sinasabi rin na ang paglalaro ng Latò Lato ay nagpapalakas ng *spatial awareness* o pagkaalam sa paligid at kamalayan sa posisyon at galaw ng mga kasamahan at kalaban. Ang mga manlalaro ay kailangang maging sensitibo sa paligid upang maiwasan ang pagkabagsak o pagtama sa ibang manlalaro. Bukod dito, ayon kay Gonzales, binabanggit niya na kinakailangan din ang kakayahang mabilis na mag-*adjust* at mag-desisyon batay sa mga pangyayari sa laro, kaya't nagpapalakas ito ng *cognitive flexibility* o pagiging madaling bumuo at magpalit ng mga ideya o plano (Gonzales, 2018). Pinatutunayan na lubhang napakaraming mabubuting epekto sa aspetong intelektuwal ang paglalaro ng lato lato subalit ito rin ay humantong sa adiksyon dulot ng labis na pagkahumaling sa paglalaro nito. Inaasahan din ang patnubay at gabay ng mga magulang lalong higit sa mga batang naglalaro nito upang magkaroon ng limitasyon at disiplina sa paglalaro nito.

Nakakabawas ng *stress*, nakakatuwa at nakakalibang. Ilan lamang sa mga naging kabuoang *satisfaction* o kasiyahang naranasan ng mga manlalaro ng lato lato. Ito ay maaaring nag-ugat sa iba’t ibang dahilan. Una, ang Latò Lato ay isang laro ng grupo na nagpapakilos sa mga manlalaro upang makipag-ugnayan sa isa't isa. Ito ay nagbibigay ng pagkakataon sa mga manlalaro na makipag-interaksyon, makipaglaro, at makipagkaibigan sa iba. Ang mga *social interactions* na ito ay nagbibigay ng kasiyahan at pagkakaroon ng koneksyon sa ibang tao. Ikalawa, ang paglalaro ng Latò Lato ay nagbibigay ng pagkakataon sa mga manlalaro na maipakita ang kanilang mga kasanayan at kakayahan sa laro. Ang pagkamit ng mga tagumpay at pagpapaunlad ng kanilang mga abilidad ay nagdudulot ng kasiyahan sa kanilang sarili. Ikatlo, ito ay isang tradisyonal na laro ng Pilipino na may malalim na kasaysayan at kultura. Ang paglalaro ng larong ito ay nagbibigay ng kasiyahan sa mga manlalaro dahil sa pagpapahalaga at pag-alala sa mga tradisyon ng kanilang bansa. Panghuli, ayon kay Lamug, ito ay sumusubok ng kakayahan ng manlalaro na mas lalong nagpapasidhi sa kanya upang pagbutihin ang kanyang paglalaro na nagiging dahilan upang sila ay malibang, kagyat na malimot sa oras at mabawasan ang *stress* na kanilang nararanasan (Lamug, 2005).

Samakatuwid, ito ay isang mabisang paraan ng pagkawala ng *stress* ng isang tao at magkaroon ng kagyat na kasiyahan sa pakiramdam lalo na kapag napapakinggan nila ang sunod-sunod na tunog ng lato lato na kanilang pinag-uumpukan.

Kongklusyon

“Nakakairita, masakit sa tenga at nakakainis pakinggan”. Iyan ang paulit-ulit na ibinabato ng komunidad sa mga manlalaro ng latò lato. Kung hindi minsan, madalas din silang itinataboy sa matataong lugar sapagkat sila raw ay nakakaistorbo sa mga taong nagpapahinga at ang masaklap pa ay nagdudulot ng *noise pollution*. Ito ang mga paratang na mas masakit pa sa pasa at sugat na tinamo dulot ng paglalaro ng latò lato.

Sa kabilang anggulo, sinipat ang ingay at langitngit ng paglalaro ng latò lato kung saan ito ay may malaking implikasyon sa iba’t ibang aspeto sa buhay ng isang tao lalong

higit sa mga manlalaro. Tinitingnan ng pag-aaral na may malaking impluwensiya ang *social media* at kulturang popular upang hatakin ang madla sa saglit na pagtapon ng paningin sa mga *videos* at *challenge* na ginawa ng mga manlalaro ng lato lato sa iba't ibang panig ng Pilipinas maging sa buong mundo. Tunay ngang, mabilis manganak ang mass media ng mga karanasan at kultura na ipinamamalas ng tao sa kani-kanilang komunidad. Pinatotohanan nito na ang paglalaro ng lato lato ay may malalim na kultura at kasaysayan. Sumasalamin ng tradisyon, pumapanday ng mga karanasan at humuhulma ng masasayang alaala tungo sa holistikong paghubog ng isang tao. Ngayon natin sabihin na nakakairita, nakakainis at nakakaistorbo ang paglalaro ng latò lato kung ito ay hitik sa magagandang bunga. Napagtanto ng pag-aaral na;

1. Ito ay may malaking hatak sa mundo ng *mass media* kung kaya muling nabuhay ang paglalaro ng lato lato at madaling kumalat ang impluwensiya nito lalong higit sa mga kabataan sa milenyal na panahon.
2. Kapana-panabik ang bawat salpukan na humahantong sa kagyat na kasiyahan ng mga manlalaro na nagbibigay sa kanila ng sukdulang *satisfaction* lalo na kung ito ay latò lato *challenge.*
3. Pokus at talas ng memorya na isa sa mga sangkap sa matagumpay na paglalaro ng lato lato na humuhubog din ng personalidad ng isang manlalaro dahil sa inilalaang konsentrasyon at talas ng pag-iisip at mahusay na taktika sa mga kilos at gawi na kinakailangang gawin upang mapanatili ang salpukan ng lato lato sa mahabang oras o panahon.
4. Nagpipreserba ng kasaysayan, pinapayaman ang kultura at muling ipinapanganak ang mga nangyari sa kasaysayan sa makabagong panahon.
5. Pinatatatag ang koordinasyon at pakikipagkapuwa-tao na humahantong sa matibay na koneksyon, ugnayan at pakikisalamuha sa iba.

Mula sa mga nabuong paglalagom ay mahihinuha na talagang malayo na narating ng ingay at langitngit na dulot ng paglalaro ng latò lato.

Rekomendasyon

Batay sa mga natuklasan at sa mga kongklusyong nabuo ng pananaliksik, iminumungkahi ng mga mananaliksik na magkaroon pa ng mga ipapanganak na pag-aaral na maaaring saklawin ang mga reaksyon ng komunidad sa paglalaro ng latò lato. Gayundin, maaaring pasukin ang hatak ng *mass media* sa pagpapaunlad ng mga tradisyunal na larong Pilipino tulad ng latò lato na minsan ng tinalikuran ng lipunan at natabunan ng mga *online* at *e-games* na umakit sa milenyal na panlasa.

Etikal na Pagsasaalang-alang

Ang pananaliksik na ito ay sumunod sa mga etikal na pamantayan at alituntunin. Bago sinimulan ang pag-aaral, lahat ng mga kalahok ay nagbigay ng kanilang pahintulot para sa kanilang partisipasyon. Ipinaalam sa mga kalahok ang layunin ng pag-aaral, at

ang mga datos na makakalap ay magiging kumpidensyal at isaalang-alang ang isyung etikal gayundin nabanggit na gagamitin lamang para sa nasabing pananaliksik.

Gayundin, ang pagsasagawa ng pananaliksik ay may pagsang-ayon at koordinasyon sa mga kinauukulan sa paaralan, partikular sa mga namumuno gayundin ang pahintulot ng mga magulang at mag-aaral na kalahok sa isinagawang panayam. Sa ganitong paraan, ang pananaliksik na ito ay isinagawa nang may integridad, pagsunod sa mga etikal na pamantayan, at pagbibigay ng paggalang at proteksyon sa mga kalahok at kanilang impormasyong ibinahagi sa panayam na isinagawa.

Pasasalamat

Labis ang aming pasasalamat sa Panginoong Diyos na nagbigay sa amin ng liwanag at lakas upang matagumpay na maisakatuparan ang pananaliksik na ito.

Sa aming pamilya at mga tapat na kaibigan, nagpapasalamat kami sa walang sawang suporta at pagbibigay inspirasyon sa amin sa bawat hakbang ng aming pananaliksik. Hindi matatawaran ang inyong pagmamahal na nagsilbing lakas at gabay sa bawat pagsubok na aming napagtagumpayan.

Sa aming tagapayo, Ma’am Rose Ann DP. Aler na siyang naging gabay at tanglaw sa bawat hakbang ng aming pag-aaral. Ang inyong karunungan at pagmamalasakit ay nagturo sa amin ng tamang landas at nagbigay ng kumpiyansa upang harapin ang anumang hamon sa panahon ng aming pananaliksik.

At higit sa lahat, sa mga kalahok sa aming pananaliksik na hindi nag-atubiling magbigay ng kanilang oras, kaalaman, at pananaw upang mapalalim ang aming pag-unawa sa napiling paksa. Ang inyong pagtitiwala at pagiging bahagi ng aming pag-aaral ay nagdagdag ng bagong perspektiba at karagdagang kaalaman sa aming paksa. Isa kayo sa naging daan upang maisakatuparan ang pag-aaral na ito.

Sa lahat ng ito, taos-pusong pasasalamat ang aming ipinaabot sa bawat isa. Hindi namin mararating ang tagumpay na ito nang hindi dahil sa inyong pagmamahal, suporta at tulong. Ang inyong kontribusyon ay labis na pahahalagahan at iingatan.

A QUALITATIVE STUDY ON THE SLANG WORDS AND SOCIO-CULTURAL EXPRESSIONS OF THE PAMPANGOS

Michael R. Martizano

Education Department, Baguio College of Technology, Baguio City, Benguet, Philippines
Ph.D. ELS (English Language Studies), College of Arts and Humanities, Benguet State University, La Trinidad, Benguet, Philippines

https://doi.org/10.5281/zenodo.11516426

ABSTRACT

This study is designed to find out the commonly used slang words and socio-cultural expressions of the Pampangos. The Pampangos or Kapampangan people are settling at the heart of Central Luzon in the Philippines. They are considered to be one of the largest ethnolinguistic groups in the country and are also known for their diverse cultures and practices. The research is intended to know how the language users use the slang words and the sociocultural usage of such words in their communicative settings. Thus, the researcher managed to form a conclusion supported by the theories and principles of language. This paper also provided information regarding the formation, evolution and adaptation of the Pampango socio-cultural expressions. The researcher applied the principle and strategy of thematic analysis as a method of qualitative research where in actual interview with the participants was applied and the process of transcribing the interview was also utilized. The study has identified the slang words and socio-cultural expressions of the Pampangos such as pu or opu, patawas me, bari-bari apu, tawu, taksyapo, dyandirit, misdan a yatut, pasirkulatuk, borbolen, o-jo, alang-atdo, arya, keni, diyablus, salibatbat and atin yang ditak. The said terminologies and expressions were also analyzed using the principles of language. The researcher presented in the result of the study the determined socio-cultural expressions using Austin's theories of illocutionary acts, Searle's principles of speech acts and Halliday's principles of the functions of language.

Keywords: *Pampangos, Slang, Socio-cultural, Expressions, Principles, Language*

INTRODUCTION

Language is said to be the most effective and powerful tool of communication. Hymes (1964) pointed out that one may view language as a powerful and essential means of human communication. It is through language that every person is bound by common objectives and norms. Language plays an important role in understanding people, their social and cultural environment. Halliday (1975) also added that Language is used to ensure social maintenance. In a wider sense, this function refers to all uses of language which help to define and maintain groups: teenage slang, family jokes, professional jargon, ritualistic exchanges, social and regional dialects.

It is through language that the culture of a certain speech community is inculcated. Hence, Language and Culture are always related. Culture pertains to the general views of a people in their society. These general views are based on their beliefs, traditions and socioeconomic living which unite them through common goals and perceptions. Every individual belongs to a culture that helps and molds him about his role in the society. Moreover, this culture serves as his foundation in attaining quality of life. The essence of culture is being passed through generations with the use of a dynamic code called “language”. While the child learns his native tongue, he also acquires his culture. The words which were included in the lexical context of a language are strong indicators of the kind of practices people apply in their social settings which replicate their cultural identities.

The lexical context of a Language involves the things that the respective speaking communities value in their own means. For instance, the Filipinos have various terminologies on the different types of rice like palay, bigas, kanin, lugaw and sinangag. There are also more terminologies on its kind like malagkit, denorado, wagwag and sinandomeng while in the American setting the only term for bigas is rice. That’s why they also have the terminologies like rice grain and fried rice and more. The Filipinos don’t’ have native word for “snow” but we only adapt the Spanish word “nieve” to refer to it. Therefore, Language is the one that crafts the essence of a certain culture. It is also the one that connects one culture to another.

Every society has a native language. A society is composed of a speech community which involves people with different social orientation based on their socioeconomic status, ethnicities and roles that they play. One of the bases of language variations is the differences of the group of people which are embodied in the structure of a society. This variation is called “sociolect”. Such examples are differences between the vocabulary of children to the adults, gay lingos or secret gay codes called “argot” which are commonly used in the mainstream and the language differences between males and females. In relation to this, every person in the society has his own way of language use and this is called “idiolect”. This is influenced by the setting where he grew up with and the place where he belongs. Another language variation is the “register” which is defined according to its use in social situation. As what Halliday points out that this pertains to the level of formalities of language and a complex scheme of communicative behavior. Such examples are the formal speech, non-formal speech, slang and vulgar speech.

This study is focused on the slang words and socio-cultural expressions that are widely and commonly used by Pampangos. The Kapampangan people or Pampangos live in the provinces of Pampanga, Tarlac and some parts of Zambales. The paper attempted to give justifications on how socio-cultural words are commonly used, adapted or formed. Moreover, it also aimed to find out the cultural use of those words among language users.

Cultural word is a word that only exists in a particular language. It is supported by Baker (1992) who said that “cultural word may express a concept which is totally unknown in other culture”. In addition, cultural word means a word that involves culture in which culture itself, according to Hornby (1995) is “art, literature, music, or other intellectual expression of a particular society or time”. To conclude, cultural word is a specific word for special kinds of “things”, “events” or “customs”, which only exist in one language that cannot be translated literally, because it will distort its meaning.

Agoncillo (1990) stated that the ancient Filipinos, which include the Kapampangans had a culture that was basically Malayan in culture and form. They had written languages that traced their origin to the Austronesion parent-stock and used them as media of daily communication and as a vehicle of their expression of their literary moods. Among the Philippine languages, Tagalog and Pampangan show a close affinity to the Malay language, whether Bahasa Indonesia or that of Malaya.

Salitang kalye (from Spanish, calle or "street"), salitang kanto (street corner) and salitang balbal are the Tagalog terms for "slang". Kalye means "street", thus salitang kalye implies that "slang" is pedestrian language. Kanto means "street corner" where most bums while their time away. Dumas & Lighter (1978) defined slang as the use of highly informal words and expressions that are not considered standard in the speaker's dialect or language. Even within a single language community, slang tends to vary widely across social, ethnic, economic, and geographic strata. Slang sometimes grows more and more common until it becomes the dominant way of saying something, at which time it is regarded as mainstream, acceptable language (e.g. the Spanish word caballo), while at other times it may fall into disuse. Numerous slang terms pass into informal mainstream speech, and sometimes into formal speech, though this may involve a change in meaning or usage.

Filipinos were the ones who coined informal terms such as yosi (cigarette), syota (girlfriend), and sosi (social). The gay community is also proud of its own contributions to the Pinoy slang dictionary: Words such as bagets (young), chika (chat), tsimay (housemaid), and jowa (partner) among others. Pinoy slang is also formed by giving new meaning to already existing Filipino words. Examples of these include ahas (snake, for traitor) and ube (color violet, to mean 100 pesos). In general, Filipinos are fond of inventing words and borrowing foreign terms and use them to add spice to their spoken language. The value of slang in the society will show the dynamicity of language specifically at modern times. It involves and shows culture of language speakers in many walks of life. As what Taylor (1985) said “the range of human desires, feelings, emotions and hence, meanings is bound up with the level and type of culture, which in turn is inseparable from the distinctions and categories marked by the language which people

speak”. The researcher believes that slang processing is a linguistic phenomenon that needs to be considered and must be a subject for academic study.

There are ways regarding the formation of street words in the Philippine setting. Some street words are adapted from the native dialects like gurang (Bicol), bayot (Cebuano) and dako (bisaya). Others are formed by borrowing from foreign languages like the words pikon (pick on, English), tong (Chinese) and Chika (Spanish). Filipinos also are fond of giving new meaning on the tagalog words like hiyas or gem (which may mean virginity) and damo or grass (which may mean marijuana). There are also shortened words like munti (muntinlupa) and Kano (Amerikano).

Partridge (1979) indicated in his study that slang also has its purpose. He said the people use street words as and exercise of wit and ingenuity. People are fond of making things funny out of words. In addition, street words are ways of enhancing positivity and reducing negativity. In some aspects it falls as motivation to overcome life’s problems. Slang can also be a reference of a person in building contacts with his colleagues and develop the sense of belongingness. He even reiterated on the essence of showing that one belongs to a certain school, trade, or profession, artistic or intellectual set or social class.

Kemmer (2001) explained that it is part of the cultural history of language speakers that they have always adopted loanwords from the languages of whatever cultures they have come in contact with. For example, the word “Para” which is a term always used by Filipinos to stop a jeepney, comes from the Spanish word “Parar” which means to stop. Historically based, Philippines had been colonized by Spain, and the 400 years of Spanish supremacy in the country has its eternal influence to the Filipino language. For example, the Spanish word for table, which is "la mesa" has the same usage in Tagalog. Time keeping in Tagalog is also Spanish, like, “a la una y media,” which is 01:30.

Coulmas (1989) pointed out that Language Adaptation examines the process by which a speech community is forced to adopt an active role in making its language suitable for changing functional requirements. He further exemplified that Language Adaptation is a particular aspect of language change, and thus establishes a link between the social and historical study of language. He added that the concept of language adaptation assumes that the speech community is capable of changing its language to meet new communicative needs.

According to Coulmas (1989), the concept of language adaptation assumes that the speech community is capable of changing its language to meet new communicative needs, as German, English, Japanese, and others have. He explained that Language adaptation is usually a gradual and continuous process that goes almost unnoticed by the speech community that can occur by conscious intervention in a linguistic crisis and this can become a political goal involving cultural and linguistic values. Behaviorists view the process of language acquisition as a building process that results from interaction with the environment. (Austin, 1975)

Skinner (1957) also believed that language is acquired through principles of conditioning, including association, imitation, and reinforcement. On the other hand, Hoffer (2002) defined borrowing as the process of importing linguistic items from one linguistic system into another, a process that occurs any time two cultures are in contact over a period of time. Speakers may adopt the item or idea and the source language word for each. Thus, it is believed then that when mindset of the language is acquired, adapted, imitated in a society, the language is being accepted and being integrated in the people, then it becomes already cultural.

Research Questions

The main purpose of this study is to identify and analyze the slang words and socio-cultural expressions of the Pampangos applying the processes and principles of Thematic Analysis. Specifically, the study sought to answer the following questions:

1. What are the commonly used slang words and socio-cultural expressions of the Pampangos?

2. What are the meanings and the formation processes of the Pampango slang words and socio-cultural expressions?

METHODOLOGY

This study applied qualitative research design. Kirk and Miller (1986) mentioned that qualitative research is a distinct tradition in social science that is based on observations of people in their own region and communication with these individuals in their own language and dialect. The researcher used the interview method with the help of linguistic research. The data were gathered through interview and were treated and discussed qualitatively.

The participants of this study constitute 15 informants who are native residents of Tarlac city, Tarlac in Central Luzon. The participants were asked to articulate words and sentences using their native dialect. Those words and sentences were based on the questions being asked about the slang words and socio-cultural expressions of the Pampango language users. The data were listed and analyzed using the method of thematic analysis.

The prepared questions for face-to-face communication served as the primary instrument in gathering the required data. The researcher conducted the interview with the participants' permission in order to get correct and accurate data. The approach guaranteed confidentiality during the interviews. The researcher also explained what is the study all about and how the interview will be kept confidential. In order to answer the above problems, the questions were carefully asked. Data gathered through the interview

were also analyzed and interpreted with the help of language concepts and theories. The use of underlying principles of language added consistency to the research findings.

To make sure that the data gathered are accurate and complete, the researcher reviewed the results of the interview. Transcribing was done simultaneously while the interview is on-going; however, further validation was also done during the review. After which, a thorough analysis of the data was done for categorization of words and expressions. Lastly, as an output of this study, detailed data about the slang words and socio-cultural expressions of the Pampango language users was determined and tabulated.

RESULTS AND DISCUSSION

This chapter presents the results and discussion on the study about the slang words and socio-cultural expressions of the Pampango language users. The commonly used terminologies were identified through the interview with the respondents.

Determined Commonly Used Slang Words and Socio-Cultural Expressions of the Pampangos

Opu/pu

Based on the respondents' answers, it is an expression that is similar with the Tagalog words *"opo"* and *"po"*. These two words are considered in the Kapampangan communities as the most civilized forms of address specifically when the young ones are talking to the elders.

This terminology is commonly used to show respect and obedience towards the elders as they are really given so much value or importance in the community. These two famous words would literally mean yes when somebody acknowledges or answers the question with gratitude.

Meyatu

The Kapampangan community is rich in old beliefs and traditions. Many of the people still believe on the primitive or traditional way of healing sickness. The word *"meyatu"* (nabati in Tagalog) means "being harmed by a certain supernatural force". There are believers who used to go with the albularyos (faith healers) to seek healing for their illnesses. The healers are the ones who declare what particular supernatural force is responsible for one`s suffering or sickness. Based on the said conversation, someone is said to be harmed by a supernatural being called *"tikbalang"* and it is responsible for the sickness. In this case, the one who is sick is then advised to do the *"atang"* or offering for him to get healed. This is a common practice not only in the Pampango community but also in other places in the Philippines.

Patawas me

This term would also mean *"ipatawas mo"* in Tagalog. This is done when someone suffered from a serious sickness and is brought to the albularyo (faith healer) to detect the cause of such sickness. *"Patawas"* is a common word in the community because many of the Pampangos still believe in it. They also believe that someone has this extraordinary power to detect pain or sickness. Faith healers are still present in many communities in Pampanga and Tarlac.

Bari-bari apu

This word is a cultural expression of those people who bare respect when it comes to the unseen beings that can harm humans. This is being uttered whenever somebody walks along along the road at night or any private locations which have no lights. The Kapampangans believe that the unseen beings are just out there and they have to be respected. If not, this will cause problems or chaos such as curse, sickness or even deaths.

Tawu

This word is common among Pampangos during festivities and other social and cultural celebrations. There are religious festivities designed for the saints and patrons of different social groups. In the province of Tarlac for example, the well-known patrons such as Maria Corazon, Lourdes, Santa Catalina and Imaculada Concepcion are among patrons which are annually celebrated through fiestas (festivities).

During these occasions, the Kapampangan culture is being showcased by having different foods and delicacies to serve. These are called "tawu" or "handa" in Tagalog. People recognize Pampanga as the Food capital of the Philippines. This is the reason why food preparation is culturally attributed especially during significant occasions. Even Undas (All Souls Day) and Mahal na Araw (Lenthen Season) are significant days where in the folks prepare for "tawu" or food.

Taksyapo/taknaydo

It is other known as *"hayup"* (*bitch*) that is mostly used in a very funny tone. This has various usages according to the intention of the speakers. This terminology could either be taken seriously or a form of joke.

Dyandirit

This expression is commonly used by the young ones especially those who are always out of the house. A Pampango slang word which expresses that something will not be done or accomplished by a person. This means affirmation that somebody will not be able to do or finish a thing.

Misdan a yatut

This is an expression which means “naïve” or *“tatanga-tanga”*. It has another Pampango counterpart called *“mulala”* which also means “tanga”. When somebody commits mistake, the person will say *“misdan a yatut”* or naïve. This word might really mean negative if the context is negatively serious. But most of the time, this expression is taken as a joke.

Pasirkulatuk

The term is specifically referred to a child whose nickname needs to be changed because the elders believe that it is not a good name. Many people believe in superstition and it is evident in the Pampango setting. If a child keeps on suffering from severe illness, the elder would advise the parents to change his name. The elders also agree that replacing or changing the child’s nickname would mean that they also intend to stop the curse.

Borbolen

This word is a negative expression when somebody did something wrong. The word *“Borbolen”* means “crazy” or “out of his mind”. Other people use the words like “*baliw”* and “*bugok”* to mean crazy.

O-jo

It was derived from the tagalog slang expression which is *“Oh Jowa*” which means *“Oh honey”* or *“Oh my love”*. This expression is used as a form of endearment between two lovers. This is simply an expression of love or liking.

Alang-atdo

This term is the other version for *“alang atdong mapait”* or *“walang mapait na apdo”* (walang isip) in the Pampango setting. This is used to show that someone is not doing well with something because of his negative attitude. This expression is mostly used by the elders to make their children realize their mistakes.

Arya

This is the Pampango word for *“pamahiin”* or superstitious belief. Pampango community is rich in superstitious belief that even the present generation of the Kapampangan youth was able to inherit.

Such word has strong impact on the socio-cultural beliefs that the language users are portraying. The sense of being superstitious is the one that is being preserved or maintained. This belief according to the elders of the community is also evident in other regions or communities in the Philippines.

Keni/Mekeni

When people call out their group of friends, they use the word *"mekeni"* to address them. In other setting, words like *"keni*" , "pards *"mekeni"* or *"dabarkads mekeni*" are also being used to mean friends come with me or come with us. The word *"mekeni"* is often associated to an "individual" or a "group" that is known in Pampanga as bound by friendships and acquaintances.

Diyablus

It refers to a word that is generally understood by the people as a "bad person" or "bitch". It is said to be adapted from another word "*diyablo*" which means Satan or demon. In general, this word is used to refer to someone who is not doing good to others. A person who manifests an evil act or a not so favorable attitude.

Salibatbat

This is the Pampango way of penitence (*penitensya*) that is usually being done during Holy week or *Mahal na araw*. Many people express religiousness during this special occasion and some of them join the group of those who will be having *pamagsalibatbat* or penitence. The performers intentionally hurt themselves believing that it will reduce their sins. The devotees have different way of portraying "*Salibatbat*".

Atin yang ditak

The Filipino translation of this word is "*meron siyang konti*" (he has a little). In Pampango expression, this word is used to refer to someone who is mentally retarded or Psychotic. This expression is used to refer to describe that somebody is suffering from psychological problem or mental illness.

Meanings and Formation Processes of the Pampango Slang Words and Socio-Cultural Expressions

The language Users and their Slang Words and Socio-cultural Expressions.

Austin (1975) pointed out illocutionary acts which are manifested through the use of language. The value of act is always associated with the words that people use. Slang words are parts of the language that people use in conveying intention of speech and utterances of feelings. These words have expressive functions to persuade and convince the listeners.

Table 1 presents the words or expressions which were analyzed based on the categories of speech acts. The types of interlocutors and utterance were also indicated for interpretation. It can also be noted that the researcher was able to show the distinctions of such Pampango terminologies and expressions according to their functions or usages.

Table 1. Based on Searle (1969) five categories of speech act and Halliday's function of language.

Word/ Expression	Category	Interlocutor/s	Utterance	Function
Opu/pu	Declaratives	Young Ones	"Makilabas kami pu" (Can we pass by)	Informing
Meyatu	Declaratives	Elder	"Meyatu ya". (Nabati siya/He was harmed by an unseen being)	Informing
Patawas me	Imperatives	Elder	"Nung masakit ya, patawas me" (Bring him to the faith healer if he is sick)	Advising
Baribari apu	Expressives	Children/Elders	Bari-bari apu, makilabas ke pu (Asking permission. We will just pass by)	Informing
Tawu	Interrogatives	Elder	Nanong tawu yu (What food did you prepare?)	Asking
Taksyapo	Expressives	Elder/ Student	Taksyapo, ot e minta? (Oh my goodness, why he did not come?)	Questioning
Dyandirit	Expressives	Student	Dyandirit e na gawan ita eh! (Oh whatever happens, he will not do that)	Declaring
Misdan a yatut	Informatives	Student	Kamulalan na ne.Misdan a yatut. (He is so naive)	Informing
Pasirkulatok	Imperatives	Elder	Pasirkulatok ye ba yang e sasakit (Please ask to have his name changed so that he will not get sick anymore)	Commandin g
Borbolen	Declaratives	Student	A borbolen. E mo balu ing gagawan mo. (You're crazy. You don't know what you are doing)	Informing
O-jo	Expressives	Elder	O-jo kaluguran daka (Moh Hon, I love you.)	Declaring
Alang atdo	Informatives	Elder	Ala yang atdong mapait ing anak a ini	Informing

			(This child is not doing good)	
Arya	Informatives	Elder	Karakal da arya. (They have a lot of superstitions)	Declaring
Keni	Commissives	Student	Keni tol, mangan tana (Come on brother, let`s eat).	Convincing
Diyablus	Declaratives	Elder	Ala neng gewang masanting ing diyablus (He did not do anything good.)	Informing
Salibatbat	Declaratives	Elder	Megsalibatbat ya. (He did it as form of penitence)	Informing
Atin yang ditak	Informatives	Elder	Atin yang ditak ing kapatad na. (His brother is psychotic)	Informing

The general functions of language according to Halliday (1975) are the instrumental, regulatory, representational, interactional, personal, heuristic and imaginative functions. The instrumental function of language is the “I want function” which is used for suggesting, demanding, persuading, commanding and directing. Regulatory function is for approving and disapproving, answering phone and addressing an action. The representational is used for informing, explaining and making statements while interactional function is for inviting, accepting and joking. The actions like exclaiming, expressing anger and apologizing are under the personal function of language. When a person argues, defines and concludes, heuristic function is applied. On the other hand, the words expressed in literary works and philosophical systems are all imaginative functions of language.

The table below also showcased the words and expressions identified according to language users. Also, presented are the formation processes of the determined Pampango slang words and socio-cultural expressions. The meanings of the determined socio-cultural expressions were also indicated. Based on the analysis of data, the selected Pampango expressions have relevant meanings in the conversation and the words have different formation processes such as word adaptation, borrowing, language blending, coining, word association and connotation. Other terminologies were given other meanings or interpretations that are quite far from their literal meanings.

Table 2. Pampango Slang Words and Socio-cultural Expessions

Pampango Slang Words and Socio-Cultural Expressions	**Meaning of Word for the Language Users**	**Formation Process**
Opu/pu	Yes (in civilized form of address, respectful word)	Adaptation (from the Tagalog word po at opo)
Meyatu	Harmed by an unseen being (nabati in Tagalog)	Definite
Patawas me	Bring to the faith healer/traditional healer	Borrowing from other word /Connotation(word association)
Baribari apu	Tabi tabi po in Tagalog (sorry for the disturbance. We`ll just pass by)	Definite
Tawu	Handa (Food prepared during fiesta)	Definite
Taksyapo/Taklnaydo	What the hell/bitch	Indefinite
Dyandirit	What ever happens	Indefinite
Misdan a yatut	Naïve	Word association/connotation
Pasirkulatok	Change nick name	Definite
Borbolen	Crazy	Indefinite
O jo	Oh my love	Language blending
Alang atdo	Walang apdo (Without bile)	Connotation/putting other meaning to the expressions
Arya	Superstitious belief (Pamahiin)	Definite
Keni	Come with me	Definite
Diyablus	Bad person	Coining
Salibatbat	Penitence	Definite
Atin yang ditak	Psychotic	Word association

It appeared that words "*po"* at "*opo"* in Tagalog are also being used in the Kapampangan dialect as a respectful response to the elders in the community. Other words and expressions such as "*taksyapo", "misdan a yatut", "borbolen", "alang atdo", "dyablus"* and *"atin yang ditak"* are negative expressions which could have serious or funny meanings depending on the contexts.

Some terminologies were just coined or adapted to give lights and twists to words like "*diyablus"* and "*o-jo"*. There are words which are products of word association, connotation, blending and borrowing like "*patawas me", "misdan a yatut", "o jo", "alang atdo"* and *"atin yang ditak".* Other expressions are said to have indefinite formations such as "*taksyapo", "dyandirit"* and "*borbolen"* while the words "*arya", "keni", "meyatu", "bari-*

bari apu", "tawu", "pasirkulatok" and "*salibatbat"* are considered to be definite Pampango words.

Conclusions and Recommendations

The selected slang words and socio-cultural expressions of the Pampangos are evident based on the result of the qualitative study. These socio-cultural words are definitely part of the Pampango sociolects that reflect how rich the Kapampangan language is in terms of culture and tradition. In addition, those words and expressions have value and functions in a speech community with a unique tradition and heritage.

Pampango slang words and socio-cultural expressions have varied meanings depending on the contexts in which the words are used. The words which appeared in the study are strong proofs that Kapampangan being one of the languages in Central Luzon is truly a living language that exists.

The different formation processes of the Pampango slang words and socio-cultural expressions would show the dynamicity and inventive minds of the Pampangos. Words are being borrowed, adapted and formed because that is the nature of language. The dynamicity of Pampango dialect can lead to even broader research on Pampango idiolect and sociolect. Consistent study on Pampango terminologies will give language committee a reason to adapt words which have value for formalization and may be added in the lexicon of the Pampango language and this will serve as a guide in crafting a Pampango socio-cultural dictionary.

Extensive research on the origin, adaptation and formation of the Pampango slang words and socio-cultural expressions may give clearer explanations or justifications on their grammatical structures. Moreover, further analysis on the use of slang may lead to the understanding of this linguistic phenomenon with the focus on preserving local culture and values. Having a deep understanding of the sociolect might justify even more the strong influence of changes in the society as contributory factors to language development.

Compliance with Ethical Standards

Prior to the gathering of data, the researcher prepared the designed materials. Most importantly, the researcher has prepared for the interview questions which served as the primary tools of the research. There was also an appointment set and he also asked permission from the respondents following an ethical form of address. The researcher considered as well the rules in terms of handling confidential information, proper procedure and documentation.

Moreover, the respondents were also advised or informed regarding the mechanics in answering the research questions. The researcher also made sure that the respondents' answers were used strictly for research purposes and not for personal gains

or interest. It was also rest assured that the sources were properly acknowledged or duly cited.

Acknowledgments

First, and foremost, the researcher glorifies God for giving him knowledge, strength and wisdom to complete this research.

The respondents for providing him necessary details which are important for the completion of this qualitative study.

He also acknowledges his professor in Sociolinguistics and Cultural Studies in the College of Arts and Humanities of Benguet State University, Dr. Myrna B. Sison-Kuiper for her guidance and meaningful lecture that aided in the completion of the study.

And lastly, he thanks his family and friends for their unending love and support.

ASSESSING THE CAPABILITY OF COAST GUARD DISTRICT CENTRAL VISAYAS IN MARITIME SEARCH AND RESCUE OPERATIONS

CG Adonis P. Añasco

[1] *Graduate School Department , Philippine Merchant Marine Academy, Manila, Philippines*

https://doi.org/10.5281/zenodo.12599522

ABSTRACT

This study examines the capability of the Coast Guard District Central Visayas in conducting maritime search and rescue operations, focusing on personnel capability, training, operations, assets, and policies and standards. The findings from the demographic and professional analysis reveal a diverse workforce composition. The age distribution shows a mix of early-career professionals and experienced personnel, with a notable male majority (92%). The rank distribution indicates a structured hierarchy essential for effective management. Most personnel hold college degrees, highlighting the emphasis on educational attainment. Years of service show a balanced mix of new talent and experienced staff, with strategic geographical distribution aligning with operational priorities. Respondents' performance in SAR scenarios reveals a readiness to deploy resources swiftly, coordinate with relevant authorities, and utilize specialized assistance. Scenario-based responses demonstrated strategic decision-making and effective utilization of available assets. Significant relationships were found between demographic factors and performance assessments. Age, gender, rank, educational attainment, years of service, and current assignment all correlated with performance, highlighting the influence of these factors on operational effectiveness. Training programs showed a negative correlation with performance, suggesting a need for better alignment between training content and real-world challenges. Challenges identified include deficiencies in qualified maintenance personnel, financial and logistical constraints affecting training, and the need for modernized assets and updated policies. Recommendations focus on enhancing personnel capabilities, improving training programs, optimizing operations, modernizing the fleet, and developing clear policies and SOPs. These initiatives aim to enhance the Coast Guard's operational readiness, efficiency, and response capabilities, ensuring maritime safety and security in the Central Visayas region.

Keywords: *Personnel Capability, Training, Operations, Assets and Policies and Standards*

INTRODUCTION

The Philippines' extensive maritime history and its increasing reliance on marine transportation for international trade underscore the critical importance of maritime search and rescue (SAR) operations. Various technologies and tactics have been developed to enhance SAR operations, including the utilization of unmanned aerial vehicles (UAVs) and advanced communication systems. The Philippine Coast Guard (PCG), established in 1980, has maintained a record of maritime SAR occurrences involving response assets and personnel stored in the Search and Rescue Program Information Management System (SISAR) (Stoddard & Pelot, 2020). This database provides valuable historical data that analysts use to support decision-making for SAR operations. Technological advancements have increasingly incorporated UAVs in maritime SAR operations due to their potential in identifying missing persons during missions. Reliable communication channels, such as Long Term Evolution (LTE) and the Multipath TCP (MPTCP) protocol, have been explored to enhance UAV communication dependability in maritime SAR missions (Güldenring et al., 2019).

Recent years have seen a focus on enhancing mission-critical communication (MCC) networks and devices for SAR operations at sea. The 5G network, artificial intelligence, and edge computing are being researched to improve maritime SAR operations (Paladin et al., 2023). Inter-organizational simulation has been utilized as a training tool for marine SAR operations, allowing organizations to learn from past incidents and improve joint mission performance. The use of historical data has been investigated for dynamically routing post-disaster assessment UAVs, showing potential for creating artificial scenarios to test and develop tools for disaster response (Grogan et al., 2023).

Under Republic Act 9993, also known as the "Philippine Coast Guard Law of 2009," the PCG is mandated to perform Maritime Search and Rescue, Maritime Law Enforcement, Maritime Safety, Maritime Environmental Protection, and Maritime Security (R.A. No. 9993, 2023, as cited by Batalla 2023). The PCG's primary role in SAR operations involves aiding individuals and vessels in distress within the Philippines' maritime jurisdiction. The PCG operates with assistance from other government agencies and the commercial marine fleet (Agbissoh, 2019). The PCG maintains 24-hour distress monitoring and response activities, saving numerous lives and properties over the years.

The Coast Guard Command Center (CGCOMCEN) at the PCG National Headquarters in Manila coordinates all SAR operations. The 15 Coast Guard districts serve as Maritime Rescue Coordination Centers (MRCCs) in their respective areas, supported by 90 Coast Guard stations and 464 sub-stations acting as Maritime Rescue Sub-Centers (MRSCs). Each MRCC is equipped with a Coast Guard District Auxiliary and a Deployable Response Team for swift SAR operations. The Coast Guard District Central Visayas (CGDCV), established on 17 October 1967, plays a significant role in SAR operations in a region considered the central hub for domestic shipping in the Philippines. The CGDCV covers the maritime areas of Cebu Province, Bohol, Siquijor,

and Negros Oriental, with its headquarters located in Cebu City. The region's busy maritime activities and vulnerability to natural disasters necessitate a well-equipped and capable Coast Guard

Assessing the CGDCV's capabilities is critical for ensuring readiness, effectiveness, and identifying opportunities for improvement. This evaluation aims to enhance preparedness, response, and overall effectiveness in handling marine emergencies, thereby contributing to safer maritime operations in Central Visayas. The literature underscores the importance of operational readiness and preparedness in successful maritime SAR operations. Highly skilled personnel, well-maintained resources, and clear procedures are essential for prompt and coordinated responses (Theodosopoulou et al., 2021; Mateus et al., 2020). Operational readiness involves resource allocation, inter-agency coordination, rescuer safety, and continuous improvement through exercises and evaluations (Agbissoh et al., 2019). However, there are gaps in translating these concepts into standardized, quantifiable frameworks applicable to various marine scenarios.

The importance of training procedures and skill development for SAR personnel is increasingly evident. Continuous hands-on training with specialized equipment is crucial for developing practical competencies and adapting to evolving challenges (Altavilla et al., 2020; Ford & Clark, 2019; Rogers et al., 2020; Ababat, 2023). Innovative training methods, such as automated evaluations (Gomathy, 2019), immersive virtual reality (Miyusov et al., 2022), and team training simulations (Radojević & Kresojević, 2020), have been proposed, but their practical efficacy and scalability need further assessment, especially in resource-limited settings.

Efficient coordination and collaboration among maritime stakeholders enhance safety and SAR efficacy. Human and organizational factors, data-sharing programs like CISE (Paladin et al., 2022), digitalization, interoperability (Lind et al., 2020), and ontological risk management (Pileggi et al., 2020) are significant. Rapid response times are vital for reducing mortality, supported by research on emergency IoT systems (Zhang et al , 2022), fleet deployment optimization (Chen et al., 2021), and coded response protocols (Kang et al., 2021). However, comprehensive frameworks integrating collaboration, coordination, and time-critical response are lacking.

This study aims to address these gaps by proposing a comprehensive and collaborative approach to improve operational readiness, training efficacy, and coordinated rapid response capabilities in maritime SAR operations. Drawing on studies by Yu (2020) and (Zhang et al , 2022), which emphasize the importance of utilizing established marine networks and local resources for timely support, this research seeks to enhance SAR operations' efficiency. Kosmas (2022) highlights the significance of prompt intervention and resolute action, underscoring the critical nature of rapid response times in SAR missions. Furthermore, Nasso (2024) and Abdul (2024) propose the implementation of comprehensive emergency response frameworks and sophisticated vessels equipped for rescue operations.

Studies by Özşeker (2022) and Yadav (2020) suggest that younger personnel may exhibit higher enthusiasm and adaptability, influencing more favorable assessments of SAR capabilities. Gutterman (2023), Gabrielli (2019), and Tulkunovna (2020) emphasize the role of seniority and education in shaping evaluations of organizational

success. Additionally, Sharma et al (2023) discuss how technological advancements outpace training capacities, leading to skills gaps in the marine sector.

This study aims to propose a comprehensive and collaborative approach to improve operational readiness, training efficacy, and coordinated rapid response capabilities in maritime SAR operations.

Research Questions

This study was conducted to assess the capability of Coast Guard District Central Visayas in the conduct of maritime search and rescue operations. Specifically, it attempted to address the following problems:

1. What is the profile of the respondents in terms of:
    - 1.1 Age
    - 1.2 Gender
    - 1.3 Highest Educational Attainment
    - 1.4 Number of Years in Service
    - 1.5 Current Assignment/ Station
    - 1.6 Trainings Attended
2. What is the performance of the Coast Guard District Central Visayas personnel in selected maritime search and rescue operations?
3. Is there a significant relationship between the profile of the respondents and their performance?
4. What are the challenges of Coast Guard District Central Visayas in performing maritime search and rescue operations in terms of?
    - 4.1 Personnel Capability
    - 4.2 Training
    - 4.3 Operations
    - 4.4 PCG Assets
    - 4.5 Policies and Standard Operating Procedures
5. Based on the findings, what can be recommended to improve the capability of Coast Guard District Central Visayas in maritime search and rescue operations?

METHODOLOGY

This study used a descriptive mixed-method approach with a concurrent triangulation design, enhancing credibility by collecting both quantitative and qualitative data. According to Birden (2022), this method boosts trustworthiness and validity. Quantitative data was gathered through a survey questionnaire, while qualitative data was collected via a situational exam and document review. The study was conducted within the Coast Guard District Central Visayas (CGDCV), including its Headquarters and 8 Coast Guard Stations and 80 Substations. The population consisted of 821 personnel, with 420 responding to the instruments. The Raosoft sampling method ensured a statistically valid sample size, improving the generalizability of the findings. Ethical considerations included obtaining informed consent, maintaining confidentiality, and ensuring voluntary participation with the right to withdraw at any time. Data was securely preserved, and findings were reported in aggregate form.

Ethical approval was obtained from relevant review boards. Instruments included a validated survey questionnaire and a situational written exam, developed with expert input and pilot tested on 18 respondents. Cronbach's Alpha (0.85) and a Split-half test (Pearson Coefficient of 0.923) indicated high reliability and validity. Data was collected using Google Forms for the survey, exam, and checklists. The procedure involved obtaining approval, securing informed consent, and encoding responses. Descriptive statistics summarized demographic data, while qualitative data from interviews was transcribed and analyzed through coding and interpretation. Triangulation of quantitative and qualitative data provided a comprehensive view of the research issues. Checklist data was systematically analyzed to assess maritime search and rescue operations, resulting in actionable insights and recommendations for enhancing operational effectiveness in CGDCV.

RESULTS AND DISCUSSION

Profile of the Respondents

In terms of profile of the respondents includes the academic qualifications, training, rank, and gender distribution of Coast Guard personnel involved in maritime search and rescue operations. It aims to assess whether higher education levels correlate with improved operational proficiency and identify potential gaps. The study also examines the participants' participation in specialized training programs related to search and rescue operations. The rank of the personnel provides insight into the hierarchical structure and distribution of responsibilities within the Coast Guard. The study also examines the representation of different genders in maritime search and rescue operations, aiming to understand whether gender-related factors impact operational performance and identify potential barriers to inclusivity.

Table 1

Profile of Respondents According to Age

Age	Frequency	Percentage
23 – 27 years old	98	24%
28 – 32 years old	162	39%
33 – 37 years old	82	19%
38 – 42 years old	53	13%
43 years old and above	20	5%
Total	**415**	**100%**

Table 1 shows the distribution of the respondents' ages within the Coast Guard District Central Visayas, highlighting how different age groups are represented among the personnel involved in maritime search and rescue operations. The table is divided into five age categories, with corresponding frequencies and percentages.

The age group of 23-27 years old comprises 98 respondents, representing 24% of the total sample. This indicates that nearly a quarter of the personnel are relatively young, possibly in the early stages of their careers. The largest age group, 28-32 years old,

includes 162 respondents, accounting for 39% of the total. This significant proportion suggests that a substantial number of personnel are in their late twenties to early thirties, likely possessing a blend of youth and some level of professional experience.

The age category of 33-37 years old includes 82 respondents, making up 19% of the sample. These individuals are in their mid-thirties, often a period where many have gained considerable experience and expertise in their roles. The age group of 38-42 years old consists of 53 respondents, representing 13% of the total. This smaller percentage indicates a gradual decrease in the number of personnel as age increases, reflecting a possible shift towards more senior roles or other career paths. The smallest group, 43 years old and above, includes 20 respondents, constituting 5% of the total. This indicates that only a few personnel are in the older age bracket, potentially due to retirement or advancement to higher, non-operational positions. The total number of respondents is 415, with the percentages summing up to 100%, providing a complete overview of the age distribution within the district.

The data indicates a balanced mix of young and moderately experienced personnel, with the majority falling into the 28-32 and 23-27 age ranges. This balance suggests that the district benefits from both the energy and new perspectives of younger personnel and the developing expertise of those slightly older. Given the significant proportion of respondents in their late twenties and early thirties, there may be a need for ongoing training and professional development to ensure that these individuals continue to enhance their skills and operational proficiency. The smaller percentages in the older age groups (38-42 and 43+) highlight the importance of succession planning. Ensuring that knowledge and expertise are passed on from more experienced personnel to younger members is crucial for maintaining operational effectiveness.

Hence, Table 1 shows a diverse age distribution among the Coast Guard District Central Visayas personnel, with a concentration in the younger to middle age ranges, indicating a dynamic and potentially adaptable workforce poised for growth and development.

Table 2

Profile of Respondents According to Gender

Gender	Frequency	Percentage
Male	382	92%
Female	33	8%
Total	**415**	**100%**

Table 2 presents the distribution of the respondents within the Coast Guard District Central Visayas according to gender, highlighting the representation of males and females among the personnel involved in maritime search and rescue operations. The data indicates a significant gender disparity, with 382 respondents identified as male, constituting 92% of the total sample. This overwhelming majority suggests that the maritime sector, particularly in search and rescue operations, is predominantly male dominated. The substantial representation of males may be reflective of traditional

gender roles and the physically demanding nature of maritime and rescue work, which historically has been associated with male personnel.

In contrast, there are 33 female respondents, accounting for only 8% of the total. This minority representation of women highlights the gender imbalance within the district. Despite the smaller number, the presence of female personnel in search and rescue roles is crucial, as it indicates a gradual shift towards inclusivity and diversity within the workforce. The involvement of women in these operations can bring unique perspectives and skills that are valuable for comprehensive search and rescue efforts. The total number of respondents is 415, with the percentages summing up to 100%, providing a complete overview of the gender distribution within the district.

The significant gender disparity underscores the need for initiatives aimed at promoting gender inclusivity and encouraging more women to pursue careers in maritime search and rescue operations. This can involve targeted recruitment efforts, gender-sensitive training programs, and policies that support a more balanced representation.

Moreover, the presence of female personnel, though limited, suggests a potential for increased diversity in operational perspectives and decision-making processes. Leveraging the strengths and insights of both male and female personnel can enhance the effectiveness and adaptability of search and rescue missions. Ensuring a supportive and inclusive workplace environment is essential for retaining and empowering female personnel. Addressing any potential challenges related to gender dynamics in the workplace can contribute to a more harmonious and productive workforce.

Hence, Table 2 reveals a predominantly male workforce within the Coast Guard District Central Visayas, with a small but important representation of female personnel. This gender distribution highlights the need for continued efforts towards gender inclusivity and the potential benefits of a diverse workforce in enhancing the operational proficiency of maritime search and rescue operations.

Table 3

Profile of Respondents According to Rank

Rank	Frequency	Percentage
ASN/ASW (Apprentice Seaman/Apprentice Sea Woman)	59	14%
CPO (Chief Petty Officer)	6	1%
ENS (Ensign)	13	3%
PO1 (Petty Officer 1st Class)	28	7%
PO2 (Petty Officer 2nd Class)	74	18%
PO3 (Petty Officer 3rd Class)	47	11%
SCPO (Senior Chief Petty Officer)	3	1%
SN1/SW1(Seaman 1st Class/Sea Woman 1st Class)	89	22%
SN2/SW2 (Seaman 2nd/Sea Woman 2nd)	96	23%
Total	**415**	**100%**

Table 3 shows the respondents' ranks within the Coast Guard District Central Visayas, illustrating how different ranks are represented among personnel involved in maritime search and rescue operations. The table categorizes respondents into nine distinct ranks, with corresponding frequencies and percentages.

The *ASN/ASW (Apprentice Seaman/Apprentice Sea Woman) rank*, an entry-level position, comprises 59 respondents, representing 14% of the total sample. This indicates a significant presence of personnel who are likely in the initial stages of their Coast Guard careers, gaining foundational skills and experience. The rank of *CPO (Chief Petty Officer)* includes 6 respondents, accounting for 1% of the total. This small percentage reflects the relatively limited number of personnel at this senior enlisted rank, often associated with advanced leadership responsibilities and extensive experience.

There are 13 respondents at the *ENS (Ensign) rank*, making up 3% of the sample. Ensigns, as junior officers, typically have some leadership roles and responsibilities, indicating a modest representation of emerging leaders within the district. The *PO1 (Petty Officer 1st Class)* rank includes 28 respondents, constituting 7% of the total. Petty Officers 1st Class are senior non-commissioned officers who have acquired significant experience and play crucial roles in both operational and supervisory capacities.

The *PO2 (Petty Officer 2nd Class)* rank has 74 respondents, representing 18% of the sample. This substantial proportion suggests that a notable number of personnel hold mid-level non-commissioned officer positions, balancing operational duties and leadership roles. There are 47 respondents at the *PO3 (Petty Officer 3rd Class)* rank, accounting for 11% of the total. These individuals are junior non-commissioned officers, often responsible for specialized tasks and supporting higher-ranking officers.

The rank of *SCPO (Senior Chief Petty Officer)* includes 3 respondents, making up 1% of the sample. This very small percentage indicates the presence of a few highly experienced and senior enlisted personnel within the district. The *SN1/SW1 (Seaman 1st Class/Sea Woman 1st Class)* rank has the second-highest frequency with 89 respondents, representing 22% of the total. Seamen 1st Class are typically seasoned junior enlisted personnel with substantial operational experience. The largest group, *SN2/SW2 (Seaman 2nd Class/Sea Woman 2nd Class),* with 96 respondents, constitutes 23% of the sample. This indicates a strong representation of Seamen 2nd Class, who are relatively early in their careers but have progressed beyond the apprentice level. The total number of respondents is 415, with the percentages summing up to 100%, providing a comprehensive overview of the rank distribution within the district.

The data reveals a diverse range of ranks, indicating a workforce with varied levels of experience and responsibilities. The significant proportions of junior ranks (SN2/SW2 and SN1/SW1) suggest a focus on developing personnel through early career stages. The presence of senior ranks (CPO, SCPO) in smaller percentages highlights a structured hierarchy where advanced leadership roles are held by a limited number of highly experienced individuals. This structure ensures that seasoned leaders are available to guide and mentor junior personnel. The substantial numbers in the middle ranks (PO2, PO3) emphasize the need for continuous training and professional

development to prepare these personnel for future senior roles and to enhance their operational effectiveness.

Hence, Table 3 illustrates a well-distributed mix of ranks among the Coast Guard District Central Visayas personnel, with a concentration in the junior and mid-level ranks. This rank distribution indicates a dynamic workforce with a balance of new recruits and experienced personnel, essential for maintaining strong search and rescue operations.

Table 4

Profile of Respondents according to Highest Educational Attainment

Highest Educational Attainment	Frequency	Percentage
High School Graduate	4	1%
College Undergraduate	113	27%
College Graduate	291	70%
Technical Course	4	1%
With Master's Unit	3	1%
Total	**415**	**100%**

Table 4 shows the educational backgrounds of respondents within the Coast Guard District Central Visayas, categorizing them into five distinct educational categories with corresponding frequencies and percentages. The data highlights a predominantly well-educated workforce, with significant implications for maritime search and rescue operations. Specifically, 70% of respondents are college graduates, indicating a strong foundation in higher education likely beneficial in maritime operations and related disciplines. Another 27% have completed some college coursework, demonstrating a commitment to educational advancement. Smaller groups include high school graduates (1%), individuals with technical training (1%), and those pursuing Master's degrees (1%), underscoring a focused recruitment strategy that prioritizes higher educational qualifications and specialized skills relevant to Coast Guard responsibilities. This distribution emphasizes the importance of academic preparation and ongoing professional development in enhancing the operational capabilities and adaptability of personnel during maritime emergencies. The findings highlights a predominantly well-educated workforce within the Coast Guard District Central Visayas, has significant implications for the efficacy of marine search and rescue (SAR) operations.

Table 5

Profile of Respondents According to Years of Service

Years of Service	Frequency	Percentage
Below 5 years	204	49%
6 – 10 years	97	23%
11 – 15 years	66	16%
16 years and above	48	12%
Total	**415**	**100%**

Table 5 provides a detailed overview of the respondents' years of service within the Coast Guard District Central Visayas, illustrating the distribution of service durations among personnel involved in maritime search and rescue operations. The table categorizes respondents into four distinct groups based on their years of service, with corresponding frequencies and percentages.

The largest proportion of respondents falls into the "Below 5 Years" category, with 204 individuals representing 49% of the total sample. This significant percentage indicates that nearly half of the personnel are relatively new to the Coast Guard, bringing fresh perspectives and recent training but possibly lacking extensive field experience. The "6 – 10 Years" category includes 97 respondents, accounting for 23% of the total. These individuals have accrued a moderate level of experience, likely balancing a mix of practical skills and operational knowledge gained over their service duration. The "11 – 15 Years" group consists of 66 respondents, making up 16% of the sample. These personnel have a considerable amount of service time, indicating a deeper familiarity with Coast Guard operations and likely holding positions that require significant responsibility and expertise. The smallest group, "16 Years and Above," includes 48 respondents, representing 12% of the total. These individuals have extensive experience, reflecting long-term commitment and advanced knowledge of maritime search and rescue operations, often holding senior or specialized roles within the organization.

The total number of respondents is 415, with the percentages summing up to 100%, providing a comprehensive overview of the service duration distribution within the district. The data reveals a diverse range of service durations, indicating a balanced workforce with a mixture of new recruits and seasoned personnel. The high percentage of respondents with below 5 years of service suggests a focus on recent recruitment and the influx of new talent into the Coast Guard District Central Visayas. This influx can introduce new skills and modern training methodologies, which can be beneficial for the organization. The presence of personnel with 6 – 10 years of service and 11 – 15 years of service underscores the importance of retaining experienced individuals who have developed substantial operational knowledge and expertise. These mid-level service groups are critical for maintaining continuity and providing mentorship to newer recruits. The smaller percentage of respondents with 16 years and above highlights the role of highly experienced personnel in leading and managing complex operations. Their long-term commitment and depth of knowledge are invaluable for strategic decision-making and high-level operational planning.

Hence, the distribution of years of service within the Coast Guard District Central Visayas indicates a dynamic and balanced workforce, combining the energy and new perspectives of recent recruits with the seasoned expertise of long-term personnel. This composition is essential for maintaining effective and efficient maritime search and rescue operations, ensuring both innovation and continuity in the organization’s capabilities.

Table 6

Profile of Respondents According to Current Assignment/Station

Current Assignment/Station	Frequency	Percentage
CGS Southern Cebu	87	21%
CGS Camotes	47	11%
CGS Central Cebu	42	10%
CGS Eastern Bohol	60	14%
CGS Central Oriental	62	15%
CGS Siquijor	52	13%
CGS Western Bohol	63	15%
Headquarters Coast Guard District Central Visayas (HCGDCV)	2	1%
Total	**415**	**100%**

Table 6 provides an overview of the respondents' current assignments or stations within the Coast Guard District Central Visayas, offering insights into the distribution of personnel across various stations involved in maritime search and rescue operations. The table categorizes respondents into eight distinct stations, with corresponding frequencies and percentages.The current Assignment/Station Distribution, in CGS Southern Cebu: This station has the highest number of respondents, with 87 individuals, representing 21% of the total sample. This indicates that a significant portion of the personnel are assigned to Southern Cebu, potentially reflecting the region's operational demands or strategic importance.

In CGS Camotes, there are 47 respondents assigned to Camotes, making up 11% of the total. This suggests a moderate presence of Coast Guard personnel in this area, likely due to its geographical and operational needs. While CGS Central Cebu, this station has 42 respondents, accounting for 10% of the sample. The personnel distribution here indicates a considerable Coast Guard presence in Central Cebu, which may be central to regional operations.

In CGS Eastern Bohol with 60 respondents, representing 14% of the total, Eastern Bohol has a substantial number of Coast Guard personnel. This suggests that this area has significant operational requirements necessitating a larger workforce. On the other hand, CGS Central Oriental, this station has 62 respondents, constituting 15% of the sample. The notable number of personnel here indicates a key operational area within the district.

While CGS Siquijor, has 52 respondents, making up 13% of the total. This reflects a substantial allocation of personnel, potentially due to specific operational needs or geographic considerations.

CGS Western Bohol has 63 respondents, representing 15% of the sample. The distribution suggests that Western Bohol is an important area requiring a significant Coast Guard presence and Headquarters Coast Guard District Central Visayas (HCGDCV) with only 2 respondents, or 1% of the total, are stationed at the headquarters. This small percentage is typical for administrative or strategic command centers where fewer personnel are needed. The total number of respondents is 415,

with the percentages summing up to 100%, providing a comprehensive overview of the distribution of personnel across different stations within the district.

The data from Table 6 reveals a well-distributed workforce across various Coast Guard stations within the Central Visayas region. The highest concentration of personnel is in CGS Southern Cebu, reflecting its strategic importance and possibly higher operational demands. The distribution of personnel in other stations such as CGS Camotes, CGS Central Cebu, CGS Eastern Bohol, CGS Central Oriental, CGS Siquijor, and CGS Western Bohol suggest a balanced allocation based on regional needs and geographic considerations.

The presence of only a small number of personnel at the headquarters indicates that most of the workforce is deployed in operational roles across the different stations, ensuring a strong field presence necessary for effective maritime search and rescue operations. This distribution supports a decentralized operational model where personnel are strategically positioned to respond swiftly to maritime emergencies throughout the region.

Hence, the distribution of personnel across various assignments and stations within the Coast Guard District Central Visayas underscores the importance of strategic deployment and resource allocation in enhancing the effectiveness of maritime search and rescue operations.

Table 7

Profile of Respondents According to Trainings Attended

Years of Service	Frequency
Basic Life Support (BLS)	248
Water Search and Rescue (WASAR)	344
Self-Contained Underwater Breathing Apparatus (SCUBA)	17
Rescue Swimmer Course	4
Advanced Seamanship Package Course	25
Boat Captains Course (Enlisted)	11
Incident Command System (ICS)	49
Others	44
Total	**742**

Table 7 shows the training programs attended by respondents within the Coast Guard District Central Visayas, detailing the variety and frequency of training courses completed. The data highlights the emphasis on diverse training areas critical for effective maritime search and rescue operations.

The distribution of training programs shows that Basic Life Support (BLS) is one of the most attended courses, with 248 participants. This fundamental course equips personnel with essential life-saving skills necessary during emergencies, emphasizing the importance placed on basic medical preparedness in SAR operations. Water Search and Rescue (WASAR) has the highest number of attendees, with 344 participants, reflecting the Coast Guard's primary operational focus on water-based rescue missions.

In contrast, specialized training such as Self-Contained Underwater Breathing Apparatus (SCUBA) is attended by only 17 respondents, highlighting the specialized nature of underwater rescue operations requiring specific expertise. Similarly, the Rescue Swimmer Course has only 4 attendees, indicating its specialized and selective nature for specific roles within the Coast Guard.

The Advanced Seamanship Package Course, attended by 25 respondents, focuses on developing advanced navigation and maritime operation skills, signifying a targeted approach to enhancing seamanship among select personnel. The Boat Captains Course for enlisted personnel, with 11 attendees, aims to build leadership and command capabilities, essential for vessel operations.

The Incident Command System (ICS) training, attended by 49 respondents, underscores the need for effective command and control during emergencies, facilitating coordinated and efficient SAR operations. Additionally, 44 respondents have participated in various other training programs not specified in the main categories, indicating the Coast Guard's commitment to addressing a wide range of specialized training needs to enhance overall operational capability. Table 7 shows that most respondents have attended Water Search and Rescue (WASAR) training, which aligns with the Coast Guard's primary responsibility in maritime search and rescue missions.

Performance of The Coast Guard District Central Visayas Personnel in Maritime Search and Rescue Operations

Table 8

Assessments of Respondents on their Performance in selected Maritime Search and Rescue Operations Scenarios in terms of Scenario 1

Scenario 1	Frequency	Percentage
1. Upon verification, I immediately look and enlist the services of a Tugboat in my area to render assistance to the distress vessel. Subsequently, I will request to the Headquarters Coast Guard District Central Visayas the availability of a PCG Vessel to render necessary assistance to the distress vessel.	110	27%
2. I will continue to communicate and monitor the distress vessel and wait for their company to arrange for the boat to render assistance to the said vessel.	12	3%
3. I will coordinate and communicate with the nearest vessels if there is any transiting near the vicinity of the location of the distress vessel and request their services to render necessary assistance.	72	17%
4. I will assemble our rescue team in the station and onboard our rubber boat and go immediately to the distress vessel and will render necessary assistance. Subsequently, I will request to the Headquarters Coast Guard District Central Visayas the availability of a PCG Vessel to render necessary assistance to the distress vessel.	221	53%
Total	**415**	**100%**

Table 8 shows the evaluation of the respondents on their Performance in Maritime Search and Rescue Operations in terms of Scenario 1: Your station received a distress call from a domestic cargo vessel with 10 crew including the master, carrying cement and is about 10 nautical miles off the coast of Eastern Cebu. Based on the initial information received, the said vessel is experiencing engine malfunction (total shut down of main engines) and subsequently conducting trouble shooting of their main engines but with negative results. Further, they are requesting immediate assistance. Your station is the closest to the distress vessel and you were directed by the Higher Headquarters to act.

Overall, the findings revealed that 53 percent or 221 of the respondents will assemble our rescue team in the station and onboard our rubber boat and go immediately to the distress vessel and will render necessary assistance. Subsequently, will request to the Headquarters Coast Guard District Central Visayas the availability of a PCG Vessel to render necessary assistance to the distress vessel.

On the other hand, 27% or 110 of the respondents believed that upon verification, they must immediately look and enlist the services of a Tugboat in the area to render assistance to the distress vessel. Subsequently, they will request to the Headquarters Coast Guard District Central Visayas the availability of a PCG Vessel to render necessary assistance to the distress vessel.

Furthermore, some 17% or 72 respondents believed that they would coordinate and communicate with the nearest vessels if there is any transiting near the vicinity of the location of the distress vessel and request their services to render necessary assistance. And only 3% or 12 of the respondents see it necessary that they will continue to communicate and monitor the distress vessel and wait for their company to arrange for the boat to render assistance to the said vessel.

This implies that majority of the respondents believed that whenever scenario 1 would arise in a distress situation, they will immediately assemble their rescue team in the station and onboard our rubber boat and go immediately to the distress vessel and will render necessary assistance. Subsequently, will request to the Headquarters Coast Guard District Central Visayas the availability of a PCG Vessel to render necessary assistance to the distress vessel.

This proactive approach to providing aid on-site is in accordance with well-established best practices in maritime search and rescue operations. The research conducted by Punnengattu Padi Subramanian (2022) underscores the need of prompt and immediate action in emergency circumstances at sea, emphasizing the crucial need to minimize reaction times to enhance the likelihood of successful rescue operations. In addition, 27% (110 responses) of the participants stated that they would promptly confirm the situation and promptly hire a tugboat nearby to offer rapid assistance to the stranded vessel. This approach highlights the significance of utilizing local resources and adjacent assets for timely support, as proposed by Zhang (2024). Their study highlights the efficacy of employing nearby resources to accelerate rescue operations and ensure prompt response.
Conversely, 17% (72 participants) of the respondents suggested collaborating with neighboring ships passing through the distressed vessel's location to ask for their help. This collaborative method exemplifies the ideals of interoperability and

cooperation in marine emergency response operations, as emphasized by Yu (2020). Their study highlights the need of utilizing established marine networks and partnerships to improve response capabilities and optimize resource use during emergency scenarios.

Only a small percentage, 3% (12 respondents), suggested continuing to monitor the distressed vessel while awaiting assistance arrangements from their company. While this approach may prioritize safety and strategic coordination, it could potentially prolong response times, increasing the risks to the distressed vessel and its crew.The answers given by the participants in Scenario 1 highlight the significance of taking proactive and decisive measures in marine search and rescue missions. The preferred approaches prioritize the urgent requirement for prompt action, allocation of resources, and cooperation to provide efficient aid to troubled ships in crisis scenarios.

Table 9

Assessments of Respondents on their Performance in selected Maritime Search and Rescue Operations in terms of Scenario 2

Scenario 2	Frequency	Percentage
1. Assess the situation, mobilize our rescue team/s in the station and onboard our rubber boat and go immediately to the location of the F/V and conduct search and rescue operations. Further, I will issue notice to all vessels transiting near the location of the search area to be on the lookout and to possibly help in the search and rescue, and if sighted, inform the PCG immediately.	340	82%
2. Mobilize our rescue teams from the station personnel, coast guard auxiliaries under our stations, and other fishermen in the area to help in the conduct of the search and rescue operations.	21	5%
3. I will continue to communicate with the boat captain of the F/V and monitor the progress of their search and rescue operation until further notice, and I will issue notifications to all vessel transiting near the location to be on the lookout and to possibly help in the search and rescue. If sighted, the PCG will be informed immediately.	37	9%
4. I will coordinate and communicate with the nearest vessels if there is any transiting near the vicinity of the location of the distress vessel and request their services to render search and rescue operations.	17	4%
Total	**415**	**100%**

Table 9 shows the evaluation of the respondents on their Performance in Maritime Search and Rescue Operations in terms of Scenario 2: Your Station received information from the Boat Captain of a Fishing Vessel (F/V) that while they are conducting fishing venture at vicinity waters 5 Nautical Miles from your station, one of their crew fell onboard their F/V and went missing. They endeavor to conduct search and rescue operations for already 2 hours from the time of their call to your station,

but still, they cannot locate the missing fisherman. Further, they are requesting the PCG to help in the search and rescue.

Overall, the findings revealed that 82 percent or 340 of the respondents assess the situation, mobilize our rescue team/s in the station and onboard our rubber boat and go immediately to the location of the F/V and conduct search and rescue operations. Further, I will issue notice to all vessels transiting near the location of the search area to be on the lookout and to possibly help in the search and rescue, and if sighted, inform the PCG immediately.

On the other hand, there were 9% or 37 respondents believed that they would continue to communicate with the boat captain of the F/V and monitor the progress of their search and rescue operation until further notice, and I will issue notifications to all vessel transiting near the location to be on the lookout and to possibly help in the search and rescue. If sighted, the PCG will be informed immediately.

Also, 5% or 21 respondents would mobilize their rescue teams from the station personnel, coast guard auxiliaries under our stations, and other fishermen in the area to help in the conduct of the search and rescue operations. While 4% or 17 respondents believed that would coordinate and communicate with the nearest vessels if there is any transiting near the vicinity of the location of the distress vessel and request their services to render search and rescue operations.

This implies that majority of the respondents believed that whenever scenario 2 would arise in a distress situation, they need first to assess the situation, mobilize their rescue team/s in the station and onboard our rubber boat and go immediately to the location of the F/V and conduct search and rescue operations. Further, they will issue notice to all vessels transiting near the location of the search area to be on the lookout and to possibly help in the search and rescue, and if sighted, inform the PCG immediately.

This response plan is consistent with the ideals of prompt intervention and resolute action in marine emergencies, as proposed by Kosmas (2022). Their research underscores the significance of prompt reaction times in search and rescue missions, emphasizing that delays in deployment can greatly diminish the likelihood of good results, particularly in situations involving individuals who are lost at sea.

In contrast, a minority of respondents, accounting for 9% (37 individuals), expressed a desire to stay in contact with the boat captain of the fishing vessel, oversee the search and rescue operations, and notify other vessels. This technique demonstrates a prudent and systematic approach to responding, with a focus on continuous coordination and sharing of information to enhance search efforts, as recommended by Gutterman (2023).

An alternative viewpoint put forth by 5% (21 respondents) of the participants suggests the utilization of not just station personnel but also coast guard auxiliary and local fisherman to mobilize rescue teams for the purpose of assisting in search and rescue operations. The significance of community engagement and pooling of resources to improve search efforts is emphasized by Chen (2019). Their study highlights the advantages of utilizing varied networks and specialized knowledge within marine communities to enhance response capabilities and improve the chances of achieving successful outcomes in search and rescue operations.

Ultimately, a small percentage of the participants (4%, or 17 responders) proposed the idea of collaborating with neighboring vessels that are passing through the same area, and seeking their aid in conducting search and rescue operations. This collaborative approach prioritizes the utilization of existing resources and maritime networks to enhance search efforts and achieve maximum coverage in the designated search region, as emphasized by Lind et al., (2020). Their research highlights the importance of collaboration across different sectors in improving the efficiency of maritime search and rescue operations.

The replies given by the participants in Scenario 2 demonstrate a variety of viewpoints regarding the most effective approach to dealing with emergency circumstances at sea. Although most people support a proactive and immediate intervention approach, other tactics prioritize continuous coordination, community involvement, and collaborative efforts to enhance search and rescue operations and improve the chances of achieving good outcomes.

Table 10

Assessments of Respondents on their Performance in Maritime Search and Rescue Operations in terms of Scenario 3

Scenario 3	Frequency	Percentage
1. Upon receipt of information, the Station's immediate action will be the following: immediately inform the HCGDCV, mobilize the rescue teams from our station personnel and coast guard auxiliaries under our stations to conduct search and rescue operations.	24	6%
2. Upon receipt of information, the Station's immediate action will be the following: Immediately inform the HCGDCV and subsequently request the services of MRRV-4408 to be deploy in the location of M/V COOKS to combat the fire and render necessary assistance. All vessels transiting near the location of M/V COOKS will be notified to help in the search and rescue operations. Further, I will mobilize the Station Search and Rescue Team with medical personnel, and enlist the services of a Tug Boat to render necessary assistance to the distress vessel.	343	83%
3. Upon receipt of information, the Station's immediate action will be the following: I will immediately inform the HCGDCV and mobilize the rescue teams from our station personnel, and coast guard auxiliaries under our stations to conduct search and rescue operations. All vessels transiting near the location of M/V COOKS will also be notified to help in the search and rescue operations.	28	7%
4. Upon receipt of information, the Station's immediate action will be the following: I will immediately inform the HCGDCV and coordinate with the nearest vessels if there is any transiting near the vicinity of the location of the distress vessel and requests their services to render search and rescue operations.	20	4%
Total	**415**	**100%**

Table 10 shows the evaluation of the respondents on their Performance in Maritime Search and Rescue Operations in terms of Scenario 3: At about 1 A.M. your Station received a distress call from the Master of a RORO Passenger Vessel, M/V COOKS that they are currently combating fire on board. Accordingly, the fire is in the cargo hold area where most of the vehicles are stacked. Further information revealed that there are 4 light vehicles, 20 passengers and 15 crew onboard, including the Master, and their present location is at vicinity waters 5 NM east of your Station. Furthermore, the Headquarters Coast Guard District Central Visayas (HCGDDCV) is just 40 kms away from your Station and 1 PCG Multi-Role Response Vessel (MRRV) MRRV-4408

is docked near the said District. With the said incident and information what will be your immediate best courses of action?

Overall, the findings revealed that 83 percent or 343 of the respondents upon receipt of information, the Station's immediate action must be: Immediately inform the HCGDCV and subsequently request the services of MRRV-4408 to be deploy in the location of M/V COOKS to combat the fire and render necessary assistance. All vessels transiting near the location of M/V COOKS will be notified to help in the search and rescue operations. Further, they will mobilize the Station Search and Rescue Team with medical personnel, and enlist the services of a Tug Boat to render necessary assistance to the distress vessel.

Additionally, there were 7% or 28 respondents who upon receipt of information, the Station's immediate must immediately inform the HCGDCV and mobilize the rescue teams from our station personnel, and coast guard auxiliaries under our stations to conduct search and rescue operations. All vessels transiting near the location of M/V COOKS will also be notified to help in the search and rescue operations.

While, 6% or 24 of the respondents believed that upon receipt of information, the Station's immediate action must immediately inform the HCGDCV, mobilize the rescue teams from our station personnel and coast guard auxiliaries under our stations to conduct search and rescue operation. And 4% or 20 respondents believed that Upon receipt of information, the Station's immediate action should have to immediately inform the HCGDCV and coordinate with the nearest vessels if there is any transiting near the vicinity of the location of the distress vessel and requests their services to render search and rescue operations.

This indicates that majority of the respondents thought that incase a Scenario 3 would occur, the PCG Team must upon receipt of information, the Station's immediate action to immediately inform the HCGDCV and subsequently request the services of MRRV-4408 to be deploy in the location of M/V COOKS to combat the fire and render necessary assistance. All vessels transiting near the location of M/V COOKS will be notified to help in the search and rescue operations. Further, they must mobilize the Station Search and Rescue Team with medical personnel and enlist the services of a Tugboat to render necessary assistance to the distress vessel.

Upon examining the average evaluations of participants regarding their effectiveness in maritime search and rescue operations in Scenario 3, it becomes clear that a comprehensive strategy is necessary to tackle the intricate difficulties presented by emergencies at sea. The prevailing approach, preferred by 83% of participants, emphasizes prompt communication with the Headquarters Coast Guard District Central Visayas (HCGDCV) and the dispatch of specialized resources, such as the PCG Multi-Role Response Vessel (MRRV) MRRV-4408, to address the onboard fire and offer essential aid. This strategy, based on the concepts of swift intervention and efficient allocation of resources, is consistent with current research that highlights the crucial significance of prompt response in marine situations. Nasso's (2022) studies emphasize the crucial importance of sophisticated vessels that are equipped for firefighting and rescue operations in reducing risks and assuring the safety of passengers and crew in similar situations.

Moreover, the prioritization of deploying the Station Search and Rescue Team, in addition to medical staff, demonstrates a thorough strategy for addressing situations on board. This approach effectively combines medical aid and rescue operations. This comprehensive response plan aligns with the suggestions made by Abdullah (2023), who propose the implementation of all-encompassing emergency response frameworks that tackle both immediate safety issues and long-term rescue operations. In summary, the answers given by the participants in Scenario 3 emphasize the need of taking preemptive and coordinated measures. They also demonstrate the efficiency of comprehensive tactics in achieving successful results during maritime emergencies.

Results revealed in Scenario no. 1, there are 221 respondents or 53% of the total respondents chose the best and correct answer while in Scenario no. 2, there are 340 respondents or 82% of the total respondents chose the correct and best answer, and in Scenario no. 3, there are 343 respondents or 83% chose the correct and best answer. With these results, the over-all assessment of performance of CGDCV personnel with the Three (3) scenarios are very high and impressive.

Significant Relationship Between the Performance of The Respondents and Their Demographic Profile

Table 11

Significant Relationship of Assessments to Respondents' Profile

Variables	Computed r – Value	Computed *t – Value*	Critical *t – Value*	Interpretation
Age	-0.17 (negative low correlation)	71.25	1.97	Significant
Gender	-0.02 (negative low correlation)	8.26	1.97	Significant
Rank	0.04 (positive low correlation)	16.53	1.97	Significant
Highest Educational Attainment	0.02 (positive low correlation)	8.26	1.97	Significant
Years Of Service	-0.16 (negative low correlation)	66.94	1.97	Significant
Current Assignment/Station	0.07 (positive low correlation)	28.98	1.97	Significant
Trainings Attended	-0.03 (negative low correlation)	12.40	1.97	Significant

Degree of Freedom = 413 Level of Significance = 0.05

Table 11 presents the results of analyzing the relationship between respondents' performance assessments and various demographic variables. Each row in the table corresponds to a different demographic factor, including age, gender, rank, highest educational attainment, years of service, current assignment or station, and training attended. The computed r-values indicate the strength and direction of correlation,

with negative values suggesting an inverse relationship (where higher indicated variable correspond to lower values of the other), and positive values indicating a direct relationship.

For instance, age demonstrates a negative low correlation (-0.17), implying that older respondents tend to receive slightly lower performance assessments. Similarly, gender shows a negative low correlation (-0.02), indicating a slight tendency for male respondents to receive slightly lower assessments compared to females. On the other hand, variables like rank (0.04), highest educational attainment (0.02), years of service (-0.16), current assignment/station (0.07), and trainings attended (-0.03) exhibit positive or negative low correlations, suggesting modest associations between these factors and performance assessments.

The computed t-values are compared against critical t-values to determine significance. In all cases, the computed t-values exceed the critical t-value of 1.97, indicating statistically significant relationships between each demographic variable and performance assessments at the 0.05 level of significance. This suggests that while the correlations are low in magnitude, they are statistically meaningful within the context of the study's sample size (Degree of Freedom = 413). These findings underscore the importance of considering demographic profiles when interpreting performance assessments among respondents.

Based on Table 11, which explores the relationship between respondents' performance assessments and various demographic variables, several insights can be drawn that resonate with existing literature. The findings reveal consistent but modest correlations between demographic factors and performance assessments among respondents. For instance, age demonstrates a negative correlation (-0.17), suggesting that older respondents tend to receive slightly lower performance assessments. This aligns with Özşeker's (2022) and Yadav's (2020) studies, which indicate that younger employees often exhibit higher enthusiasm and adaptability, potentially influencing more favorable assessments compared to their older counterparts who may bring a more critical perspective based on extensive experience.

Gender, showing a slight negative correlation (-0.02), indicates that male respondents tend to receive slightly lower assessments compared to females. This finding is supported by Dwiri (2021) and Bridges (2020), highlighting gender disparities in perceptions of organizational efficacy, influenced by different workplace experiences and expectations.

Rank (0.04) and highest educational attainment (0.02) both show positive correlations, suggesting that individuals in higher ranks and those with higher educational achievements tend to rate organizational capabilities more positively.

This resonates with Gutterman (2023), Gabrielli (2019), and Tulkunovna (2020), who emphasize the influence of seniority and education in shaping perceptions of organizational success and competence.

Years of service (-0.16) and current assignment/station (0.07) also show significant correlations, indicating that longer tenures and specific job contexts can impact performance assessments. Singh (2020) and Gerritsen-van Leeuwenkamp (2019)

insights into how experience and immediate work environments shape evaluations of organizational capabilities, emphasizing the need to consider contextual factors in performance assessments.

Lastly, trainings attended (-0.03) exhibit a negative correlation, suggesting that while training programs are valuable, mismatches between training content and real-world challenges can lead to lower performance assessments. This finding aligns with Gutterman (2023) and Faisal (2024), underscoring the importance of relevant, high-quality training programs tailored to organizational needs.

Hence, Table 11's results underscore the nuanced interplay between demographic variables and performance assessments, reflecting broader insights from existing literature on organizational behavior and human resource management. These findings highlight the importance of considering diverse demographic profiles when evaluating organizational capabilities, emphasizing the need for targeted strategies to enhance workforce effectiveness and satisfaction.

Challenges of Coast Guard District Central Visayas In Performing Maritime Search and Rescue Operations in Terms of Personnel Capability, Training, Operations, PCG Assets, and Policies and Standards

Table 12

Mean Assessments on the challenges of Coast Guard District Central Visayas in performing Maritime Search and Rescue Operations in Terms of Personnel Capability

Elements	Mean	SD	Interpretation
1. Safety and well-being of the PCG personnel is not given priority;	2.76	0.81	Disagree
2. Lack enough qualified maintenance personnel and technicians to rectify any derangement of PCG floating assets during the search and rescue operations;	2.10	0.61	Agree
3. Maintenance personnel of PCG are not knowledgeable in their work assignments;	2.56	0.67	Disagree
4. Lack of necessary skills and confidence in overcoming obstacles;	2.56	0.65	Disagree
5. No provision of training and development opportunities;	2.49	0.65	Agree
6. PCG personnel are incapable to efficiently perform their task due to inadequate/ unavailability of equipment's and materials, needed in search and rescue operations.	2.22	0.72	Agree
Over-all Weighted Mean	***2.45***	***0.07***	***Agree***

Legend: 1.00-1.74 Strongly Agree (SA), 1.75-2.49 Agree (A), 2.50-3.24 Disagree (D), 3.25-4.00 Strongly Disagree (SD)

Table 12 shows the assessment of the challenges encountered by the Coast Guard District Central Visayas in conducting Maritime Search and Rescue Operations, focusing specifically on personnel capability. The table synthesizes data on mean

scores, standard deviations (SD), and interpretations derived from responses across six key elements.

Among the findings, Element 2 emerges with the highest mean score of 2.10 ± 0.61, indicating a consensus among respondents regarding the inadequacy of qualified maintenance personnel and technicians to address issues with PCG floating assets during operations. This underscore concerns over technical expertise within maintenance roles, potentially affecting operational efficiency and asset maintenance.

Conversely, Elements 4 and 5 show the lowest mean scores of 2.56 ± 0.65 and 2.49 ± 0.65, respectively, signaling disagreement among respondents. Element 4 reveals a perceived confidence in overcoming operational obstacles, suggesting a level of assurance in personnel's problem-solving abilities despite challenges. Element 5 indicates disagreement regarding the availability of training and development opportunities, reflecting a belief among respondents in accessible avenues for skill enhancement within the organization.

Overall, the weighted mean across all elements is 2.45 ± 0.07, categorizing responses within the "Agree" range. This indicates a collective acknowledgment of existing challenges in personnel capability for maritime operations while suggesting optimism that these challenges can be addressed effectively. The consistency in ratings across different elements highlights a balanced perspective, acknowledging both areas needing improvement and strengths within the organization's operational framework.

Additional noteworthy findings include Element 1's score of 2.76 ± 0.81, indicating disagreement with the notion that safety and well-being of PCG personnel are neglected, underscoring a strong commitment to safety practices. Element 6's score of 2.22 ± 0.72 reflects agreement that equipment and material shortages hinder efficient task performance, emphasizing a tangible operational hurdle requiring attention.

The findings from Table 12 align closely with existing literature on the critical factors influencing the operational efficiency of maritime search and rescue organizations. Bosak and Scullen (2018) highlight that insufficient training and development opportunities can significantly hinder worker performance and organizational efficiency. The mean score of 2.49 in Table 12, indicating agreement among respondents on the lack of training and development possibilities, underscores the resonance of this issue within the Coast Guard District Central Visayas. This aligns with Bosak and Scullen's findings, suggesting that inadequate training resources may impede the readiness and effectiveness of personnel during maritime operations.

Similarly, Ivankevich (2019) emphasizes the importance of having skilled maintenance staff and technicians for maintaining operational efficiency in maritime settings. The high mean score of 2.10 in Table 12, indicating agreement on the deficiency of qualified maintenance personnel, supports Ivankevich's observations. This shortage of technical expertise can potentially lead to delays in addressing maintenance issues with PCG floating assets, thereby impacting operational readiness and response capabilities during rescue operations.

Furthermore, the agreement among respondents regarding the insufficiency of equipment and materials (mean = 2.22) in Table 12 echoes the findings of Heij and

Knol (2018). Heij and Knol emphasize the critical role of adequate resources in facilitating effective maritime rescue operations. Insufficient equipment and materials can compromise the ability of personnel to perform tasks efficiently and safely, thereby affecting overall operational outcomes.

Together, these studies underscore the urgent need for maritime organizations to enhance training and development programs, ensure an adequate supply of skilled personnel, and provide sufficient resources to optimize operational capabilities. Addressing these challenges identified in Table 12 aligns with broader recommendations from the literature, aiming to bolster the readiness and effectiveness of maritime search and rescue teams in fulfilling their vital roles. Integrating these insights into strategic planning and resource allocation, organizations can strive towards improving overall operational performance and achieving enhanced outcomes in maritime emergency response scenarios.

Table 13

Mean Assessments on the challenges of Coast Guard District Central Visayas in performing Maritime Search and Rescue Operations in Terms of Training

Elements	Mean	Sd	Interpretation
1. There is no training program for conduct of search and rescue operations;	2.82	0.72	Disagree
2. Training is not properly conducted by the Trainor;	2.94	0.62	Disagree
3. Training in search and rescue operations are limited to selected personnel only;	2.60	0.69	Disagree
4. There are only limited slots for PCG personnel regarding cross training in search and rescue operations in foreign countries;	2.18	0.60	Agree
5. Introduction of new updated technology in search and rescue operations training is quite challenging for PCG personnel due to unfamiliarity of these technology;	2.12	0.53	Agree
6. Due to logistical and financial constraints, most of the training in search and rescue for PCG personnel is theoretical and less actual exercises.	2.25	0.59	Agree
Over-all Weighted Mean	***2.48***	***0.07***	***Agree***

Legend: 1.00-1.74 Strongly Agree (SA), 1.75-2.49 Agree (A), 2.50-3.24 Disagree (D), 3.25-4.00 Strongly Disagree (SD)

Table 13 shows a detailed assessment of the challenges encountered by the Coast Guard District Central Visayas in conducting Maritime Search and Rescue Operations, focusing specifically on training aspects. The table consolidates mean scores, standard deviations (SD), and interpretations derived from respondent evaluations across six key elements.

Among the key highlights, Element 2 emerges with the highest mean score of 2.94 ± 0.62, indicating significant disagreement among respondents regarding the effectiveness of training conducted by trainers. This suggests a perception among

personnel that training sessions are well-managed, underscoring the importance of effective training management in fostering quality skill development for search and rescue operations.

Conversely, Elements 5 and 4 demonstrate the lowest mean scores of 2.12 ± 0.53 and 2.18 ± 0.60, respectively, indicating agreement among respondents. Element 5 highlights challenges associated with introducing new technology in training due to unfamiliarity among PCG personnel, while Element 4 underscores the limited availability of slots for cross-training abroad. These findings underscore areas where enhancements in technology integration and international training opportunities are needed to enhance operational capabilities.

The overall weighted mean across all elements is 2.48 ± 0.07, categorizing responses within the "Agree" range. This indicates a collective acknowledgment of existing challenges in training for search and rescue operations. While challenges are recognized, the overall agreement suggests opportunities for improvement through targeted interventions and strategic enhancements in training programs.

Additional significant findings include Element 1's score of 2.82 ± 0.72, indicating disagreement with the absence of a structured training program for search and rescue operations, affirming the presence of organized training initiatives within the Coast Guard District Central Visayas. Element 6's score of 2.25 ± 0.59 reflects agreement that logistical and financial constraints contribute to training being more theoretical than practical, highlighting a practical challenge in translating theoretical knowledge into actionable skills.

In summary, Table 13 provides a comprehensive overview of perceived training challenges within the Coast Guard District Central Visayas for maritime search and rescue operations. It identifies critical areas such as training program effectiveness, technology integration, and international training opportunities where improvements can be targeted. These insights are pivotal for enhancing personnel competency and readiness, thereby elevating overall operational effectiveness in critical maritime rescue scenarios. Addressing these challenges through targeted interventions and resource allocations can lead to substantial improvements in training quality and operational preparedness within the organization.

These findings align with existing literature, such as Sharma (2023), who discusses how technological advancements outpace training capacities, leading to skills gaps in marine sectors. They emphasize the benefits of international training collaborations in enhancing maritime safety and operational effectiveness. Additionally, logistical and financial limitations affecting practical training underscoring the importance of addressing these barriers to improve the preparedness and proficiency of maritime search and rescue operations.

These insights underscore the critical need for strategic interventions to enhance training quality, technological integration, and international collaboration, ultimately bolstering the capabilities of personnel in conducting effective maritime search and rescue operations. Addressing these challenges will be crucial for ensuring enhanced operational readiness and response capabilities in critical maritime scenarios.

Table 14

Mean Assessments on the challenges of Coast Guard District Central Visayas in performing Maritime Search and Rescue Operations in Terms of Operations

Elements	Mean	SD	Interpretation
1. Operations during adverse weather conditions (high winds and rough seas) impede search and rescue operations efforts of the PCG;	1.89	0.62	Agree
2. Maritime incidents often occur far from the shore or isolated areas making it challenging for the conduct of search and rescue operations of Coast Guard personnel;	1.84	0.49	Agree
3. Poor inter-agency coordination due to the absence/ unavailability of offices of these agencies in near your Station affects the operations of PCG when conducting search and rescue operations;	2.15	0.63	Agree
4. Oceans vastness requires extensive resources and time to cover potential search areas making it challenging for operations of your station to conduct search and rescue;	1.90	0.42	Agree
5. Technology and equipment's limitations in detection of the distress or incidents in the conduct of search and rescue operations affects the operations of the PCG;	**1.87**	**0.53**	Agree
6. Search and rescue operations are sometime costly thus, budget limitations can affect the conduct of operations of the PCG.	**2.04**	**0.61**	Agree
Over-all weighted mean	***1.95***	***0.55***	***Agree***

Legend: 1.00-1.74 Strongly Agree (SA), 1.75-2.49 Agree (A), 2.50-3.24 Disagree (D), 3.25-4.00 Strongly Disagree (SD)

Table 14 provides a comprehensive assessment of the challenges faced by the Coast Guard District Central Visayas in performing Maritime Search and Rescue Operations, focusing on operational aspects. The table presents mean scores, standard deviations (SD), and interpretations based on respondent evaluations across six critical elements.

Elements 1 and 4 stand out with the highest mean scores of 1.89 ± 0.62 and 1.90 ± 0.42, respectively, indicating agreement among respondents. Element 1 highlights challenges posed by adverse weather conditions such as high winds and rough seas, which impede search and rescue efforts. Element 4 underscores the vastness of the ocean, necessitating extensive resources and time to cover potential search areas. These findings emphasize significant operational hurdles related to natural conditions and geographical challenges.

Elements 2 and 5 exhibit the lowest mean scores of 1.84 ± 0.49 and 1.87 ± 0.53, respectively, also indicating agreement among respondents. Element 2 points out the

difficulty of maritime incidents occurring far from shore or in isolated areas, complicating search and rescue operations. Element 5 highlights limitations in technology and equipment for detecting distress or incidents, further impacting operational effectiveness. These aspects underscore areas where advancements in technology and operational strategies could potentially enhance response capabilities. The overall weighted mean across all elements is 1.95 ± 0.55, categorizing responses within the "Agree" range. This suggests a general consensus among respondents regarding the operational challenges faced by the Coast Guard District Central Visayas in conducting search and rescue operations. While acknowledging these challenges, the overall agreement also indicates a recognition of the feasibility of overcoming these obstacles through strategic planning and resource allocation.

Furthermore, other significant findings, Element 3 (2.15 ± 0.63) indicates agreement regarding poor inter-agency coordination due to the absence or unavailability of offices near the station. This highlights a systemic challenge in coordinating efforts with other agencies, potentially affecting the efficiency of search and rescue operations. While Element 6 (2.04 ± 0.61) reflects agreement that budget limitations can impact the conduct of search and rescue operations. This underscores the financial constraints faced by the organization in executing its operational mandates. In summary, Table 14 provides a detailed overview of the operational challenges encountered by the Coast Guard District Central Visayas in maritime search and rescue operations. These findings are crucial for strategic planning and decision-making, emphasizing the need for improved technological capabilities, enhanced inter-agency coordination, and adequate resource allocation to bolster operational efficiency and effectiveness. Addressing these challenges will be instrumental in strengthening the Coast Guard's capability to respond swiftly and effectively to maritime incidents and emergencies.

Moreover, Elements 1 and 4 highlight the highest mean scores of 1.89 ± 0.62 and 1.90 ± 0.42, respectively, indicating agreement among respondents. Element 1 emphasizes the impediments posed by adverse weather conditions such as high winds and rough seas, which significantly hinder search and rescue operations. Element 4 addresses the vastness of ocean areas, necessitating extensive resources and time to cover potential search zones. These findings align with literature emphasizing the logistical challenges and extended response times faced by marine agencies in adverse conditions (Mansor, 2020; Wagner, 2021).

In terms of Technological and Equipment Limitations, Elements 2 and 5 exhibit the lowest mean scores of 1.84 ± 0.49 and 1.87 ± 0.53, respectively, indicating agreement among respondents. Element 2 highlights the difficulty of responding to maritime incidents occurring far from shore or in isolated areas, complicating rescue operations due to accessibility issues. Element 5 underscores limitations in technology and equipment for detecting distress signals or incidents, further hampering operational effectiveness. These challenges resonate with literature discussing outdated or inadequate detection technologies impacting response capabilities (Smith & Rothberg, 2018).

While, Financial and Inter-agency Coordination Challenges, Element 6 (mean = 2.04 ± 0.61) reflects agreement regarding budget limitations affecting search and rescue operations. This finding is consistent with research highlighting the expensive nature

of maritime operations and the constraints imposed by financial resources (Larsson & Holmgren, 2017). Element 3 (mean = 2.15 ± 0.63) underscores challenges in inter-agency coordination due to the absence or unavailability of nearby offices, which can hinder collaborative efforts during rescue operations. Literature supports the critical role of enhanced inter-agency collaboration and infrastructure in improving maritime safety and rescue efforts (Johnson et al., 2020).

Hence, the weighted mean of 1.95 ± 0.55 across all elements categorizes responses within the "Agree" range, indicating a consensus on the operational challenges faced by the Coast Guard District Central Visayas. These findings highlight the necessity for improved technological capabilities, enhanced inter-agency coordination, and adequate resource allocation to enhance operational efficiency and effectiveness in maritime search and rescue operations. Addressing these challenges is crucial for strengthening the Coast Guard's capability to respond promptly and effectively to maritime emergencies and incidents.

Table 15

Assessments of Respondents on the Challenges of Coast Guard District Central Visayas in Performing Maritime Search and Rescue Operations in terms of PCG Assets

Units/ Stations	Rubber Boat	Aluminum Boat	Jetski	Speed Boat	Rigid Hull Inflatable Boat	Ambulance	Unmanned Aerial Drones & Underwater Vehicle
CGS Central Cebu	1- Svc	3- Svc 1- Usvc	1- Ucvc	1- Usvc	Nil	Nil	Nil
CGS Western Bohol	Nil	2- Svc 1- Usvc	1- Svc 1- Ucvc	Nil	Nil	Nil	Nil
CGS Eastern Bohol	Nil	1- Svc 2- Usvc	Nil	1-Svc	Nil	Nil	Nil
CGS Northern Cebu	Nil	3- Svc	Nil	Nil	Nil	Nil	Nil

In Table 15, the findings revealed the following major challenges encountered by Coast Guard District Central Visayas in Performing Maritime Search and Rescue Operations in terms of the PCG Assets:

1. Most stations have no issuance of Rubber Boats in their stations/ Sub-stations.
2. No issuance of Unmanned Aerial Vehicle (UAV) or drones and Unmanned Underwater Vehicle (UUV) use for SAR operations.
3. No Provision of ambulance.
4. Non-Issuance of Unmanned Aerial Vehicle (UAV) or drones use for SAR operation.
5. No provision of Rigid Hull Inflatable Boats to stations.
6. Most stations don't have standby PCG Search and Rescue Vessel or Multi Role Response Vessel deployed for SAR operations.
7. Most stations have no issuance of Rubber Boats in their stations/ Sub-stations

Most stations have no issuance of Rubber Boats in their stations/ Sub-stations
The limitations in PCG assets that the Coast Guard District Central Visayas encounters while conducting maritime search and rescue (SAR) operations are consistent with the worldwide problems about insufficient resources in maritime safety organizations. The lack of crucial resources such as backup aircraft, unmanned underwater vehicles, and ambulances, as mentioned in Table 15, greatly impairs the

efficiency and effectiveness of search and rescue operations. These limits align with the results of research conducted internationally. According to Miętkiewicz (2023), the absence of sophisticated technology resources, such UAVs and UUVs, limits the capacity of maritime organizations to carry out comprehensive and prompt search operations. In addition, the lack of essential equipment, such as rigid hull inflatable boats, significantly limits operational capabilities. Brunet (2022) emphasizes that sufficient and specialized equipment is crucial for the effectiveness of search and rescue missions. The lack of essential medical equipment and first aid supplies presents significant dangers to the safety of both rescuers and victims. This highlights the importance of allocating resources comprehensively to improve operational preparedness and response effectiveness (Ben-Noun, 2023). Hence, it is imperative to tackle these asset-related obstacles to enhance the overall search and rescue (SAR) capability of the Coast Guard District Central Visayas.

Challenges of Coast Guard District Central Visayas In Performing Maritime Search and Rescue Operations in Terms of Policies and Standard Operating Procedures

The researcher conducted document review of the existing Philippine Coast Guard (PCG) policies and standard operating procedures for PCG units in the conduct of Search and Rescue (SAR). The researcher contacted the Station Commanders of Coast Guard District Central Visayas and ask if there are existing policies that their Stations are using in relation to the conduct of SAR operations. Accordingly, they are using the PCG SAR Manual series of 2011 as its guide/ reference in the conduct of SAR operations in their area of responsibility. The researcher interviewed the Station Commanders of CGDCV and checked if other than the PCG SAR Manual if there are other existing SAR related policies that they are using as reference and accordingly they don't have any other than the mentioned PCG SAR manual. The researcher conducted cross checking and validation to the Higher Headquarters in Manila by interviewing the Commanding Officer of the Coast Guard Search and Rescue Unit under Maritime Safety Services Command and confirmed that aside from the PCG SAR manual they don't have any updated SAR policies and that they still crafting a Memorandum Circular policy regarding SAR.

Further, the documentary review revealed that in the Implementation and monitoring of maritime incidents prior conducting SAR operations, the PCG has a standardized format of reporting and monitoring, to include the dissemination of information's and strictly follows the chain of command. The PCG SAR manual also contains the standard procedures in conducting SAR operations and different search patterns commonly used internationally. The researcher believes that to have an effective and efficient in SAR responses there must be a clear and updated policies that can upkeep in the present time depending on the different situations that may arise. The researcher also believes that the policies and procedure in SAR operations should be always be updated in comparable to the current situation in advent of the introduction of new SAR technologies and the effects of climate change.

Furthermore, the absence of standardized operating procedures (SOPs) for different situations highlights the difficulties identified by Gavel et al., (2021), who assert that

SOPs are essential for efficiently organizing search and rescue efforts and maintaining uniformity in response tactics. In addition, there are concerns about obsolete policies, ineffective dissemination, and awareness initiatives that align with broader discussions in the literature emphasizing the importance of conducting regular policy reviews and implementing improved communication methods within search and rescue (SAR) organizations. It is crucial to address these challenges in order to improve the effectiveness and efficiency of search and rescue (SAR) operations.

Conclusions

In view of the findings of the study, the following conclusion was drawn:

1. The demographic and professional characteristics analysis provides a strong foundation for understanding the Coast Guard District Central Visayas' workforce composition and readiness for maritime search and rescue operations. By leveraging the strengths identified in age diversity, educational attainment, rank distribution, and comprehensive training programs, the Coast Guard is poised to strengthen its operational capabilities and effectively respond to maritime emergencies in the Central Visayas region. Continued emphasis on professional development and strategic deployment will further enhance organizational resilience and readiness, ensuring maritime safety and security in the area.

2. Based on the findings, the Coast Guard personnel's readiness, proactive decision-making, and effective utilization of resources across different distress scenarios. Their strategic approach ensures swift deployment of assets, coordination with relevant authorities, and utilization of specialized assistance, enhancing the overall effectiveness of response and rescue operations in the Central Visayas region. Looking forward, continued emphasis on training, scenario-based drills, and inter-agency coordination will further strengthen the Coast Guard District Central Visayas' capabilities in maritime search and rescue operations. Leveraging these strengths and addressing identified areas for enhancement, the Coast Guard is well-positioned to uphold maritime safety, respond effectively to emergencies, and safeguard maritime interests in the Central Visayas district and beyond.

3. Based on the findings hypotheses of no correlation are rejected for each case due to the computed t-values exceeding the critical t-value at a significance level of 0.05. This indicates that there are indeed significant relationships between age, gender, rank, highest educational attainment, years of service, current assignment/station, trainings attended, and performance assessments among Coast Guard personnel in the Central Visayas district.

4. Addressing challenges through strategic interventions in personnel development, training enhancement, operational optimization, asset provisioning, and policy refinement, Coast Guard District Central Visayas can enhance its capability to effectively conduct maritime search and rescue operations. These efforts will foster greater operational efficiency, resilience, and responsiveness, thereby reinforcing the

organization's commitment to safeguarding maritime interests and responding effectively to emergencies in the region and beyond.

Recommendations

In view of the findings of the study the following recommendations are being suggested:

1. The researcher recommended a structured action plan to address challenges in maritime search and rescue operations. The plan includes enhancing personnel capability, improving training programs, optimizing operational strategies, and allocating resources. The plan emphasizes proactive measures to uphold maritime safety and security, ensuring the district's commitment to safeguarding maritime interests and enhancing emergency response capabilities. The plan aims to achieve measurable enhancements in operational readiness and response efficiency.

2. To address the identified challenges in personnel capability within the Coast Guard District Central Visayas, several key initiatives are recommended. Firstly, there is a crucial need to ensure an adequate number of qualified maintenance personnel. This can be achieved through targeted recruitment drives aimed at attracting individuals with specialized skills essential for maintaining and repairing fleet assets. Additionally, implementing comprehensive training programs focused on skill enhancement is essential. These programs should not only improve technical proficiency but also boost personnel confidence in handling diverse maritime emergencies effectively. Furthermore, it is imperative to provide proper equipment, tools, and materials that are well-maintained and readily accessible to support seamless operations during rescue missions.

3. Enhancing the Coast Guard's training framework is vital for improving operational readiness and response effectiveness. It is recommended to develop and implement comprehensive training programs that cover both theoretical knowledge and practical skills relevant to maritime search and rescue operations. These programs should incorporate advanced training delivery methods, making use of interactive and scenario-based approaches that simulate real-world emergencies. Moreover, expanding training opportunities through international partnerships, virtual training sessions, and skills enhancement workshops will ensure continuous professional development among Coast Guard personnel.

4. To optimize operational effectiveness, strategies should focus on enhancing readiness, coordination, and search capabilities. Regular drills, scenario-based exercises, and simulations are essential to improve operational readiness and ensure personnel are well-prepared for emergencies. Strengthening coordination mechanisms with local and international partners will facilitate seamless collaboration during rescue operations. Additionally, investing in advanced technologies such as UAVs, UUVs, satellite imaging, and advanced communication systems will enhance the Coast Guard's search capabilities and response efficiency.

5. Modernizing the Coast Guard fleet is critical for maintaining operational superiority. This involves prioritizing the acquisition of new vessels equipped with state-of-the-art navigation, communication, and rescue equipment. Implementing a rigorous maintenance schedule is equally important to ensure all fleet assets are in optimal

operational condition at all times. Furthermore, allocating resources for researching and adopting new technologies will further enhance operational efficiency, safety, and response capabilities during maritime emergencies.

6. Developing clear policies, guidelines, and standardized operating procedures (SOPs) is essential for ensuring consistency and effectiveness in maritime search and rescue operations. Regular reviews and updates of existing policies should be conducted to address current challenges and align with international best practices. Establishing SOPs that outline precise protocols for response, communication, coordination, and decision-making during emergencies will enhance operational efficiency and safety. Effective implementation of SOPs should be ensured through continuous training, drills, and evaluations, thereby increasing awareness among personnel about their importance in enhancing operational readiness and safety.

7. Future research should focus on the long-term impact of age and experience on performance in maritime search and rescue teams, explore gender dynamics in Coast Guard operations, integrate emerging technologies like AI and machine learning, and study climate change resilience in maritime safety and emergency response strategies. These studies aim to understand generational shifts, gender dynamics, and the effectiveness of adaptation measures in diverse environmental conditions.

Compliance with Ethical Standards

This study adhered to ethical standards, obtaining informed consent from all participants and ensuring their right to withdraw at any time. Anonymity and confidentiality were maintained to protect privacy, and personal identifiers were removed or coded. The well-being of the respondents was a primary concern, and procedures were conducted with respect for their rights and dignity. No conflict of interest existed, and plagiarism was avoided by properly citing sources and acknowledging previous research contributions. Bias in the interpretation of findings was meticulously avoided. Objective data analysis techniques and rigorous methodological standards were employed to ensure the validity and reliability of the results. The findings and conclusions were used for academic and research purposes, contributing to maritime training and safety knowledge.

Acknowledgments

The researcher extends heartfelt gratitude to the Dean of PMMA Graduate School, Prof. Ma. Nissa C. Espiritu, MSc, and esteemed panel members, namely CDR Victoria Q. Paraggua, PMMA, CG COMMO MITZIE SILVA-CAMPO PCG and Capt. Vicente Bryan P. Conde Jr., MMET. Their willingness to share their expertise and dedicate precious time to review, read, and correct this thesis paper is genuinely valued.

Furthermore, gratitude is extended to the PMMA Graduate School for authorizing the research and offering essential support.

The researcher expresses profound thanks to his adviser, Marianne G. Arias, Ph.D., for unwavering support throughout this endeavour.

Special appreciation is reserved for the study's respondents, who generously shared their knowledge and time, contributing significantly to the success of this research.

ASSESSMENT OF COMMUNITY-BASED TRAINING (CBT) GRADUATES AMONG TESDA TECHNOLOGY INSTITUTIONS IN MARINDUQUE FOR C.Y. 2018-2022

Liberty M. Musnit

Graduate School, Marinduque State University, Marinduque, Philippines

https://doi.org/10.5281/zenodo.11629246

ABSTRACT

Community-based training goes further than just mere skills training provision. This study aims to assess community-based (CBT) program graduates among TESDA Technology Institutions in Marinduque for C.Y. 2018 to 2022. Specifically, this aims to determine the employment background of the community-based training graduates; identify the relevance of the skills acquired from community-based training; enumerate the perceived suggestions of graduates and employers to enhance the program further, and propose interventions. The research used a mixed design with a validated research questionnaire administered to graduates using a systematized sampling. Results reveal that most CBT graduates are unemployed and most employed are in the government sector. The majority of the self-employed employees are engaged in the whole retail business sector while the main reason for unemployment is the lack of job opportunities. The skills acquired by the CBT graduates are relevant to their job while problem-solving and critical thinking skills can improve their relevance. The employers evaluated the attitude as the highest among the three (3) assessed parameters, leaving skills and knowledge. However, improvements can be made in the three (3) aspects of learning. Graduates and employers highly suggested interventions in three major areas - the curriculum, industry-related matters, and CBT enhancement through stakeholder engagement. The interventions suggested to address this study's key findings highlight the development of a career placement center in the institutions, collaboration of industry partners and local government, stakeholder engagement, increase of training hours, and development of a comprehensive job placement program.

Keywords: *Community-based training, employment, graduates, TESDA*

INTRODUCTION

Throughout history, Technical and Vocational Education and Training (TVET) has served as a crucial bridge between individuals and a fulfilling career path. By equipping young people and adults with the skills and knowledge they need, TVET empowers them to improve their quality of life (National Center for Education Statistics (2019). This transformative potential has garnered increasing global attention, particularly for its ability to boost the productivity and income of disadvantaged individuals, enhance employability, and open doors to new job opportunities (Orbeta & Esguerra, 2016; UNESCO, 2016).

Assessment of community-based training graduates of Technical and Vocational Education and Training (TVET) programs is crucial for understanding the impact and effectiveness of these initiatives. Evaluation helps assess the relevance of acquired skills, employability, and workforce contribution. It provides insights into program effectiveness, highlights areas for improvement, and guides curriculum development. Effective evaluation leads to better job market preparation, increased employment opportunities, and economic growth. Without evaluation, graduates may be ill-prepared, leading to skills mismatches and limited socio-economic development. Studying assessment is essential for enhancing TVET programs, benefiting graduates, industries, communities, and society (Tripney & Hombrados, 2013).

Community-based training programs focus on the needs of local communities, such as out-of-school youth, women, unemployed adults, marginalized populations, indigenous people, and informal sector members. TESDA provides technical assistance, including training modules, equipment, supplies, qualified trainers, venue approvals, competency assessments, and certifications. TESDA also monitors and evaluates programs, co-signs training certificates, and facilitates the provision of starter tool kits to graduates (Robinson, 2012).

Community-based TVET programs empower individuals and communities by providing accessible training opportunities. These programs, implemented in collaboration with local government units, NGOs, and community organizations, address specific skill requirements and enhance livelihood opportunities. Assessing graduates at the local level identifies community-specific needs, measures the impact on local economies, and evaluates the effectiveness of skill development initiatives in grassroots development.

The TESDA Women's Center Tracer Study by Ignacio and Tabu (2018) reveals that over half of employed TVET graduates work full-time in the formal sector, with hospitality, food service, and construction being major employment destinations. A separate study by Mariano & Tantoco (2023) found an even higher employment rate of 87.94% among TVET graduates.

Overall, community-based training in TESDA empowers local communities through accessible and tailored skill development programs, contributing to economic growth, self-sufficiency, and the well-being of individuals within these communities.

Researches has highlighted concerns about the current state of Work Readiness in TVET graduates. The Asian Development Bank (2021) and Fletcher (2012) underscore the critical role of job skills and Work Readiness in determining graduate success. However, studies like Wibowo and Saptono (2018) point out that some vocational high schools might not be fully equipped to nurture these qualities in their students.

Gaps in community-based training graduates contribute to low employment rates include skills mismatches, limited industry relevance, lack of soft skills, and limited access to job opportunities. Addressing these gaps requires aligning programs with industry needs, incorporating soft skills development, providing job placement services, fostering entrepreneurship, and addressing economic factors. Collaboration between stakeholders is crucial.

Research Questions

This study seeks to assess graduates of the Community-Based Training (CBT) Program from TESDA Technology Institutions in Marinduque for C.Y. 2018 – 2022. Specifically, this is sought to answer the following questions:

1. What is the employment background of the community-based training graduates in terms of:
    1.1 Employment Status
    1.2 Status of Employed Graduates
        1.2.1 Nature of Employment
        1.2.2 Employer Background/ Employment after Graduation
        1.2.3 Monthly Gross Income
    1.3 Entrepreneurial Status
        1.3.1 Nature of Business
        1.3.2 Length of Venturing into Business After Graduation
        1.3.3 Gross Income

2. What is the relevance of the skills acquired from community-based training to the graduates' current employment or entrepreneurial ventures?

3. How do employers assess the graduates of the community-based training in terms of:
    3.1 Knowledge
    3.2 Skills
    3.3 Attitudes

4. What are the graduates' and employers' suggestions to enhance TESDA community-based training programs in Marinduque?

METHODOLOGY

The study was mainly conducted in the province of Marinduque, specifically in the municipalities of Sta Cruz and Torrijos, where the selected TVET Institutions are located and CBT Programs are being implemented.

This study focused on graduates from two TESDA Technology Institutions (TTIs) in Marinduque who completed their training between 2018 and 2022, It employed a simple random sampling technique to choose a representative sample from this group. This method entails assigning a unique identification number to each eligible graduate and randomly selecting a set number of graduates for the study. By ensuring an equal opportunity for every graduate to be included in the sample, the study can effectively capture this specific cohort's unique perspectives and experiences. Utilizing simple random sampling minimizes bias and improves the applicability of the study findings to the wider population of graduates from these institutions within the specified timeframe. 304 respondents were selected from the 1440 graduates of the various programs.

Furthermore, the researcher also purposively and conveniently selected 15 TESDA industry partners who employed graduates of the CBT Program from TPSAT and BSAT from 2018 to 2022. This is to create further a relevant and accurate assessment of the graduates using the point of view of an employer.

In this study, the researcher used two self-made survey questionnaires explicitly designed for CBT graduates and the other for industry partners which was validated by the stakeholders (representatives from TESDA and specialist) The researcher also incorporated the TESDA tracer study questionnaire (2019) as a guide in drafting the self-made questionnaires as instruments for gathering the data needed in this study.

The data collection involved multiple methods. The researcher utilized survey questionnaires, which were distributed to respondents via Google Forms, and email. Additionally, the researcher personally visited the institutions to gather data by directly answering the questionnaires. Supplementary data gathering took place through the courtesy of the TESDA Technology Institutions in Marinduque, utilizing their existing database. Overall, the researcher obtained data from the TESDA Technology Institution database, conducted surveys through various means, and incorporated supplementary data from the TESDA Technology Institutions in Marinduque, thereby ensuring a comprehensive approach to gathering information on the community-based training graduates in the selected TESDA Schools.

The collected data underwent statistical analysis using standard statistical tools. The Likert scale was utilized for quantitative data to translate qualitative responses into numerical values.

RESULTS

Employment Background of the Community-Based Training Graduates

The different employment backgrounds of the Community-Based Training Graduates were gathered in this study and presented in the succeeding subsections.

Employment Status

Table 1 presents data on the employment status of individuals based on different programs. It shows the frequency and percentage of individuals employed, self-employed, and unemployed for each program.

Table 1. Employment Status of the Community-Based Training Graduates

PROGRAM	EMPLOYED		SELF EMPLOYED		UNEMPLOYED		Total	
	Freq	%age	Freq	%age	Freq	%age	Freq	%age
BPP NC II	0	0.00%	6	1.97%	10	3.29%	16	5.26%
CSS NC II	12	3.95%	4	1.32%	8	2.63%	24	7.89%
DomRAC NC II	2	0.66%	5	1.64%	8	2.63%	15	4.93%
DRIVING NC II	6	1.97%	1	0.33%	8	2.63%	15	4.93%
EIM NC II	0	0.00%	0	0.00%	16	5.26%	16	5.26%
EIM NC III	6	1.97%	4	1.32%	0	0.00%	10	3.29%
FOP NC II	0	0.00%	11	3.62%	12	3.95%	23	7.57%
GTAW NC II	8	2.63%	2	0.66%	11	3.62%	21	6.91%
OAP NC II	4	1.32%	7	2.30%	15	4.93%	26	8.55%
SMAW NC I	18	5.92%	8	2.63%	28	9.21%	54	17.76%
SMAW NC II	19	6.25%	5	1.64%	60	19.74%	84	27.63%
TOTAL	**75**	**24.67%**	**53**	**17.43%**	**176**	**57.89%**	**304**	**100.00%**

Out of the 304 individuals included in the analysis, 24.67% (75 individuals) are employed, 17.43% (53 individuals) are self-employed, and 57.89% (176 individuals) are unemployed. Some programs, such as SMAW NC II and SMAW NC I, have higher total counts, with 84 (72.63%) and 54 (17.76) individuals respectively. However, the majority of individuals within these programs are unemployed. This highlights the need to address graduates' employment challenges from these programs. It is encouraging that some individuals are self-employed, indicating their entrepreneurial endeavors. However, the overall percentage of self-employed individuals is relatively low compared to the unemployed population. Overall, the data is aligned to the study of the National Governors Association (2021) that efforts are needed to improve the employment outcomes for graduates across all programs. This could involve enhancing job placement services, fostering entrepreneurial skills, and addressing the factors contributing to the high unemployment rate among graduates.

Status of Employed Graduates

Table 2 shows the background of employed graduates in terms of the nature of employment.

Table 2. Nature of Employment of the Community-Based Training Graduates

Nature of Employment	Frequency	Percentage
Permanent	42	56.00%
Contractual	23	30.67%
Job Order	10	13.33%
Total	75	100.00%

It indicates that 56.00% of the employed graduates have permanent job positions. Graduates in permanent jobs usually have stability, benefits, and work security. It shows that a significant portion of workers have permanent jobs, which is encouraging for job security and professional advancement.

In terms of the nature of employment, contractual work makes up 30.67%. Contractual jobs often have a set duration and cannot provide the same security and perks as permanent work. The existence of contractual employment raises the possibility that businesses take advantage of this kind of labor for short-term or project-specific positions.

Furthermore, Job Order employment accounts for 13.33% of all employed graduates. Job order work is frequently project-based and transient, with employees hired for a particular assignment or duration. It shows a lower percentage of workers in contract and temporary positions than in permanent jobs.

In conclusion, majority of workers have permanent positions, indicating a stable workforce with long-term commitments. Contract and job order employment, however less in percentage, can provide organizations with flexibility for short-term needs.

Table 3 shows the employer background of the CBT graduates. The data on employer background reveals that private establishments, with a frequency of 44 and a percentage of 58.67%, have surpassed government employers, making them the predominant type of employer in the dataset.

Table 3. Employer Background of the Community-Based Training Graduates

Employer Background	Frequency	Percentage
Government	31	41.33%
Private Establishment	44	58.67%
Total	**75**	**100.00%**

The data presented in Table 3 indicates that private establishments are emerging as the predominant type of employer in the dataset. The higher frequency and percentage of private establishment employers compared to government employers indicate a growing reliance on the private sector for employment opportunities. This trend suggests a potential shift towards private sector job opportunities within the surveyed sample, reflecting the dynamic nature of the job market and the evolving balance between public

and private sector employment options. The data underscores the importance of monitoring these trends to understand the changing dynamics of the job market and the implications for individuals seeking employment in government and private establishments.

Table 3 shows the duration of employment of community-based training graduates after graduation. This data provides valuable insights into the timeline of employment outcomes for community-based training graduates, indicating varying durations for securing employment post-graduation. It underscores the importance of tracking and understanding the transition of graduates into the workforce to assess the effectiveness of the training programs and support services provided.

Table 4. Duration of Employment after Graduation

Employment After Graduation	Frequency	Percentage
Within 1 to 3 months	35	46.67%
Within 4 to 6 months	0	0.00%
After 6 months	5	6.67%
After 1 Year	31	41.33%
More than 2 Years	2	2.67%
No answer	2	2.67%
Total	**75**	**100.00%**

Most employed graduates, accounting for 46.67%, secured employment within the first three months after graduation. It indicates a fast transition from education to the workforce for a significant portion of the graduates. Finding employment within this timeframe is considered favorable as it reflects a proactive approach to entering the job market.

Almost 41.33% of graduates found employment within one year after completing their training. While not immediate, securing a job within the first year is still a positive outcome and suggests persistence in the job search process. This category represents a substantial portion of graduates who took a bit longer to enter the workforce but eventually found employment. A smaller percentage of 6.67% of graduates obtained employment after six months of graduation. This group may have faced challenges in finding suitable opportunities immediately after completing their studies. The delay in employment for this segment could be due to various factors such as market conditions or personal circumstances.

A very small percentage of graduates, 2.67% each, took more than two years to secure employment or did not respond. Graduates in these categories may have faced prolonged job search periods or chosen to pursue further education or other paths before entering the workforce. The data reflects a diverse timeline of employment outcomes for graduates, with varying durations to secure jobs after graduation.

Table 5 presents the monthly gross income of community-based training graduates. This data showcases the earnings of individuals who have completed community-based training programs. The table may provide insights into the income distribution among these graduates, highlighting the range of earnings they receive every month. Analyzing this data can offer valuable information on the financial outcomes of individuals who have undergone community-based training, shedding light on their economic status and potential financial stability.

Table 5. The *Monthly Gross Income of the CBT Graduates*

Initial Gross Income	Frequency	Percentage	Rank
Below 10,000	46	61.33%	1
Php 10,000 - Php20,000	4	5.33%	3
Php 20,000 - Php30000	25	33.33%	2
Total	75	100.00%	

The data revealed that the majority of employed graduates, accounting for 61.33%, reported an initial gross income below Php 10,000. This income range indicates entry-level positions or part-time jobs that may offer lower salaries. A significant portion of graduates starting with incomes below Php 10,000 suggests that many are beginning their careers in roles with limited earning potential.

The lowest percentage of 5.33% of graduates reported an initial gross income between Php 10,000 and Php 20,000. This income range likely represents slightly higher-paying entry-level positions or roles with additional responsibilities. The lowest percentage in this category suggests that only a few graduates started with incomes within this range.

Approximately 33.33% of employed graduates had an initial gross income in the range of Php 20,000 to Php 30,000. This income bracket may include mid-level positions or roles that require specific skills and experience. The presence of a significant percentage in this category indicates a notable portion of graduates start with relatively higher incomes compared to the other ranges.

The lowest percentage started with incomes between Php 10,000 and Php 20,000, while a significant portion fell in the Php 20,000 to Php 30,000 range, indicating a mix of salary levels among the employed graduates.

Status of Self-Employed Graduates

Table 6 provides details on the various industries or sectors in which self-employed community-based training graduates have established their businesses. The purpose of this data is to showcase the diversity of entrepreneurial ventures and provide insights into the range of industries that these graduates are contributing to through their self-employment.

Table 6. The Type of Business of the Self-Employed CBT Graduates

Nature of Business	Frequency	Percentage
Seller	29	54.72%
Baker	3	5.66%
Computer Shop	3	5.66%
Butterfly Breeder	2	3.77%
Electrician	1	1.89%
Plumber	1	1.89%
Glass Installer	1	1.89%
Tricycle Driver	3	5.66%
Rider	3	5.66%
Welder	7	13.21%
Total	**53**	100.00%

With a frequency of 29 and a percentage of 54.72%, sellers constitute the largest group among self-employed CBT graduates. This indicates that a significant majority of CBT graduates have chosen entrepreneurship in selling goods or services as their business venture.

Both bakers and computer shop owners have a frequency of 3 and a percentage of 5.66% each. It suggests that a smaller proportion of CBT graduates are engaged in baking and managing computer shops as their self-employment choices.

The data reveals that the most common type of business among self-employed CBT graduates is selling, indicating a preference for entrepreneurial activities related to retail or service provision. The presence of bakers and computer shop owners, though in smaller numbers, showcases a diversity of business interests within the CBT graduate community.

It is interesting to note the mix of traditional (baker) and modern (computer shop) business types among these graduates, reflecting their adaptability and versatility in exploring different sectors.

Table 7 regarding the length of venturing of CBT graduates into business. However, based on the table's description, it likely provides information on the duration or length of time that CBT graduates have been involved in their business ventures. This data can suggest insights into the stability and longevity of their entrepreneurial endeavors, indicating whether they have recently started their businesses or have been operating them for an extended period.

Table 7. Length of Venturing of CBT Graduates into Business

Length of Venturing into Business After Graduation	Frequency	Percentage
Within 1 to 3 months	37	69.81%
Within 4 to 6 months	0	0.00%
After 6 months	1	1.89%
After 1 year	15	28.30%
more than 2 years	0	0.00%
no answer	0	0.00%
Total	**53**	**100.00%**

Most self-employed graduates, accounting for 69.81%, started their businesses within the first three months after graduation. This indicates a proactive approach towards entrepreneurship immediately after completing their studies.

Both categories have zero frequency, meaning no graduates ventured into business after 6 months or more than two years post-graduation. This suggests a trend towards quicker entry into entrepreneurship among the surveyed graduates. The low percentages for starting businesses after 6 months or more than two years suggest that most graduates prefer to kickstart their entrepreneurial journeys promptly after completing their studies. The low percentages for starting businesses after 6 months or more than two years suggest that most graduates prefer to kickstart their entrepreneurial journeys promptly after completing their studies.

A significant proportion, 28.30%, of graduates started their businesses after the first year of completing their studies. This group represents those who took a slightly longer time to establish their entrepreneurial endeavors. The data indicates a sense of urgency and readiness among most graduates to start their businesses shortly after graduation, with nearly 70% launching their ventures within the first three months.

The group that started businesses after one year reflects a smaller but notable portion of graduates who may have taken additional time for planning, preparation, or other personal reasons before entering into self-employment.

Table 8 presents data on the monthly gross income of self-employed CBT graduates. This table provides information on the earnings or income that these graduates generate from their entrepreneurial ventures every month.

Table 8. Monthly Gross Income of Self-employed CBT graduates

Monthly Gross Income	Frequency	Percent
Below Php 10,000	45	84.91%
Php 10, 000 - 20,000	8	15.09%
Php 20,000 - 30,000	0	0.00%
Total	**53**	**100.00%**

The majority of graduates, accounting for 84.91%, have a monthly gross income below Php 10,000. This indicates that a significant portion of these entrepreneurs are currently earning below this threshold. The data reveals that a significant majority of graduates earn below Php 10,000 monthly from their businesses, highlighting the financial challenges or early stages of development faced by these entrepreneurs.

A smaller proportion, 15.09%, of graduates fall within the income range of Php 10,000 to 20,000 per month. This group represents those who have managed to achieve a slightly higher level of income from their businesses. The presence of a smaller group earning between Php 10,000 - 20,000 suggests a segment of entrepreneurs who have managed to increase their monthly income slightly above the initial threshold.

Interestingly, there are no graduates in the income bracket of Php 20,000 to 30,000 per month, indicating that none of the surveyed individuals currently fall within this income range. The absence of graduates earning between Php 20,000 to 30,000 indicates a gap in income distribution, with none of the surveyed individuals currently reaching this income level.

Unemployed

Table 9 shows the years of being unemployed of the community-based training graduates. This data can give insights into the length of time individuals remain unemployed.

Table 9 Years of being unemployed after the training

Years of being unemployed after the training	Frequency	Percentage
After 1 year	30	17.05%
More than 2 years	146	82.95%
Total	**176**	**100%**

The data presented reveals how individuals are distributed based on the length of unemployment after the training. Out of the total 176 graduates, 30 people (17.05%) were unemployed after one year of training, while 146 people (82.95%) remained unemployed for more than two years. This data highlights a larger percentage of individuals (82.95%) facing long-term unemployment compared to those who were unemployed for just one year (17.05%).

The breakdown of percentages provides perceptions of the duration of unemployment following training, indicating a significant proportion of individuals experiencing prolonged unemployment. This information could have implications for evaluating the effectiveness of training programs and understanding the job market conditions. Table 10 shows the reasons for being unemployed of the community-based training graduates.

Table 11. Reasons for being Unemployed of CBT graduates

Reasons for being unemployed	Frequency	Percentage
Job Mismatch	63	35.80%
Financial	41	23.30%
Lacks of Job Opportunity	62	35.23%
Lack of Knowledge and Skills	10	5.68%
Total	**176**	**100%**

Job Mismatch, which explains 35.80% of the reasons why CBT graduates are unemployed, suggests that a sizable portion of the population is unemployed as a result of their inability to locate employment that is a good fit for their qualifications and skill set. This problem arises from a mismatch between the talents they learned in school and what skills employers are looking for.

Lack of Job Opportunities comes in second at 35.23%, indicating that many CBT graduates have trouble finding work because there aren't many positions available in their sector. This challenge could be impacted by particular problems in the CBT sector or by more general economic considerations.

Among CBT graduates, financial challenges rank third in terms of the reasons for unemployment (23.30%). This implies that a significant portion of the population is unemployed as a result of the work options that are accessible to them not offering adequate financial security or pay.

Finally, with a proportion of 5.68%, Lack of Knowledge and Skills continues to be a major cause of unemployment among CBT graduates. This suggests that a tiny percentage of people might not have the fundamental abilities and information that companies demand, which could harm their chances of finding employment. In conclusion, the data suggests that lack of work possibilities and job mismatch are the main causes of unemployment among CBT graduates, followed by financial limitations and skill gaps. To improve the employment chances of CBT graduates, addressing these difficulties may entail improving career guidance, bridging the gap between education and industry needs, and offering support for skill development and job placement programs.

Relevance of Skills Acquired

Table 11 shows the skills learned by graduates at community-based training programs can vary depending on the specific program and its focus. However,

community-based training programs often aim to equip individuals with practical and employable skills that are relevant to the needs of their local communities. It provides information on the competencies of employed, self-employed, and unemployed individuals, along with their corresponding mean scores and interpretations.

Table 11. Skills Learned of Graduates at Community-Based Training

Competencies	Employed		Self-Employed		Unemployed	
	Mean	**Interpretation**	**Mean**	**Interpretation**	**Mean**	**Interpretation**
Skills	3.1	Moderately Relevant	1.71	Less Relevant	2	Less Relevant
Technical Skills	3.03	Moderately Relevant	2.21	Moderately Relevant	1.23	Less Relevant
Communication Skills	3.26	Moderately Relevant	2.49	Moderately Relevant	1.3	Less Relevant
Entrepreneurial Skills	2.58	Moderately Relevant	2.9	Moderately Relevant	1.71	Less Relevant
Computer Skills	2.77	Moderately Relevant	2.97	Moderately Relevant	1.25	Less Relevant
Problem-Solving Skills	3.2	Moderately Relevant	2.55	Moderately Relevant	1.12	Less Relevant
Critical Thinking Skills	2.58	Moderately Relevant	2.21	Moderately Relevant	211	Less Relevant
Total Mean	**2.93**	**Moderately Relevant**	**2.43**	**Moderately Relevant**	**1.53**	**Less Relevant**

The mean score for skills is 3.1, indicating that employed individuals perceive their skills as moderately relevant. Self-employed individuals, on the other hand, have a lower mean score of 1.71, suggesting that they perceive their skills as less relevant. Unemployed individuals also have a lower mean score of 2, indicating that they perceive their skills as less relevant as well.

Employed individuals have a mean score of 3.03, indicating that they perceive their technical skills as moderately relevant. Self-employed individuals have a slightly higher mean score of 2.21, suggesting that they also perceive their technical skills as moderately relevant. Unemployed individuals, however, have the lowest mean score of 1.23, indicating that they perceive their technical skills as less relevant.

Employed individuals have a mean score of 3.26, indicating that they perceive their communication skills as moderately relevant. Self-employed individuals also have a moderately relevant mean score of 2.49 for communication skills. Unemployed individuals have the lowest mean score of 1.3, suggesting that they perceive their communication skills as less relevant.

Employed individuals have a mean score of 2.58 for entrepreneurial skills, indicating that they perceive these skills as moderately relevant. Self-employed individuals have a slightly higher mean score of 2.9, suggesting a similar perception of moderately relevant entrepreneurial skills. Unemployed individuals have a lower mean score of 1.71, indicating that they perceive entrepreneurial skills as less relevant.

Employed individuals have a mean score of 2.77 for computer skills, indicating that they perceive these skills as moderately relevant. Self-employed individuals have a slightly higher mean score of 2.97, suggesting a similar perception of moderately relevant computer skills. Unemployed individuals have the lowest mean score of 1.25, indicating that they perceive computer skills as less relevant.

Employed individuals have a mean score of 3.2 for problem-solving skills, indicating that they perceive these skills as moderately relevant. Self-employed individuals have a slightly lower mean score of 2.55, suggesting a similar perception of moderately relevant problem-solving skills. Unemployed individuals have the lowest mean score of 1.12, indicating that they perceive problem-solving skills as less relevant.

Employed individuals have a mean score of 2.58 for critical thinking skills, indicating that they perceive these skills as moderately relevant. Self-employed individuals have a slightly higher mean score of 2.21, suggesting a similar perception of moderately relevant critical thinking skills. Unfortunately, the value of 211 for unemployed individuals seems to be an error and cannot be interpreted.

Overall, the total mean score for competencies is 2.93 for employed individuals, 2.43 for self-employed individuals, and 1.53 for unemployed individuals. This suggests that employed and self-employed individuals perceive their competencies as moderately relevant, while unemployed individuals perceive their competencies as less relevant. These findings highlight the importance of skills and competencies in employment and entrepreneurship, and the potential impact they can have on individuals' employment outcomes.

Employers Assessment of the Graduates of the CBT

Table 12 regarding the assessment of graduates from a Community-Based Training (CBT) program based on their Knowledge, Skills, and Attitude. The assessment of graduates from a CBT program is based on their knowledge, skills, and attitude, it is common for such assessments to involve evaluating the theoretical knowledge acquired, practical skills developed, and the overall attitude and mindset of the graduates.

Table 12. Assessment of CBT graduates in terms of Knowledge, Skills, and Attitude

Competencies	Mean Score	Description
Knowledge	1.99	Agree
Skills	2.11	Agree
Attitude	1.92	Agree
Total Mean	**2.01**	**Agree**

Employers mostly agree that graduates of the Community-Based Training program know relevant to their field, as indicated by the mean score of 1.99. This implies that the graduates have a firm knowledge of the ideas and guidelines covered in their course. Employers agree that graduates of the Community-Based Training program exhibit the necessary abilities to succeed in their roles, with a mean score of 2.11. This could include useful talents like project management, community involvement, and other qualities unique to community-based work.

The mean score of 1.92 indicates that employers agree that graduates exhibit positive attitudes toward their work within community settings. This may include attributes

like teamwork, cultural sensitivity, empathy, and a dedication to serving the community effectively.

The total mean score of 2.01 suggests an overall agreement among employers regarding the competencies of graduates from the Community-Based Training program in terms of Knowledge, Skills, and Attitude. This indicates that employers perceive these graduates as well-prepared and capable of contributing positively to community-based initiatives.

Graduates and Employers' Suggestions to Further Enhance TESDA Community-based Training Programs in Marinduque.

Table 13 shows the summary of suggestions of the respondents to enhance the CBT program. The summary of suggestions provided by respondents can offer valuable insights into areas for improvement and enhancement of the CBT program. The three general categories are industry-related, curriculum-related, and overall CBT enhancement. These are comprehensively discussed as follows.

Table 13. Summary of Suggestions of the Respondents

	Summary of Suggestions to Enhance CBT
Industry-Related Suggestions	Employment Opportunities Regularly update program offerings to match local job market demands. Integrate emerging and advanced technologies in training to make graduates more competitive. Conduct of Trade-Matching and Placement Services
Curriculum Related Concerns	Additional trained experts Additional training days Conducive Environment Advanced Equipment
CBT Enhancement	Collaboration of stakeholders and the local government unit Availability of the Program for each municipality

For Industry-Related Suggestions it highlights, regularly update program offerings to match local job market demands, which emphasizes the need for vocational education programs to be responsive to the changing needs of the workforce; integrate emerging and advanced technologies in training to make graduates more competitive, which highlights the importance of preparing workers for the Fourth Industrial Revolution by equipping them with the skills and knowledge needed to operate in a technologically advanced world and conduct trade-matching and placement services to connect graduates with potential employers, which emphasizes the need for stronger partnerships between vocational education programs and employers to ensure that graduates have the skills needed to succeed in the workplace.

For Curriculum-Related Concerns it was suggested to hire additional trained experts to ensure that the curriculum is up-to-date and high quality. Second, increase the number of training days to give students more time to develop their skills and knowledge. For conducive environment, it was suggested to create a supportive and inclusive learning environment that encourages students to succeed and provide students with access to advanced equipment and technology to prepare them for the demands of the workplace.

Lastly in enhancing CBT Enhancement it was recommended to collaborate with stakeholders and the local government unit to ensure that the CBT program is aligned with the needs of the community and industry and make the CBT program available to students in all municipalities to ensure that all students have access to quality vocational education.

Proposal to Enhance TESDA's Community-based Training Program

Table 14 shows the suggested key interventions to enhance the CBT program. The interventions focus on key steps that would enhance not just the instruction process but the employment of the CBT graduates and are discussed as follows:

Establish a formal collaboration between the CBT institution and local stakeholders, including employers, government agencies, and community organizations: This collaboration can help to ensure that the CBT program is aligned with the needs of the community and industry.

Table 14. Matrix Summary of the Research Key Findings, Implications, and Suggested Interventions

Objective of the study	Key Findings	Implications	Suggested Intervention
Employment background of the community-based training graduates	34.09% of the CBT graduates are unemployed, 25.33% are employed, and 9.43% are self-employed.	There is a high unemployment rate among	**CBT Program Enhancement Key Steps** 1 Establish a formal collaboration between the CBT institution and
Relevance of the skills acquired from community-based training to the graduates' current employment or entrepreneurial venture	For employed graduates of CBT, Communication skills are the most important skill, with a mean score of 3.26% and an interpretation of "Moderately Relevant." Entrepreneurial, Critical thinking skills and computer skills are the fifth and sixth most important skills, respectively, with mean scores of 2.58% and	Problem-solving skills and critical must be Provide the CBT graduates with participate in development programs to	employers, government agencies, and community organizations. 2 Establishment of Industry Partners and Linkages 3 Increase the number of training days to give students more time to develop their skills and knowledge. 4 Develop a comprehensive job placement program. 5 Integrate industry-based certifications into the CBT program.

	2.77% and interpretations of "Moderately Relevant." For self-employed Computer, skills are the most important skill with a mean score of 2.97 and an interpretation of "Moderately Relevant. For the unemployed Critical-Thinking Skills are the most important with a mean score of 2.11 with an interpretation of' Less Relevant".	enhance their knowledge and skills in specific areas, such as communication, information gathering, and problem-solving.	6. Establish partnerships with local employers to develop a curriculum that aligns with industry needs. 7. Continuously evaluate and improve the CBT program based on feedback from stakeholders.
Employers' assessment of the graduates of the community-based training	The overall interpretation suggests that, on average, the individuals being assessed are perceived to be moderately knowledgeable in both their knowledge and skills. Additionally, they are viewed as having a moderately acceptable attitude.	The attitude, skills, and knowledge can be increased. Provide the CBT graduates with opportunities to participate in training and development programs to enhance their knowledge and skills in specific areas, such as communication, information gathering, and problem-solving.	
Graduates and employers perceived suggestions.	The suggestions' three (3) general themes are industry-related, curriculum-related, and overall CBT enhancement.	Employment opportunities, curriculum, and the overall CBT needs improvement.	

Establish partnerships with local employers to develop a curriculum that aligns with industry needs. This can be achieved through advisory boards, internships, and joint training programs.

1. Integrate industry-based certifications into the CBT program so that students with recognized credentials can enhance their employability.
2. Integrate industry-based certifications into the CBT program. This will provide students with recognized credentials that can enhance their employability.

3. Increase the number of training days to give students more time to develop their skills and knowledge: This could be done by extending the length of the program or offering more intensive training sessions.
4. Establish a formal collaboration between the CBT institution and local stakeholders, including employers, government agencies, and community organizations: This collaboration can help to ensure that the CBT program is aligned with the needs of the community and industry.
5. Develop a comprehensive job placement program: This program should include career counseling, resume writing workshops, and job fairs to connect graduates with potential employers.

Table 15 presents a comprehensive set of interventions to enhance the Community-Based Training (CBT) program. These interventions address key aspects of the program, including stakeholder collaboration, industry linkages, training duration, job placement, curriculum alignment, and continuous evaluation.

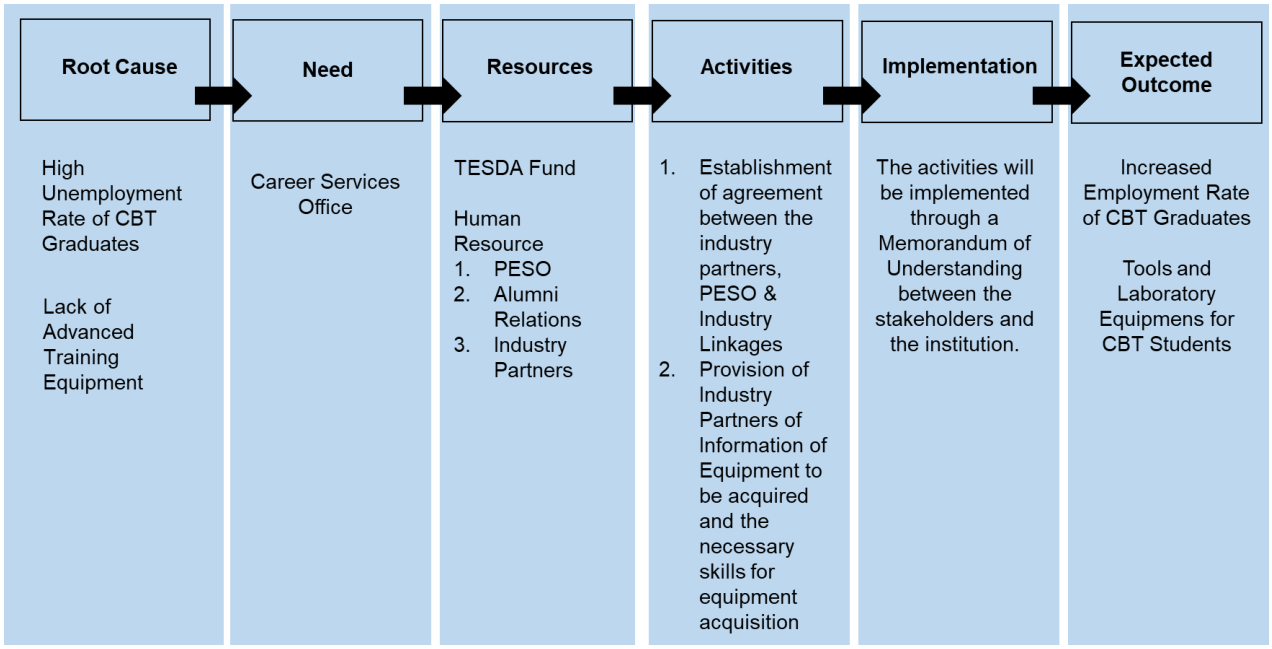
Table 16. Key Steps in Implementing CBT Program Enhancement

Suggested Intervention	Key Steps to Implement
Establish a Formal Collaboration between the CBT Institution and Local Stakeholders	• Identify and engage with key stakeholders, including employers, government agencies, and community organizations. • Form a formal advisory board or committee to provide ongoing feedback and guidance. • Establish regular communication channels to share information and collaborate on program development.
Establishment of Industry Partners and Linkages	• Develop partnerships with local employers to offer internships, apprenticeships, and job shadowing opportunities. • Collaborate with industry associations to participate in industry events, conferences, and workshops. • Encourage students to network with industry professionals through professional organizations and online platforms.
Increase the Number of Training Days to Provide Students with More Time to Develop Their Skills and Knowledge	• Extend the length of the CBT program to provide more in-depth training. • Offer additional training modules or workshops to cover specific skills and knowledge areas. • Utilize blended learning approaches to combine traditional instruction with online learning opportunities.
Develop a Comprehensive Job Placement Program	• Establish a dedicated career services office to provide individualized job placement assistance. • Offer career counseling and resume writing workshops to prepare students for the job search. • Organize job fairs and networking events to connect students with potential employers. • Maintain a database of employment opportunities and internships for CBT graduates.
Integrate Industry-Based Certifications into the CBT Program	• Identify industry-recognized certifications that align with the CBT program's learning outcomes. • Partner with certification providers to offer on-site or online training and testing. • Incorporate certification preparation into the CBT curriculum. • Provide financial assistance to students pursuing industry-based certifications.
Establish Partnerships with Local Employers to Develop a Curriculum that Aligns with Industry Needs	• Conduct regular needs assessments with local employers to identify skill and knowledge gaps.

	• Incorporate employer feedback into the design and development of the CBT curriculum. • Invite industry experts to guest lecture and participate in curriculum reviews. • Utilize industry-based textbooks and learning materials.
Continuously Evaluate and Improve the CBT Program Based on Feedback from Stakeholders	• Collect feedback from students, employers, and community stakeholders through surveys, interviews, and focus groups. • Analyze feedback data to identify areas for improvement. • Develop an action plan to address identified issues and implement necessary changes. • Regularly review and update the CBT program based on ongoing feedback and evaluation.

Establishing a formal collaboration between the CBT institution and local stakeholders is crucial for aligning the program with community and industry needs. The key steps outlined, such as identifying stakeholders, forming an advisory board, and establishing communication channels, provide a structured approach to fostering collaboration.

Developing partnerships with local employers and industry associations provide students with valuable opportunities for internships, networking, and exposure to industry trends. The key steps emphasize engaging with industry partners, encouraging student involvement, and collaborating on events and workshops.



Extending the CBT program's duration or offering additional training modules allows students to develop their skills and knowledge more in-depth. The key steps suggest incorporating blended learning approaches to combine traditional instruction with online learning, catering to diverse learning styles. A dedicated career services office, job search preparation workshops, job fairs, and an internship database provide comprehensive job placement support for CBT graduates. These key steps emphasize individualized assistance, networking opportunities, and access to employment resources. Integrating industry-recognized certifications into the CBT program enhances graduates' employability and aligns their skills with industry standards. The key steps involve identifying relevant certifications, partnering with certification providers, incorporating preparation into the curriculum, and providing financial assistance. Regular needs assessments, employer feedback incorporation, industry expert involvement, and utilization of industry-based materials ensure that the CBT curriculum remains relevant and responsive to industry demands. These key steps emphasize ongoing assessment and adaptation. Collecting feedback from stakeholders, analyzing data to identify areas for improvement, developing action plans, and regularly reviewing the program based on feedback are essential for continuous improvement. These key steps emphasize a data-driven and stakeholder-oriented approach to program enhancement.

These findings provides a comprehensive and well-structured set of interventions and key steps that address various aspects of the CBT program as discussed by Noe *et al* (2013) and Nunjana (2022). By implementing these interventions effectively, the CBT institution can significantly enhance the program's quality, relevance, and impact on student success and community development.

Implementation of the CBT Program Enhancement

The implementation of the interventions being proposed is suggested to be accomplished following the Theory of Change Framework as shown in Figure 1.

Figure 1. The Proposed Implementation of the Intervention

As shown in Figure 1, the intervention aims to enhance the employment prospects of CBT graduates by expanding the range and quality of career services available to them.

By implementing these career services and support initiatives, the intervention aims to empower CBT graduates with the resources, guidance, and opportunities needed to secure meaningful employment and advance their careers. It underscores the importance of holistic support in facilitating successful transitions from training programs to the workforce.

Overall, the proposed implementation of the Intervention has the potential to be a successful way to increase the employment rate of CBT graduates. By providing CBT students and graduates with the skills and knowledge they need to be successful in the workforce and with opportunities to network with potential employers, this Intervention can help CBT graduates achieve their employment goals. The institution should develop a strong alumni relations program. This program can connect CBT graduates with potential employers and provide them with support and guidance throughout their careers. The institution should work with the government to develop policies supporting CBT graduates' employment. For example, the government could provide tax breaks to companies that hire CBT graduates or create apprenticeship programs for CBT graduates. The institution should also work with other educational institutions to develop

joint programs that will provide CBT graduates with the skills and knowledge they need to succeed in the workforce.

By taking these additional steps, the institution can further increase the employment rate of CBT graduates and help them to achieve their full potential.

DISCUSSION

This study investigated the employment situation of graduates from two technical schools in the Philippines (BSAT and TPSAT) focusing on those who completed the qualifications in BSAT and TPSAT programs. The researchers wanted to understand why some graduates struggled to find jobs. They also explored what the schools were doing to address these challenges.

The study used surveys to gather information from graduates and employers. Over 300 graduates from 2018 to 2022 participated in the survey. The findings showed that more than half of the graduates were unemployed, with job mismatch and lack of opportunities being the main reasons. Interestingly, a significant portion (around 28%) were self-employed, often running businesses related to sales, baking, or computers.

The employed graduates felt their technical, communication, and problem-solving skills were moderately relevant to their jobs. Self-employed graduates found entrepreneurial skills to be most important. Unemployed graduates, however, felt their technical, communication, and computer skills were not very relevant to the jobs they were seeking. Employers generally agreed that the graduates had the necessary knowledge, skills, and attitude but there was room for improvement. Stakeholders suggested a few improvements for the schools, including updating programs to reflect current industry needs, incorporating new technologies, and providing job placement services. Additionally, stakeholders recommended changes to the curriculum, such as extending training periods, providing better equipment, and creating a more favorable learning environment. Finally, there were suggestions to strengthen collaboration with industry partners and to make the programs more accessible to potential students.

Conclusions

1. The high unemployment rate among CBT graduates indicates a need to better align the program with industry demands.
2. Graduates' perceptions of skill relevance vary based on their employment status, suggesting the need for customized training.
3. Employers generally view CBT graduates positively, but there is room for improvement in their knowledge, skills, and attitudes. Stakeholders provide valuable suggestions to enhance the CBT program in various areas.
4. Stakeholders recommended changes to the curriculum, such as extending training periods, providing better equipment, and creating a more favorable learning environment. Finally, there were suggestions to strengthen

collaboration with industry partners and to make the programs more accessible to potential students.

Recommendations

Based from the findings of this study, the following recommendations are hereby presented:

1. Establish formal collaborations between the CBT institution and local stakeholders to ensure program alignment with community and industry needs.
2. Develop partnerships with local employers to incorporate their feedback into the CBT curriculum and provide students with industry experience**.**
3. Increase the number of training days and integrate industry-based certifications to enhance students' skills and knowledge.
4. Implement a comprehensive job placement program to connect graduates with employment opportunities.
5. Continuously evaluate and improve the CBT program based on feedback from stakeholders.
6. Integrate entrepreneurship, bookkeeping, and soft skills into the Senior High School curriculum to better prepare students for the CBT program.
7. Develop a strong alumni relations program and collaborate with the government to support the employment of CBT graduates.

Compliance with Ethical Standards

To ensure ethical practices, participant received a clear and comprehensive informed consent form explaining the study's purpose, data collection methods, potential risks and benefits, and their right to withdraw at any time. They Participants were explicitly informed of this right and provided with a clear and easy process for withdrawing. Data collection instruments were designed to avoid collecting any personally identifiable information. Any identifying information collected was securely stored and destroyed after analysis to ensure participant confidentiality. The research design minimized potential risks, and mitigation strategies were implemented for any identified psychological or emotional concerns. Participants were also informed of their right to seek support or counseling if needed. Researchers declared any potential conflicts of interest before commencing the study, ensuring objectivity and preventing personal biases from influencing the research.

All sources of information were properly cited and referenced throughout the research process, upholding academic integrity and respecting the intellectual property of others. All printed data were safeguarded and kept in secured cases while digital copies

were secured with passwords. Researchers were mindful of their own biases and took steps to mitigate them during data collection and analysis. Statistician and subject matter experts were consulted. The research design was also structured to minimize bias and ensure the validity of the results. Finally, the results was used purely for research purposes. The data was not used for any commercial or personal gain, solely for the advancement of knowledge in the field.

Acknowledgments

The researcher want to express my sincere gratitude to the following people and institutions for their support and guidance throughout this research:

Julieta Q. Nabos, PhD, for the guidance, mentorship, and encouragement. I am grateful for your patience and support and for always believing in me.

Nelson Rufino M. Montejo, M.A Ed., for her help with the preparation of the questionnaire and proposed data-gathering procedures. I appreciate your expertise and willingness to share your knowledge with me.

Engr. Joey M. Morales, for his assistance with this research;

Ms. Cherie Ann M. Luna, MAEd, for refining the grammatical structure of the work;

The Graduate School Librarian, for providing the researcher with a set of valuable references;

The TESDA PO Marinduque, for providing the necessary data needed in the study.

Mr. Jezreel R. Ferrer, Ms. Ma. Teresita A. Ferrer, Mr. Olimpio Pacheco, and Ms. Ethel M. Malinao, for validating the questionnaire of the researcher;

To always very supportive personnel of BSAT and TPSAT, who offered their time and skills to finish this research.

To the respondents, for spending their valuable time filling out the questionnaires; MUSNIT Family, her supportive family whose words of encouragement made her pursue this study.

The MSC Graduate School, for providing me with the opportunity to pursue my graduate studies and for providing me with the resources and support I needed to complete this research.

Almighty God, for your blessings and guidance throughout this journey.

ASSESSMENT OF THE THREE PILLARS OF THE COMPREHENSIVE DISASTER RISK REDUCTION MANAGEMENT IN BASIC EDUCATION

Alvin Jowell Fernandez Nadal

Pao-o Annex Elementary School, Santa Maria, Laguna, Philippines
Laguna State Polytechnic University, Siniloan, Laguna, Philippines

https://doi.org/10.5281/zenodo.12740267

ABSTRACT

Disasters are inevitable, but their scope and magnitude are often magnified due to unsustainable development that has not considered the possible hazard impacts in a particular location. Compliance with DRRM should be identified as one of the primary concerns of any school to prepare necessary precautionary measures in the occurrence of natural and even human-caused calamities. This study entitled “Assessment of the Three Pillars of the Comprehensive Disaster Risk Reduction Management in Basic Education” sought to establish significant relationships between the knowledge, skills, and attitudes of the teacher respondents, as well as with the school profile of the 48 participating schools using Chi-Square Test. Best Practices for the implementation of the DRRM activities were also analyzed. The test of hypotheses conducted in this study has recognized the significant relationship between variables that are notably important to the teachers, schools, pillars of the DRRM, and most importantly, to the learners. The study's results displayed a significant relationship between the teachers' attitudes, together with the enrollment profile, and the extent of the level of implementation of the three pillars of comprehensive DRRM in Basic Education. Having a high score on the CFSS also significantly correlates with the three pillars of comprehensive DRRM in Basic Education.

Keywords: *Disaster risk reduction management, hazard, resilience, Philippines, community involvement*

INTRODUCTION

The world has experienced increased exposure to risks and hazards of climate-related and human-made disasters that threaten lives and sustainable development efforts (Lopez et al., 2018). In the study of Manalo (2019), the situation needs attention. Therefore, disaster capacity and mitigation efforts can be formulated to reduce population exposure and vulnerability in international and local settings. Disasters are inevitable, but their scope and magnitude are often magnified due to unsustainable development that has not considered the possible hazard impacts in a particular location. The effects of such can be minimized if the population has a better understanding of locally experienced hazards and implements corresponding preventive or mitigating measures.

Disasters, with their potential to cause deaths and severe societal disruptions, necessitate the global community to take decisive actions to address and reduce their impacts. In recognition of this, the Philippine government, through the Disaster Risk Reduction Management Act of 2010, has mandated the integration of disaster risk reduction into the school curriculum. This initiative aims to enhance the awareness and practice of personnel and students in calamity preparedness (Ventura & Madrigal, 2020).

The Philippines, with its high exposure to natural hazards and limited resources for managing them, faces a critical need for accurate forecasts and evidence-based allocation of available funding for disaster preparedness and relief. In this context, Disaster Risk Managers play a pivotal role. A survey conducted in 2016–2017 revealed significant disparities in how Managers perceive risk and their levels of preparedness across the country, influenced by varying storm impacts since 2009. To facilitate effective policymaking, the collection of more comprehensive and up-to-date data is imperative (Brucal et al., 2020).

In the Philippines, an earthquake happened which disrupted Education throughout the Bohol Region. The damage to education infrastructure was extensive, based on the Bohol Earthquake Action Plan (2013). Multiple schools were rendered unusable because of damage, and some are due to prolonged use as shelters.

As cited by Benson (2016), in the event of a disaster causes significant financing gaps in many developing countries. It means the economy may fall back instead on reallocating planned capital and recurrent spending to meet more immediate post-disaster spending requirements and often redirect capital budgets over the years. Unsafe schools will continue to betray the trust and hope that is placed in them unless schools are conscious and proactive. Learners will get injured and drop out of schools in vast numbers unless the responsibility is jointly taken to make them safe. School's Disaster Risk Reduction Management (DRRM) program implementation has a more significant favorable influence on the lives of the learners (Bello, 2020). Natural disasters have increased dramatically in frequency and intensity (Kron, 2015).

In this research, the author aims to assess the level of implementation of the three pillars of disaster risk reduction management in basic education in the District of Santa Maria as per DO 37, s. 2015. Compliance with DRRM should be identified as one of the primary concerns of any school to prepare necessary preventive measures in the occurrence of natural and even human-caused calamities.

Research Questions

1. What is the profile of the school, in terms of location, enrollment, position of school head, position of coordinator, school-based management level and child friendly school survey level?
2. What is the level of knowledge, skills, and attitudes of teachers on the three pillars of comprehensive DRRM in basic education?
3. What is the extent of implementation of the three pillars of the comprehensive DRRM in Basic Education, in terms of?
    3.1 Safe Learning Facilities?
    3.2 School Disaster Management?
    3.3 Risk Reduction and Resilience Education?
4. Is there a significant relationship between the level of knowledge, skills, and attitudes of teachers on the three pillars of comprehensive DRRM in basic education and the extent of implementation of the three pillars of comprehensive DRRM in Basic Education?
5. Is there a significant relationship between the profile of the school and level of knowledge, skills, and attitudes of teachers on the three pillars of comprehensive DRRM in basic education?
6. Is there a significant relationship between the profile of the school and the extent of implementation of the three pillars of the comprehensive DRRM in Basic Education?
7. What are the common and best practices of elementary and secondary schools with regard with the implementation of the three pillars of the comprehensive DRRM in basic Education?

METHODOLOGY

Research Design

This research used descriptive evaluative design. A descriptive evaluative research design is a methodological approach that aims to gather information about prevailing conditions or situations for the purpose of description and interpretation (Fikri et al., 2021).

This method was used to describe and analyze the data on the implementations of DRRM in Basic Education for this study.

Sampling Technique

According to Kang's study (2021), G*Power is a tool for computing statistical power analyses for many different t-tests, F-tests, Chi- squared tests, z-tests and some exact tests. This was used to determine the samples which will be used for the quantitative part of the study.

Purposive sampling was used. A purposive sample is the one whose characteristics are defined for a purpose that is relevant to the study (Andrade, 2021). The main purpose is to gather information by surveying the DRRM coordinators and their school heads of each school in the District of Santa Maria. There were 48 respondents in total.

Research Instrument

The researcher used a questionnaire approved and content validated by the defense panel. Validation of the questionnaire was made to secure the reliability and dependability of the questions as per suggestions and corrections made by the members of the panel. The questionnaire that was used in gathering data was divided into two parts. The first part includes the profile of the school as per the data available in the school reports. It specifically includes name of the school, location, enrollment, position of the school head, position of the school DRRM coordinator, SBM level, and CFSS points.

Part two was a multiple-choice type of examination that aided the author in determining the teacher respondents' level of knowledge, skill, and attitude regarding the three pillars of comprehensive disaster risk reduction management.

Part three assessed the three pillars of the comprehensive DRRM in primary Education using a five-point Likert's Scale. Pillar I (Safe Learning Facilities) includes critical indicators on two aspects: education facilities that are conducive to the physical well-being of learners and a secure learning environment that promotes the protection and mental and emotional well-being of learners. Pillar II (School Disaster Management) includes leadership and coordination, information management, school and community stakeholders' engagement and participation, student-led activities, and education continuity plans. The last was Pillar III (Risk Reduction and Resilience Education), which included DRRM integration in the K to 12 Curriculum, co-curricular activities, learning materials and strategies, and a national greening program.

An open-ended question was also included for the SDRRM coordinators and the school head. This noted the best practices of his respective schools regarding implementing the three pillars of comprehensive DRRM in basic Education that can be shared with other schools.

This study began with the pilot implementation. A pilot implementation of a study is a small-scale preliminary study conducted before any large-scale quantitative research to evaluate the potential for a future, full-scale project. It is considered a fundamental stage of the research process, for it can help identify design issues and evaluate a study's feasibility, practicality, resources, time, and cost before the main research is conducted.

The pilot implementation enables researchers to predict an appropriate sample size, budget accordingly, and improve the study design before performing a full-scale project. The study was piloted to all elementary SDRRM Coordinators and Key teachers of the Mabitac Sub-Office respondents.

Data Collection and Analysis

The author has the pertinent documents approved by proper authority to conduct this study. Communication lines and coordination with responsible persons was also be ensured for proper distribution and retrieval of the raw data needed.
A survey was conducted, and the researcher visits all the schools in order to gather all the necessary data from the school DRRM coordinators and school heads, for them to answer the survey. It was also noted to remind the respondents of the confidentiality of their answers. The answers in the open- ended questions were noted and highlighted through citation of best practices.

As for the analysis of data, the parameters are presented with the corresponding statistical tools. They were used for a more valid and more reliable interpretation and analysis of data.

The profile of the school, and the assessment of the level of knowledge, skill, and attitude of teachers on the three pillars of comprehensive DRRM used frequency and percentage. A percentage frequency distribution is a display of data that specifies the percentage of observations that exist for each data point or grouping of data points. It is a particularly useful method of expressing the relative frequency of survey responses and other data (Khan et al., 2018).

The assessment of the extent of implementation of the three pillars of the comprehensive DRRM in Basic Education used weighted means. Significant relationship between the level of knowledge, skill, and attitude of teachers on the three pillars of comprehensive DRRM and extent of implementation of the three pillars of the comprehensive DRRM in basic education used the test of relationship called the chi-squared test.

For the significant relationship between the profile of the school and the extent of implementation of the three pillars of the comprehensive DRRM in basic education, this study used the chi- squared test. Chi square testing can also be used to determine if two categorical variables are associated with each other. The variables being analyzed do not have to have the same number of levels (Chen, 2021).

RESULTS

Table 1. Profile of the Schools

Location	**Frequency**	**Percentage**

DISCUSSION

Disasters are sudden catastrophes that ravage everything and take away human lives. It is categorized into 1. natural disasters or disasters that humans cannot control, such as floods, fire, and earthquakes; and 2. man-made disasters due to the implications that human beings themselves cause certain disasters, and some of these acts are warfare, vandalism, and cyber-attacks among others (Brown, 2018). Assessment of the three pillars of the comprehensive disaster risk reduction management in basic education was completed through a survey method. The results from the data gathered will be presented and discussed this in chapter.

While the DRRM act provided a legal basis for its disaster risk reduction directives, the Department of Education (DepEd) issued DO 37, s. 2015 as the basis of the Basic Education Framework with a more comprehensive Disaster Risk Reduction Management. Catanus (2018) stated that in this framework, the offices, and schools of DepEd shall have institutionalized DRRM structures, systems, protocols, and practices. Moreover, the impact of disasters always finds their way in schools through strong typhoons and massive flooding that ruins school properties. Thus, Philippines being prone to disaster warrant a closer look at its disaster-related policies that are currently in place (Mamhot, 2019).

Although numerous different programs have been developed, there are still very few studies on the program awareness and implementation in educational institutions. Thus, to fill in the gap in existing literature, this study included the profile of the school to determine the extent of implementation of the public schools' DRRM program.

Profile of the School

The researcher wanted to test the relationships between the profile of the school. Among the 48 public schools who participated in the survey, only 4 schools lie within the town proper, 26 of the schools are located in the lowland, and the remaining 18 are located upland. The school enrolment profile shows that the majority of the schools who participated in the survey have an enrollment of less than 250 students, having a percentage of 70.83. this was followed by those schools whose enrollment was between 251 to 500 with a frequency of 10 and has a percentage of 20.83. Last was the 4 schools whose enrollment was 751 and above with a percentage of 8.33.

As for the school head's position, 20 out of 48 (41.67%) respondents have a principal item, 14 (29.17) head teacher, and 14 (29.17) are teacher-in-charge. For the school DRRM coordinators, the following are the breakdown of the number of participants: 20 (41.67%) Teacher I, 13 (27.08%) Teacher II, 14 (29.17%) Teacher III, and 1 (2.08%) Head/ Master Teacher.

The majority of the participating schools, 38 out of 48 (79.17%) belong to Level II (Maturing) of the SB Level, and the remaining 10 (20.83%) are on Level III (Advanced). With regards to the CFSS, 8 (16.67%) schools have a score of 30 and below, 10 (20.83%)

schools have a score between 31- 35, and the majority of the schools, 30 (62.50%) have a score between 36 to 40.

Level of Knowledge, Skills, and Attitudes of Teachers on the Three Pillars of Comprehensive DRRM in Basic Education

The decisive role of a teacher has called upon the necessity to employ a range of measurement standards and accreditation to ensure the students who graduate from a certain program meet employer requirements. In the past years, a teacher's competency has attracted much attention among researchers and become the main concern among educational stakeholders. In the study of Omar et al. (2020), the pertinent facts from their research findings indicated salient contributions to understanding teacher competence in the teaching profession.

The researchers pushed the research context within teacher competency, imploring the necessary action toward understanding teacher's competency to improve the teaching and learning environment (Low et al., 2016). In a study, it was indicated that the pivotal role of competency consists of knowledge, skills, and attitudes as characteristics and personalities that one person must possess to showcase his or her competence in fulfilling the designated job. The main purpose of competency is to enable someone to perform more tasks effectively and effectively at their optimum level (Nousiainen et al., 2018).

In Table 1, an Item analysis of the level of knowledge of the teachers on the three pillars of the comprehensive DRRM in Basic Education is presented. The MPS score is 77.50. Based on the difficulty index of the 10-item test, item 2 "National and provincial hazard maps have been prepared to increase knowledge of risks and at the same time influence development of policies and programs (a. Hazard Map)" has the greatest number of correct answers.

On the contrary, the least number of correct answers was item 9 "Which is identified as the understanding of the geographic area affected, along with the intensity and frequency of hazard events, planning evacuation routes, creating shelters, and running preparedness drills (a. Preparedness)". Out of the 48 respondents, 8 (17%) got a perfect score of 10 in the knowledge of teachers on the three pillars of comprehensive DRRM.

In Table 3, an Item analysis of the level of skills of the teachers on the three pillars of the comprehensive DRRM in Basic Education is presented. The MPS score is 82.50. The highest score was 10, and the lowest was 4. Based on the difficulty index of the 10-item test, item 1 "It is the provision of initial care for an ill or injured person. (a. First Aid)" has the greatest number of correct answers. On the contrary, the least number of correct answers was item 7 "In doing CPR, how many breaths should be given every 5 seconds? (a. 1)". Out of the 48 respondents, 13 (27.08%) got a perfect score of 10 in the skills of teachers on the three pillars of comprehensive DRRM.

For Table 4, the level of attitudes of teachers on the three pillars of the comprehensive DRRM, the average weighted mean was computed at 4.59 and has the interpretation of very high. Of the 10 competencies itemized under the attitude, Drills for disaster preparedness conducted every quarter got the highest weighted mean of 4.85 and was interpreted as very high. The lowest mean was 4.06, stating that transport of emergency cases is simple because there is an available transport service, which was interpreted as high. The other eight components have an average ranging from 4.73 to 4.48, all interpreted as to be very high.

Table 4. Level of Attitudes of Teachers on the Three Pillars of Comprehensive DRRM in Basic Education

These competencies in the knowledge, skills, and attitude of teachers imply that they were very highly competent in the three pillars of comprehensive disaster risk reduction management. Teachers conducted drills for disaster preparedness quarterly, attended DRRM-related trainings and workshops, always prepared disaster kits as ready and available, always monitored the news and forecasts as they prepared for disasters and calamities, and placed the emergency hotlines and evacuation maps in strategic locations in case of emergency. They also conduct hazard mapping in their respective schools to check and prevent any occurrence of accidents due to hazards.

Table 5 implies a very high extent of implementation of the three pillars of the comprehensive DRRM in basic education in terms of Safe Learning Facilities. They practice the promotion of basic health and hygiene through the provision of adequate hand-washing facilities in every school. Schools also have a feeding program to address hunger needs.

The community can make decisions concerning the location of the learning environment and establish systems and policies to ensure that learners are safe and secure as the Department of Education (DepEd) reiterates the provisions of DO 037, s. 2022, which provides guidelines on the cancellation or suspension of classes and work in schools in the event of natural disasters, power outages/power interruptions, and other calamities. This includes the school heads' authority and discretion to suspend the conduct of in-person classes and shift to alternative delivery modes (ADM) in cases of extreme heat and other calamities that may compromise the health and safety of learners, teachers, and non-teaching personnel.

Table 6 shows the extent of implementation of the three pillars of the comprehensive DRRM in basic education in terms of school disaster management with an average weighted mean of 4.656, interpreted as very high.

This implies that all SDRRM was headed by the school head, teachers, and other school personnel, together with the stakeholders are also involved in the team. Schools also include DRRM in the SIP, AIP, and APP for proper procurement of DRRM supplies and budgeting on capacity building. DRRM information is well-managed and properly disseminated.

In Table 7, the extent of implementation of the three pillars of the comprehensive DRRM in Basic Education in terms of risk reduction and resilience education is presented. The average weighted mean was 4.661 and was interpreted as very high.

This implies that DRRM is integrated into classroom teaching in all grade levels and subject areas such as Science, Araling Panlipunan, and Health. This integration of classroom teaching of DRRM is complemented by co-curricular activities and local and national activities. There were also available learning materials.

Significant Relationship between the Level of Knowledge, Skills, and Attitudes of Teachers on the Three Pillars of Comprehensive DRRM in Basic Education and the Extent of Implementation of the Three Pillars of Comprehensive DRRM in Basic Education

The knowledge of teachers was not significantly related to Pillar 1 (Safe Learning Facilities), Pillar 2 (School Disaster Management), and Pillar 3 (Risk Reduction and Resilience Education), the same with the skills but the attitudes were significantly related to the three Pillars. These imply that the knowledge and skills of the teachers were not important to accomplish the three pillars. However, teachers' attitudes were important in attaining the three pillars.
In statistics, a large chi-square value means that data does not fit, then the observed and expected values are not close and the model is a poor fit to the data (Shen, et al., 2022). In this case, the attitude of the teachers does have a significant relationship with regards to the implementation of comprehensive DRRM.

Disaster risk reduction management has been integrated into all schools to ensure that students and teachers are prepared in the event of a disaster or hazard. This study by Fale (2022) aimed to determine the extent of climate change adaptation, disaster risk reduction management practices, and resiliency of secondary school teachers by utilizing a descriptive and correlational design.

The findings revealed that secondary school teachers' level of climate change adaptation was very satisfactory. The disaster risk reduction management practices of secondary school teachers were also very satisfactory. Secondary school teachers' resiliency in terms of absorptive and anticipatory capacity was rated very satisfactory, while transformative capacity was rated satisfactory.

Another significant finding is that the secondary teachers engaged in an acceptable practice of eradicating disaster risk through mitigation. Teachers tend to provide adequate knowledge of the various types of disasters that are likely to occur and ways to protect against them by incorporating them into their curriculum.

Significant Relationship between the Profile of the School and Level of Knowledge, Skills, and Attitudes of Teachers on the Three Pillars of Comprehensive DRRM in Basic Education

The study of Lavilles and Hordista (2024), determined the level of awareness of the teachers and administrators in natural and human-caused disasters as well as their level of preparation and implementation of the DRRM Program using descriptive-correlational research design, specifically, weighted mean and Pearson Correlation. Results of the study showed a high awareness of teachers and administrators in natural and human-caused disasters. The school personnel also prepared and implemented the DRRM Program. The study also revealed significant relationships between the awareness of multiple disasters and preparation in the DRRM Program as well as the preparation and implementation of the DRRM Program. Given the overall results, the study may serve as a basis for schools to improve the implementation of the DRRM Program through higher disaster awareness and preparation.

In line with this, the Department of Education (DepEd) included the Disaster Readiness and Risk Reduction (DRRR) subject in the K-12 Senior High School curriculum after launching the K-12 program in 2013. However, after reviewing the curricula of two selected schools from the Philippines, it was discovered that the DRRR subject was only offered in the Science, Technology, Engineering, and Math (STEM) strand as a required subject while it is offered in the General Academic (GAS) strand as either a required subject or an elective. Furthermore, DepEd itself prescribed DRRR as a core subject only for STEM, with the other strands not required to take this subject. Therefore, it is recommended for DepEd to revisit the Senior High School curricula and try to include Disaster Readiness and Risk Reduction as a required subject in all Senior High School strands in order to prepare the next generation in dealing with various hazards in the Philippines (Manalo & Manalo, 2020).

This study by Simon et al. (2021) was conducted to determine the level of resiliency to natural disasters of CAPSU as Basis to Strengthen Disaster Risk Reduction Management Program. The results of the study showed that faculty and staff respondents showed a high level of resiliency, observed 5R's and recorded cellphone hotline numbers. They participated in earthquake/fire drill, tree growing projects, volunteers on community recovery/clean - up drive.

The student who responded in the same study developed the skills in the four DRRM thematic areas but not in high extent, practiced "Drop, Cover, and Hold-on," unplug appliances, and turn - off gas supply, attended preparedness lectures; and volunteer services. Second district Campus/ Satellite colleges showed a high level of resiliency because these are areas prone to floods, soil erosion and earthquakes. It was also found that the lesser the number of faculty and staff and student population the easier it is to implement DRRM activities. Administration may consider conducting training related to First Aid, and correct handling of fire extinguisher.

From the recommendation of the study, knowledge, skills, and attitude of the teachers can be improved through conduct of workshops and trainings in awareness and preparation. In this case's scenario, different school profiles were tested in relationship with the knowledge, skills, and attitude of the teachers using Chi- Square Test. A significant relationship is established, with 95% level of confidence, between the enrollment profile of the school and the level of skills of the teachers on the extent of implementation of the comprehensive DRRM in Basic Education.

This implies that the competencies on the skills of the teachers such as prevention of illness and diseases, provision of first aid has a significant relationship with the number of enrollments.

Significant Relationship between the Profile of the School and the Extent of Implementation of the Three Pillars of the Comprehensive DRRM in Basic Education

In this part of the study, the school's profile, and the extent of implementation of the three pillars of the comprehensive DRRM in Basic Education was tested for relationship using chi- square test. Results revealed a significant relationship between CFSS Level and Pillar I (Safe Learning Facilities), between CFSS Level and Pillar II (School Disaster Management), and between SBM Level and CFSS Level and Pillar III (Risk Reduction and Resilience Education). Their large chi- square value indicated that the above-mentioned profile has a significant relationship with the extent of implementation of the comprehensive DRRM.
The results revealed that the participants have very satisfactory awareness in the fields of enabling environment, safe learning facilities, disaster risk management, and risk reduction and resilience education and have shown satisfactory compliance in the same fields. Findings of their study indicated that DRRM is not emphasized in the schools. It was concluded that giving focus on school DRRM and conduct of relevant DRRM activities are important to establish resilience in schools.

The test of hypotheses conducted in this study has recognized the significant relationship between variables that are notably important to the teachers, schools, pillars of the DRRM, and most importantly to the learners. Just as Taluban, et al., (2023) in their study determined the disaster awareness and adaptation practices among senior high school students. A descriptive research design was employed through questionnaires.

Based on the data gathering by the researchers' findings show that in terms of disaster awareness, the respondents know the importance of disaster/emergency drills in school. Meanwhile, in terms of disaster adaptation practices of students at home the data reveals that the respondents are always updated in weather condition, temperature, and their surroundings.

On the other hand, as to disaster adaption practices of the respondents at school the data shows that the school disseminates enough information about evacuation areas or safe spot during and after disaster/ emergency situations inside the vicinity of the school.

Common and Best Practices of Elementary and Secondary Schools with regards with the Implementation of the Three Pillars of the Comprehensive DRRM in Basic Education

Amongst the 48 participating schools in the study, the most common practice for safe learning facilities is their accessibility to any physical ability and basic health and hygiene are promoted in the learning environment. This implies that public schools are great followers and advocates in conducting drills and other DRRM activities. Most schools' best practices include active community participation of the external stakeholders in the construction and maintenance of the school every *Brigada Eskwela*.

This study also implied a well-established School DRRM in schools. Common practice is the participation in the quarterly NSED. Notable best practices of some schools were the use of online platforms to disseminate information of DRRM, specifically on their official FB Page, also some schools include procurement of DRRM materials in their MOOE budget through inclusion in the School Improvement Plan and Annual Improvement Plan. Aside from these, schools tied up with the LGU and other NGOs in the conduct of workshops and trainings.

For Risk Reduction and Resilience Education, the most common practice is the classroom teaching of DRRM at all levels. This implies that teachers are highly proficient in classroom integration of the DRRM lessons. Significant practices of some schools are coordinating with other stakeholders and inviting them as speakers and training managers to be able to integrate such into the curriculum.

Conclusions

After analyzing the results of the study, the following conclusions are drawn:
Teachers in Santa Maria Sub- Office are more equipped with knowledge, skilled, and possessed a positive attitude towards DRRM implementation especially those teachers in schools with lower enrolment. Since DRRM is part of the curriculum, Child Friendly School Survey (CFSS) and School-Based Management level also has an effect on its implementation.

Recommendations

The following recommendations were formulated after carefully drawing the conclusions:
To support teachers who are knowledgeable, skilled, and competent in DRRM, continuous training of teachers, school administrators, facilitators, and staff are highly encouraged to keep them posted of the DRRM practices, methods, and advisories.
Development of monitoring and evaluation tools to properly monitor and evaluate the implementation of the DRRM activities in schools.

Establish more schools to keep the enroll low and encourage the schools to attain an advanced level in the SBM. DepEd, together with the National Government should keep

teachers and schools motivated in instigating DRRM activities to learners by providing learning materials.

School enrollment should be kept at medium scale for accurate and constant monitoring of DRRM activities. Schools can partner with the LGUs and other stakeholders to be able to continuously provide a healthier environment for the learners.

Compliance with Ethical Standards

The researchers obtained informed consent from all participants, ensuring their right to withdraw at any time. Anonymity and confidentiality were maintained throughout the study. There were no conflicts of interest, and the research adhered to ethical guidelines, avoiding plagiarism and bias. The results are solely for research purposes.

Acknowledgments

This research would have not been possible without the guidance and help of several individuals who took part of supported the researcher during the accomplishment of this research study. The researcher would like to express his appreciation and gratitude to all of them.
First and foremost, to the Almighty God for giving the knowledge, strength, self-confidence, spiritual guidance and blessing that made this study possible.
The University President, Campus Director, To the Dean of College of Teacher Education, To the Adviser, Members of the Panel and most of all the Respondents who made their contribution and had provided their information the researcher needed to finish the study.

ASSESSMENT ON THE EFFECTIVENESS OF FACEBOOK AS A MARKETING PLATFORM IN ABUYOG, LEYTE

Dulce Amor C. Cutura [1], Christopher P. Gallos [1], Las Johansen B. Caluza [2]

[1]College of Hospitality Management and Entrepreneurship, Abuyog Community College, Abuyog, Leyte, Philippines
[2]Applied Sciences Department, Leyte Normal University, Tacloban City, Philippines

https://doi.org/10.5281/zenodo.11760151

ABSTRACT

The purpose of this study was to assess the effectiveness of Facebook as a Marketing Platform for Micro, Small, and Medium Enterprises in Abuyog, Leyte. Due to the outbreak of COVID-19 pandemic, business operations were greatly much affected. Thus, the researchers observed that this is indeed a great problem for the business sector. Through observing the current trend of doing business these days with the use of social media, particularly Facebook, the researchers observed that there were MSMEs in Abuyog, Leyte which utilized Facebook Marketing Platform. Hence, the researchers would want to assess its effectiveness. The research method employed for this study was quantitative approach and it used Pearson-r correlation to determine the correlation of the variables under study. The research findings showed that the p-value was less than the significance level of 0.05. Thus, **"*there was a significant relationship between the status of sales and income, perceived usefulness, and extent of satisfaction to the extent of effectiveness of Facebook marketing platform.*"** This study concludes with practical recommendations from the researchers that all MSMEs in Abuyog, Leyte must adapt Facebook marketing in order to boost sales/income as this platform is effective.

Keywords: *effectiveness, satisfaction, Facebook, marketing, MSMEs*

INTRODUCTION

Over the last 40 years, we have seen a significant change in how business is conducted and how people interact with one another. Through the emergence of modern technology, the adoption of social media technology is speeding up, and we can anticipate that it will have a similar impact on businesses now and in the future.

Micro, Small, and Medium Enterprises or better known by the acronym “MSMEs” are the business entities that are operating here in the Philippines. These MSMEs are relatively smaller compared to huge companies and corporations. Section 3 of Republic Act No. 6977 “The Magna Carta for Small Enterprises” define MSMEs based on the following categories. Micro enterprises are business entities having less than fifty thousand pesos (P50,000) as the starting capital with 5 or less workers. Cottage enterprises are business entities having fifty thousand one to five hundred thousand pesos (P50,001 to P500,000) as the starting capital with 6 to 9 workers. On the other hand, small enterprises are entities that has a starting capital of five hundred thousand one to five million pesos (P500,001 to P5,000,000) with 10 to 99 workers. Lastly, medium scale enterprises are entities having a capital of five million one to twenty million pesos (P5,000,001 to P20,000,000). Here in the Philippines, there are lots of MSMEs since most businesses found in the local setting are small ones. Based on personal observation, this is for a fact in the local setting of Abuyog, Leyte because majority of the enterprises in the town fall under the micro enterprise category. These enterprises started with a capital of less than fifty thousand pesos (P50,000) and majority of these micro enterprises are on the food industry. When the COVID-19 pandemic struck, these small businesses were the hardest hit. These micro businesses suffered a significant loss of income as a result of lockdowns and stay-at-home protocols. Indeed, this is a significant problem for MSMEs, particularly micro businesses, and the task at hand is to find a solution that will allow these businesses to continue to earn despite the pandemic.

With the emergence of technology, new form of communication existed. Communication is no longer limited to personal interactions but there are now platforms that can be used in communicating with people who are far away from us, and one of those platforms is social media. Social media are new forms of communication that changes people's behavior and expectations, as well as how businesses operate. Because of the emergence of social media, users can now use social media platforms to invite and converse with others in an easy-to-use manner. This type of interaction has given millions of customers a voice, allowing them to communicate with one another and share their experiences and opinions. This is indeed true these days. As we can observe, social media users can now post their comments and feedbacks on social media pages, this give users the freedom to also communicate with one another in sharing different experiences and opinions.

Furthermore, the rapid adoption of social media, such as blogs and other social networking sites, as well as media-sharing technology, is altering how businesses respond to consumer needs and desires, as well as how they respond to competitors. This is for a fact since business entities now address issues and concerns of the customers through social media postings as well. Most of the announcements of business firms are now online – through social media platforms.

Additionally, social media represents marketing opportunities that can connect businesses directly with their customers. This statement is factual since we can observe that business firms can now connect with their customers easier and faster through the use of social media. In just a click, advertisements and announcements can be posted reaching millions of people. In the Social Media Marketing Report of 2011, ninety percent

of marketers indicated that social media was important to their business; all these sources only shows that as businesses become more globally competitive, marketing strategies must also become more innovative and compelling in order to attract larger pools of customers. Undeniably, modernization and globalization is already happening here in our country. That is why, business firms must adapt to these changes by creating new marketing strategies that could help them survive in this modern era.

A related study conducted by Tajvidi in 2017 investigated the impact of social media on business performance. The survey was carried out on MSMEs in the hotel industry in the United Kingdom. The study discovered the impact of social media on the performance of MSMEs in the United Kingdom, as well as the potential of marketing to mediate the relationship between social media and firm performance.

On the other hand, the study of Wang in 2017 investigated the role of social media marketing in improving customer relationships and firm performance. According to the findings of their study, the use of social media moderates the association between customer relationship capabilities and company performance. All these literatures are the basis for this study – that is to assess the effectiveness of social media, specifically Facebook as a marketing platform for MSMEs in Abuyog, Leyte. Other researchers such as those of Suariedewi in 2022 investigated the usage of social media by MSMEs for marketing in India, and their findings revealed that views of ease of use, perceived convenience, and compatibility all had a major impact on social media marketing. The study of Pires in 2022 evaluated the effect of social media marketing in value co-creation and engagement among Chinese and Hong Kong smartphone users. According to the findings of their study, social media marketing is quite effective in increasing value co-creation, engagement, repurchase intention, and brand awareness.

Essentially, there are also lots of researches being done even before the COVID-19 pandemic. Some related researches are: Effectiveness of Facebook as a free marketing tool, by Palma in 2016. The Implications of Facebook Marketing for Organizations by Ramsaran-Fowder in 2013, A Study on Effectiveness of Facebook Marketing among Economic Students by Avilala Sai Gowtham Reddy in 2019, and others. Technically, all these researchers talked about marketing. Much emphasis were layed on social media marketing particularly Facebook. All those researches were done before the emergence of pandemic, and they all have something in common which is the emphasis of the effectiveness of Facebook marketing platform. All those studies attempted to understand the efficiency of Facebook Marketing and how it is the most popular source of social media marketing for businesses those days and even until now.

On the other hand, there has been lot of researches on the use of social media as a marketing tool, but no one has done it during this pandemic. For this study, the researchers aim to assess the effectiveness of Facebook for MSMEs in Abuyog, Leyte particularly in this time of pandemic. Accordingly, the main gap for this research study is on the proliferation COVID-19 pandemic. Because of this, many nations have taken serious measures. Many economic actors, especially MSMEs and start-up businesses have been taken aback by lockdowns and limitations on most community activities and economic activity as per Putri, S. E., 2021. With regards to this, the International Labor

Organization (ILO) (Organization, 2020, p. 3; ILO, 2020) performed a survey to assess the impact of the COVID-19 pandemic on 571 micro, small, and medium-sized businesses. As a result, 58% of MSMEs reported that they had reduced production of goods and services due to a decline in demand. This survey result is already a problem because business operations were halted due to the pandemic, which will have a significant impact on the enterprise and the economy as well.

As Prenaj and Burim's study in 2016 highlighted the additional benefits of social media marketing – the result was an increase in sales for MSMEs, and also according to the study of Rasheed, Ahmed & Nafiz, Abdulla in 2022, their study concluded that the adoption of social media marketing has a significant positive impact on MSME performance. And this is what the authors of this research paper are trying to prove. Going back to the research locale of this study which is in Abuyog, Leyte, the main gap identified for MSMEs, particularly micro enterprises, is a lack of strategies on how to develop a marketing strategy that will promote and help their businesses earn more, especially in this time of pandemic. And, as technology advanced and the use of social networking sites became more popular, there needed to be a way to make use of these resources to promote and earn a sustainable profit – that is through Facebook marketing. Since using Facebook is the most popular in Abuyog, Leyte, creating Facebook pages for businesses is an excellent idea for MSMEs. With this, the ultimate goal is to evaluate if using Facebook as a marketing platform is effective or not.

Accordingly for this study, the researchers will assess if the status of sales and income, the perceived usefulness of Facebook marketing, and the extent of satisfaction of business owners using Facebook marketing has something to do with the overall effectiveness of the said platform.

Research Questions

This study determined the effectiveness of Facebook as a marketing platform for Micro, Small, and Medium Enterprises (MSMEs) in Abuyog, Leyte.

Specifically, it aims to answer the following questions:

1. What is the extent of effectiveness of online marketing via Facebook?
2. What is the status of sales and income of MSMEs in Abuyog, Leyte?
3. What is the extent of usefulness of Facebook marketing platform perceived by business owners?
4. What is the extent of satisfaction of the business owners utilizing Facebook as a marketing strategy?
5. Is there a significant relationship between the status of sales and income of MSMEs to the effectiveness of Facebook marketing platform?
6. Is there a significant relationship between the perceived usefulness of Facebook marketing platform to the effectiveness of Facebook marketing platform?
7. Is there a significant relationship between the extent of satisfaction among business owners utilizing Facebook marketing to the effectiveness of Facebook marketing platform?

METHODOLOGY

Locale of the Study

The research on “Assessment on the Effectiveness of Facebook as a Marketing Platform in Abuyog, Leyte” is centered around Abuyog, Leyte. A first-class municipality in the province of Leyte with numerous MSMEs. Abuyog, Leyte is the specific locale of this study, focusing on the marketing aspect of MSMEs in the said town. The goal is to know how effective is Facebook as a marketing platform, and how it helps in sales generation for businesses.

Sampling

The method to be used for sample selection is convenience sampling. The researchers are targeting at least thirty (30) participants and they will be selected based on availability and willingness to take part.

Data Gathering Procedure and Instrument

In this research, a carefully designed questionnaire, underwent validation and reliability test to ensure the quality of the survey questionnaire. The target population, Abuyog, Leyte’s entrepreneurs were selected using convenience sampling. Participants are the selected entrepreneurs utilizing Facebook marketing platform.

For the data collection, the researchers will utilize these tools for data collection procedure: (1) Online questionnaires through Google Forms; and (2) Online interview through Google Meet and/or Messenger.

In checking the validity and reliability of the survey questionnaire, the researchers asked the assistance of a statistician in validating the questionnaire and at the same time in computing for the reliability test.

Research Instrument Validation

Category	Rating				Score
	4	3	2	1	
Purpose	Purpose is stated clearly.	Purpose is stated somewhat clearly.	Purpose is stated vaguely.	Purpose is not stated.	**3**
Clarity of Questions	Questions are very clear. The reader will not have to ask for clarification.	Questions are clear, and a person might have to ask for clarification.	Questions are somewhat clear, and a person would have to ask for clarification.	Questions are confusing and ambiguous.	**3**

	are properly addressed.	questions are properly addressed.	questions are properly addressed.	essential questions are properly addressed.	

Reliability Analysis

Reliability Statistics		
Cronbach's Alpha	**Cronbach's Alpha Based on Standardized Items**	**N of Items**
.951	.964	6

Cronbach's alpha	Internal consistency
$\alpha \geq 0.9$	Excellent
$0.9 > \alpha \geq 0.8$	Good
$0.8 > \alpha \geq 0.7$	Acceptable
$0.7 > \alpha \geq 0.6$	Questionable
$0.6 > \alpha \geq 0.5$	Poor
$0.5 > \alpha$	Unacceptable

Cronbach alpha shows that the survey questionnaire has an excellent reliability since alpha is greater than .9. The questionnaire could now be considered as reliable.

Item Statistics			
	Mean	Std. Deviation	N
VAR00001	4.5333	.68145	30
VAR00002	4.5667	.62606	30
VAR00003	4.3667	.71840	30
VAR00004	4.3667	1.09807	30
VAR00005	4.4000	1.10172	30
VAR00006	4.0667	1.22990	30

Process of Analysis and Statistical Treatment

The study's data treatment was rigorous, starting with self-made questionnaire undergoing expert validation and a pilot test. Using convenience sampling, a representative of 30 entrepreneurs using Facebook as a marketing platform was selected, with participants contacted for clarity and confidentiality. Data entry followed a systematic approach, and rigorous reliability and validity testing included the Pearson correlation coefficient. The analysis involved descriptive and inferential statistics, with findings presented using data visualization techniques. Throughout, ethical considerations were prioritized, ensuring informed consent and participant confidentiality.

Item-Total Statistics

	Scale Mean if Item Deleted	Scale Variance if Item Deleted	Corrected Item-Total Correlation	Squared Multiple Correlation	Cronbach's Alpha if Item Deleted
VAR00001	21.7667	19.771	.873	.940	.944
VAR00002	21.7333	20.202	.877	.941	.946
VAR00003	21.9333	19.926	.793	.673	.950
VAR00004	21.9333	15.926	.958	.980	.928
VAR00005	21.9000	15.955	.950	.978	.930
VAR00006	22.2333	15.633	.862	.796	.947

Scope and Limitations

The study "Assessment on the effectiveness of Facebook as a marketing platform in Abuyog, Leyte" focused on discovering how effectiveness is the use of social media, especially Facebook as a marketing tool in the time of pandemic. However, in this study, this only focus on one town in the province of Leyte, and only those entrepreneurs who are willing to take part in the study were interviewed and were asked to answer the survey questionnaire.

RESULTS

Shown below are the graphical presentations of the respondents' answers to the online survey questions through Google Forms.

The data shows that majority of the respondents were from the micro enterprises. Indeed, in Abuyog, Leyte, the researchers directly observed that majority of the enterprises are micro businesses having less than P50,000 as their capital. Majority of these micro enterprises in Abuyog, Leyte are on the food industry.

Figure 1: Summarized results on the survey question "How do you categorize your business in terms of capitalization?"

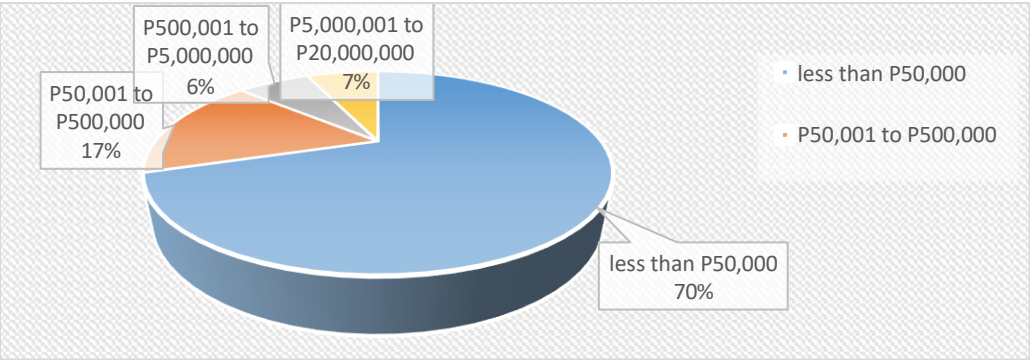

Figure 2: Summarized results on the survey question, “How do you categorize your business in terms of employment size?”

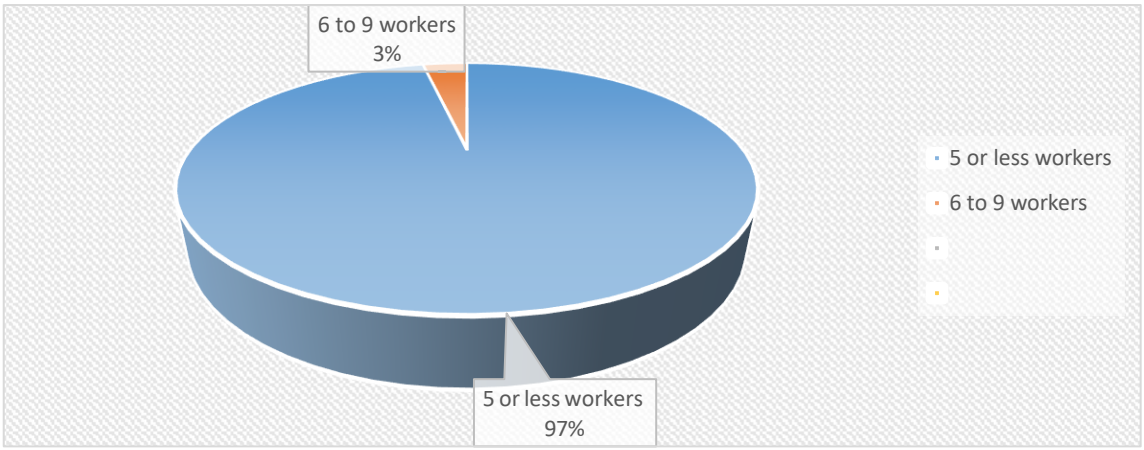

Figure 3: Summarized results on the survey question, “Years of business operation?”

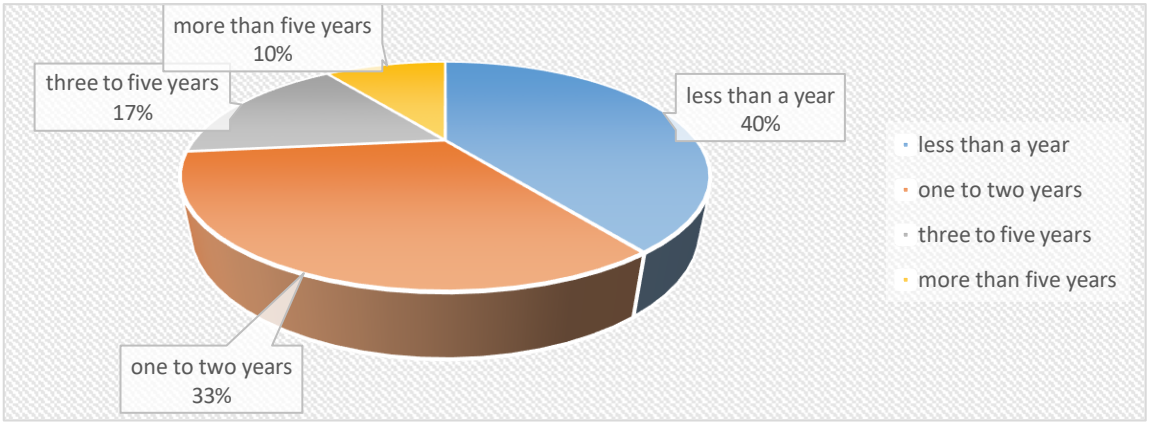

Figure 4: Summarized results on the survey question, “Do you have a Facebook Page for your business or are you using your own Facebook account for online marketing?”

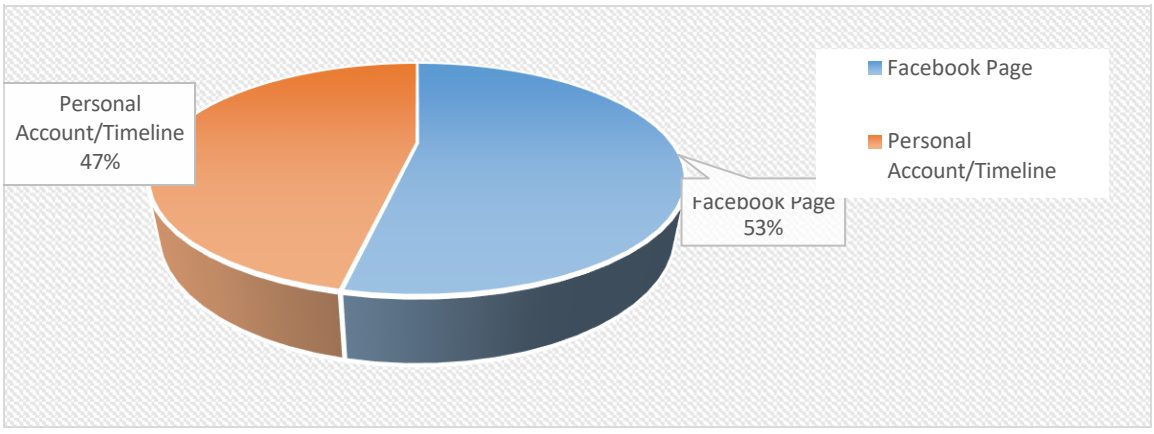

Figure 5: Summarized results on the survey question, “Does the use of Facebook as a marketing platform enhances customer relationship?”

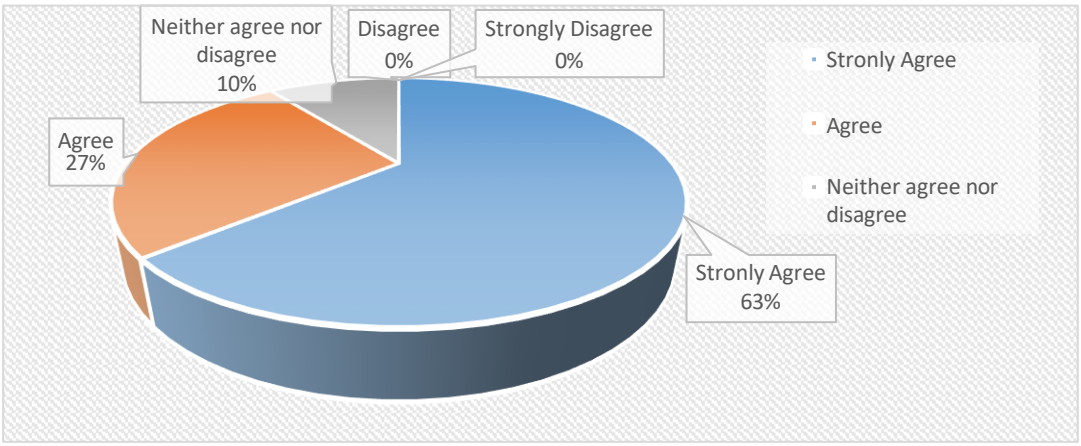

Figure 6: Summarized results on the survey question, “Were you able to attract more customers through the use of Facebook marketing?”

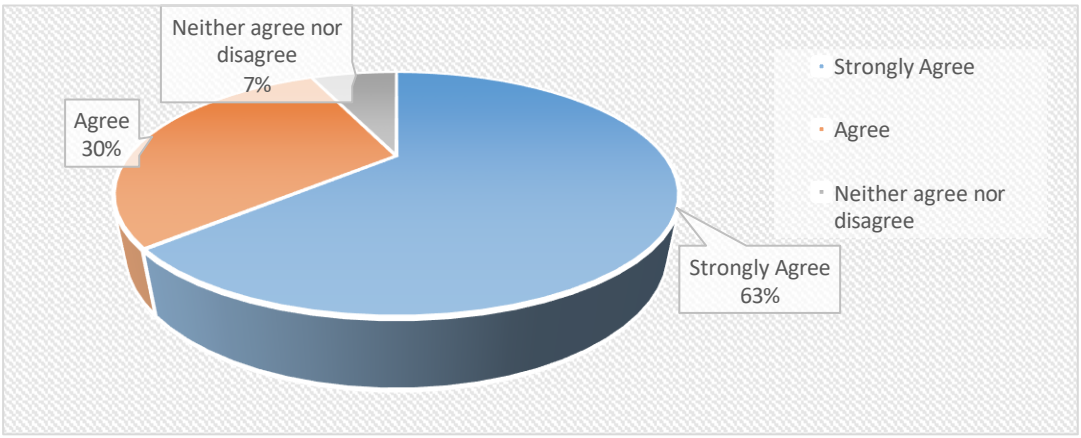

Figure 7: Summarized results on the survey question, “How about your sales? Was there a drastic increase in sales when you adapt the use of Facebook for promotion?”

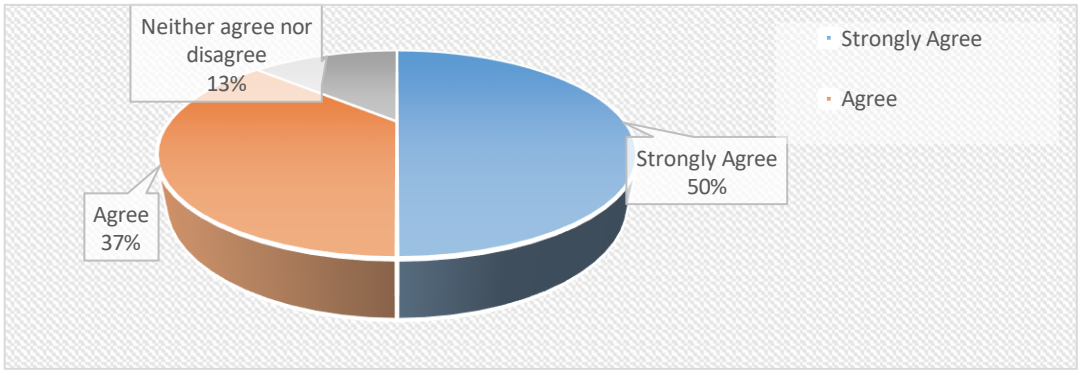

Figure 8: Summarized results on the survey question, “During the outbreak of COVID-19 pandemic, were you able to generate more income through the use of Facebook marketing platform? Kindly rate.”

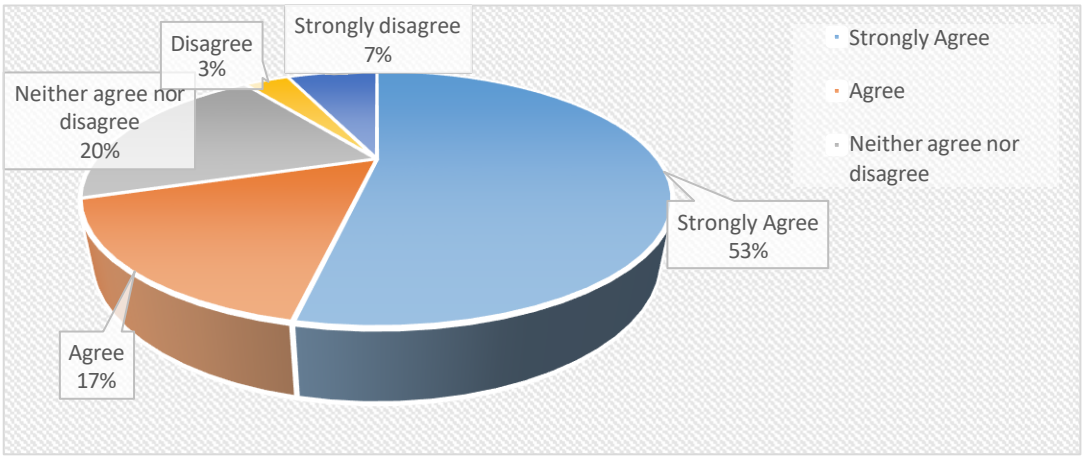

Figure 9: Summarized results on the survey question, “Kindly rate the usefulness of Facebook marketing platform.”

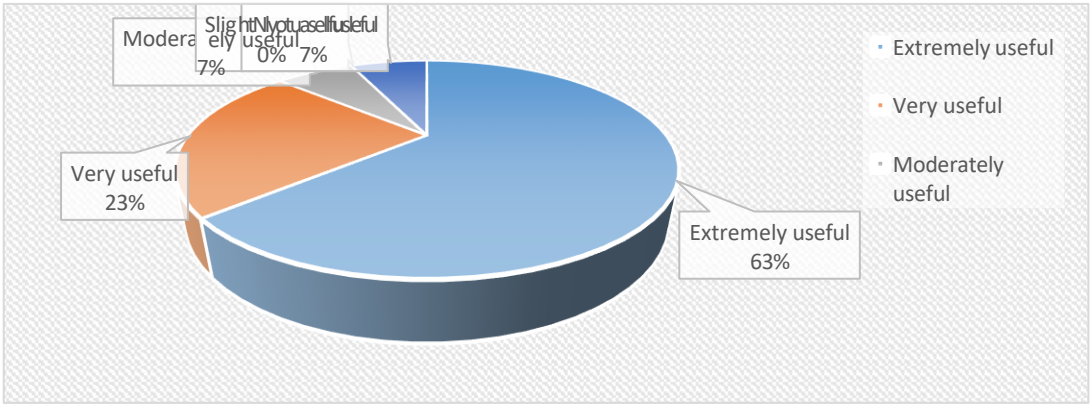

Figure 10: Summarized results on the survey question, “Kindly rate your level/extent of satisfaction in using Facebook marketing platform.”

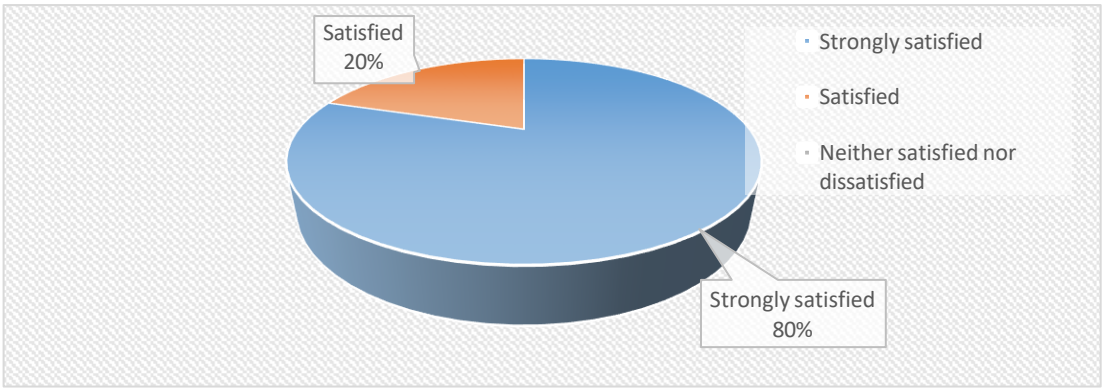

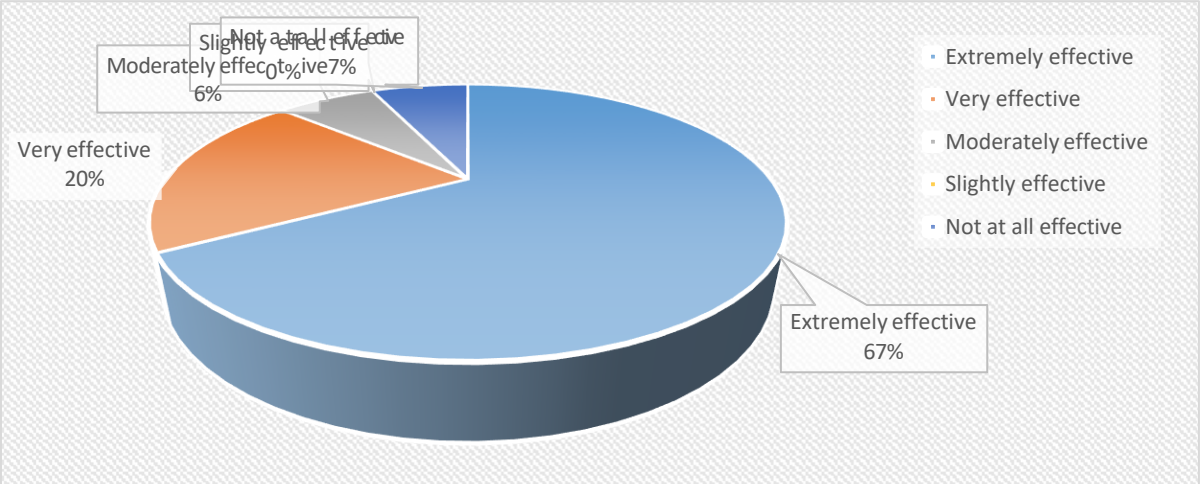

Figure 11: Summarized results on the survey question, “Kindly rate the effectiveness of Facebook marketing platform.”

Results on the Statistical Treatment of Data Using Spss

	MEAN	STD. DEVIATION	VERBAL INTERPRETATION
extent of effectiveness of Facebook marketing	4.37	1.098	VERY LARGE EXTENT

1. What is the extent of effectiveness of online marketing via Facebook?

	MEAN	STD. DEVIATION	VERBAL INTERPRETATION
status of sales/income of MSMEs	4.32	1.080	VERY LARGE EXTENT

2. What is the status of sales and income of MSMEs in Abuyog, Leyte?

	MEAN	STD. DEVIATION	VERBAL INTERPRETATION
extent of usefulness of Facebook marketing	4.37	1.098	VERY LARGE EXTENT

3. What is the extent of usefulness of Facebook marketing platform perceived by business owners?

	MEAN	STD. DEVIATION	VERBAL INTERPRETATION
extent of satisfaction of business owners utilizing Facebook marketing strategy	4.40	1.101	VERY LARGE EXTENT

4. What is the extent of satisfaction of the business owners utilizing Facebook as a marketing strategy?

	PARAMETERS
(4.21 - 5.00)	VERY LARGE EXTENT
(3.41 - 4.20)	LARGE EXTENT
(2.61 - 3.40)	AVERAGE EXTENT
(1.81 - 2.60)	SMALL EXTENT
(1.00 - 1.80)	VERY SMALL EXTENT

5. Is there a significant relationship between the status of sales and income of MSMEs to the effectiveness of Facebook marketing platform?
6. Is there a significant relationship between the perceived usefulness of Facebook marketing platform to the effectiveness of Facebook marketing platform?
7. Is there a significant relationship between the extent of satisfaction among business owners utilizing Facebook marketing to the effectiveness of Facebook marketing platform?

	Variables	**r value**	**Strength**	**p-value**	**Sig**
EFFECTIVENESS OF FACEBOOK MARKETING PLATFORM	STATUS OF SALES AND INCOME	.875	STRONG	p = 0.000 < 0.05	S
	PERCEIVED USEFULNESS	.845	STRONG	p = 0.000 < 0.05	S
	EXTENT OF SATISFACTION OF BUSINESS OWNERS	.855	STRONG	p = 0.000 < 0.05	S

Based from the correlation table above we can say that, **"*there was a significant relationship between the status of sales and income, perceived usefulness, and extent of satisfaction to the extent of effectiveness of Facebook marketing platform.*"**

The statistical treatment used is Pearson-r correlation. The tables above shows the correlation coefficient and the p-value. The strength of the relationship can be determined by the value of the correlation coefficient presented as r. The significance level is at .05. So if the p-value is less than or equal the significance level then we consider the relationship significant.

If r is positive that means as one variable increases the other also increases. But if r is negative that means that as one variable increases the other decreases.

Value of r	Strength of relationship
-1.0 to -0.5 or 1.0 to 0.5	Strong
-0.5 to -0.3 or 0.3 to 0.5	Moderate
-0.3 to -0.1 or 0.1 to 0.3	Weak
-0.1 to 0.1	None or very weak

DISCUSSION

Analysis to Every Result

I. Descriptive Analysis

The extent of effectiveness of Facebook as a marketing platform has a mean of 4.37 and standard deviation of 1.098. This means that the result is a very large extent.

The status of sales and income of MSMEs has a mean of 4.32 and standard deviation of 1.080. This means that the result is a very large extent.

The extent of usefulness of Facebook as a marketing platform has a mean of 4.37 and standard deviation of 1.098. This means that the result is a very large extent.

The extent of satisfaction of business owners utilizing Facebook marketing platform during this time of pandemic has a mean of 4.40 and standard deviation of 1.101. This result is a very large extent.

The significant relationship between between the status of sales and income, perceived usefulness, and extent of satisfaction (independent variables) to the extent of effectiveness of Facebook marketing platform (dependent variable) has been computed using the Pearson-r correlation. After gathering respondent's answers and after computation, the r value for the status of sales and income is .875, the r value for the perceived usefulness of owners utilizing Facebook marketing is .845, and the r value for the extent of satisfaction among business owners is .855. With that correlation coefficient (r value), it follows that the strength of the relationship is strong.

II. Diagnostic Analysis

Based on the respondent's answers, most of them uses Facebook as their marketing platform, thus, it only shows that for them, Facebook is a useful and effective social media marketing platform.

Based on the results of the statistical tool used which is the Pearson-r correlation, the result of the study is, "there was a significant relationship between the status of sales and income, perceived usefulness, and extent of satisfaction to the extent of effectiveness of Facebook marketing platform." The result is valid since all these are taken from the answers of the respondents to the survey questionnaire.

III. Predictive Analysis

The researchers claim that in the near future, more and more enterprises in Abuyog, Leyte will adapt the use of Facebook marketing platform since they will be able to observe that it has a good impact to the overall performance of the business firm.

IV. Prescriptive Analysis

Based on the results of the study, it would be better if all MSMEs in Abuyog, Leyte will adapt the use of Facebook pages as their platform. In that way, their business will be known and it will be easier for customers to contact them since they are visible on social media. The same goes with the placing of orders, it would be more convenient for the customers and the enterprise as well. This can contribute to sales growth of MSMEs. If this happens, all business owners/ entrepreneurs will be satisfied with the use of Facebook marketing platform, and this has an impact to the effectiveness of the said platform.

Conclusions

The purpose of this research was to assess the effectiveness of Facebook as a Marketing Platform for MSMEs in Abuyog, Leyte. This research come into place because of COVID-19 pandemic. Lockdowns and stay at home protocols made it difficult for business enterprises to sustain their sales since customers can no longer go out to shop for their wants and needs. Because of this, the researchers thought that this is really a problem for business owners since their business operations – most especially their sales and income would be greatly much affected. Hence, the researchers pursue this research study in order to assess if using Facebook as a marketing platform is effective enough to reach and persuade more customers amidst pandemic. At the same time, the researchers are eager to find out if the status of sales and income, perceived usefulness, and business owners' satisfaction towards the use of Facebook marketing has something to do with the platform's effectiveness. This is indeed the ultimate goal for this study.

Based on the analysis conveyed, it can be concluded that ***"there was a significant relationship between the status of sales and income, perceived usefulness, and extent of satisfaction to the extent of effectiveness of Facebook marketing platform."*** This analysis was derived from the statistical tool used in computing and analyzing the data provided by the respondents – through using Pearson-r correlation, through this, the researchers were able to test the correlation of the variables under study.

The result was that the p-value was less than the significance level of 0.05. Thus, there is a significant difference. On the other hand, looking at the r-value of the sales and income, perceived usefulness and satisfaction of using Facebook marketing platform, the digits are 0.875, 0.845, and 0.855 respectively. This follows that the strength of the relationship is strong. Since the r value is a positive number, this means that as one variable increases, the other also increases – meaning there is a significant relationship between the status of sales and income, perceived usefulness, and extent of satisfaction to the extent of effectiveness of Facebook marketing platform.

Recommendations

Based on the findings of the study "Assessment on the Effectiveness of Facebook as a Marketing Platform in Abuyog, Leyte," it is highly recommended that entrepreneurs in Abuyog, Leyte utilize Facebook as a marketing platform. The study demonstrated a significant relationship between sales and income, perceived usefulness, and the extent of satisfaction with the effectiveness of Facebook marketing. The use of Facebook for marketing purposes has led to increased sales, expanded reach among potential customers, and higher income for entrepreneurs. Therefore, leveraging Facebook as a marketing tool can be highly beneficial for businesses in this town.

Compliance with Ethical Standards

As the authors of the study titled "Assessment on the Effectiveness of Facebook as a Marketing Platform in Abuyog, Leyte," we affirm our unwavering commitment to maintaining ethical standards throughout our research. We have rigorously obtained explicit informed consent from all participants, ensuring they were fully aware of their right to withdraw from the study at any time.

To protect the anonymity of respondents, we implemented stringent measures that safeguard their privacy and confidentiality throughout the research process. Our commitment to data protection is in strict compliance with the Data Privacy Act of 2012 (Republic Act No. 10173) of the Philippines. Ensuring participants were shielded from any potential harm during the research was a priority.

Acknowledgments

We would like to express our deepest gratitude to several individuals who have been instrumental in the successful completion of this research. Firstly, we are profoundly grateful to our esteemed professor, Dr. Las Johansen B. Caluza, for his guidance, insightful feedback, and unwavering encouragement during our Basic Research course in 2021 as part of our Master in Management program. His support greatly enhanced the quality of our work. Without him, this research would not be possible. Additionally, we extend our sincere thanks to our families, whose love, understanding, and sacrifices provided us with the strength and motivation to persevere. Lastly, we are profoundly thankful to God for His wisdom, strength, and blessings that sustained us throughout this journey. This research would not have been possible without the collective support and inspiration from all these individuals.

A SYSTEMATIC REVIEW OF THE TYPES OF QUESTIONS USED BY TEACHERS

Daisy Belle S. Madco

Master of English Language Studies Program,
Benguet State University, Philippines

https://doi.org/10.5281/zenodo.11503003

ABSTRACT

A teacher's art of questioning is proven essential in any aspect of education. It only differs as to what kind of question is being asked – LOTS or HOTS questions that enhance students' thinking skills. This study aims to examine the source, methodological characteristics, findings, and recommendations of the studies. This study followed the PRISMA guidelines for conducting systematic reviews. It included an analysis of 16 studies extracted from three electronic databases, ranging from fifteen years late to the currency of the study. The results show that teachers' questioning: 1) questioning is effective in cultivating students' skills; 2) they are more likely to use LOTS than HOTS; and 3) regular professional development is a need for teachers that will sustain their skills in implementing HOT questioning. Concerning the results, it is crucial to develop both pre-service and in-service teachers' skills in questioning.

Keywords: *Questioning skills, Skill, Higher-order thinking skill, Lower-order thinking skill, Question type*

INTRODUCTION

In education, the art of questioning is extremely vital. (Wilen and Swartz, 2017; and Neta, 2019). It is an essential skill that all teachers should possess to effectively foster critical thinking abilities in their students (Warren and Hughes, 2018). This multifaceted ability centers on the capability to articulate challenging questions that drive students to go

beyond the obvious and reveal deeper levels of understanding for a variety of subjects. Teachers can fashion a learning environment that nurtures rational curiosity and hastens cognitive growth (Çalık & Aksu, 2018) by encouraging students to analyze, synthesize, and evaluate information more profoundly. This emphasis on asking questions has become more and more prominent in the educational setting since it is recognized to play a critical role in shaping the minds of the future's innovators and leaders (Caine et al., 2015; Walsh & Sattes, 2015). The capacity to ask insightful questions benefits students, encourages them to engage with the material at a deeper level, and develops a mindset that views inquiry as an essential part of learning. This gives students the skills they need to deal with complexity and exercise critical thought in a world that is constantly changing. The development of effective questioning techniques is essential for equipping students to become lifelong learners who can navigate the complex terrain of intellectual inquiry and knowledge acquisition as the educational landscape changes.

The teacher asking questions, enhances professional growth as teachers continuously reflect on their practice, refine instructional strategies, and develop a deeper understanding of the subject matter (National Research Council, 2012), promotes creativity and innovation, and teachers have the opportunity to explore creative teaching approaches, adapt curriculum materials and design innovatively that caters to the needs of the diverse students (Harlen & Qualter, 2017), asking question empower the teacher improves classroom management by leading and setting the class to fruitful discussion and good environment increases job satisfaction and teachers' efficacy (Fullan & Hargreaves, 2016)

The practice of questioning within educational contexts finds its roots in the profound and philosophical teachings of the ancient Greek philosopher Socrates, who championed the Socratic method as a way to cultivate critical thinking skills through the careful crafting of questions (Chen, H., & Wu, T., 2020; Wang, Y., & Lin, S., 2015). This method, which places a strong emphasis on the power of inquiry and dialogue, has served as a cornerstone in the realm of pedagogy for centuries. Though it was not until the turn of the 20th century that researchers and educators organized a systematic investigation of the complex character of questions and their significant impact on teachers' and students' learning.

This academic excursion into the area of questioning unveiled a variety of diverse question types, bearing exceptional potential to shape and revitalize student learning experiences. Therefore, this academic journey illuminated the profound importance of crafting and positioning questions purposefully as an indispensable tool in the educational arsenal (Schoenfeld, 2017; McNeill & Krajcik, 2019; Berg & Smith, 2016; Kaminski & Sloutsky, 2020). With its development over time, questioning has become more than just a teaching technique; it is now considered a fundamental component of successful teaching strategies. The intricate relationship between questions and learning objectives has paved the standing of questioning as an essential component of educational praxis, enhancing the variety of instructional approaches and opening up new avenues for intellectual exploration for teachers and students alike. Educators can customize the transformative power of this age-old yet always-evolving educational method to kindle

intellectual discourse, nurture curiosity, and promote a culture of lifelong learning in educational settings by welcoming the art of questioning with open arms and smart discernment.

In today's fast-paced and information-driven society, students are always bombarded with an overwhelming quantity of data from a variety of sources, including online platforms, traditional media outlets, and academic resources (Chen & Liu, 2017). Despite the abundance of information available, countless students struggle to effectively analyze, evaluate, and apply it. This dilemma draws attention to a critical problem in modern education: students often discover it difficult to obtain the essential capabilities needed for critical thinking in an environment full of varied information. In today's world, where false information and fake news are hardly spotted, the capacity to evaluate information critically, recognize biases, and reach well-informed conclusions is becoming more and more important. Thus, it is more important than ever for educators to give students' development of critical thinking skills the highest importance.

Given these challenges, teachers play a crucial role in both imparting knowledge and helping students develop their critical thinking skills. Collins & Duguid (2003) found that through their studies, teachers can encourage students to question, explore, and think for themselves by fostering a stimulating and supportive learning environment. Teachers can help students become knowledgeable and involved members of the information environment by implementing dynamic teaching strategies like Socratic questioning, critical reading exercises, and problem-based learning. Critical thinking instruction also equips students with the abilities necessary to handle challenging circumstances, make informed choices, and adapt to society's rapid changes. Through nurturing a mindset that values logical thinking, fact-based reasoning, and innovative approaches to problem-solving, educators contribute to shaping a cohort of individuals prepared to face the demands of the 21st century.

Also, asking questions is only one aspect of the art of questioning; there is much more to it. It involves the deft application of a variety of question forms, such as open-ended questions that promote in-depth contemplation, probing questions that explore underlying presumptions, and follow-up questions that guide students in the development of critical thinking abilities (Cheng, K., & Chan, W., 2019). Teachers are entrusted with the duty of identifying the subtle range of questioning levels, from simple factual queries to sophisticated analytical challenges, and they need to strategically apply each type to pique students' intellectual curiosity and promote cognitive development.

Teachers are able to involve students in meaningful dialogues that encourage them to explore ideas, clarify concepts, and gain a deeper understanding of the subject by skillfully incorporating a variety of question types and levels of complexity into classroom discussions. This method of instruction fosters a classroom culture that values diversity, celebrates curiosity, and encourages students' ongoing intellectual growth, as well as developing their ability to think independently and solve problems.

As education evolves, the art of questioning will remain an important component in developing a generation of learners who are prepared to navigate an ever-changing world. With the necessity and significance of placing a high priority on helping students develop their critical thinking abilities through engaging instructional techniques and the thoughtful application of varying degrees of questioning to spark intellectual curiosity and promote a diverse and curious classroom environment, this study will attempt to identify the source and methodological characteristics of the studies, analyze the findings and recommendations of the studies, and find out what are the common types of questions used by the teachers in the classroom and what are their recommendations for teachers.

Research questions

1) What are the common types of questions used by the teachers in the classroom?
2) What are the studies' recommendations for teachers?

METHODOLOGY

Data Sources

A comprehensive literature review was done following the PRISMA guidelines, examining the studies directly or indirectly. The steps taken are: 1) have the initial screening of titles and abstracts to identify potentially relevant studies; 2) review the full text of the potentially relevant studies to determine their eligibility for inclusion; 3) extract the relevant data from included studies; 4) evaluate and synthesize the data from included studies; and finally, report the findings of the systematic review. The keywords were “teacher questioning,” “questioning skills,” “questioning,” and “questioning techniques." Regarding the inclusion and exclusion criteria, 16 studies were found to be eligible to explore teachers’ art of questioning. The data reduction chart for this systematic review is given in Figure 1.

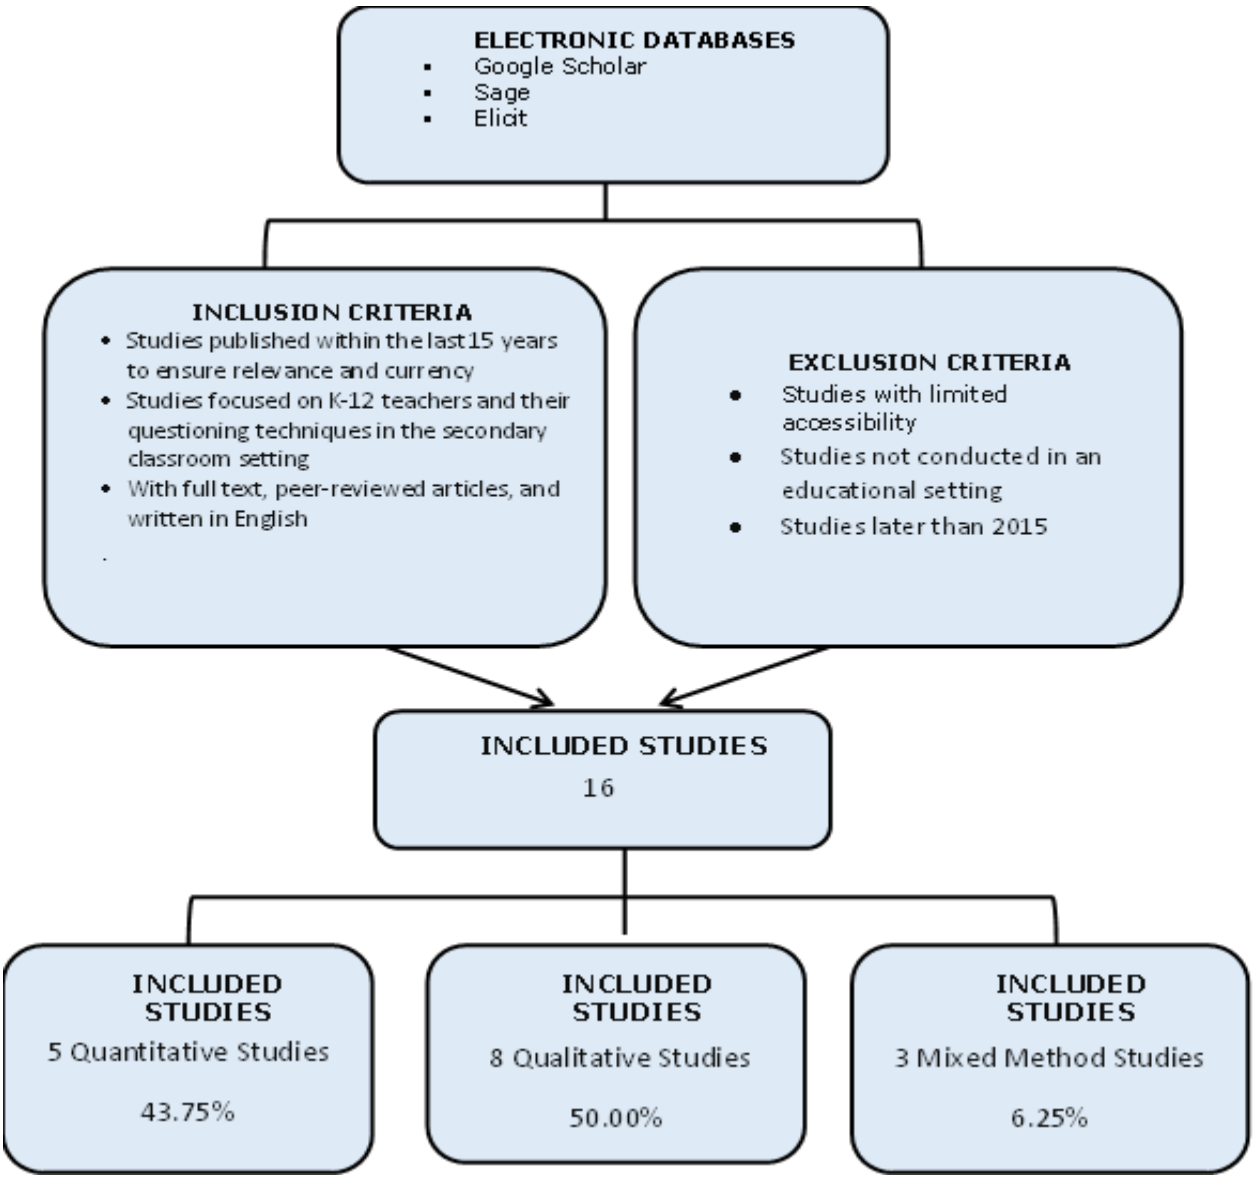

Figure 1: Data abatement chart for Systematic Review

RESULTS AND DISCUSSION

A. Methodological characteristics of the studies

Among all the research, Indonesia has the most articles with 62.5%, followed by Malaysia, Thailand, Pakistan, the United Kingdom, the US, Turkey, and Iran with 6.25% each. As

for the methodological characteristics of the studies, 50.00% used a qualitative, 31.25% used a quantitative, and 18.75% used a mixed methodology (Table 1).

Table 1: Methodological characteristics of the studies

Authors	Research	Methodology	participants	Country
Ansori, 2019	Quantitative	Survey	15 English teachers	Surakarta, Indonesia.
Shalihin, et.al., 2019	Quantitative	Quasi-experimental	30 participants were students	Indonesia
Rahmi, et. al., 2019	Quantitative	quasi-experimental design	32 students	Padang, Indonesia
Mitarlis, et.al., 2020	Quantitative	Quasi-experimental	59 participants	Bontang, Indonesia,
Hill, 2016	Quantitative	Quasi-experimental	Participants are not specified	Southern Thailand
Sujariati, et.al., 2016	Qualitative	Discourse analysis	4 English teachers	SMAN Bontomarannu, State University of Makassar in Indonesia
Tyas, et.al., 2019	Qualitative	Not specified	18 in-service teachers	Central Java and East Java, Indonesia
Khan, et.al., 2011	Qualitative	Observation	20 teachers	Peshawar, Pakistan,
Harrop, et.al, 2010	Qualitative	Interview	10 teachers in infant schools, 10 in junior schools and 10 in secondary schools	Liverpool, UK
Seker, et.al., 2008	Qualitative	Structured interview	15 English Language Teaching	Mugla University, Turkey
Barjesteh, et.al., 2014	Qualitative	Observation	30 Iranian students at a private English institute	Amol, Iran
Tofade, et.al., 2013	Qualitative	Observation	91 faculty members	Maryland, United States
Rooney, 2012	Qualitative	Action research	1 teacher	Surakarta, Indonesia

Gozali,et.al., 2021	Mixed method	Case study	15 secondary teachers	Indonesia
Shafeei, et.al., 2017	Mixed-methods	observations, interviews, and questionnaires	12 English secondary school teachers were the respondents	Malaysia
Djami, et.al., 2019	Mixed method	case study	15 teachers'	Salatiga

a) Qualitative studies. Of the sixteen studies, 50.00% used a qualitative. The characteristic of this qualitative approach is that it focuses on exploring and understanding complex phenomena through an in-depth examination of subjective experiences, meanings, and perspectives (Creswell & Poth, 2017). This involves collecting data through methods such as 1) action research (Rooney, 2012); and 2) the study focused on inquiry-based learning (IBL), which is a student-centered approach that encourages learners to construct new ideas based on their experiences and prior knowledge. It also emphasizes the importance of problem-solving, inferring, estimating, predicting, generalizing, and creative thinking as higher-order thinking skills, highlighting the significance of developing these skills for students' educational success and their ability to navigate a complex and evolving world. 2) Observation: Tofade et al.'s (2013)' study emphasizes the use of questions as a teaching tool to improve learning outcomes. It highlights the importance of well-constructed questions in assessing knowledge, promoting comprehension, and stimulating critical thinking, Barjesteh, et.al., (2014), the study highlights the importance of teacher questions and questioning strategies in an EFL classroom in Iran, and for Khan, et.al., (2011), the study brought the issue of questioning to the forefront, the common order of questions that teachers ask in the classrooms, and better strategies to improve higher-order thinking skills through questioning; 3) Discourse analysis of Sujariati, et.al., (2016), the study highlighted the importance of various types of questions, questioning frequency, techniques, and student engagement and the use of wait time, repeated questions, translation into Bahasa dialect, clarity, close approach, and rewards for correct answers; 4) (Structured) Interview of Seker, et.al., (2008) focuses on the relationship between critical thinking skills and in-class questioning behaviors of English Language Teaching (ELT) students and the differences in questioning behaviors between students with higher and lower critical thinking scores, emphasizing the importance of developing critical thinking skills in teacher education to prepare students for thoughtful and analytical learning experiences, as for Harrop, et.al, (2010) it focuses on a variety of question types that teachers use, such as routine, task-supervision, open-ended, and closed-ended inquiries and stressed on how crucial it is to pose relevant questions because doing so has an impact on students' engagement and learning. The intricacy of questions from elementary, middle, and high schools was also investigated in this study.

b) There were 31.25% who used a quantitative study. The characteristics of quantitative research include its emphasis on numerical analysis and objective measurement to investigate phenomena (Sanders, 2019). This includes 1) a survey study by Ansori (2019) that focuses on the significance of effective questioning in fostering higher-order thinking skills in students. It uses Bloom's Taxonomy to classify cognitive processes in educational settings, ranging from simple recall to complex evaluation, synthesis, and analysis. Also points out that teachers should develop students' critical thinking dispositions through metacognitive techniques, interactive teaching techniques, and problem-based learning; 2) Quasi-experimental of Shalihin et al. (2019) that highlights the use of guided inquiry learning to improve students' critical thinking skills in aspects such as elementary clarification, basic support, inference, advanced clarification, and strategies and tactics; Rahmi et al. al. (2019), that emphasizes the importance of inquiry-based learning in enhancing students' critical thinking skills; Mitarlis et al. (2020), focused on assessing the effectiveness of open inquiry with multiple representation approaches in enhancing students' critical thinking skills in electrochemistry education; and Hill (2016) focused on the higher-level questions, the nature of the questions asked by teachers, and the importance of teacher training and professional development in understanding the importance of questioning techniques.

c) There were 18.75% who used the mixed method. This study enables the researchers to gain a deeper and broader understanding of what is under investigation (Teddlie & Tashakkori, 2009), as well as triangulation (Creswell & Plano Clark, 2017). This approach was employed by Gozali et al. (2021) that highlights the importance of understanding how language teachers engage with and perceive HOTS questioning, the impact of HOTS questioning on language learning, and the efficacy of language teachers in encouraging the development of critical thinking skills among students; Shafeei et al. (2017) point out the relevance of higher-order thinking skills (HOTS) to improving students' critical thinking skills; and Djami et al. (2019).

B. Findings of the Studies

Of the studies analyzed, only 11 from different countries found that teachers are settling on LOTS questions for some reason (Table 2). This is supported by the studies of Bloom (1956) and Cooper, et al. (2019). Some studies found that teachers typically center their questions on factual information rather than prioritizing questions that develop higher-order thinking skills in students, just like the study of Snyder & Snyder (2008), Klieme, et al. (2004), Oliver & Reschly (2007).

Table 2: Teachers' categorization of question usage

Sujariati, et.al., 2016	✓
Tofade, et.al., 2013	✓

On the other hand, the other five studies included in the analysis showed a different result from Table 1. Only 12.5% showed its effectiveness to the student, as was discussed in the study of Rooney (2012) and Shalihin, et al. (2019). They proved that HOTS questioning or HOTS inquiry-based teaching is effective for students, and teachers are deliberately acquainted with the skill. It is also reiterated in the study of Rooney (2012) that HOT-based questions are engaging if the process is deliberately discussed with the students, making them informed and aware of the skill and process. The other 12.5% of the study proved that teachers are settling for LOTS due to the students' lack of proficiency and understanding, which leads to teachers just resolving to use LOTS (Bloom, 1956; Graesser et al., 1995; Hattie, 2009). That is shown in the study of Gozali (2021) and the study of Tyas, et al. (2019), which proved that if teachers are not acquainted with and do not have experience with the HOTS skill, it will reflect the questions used in teaching. Finally, Ansori (2019) discovered that at some point during the lecture, students ask HOT questions out of curiosity rather than to gain a thorough understanding of the material. His study also demonstrated that teachers have strong self-efficacy in terms of HOTS. See Table 3.

Table 3: Descriptive findings of the study

Author	Result of the Study
Rooney, 2012	Students engaged in the inquiry-based learning process
Shalihin, et.al., 2019	Students demonstrated a higher improvement when the HOT was discussed and implemented.
Tyas, et.al., 2019	The data analysis identified three main challenges: teachers' limited understanding of HOTS, limited experience in developing HOTS-based assessments, teaching and learning resources, and students' heterogeneity in cognitive competence, resulting in difficulty in developing appropriate instructions
Gozali, et.al., 2021	The student's proficiency is a hurdle in using HOT questions and English and language medium might be an important factor affecting the abilities of teachers to ask HOT questions
Ansori, 2019	Students ask HOT queries out of fascination.

	English teachers are confident in their ability to use interactive, critical thinking, and metacognitive pedagogical strategies to promote HOTS during the learning process.

Aside from what is identified by Rooney and Tyas as the prevalence of LOTS, there are other factors underlying the occurrence of lower-order thinking skills (LOTS) in teachers' questioning, which is a complex issue influenced by several underlying factors. The first significant factor is the traditional emphasis on repetitive learning and standardized testing in many educational systems. This emphasis on memorization and recall of factual knowledge unintentionally promotes LOTS, in which students are instructed to bring up information rather than engage in critical thinking. Second, teachers' pedagogical knowledge and beliefs are critical. Those who do not have a thorough understanding of higher-order thinking skills (HOTS) may struggle to develop questions that encourage critical analysis, problem-solving, and creativity in students (Chin and Chia, 2017). Third, limited time and large class sizes (Tyas, 2019) can limit teachers' ability to conduct extensive questioning. The pressure to cover massive amounts of curriculum competencies / content frequently causes teachers to prioritize LOTS, which require less cognitive effort from students and can be answered more quickly (Clarke & Yore, 2010). Finally, teachers' workloads and stress levels can have an impact on their questioning strategies. High levels of stress and exhaustion may make it difficult for teachers to invest in the cognitive resources needed for HOTS questioning, leading to a LOTS default (Van de Grift, 2016). Therefore, addressing the prevalence of LOTS in teachers' questioning requires a multifaceted approach that includes curriculum reform, professional development for teachers, and the creation of supportive classroom environments.

Recommendation of the studies

This section provides some study recommendations that can serve as a starting point for future research.75% (Table 4) of the study suggested that teachers undergo professional development that supports their understanding of HOTS and how to conceptualize questions and utilize them in class.

To improve student outcomes, educators must stay up-to-date on research and best practices, provide feedback, and provide adequate support, as well as provide opportunities for teachers to engage in learning activities similar to those they will use with their students. Engaging in professional growth workshops, conferences, and online courses enables teachers to assist students in building these abilities. Research indicates (Darling-Hammond, et al., 2017; Learning Forward, 2011; National Council of Teachers of Mathematics, 2014) that pursuing professional development has beneficial effects on student achievement and engagement, which renders it an excellent investment for teachers. This professional development should also focus on updating teachers' knowledge, skills, and approaches in light of new teaching trends that enable teachers to apply changes to curricula and teaching practices. Thus, this development is not only limited to formal courses but can also be a collaboration between schools or teachers across schools.

	43.75	**6.25**	**18.75**	**6.25**	**6.25**	**18.75**

1.1. There were 18. 75% recommended using varied questioning strategies in class. The strategies are open-ended questions, probing questions, hypothetical questions, reflective questions, choice questions, clarification questions, comparison questions, sequencing questions, summarizing questions, and higher-order questioning.

1.2. Open-ended questions are questions that are answered by elaboration. These questions encourage students to provide more detailed answers, express opinions, and share experiences. These questions are beneficial in various contexts, such as they promote deep thinking, encourage detailed responses, and help gather in-depth data from the students. Some of the examples of open-ended questions in English language arts subject are:

a. What did you find interesting about the main character of the story?

b. Explain how the setting of the story is influenced by the plot development.
c. What connections can you make between the events of the story and your own life experience?
d. In your opinion, what was the purpose of the author in writing the story?

1.3. Clarification questions are simple factual questions that aim to clarify information that was initially provided by the student and provide essential details. Some of the examples are

a. Can you clarify what you mean by the author's use of imagery in the story?
b. Could provide a more specific example of how the protagonist can champion the struggle he is facing?
c. Can you explain more in detail how the setting is being influenced by the development of the story?
d. I want to make sure I understand – did the author use foreshadowing to hint who will be the antagonist of the story?

1.4. Comparison questions involve analyzing the similarities and differences between two or more subjects or topics. In the context of language arts subjects, comparison questions can be based on literature, language, and communications, and alike. Some examples are:

a. Compare and contrast the use of symbolism in the story Macbeth and Iliad.
b. Discuss the narrative styles of two poets, Emily Dickinson and Langston Hughes.
c. Examine how the portrayal of female characters in classic versus contemporary literature is.
d. Compare the effectiveness of dialogue in play and screenplay.

1.5. Sequencing questions are questions that involve the organization or chronological of events or steps logically. This sequencing question is very much applicable to other subjects just like performing science experiments wherein students will sequentially practice the steps in conducting investigations effectively to understand the process. In language art subject this is most applicable to story, for instance:

a. What happened in the first part of the story?
b. Describe the sequence of the climax and how the conflict resolves.
c. Can you retell the story in chronological order?
d. Who are the characters presented in the story according to their order and characteristics?

1.6. Sequential questions are questions in a progression manner from LOTS to HOTS depending on the subject matter and strategies in asking questions and this is another term for balanced questioning. This strategy is effective since it is a structured/patterned order that helps create a psychologically safe environment by starting with LOTS questions before progressing to HOTS which promotes students' involvement and interest.

1.7. Summarizing questions are designed to test a student's ability to condense and articulate the main ideas of a text concisely. These questions required students to identify key elements and extract important points using their own words. This helps the students develop their HOT skills, memory retention, and comprehension and extract key points for better understanding across subjects. Some examples are

a. Can you provide a brief overview of the main theme of the story?
b. What are the key elements that drive the plot forward?
c. What is the main style technique of the author?
d. Can you summarize the tension in the story?

1.8. Higher-order questioning refers to questions that require critical thinking, such as analysis, synthesis, and evaluation, rather than just recalling factual information. This prompts deeper engagement and understanding of the subject matter. These question types encourage students to think critically, make connections, and develop their ideas. The examples are:

a. How does the author use symbolism to convey a deeper meaning in the text?
b. Can you evaluate the effectiveness of the protagonist's decisions and actions within the context of the story?
c. How does the setting of the story contribute to the overall message of the story?
d. Can you propose an alternative ending based on your interpretation of the text?

By incorporating a range of questioning techniques in the classroom, educators can better engage students and promote a more interactive and dynamic learning environment. This can lead to enhanced critical thinking skills and a deeper understanding of the subject matter.

Moreover, varied questioning techniques can cater to the diverse learning styles and preferences of students (Smith & Johnson, 2018; Garcia & Fernandez, 2017; Patel & Sharma, 2020). By using a mix of questioning techniques, educators can cater to the individual needs of their students and ensure that everyone can participate and engage with the material in a meaningful way.

The study by Rahmi et al. (2019), has recommended that the art of questioning be studied through interactive learning exercises. Interactive learning exercises are activities or tasks designed to engage students in a participatory, collaborative, and hands-on learning experience. These exercises encourage students to actively participate in the learning process rather than passively receiving information. Interactive learning exercises can take various forms, such as group discussions, problem-solving activities, simulations, role-plays, and multimedia-based activities. See Table 5 for sample questions.

Table 5: Interactive Learning Activities and Sample Questions

Interactive Learning Activities	Sample Questions
Discussions	1. Can you propose an alternative solution based on the groups' discussion? 2. What criteria would you use to judge the project? 3. How do you interpret the main theme of the text?
Problem-solving activities	1. How does the characters' problem contribute to the story's conflict? 2. How can you use the evidence in the story to support your justification of the characters' actions? 3. How does the cultural background of the character influence the interactions and decisions?
Simulations	1. How can you negotiate a conflict between two characters based on their personalities? 2. As a character in the story, what decision would you make differently and how would this alter the story plot? 3. How does your interpretation of the story differ from the other?
Role-plays	1. How can you justify your character's action considering his motivations? 2. What are some potential consequences of your actions if you say yes to his evil plans? 3. How would you react if I am not going to appear in the climax?
Multimedia-based activities	1. How effective does the television \presentation capture the theme and motif of the text? 2. What social media post and platform would you be doing if the song is about a mother's love? 3. How are you going to strategize cohesion while working on your online role-play?

Smith & Brown (2018) and Johnson & White (2017) proved that interactive learning exercises enhance student engagement, motivation, and critical thinking skills. They encourage group work, collaboration, and communication, preparing students for real-life situations. These exercises cater to diverse learning styles, allowing students to engage in hands-on activities, discussions, and multimedia-based tasks. They encourage self-directed learning, allowing students to take ownership of their learning process. Active participation in interactive learning exercises improves knowledge retention and application, preparing students for real-world situations.

Khan et al. (2011), with a percentage of 6.25%, proposed that teachers balance their question-based teaching styles. According to the study's findings, out of 267 questions, 67% were knowledge-based, 23% comprehension-based, 7% application-based, 2%

analysis-based, and 1% synthesis-based. However, the ratio of evaluation-based questions was zero.

1) A balance of lower-order thinking skills (LOTS) and higher-order thinking skills (HOTS) questions in class is required for a variety of reasons. The NEA (2016) and Tomlinson (2014) highlight the importance of using a mix of LOTS and HOTS questions to engage students, promote critical thinking, and accommodate different learning styles. Hattie and Timperley (2007), and Hill & Metcalf (2008) highlight the importance of effective questioning in promoting student learning and understanding. They suggest that using a mix of LOTS and HOTS questions can help achieve this goal. Grossman, Hammerness, & McDonald (2009) emphasized balancing LOTS and HOTS questions to enhance student learning and engagement. This balance ultimately leads to better learning outcomes and overall educational experiences.

2) Sujariati, et al. (2016) recommend that teachers use consistent questioning strategies, repeating questions, emphasizing meaning, translating or mixing questions into Bahasa Indonesia, and being closer to students to understand their learning weaknesses. Translating English questions into a student's first language enhances comprehension (Genesee, et al., 2010), promotes equity and inclusion (Cummins, 2000), boosts confidence and engagement (Skutnab-Kangas, & Cummins, 2008), facilitates cognitive processing (Dewaele, 2018), and encourages multilingualism (Garcia, & Wei, 2014). This is especially beneficial for students developing their English skills or from non-English-speaking backgrounds. It also ensures equal access to the curriculum and encourages a more inclusive learning environment. This approach is particularly beneficial in multilingual and multicultural societies.

3) The remaining 18.75% has no suggestion at all.

Conclusions

This systematic review found 16 articles on teachers' use of LOTS-HOTS questioning. The studied articles were not limited to a single country. The results of these studies are quite revealing. A significant majority, 81.25%, of the research found that LOTS were more commonly used in educational settings than HOTS. This could be due to several factors, including the perceived difficulty of teaching and assessing HOTS, or the belief that LOTS are easier to construct. Large class sizes, limited instructional time, and diverse student populations may also pose challenges to implementing HOTS-promoting instructional strategies (Darling-Hammond, 2010). Teachers may struggle to engage all students in meaningful, higher-order thinking activities while adhering to curriculum and scheduling guidelines. Another plausible explanation is that many teachers may have received insufficient training in instructional strategies that promote HOTS. According to research, professional development programs that focus on strategies like inquiry-based

learning, problem-based learning, and collaborative learning can help teachers foster higher-order thinking in their classrooms (Guskey & Yoon, 2009). However, it is important to note that not all studies came to the same conclusion. A small but significant percentage of 6.25% discovered that teachers were still using HOTS in their questions. This suggests that, despite the general trend toward LOTS, there is still a dedicated group of educators who understand the value of HOTS and are committed to incorporating them into their teaching practices.

Lastly, 12.5% of the studies yielded dissimilar results, indicating that the relationship between LOTS and HOTS in educational settings is not a simple, one-size-fits-all issue. These studies may have focused on different educational levels, subject areas, or cultural contexts, which could have influenced the outcomes.

The studies discussed provide useful insights into the current state of educational practices, particularly the use of LOTS and HOTS. While the majority of research supports the prevalence of LOTS, a sizable minority emphasizes the continued use of HOTS in questioning, as well as the importance of taking into account a variety of factors when asking HOTS questions. Examining these studies from a global perspective allows us to gain a more nuanced understanding of the complexities of educational practice and the ongoing debate surrounding the use of LOTS and HOTS in questioning strategies.
Considering the prior conclusions, the recommendation for additional research can be separated into two parts. First, since most of the studies revealed that teachers need training to successfully incorporate HOT in their questioning strategically, further research would focus on the kinds and appropriateness of training programs for improving teachers' skills in implementing HOTS-based questions. Second, considering the studies of Rooney (2012), Ansori (2019), and Shalihin et al. (2019), there is a tendency that students may understand and incorporate HOT questions in their engagement; further research would investigate other activities that develop HOTS for students. Nevertheless, this study offers helpful data for determining the feasibility of incorporating HOTS questions into qualifications that educate future educators.

Compliance with Ethical Standards

The review employed data from openly available sources and previously published studies. Proper citations and acknowledgments were provided to all original authors and sources to respect intellectual property rights and avoid plagiarism. The researcher has no conflicts of interest related to this article.

Acknowledgments

The researcher would like to express her sincere gratitude to everyone who contributed to the completion of this article. First and foremost, thankful to the professor who encouraged us to push through with this article including publication if possible. The researchers also wish to acknowledge the efforts of the researchers whose works she have reviewed. Their contribution is substance that help develop new analysis and

synthesis. Lastly, to The Creator, who sustains the researcher to live life and be able to accomplished this review. Praises be all yours!

ATTITUDES OF TEACHERS, STUDENTS AND PARENTS TOWARDS FLEXIBLE ONLINE LEARNING

Eduardo K. De Guzman

College of Education, Nueva Ecija University of Science and Technology
Cabanatuan City, Philippines

https://doi.org/10.5281/zenodo.11420784

ABSTRACT

This study aimed at describing the attitudes of teachers, students, parents of accredited private university in one of the City in the Philippines. A total of 331 respondents participated in this study. The descriptive cross-sectional method of research was used to gather data. Three sets of survey questionnaires were utilized. Data gathered were analysed and interpreted using weighted mean, correlation and one-way ANOVA. Findings of the study revealed that respondents are prepared in most aspects of needed capabilities and technology for online learning. More so, with regards to attitudes of respondents, they believe that online class is a good option during any crisis situation and time is manageable using this modality yet there are improvements needed to provide better provisions for online modality. It was also found out that there is no significant relationship between readiness and attitudes. Likewise, comparing attitudes of three groups towards online schooling showed that there is no significant difference among attitudes of the respondents.

Keywords: *Attitude, online schooling, flexible learning, synchronous learning, asynchronous learning, descriptive research*

INTRODUCTION

Online schooling or distance learning modality has gained popularity and attention especially in the time of pandemic when people are not allowed for social gatherings and should only stay in the confines of their homes.

One study about technology used was done by Zhu ET. Al., (2018) suggested that educational benefits of technology usage were the key factor influencing both students' and parents' attitudes. Based on the cross-examined understanding of parents' and students' attitudes, suggestions for large scale tablet initiatives are proposed. But the study of attitudes in this particular case is done in a traditional face to face setting that differentiates with the current study.

When unprecedented problems on how the schooling will be undertaken without disruption of educational operations and practices for the learning to thrive, one of the most popular and convenient way to employ teaching and learning is online schooling using technologies and online platforms with digital pedagogies (Milton, 2013).

There are echoing clamor also on some quarters of the society asking for academic freeze due to lack of preparations, resources and digital divides among students and teachers. Prior to school opening, DepEd initiated more urgent online trainings and webinars about online modalities and technology usage yet unable to pursue a total implementation of online approach. But other schools especially private institutions adopted the online modality as the best option to deliver learning using Learning Management System with synchronous, asynchronous and hybrid format during pandemic.

Since distance education finds its significance more so in this time of pandemic, schools should be aware of perspectives, feelings, expectations and needs of students, parents and teachers. The attitudes of these significant characters play a role in the achievement and improvement of educational process. Conclusions that will be drawn in this study will be useful for the academic community and everyone concerned with the planning, development and implementation of strategies for online learning and distance education in a campus based university in a transition to distance education (Peytcheva-Forsyth, 2018).

One study about attitude dwelt on Science subject being influenced by pedagogical skills of teachers (Benson, Nwagbo, Ugwuanyi, & Okeke, (2020). Attitudes of parents, teachers and students are determined in this study in the absence or fragment of empirical data about this subject. The result of the study is expected to be significant to introduce improvement of the online program with the data that will be obtained as basis.

Research Objectives

1. Describe the readiness of the respondents in using flexible/online learning mode.
2. Describe the prevailing attitudes of parents, teachers and students towards flexible learning modality.
3. Determine the relationship between the readiness and attitude of parents, teachers and students in flexible/online learning mode.
4. Compare the attitudes of parents, teachers and students towards flexible/online learning
5. What are the improvements that are needed in flexible/ online schooling as perceived by the respondents?

Hypotheses:

1. There is no significant relationship between readiness and attitudes of parents, teachers and students on flexible/online learning mode.
2. There is no significant difference among attitudes of parents, teachers and students towards flexible/online learning mode.

METHODOLOGY

This study which is quantitative in nature utilized the descriptive inferential research design. This design is a systematic approach to inquiry that involves description, recording, analysis, and interpretation of conditions that now exist. According to Baraceros (2016), descriptive research aims at defining or giving a verbal portrayal or picture of a person, thing, event, group, situation, etc. This design was used in this study in describing the attitude of junior high school parents, teachers and students of an accredited private junior high school. Descriptive statistics describes data and inferential statistics allows you to make predictions ("inferences") from that data. With inferential statistics, you take data from samples and make generalizations about a population (Statisticshowto, 2023). As regards the utilization of the descriptive correlation as inferential statistics design, Sousa, Driessnack, & Mendes (2007) explain that descriptive correlational studies describe the variables and the relationships that occur naturally between and among them. They involve the systematic investigation of the nature of relationships, or associations between and among variables, rather than direct cause-effect relationships. Correlations analyze direction, degree, magnitude, and strength of the relationships or associations.

Research Locale

The study was conducted in one accredited Private Accredited University in the Philippines where online schooling is adopted as the mode of teaching and learning. Teachers, parents and students underwent training and orientation about online modality. The school with established Learning Management System and provides distance learning has been preferred by parents and students in times of pandemic when face to face is not an option. Online mode using LMS also allows certain flexibilities and thus also termed as Flexible Learning. There is uncertainty and absence of idea how online learning works if fully implemented during pandemic and thus parents, students and teachers alike have their attitude which may be derived from their perspectives, ideas, beliefs or feelings towards a phenomenon. This is the reason why the attitude of the respondents towards online class needs to be examined as a way of determining the possible success or failure of an online program and find solutions for the formulation of policy and programs for improvement.

Participants of the Study

The respondents of the study were the teachers, students and parents of one of the Private Accredited University in the Philippines. A total of 10 teachers, 139 students

and 182 parents participated in this study. The samples were taken from the population using stratified random sampling method.

There are three strata where the samples are taken from each group different from each other. Everyone in the group has given a chance to be participants in the study.

Table 1
Distribution of Respondents

Teachers	40
Students	139
Parents	182
Total	**361**

The Research Instruments

Structured survey questionnaires were used to collect data using Google form for this study. There were three (3) sets of questionnaires used in the study for teachers, students and parents. The questionnaires include readiness survey, attitude survey for teachers, students, and parents, suggestions and recommendations survey for teachers, students and parents.

The weighted means of responses to the questionnaire were verbally described using the following scale:

1 (if there is negative perception due to the falsity of what the item describes)
2 (if there is non-conformity to the item describes)
3 – (if there is somehow conformity to what the item describes)
4– (if there is strong conformity to the truthfulness and manifestation of what the item describes)

The weighted mean of responses to the scales were verbally described as follows.

Numerical equivalent	Verbal Description
3.25-4.00	Strongly agree
2.50-3.24	Agree
1.75-2.49	Disagree
1.00-1.74	Strongly Disagree

Data Gathering Procedure

The researcher sought the permission from the administration of the accredited University in one of the Cities through request letters. The questionnaires were sent to the respondents via group chat in messenger. The link for Google form has been sent to the respondents. The questionnaires were retrieved and tallied later. Thereafter the results were recorded, organized, then analyzed and interpreted.

Validity and Reliability

The validity of the instruments was determined with the help of a statistician. The proponent also consulted other experts in the field to establish the validity of the instruments. Using the data taken from a school in one of the City in the Philippines with the same characteristics to the subject respondents, the questionnaire for students, parents and teachers were administered beforehand to determine the instrument's reliability. With the assistance of a statistician through careful examination, conclusion arrived at that items of the instruments were clear and the directions are well –stated. The data gathered revealed a strong reliability coefficient.

Analysis of Data

Using descriptive statistical tools the data gathered were then analyzed. The weighted mean of the responses with regard to readiness survey, attitude survey, problems and benefits survey questionnaires as well as the correlation between readiness and attitude and difference among attitudes of respondents were tabulated and computed then later on analyzed and interpreted.

RESULTS AND DISCUSSION

Table 2
Readiness of the Respondents in Online Schooling

Item/s	Teachers		Parents		Students	
	Weighted mean	Description	Weighted mean	Description	Weighted mean	Description
1. I can use email, internet , messenger with ease	3.90	SA	3.2	A	3.3	SA
2. I have enough knowledge on how to use google apps and internet browsers	3.70	SA	3.2	A	3.1	A

3. I felt confident in using LMS required by School	3.40	SA	3.1	A	3.1	A
4. I am technology savvy.	3.10	A	2.8	A	3.0	A
5. The school trained me well in online teaching mode.	3.10	A	3.0	A	3.1	A
6. I am very familiar and skilled in using features of Learning Management System	3.00	A	2.9	A	3.2	A
7. I have gadget/s which is/are adequate for online teaching	3.60	SA	3.3	SA	3.3	SA
8. I can use communication tools proficiently such as Zoom, Google Meet, BigBlueButton etc.	3.80	SA	3.2	A	3.4	SA
9. I can effectively create tutorial videos	3.00	A	2.8	A	2.9	A
10. I can construct modules, syllabus, learning contents and assessment materials effectively in LMS.	3.50	SA	3.0	A	3.2	A
11. I have strong internet connection	3.20	A	2.6	A	2.5	A
12. I am very much ready to teach using online modality.	3.40	SA	2.8	A	2.9	A
Overall Weighted mean	**3.39**	**SA**	**2.99**	**A**	**3.10**	A

In this study, readiness of the respondents achieves certain degree of positive response although not to the apex limit. It means that although they agree that they have certain degree of preparation for online schooling something more must be done for improvement. Yet, for a school that is starting to adapt, noticing that stakeholders have capability to utilize technologies is not a bad start at all.

The current K12 online program is still awash of turbulent waters of regional politics, temperamental technologies, innovative methods with no test of efficacy (Ronsisvalle and Watkins, 2005). Readiness to a certain extent provides avenue that sets

the motivation of the learners, parents and students to a positive level. In the absence or lack of it, the ability to deliver and achieve the learning goals may suffer.

As teachers acknowledge both the positive and negative sides of technology as it influences how we learn and survive, it is crucial to strike a balance between social or emotional pedagogy and the pedagogy of inclusion and integration of technology (McFarlane, 2011). Thus, technology plays a vital role as significant component in the implementation of online modality. The level of preparation will somehow define the level of adaptation.

Table 3
Survey of Respondents Attitudes towards Online Class

Item/s	Teachers		Students		Parents	
	Weighted mean	Description	Weighted mean	Description	Weighted mean	Description
1. It is fun teaching online class.	2.90	A	2.8	A	2.7	A
2. There is lesser work in online class.	2.00	D	2.8	A	3.0	A
3. Teaching experiences are more effective in online class.	2.00	D	2.3	D	2.4	D
4. It is easy to manage time with less synchronous schedules in online class.	3.10	A	2.9	A	2.9	A
5. There are adequate interactions in Online Class.	2.30	A	2.9	A	2.8	A
6 Cheating is easy to manage in online modality.	2.80	A	3.0	A	2.8	A
7. I find it cheaper and minimize my expenses working at home	2.70	A	2.9	A	2.9	A
8. I can easily cope with the digital skills required in teaching.	3.10	A	3.1	A	2.8	A
9. Preparing modules, syllabus and exams became simpler and systematic.	2.70	A	2.9	A	2.9	A
10. Online class is the better option during pandemic.	3.50	SA	3.3	SA	3.3	SA
11. There are fewer interruptions in teaching online.	2.40	D	2.6	A	2.8	A

12. I can manage my time well in this modality	3.50	SA	2.9	A	2.8	A
13. Teaching online is satisfying.	2.40	D	2.7	A	2.6	A
14. I can employ diverse teaching method well	2.70	A	2.9	A	2.9	A
15. Problems online can easily be solved.	2.20	D	2.9	A	2.5	A
Overall Weighted Mean	**2.69**	**A**	**2.86**	**A**	**2.79**	**A**

It is interesting to note that flexible/online class schooling is said to be the better option during pandemic. This highlighted in the study of Dhawan (2020) which expressed that this pandemic situation challenged the education system across the world and forced educators to shift to an online mode of teaching overnight. Many academic institutions that were earlier reluctant to change their traditional pedagogical approach had no option but to shift entirely to online teaching–learning.

Likewise, it is also revealing that effectiveness of teaching experiences in online class obtained flak. This may be due to the factors involving limitation in internet and interactions. Online class is also considered arduous among students, teachers, and parents. That is why Gilbert (2015) stressed in his study the challenges of online schooling which are hurdles among stakeholders but definitive measures can be undertaken to overcome those and increase the efficacy of teaching-and-learning methods that have been adversely affected and ensure that students do not fall behind (Aliyyah et al., 2020).

Table 4
Relationship between the Readiness and Attitude of Teachers, Parents, and Students

Correlations

		Attitude of Teachers

Readiness of Parents	Pearson Correlation	.398**
	Sig. (2-tailed)	0
	N	182

Relationship between the Readiness and Attitude of Students

Correlations

		Attitude of Students
Readiness of Students	Pearson Correlation	.429**
	Sig. (2-tailed)	0
	N	139

Table shows the relationship of readiness and attitudes of teachers, parents and students. Since our computed Pearson r for parents is .398 and students Pearson r is .429 at significant level of .05, the null hypothesis is accepted. There is significant relationship between readiness and attitudes towards online/flexible learning based on the response of parents and students. However, based on the lens of teachers the result is the opposite.

Varied findings on different variables revealed in the study of Tang (2013) that first, the use of technology in education was not a hindrance to the students. Second, blended learning adaptability, which was modelled as a second-order formative construct and formed by four first-order reflective constructs—attitude towards online learning, study management, online interaction, and learning flexibility—had a positive relationship with student readiness for blended learning. Third, attitude towards classroom learning had a negative relationship with student readiness for blended learning. An understanding of student attitude towards different learning aspects can be critical in the assessment of student readiness for blended learning, which is a prerequisite for successful implementation of blended learning.

The findings show that having readiness follows that positive attitude also echo among students and parents. Increase readiness links to developing encouraging attitudes. Respondents' readiness amounted to their feelings, beliefs or perspectives towards an issue or phenomenon. The result established that whenever there is a greater extent of preparation, an affirmative or positive attitude manifests which tantamount to better cooperation, motivation and collaboration among key players in education. On the other hand, this is in contrary to the response of the teachers. Further study in other context is suggested to explore additional findings which will prove or disprove the current findings.

Table 5
ONEWAY Attitude on Online Schooling by Groups

/MISSING ANALYSIS
/POSTHOC=TUKEY
ALPHA(0.05).

ANOVA

Attitude On Flexible Learning

	Sum of Squares	df	Weighted mean Square	F	Sig.
Between Groups	0.581	2	0.291	1.655	0.193
Within Groups	57.604	328	0.176		
Total	58.185	330			

Table shows the result of comparison among attitudes of teachers, students and parents using one -way ANOVA. It shows that p value 0.193 is greater than .05 level of significance, the null hypothesis is accepted. There is no significant difference among attitudes of teachers, students and parents. Researches however affirmed that there is a difference among attitudes of stakeholders with regards to using new technologies in school which includes online modality.

In particular, the study of Al-Emran, Elsherif and Shaalan (2016) different factors have been examined to test where there is a significant difference among students and educators' attitudes towards the use of M-learning, such as gender, age, country, level of study, smartphone ownership, major in terms of students and age, country, academic rank, academic experience and smartphone ownership in terms of educators. Findings revealed significant differences among the students' attitudes towards M-learning with regard to their smartphone ownership, country and age. Furthermore, results indicated that M-learning can be one of the promising pedagogical technologies to be employed.

It contradicts with the findings of this study that attitudes of the respondents do not vary. It implies that they have common beliefs and feelings towards online schooling. The unanimity of the respondents' attitude implies that their perception, beliefs and feelings towards online schooling maybe due to their common experiences in the implementation of online modality.

Table 8
Improvements needed for Online Schooling as Perceived by the Respondents

	Teachers		Parents		Students	
Item	Weighted mean	Description	Weighted mean	Description	Weighted mean	Description
1. Activities in online class should be organized better	3.6	SA	3.4	SA	3.3	SA
2. Provide more training about digital platform.	3.8	SA	3.2	A	3.3	SA
3. Provide Psycho-social support	3.6	SA	3.4	SA	3.3	SA
4. Remedial classes and exams be provided	3.8	SA	3.4	SA	3.3	SA
5. More parents consultations and interactions	3.8	SA	3.2	A	3.1	A
6. Provision for strong internet connections for teachers.	3.8	SA	3.4	SA	3.4	SA
7. Reduce teachers paper works to focus more on mastery of delivery	3.6	SA	3.5	SA	3.3	SA
8. Reduce screen-time exposure to both teachers and students	3.8	SA	3.5	SA	3.3	SA
9. Provide parents training on effective engagement in online modality.	3.6	SA	3.2	A	3.2	A
10. Incorporate learning technologies in strategic plan	3.8	SA	3.4	SA	3.3	SA
Overall Weighted mean	**3.72**	**SA**	**3.34**	**SA**	**3.27**	**SA**

Based on the result it is affirmed that online schooling can be improved as a matter of change in policies, provisions, and programs. Aside from the things commonly regarded as beneficial for the improvements of online learning such as establishing norms, creating accessible content, strengthening relationship, fostering lively interactions and connecting with families (Nielsen, 2020) there are other concerns that

are recognized to be of utmost needs to be included in the program of instituting technologies like using online modality in teaching and learning.

Findings above show the strong sentiment of respondents that provisions of giving emphasis on those items mentioned above are necessary especially when it comes to provision of strong internet connections. This is manifested as they strongly agree on most items enumerated.

Conclusions

1. Teachers, students and parents are prepared on online modality. This concurs with the pre-survey result conducted by the school to the clients before resorting to online class modality.
2. There is significant relationship between readiness and attitude.
3. There is no significant difference among attitudes of teachers, parents and students.
4. There are benefits in online schooling yet improvements are needed including more provisions for upgrade and enrichment of facilities, resources and technologies as perceived by the respondents.

Recommendations

1. Strengthen the program for online schooling by providing the stakeholders with support and good provisions for learning online.
2. Incorporate upgrade of learning technologies and capabilities to strategic plan
3. Provide teachers with resources and flexibility
4. Accommodate suggestions from stakeholders to improve the online learning program, make it adequate and effective to build positive attitudes towards online schooling for its success.
5. Have the evaluation of the online program which includes monitoring of the effectiveness involving the stakeholders, teachers, parents and students whose attitudes are affected by how effective or adequate the program is.
6. This study may be administered in other settings and contexts to find out more data regarding online schooling using the same or other variables with varied participants and stakeholders.

Compliance with Ethical Standards

Researcher obtained the informed consent from all participants involved in the study, including students, faculty, and parents and clearly stated the purpose of the study, the procedures involved, the potential risks and benefits, and the participants' rights to voluntary participation, withdrawal, and confidentiality.

The identity and anonymity of the respondents are considered. They were aware of the purpose of the study and that the data gathered will only be used primarily for research. The privacy of participants records are considered and ensure that any personal information or sensitive data collected during the study is handled securely in

accordance with Data Privacy Act. Necessary permission were secured and complied with before collecting data.

The proponent assured that research design, procedures, and interventions prioritize the well-being, convenience, comfort and best interests of participants by minimizing potential hazards, distress, conflict with work schedules or risks associated with participating in the study. This study promotes equity and inclusion by taking into account the diverse backgrounds, needs, perspectives, culture and status of participants. Researcher avoids any form of discrimination, stigma or bias in the research process and efforts are made with due diligence to include underrepresented groups and ensure equitable access to research opportunities.

Cooperation and respect are established by respectful and cooperative relationship with participants and the school. Researcher also acknowledged and values the contributions of participants and ensures that their voices and experiences are accurately expressed and interpreted in the research results. Research is conducted with integrity, honesty and transparency and devoid any fabrication, falsification, or plagiarism by adhering to ethical guidelines to maintain the integrity and trustworthiness of data based on the result.

Acknowledgments

The researcher acknowledged the support of administration and faculty of Nueva Ecija University of Science and Technology.

BEYOND TASTE: EFFECTIVENESS OF TEAM-BASED AND VIDEO-BASED APPROACHES ON STUDENTS' PLATE PRESENTATION SKILLS

Phoebe D. Alforque

Lourdes College, Cagayan de Oro City, Philippines

https://doi.org/10.5281/zenodo.11545856

ABSTRACT

The shift in education caused the teachers to use different methodologies and learning strategies to cater to the needs of the students. Given the hands-on nature of cooking instruction, it is crucial for instructors to use teaching approaches that optimize students' learning experiences to enhance their plate presentation skills. This study looked into the effectiveness of the Team-based and Video-based learning approaches on the plate presentation skills of cookery students. A quasi-experimental design was employed. Statistical tools such as mean, standard deviation, and t-test for paired samples were used to assess the level of plate presentation skills before and after the implementation of interventions. Additionally, ANCOVA was utilized to compare the effectiveness of the two approaches. One group was exposed to team-based learning while another group was exposed to the video-based learning. The findings revealed a significant increase in the post-test plate presentation skills score for both groups. Specifically, students in the team-based learning group received very good ratings on proper balance, color, shape and garnish. In contrast, students in video-based learning group received very good ratings in color, shape, and garnish, but only a good rating in proper balance. The data indicate that both approaches significantly influence students' plating skills across all sub-skills. However, the video-based learning was found to be more effective than the team-based learning in improving shape and use of garnish. However, it is the team-based that is more effective in improving balance. The study points to the need for teachers to consider utilizing collaborative activities for students to work and learn from their peers and even share their knowledge. Moreover, it suggests the use of video discussions or tutorial videos as effective tools for teaching new skills.

Key Words: *Plate presentation skills*, *Team-based learning, Video-based learning*

INTRODUCTION

The Cookery NCII Qualification is a comprehensive program aimed at equipping individuals with the necessary competencies to effectively achieve specific tasks (TESDA, 2014). Derived from the competency map of the Tourism Sector's Hotel and Restaurant domain, a key component of this qualification involves the preparation of meat dishes (Unit Code: TRS512338). To excel in this aspect, candidates must demonstrate the ability to present meat dishes attractively while adhering to classical, cultural, and enterprise standards wherein plate presentation is a skill that they need to master.

Plate presentation is the final phase in culinary presentation and is critical for displaying the quality of food while engaging guests' senses (The Culinary Pro, 2023). Moreover, food presentation and plating are important parts of culinary arts that play an important role in attracting guests and creating the environment of a restaurant (The Art of Food Preparation, 2022. With these, professional chefs' plate presentation talents include a variety of techniques such as color coordination, garnishing, and stacking, which highlight the creativity and artistic aptitude of culinary specialists and contribute to both visual appeal and flavor (Smith and Jones, 2018).

Given the hands-on nature of cooking instruction, instructors should use teaching approaches that optimize students' learning experiences. Traditional tactics such as straight talk or PowerPoint presentations may not be beneficial in improving plate presentation skills. As a result, an experimental approach integrating team-based learning and video-based learning is required to establish their impact on TVL students' plate presentation skills (Kazi et al., 2021).

Finally, the purpose is to provide students with effective learning methodologies and to promote their growth in this crucial culinary area, ensuring that the future generation of chefs can master the art of plate presentation and create outstanding dining experiences for their clients.

Framework

This study assumed that that team-based and video-based learning approaches are facilitative of the development of TVL students’ plate presentation skills. This study is anchored on the theory of Constructivism of Jean Piaget and the Multimedia Learning Theory of Richard Mayer. Constructivist learning theory which is anchored from McLeod’s (2023) conceptualization, is a teaching methodology shaped by the integration of dynamic, experiential, and hands-on aspects of culinary education, establishing a theoretical foundation to incorporate and master the plate presentation skills.

A recent study by Rodriguez et al. (2019) shows that culinary education can be more empowered and enhanced with the assistance of active participation by the students. In line with the constructivist learning theory, knowledge is actively constructed by students through interactions, practical experiences, and reflective processes.

Moreover, Chen et al.'s recent research (2020) emphasizes the value of social contacts in the development of culinary skills. The cooperative efforts that are highlighted in team-based learning are consistent with research indicating that knowledge in the culinary domain is constructed through interactions and shared experiences with peers, teachers, and the culinary environment.

Team-based learning (TBL), as defined by Parmalee and Michaelsen (2010), is an instructional strategy that promotes collaborative learning and teamwork among students to enhance understanding of the course and develop the skills necessary to complete the course. It has different kind of strategies such as team formation, application activities, peer teaching, team reflection, and inter-team competition. First, team formation is a TBL strategy that has a big impact to the learning process of the students because of how successful and effective it can be, wherein students will be given the opportunity to work in team wherein they can share ideas, their skills in cooking, and guide their teammates (Parmalee & Michaelsen, 2010). Peer-teaching allows the students to closely work within a member to improve learning and skill, a peer take turns in leading the task in preparing meals and assist each other to discuss ideas and outline strategies and divide tasks to finish the task easily (Haidet, et.al., 2014). Fourth, team reflection encourages students in ongoing team progress wherein they can evaluate their performance and pinpoint their strengths for potential growth of the team and weaknesses to improve for the next team activity.

The Multimedia Learning Theory (MLT), developed by Richard Mayer, provides a valuable framework for educators to enhance the educational experience by harnessing technology's potential in the classroom (Ramlatachan, 2019).

Moreover, MLT centers on the idea that when educators utilize various tools and mediums, such as audio and visuals, they can more effectively engage students and cater to the diverse ways in which individuals learn. According to Mayer, as cited by Ramlatchan (2019), combining different types of information—like words and pictures—makes learning easier and more effective since it aligns with how the brain works during learning.

The Technical-Vocational-Livelihood (TVL) Home Economics Cookery strand under the senior high school curriculum requires the students to acquire a set of competencies and skills essential to the cooking industry (DepEd and TESDA). With constructivist learning theory and multimedia learning theory, educators will be able to provide the students with the opportunity to improve their skills. Since cooking is a life skill that requires a lot of skills, it is important for the students to learn how to work with others, learn from each other, and use available resources to improve themselves.

At the core of this study is the exploration of plate presentation skills among TVL students. Plate presentation skills among cookery students have evolved significantly in recent years, reflecting broader shifts in culinary education and industry demands. A holistic approach to plate presentation is emphasized in contemporary literature,

incorporating aspects of aesthetics, cultural sensitivity, sustainability, and technical innovation. Cookery students are now encouraged to not only master the technical aspects of cooking but also develop a keen eye for balance, harmony, and creativity in their presentations. Research by Garcia and Rodriguez (2022) emphasizes the value of cultural sensitivity in accommodating a range of tastes and preferences.

Moreover, Chen et al. (2020) examine how technological developments are being incorporated into plate presentation techniques, offering students new avenues for creativity and innovation.

Furthermore, contemporary culinary arts literature acknowledges the potency of vibrant hues as a dynamic tool in the chef's palette. Chen et al. (2022) emphasizes the use of vibrant colors as a powerful component of the multisensory experience offered to diners. The integration of vibrant hues is seen as a deliberate strategy in creating a sensory symphony that goes beyond taste, engaging sight and enhancing the overall enjoyment of a dish. This study aligns with the evolving nature of culinary arts, where chefs are increasingly viewed as orchestrators of holistic dining experiences.

The figure 1 shows the use of two interventions, team—based learning and video-based learning, in determining the plate presentation skills of the students. The plate presentation skills with 5 criteria: proper balance, use of color, shape (proportion), use of garnish, and overall presentation; will be evaluated before and after the implementation of the intervention. A pre-test will be implemented to measure the plate presentation skill of the students and a post-test to measure the skill of the students after a month-long implementation of the intervention.

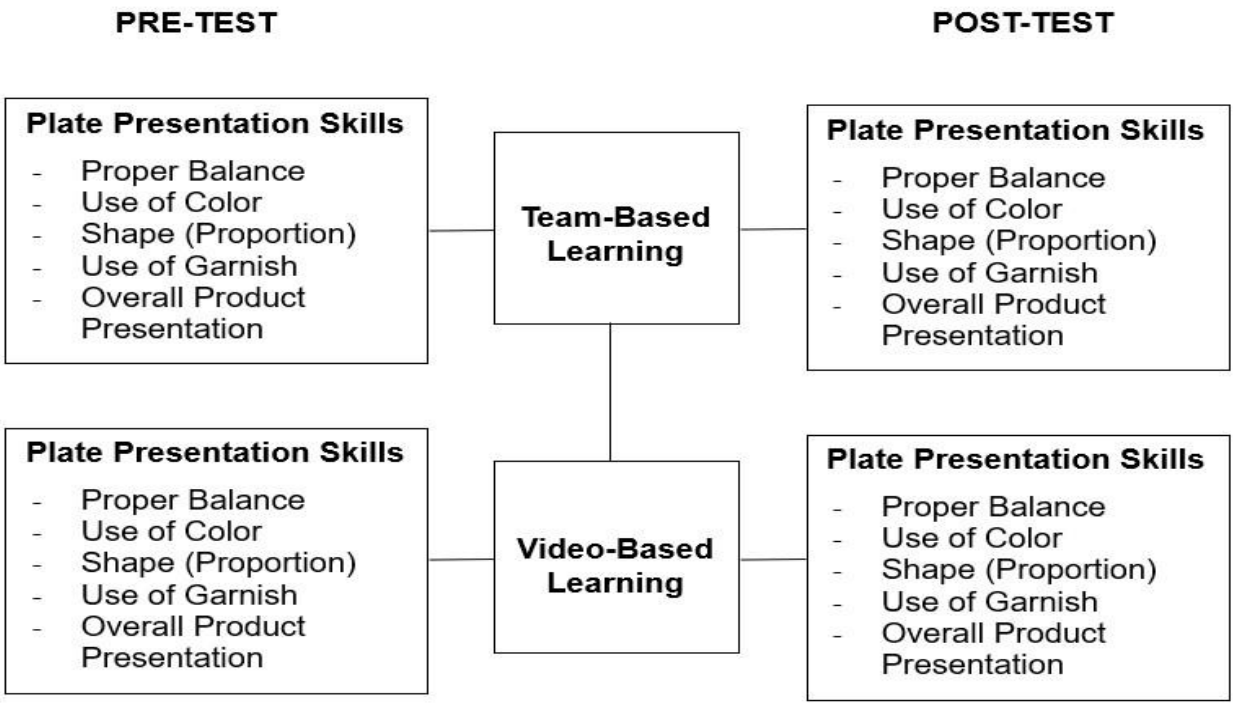

Figure 1. *A Conceptual Model Presenting the Variables of the Study*

Figure 1. Schematic Presentation of the Study

Research Objective

This study aims to determine the effectiveness of Team-based Learning Strategy and Video-Based Learning Strategy in the Plate Presentation Skills of the Cookery students of a public school.

METHODOLOGY

This study utilized a quasi-experimental design with descriptive statistics such as mean, frequency, percentage distribution and standard deviation will be employed to describe the plate presentation skills of the participants before and after the conduct of intervention. And also, t-test for paired sample will be used to compare the plate presentation skills of the participants before and after the implementation of the intervention. And ANCOVA will be employed to compare the plate presentation skills of each group after the implementation of the intervention.

RESULTS AND DISCUSSION

Plate Presentation Skills	TEAM-BASED APPROACH					VIDEO-BASED APPROACH				
	Pre test M	**Post test** M	**t**	**p**	**Effect Size**	**Pre-test** M	**Post test** M	**t**	**p**	**Effect Size**
Proper Balance	2.09	3.76	8.63**	.000	-1.58	2.36	3.28	5.15**	.000	-.940
Use of Color	2.43	3.98	6.73**	.000	-1.23	2.36	4.03	10.58**	.000	-1.93
Shape	1.94	3.96	11.87**	.000	-2.17	2.32	4.26	14.96**	.000	-2.73
Use of Garnish	1.90	3.90	18.06**	.000	-3.30	2.43	4.28	14.81**	.000	-2.70
Overall Product	2.63	4.31	12.42**	.000	-2.27	2.93	3.77	4.96**	.000	-.905

Presentation	

*Legend: **significant at 0.01 level*

Table 1 presents the test result of the difference in the participants' plate presentation skills before and after the interventions. The overall posttest result shows a significant difference in the students' overall performance in all sub-skills in plate presentation skills.

The result of the study is supported by Galatsopoulou, et.al. (2022) and Kazi, et.al. (2021) that video-based learning enhances the students understanding about plate presentation techniques and its impact on their skills. The result also supports the study of Surgener, et.al. (2021) that utilizing video-based learning presents a promising avenue in enhancing culinary skills. The increase and improvement on the plate presentation skills of the students before and after the video-based learning strategy is supported by the study of Chen, et.al. (2019) and Smith and Anderson (2018). The same study strongly shows the effectiveness of video-based instructions in enhancing learning outcomes and students' engagement, which is also agreed by Johnson, et.al. (2020) that video-based instruction not only improves comprehension and retention but also increases engagement and participation.

Analysis of Covariance for Plate Presentation Skills by Group

	TEAM-BASED APPROACH GROUP	VIDEO-BASED APPROACH GROUP	**F**	**p**	**Effect Size**
Balance	3.74	3.29	9.66**	.003	.145
Color	3.98	4.03	.123	.727	.002
Shape	3.94	4.27	5.37*	.024	.086
Use of Garnish	3.92	4.26	8.91**	.004	.135
Overall Plate Presentation	4.05	4.07	.130	.719	.002

**significant at 0.01 level
* significant at 0.05 level

The results further revealed significant differences in the means of their skills in balance (F=9.66, p = .003), shape (F=5.37, p = .024), and garnish (F=8.91, p = .004) but not in the use of color. Compared to the other subskills of balance, shape, and garnish,

the use of color did not show statistical significance. This could be due to several reasons unique to the Grade 12 TVL student population. For one, plate presentation color choices are very personal and can be impacted by differences in culture as well as personal preferences. Color combinations frequently depend on individual and cultural tastes, in contrast to balance, shape, and garnish, which have clearer, more teachable rules. Another reason could be that students may already have preconceived ideas about the use of color because of their individual preferences and past experiences. It may be difficult to change these pre-existing preferences for color through instructional interventions. By contrast, when structured learning approaches are used, students may be more familiar with ideas like balance, shape, and finish, which may result in more noticeable improvements in the students' plate presentation skills in these areas.

Moreover, the estimated marginal means showed that the team-based approach group had higher plate presentation skills than the video-based approach group in terms of balance, with a mean score of 3.74 compared to the video-based approach group's mean of 3.29. According to Salas et al. (2017), team-based strategies allow students to collaborate with others helping them develop their specific skills and preparing them for the collaborative nature of the workplace. Hence, participating in team-based activities with Grade 12 TVL students likely allowed them to learn from and collaborate with their peers, which improved their understanding of portion sizes and symmetrical plating.

In a nutshell, students in Grade 12 TVL greatly enhance many sub-skills related to plate presentation using both team-based and video-based approaches. The collaborative aspect of the tasks is perhaps the reason why the team-based approach is so effective in promoting balance. By comparison, because of the benefits of visual and repetitive learning, the video-based approach performs better when it comes to improving abilities linked to shape and design. These results imply that the best strategy for developing thorough plate presentation skills in culinary education may include the effective use of varied learning approaches such as team and video-based approaches.

Conclusions and Recommendations

The implementation of team-based learning and video-based learning strategies is very important in teaching not only the plate presentation skills of the students, but in overall skills of TVL students. Teachers who play a vital role in the learning process of the students must consider of not only using the traditional strategies of teaching such as pure discussion, pen-and-paper test, and oral recitation, but also using collaborative learning and using of media to make the learning process more engaging and interesting for the students.

The constructivist learning theory and multimedia learning theory which are the basis for this study were emphasized and confirmed in this study. The students plate presentation skills significantly improve after the implementation of team-based learning and video-based learning strategies. Moreover, team-based learning is found to have a higher difference on the pre-test and post-test scores compared to the video-based

learning. This result emphasizes that collaborative learning is significant in improving the skills of the students.

Teachers, that they may consider utilizing collaborative activities for students to work and learn from their peers and even share their own. Also, using video discussions so that students can rewatch an instruction they need to master. Educational Institutions to consider activities and training that will be helpful for the development of the TVL students to understand the culinary industry. Future researchers may consider the result of this study and increase the number of participants to have a wider scope and understanding on the implementation of different learning strategies.

Compliance with Ethical Standards

As stated in RA 10173, or the Data Privacy Act of 2012, all personal data must be collected for valid reasons. Both parties giving and receiving information should be aware of it. Thus, the researcher secured an assent form from the parents of the research participants, and attached therewith was the informed consent from their parents/guardians. The confidentiality of the data gathered the risks, and the benefits of their child's participation in the study were also mentioned and explained. The parents/guardians were also informed that their child's participation in the study was voluntary; hence, withdrawing their child's participation at any time was possible.

With that being stated, all data collection was done with permission to ensure the confidentiality of the information. Thus, all personal information must be relevant and used only for the study's intended purpose. The researcher introduced the research purpose to the participants in the first week before administering the interventions. The participants were involved in the study for 5 weeks only. In the first week, after giving orientation, a pre-test was administered on both interventions in each group of respondents. After that, the groups were exposed to different instructional interventions, and the fifth week was the Post-test of each intervention. The learners in both groups took a posttest after the interventions to determine if there were improvements in their plate presentation skills performance.

The ethical considerations of this study, (adapted from Muhammed Hassan, 2023) included transparency, confidentiality, voluntary participation, risks and benefits of the study, and consent and assent for minors.

Transparency. The researcher observed transparency to the participants and people involved in what is the main purpose, goals, and objective of conducting the research. The researcher will read the research problem, significance, and purpose of the research to the participants. The outcomes or results of the research will also be available and transparent to the participants and people involved.

Confidentiality. In line to protect the rights of the study participants, all the information gathered from this study is kept private and confidential. As stated in RA 10173, or the Data Privacy Act of 2012, all personal data must be collected for valid reasons. Both parties giving and receiving information should be aware of it.

Voluntary Participation. The participation of the respondents was completely voluntary and anonymous to protect their privacy and information was given whenever the respondents do not understand, before deciding whether to participate or not in the study. Respondents' names did not appear anywhere and no one except the researcher knew about respondents' specific scores.

Consents and Assent for Minor. The researcher made sure that the participants of the study were fully aware of the purpose of the study, and the benefits that they and the school got from the study. The study conducted with the approval of the concerned school authorities, parents, and as well as the permission of the respondents themselves.

Risks of Study. During the entire duration of this study, they may get burns from cooking, and cuts while preparing the ingredients. To avoid these dangers, they were required to wear PPE or Personal Protective Equipment such as gloves, apron, hairnet, face mask, and foot socks all the time during the entire duration of the cooking activities. And if these dangers occur, the HE laboratory has its own safety measures corner and a complete set of Medicine and Health kits.

Benefits of Study. Students were given a grade that is according to their performance as a student. Also, this study provided important information that is very useful to the cookery students, to the teachers, and even public and private administrators. The results, discussions, and findings of this study can help teachers to improve strategies that will help them improve your knowledge and skills in plate presentation.

Vulnerability. As school's policy for the safety of its students, for some unavoidable circumstances, the researcher gave consideration and respect to the parents/guardians and the research participants whenever they could not join or participate in the class conducted four times a week to ensure their rights were also observed. The researcher also allocated a specific budget to be given to those research participants who would not able to provide ingredients.

Collaborative study terms of reference. The researcher will get the approval of the Guidance Designate of the School where the participants are enrolled. After seeking the approval of the school head, the school guidance designate will also be oriented and informed about the experimental study to secure the rights of the students.

Moreover, a student can withdraw from the study if he/she is not comfortable with the conduct of the study. The participants can leave or opt to not continue his/her participation in the study. With these, the participants can consider the withdrawal criteria in not participating in the study. Lastly, the participant can also inform the researcher, right away, if he/she wishes to withdraw from the study, wherein he/she can provide his/her reason(s) for withdrawing from the study but is not required to provide one.

BEYOND WORDS: ENHANCING CREATIVE WRITING PROFICIENCY THROUGH SENSORY VISUALIZATION

Michael Lizada Muega, LPT

[1] *Department of Education, Optaciano Hilay National High School, Davao City, Philippines*

https://doi.org/10.5281/zenodo.11479557

ABSTRACT

This action research endeavors to tackle the hurdles impeding creative writing proficiency among Grade 11 General Academic Strand (GAS) students at Optaciano Hilay National High School. Employing sensory visualization techniques as interventions, this study aimed to augment self-expression, critical thinking, and communication skills. This study adopted an action research design, involving five Grade 11 GAS students who underwent pre- and post-intervention interviews. Thematic analysis was applied to data gathered during the two-week period of integrating sensory visualization techniques into the creative writing process. Initially, students faced challenges such as initiation and cognitive clarity issues, along with pressure, lack of enjoyment, and struggles in conveying ideas effectively. Following the intervention, notable improvements emerged: heightened idea generation, enhanced cognitive clarity, increased enjoyment and engagement, and improved expression and ability to overcome obstacles. Notably, their written creative compositions exhibited enriched detail and narrative flow, enhanced descriptive imagery and vividness, and amplified emotional depth, thereby indicating the effectiveness of sensory visualization. Ultimately, this study provides valuable insights for teaching, advocating structured approaches and techniques, bolstering student engagement and enjoyment, and refining expression and communication skills.

Keywords: *Creative writing, Sensory visualization, Action research, Grade 11 GAS students, Writing Proficiency, Language Teaching*

INTRODUCTION

Within the Grade 11 General Academic Strand (GAS) at Optaciano Hilay National High School, creative writing serves as a fundamental tool for fostering self-expression, critical thinking, and effective communication. However, many students within this group face notable challenges in refining their creative writing abilities.

One prevalent obstacle among Grade 11 GAS students is the struggle to initiate and articulate their imaginative ideas effectively. Often, they find themselves grappling with writer's block when confronted with the task of commencing a new writing project. This initial barrier not only impedes their progress but also dampens their enthusiasm for creative expression. Furthermore, even when they manage to surmount this hurdle, students frequently encounter difficulties in conveying their thoughts with vividness and coherence, hindering the realization of their full creative potential.

In recognition of these challenges, this action research sought to introduce an innovative approach, leveraging sensory visualization, to enhance the creative writing prowess of Grade 11 GAS students. Sensory visualization entails the use of descriptive language that appeals to the different senses, aimed to invite readers to vividly imagine the settings, scents, sounds, tastes, and textures within the narrative. To achieve this goal, the teacher provided prompts to learners throughout the writing process. These prompts encourage learners to immerse themselves in rich sensory experiences, thereby deepening their engagement with their writing and enhancing its impact on the reader.

Sensory Visualization is identified as one of the most effective approaches to assist learners in their creative writing dilemma. This innovative strategy is designed to facilitate students in commencing their essays and sustaining a coherent stream of ideas. As highlighted by Cron (2012) in her work, engaging the senses through descriptive imagery not only captivates readers but also immerses them in the narrative, rendering it more compelling and memorable.

In the classroom, this technique unfolds through a series of specific steps designed to engage students' senses and unleash their creativity. Firstly, students are presented with a writing prompt that helps them to envision a particular scenario or setting, such as a beach scene or a bustling city street. They are then encouraged to close their eyes and mentally transport themselves to this environment, focusing on each of their senses in turn.

Students are guided to visualize the sights of their chosen scene, imagining the colors, shapes, and movements that surround them. They are prompted to envision the sun-drenched shoreline, the azure expanse of the sea, and the gentle sway of palm trees in the breeze.

Next, students are encouraged to tune into the sounds of their imagined setting, listening for the crash of waves against the shore, the calls of birds overhead, and the laughter of

beachgoers in the distance. They are prompted to imagine the buzz of city life, with honking horns, bustling crowds, and street vendors hawking their wares.

In addition to sight and sound, students are prompted to focus on the sensations of their chosen environment, imagining the warmth of the sun on their skin, the cool touch of sand between their toes, and the refreshing breeze on their face. They are encouraged to conjure up the taste of salt on their lips and the scent of sunscreen and saltwater in the air.

Through this transformative endeavor, the researcher aspires to foster a supportive environment where creative writing becomes not only accessible but also enriching and enjoyable for Grade 11 GAS students. By harnessing the power of sensory visualization, the researcher aimed to empower students to unlock their creativity, overcome writer's block, and express themselves with depth and resonance, both within the academic setting and beyond.

Research Questions

This action research aimed to seek answers to the following questions:

1. What are the experiences of Grade 11 GAS students with creative writing before and after the implementation of sensory visualization?

2. What are the observed improvements in the Grade 11 GAS students' creative writing output after the implementation of sensory visualization?

3. What insights can be drawn from the findings of the study?

METHODOLOGY

This study used action research design, recommended by scholars like McNiff and Whitehead (2016), to engage with the students and tackle real-world challenges effectively. Action research is well-suited for education because it involves collaboration between researchers and participants, allowing for active problem-solving (Stringer, 2019). This approach aims not only to understand the issues in creative writing faced by Grade 11 GAS students but also to develop and implement solutions together with them. Through ongoing reflection and action, action research promotes meaningful improvement in educational settings (Mills, 2018). It ensures student voices are heard, empowering them in the research process (Reason & Bradbury, 2019). Overall, this action research design aligns with modern educational principles and provides a strong framework for addressing creative writing challenges among Grade 11 GAS students.

Five students have been chosen through purposive sampling; a method that selects participants based on specific criteria relevant to the research objectives (Creswell &

Creswell, 2017). This sampling approach ensures that the selected students represent diverse perspectives and experiences within the target population (Patton, 2015). The primary data for this study were gathered through in-depth interviews conducted with the selected students regarding their experiences before and after the intervention. These interviews will provide rich qualitative data, allowing for a detailed exploration of the students' thoughts, experiences, and perceptions regarding creative writing (Merriam & Tisdell, 2016). By interviewing the participants of their experiences before and after the intervention, the study can assess the impact of the sensory visualization techniques on their creative writing abilities and attitudes (Creswell & Poth, 2017). This comprehensive approach to data collection enables a thorough understanding of the intervention's effectiveness and its implications for improving creative writing skills among Grade 11 GAS students.

The data were gathered using an interview guide crafted by the researcher, drawing upon established frameworks recommended by experts in educational research methodology such as Patton (2015) and Kvale and Brinkmann (2015). Participants engaged in semi-structured face-to-face interviews conducted by the researcher, fostering an environment conducive to open and detailed exploration of their experiences and perceptions. These interviews were conducted both before and after the intervention, allowing for a comprehensive understanding of the impact of Sensory Visualization on the creative writing process of Grade 11 GAS students.

The interviews with the participants were transcribed, translated, and then thematically evaluated. This study employed reflexive thematic analysis (RTA) as outlined by Braun and Clarke (2006). This flexible method allows for iterative engagement with the data, emphasizing the researcher's active role in theme identification and development. The analysis followed a six-step process: (1) familiarization with the data; (2) generating initial codes; (3) searching for themes; (4) reviewing themes; (5) defining and naming themes; and (6) producing the report.

Familiarization with the Data. As defined by Nowell et al. (2017), familiarization involves immersing oneself in the data to gain an in-depth understanding. Operationally, the researcher read the transcripts and listened to the audio recordings to identify key ideas and patterns, noting initial impressions and recurring concepts.

Generating Initial Codes. Terry et al. (2017) describe this step as systematically coding the data by identifying meaningful segments related to the research question. In this study, the researcher tagged each relevant piece of data with a code that encapsulated its essence, creating a structured foundation for theme development.

Searching for Themes. According to Vaismoradi et al. (2013), this step involves collating codes into potential themes. The researcher examined the coded data to identify broader patterns of meaning, grouping similar codes together to form initial thematic categories.

Reviewing Themes. King and Brooks (2018) state that this step requires evaluating the potential themes to ensure they accurately represent the data. The researcher refined

themes by comparing them against the original data and the entire data set, ensuring coherence and relevance.

Defining and Naming Themes. Joffe (2012) describes this step as clearly defining each theme and assigning them descriptive names. The researcher refined the themes to capture their core meaning, ensuring each theme provided a clear and distinct understanding of the data.

Producing the Report. Kiger and Varpio (2020) define this final stage as organizing the themes into a coherent narrative. The report included detailed descriptions of each theme, supported by illustrative quotes from the data, demonstrating their relevance and grounding in the participants' experiences.

RESULTS AND DISCUSSION

Experiences with Creative Writing among Grade 11 GAS Students Before Intervention

Struggle with Initiation and Cognitive Clarity. Before the implementation of sensory visualization techniques, students frequently encountered significant challenges when attempting to start their creative writing assignments. This struggle often manifested as a form of writer's block, where students found themselves staring blankly at a page, unable to generate ideas or visualize scenarios. The mental block was particularly frustrating, as it not only delayed the writing process but also decreased students' confidence in their writing abilities. The inability to think clearly and produce coherent thoughts was a common experience among the students, contributing to their overall difficulty with creative writing tasks. Additionally, students lacked structured approaches to overcome this mental block, further exacerbating their struggles. The absence of effective strategies to guide their thought processes led to feelings of frustration and helplessness, making it difficult for them to engage with creative writing tasks meaningfully.

> *"Before I used the implementation of sensory visualization techniques it was kind of hard for me to think of a situation on the given scenarios."* ***(IDI 1.1a)***
>
> *"I experienced difficulties because I had a hard time thinking of what to write."* ***(IDI 1.1b)***
>
> *"Before implementing the sensory visualization techniques, I just only write my thoughts or what comes to my mind reading the theme."* ***(IDI 1.1c)***
>
> *"Before I use the sensory techniques my story that I create is not explaining all that they do on the character."* ***(IDI 1.1e)***

> *“Before using the techniques given, I was feeling a bit clueless and blankly staring at the paper for like a minute because I couldn’t think straight.”* ***(IDI 1.2a)***

Pressure and Lack of Enjoyment. Starting new writing projects was often associated with a sense of pressure and a lack of enjoyment among the students. The initial phase of writing was particularly daunting, as students struggled to gather their thoughts and translate them into coherent narratives. This pressure was not just about the content but also about meeting expectations and producing quality work. The lack of enjoyment in the process stemmed from the frustration of not being able to generate ideas and the constant worry about grammatical mistakes and proper structure.

The high stakes and fear of failure made creative writing feel like a burdensome task. Students' negative perception of writing assignments further hindered their ability to engage fully and enthusiastically with the process, leading to decreased motivation and productivity.

> *“Before using sensory visualization techniques I feel kind of pressure because it is kind of challenging gathering thoughts.”* ***(IDI 1.2c)***

> *“I am not actually good at writing even though I just need to revise my first writing, it is still challenging gathering thoughts.”* ***(IDI 1.3c)***

> *“Yes definitely, you’ll sometime have to think or choose whether you're using the right grammar, is it the right scenery, or on how you choose the start, body, and ending of the story you write.”* ***(IDI 1.3d)***

> *“The specific challenges I remember were my struggle to figure out what to write and the worry that I might make too many grammatical mistakes because I'm not that good at English.”* ***(IDI 1.4b)***

Difficulty in Conveying Ideas Effectively. Students often faced significant challenges in effectively conveying their thoughts and ideas in their creative writing. This difficulty was compounded by external distractions, such as noise and other environmental factors, which further disrupted their concentration and thought processes. Additionally, students struggled with organizing their thoughts coherently and creatively, making it hard to produce well-structured narratives.

Grammatical issues and a lack of familiarity with formal writing conventions also posed considerable obstacles. These challenges not only hindered the clarity and quality of their writing but also contributed to a lack of confidence in their ability to express themselves effectively.

> *“I have so many challenges I faced while I was writing my stories like I was so distracted by the noise and the surroundings around me, and I couldn’t think of something.”* ***(IDI 1.4a)***

"The specific challenges I remember were my struggle to figure out what to write and the worry that I might make too many grammatical mistakes because I'm not that good at English." ***(IDI 1.4b)***

"First is the gathering of thoughts, especially since I don't know how to write it in a proper and creative way, and the noise in the surroundings, it is hard to think and write especially when it is noisy." ***(IDI 1.4c)***

"The challenges that I encounter of writing stories is my grammar because I don't know how to write it in formal." ***(IDI 1.4e)***

Experiences with Creative Writing among Grade 11 GAS Students After Intervention

Improved Idea Generation and Cognitive Clarity**.** After the implementation of sensory visualization techniques, students reported a marked improvement in their ability to generate ideas and think clearly. These techniques provided a structured approach to ideation, helping students visualize scenarios and engage their senses in the writing process. By mentally transporting themselves to different settings and focusing on sensory details, students found it easier to start writing and maintain a coherent flow of ideas. This newfound clarity and structure significantly reduced the instances of writer's block and made the writing process more accessible and less intimidating.

The sensory visualization techniques allowed students to tap into their imagination more effectively, providing a vivid mental framework that guided their writing. This approach not only facilitated the initiation of their writing tasks but also enhanced the overall quality of their narratives by making them more detailed and immersive.

"After using the techniques, it was getting easy for me to think straight and eventually started writing as soon as possible." ***(IDI 1.1a)***

"After implementing the sensory visualization techniques, I can imagine the scene and can write the scenario a bit clearly." ***(IDI 1.1c)***

"After using the techniques, I was surprised by myself because I eventually write as soon as I get to think so many situations." ***(IDI 1.2a)***

"After using it my mind works pretty well because I eventually think is something easily." ***(IDI 1.3a)***

Increased Enjoyment and Engagement. The sensory visualization techniques not only improved the cognitive clarity of students but also significantly increased their enjoyment and engagement in the creative writing process. Students began to see writing as a more enjoyable and less daunting task, which was reflected in their increased enthusiasm and willingness to participate in writing activities. The structured sensory prompts made the

process of writing more engaging, allowing students to connect more deeply with their work and express their ideas with greater confidence and creativity.

This shift in perception from viewing creative writing as a chore to an enjoyable activity was crucial in enhancing their overall writing experience. The positive feedback loop created by the successful use of sensory visualization techniques led to greater satisfaction and a more positive attitude towards future writing projects.

> *"I even enjoyed it more because the way that I written my story is based on how I feel and imagined just like how it said on instructions."* ***(IDI 1.2d)***
>
> *"I feel before is good because I imagine so nice, then after using I believe on sensory it can help to the story in explaining it well."* ***(IDI 1.2e)***
>
> *"I understand it well because I followed the instructions and got an idea because of it."* ***(IDI 1.6b)***
>
> *"By following the steps, it helps me improve the way I write in a clear and creative way."* ***(IDI 1.6c)***
>
> *"Uses of deeper words and critical thinking while I did my writing."* ***(IDI 1.6d)***

Enhanced Expression and Overcoming Challenges*.* Sensory visualization techniques provided students with effective strategies to overcome previous obstacles in their writing. By engaging their senses and following structured prompts, students found it easier to convey their thoughts and ideas clearly and vividly. This technique helped in organizing their thoughts, making their narratives more coherent and impactful. Additionally, the sensory approach reduced the pressure associated with writing, as students felt more equipped to handle the challenges of grammar and structure.

The overall improvement in expression and the ability to tackle writing challenges more effectively were significant outcomes of the intervention. Students felt more confident in their writing abilities and were better able to articulate their ideas, leading to higher quality and more creative writing outputs.

> *"After using sensory techniques my writing is all the character do is I write and all my thinking in my mind I write it."* ***(IDI 1.1e)***
>
> *"After using the techniques, I was surprised by myself because I eventually write as soon as I get to think so many situations."* ***(IDI 1.2a)***
>
> *"I understand it well because I followed the instructions and got an idea because of it."* ***(IDI 1.6b)***
>
> *"By following the steps, it helps me improve the way I write in a clear and creative way."* ***(IDI 1.6c)***

"Uses of deeper words and critical thinking while I did my writing." ***(IDI 1.6d)***

"I perceive the role by following every step on the given techniques." ***(IDI 1.6a)***

The exploration of creative writing experiences among Grade 11 GAS students unveils a narrative of struggle and transformation both before and after intervention. Initially, students grappled with writer's block and a lack of cognitive clarity, hindering their ability to initiate and articulate ideas effectively. The pressure to perform coupled with a perceived lack of enjoyment further deterred them from fully engaging with the writing process. However, the introduction of sensory visualization techniques marked a significant turning point. Students reported a notable improvement in idea generation and clarity of thought, facilitated by structured approaches to visualization. This newfound clarity not only alleviated writer's block but also enhanced the depth and detail of their narratives. Moreover, the intervention sparked a renewed sense of enjoyment and engagement, reshaping students' perceptions of writing from a burdensome task to an enjoyable endeavor. The structured prompts provided a framework for creative expression, fostering confidence and enthusiasm among students. Importantly, the intervention empowered students to overcome previous challenges in conveying ideas effectively, leading to higher quality and more creative writing outputs. Overall, the implementation of sensory visualization techniques heralded a transformative journey, enabling students to navigate the complexities of creative writing with newfound clarity, enjoyment, and expressive prowess.

Improvements in the Creative Writing Output of Grade 11 GAS Students

Enhanced Detail and Story Flow*.* One of the most significant differences observed in students' creative writing output after the implementation of sensory visualization techniques was the enhancement in detail and story flow. Initially, students' stories were often described as lacking in detail and having a disjointed flow, which made them less engaging and harder to visualize. However, after employing sensory visualization techniques, students reported that their stories became more detailed and cohesive. The inclusion of sensory details allowed for a more immersive reading experience, as readers could better visualize and understand the scenarios being described. This improved detail and flow made the narratives more compelling and enjoyable.

Students also noted that their ability to describe scenes and characters improved, making their stories more vivid and lifelike. The sensory visualization techniques provided a structured approach to enhancing the descriptive elements of their writing, leading to more polished and well-developed narratives. This change in their writing output was a testament to the effectiveness of sensory visualization in transforming their creative writing skills.

"Before using those techniques my output was lacking of something like the way the stories flow that's why I'm really not satisfied with it. After using

those techniques my stories improved so much because the flow of the stories is so detailed especially the scenario, enjoying at the river." ***(IDI 2.1a)***

"When I didn't follow the sensory visualization techniques, I had a hard time and the work was not specific and straight forward, but when I followed it, it was easier and it was well written." ***(IDI 2.1b)***

"I noticed that my first output is only very straight to the point and plain, the second output is being enhance a bit and the scenario is clear and you can imagine the place." ***(IDI 2.1c)***

"The difference I noticed in writing my output is the first one is not explaining it well, the second one after using is explaining it well the character on what they do." ***(IDI 2.1e)***

Improved Descriptive Imagery and Vividness*.* Another major difference noted in the students' writing outputs was the improvement in descriptive imagery and vividness. Before using sensory visualization techniques, students struggled to create vivid images and often produced writing that was plain and lacked depth. After incorporating these techniques, students' descriptions became more detailed and vivid, allowing readers to better imagine the scenarios being described. This enhancement in imagery made their stories more engaging and impactful, as the sensory details added richness and depth to their narratives.

Students highlighted that their ability to describe settings, characters, and emotions had significantly improved, making their writing more immersive. This newfound ability to create vivid imagery not only improved the quality of their stories but also boosted their confidence in their writing abilities. By successfully employing sensory details, students were able to produce more compelling and dynamic narratives, marking a notable shift from their previous writing experiences.

"My outputs improve a lot when I was using the techniques because every word is so detailed the way the story is written is so impressive." ***(IDI 2.2a)***

"The specific improvement I observed was that it was easy to do and interesting to read." ***(IDI 2.2b)***

"If you read it, you can imagine the scenario and it becomes more clearer, I think my writing improved a bit." ***(IDI 2.2c)***

"On how more I clarified the way I visualize the scenery in the story, how the sound goes and about the way I explained and visualized what is happening on the characters' lives." ***(IDI 2.2d)***

"I see the improvement after using the sensory is so nice because it detailed all about in the story." ***(IDI 2.2e)***

"Yes, the writing of my second output is more vivid because I apply the sensory visualization techniques." ***(IDI 2.3c)***

Increased Emotional Depth and Reader Engagement. A third significant difference observed in students' writing outputs was the increased emotional depth and reader engagement. Before using sensory visualization techniques, students often produced writing that was emotionally flat and lacked the ability to engage readers deeply. However, after implementing these techniques, students reported that their writing became more emotionally resonant and engaging. The ability to incorporate sensory details allowed students to convey emotions more effectively, creating stronger connections between the characters and the readers.

This emotional depth not only made the stories more engaging but also helped students to express their thoughts and ideas more clearly. The improved emotional resonance in their writing made their narratives more compelling and relatable, enhancing the overall quality of their creative pieces. This shift towards more emotionally engaging writing highlighted the impact of sensory visualization techniques in transforming students' creative writing abilities.

"Before while I was writing my stories it was really hard because I couldn't imagine such a thing. After using it my writing has improved a lot, I love the way I was writing it with is much emotion and detailed." ***(IDI 2.3a)***

"Yes, I noticed a lot of changes because following and not following sensory visualization techniques are very different." ***(IDI 2.3b)***

"Yes, I noticed that I can now imagine better image of my new writing." ***(IDI 2.3d)***

"Yes, before it is summary of they do, after is you write all happened in the story that you do." ***(IDI 2.3e)***

"Before engaging with the techniques I was not really satisfied with my works because it still lacks something. After engaging myself on the techniques I was kind of satisfied and surprised by myself because I didn't expect that I could write stories that way." ***(IDI 2.4a)***

"In my first output I feel not satisfied with it because it is too plain while in the second it is livelier, and I feel kind of satisfied with it." ***(IDI 2.4c)***

"I felt happy, and I enjoyed it, because I've put my heart into writing the sceneries, and on how the plot flowed with each of the characters." ***(IDI 2.4d)***

The discussions highlight the remarkable transformations in the creative writing output of Grade 11 GAS students following the implementation of sensory visualization techniques. Notably, there was a marked improvement in detail and story flow, as students' narratives became more immersive and cohesive. By incorporating sensory details, students were able to create vivid imagery, enhancing the engagement and impact of their writing. Moreover, the integration of sensory visualization techniques facilitated an increase in emotional depth, leading to more resonant and relatable narratives. These findings underscore the effectiveness of sensory visualization in enhancing students' creative writing skills, as reflected in their improved ability to craft compelling and emotionally engaging stories.

Language Teaching Insights Drawn from The Implementation of The Intervention

Utilizing Structured Approaches and Techniques. The implementation of sensory visualization techniques provided students with a structured method to generate ideas and visualize scenarios, demonstrating the effectiveness of structured approaches in overcoming writer's block and enhancing cognitive clarity. These techniques facilitated guided engagement with creative tasks, allowing students to mentally transport themselves to different settings and focus on sensory details, thus aiding in clearer and more coherent writing. Providing clear, step-by-step instructions helped students organize their thoughts and approach writing tasks systematically, reducing anxiety and improving overall performance. Structured techniques reduced cognitive load by offering students a roadmap to follow, which alleviated feelings of helplessness and frustration.

> *"After implementing the sensory visualization techniques, I can imagine the scene and can write the scenario a bit clearly."* ***(IDI 1.1c)***

> *"By following the steps, it helps me improve the way I write in a clear and creative way."* ***(IDI 1.6c)***

Increasing Student Engagement and Enjoyment. The implementation of sensory visualization techniques transformed creative writing from a pressure-laden task to an enjoyable activity, highlighting the importance of engaging and enjoyable learning processes in education. The positive feedback loop created by the successful use of these techniques increased students' enthusiasm and willingness to participate, showing that enjoyment can significantly boost motivation and engagement in learning. Sensory visualization promoted active participation and allowed students to engage creatively with their writing tasks, demonstrating that interactive and creative teaching methods can enhance student engagement. Techniques that encourage students to use their imagination can transform their perception of learning activities, making them more appealing and less intimidating.

> *"I even enjoyed it more because the way that I written my story is based on how I feel and imagined just like how it said on instructions."* ***(IDI 1.2d)***

"After using the techniques, I was surprised by myself because I eventually write as soon as I get to think so many situations." ***(IDI 1.2a)***

Enhancing Expression and communication Skills**.** Sensory visualization techniques significantly improved students' ability to include descriptive details and ensure a cohesive story flow, underscoring the value of techniques that enhance narrative skills in language education. These techniques also helped students produce more vivid and engaging writing, which is crucial for effective communication. Incorporating sensory and emotional elements into writing not only improved the quality of the narratives but also students' ability to express complex ideas and emotions clearly and vividly. Teaching methods that focus on enhancing the sensory and emotional depth of students' work can lead to more engaging and impactful communication skills. The structured support provided by sensory visualization techniques boosted students' confidence in their writing abilities, which is essential for effective language learning and use. By providing clear frameworks and reducing cognitive load, these techniques helped students overcome challenges related to grammar and structure, further enhancing their confidence and proficiency.

"After using those techniques my stories improved so much because the flow of the stories is so detailed especially the scenario, enjoying at the river." ***(IDI 2.1a)***

"I love the way I was writing it with much emotion and detailed." (IDI 2.3a

"I understand it well because I followed the instructions and got an idea because of it." ***(IDI 1.6b)***

The findings from the study on creative writing among Grade 11 GAS students reveal several key insights for language teaching and education. First, utilizing structured approaches and techniques, such as sensory visualization, can significantly enhance students' ability to generate ideas and write coherently. These structured methods provide clear guidance and reduce cognitive load, helping students overcome writer's block and organize their thoughts more effectively. Second, increasing student engagement and enjoyment in the learning process is crucial. Techniques that transform writing from a burdensome task to an enjoyable activity can boost students' motivation and willingness to participate. Interactive and creative methods that encourage imaginative engagement make learning activities more appealing and less intimidating. Finally, enhancing expression and communication skills through sensory and emotional elements in writing leads to more vivid, detailed, and engaging narratives. These approaches help students articulate complex ideas and emotions clearly, improving both their confidence and proficiency in writing. Overall, the study underscores the importance of structured, engaging, and expressive techniques in language education to foster better writing skills and positive learning experiences.

Conclusions

The study on creative writing experiences among Grade 11 GAS students elucidated significant challenges pre-intervention, such as Struggle with Initiation and Cognitive Clarity, Pressure and Lack of Enjoyment, and Difficulty in Conveying Ideas Effectively. However, the introduction of Sensory Visualization Techniques marked a pivotal shift. Following intervention, students reported notable improvements in Improved Idea Generation and Cognitive Clarity, Increased Enjoyment and Engagement, and Enhanced Expression and Overcoming Challenges. These techniques not only enhanced the students' creative writing output by enriching detail, descriptive imagery, and emotional depth but also shed light on effective teaching methodologies. Among the most notable language teaching insights revealed from the implementation of Sensory Visualization are Utilizing Structured Approaches and Techniques, Increasing Students Engagement and Enjoyment, and Enhancing Expression and Communication Skills.

Recommendations

From the findings of the study the following recommendations are presented:

For Students. Embracing sensory visualization techniques can greatly enhance creative writing experience. Students must make it a practice to engage fully with their imagination, utilizing sensory details to bring their stories to life. By immersing themselves in these techniques, they can overcome writer's block, generate ideas more effectively, and ultimately find joy in the writing process.

For Teachers. Integrating sensory visualization techniques into their creative writing curriculum can revolutionize students' writing experiences. They can provide structured guidance and exercises to help students develop these skills and offer ongoing support and feedback to encourage their growth. Collaboration with fellow educators can be invaluable in sharing best practices and refining instructional approaches.

For School Administrators. Supporting the integration of sensory visualization techniques into the school curriculum can enrich the learning experiences of students across all grade levels. Allocate resources for professional development opportunities focused on innovative teaching methods and create spaces within the school environment that foster creative expression. Cultivate a culture of creativity and experimentation within the school community, encouraging teachers and students alike to explore new approaches to learning and expression.

For Department of Education. Incorporating training on sensory visualization techniques into teacher education programs and professional development initiatives can empower educators to implement these innovative approaches effectively. Consider integrating principles of creativity and expression into curriculum standards and guidelines, recognizing their importance alongside academic content. Support research

initiatives that investigate the impact of sensory visualization techniques on student learning outcomes, providing evidence-based guidance for educators and policymakers.

For Future Researchers. Conducting longitudinal studies to assess the long-term effects of sensory visualization techniques on students' writing skills and overall academic achievement can provide valuable insights into their efficacy. Explore potential applications of these techniques across different subjects and grade levels, examining their effectiveness in fostering creativity and critical thinking. Investigate the underlying cognitive processes involved in sensory visualization and its relationship to other aspects of language learning and development.

Compliance with Ethical Standards

In this study, the author affirms his commitment to ethical research practices and the protection of participants' rights. Prior to data collection, informed consent was obtained from all respondents, ensuring they were fully aware of the study's objectives and procedures. Parental consent was also secured for participants under the age of eighteen, further safeguarding their rights and well-being. Participants were informed of their right to withdraw from the study at any point without consequences. Moreover, anonymity was rigorously maintained throughout the research process to safeguard the privacy and confidentiality of the respondents. The well-being of participants was prioritized, with measures in place to minimize any potential discomfort or distress. Furthermore, the authors declare that no conflict of interest influenced the conduct of the study, and strict measures were taken to avoid plagiarism. The interpretation of findings was conducted without bias, ensuring an objective analysis of the data. Finally, the results obtained from this research will be utilized solely for academic and research purposes, contributing to the advancement of knowledge in the field.

Acknowledgments

The researcher extends heartfelt gratitude to all those who contributed to the realization of this action research endeavor. Firstly, sincere appreciation is extended to the administration and faculty of Optaciano Hilay National High School, especially to Ma’am Jeana M. Mequiabas, for their unwavering support and encouragement throughout this research project.

Special thanks are extended to the Grade 11 General Academic Strand (GAS) students who participated in this study, generously sharing their time, insights, and experiences. Their invaluable contributions have enriched the findings and outcomes of this research.

The researcher is also grateful to his colleagues, especially Ms. Jenevieve C. Gonzalo, and mentors for their guidance, feedback, and assistance at every stage of this research journey. Their expertise and encouragement have been instrumental in shaping this study and enhancing its impact.

Furthermore, sincere appreciation is extended to the educational community and researchers whose work has inspired and informed this research endeavor.

Lastly, the researcher offers gratitude to God for His grace, guidance, and blessings throughout this endeavor. This research would not have been possible without His divine providence and steadfast love.

This research would not have been possible without the collective efforts and support of all those mentioned above. Thank you for your invaluable contributions to this endeavor.

ABSTRACT

This study investigates the role of bilingualism in the language development of Senior High School students at Bohol Wisdom School, which integrates Filipino and Chinese cultures. Bilingualism, the ability to manage two languages, is known to enhance cognitive functions and educational outcomes. Despite the Philippines' high English proficiency, challenges in reading comprehension and other academic areas persist. Employing a descriptive-correlational research design, data was collected through a self-made survey questionnaire to examine how bilingualism influences students' motivation (drive), social interactions, and cultural awareness. The findings reveal that bilingualism significantly impacts these areas, enhancing language development and cognitive skills. Bilingual students demonstrated strong proficiency in both English and their native tongue, indicating that bilingualism positively influences language acquisition and overall cognitive development. The study recommends that educational policymakers create bilingual learning resources and training programs. School administrators should design effective bilingual education programs, while guidance counselors, parents, and students should actively support and engage in bilingual learning activities. Future research should explore the long-term impacts of bilingual education, specific teaching methods, and the role of technology in promoting bilingualism. This study provides valuable insights for enhancing educational strategies and contributes to a broader understanding of bilingualism's role in language development.

Keywords: *Bilingualism, Cognitive Functions, Educational Outcomes, Language Development*

INTRODUCTION

Language, a system of spoken, manual, or written symbols, is a distinctive human trait that transcends geographical boundaries. In the realm of bilingualism, individuals adeptly managing two languages experience cognitive benefits, enhancing executive functions through constant use (Bialystok, 2017).

In the Philippines, bilingualism poses particular challenges, especially with the predominant use of English in higher education (Department Order No. 25, s. 1974). The 2018 Programme for International Student Assessment (PISA) reported that the Philippines scored the lowest in Reading Comprehension among 79 countries and the second lowest in Science and Mathematics, highlighting a crisis in education (Parojenog & Pabalan, 2024). This paradoxically low performance raises questions about the efficacy of bilingual education in a country known for its English proficiency. Academicians note the difficulties students face when studying both their mother tongue and English simultaneously.

Bohol Wisdom School provides a unique context for studying bilingualism. The coexistence of Filipino and Chinese cultures allows Senior High School students to pursue academic interests with a significant emphasis on language development. Despite this focus, more needs to be known regarding the role of bilingualism in language development.

Throughout history, people have learned languages beyond their native tongue to connect with different cultures. While anyone can learn additional languages, it is crucial to use them for genuine communication. As the world becomes increasingly globalized, bilingualism—communicating fluently in another language—has become more common.

In an interconnected and multicultural world, bilingualism's role in language development has garnered considerable attention. Proficiency in two languages has been linked to cognitive benefits, enhanced linguistic abilities, and overall cognitive flexibility. Researchers have noted that bilingual individuals demonstrate cognitive advantages over monolinguals, particularly in tasks requiring control systems necessary for proficient language performance (Kroll et al., 2012; Cummins, 2003).

Heritage language speakers, a unique group of bilinguals, typically show more advanced outcomes than second language learners due to their early exposure to a minority language at home (Montrul, 2018; Chang, 2016). Parents often use code-switching to support bilingual language acquisition, helping infants understand and learn vocabulary (Kremin et al., 2022). This practice reflects the social interface between language processing, cognition, and the brain (Kaan et al., 2020).

Early bilingualism, whether simultaneous or sequential, involves acquiring two languages from birth or early childhood, respectively (De Houwer, 2017). Bilingual advantages are thought to result from cognitive control training in dual language use, where both languages are active in the brain (Hoshino & Thierry, 2011; Kroll et al., 2008).

Among fluent bilinguals, both languages continually interact, even in contexts where only one is used (Bialystok, 2017). Adults have reported that bilingualism supports relationships with family and friends and increases access to hobbies, educational, and employment opportunities (Nolte et al., 2021).

Given these factors, this study aims to address this gap by exploring the impact of bilingualism on the language development of Senior High School students at Bohol Wisdom School. It seeks to understand the language challenges faced by these students, thereby benefiting educators in designing tailored strategies and contributing to a broader understanding of bilingualism in Philippine language development.

Research Questions

The main objective of this study was to determine the role of bilingualism towards language development among Senior High School Students at Bohol Wisdom School.

Specifically, this study aimed to answer the following questions:

1. What are the respondents' profiles in terms of:
    1.1 sex; and
    1.2 languages spoken?
2. What is the role of bilingualism along:
    2.1 drive;
    2.2 social; and
    2.3 culture?
3. What are the respondents' level of language development in terms of:
    3.1 drive;
    3.2 social; and
    3.3 culture?
4. Is there a significant relationship between bilingualism and language development?
5. What action plan could be proposed based on the findings of this study?

METHODOLOGY

This section focused on the methodology that was utilized in the conduct of the study. This also outlined the research design, the procedure that was followed, the process of collecting the data and the analysis. During the collection process, the ethical consideration was also discussed.

Research Design

The researchers used a descriptive-correlational research design, which was suited for achieving the study's goals and objectives. The Descriptive research design was used to describe the level of influence of the factors affecting the role of bilingualism on language development. Meanwhile, the Correlational research design was applied to

determine if there is a significant relationship between the two variables. Furthermore, a self-made survey questionnaire was distributed to the respondents.

Research Environment and Research Participants

The researchers used a descriptive-correlational research design, which was suited for achieving the study's goals and objectives. The Descriptive research design was used to describe the level of influence of the factors affecting the role of bilingualism on language development. Meanwhile, the Correlational research design was applied to determine if there is a significant relationship between the two variables. Furthermore, a self-made survey questionnaire was distributed to the respondents.

Research Instrument

The research instrument used in this study was a self-made survey questionnaire. The researchers formulated the questionnaire, which was given to the respondents. The questionnaire was divided into three categories that represent factors in language development.

Table 1
Distribution of Respondents
(N=184)

Sections	No. of Respondents
12 - Justice	36
12 - Charity	34
12 - Loyalty	33
12 - Stewardship	33
12 - Compassion	27
12 - Humility	21
TOTAL	**184**

Moreover, the findings and discussions of related studies and articles aided the formulation of questions for the self-made questionnaire. Finally, pilot testing was first conducted on Senior High School students at Bohol Wisdom School to assess the validity and consistency of the questionnaire.

Data Gathering Procedure

The researchers requested approval from the research adviser and the Bohol Wisdom School High School principal before surveying the Senior High School students. With their approval, the researchers distributed questionnaires and answer sheets to each classroom in the Senior High School Department. The respondents were asked to answer the questionnaire honestly to ensure the validity of the results. Finally, all data that was gathered from the questionnaire was kept confidential.

Data Analysis

To determine the respondents' profile on age, gender, and year level, the percentage formula was applied.

Where:
P = Percentage
F = Frequency
N = Number of cases

To determine the role of bilingualism and language development, the weighted mean formula was utilized.

$$W = \frac{\sum_{i=1}^{n} w_i X_i}{\sum_{i=1}^{n} w_i}$$

W = weighted average

n = number of terms to be average

ω_i = weights applied to x values

x_i = data values to be averaged

To determine the significant relationship between the role of bilingualism and language development, the Pearson Moment Product Coefficient Correlation was used.

$$r = \frac{n\sum xy - \sum x \sum y}{\sqrt{(n\sum x^2 - (\sum x^2)(n\sum y^2 - (\sum y^2)}}$$

Where:

r = correlation coefficient

n = number of data pairs

$\sum xy$ = the sum of the product of first and second variable

$\sum x$ = the sum of the first variable

$\sum y$ = the sum of the second variable

$\sum x^2$ = the sum of the square of the first variable

$\sum y^2$ = the sum of the square of the second variable

Interval coefficient	Relationship level
0.80-1.000	Very Strong
0.60-0.799	Strong
0.40-0.599	Moderate
0.20-0.399	Weak
0.00-0.199	Very weak

RESULTS

This chapter presents the analysis and interpretation of data to answer the problems raised in the study. The first part entails the profile of the respondents namely: sex and languages spoken. The second part reveals the students' profile on Bilingualism on Drive, Social and Culture. The third part reveals the students' profile on Language Development on Drive, Social and Culture. Lastly, the fourth part shows the significant relationship that exists between bilingualism and language development.

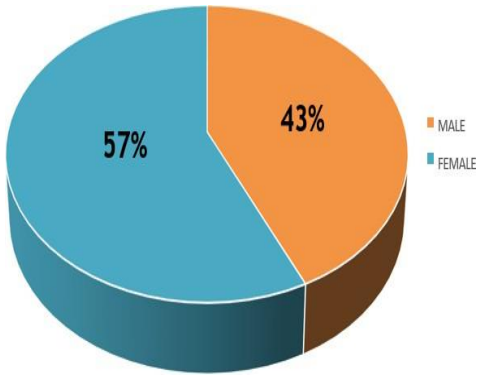

Figure 2. Respondents' Profile on Sex (184)

Figure 2 shows the respondents' profile on sex. As reflected, it revealed that 57% of them were females and 43% were males. This implies that there were more female respondents who answered the survey questionnaire.

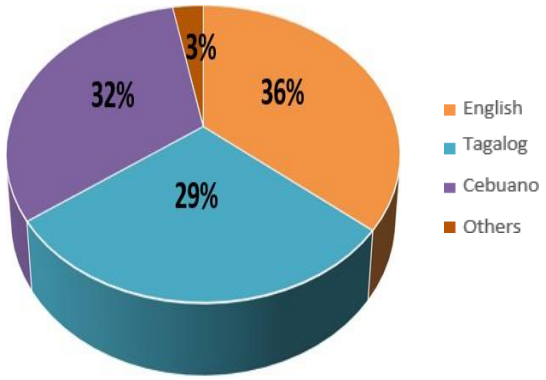

Figure 3. Respondents' Profile on Languages Spoken (N=184)

Figure 3 presents the respondents' languages spoken. As shown, the English language got the highest percentage of 36%, while others obtained the lowest percentage of 3%. This implies that most of the respondents can speak the English Language in the survey conducted.

Zubkov (2020) states that English is taught and learned as a second language or as a foreign language in educational institutions worldwide. This implies a significant level of proficiency or familiarity with the language as English is widely taught and learned in educational setting. This also shows that people acknowledge the fact that learning the English language is the key in the present age.

Table 2
Respondents' Role of Bilingualism on Drive
(N=184)

Items	Weighted Mean	Descriptive Value	Rank
1. I watch tutorials on how to properly construct sentences and pronounce words.	2.58	S	5
2. I read books to better enhance my language skills.	2.93	S	3
3. I ask advice from proficient English speakers to enhance my language skills.	2.81	S	4
4. I am motivated to understand the culture and people which also use the languages that I speak.	3.15	S	2
5. I aim to become a proficient speaker in both my native language and the English language.	3.5	A	1
OVERALL WEIGHTED MEAN	**2.99**	**S**	

Legend: 3.26 – 4.00 Always; 2.51 – 3.25 Sometimes; 1.76 – 2.5 Rarely; 1.00 – 1.75 Never

Table 2 presents the respondents' perception on Bilingualism on Drive. Item number 5, "I aim to become a proficient speaker in both my native language and the English language," received the highest weighted mean of 3.5. Meanwhile, item number 1, "I watch tutorials on how to properly construct sentences and pronounce words," received the lowest weighted mean of 2.58. The overall weighted mean obtained is 2.99 with the descriptive value of "Sometimes".

This implies that individuals may not consistently exhibit high levels of motivation and drive towards language learning. Despite the strong aspiration to become proficient bilingual speakers, there may be fluctuations in motivation levels.

According to Nuraeni and Aisyah (2020), only a few are motivated by intrinsic factors such as the need or desire to excel, feel good about oneself, achieve a goal, or fulfill a part of oneself. This means that there is only a small portion of the population that are naturally motivated to achieve certain things.

Table 3
Respondents' Role of Bilingualism on Social (N=184)

Items	Weighted Mean	Descriptive Value	Rank
1. I can use the languages that I know in conversations with people who use the same languages.	3.55	A	2
2. I can switch languages depending on the topic and the situation with ease.	3.46	A	3
3. I can speak with my peers using my native language and the English language.	3.64	A	1
4. I often find myself code- switching or using my native tongue and the English language alternately when talking with my peers.	3.44	A	4
5. I can write letters with proper grammar usage and can understand them as well in both languages that I speak.	3.43	A	5
OVERALL WEIGHTED MEAN	**3.50**	**A**	

Legend: 3.26 – 4.00 Always
2.51 – 3.25 Sometimes
1.76 – 2.5 Rarely
1.00 – 1.75 Never

Table 3 exhibits the respondents' profile on bilingualism under the social factor. It was found that item 3, "I can speak with my peers using my native language and the English language," obtained the highest value of 3.64. Meanwhile, item 5, "I can write letters with proper grammar usage and can understand them as well in both languages that I speak," got the lowest value of 3.43. The overall weighted mean obtained is 3.50 with a descriptive value of "Always."

This implies a high level of confidence in using both languages for social purposes. In simpler terms, the survey suggests people feel comfortable talking to friends in both languages.

Sami, R. (2024) states that bilingualism occurs through interest in learning a language that can provide access to communication. Thus, bilingual individual have heightened sensitivities to communicative cues and are more adept at understanding a speaker's context and intent.

Table 4
Respondents' Role of Bilingualism on Culture (N=184)

Items	Weighted Mean	Descriptive Value	Rank
1. I am confident that I do not offend others the way I converse with them using my native tongue and the English language.	2.68	S	5
2. I can easily communicate with others despite the culture differences through the English language.	3.31	A	4
3. I can easily adapt to other cultures' language.	3.58	A	2
4. I can express myself with my peers despite of our differences.	3.5	A	3
5. I can identify a variety of things from tone and dialect such as sarcasm and inference.	3.65	A	1
OVERALL WEIGHTED MEAN	**3.34**	**A**	

Legend: 3.26 – 4.00 Always; 2.51 – 3.25 Sometimes; 1.76 – 2.50 Rarely; 1.00 – 1.75 Never

Table 4 conveys the respondents' perception on Bilingualism on Culture. Item number 5, "I can identify a variety of things from tone and dialect such as sarcasm and inference" obtained thehighest weighted meanof 3.65 with a descriptive value of "Always". In contrast, item number 1, "I am confident that I do not offend others the way I converse with them using my native tongue and the English language" garnered the lowest weighted mean of 2.68 with a descriptive value of "Sometimes."

The set of items referring to the influence of Bilingualism on Culture got an overall weighted mean of 3.34 with a descriptive value of "Always." This implies that respondents exhibited a strong ability to use the languages that they know and at the same time being well- versed with the cultures of those languages.

Sofologi et al. (2020) noted that, when educating a bilingual learner, teachers should expect that he or she will be able to function globally across cultures. This implies that culture plays a vital role in the lives of those who are bilingual, that they are expected to transcend boundaries andbecome competent in dealing with a variety of cultures.

Table 5
Summary on the Role of Bilingualism (N=184)

Role of Bilingualism	Weighted Mean	Descriptive Value	Rank
Drive	2.99	Sometimes	3
Social	3.50	Always	1
Culture	3.34	Always	2
Average Weighted Mean	**3.27**	**Always**	

Table 5 shows the summary of the role of bilingualism on drive, social and culture. “Social” obtained the highest weighted mean of 3.50. In contrast, “drive” garnered the lowest weighted mean of 2.99. It has an overall average weighted mean of 3.31 described as "Always."

In one way of saying, bilingualism will most likely have a conclusive influence on bilinguals' motivation to learn more about the languages that they speak, their knowledge on the culture of these languages, and the way they socialize.

Ünveren et al. (2019) cited that bilinguals’ linguistic and intercultural repertories are larger. This means that bilingualism can give several advantages, significantly increasing people’s potential to excel, may it be in language learning or in other fields.

Table 6
Respondents’ Level of Language Development on Drive (N=184)

Items	Weighted Mean	Descriptive Value	Rank
1. I self-correct myself whenever I can spot errors using the English language.	3.33	HD	1
2. I aim to ace my English tests.	3.18	D	4
3. I converse with my peers in school using the English language.	3.00	D	5
4. I train myself to watch English movies without the help of subtitles.	3.26	HD	3
5. I strictly adhere to the grammatical rules of the English language.	3.32	HD	2
OVERALL WEIGHTED MEAN	**3.22**	**D**	

Legend: 3.26 – 4.00 Highly Developed; 2.51 – 3.25 Developed; 1.76 – 2.50 Less Developed; 1.00 – 1.75 Not Developed

Table 6 reveals the level of Language Development. It revealed that the item 1, "I self-correct myself whenever I can spot errors using the English language," obtained the highest value of 3.33. Meanwhile, statement 3 "I converse with my peers in peers in school using the English language," obtained the lowest value of 3.00. The overall weighted mean obtained is 3.22 with a descriptive value of"Developed.”

This entails that the learners are motivated by internal satisfaction in language development.

Yue et al. (2022) found that among other various factors, the learners' motivation influences effective learning and it can be identified as one of the most important factors in successful language learning. This implies thatmotivation is a key factor to be targeted to expand learning and the students should be motivated on a consistent basis to achieve better learning outcomes.

Table 7
Respondents' Level of Language Development on Social (N=184)

Items	Weighted Mean	Descriptive Value	Rank
1. I can speak with native English speakers or people adept in using the English language withoutthem slowing down or simplifying their speech for me.	3.32	HD	2
2.Icancrackjokesandwordplaysusing the English language.	3.26	HD	4
3. I can understand slang words when conversing with people who use the English language and responding accordingly.	3.53	HD	1
4. I can use idiomatic expressions in conversations which use the English language.	3.18	D	5
5. I am confident in conversing with someone using the English language.	3.28	HD	3
OVERALL WEIGHTED MEAN	**3.31**	**HD**	

Legend: 3.26 – 4.00 Highly Developed
2.51 – 3.25 Developed
1.76 – 2.50 Less Developed
1.00 – 1.75 Not Developed

Table 7 reveals the respondents' perception on Language Development on Social. Item number 3, "I can understand slang words when conversing with people who use English Language and respond accordingly" obtained the highest weighted mean of 3.53 with a descriptive value of "Highly Developed". In contrast, item number 4, "I can use idiomatic expressions in conversation which use the English language" garnered the lowest weighted mean of 3.18 with a descriptive value of "Developed". The set of items pertaining to the influence of language development on Social got an overall weighted mean of 3.31 with a descriptive value of "Highly Developed."

This implies that respondents exhibited a strong ability to socialize confidently using the English language. Zukeflli, N. N., & Subramaniam, V. (2018).

Zukeflli and Subramaniam (2018) mentioned that language serves as a mixture of indispensable abilities for the purpose of communicating, speaking and interacting with each other. This means that language development is heavily influenced through the way we socialize, since its nature and purpose is to fuel interactions and communication among people.

Table 8
Respondents' Level of Language Development on Culture (N=184)

Items	Weighted Mean	Descriptive Value	Rank
1. I am aware that my native tongue and the English language has its own roots and culture.	2.97	D	5
2. I can understand other cultures through the English language.	3.29	HD	1
3. I can interact with others using the English language.	3.18	D	3
4. I can understand and follow directions given to me in English language.	3.24	D	2
5. I can easily help translate for others from the languages that I know.	3.12	D	4
OVERALL WEIGHTED MEAN	**3.16**	**D**	

Legend: 3.26 – 4.00 Highly Developed
2.51 – 3.25 Developed
1.76 – 2.50 Less Developed
1.00 – 1.75 Not Developed

Table 8 reveals the respondents' perception on Language Development on Culture. Item number 2, "I can understand other cultures through the English language" obtained the highest weighted mean of 3.29 with a descriptive value of "Highly Developed". In contrast, item number 1, "I am aware that my native tongue and the English language has its own roots and culture" garnered the lowest weighted mean of 2.97 with a descriptive value of "Developed".

The set of items pertaining the influence of language development on culture got an overall weighted mean of 3.16 with a descriptive value of "Developed." This means that the respondents exhibited an adequate foundation in understanding and engaging with cultures through language.

Similarly, Alyasery et al. (2018) cites that language has a dual character: both as a tool of communication and a carrier of culture. This shows that it serves a dual purpose, to act as a means of communication andavessel for cultural expression as the respondents are in a process that goes beyond mere language acquisition including cultural awareness and appreciation.

Table 9
Summary on the Level of Language Development (N=184)

Level of Language Development	Weighted Mean	Descriptive Mean	Rank
On Drive	3.22	Developed	2
On Social	3.31	Highly Developed	1
On Culture	3.16	Developed	3
Average Weighted Mean	**3.23**	**Developed**	

Legend: 3.26 – 4.00 Highly Developed
2.51 – 3.25 Developed
1.76 – 2.50 Less Developed
1.00 – 1.75 Not Developed

Table 9 shows the summary on the level of language development. “Social” obtained the highest weighted mean of 3.31. Meanwhile, “culture” garnered the lowest weighted mean of 3.16. Overall, it has an average weighted mean of 3.23 with a descriptive value of "Developed."

This indicates that the respondents showed a respectable language development but falls short of being considered as exceptional or advanced.

According to Pirbhai-Illich & Martin et al. (2019) language development can be elevated from acquiring grammar and cultural facts to gaining sociocultural knowledge and awareness. This suggests that language development can be observed and is relative to several factors including cultural awareness and the way we socialize.

Table 10
Significant Relationship Between the Role of Bilingualism and Level of Language Development (N=184)

Relationship	Computed r	Critical r value	P - value	Interpretation	Decision
Bilingualism vs Language Development	0.7125	±0.13675	<.00001	Strong positive correlation	Reject ho

Table 10 shows the significant relationship between bilingualism and language development. Data revealed that Computed r value of 0.7125 is greater than the critical r value of 0.13675 and a computed p value of <0.00001. The value indicated that the null hypothesis is to be rejected. This means that there is a significant relationship between bilingualism and language development. Furthermore, the value indicated that the relationship is strongly positive.

This implies that individuals who are bilingual tend to demonstrate more advanced language skills and proficiency compared to monolingual individuals, underscoring the cognitive and linguistic benefits of being bilingual.

This is connected with what Tribushinina, Boz, Aalbers, and Blom (2024) have stated that Bilingual development may be associated with additional benefits, including cognitive advantages. One type of bilingual advantage may lie in foreign language learning. This means that those individuals who are able to use two languages will be more likely to succeed in learning another language than those monolinguals.

DISCUSSION

Findings

Based on the analysis of the data, the following findings emerged:

Respondents' Profile

On Sex. Data showed that that majority of the respondents were females.

On Languages Spoken. Among other languages, the English language was found to be the most spoken language.

Role of Bilingualism:

On Drive. The data shows that the respondents' drive do sometimes influence their motivation to learn different languages, where some are motivated to do ways to learn and adapt new languages and others are not, for everyone does not have the same level of motivation.

On Social. It was found out that the respondents' socialization always affects the way they interact using the languages that they know. This also shows that bilinguals are always open to conversations which may enable them to use their native tongue and the English language.

On Culture. It was revealed that bilingualism helps the respondents to broaden their knowledge and understanding about other cultures. Bilingualism can also bridge people to connect with each other and can start a relationship with people from various cultures.

On Summary. Data suggests that the role of bilingualism has a significant impact on motivation, socialization, and cultural awareness. Bilingualism not only encourages ongoing language learning but also boosts individuals to adapt in social contexts and fosters a deeper understanding and respect for diverse cultures.

Levels of Language Development:

On Drive. The data shows that the respondents' language development was developed; the respondents are aiming to learn and improve their skills and ability in languages through self-drive, where they are motivated to develop their language more by self-correct, self- training and adhering to some language grammatical rules.

On Social. Data revealed that the respondents' level of language development is highly developed; the respondents exhibited a strong ability to use the English language. In socializing, the respondents were confident in their ability to converse with other people.

On Culture. Data revealed that respondent's level of language development on culture is developed; The respondents are clearly affected by their surroundings. Fact is that the environment is culturally diverse, so everyone wants to be culturally literate and establish unity in order to avoid any squabble. Respondents aim to develop their languages at the same time they can be of help in creating the environment they sought.

On Summary. Data revealed that the level of language development of the respondents is highly developed. The respondents answered exceptionally in factors that determined their development such as drive, social, and culture. This shows that majority of the respondents are adept English language speakers.

On Relationship. There is a significant relationship that exists between the role of bilingualism on drive, social, and culture with the level of language development.

Conclusions

Based on the findings, the researchers concluded that there is a significant relationship between the role of bilingualism and the level of language development. This means that bilingualism can influence or stimulate language development in a favorable way.

Recommendations

Based on the conclusions drawn from the findings accumulated, it is recommended that:

1. The Secretary of the Department of Education may collaborate with language experts to create bilingual learning resources and national guidelines. Public awareness campaigns can highlight the benefits of bilingualism in education, while funding and support can be directed towards training educators in bilingual teaching methods.

2. School Administrator may design bilingual learning programs, like dual language immersion. Working with teachers, they can ensure the curriculum effectively integrates both languages and content. By collecting data on student progress and

program effectiveness, administrators can continuously improve the bilingual learning experience for all students.

3. Guidance Office Personnel may provide valuable resources, connect students with specialists if needed, and collaborate with teachers to ensure learners receive proper academic and social- emotional support in both languages. Creating a comprehensive support system will empower them to thrive in both languages and cultures.

4. Parents may continue using the native language at home while supporting English development. Exploring bilingual children's literature and media can provide shared learning experiences. Engaging with schools strengthens collaboration in supporting the child's bilingual journey.

5. Students may actively participate in activities that leverage their skills, strategically code- switch for clarity, and seek opportunities to connect with other bilingual learners. Embracing the challenges and rewards of bilingualism empowers them to excel in English language learning.

6. Future researchers may investigate the long-term impact of bilingual education programs, study the effectiveness of specific bilingual teaching methods, and explore the role of technology in promoting bilingual learning and cross-cultural communication.

Compliance with Ethical Standards

This study adhered to ethical standards by obtaining informed consent from all participants, ensuring confidentiality, and maintaining voluntary participation without coercion. No harm came to participants, and the study received ethics committee approval. Researchers declared no conflicts of interest and reported findings transparently and honestly. Cultural sensitivity was respected throughout the research process.

PROPOSED ACTION PLAN FOR BILINGUALISM TOWARDS ENGLISH LANGUAGE DEVELOPMENT

Rationale

In today's increasingly interconnected world, proficiency in English has invaluable advantages for communication, education, and career advancement. However, for individuals growing up in bilingual environments, developing excellent English language abilities might be a unique challenge. Students ought to have unrestricted access to assistance they require, particularly when it comes to their language skills. In this case, teachers should include implementing bilingual reading projects and activities that use both languages to improve comprehension or offering focused assistance to bilingual kids

who are struggling with specific areas of English. With this knowledge of the impact of bilingualism on the development of English language skills, the study's proposed action plan aims to offer suggestions and recommendations on how to assist educators, parents, administrators, and learners in realizing the benefits and necessity of bilingualism in language development.

Objectives

After the implementation of the proposed improvement plan, the research aims to achieve the following objectives:

1. encourages students to feel confident and display improved proficiency in both languages specifically, English.
2. develops deeper appreciation for both languages and fosters a sense of belongingness and identity within their school environment.
3. integrates students the cultural elements of both languages into educational materials and activities leading to deeper understanding in cultural context.
4. improves language skills enable them to help in their studies.
5. gives awareness to students about the advantages of bilingual people within their school environment.
6. ensures that the common language difficulties encountered by the students will be dealt with by the activities implemented.

Mechanics of Implementation

The researchers shall present the proposed plan to the Head of the Administrative Team and to the Principal of the High School Department for approval after the examining panel has subjected it to refinement. Upon approval, the researchers will forward the proposal to the DOH, DepEd, and to the Office of the City Mayor where further clarification will be provided.

Schedule of Implementation

The implementation of the program of proposal shall commence once permission is granted to the researchers by the authorities in charge.

Monitoring and Evaluating

To ensure the strict implementation of the proposed plan, the researchers would adapt a periodic monitoring and evaluation to determine effectiveness in its results. This is to identify if there are areas of concern that need further improvements in which an immediate response would be expected from the researchers.

ABSTRACT

Despite extensive research on the impact of stroke on patients, the experiences of primary caregivers have not been given equal attention, particularly in terms of the long-term support they require. This phenomenological study was designed to develop an understanding of the lived experiences of the primary caregivers of patients with stroke, to discover what their experiences are as partakers of the burden of stroke, and to know how these experiences mean to them. Participants were selected purposively and were limited to caregivers who were at least 18 years old and had been a caregiver for at least six months. The stroke patients were those who had a stroke for at least six months and were living with some form of disability. Data were gathered through in-depth interviews conducted at a tertiary healthcare institution in Panabo City. Utilizing Colaizzi's method of qualitative data analysis, the study generated the following themes: Prologue: Taking Up the Mantle, The Adventure: Living the Life of a Hero, The Achilles' Heel, and Heroes Prevail. These themes revealed that as caregivers embodied the role of becoming carers for stroke patients, they perceived their experiences as akin to being heroic. They expressed initial hesitancy in accepting the role, gradually learned to live with and accept their responsibilities, faced numerous challenges, and ultimately found meaning and fulfillment in their caregiving journey.

Keywords: *Social Science, Primary Caregivers, Patients with Stroke, Phenomenology, Panabo City*

INTRODUCTION

Stroke, often referred to as a brain attack, is a critical medical condition that significantly impacts both the patients and their primary caregivers (National Stroke Association, 2012). According to the 2016 Heart Disease and Stroke Statistics Update by the American Heart Association (2016) and the Centers for Disease Control and Prevention (2015), stroke remains a leading cause of long-term disability worldwide. Each year, the World Health Organization (2014) reports that 15 million people suffer from stroke, with 5 million deaths and another 5 million left permanently disabled. In the Philippines, stroke stands as the second leading cause of death and disability, a statistic that shows no signs of decreasing (Navarro et al., 2014; Loo & Gan, 2012).

The increasing incidence of stroke globally and locally poses profound implications not only for the patients but also for their primary caregivers. These caregivers face substantial physical, emotional, and mental challenges as they support their loved ones through recovery. While extensive research has focused on the impact of stroke on patients, the experiences of primary caregivers have not received the same level of attention. Most studies emphasize acute care and early discharge support, with less focus on the long-term support required in community settings where caregivers play a crucial role (Aziz et al., 2016).

Caregivers become the primary support system for stroke patients after hospitalization and are integral to the healthcare team, contributing significantly to the rehabilitation and recovery of stroke survivors. However, caregiving can be stressful, and caregivers often experience various interrelated individual, interpersonal, and organizational issues in managing stroke-related deficits. This stress can lead to significant psychological distress, affecting caregivers' quality of life (Duncan et al., 2005; National Stroke Association, 2012; Lau et al., 2009; Plank et al., 2012).

Research has shown that stroke survivors and their caregivers face enormous challenges as they move through the phases of stroke management, including the stroke crisis, expectations for recovery, and the crisis of discharge. Caregivers often struggle to adapt to their new roles and responsibilities, which can strain familial relationships and personal well-being. Furthermore, caregivers frequently experience issues such as role changes, difficulties with social and leisure activities, communication challenges, financial problems, and physical and emotional health problems (Lutz et al., 2011; McGurk & Kneebone, 2013; O'Shea & Goode, 2015; Olai et al, 2014).

Studies have highlighted the high Caregiver Burden (CB) scores among stroke patient caregivers, attributed to factors such as low patient functional ability and insufficient municipal social service support. Significant burdens are also due to the time spent caring for stroke survivors and uncertainty about the future, particularly in the early post-stroke period. The health-related quality of life of spouses of stroke survivors decreases not only in the initial years but also in the long term, influenced by their age and the level of the stroke survivor's disability. Additionally, caregiving significantly impacts the domains of work, leisure, and friendships, with the negative effects closely

linked to the unmet needs of the stroke survivors (Andrew et al., 2015; Olai et al., 2014; Persson et al., 2015).

Despite these challenges, caregivers play a vital role in the health continuum of stroke survivors, influencing their rehabilitation and overall quality of life. Effective nursing interventions that provide caregivers with skills to manage physical, cognitive, emotional, and behavioral stroke-related problems are essential for both initial treatment and ongoing management throughout stroke recovery (National Stroke Association, 2012; Gillespie & Campbell, 2011; Grant et al., 2014; Rahman et al., 2017; Winstein et al., 2016; Yuki & Kudo, 2011).

Over time, caregivers learn to adapt to the demands of caring for stroke survivors. Studies have found that while a significant burden is experienced by caregivers in the post-acute and chronic phases of stroke, this burden tends to decline over time. Although stroke caregiving is initially associated with persistent psychological distress, by three years post-stroke, caregivers' life satisfaction, depression levels, and mental health quality of life become comparable to those of non-caregivers. Decreases in caregiver burden significantly correlate with improvements in caregivers' physical, psychological, and environmental quality of life, indicating that the quality of life for both stroke survivors and their caregivers is interlinked and significantly influenced by changes in the survivors' physical function over time (Jaracz et al., 2015; Haley et al., 2015; Pucciarelli et al., 2017).

Despite varying findings, these studies collectively emphasize that caregivers face substantial challenges but play a crucial role in the health and recovery of stroke patients. Recognizing their significant contributions and addressing their needs through further exploration of their experiences is essential for improving their well-being and the care they provide.

Given the critical role that primary caregivers play, it is imperative to develop a deeper understanding of their experiences. This study aims to explore the lived experiences of primary caregivers of stroke patients, highlighting their significant yet often overlooked contributions. By bringing these experiences to light, the study hopes to advocate for better support systems and recognition for primary caregivers, ensuring their needs are addressed alongside those of the patients they care for.

Research Questions

This study aimed to explore the following research questions:

Central Question:

- What are the lived experiences of primary caregivers of patients with stroke?

Sub-question:

- How do primary caregivers interpret and find meaning in their caregiving experiences?

METHODOLOGY

Study Design

This study utilized a phenomenological research design to explore and understand the lived experiences of primary caregivers of stroke patients (Creswell, 2013). Phenomenology is well-suited for this purpose as it aims to describe and interpret the essence of lived experiences, providing deep insights into the personal and subjective world of the participants. This approach allowed us to capture the rich, nuanced experiences of caregivers as they navigate their roles.

Setting

The data collection for this study was conducted at a tertiary healthcare institution in Panabo City. This institution, with a 173-bed capacity, offers a wide range of medical services to the residents of Panabo City and its neighboring areas. The setting provided a comfortable and private environment for in-depth interviews, ensuring that participants felt at ease while sharing their experiences. The study was conducted from January 2017 to March 2017.

Participants

Participants were selected using purposive sampling, focusing on primary caregivers who met specific criteria. Eligible participants were those who were at least 18 years old and had been caregiving for stroke patients for a minimum of six months. The stroke patients they cared for had experienced a stroke at least six months prior and were living with some form of disability. The study aimed for data saturation, which was achieved with eight participants.

Data Collection Procedure

Data collection involved conducting in-depth, one-on-one interviews with each participant. These interviews were guided by a validated questionnaire and were designed to elicit detailed and meaningful responses about the caregivers' experiences.

The procedure was as follows:

1. **Orientation and Consent**: Participants were thoroughly oriented about the study's nature, purpose, and procedures. They were informed of their rights, including voluntary participation, the right to refuse to answer questions, and the right to withdraw at any time. Informed consent was obtained from all participants.

2. **Interviews**: The in-person interviews were conducted at a location within the healthcare institution chosen for the comfort and privacy of the participants. Each session was audio-recorded with the participants' consent to ensure accuracy in data transcription. The interviewer used a researcher-made semi-structured interview guide which was validated by three research experts. Both the English and Visayan versions of the interview guide have been validated and deemed appropriate for the purpose of the study.

3. **Data Validation**: To ensure the reliability of the data, transcripts of the interviews were reviewed and validated by the participants. This reflective dialogue helped confirm that the participants' intended meanings were accurately captured.

4. **Thematic Analysis**: Data were analyzed using Colaizzi's method of qualitative data analysis. This involved extracting significant statements, formulating meanings, and identifying common themes across the participants' experiences.

Trustworthiness of the Study

Ensuring the trustworthiness of this phenomenological study was paramount to validate the findings and establish the credibility, transferability, dependability, and confirmability of the research. These criteria, proposed by Lincoln and Guba (1985), were meticulously applied throughout the study to ensure its rigor and reliability.

Credibility refers to the confidence in the truth of the data and the interpretations of the researcher. To achieve credibility, several strategies were employed. The study utilized Colaizzi's method of phenomenological data analysis, a well-regarded approach in qualitative research, ensuring that the analysis was systematic and thorough. The questionnaire guideline used for in-depth interviews was evaluated by experts in the field of research to ensure its relevance and effectiveness in capturing the lived experiences of caregivers. The researcher's prior employment at the participating organization facilitated an in-depth understanding of the organizational culture and the caregiving context, enhancing the credibility of the data collected. Eight participants were carefully selected to ensure a comprehensive exploration of the phenomenon. The study reached data saturation, meaning that no new information emerged from the additional data, ensuring a thorough understanding of the caregivers' experiences. Conducting a pilot study with four primary caregivers helped assess the feasibility of the research design and tools, ensuring that they effectively captured the necessary data. During interviews, participants were encouraged to be open and honest. They were assured of their right to withdraw from the study at any time without any repercussions, fostering a trusting environment. The researcher engaged with research experts to discuss the data analysis process. Peer debriefing helped identify any potential biases and provided an additional layer of scrutiny to the research findings. The findings were validated through related literature and theories, ensuring that the interpretations were grounded in existing knowledge.

Transferability pertains to the extent to which the findings can be applied to other contexts or groups. To enhance transferability, detailed descriptions of the research context, participants, and findings were provided. This comprehensive account allows readers to determine the applicability of the results to other settings or populations.

Dependability involves the stability and consistency of the research process over time. To ensure dependability, the study underwent external auditing by research experts who were not involved in the study. These experts reviewed the research process and findings to confirm that the data supported the conclusions drawn. The research process,

including data collection and analysis procedures, was meticulously documented. This transparency allows for the replication of the study and verification of the findings.

Confirmability ensures that the findings are shaped by the participants' experiences rather than researcher bias. To achieve confirmability, a clear audit trail was maintained, documenting every step of the research process. This included data collection methods, decisions made during analysis, and the development of themes. Participants reviewed the transcripts and the derived themes to verify that their experiences were accurately captured. This feedback loop ensured that the interpretations truly reflected the caregivers' perspectives. Throughout the data collection and analysis phases, reflective dialogue was used to cross-check the accuracy of the interpretations with the participants. This iterative process helped maintain the authenticity of the findings.

By rigorously applying these criteria, the study ensured that its findings were credible, transferable, dependable, and confirmable. This robust methodological framework provided a trustworthy account of the lived experiences of primary caregivers of stroke patients, offering valuable insights for healthcare professionals, policymakers, and support organizations.

Ethical Considerations

The study adhered to ethical principles to protect the rights and well-being of the participants. Ethical soundness of the study was evaluated by the technical panel of the Master of Arts in Nursing Program of Davao Doctors College, Inc. as well as the research board of the study's locale. This ensured that the research conformed to established ethical standards and guidelines.

Participants provided informed consent after being fully briefed about the study's purpose, procedures, and potential impacts. They were made aware of their rights, including the right to withdraw from the study at any time without any consequences. This informed consent process was crucial in ensuring that participation was voluntary and based on a clear understanding of what the study entailed.

Confidentiality was rigorously maintained throughout the study. Participants' privacy was protected by removing personal identifiers from the transcripts, and all data were securely stored to prevent unauthorized access. This approach safeguarded the participants' identities and the sensitive information they shared.

The principle of beneficence guided the study, which was conducted with the intent to benefit the caregivers. By bringing their experiences to light, the research aimed to highlight the challenges they face and inform better support systems for them. This focus on beneficence ensured that the study was not only ethically sound but also meaningful and impactful for the participants and the broader community of caregivers.

RESULTS

Profile of the Informants

The demographic profile of the study participants provides insight into the diverse backgrounds of primary caregivers of stroke patients. The participants include individuals with varying levels of healthcare experience, ranging from nurses and nursing assistants to those without any formal healthcare background.

Among the eight participants, four are nurses, reflecting a strong presence of individuals with professional healthcare training. These participants are aged between 23 and 32 years old, indicating a relatively young group of healthcare professionals.

Two participants are nursing assistants, both aged 24 years old. Their roles support the primary caregiving activities and highlight the involvement of ancillary healthcare staff in the caregiving process.

The remaining two participants do not have formal healthcare training. Participant 3, who is unemployed and 30 years old, and Participant 5, a 59-year-old self-employed individual, represent the segment of caregivers who may face additional challenges due to their lack of professional healthcare experience.

This demographic diversity underscores the varying degrees of preparedness and challenges faced by caregivers. It also highlights the need for tailored support systems that address the unique needs of both healthcare professionals and laypersons providing care to stroke patients.

Lived Experiences of Caregivers of Patients with Stroke

The study uncovered several key themes and subthemes that provide a comprehensive understanding of the lived experiences of primary caregivers of stroke patients. These themes reveal the practical realities and emotional journeys of caregivers, highlighting both the challenges they face and the sources of resilience and fulfillment they find in their roles.

Theme 1: Prologue: Taking up the Mantle

This theme captures the initial phase of the caregiving journey, where caregivers are confronted with the sudden need to take on the responsibility of caring for a stroke patient. It includes the subthemes of Call to Adventure, Refusal to the Call, Heeding the Call, and Meeting with the Mentor, reflecting the stages of acceptance and adaptation to the new role.

Call to Adventure. Caregivers often begin their journey suddenly, without prior warning. The moment a loved one suffers a stroke, caregivers are thrust into a new role, often out of necessity rather than choice. One participant recalled, "At the moment my aunt had a stroke, there was nobody else who could take care of her, and since I have a

nursing background, her family decided and asked my mother and me if I could be my aunt's caregiver" (Participant 1).

Refusal to the Call. Initial reactions to the caregiving role often include hesitation and reluctance. The overwhelming nature of the responsibility can lead some to initially refuse the role. "There were times when my cousins and I fought over whose turn it is to take care of my grandmother. I felt angry because I still had things to do other than caregiving" (Participant 4).

Heeding the Call. Despite their initial reluctance, many caregivers accept their roles out of love and duty towards their loved ones. They find a way to rise above their fears and hesitations. "Since he is my father, my family agreed to make me the primary caregiver. Actually, my sibling and I take turns in taking care of him, but it was I who really was with my father the most" (Participant 3).

Meeting with the Mentor. Caregivers often receive guidance and support from healthcare professionals, family members, and their own inner strength. This support is crucial in helping them navigate their new responsibilities. "St. Luke's had given us a diet plan, and his physical therapy was twice a week. He also had regular follow-up check-ups with Dr. P" (Participant 3).

Theme 2: The Adventure: Living the Life of a Hero

This theme describes the ongoing journey of caregiving, likened to a heroic quest. Caregivers cross into a new realm of experience, characterized by challenges and responsibilities, but also supported by others. The subthemes are Crossing the Threshold of Being a Hero, A Hero's Duty, and Heroes Assemble!, illustrating the day-to-day tasks and the support networks caregivers rely on.

Crossing the Threshold of Being a Hero. Once caregivers accept their role, they enter a new, challenging phase of life. This transition involves adapting to new routines and responsibilities. "The moment my grandfather had a stroke, we immediately brought him here because he was a regular here and because I work here as well. It seemed automatic that I was chosen to become his caregiver because I was a nurse and the only nurse in our family" (Participant 8).

A Hero's Duty. Caregiving involves a wide range of tasks, from basic daily care to complex medical procedures. The dedication required can be immense. "Usually by afternoons, I give her baths, turn her to her sides, change her clothes, change her catheter, and feed her through her NGT" (Participant 1).

Heroes Assemble! Support from family and friends is crucial. Caregivers often rely on their network to share the burden. "Yes, there were three of us siblings, and we have our cousins as well who help us in taking care of our father" (Participant 2).

Theme 3: The Achilles' Heel

This theme focuses on the vulnerabilities and struggles that caregivers face. It encompasses the significant physical, emotional, and social tolls of caregiving, highlighted by the subthemes "With Great Power Comes Great Responsibility," Heroes Bleed, and Facing the Big Battle. These subthemes address the immense stress and potential for burnout that caregivers endure.

"With Great Power Comes Great Responsibility" The role of a caregiver comes with significant responsibilities, often leading to feelings of being overwhelmed. "At the time I became the primary caregiver of my grandfather, the responsibility of being in-charge of his health was overwhelming for me" (Participant 8).

Heroes Bleed. Caregiving takes a toll on caregivers' physical and mental health. Social isolation and personal sacrifices are common. "My life was really affected. At the moment my father had a stroke, I was about to take exams at that time, and I was a graduating student at that. I was so busy meeting the ends of my requirements, even to the point of not being able to study because I'd allot my study and rest periods to taking care of him" (Participant 2).

Facing the Big Battle. The constant demands of caregiving can lead to significant stress and burnout. "As for the physical aspect, I just deemed that I needed strength to turn her to her sides because she was somewhat overweight" (Participant 1).

Theme 4: Heroes Prevail

The final theme celebrates the resilience and ultimate triumph of caregivers. Despite the myriad challenges, caregivers find meaning and fulfillment in their roles. The subthemes The Road Forward and Resurrection of the Hero describe the ongoing journey of personal growth and the renewed sense of purpose that many caregivers experience.

The Road Forward. Despite the hardships, caregivers find ways to move forward, often driven by the progress and recovery of their loved ones. They develop strategies and routines that help them manage their responsibilities more effectively.

Resurrection of the Hero. Ultimately, caregivers find a sense of purpose and fulfillment in their roles. The journey, while challenging, leads to personal growth and resilience. "For me, if you have children that aid you in caregiving, you'd have a breather, as if your burdens will lessen because of them" (Participant 5).

DISCUSSION

Life after stroke, for most patients, hadn't been an easy life to live with. In fact, it took them several months and, for some, even years before they recovered from and adjusted to the life of having a stroke. Although the complications that resulted from the

stroke event, and the changes it brought to them, varied from one person to another, these patients, owing to their decreased in or loss of their capacity to live their lives on their own, all faced the same brand of challenge – that is, taking on the role of being a care-seeker. However, these stroke patients aren't the only ones who faced big changes. Their caregivers faced them too. Their lives, much to what these stroke patients have had, haven't been an easy one to live with as well, and, in most cases, these caregivers, as they began to take up the role of being the carer of these care-seekers, did not have a good understanding of the mantle they were about to wear, of the role to which they were about to commit, and they were not well-prepared to take on even the basic tasks to meet the patients' needs after stroke. Furthermore, these patients and their caregivers did not have adequate time to deal with the shock and crisis of the stroke event, let alone the crisis of discharge and of all the new responsibilities with which they have dealt and continue to deal with after it occurred – an experience which has been reflected in other studies (Andrew et al., 2015; Byun & Evans, 2015; Haley et al., 2015; Lou et al., 2015; Lutz et al., 2011; McGurk & Kneebone, 2013; Persson et al., 2015; Olai et al., 2014; Timber & Smith, 2011). Simply put, their lives, in all its aspects, have never been the same after stroke.

Nevertheless, amidst all odds, these stroke patients and their caregivers found solace and support in the presence of their family and friends, in the teachings and insight of their healthcare providers, and, most importantly, in the sustenance of each other – as was underscored in several studies (Gillespie & Campbell, 2011; O'Shea & Goode, 2015; Plank et al., 2012; Grant et al., 2014). Together, living after stroke and with stroke had become a series of ups and downs, of trials and errors, and of frustrations and satisfactions.

The insights gained from this study are invaluable for healthcare professionals, policymakers, and support organizations, emphasizing the critical role of primary caregivers and the need for comprehensive support systems. Recognizing and addressing the multifaceted needs of caregivers is essential to improve their quality of life and, consequently, the health outcomes of stroke patients.

One of the primary insights from this study is the necessity for robust community-based support programs that offer both emotional and practical assistance to caregivers, as was suggested by the National Institutes of Health (2015). Such programs can provide a range of services, including help with daily tasks, transportation, and access to local resources. By integrating caregivers into the broader healthcare system, these programs can ensure they receive the comprehensive support needed to manage their caregiving responsibilities effectively. Emotional support through peer groups and counseling can alleviate the psychological burden, while practical assistance can ease the day-to-day caregiving load.

Moreover, implementing flexible work arrangements and respite care options is crucial to help caregivers balance their caregiving responsibilities with other aspects of their lives. Flexible work policies, such as adjustable work hours, remote work options, and extended leave provisions, can significantly reduce the stress and burnout associated

with balancing full-time employment and caregiving duties. Respite care options are equally important, providing temporary relief and allowing caregivers to take necessary breaks to maintain their well-being (Doty & Spillman, 2015; Swanke & Zennan, 2009).

In addition, offering comprehensive training programs is vital to equip caregivers with the necessary skills and knowledge to manage the complex needs of stroke patients effectively, as was suggested by Pitthayapong et al. (2017). These programs should cover practical skills, patient care techniques, and the use of medical equipment. Ongoing training is essential to address the evolving needs of both caregivers and patients, ensuring that caregivers are always prepared to provide the best possible care. Such training empowers caregivers, enhancing their confidence and competence in managing their roles.

Furthermore, incorporating Chada's (2014) recommendation of providing access to mental health services is critical to address the emotional and psychological challenges that caregivers face. Caregiving can be an isolating and emotionally taxing experience, leading to stress, anxiety, and depression. Access to professional counseling and mental health support can help caregivers cope with these challenges, improving their overall mental health and resilience. These resources should be readily available and tailored to meet the specific needs of caregivers, offering them the support they need to sustain their caregiving efforts.

By addressing these needs, the quality of life for both caregivers and stroke patients can be significantly improved. Enhanced support systems, flexible work policies, comprehensive education and training, and accessible mental health resources can ensure better health outcomes and more sustainable caregiving practices. The insights from this study highlight the resilience of caregivers and underscore the critical importance of providing them with the support they need to continue their vital work effectively. Investing in these areas not only benefits caregivers but also contributes to the overall well-being and recovery of stroke patients, fostering a healthier, more supportive community for all.

Limitations of the Study

This study provides valuable insights into the lived experiences of primary caregivers of stroke patients, but it has several limitations. The small sample size and specific geographic focus may affect the generalizability of the findings. Selection bias could also be present due to the purposive sampling method, and reliance on self-reported data may introduce recall bias. Additionally, the cross-sectional design captures only a single point in time, missing the evolving nature of caregiving, and the cultural context may limit applicability to other settings.

Despite these limitations, the study has notable strengths. The phenomenological design allows for an in-depth exploration of caregivers' experiences, providing rich and detailed insights. Colaizzi's method ensured rigorous data analysis, enhancing credibility. The diverse participant backgrounds add depth to the findings, and the focus on an under-

researched group addresses a significant gap in the literature. These strengths contribute to the study's overall value in informing support systems and interventions for primary caregivers of stroke patients.

Conclusions

This phenomenological study aimed to explore and understand the lived experiences of primary caregivers of stroke patients. Through in-depth interviews and qualitative data analysis, we uncovered four major themes that encapsulate the caregiving journey: Prologue: Taking up the Mantle, The Adventure: Living the Life of a Hero, The Achilles' Heel, and Heroes Prevail. These themes reveal the multifaceted nature of caregiving, highlighting both the immense challenges and the deep sense of fulfillment that caregivers experience.

The study found that caregivers often begin their roles with reluctance and hesitation, faced with overwhelming responsibilities and significant lifestyle changes. Despite these initial struggles, they adapt and grow, finding strength and resilience through their journey. The constant demands of caregiving take a toll on their physical, emotional, and social well-being, yet caregivers also find meaning and purpose in their roles, driven by love and duty towards their loved ones.

The findings of this study underscore the critical yet often overlooked role of primary caregivers in the rehabilitation and recovery of stroke patients. The study emphasizes the need for comprehensive support systems that address the physical, emotional, and social needs of caregivers, ensuring they are equipped to manage their responsibilities effectively while maintaining their well-being.

Recommendations

The research has drawn the following recommendations to nursing practice, education, and research from the findings of the present study. For nursing practice, to better support primary caregivers of stroke patients, it is essential to develop and implement integrated caregiver training programs. These programs should focus on practical skills, patient care techniques, and the use of medical equipment. Training must be ongoing to address the evolving needs of both caregivers and patients, ensuring that caregivers are equipped with the latest knowledge and skills necessary for effective care. Regular health assessments for caregivers are crucial to monitor their physical and mental health. By conducting these assessments, healthcare providers can identify signs of burnout and health deterioration early, allowing for timely interventions and support. Additionally, establishing counseling and mental health support services can help caregivers cope with the emotional and psychological challenges they face. Providing access to these services can significantly alleviate stress and improve caregivers' overall well-being.

In addition, nursing education programs should incorporate modules specifically focused on caregiver support. These modules should emphasize the importance of understanding and addressing the needs of caregivers, preparing future nurses to provide

holistic care that includes both patients and their caregivers. By integrating this perspective into the curriculum, nursing students will be better equipped to offer comprehensive support. Training in effective communication techniques is also essential. Educating nursing students on how to communicate empathetically and practically with caregivers ensures that they can provide the necessary guidance and support. This training will enable nurses to build strong, supportive relationships with caregivers, fostering a more collaborative and effective care environment.

For nursing research, there is a need for longitudinal studies to explore the long-term impacts of caregiving on physical and mental health. These studies should examine how the challenges and needs of caregivers evolve over time, identifying effective interventions that can support them throughout their caregiving journey. Research into the effectiveness of various support interventions is also critical. By evaluating programs such as caregiver training, support groups, and mental health services, researchers can determine the best practices for alleviating caregiver burden. Furthermore, studying the experiences of caregivers across different cultural and socio-economic backgrounds is essential to identify unique challenges and tailor support needs accordingly. This research will provide a more comprehensive understanding of caregiving dynamics, ensuring that support interventions are inclusive and effective for diverse populations.

Furthermore, it is the hope of the researcher that the following policy recommendations be implemented in healthcare systems to provide sustainable support to the primary caregivers of patients with stroke. First, advocating for policies that provide flexible work arrangements and respite care options is crucial to help caregivers balance their caregiving responsibilities with other aspects of their lives. Many caregivers face the challenge of juggling full-time employment and caregiving duties, which can lead to significant stress and burnout. Flexible work policies, such as adjustable work hours, remote work options, and extended leave provisions, can alleviate some of these pressures, allowing caregivers to manage their time more effectively. Respite care options, which provide temporary relief by arranging professional care for the patient, are also essential. These policies not only support caregivers' well-being but also ensure they can continue to provide high-quality care to their loved ones without sacrificing their own health or job security.

Moreover, promoting the development of community-based support programs is vital for offering practical assistance and emotional support to caregivers. These programs can provide a range of services, including help with daily tasks, transportation, and access to local resources. By integrating caregivers into the broader healthcare system, these programs can ensure that caregivers receive the comprehensive support they need. For example, community centers can host workshops and support groups, providing a platform for caregivers to share experiences and receive guidance from professionals and peers. These initiatives can create a supportive network, reducing feelings of isolation and enhancing caregivers' ability to manage their responsibilities effectively.

In addition, launching public awareness campaigns is essential to raise awareness about the critical role of caregivers and encourage community support and recognition of their contributions. These campaigns can highlight the challenges caregivers face and the invaluable service they provide, fostering greater empathy and understanding within the community. Public recognition can lead to increased support from employers, policymakers, and community members. Campaigns can utilize various media platforms, including social media, television, and community events, to reach a broad audience. By bringing attention to the importance of caregiving, these campaigns can drive societal changes that support caregivers, such as improved access to resources and better policy implementation.

Compliance with Ethical Standards

This study was conducted in full compliance with ethical standards. Informed consent was obtained from all participants, ensuring that they were fully aware of the study's nature, purpose, and procedures. Participants were informed of their right to withdraw from the study at any time without any repercussions. The anonymity of the informants was rigorously maintained, with personal identifiers removed from all data to protect their privacy. Throughout the study, the well-being of the informants was safeguarded, and every effort was made to minimize any potential distress or discomfort.

There were no conflicts of interest involved in the conduct of this study. The researcher adhered strictly to ethical guidelines to avoid plagiarism, ensuring that all sources were appropriately cited and credited. Additionally, there was no bias in the interpretation of the findings; the data were analyzed objectively to provide an accurate representation of the caregivers' experiences. The results of this study were used purely for research purposes, contributing to the body of knowledge on caregiving and informing better support practices for caregivers of stroke patients.

Acknowledgments

The author extends his deepest gratitude to the primary caregivers who participated in this study, sharing their invaluable experiences and insights. Special thanks are given to the faculty and staff of the Master of Arts in Nursing Program of Davao Doctors College for their guidance and support. The author also acknowledges the assistance of the participating institution with data collection. Finally, the researcher appreciates the unwavering support of his family and friends throughout this research journey. Thank you all for your contributions.

CHANGING LANDSCAPE OF FILIPINO EDUCATION: TEACHERS' PERSPECTIVES ON TRADITIONAL VS. MODERNIZED APPROACHES TO TEACHING FILIPINO

Reymond B. Bantillo, MAEd[1], Jaime Boy U. Ngag, Jr., Ph.D.[2]

[1]Koronadal National Comprehensive High School, Division of Koronadal City, City of Koronadal, South Cotabato, Philippines
[2]South Cotabato State College, Dajay, Surallah, South Cotabato, Philippines

https://doi.org/10.5281/zenodo.12635314

ABSTRACT

The education landscape in the Philippines has been undergoing significant transformations in recent years, driven by technological advancements and evolving pedagogical approaches. The research investigated the evolving educational landscape, focusing on Junior High School teachers' perceptions and appreciation of the Filipino subject amidst changes in Koronadal City during the 2023-2024 Academic Year. Utilizing a qualitative methodology, particularly the phenomenological approach, the study involved fifteen participants – Junior High School teachers from Koronadal National Comprehensive High School in DepEd Koronadal City Division, meeting specified inclusion criteria.Employing a purposive sampling technique, fifteen Filipino teachers from Koronadal National Comprehensive High School, Division of Koronadal City participated. Data collection involved semi-structured interviews and focus group discussions, exploring teachers' perceptions and experiences regarding traditional and modernized teaching methods in Filipino education. Results indicated a predominant perception of traditional methods as teacher-centered, focusing on lectures and didactic instruction, leading to passive learning and limited engagement. Conversely, modernized approaches, integrating technology and collaborative tools, were viewed favorably for enhancing engagement and comprehension, particularly among audio-visual learners. Teachers' preferences for teaching methods were influenced by the learning environment, instructional materials, and personal styles. Technology use positively impacted engagement and appreciation but raised concerns about overreliance and hindering critical thinking skills. Recommendations were provided for the Department of

Education, curriculum developers, Filipino teachers, and future researchers. Suggestions included promoting professional development for digital literacy, designing curriculum frameworks that integrate modernized approaches, embracing a pedagogical mindset valuing both traditional and modern methods, and conducting longitudinal studies to assess the long-term impact of modernized teaching approaches.

Keywords: *Traditional, Modernized, Teachers' Perspectives, Filipino Education*

INTRODUCTION

The education landscape in the Philippines has been undergoing significant transformations in recent years, driven by technological advancements and evolving pedagogical approaches. One of the key subjects at the heart of this transformation is the Filipino subject, which plays a critical role in preserving the national language and culture. The traditional methods of teaching Filipino have been challenged by modernization, introducing new approaches and tools that potentially impact students' learning experiences and perspectives. (DepEd, 2013).

Historically, the teaching of the Filipino subject in the Philippines has been rooted in traditional pedagogical methods. It often emphasizes rote memorization, recitation, and grammatical rules. While these methods have their merits, they have also faced criticism for being less engaging and relevant to students in the modern era (Bernardo, 2017).

The advent of technology and modern teaching methodologies has brought new opportunities for teaching and learning Filipino. Digital resources, interactive multimedia, and online platforms have been integrated into language education to make it more engaging and interactive (Basco & Gonzales, 2019). These modernized approaches aim to bridge the gap between traditional classroom instruction and the digital age.

The Filipino subject is not only about language but also about culture and identity. With modernization, there is a concern that the preservation of the Filipino language and culture may be at risk. Ngag (2023) pointed out that Filipino students have limited knowledge in their own literature, which also affects how they appreciate Filipino as a language.

Modernized approaches often require teachers to adapt to new technologies and teaching strategies. It is essential to investigate whether teachers are adequately prepared and trained to deliver these modernized lessons effectively (DepEd, 2012). Insufficient teacher training can hinder the successful implementation of modernized approaches (Molina & Macasaquit, 2018).

This study aims to delve into this evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceive and appreciate the Filipino subject amidst these changes in Koronadal National

Comprehensive High School, Division of Koronadal City during the School Year 2023-2024.

Research Questions

This study aimed to delve into the evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceive and appreciate the Filipino subject amidst these changes in Koronadal National Comprehensive High School, Division of Koronadal City during the School Year 2023-2024.

Specifically, this delved with the following questions:

1. How do Junior High School teachers perceive traditional teaching methods in Filipino education, and what are their attitudes toward these methods?
2. What are the modernized approaches to teaching Filipino that are currently being employed in high schools, and how do teachers view their effectiveness in comparison to traditional methods?
3. What are the key factors that influence Junior High School Teachers' preferences for either traditional or modernized approaches to learning the Filipino subject?
4. How does the use of technology and digital resources impact Junior High School Teachers' engagement with and appreciation of the Filipino subject?

METHODOLOGY

Research Design

This research used a qualitative methodology, especially using the phenomenological approach, to delve into the evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceived and appreciated the Filipino subject amidst these changes in Koronadal National Comprehensive High School, Division of Koronadal City during the School Year 2023-2024.

One crucial element of the phenomenological research design is the researcher's responsibility to suspend any preexisting beliefs about the experience or phenomena in question (Delve & Limpaecher, 2012).

Participants of the Study

The participants' qualifications, as determined by the criteria established by the researcher before selecting eligible informants for the study. The study involved a total of fifteen (15) participants: comprised of Junior High School teachers from Koronadal National Comprehensive High School, Division of Koronadal City, who met the researcher's specified inclusion criteria:

Participants' Inclusion Criteria:
Qualification: Teacher-Participants
1. Must be a Filipino teacher.
2. Must be assigned in Junior High School at Koronadal National Comprehensive High School, Division of Koronadal City.
3. Must be in 5 years and above in teaching Filipino.

Sampling Technique

This study employed a Purposive Sampling Technique to carefully select fifteen (15) participants comprised of Junior High School Filipino teachers from Koronadal National Comprehensive High School, Division of Koronadal City, who met the researcher's specified inclusion criteria.

This method of sampling patterned after Creswell (2013) mandates that researcher's possess prior knowledge of the objectives underpinning their study so as to effectively pinpoint and make contact with eligible participants through online survey platforms like Alchemer. Researcher's resort to purposive sampling in order to secure access to a distinct subgroup of individuals, whereby all survey respondents are meticulously chosen based on their alignment with a specific demographic or criterion.

Data Gathering Instrument

This research used a semi-structured interview as an investigative instrument during both in-depth interviews and Focus Group Discussions (FGDs). Its purpose was to explore the evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceived and appreciated the Filipino subject amidst these changes in Koronadal National Comprehensive High School, Division of Koronadal City during the School Year 2023-2024.

The validity and appropriateness of this tool were substantiated through a rigorous evaluation process conducted by a panel of experts who possess expertise in the development of relevant research instruments.

Data Gathering Procedure

To enhance the trustworthiness of the study, a rigorous adherence to a predetermined set of protocols was maintained. The main aim of this research was to delve into the evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceived and appreciated the Filipino subject amidst these changes in Koronadal National Comprehensive High School, Division of Koronadal City during the School Year 2023-2024.

During the preliminary stage, the researcher soughs the approval from both the Superintendent of the Department of Education in Division of Koronadal City and the Dean of the College of Graduate Studies (CGS). The acquisition was crucial to get the

necessary permits for the researcher to carry out the study, hence underscoring the significance of ethical deliberations.

Subsequently, a supplementary letter of authorization was sent to the School Principal, expressly soliciting permission to get access to the precise data necessary for this study. A survey questionnaire was methodically constructed. It underwent rigorous examination and was given to the intended participants.

The researcher used a Purposive Sampling Technique to meticulously choose Junior High School teachers as participants for this investigation. Under the condition of strict compliance with specified health procedures, the researcher proceeded with the implementation of interviews and the facilitation of Focus Group Discussions (FGDs), all of which were carried out through in-person interactions.

The data obtained from interviews and focus group discussions (FGDs) underwent a systematic organization process, followed by a complete analysis and interpretation using the theme analysis technique. This methodology was anticipated to provide a more comprehensive comprehension of the matters being examined.

Data Analysis

The study aimed to examine the evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceive and appreciate the Filipino subject amidst these changes in Koronadal National Comprehensive High School, Division of Koronadal City during the School Year 2023-2024.

Following data collection, the transcripts were systematically reviewed to identify common themes and patterns emerging from the participants' responses which patterned after the study of Ngag (2023). Through an iterative process of coding and categorization, key themes were identified, reflecting the participants' perceptions, concerns, and insights regarding the agenda.

To achieve this objective, the researcher employed a content or thematic analysis approach to analyze the collected data. The approach described by Braun and Clarke (2006) that involves a systematic process of organizing textual components, such as sentences, phrases, and words, into organized groups or categories. The categorization of data will be based on either pre-existing frameworks or specifically designed categories that are tailored to the aims of the research.

To execute this analytical technique, a series of crucial stages was meticulously followed.

During the preliminary stage, several data sources, including interview transcripts, notes from Focus Group Discussions (FGDs), and relevant documents, were

systematically organized and readied for analysis. This phase is crucial for ensuring the systematic arrangement and ease of access to the data.

Following this, the researcher was in an extensive examination of interview transcripts and focus group discussion (FGD) notes in order to thoroughly analyze the data. The immersive method facilitated the acquisition of a thorough comprehension of the content and context that was inherent in the acquired information.

The next phase involved commencing a systematic coding procedure. The generation of first codes included the identification of relevant segments or patterns within the data. The aforementioned codes served as a means of encapsulating essential concepts, ideas, or topics that was directly related to the roles of community and culture in shaping the academic motivation of Hiligaynon learners.

After the coding process, the detected codes were organized into preliminary themes based on their common meaning or significance. The objective of this stage was to develop a basic structure for organizing the data.

Following this, the prevalent patterns that have emerged and the associated categories assigned to them were subjected to a rigorous process of examination and improvement. The researchers maintained the consistency and clarity of these topics, making any essential revisions as required. A descriptive title was provided for each refined topic, which conveyed the material it covered. This aided in the simple identification and understanding of the themes.

The selection and linking of relevant data extracts, such as quotes or segments derived from interviews and focus group discussions (FGDs), were conducted concerning the corresponding topics. The provided passages functioned as corroborating evidence for the highlighted themes.

The researcher did a comprehensive analysis to understand the relevance and consequences of each topic within the specific context of the study's aims. The researcher analyzed trends, correlations, and variances within the identified topics to get a full understanding of the evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceived and appreciated the Filipino subject.

The study employed a rigorous and systematic approach to thematic analysis, enabling researchers to comprehensively examine and comprehend the educational landscape, with a particular focus on understanding how Junior High School teachers perceived and appreciated the Filipino subject.

The said methodology provided significant findings that may help the improvement of intervention programs designed to address the issues related to the educational landscape.

Scope and Limitations

The study was conducted at Koronadal National Comprehensive High School, Division of Koronadal City. The research was limited to this school, and the findings may not be generalizable to other regions and divisions. The study was conducted during the School Year 2023-2024. It examined the perceptions and appreciation of the Filipino subject during this specific academic year.

It involved Junior High School teachers in Koronadal National Comprehensive High School, Division of Koronadal City during the specified school year. The research centered on the Filipino subject as a subject of interest. It explored teachers' attitudes, perceptions, and experiences related to this subject.

The study focused on specific grade levels within high school, a specific range, but it did not include all grade levels. The study did not explore variations in language, dialects, or regional languages within Koronadal National Comprehensive High School, Division of Koronadal City that students may be using, as it primarily focused on the Filipino subject.

RESULTS AND DISCUSSION

The education landscape in the Philippines has been undergoing significant transformations in recent years, driven by technological advancements and evolving pedagogical approaches. This research used a qualitative methodology, specifically the phenomenological approach, to delve into the evolving educational landscape, with a particular focus on understanding how high school teachers perceived and appreciated the Filipino subject amidst these changes in the Division of Koronadal City during the School Year 2023-2024. The study involved a total of fifteen (15) participants: comprised of Junior High School teachers from Koronadal National Comprehensive High School in DepEd Koronadal City Division, who meet the researcher's specified inclusion criteria.

This study employed a Purposive Sampling Technique were intentionally utilized to carefully select fifteen (15) participants comprised of Filipino teachers from Junior High School of Koronadal National Comprehensive High School in the Division of Koronadal City, who met the researcher's specified inclusion criteria.

This research used a semi-structured interview will function as an investigative instrument during both in-depth interviews and Focus Group Discussions (FGDs). Its purpose is to explore the evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceive and appreciate the Filipino subject amidst these changes in the Koronadal National Comprehensive High School, Division of Koronadal City during the School Year 2023-2024.

Based on the results, traditional teaching methods in Filipino education were perceived as predominantly teacher-centered, focusing on lectures, readings, and

didactic instruction. While some teachers may benefit from these methods, there were also concerns about passive learning experiences and limited engagement.

Further, the modernized approaches to teaching Filipino involved integrating technology, such as laptops, tablets, and multimedia resources, to create interactive and dynamic learning experiences. Teachers generally viewed these methods as effective in enhancing engagement and comprehension compared to traditional approaches, particularly for audio-visual learners.

Furthermore, teachers' preferences for either traditional or modernized approaches to learning the Filipino subject were influenced by factors such as their learning styles, engagement levels, and the effectiveness of instructional methods. While some teachers may thrive in traditional environments, others preferred modernized approaches that cater to diverse learning needs.

Finally, results show that the use of technology and digital resources positively impacted teachers' engagement with and appreciation of the Filipino subject. Technology serves as a motivational tool, fostering active participation and providing access to interactive learning materials. However, there is also recognition of the importance of balancing traditional and modern approaches to ensure a comprehensive educational experience.

Generally, these findings collectively highlighted the complex interplay between traditional and modern teaching methods in Filipino education and underscored the importance of catering to diverse student needs and preferences.

Conclusions

Based on the provided results, here are four major conclusions:

First, Junior High School teachers generally perceived traditional teaching methods in Filipino education as teacher-centered, with a focus on lectures, readings, and didactic instruction. While some teachers may find value in traditional methods, others may struggle with passive learning environments and limited engagement.

Second, modernized approaches to teaching Filipino in Junior High Schools included the integration of technology, interactive online platforms, multimedia resources, and collaborative tools for group projects. These modern approaches aim to enhance student engagement, participation, and comprehension by catering to diverse learning styles and preferences.

Third, teachers' preferences for traditional or modernized approaches to learning the Filipino subject were influenced by factors such as teaching environment, availability of instructional materials, and personal learning styles. While some teachers may benefit

from aspects of traditional teaching, others prefer modernized approaches that offer dynamic and interactive learning experiences.

Finally, it has been concluded that the use of technology and digital resources positively impacts Junior High School teachers' engagement with and appreciation of the Filipino subject by providing interactive learning experiences and easy access to academic materials. While technology serves as a motivational tool for students, concerns exist regarding overreliance on gadgets and a potential hindrance to critical thinking skills. Also, teachers' adoption of technology enhanced their connection to the subject and fosters active participation in learning, suggesting a shift towards a more student-centered and innovative approach to Filipino education.

Recommendations

In the light of the findings of the study, the following were recommended:

1. Department of Education (DepEd) of the Division of Koronadal City may encourage professional development opportunities for Filipino teachers to enhance their digital literacy skills and proficiency in integrating technology into their teaching practices.

2. Curriculum Developers/ Education Supervisor in Filipino may ollaborate with educators, researchers, and technology experts to design curriculum frameworks that incorporate modernized teaching approaches while respecting the cultural and linguistic heritage embedded in the Filipino subject.

3. Filipino Teachers may foster a student-centered learning environment by incorporating interactive activities, multimedia resources, and collaborative projects that promote active participation, critical thinking, and creativity among students.

4. Future Researchers may conduct longitudinal studies to assess the long-term impact of modernized teaching approaches on student learning outcomes, academic achievement, and retention in the Filipino subject.

Compliance with Ethical Standards

Before initiating this research, it is imperative to emphasize the paramount importance of ethical considerations in investigating the evolving educational landscape, with a particular focus on understanding how Junior High School teachers perceived and appreciated the Filipino subject amidst these changes in Koronadal National Comprehensive High School, Division of Koronadal City during the School Year 2023-2024.

To facilitate the implementation process, the aforementioned plans and suggestions were presented be formally provided to East-West Mindanao Colleges, Inc.

This step was crucial to guarantee strict compliance with mandated rules and regulations. As a result, the following ethical concepts were given prominence:

The study adhered to rigorous ethical standards to ensure the protection and well-being of participants. Informed consent was meticulously obtained from the school principal, ensuring a comprehensive understanding of the study's objectives, methodologies, risks, and benefits. Participation was entirely voluntary, with participants having the autonomy to withdraw at any time without consequences. To safeguard anonymity and confidentiality, pseudonyms or codes were used instead of actual names, and data were securely stored with restricted access. Sensitive topics were handled with care to minimize emotional and psychological impact, supported by a readily available support system. The researcher maintained a professional and respectful relationship with the school head, strictly avoiding any actions that could harm participants.

Additionally, strict adherence to data protection regulations was ensured, with secure storage and transmission of data. Participants were assured of their voluntary participation without coercion, and the researcher remained vigilant about potential biases, maintaining objectivity and transparency. Ethical clearance was sought from relevant institutional review boards, and the findings were reported truthfully. The research considered the potential benefits to educational practices and policies, contributing positively to the education system. Cultural sensitivity and respect for local customs were maintained, and the research design prioritized inclusivity and diversity, encompassing a wide range of perspectives. This conscientious approach ensured the study was conducted with due regard to the rights and welfare of students and teachers, offering valuable contributions to the field of education within the unique setting of DepEd in Koronadal National Comprehensive High School.

Acknowledgments

This research would not have been possible without the guidance and help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study.

MARJUNI M. MADDI, Director General of BARMM MBHTE – Higher Education, for nurturing and showing concrete support of the institution that makes us inspiring students to pursue our degree; ROBERTO J. MONTERO, CESO VI, Schools Division Superintendent of the Division of Koronadal City for allowing him to conduct the study in Koronadal National Comprehensive High School and for unselfishly providing the necessary information needed for this research; PATRICEA I. SANDIGAN, MAEd, East-West Mindanao Colleges, Inc. President, whose sincerity and encouragement to the researcher to finish his research work; EMILIA M. LOTILLA, PhD, Dean of Graduate School, for being approachable and giving her pieces of advice to the researcher; JULIET P. TAMBUNGALAN, MAEd. Academic Chairperson, for the patience and encouragement to complete this study; JAIME BOY U. NG[iv]AG, JR., PhD, his adviser, for the guidance, inspiration, and priceless contribution to the research paper for giving commentaries and pointing out flaws that greatly improved the manuscript; AMILUDIN G. MASABPI, PhD,

LEODIE D. MONES, PhD and MICHAEL A. POBLADOR, PhD for their constructive feedbacks, critics, and valuable comments and suggestions in developing his research study;

VALENTIN C. DIGNADICE, JR., Principal IV of Koronadal National Comprehensive High School, for extending his support and cooperation and for allowing the researcher to conduct and gather the necessary data from the Filipino teachers; JOLLE MAY T. BAYRON AND ADONIS BAYRON, EdD, his OIC Filipino Department Head and Master Teacher II, for all their support, kindness, and guidance throughout his research journey and for all the knowledge and values that helped and contributed to his professional growth; FILIPINO TEACHERS' RESPONDENTS from Filipino Department of Koronadal National Comprehensive High School (Master Teachers: Ma'am Castro and Ma'am Balinas; Teacher III: Ma'am Bayron, Ma'am Peteros, Ma'am Nicolas, Ma'am Suriaga; Teacher II: Ma'am Villanueva, Ma'am Aperocho, Ma'am Bayona, Sir Marcelino and Teacher 1: Ma'am Aquino, Ma'am Mahait, Ma'am Lozaga, Ma'am Yucada and Ma'am Ignoro) during the School Year 2023-2024, for honestly providing the needed data and for sharing their precious time, especially during the in-depth interview;

CLOSE FRIENDS AND RELATIVES, the researcher would like also to mention and acknowledge the names of these people who in their simple way helped him and worked with him. To his precious friends and students, Team Maricel, Ma'am Zenaida R. Castro, Sha-Sha, Argie, Rosane, Verjohn, Judy Ann, Toto Arjan, Ate Glory May, Nanay Aida, Ira Love, Tita Cita, Mayet, Ate Rochiel, Ate Rhodora, Toto Berong, Ma'am Marjorie Bermudez, Sir Mheldoane Pantaleon, and most especially Joey C. Paracuelles (+), for their precious encouragements with support; NOEL SIGA GALLAZA, for the encouragement, understanding, and ultimate moral support with his inspiration. Indeed, he has been the researcher's destiny to pursue his dreams in life; RAMON ALMAYO BANTILLO, JR. AND RITA BORINAGA BANTILLO(+), his parents, for the love, care, intellectual and moral that really inspired him to pursue his Master's Degree dream; and

Above all of us, the omnipresent God, for answering his prayers, for giving him the strength, knowledge and confidence, divine guidance and wisdom, for being the source of everything, all praises upon Him.

ABSTRACT

This research focuses on the effects of climate change to the growth of plants. Through qualitative methods, the study provides perceptions about what way does climate change affects the living of plants. With the help of interview guided questions, the researchers gathered the data needed. The findings show that plants face a lot of challenges due to climate change, from its quality to the way it develops and grow. As well as ways on how the caretakers of a farm adapt to the changes induced by climate change, how planting dates is relevant to climate change albeit being unpredictable. By understanding the effects and factors contributing to climate change, this study contributes to gaining further knowledge on techniques, precautionary measures, and flexibility on the effect of climate change to the growth of plants; proper management, organic fertilizer, greenhouse, mulching techniques, and organic agriculture are recommended.

Keywords: *climate change, growth of plants, MSU-Sulu Philippines, qualitative, interview, factors*

INTRODUCTION

One of the issues of our day is climate change, which is increasingly evident. It is becoming more and more obvious how climate change affects both humans and environment. The continuous change on weather has a great impact not only to one's physical health but also to the state of our soil, plants, or our agriculture. Although plants

need to be constantly watered and exposed to sunlight, rapid changes may cause problems to the growth of plants.

Climate determines the temperature, weather difference, rainfall totals, and the composition of meteorological phenomena such as the harshness of storms. The reason why we are facing rising temperature, more frequent weather extremes, and natural disasters is because of climate change.

According to Zandalinas et al. (2018), agriculture is calculated to be the most negatively affected by climate change. These climatic problems harshly distress plant progress, yield, and produce massive responses. With sudden differences in environmental conditions, the severe effects on plant productivity are progressing intensely.

One factor of climate change is that it has significant impacts on plant growth. Changes in temperature, atmospheric gases, and carbon dioxide levels can harm microbes, plants, animals, and humans. Additionally, climate change can alter the physiological state of plants, affecting their overall growth. Plants have methods to survive stress which help them combat disadvantageous conditions. Changes in climate metrics, including temperature and climate variability are correlated with the changes in plant rejuvenation and growth quality. The fast reaction in plant traits to climate change may not be sufficient for plants to progress with future climate change

Therefore, the purpose of this study is to ascertain the effects of climate change to the growth of plants as perceived by the agricultural teachers, students, and the farmer themselves. According to the review related literature conducted by the researcher, there have been investigations on this subject. However, no research has been carried out specifically at MSU-Sulu Senior High School.

This gap in research led the researchers to carry out their own study, aiming to delve into the effect of climate change on the growth of plants. The researchers believe that this research will help the teachers, students, farmers, and future researchers help the individual to acclimatize to the changes and combat the effects of climate change.

RESEARCH QUESTIONS

This study aimed to determine the effect of climate change to the growth of plants. Specifically, this study sought to answer the following questions:

1. What do you think are the most significant challenges that plant face due to climate change?
2. Is climate change the sole factor contributing to the reduction in plant quality?
3. How specifically does climate change influence plant development?

4. How are the farmers at the MSU-Sulu College of Agriculture Demo Farm and its other Demo Farm Extensions adapting to the changes in plant growth induced by climate change?
5. What agricultural practices can be implemented to combat the effects of climate change the sole factor contributing to the reduction in plant quality?

RESEARCH METHODOLOGY

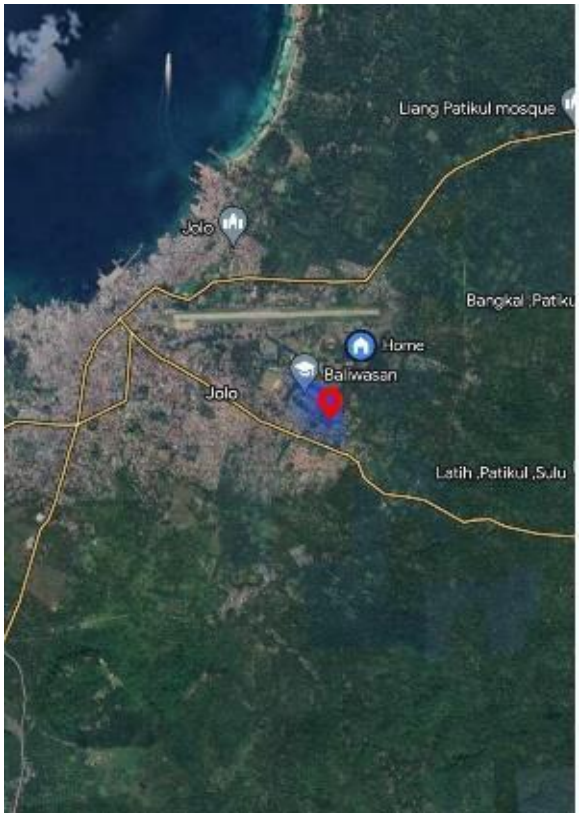
Research Locale

This study focused on the effect of climate change on the growth of plants, the research was conducted at Mindanao State University-Sulu, Philippines College of Agriculture, MSU-Sulu College of Agriculture Demo Farm Indanan Extension, Barangay Langtad, Indanan Sulu which is 9km away from Jolo town proper and MSU-Sulu College of Agriculture Demo Farm Maimbung Extension, at Barangy Lawm Maimbung, Maimbung Sulu which is 12.8km away from Jolo town proper.

Mindanao State University-Sulu was formerly known as MSU-Sulu Development and Technical College (SDTC). The public university is located at Capitol Site, Jolo, Sulu. The government established the campus to rehabilitate the educational situation of the province of Sulu in l974; the current campus site is about 550 meters from Jolo town proper.

Sampling Method

The participants in this study consists of (10) teacher from the College of Agriculture, as well as (4) caretakers from the MSU- SULU College of Agriculture Demo Farm Extensions.



The reason for selecting these participants is because of their direct involvement and experience in the field of agriculture, which is the primary focus of this research. Teachers provide an academic perspective, while the farmers offer a practical viewpoint based on their daily experiences.

In this study, the researchers used Purposive Sampling or Judgement sampling to select the participant of the study. According to Crossman (2020), as cited by Jailani et al. (2024), Basir et. al. (2024), Sasapan et. al. (2024), Jarak et. al. (2024) and Sabbaha et. al. (2024) Purposive Sampling is a non-probability sample that is selected based on characteristics of a population and the objective of the study.

Research Instrument

In this research, interviews were formulated. To get the appropriate data needed, the researcher used interview questions as the research instrument. This was used to gather data effectively. The respondents were some of the MSU-Sulu College of Agriculture faculties and the caretakers of MSU-Sulu College of Agriculture Demo Farm Extensions.

Thematic Coding and Analysis

Thematic analysis is the technique used to analyze qualitative data, it allowed the researchers to explore and interpret the richness and depth of the data. According to Virginia (2019) it is a method for analyzing, identifying, and reporting patterns within data. These techniques provide a more comprehensive understanding regarding the research topic.

Data Gathering Procedure

After validating the interview guided question, the researchers secured a written permit to the school director, Dr. Norman A. Abdurahman, and to the dean of College of Agriculture, Prof. Merhama M. Sammah to conduct the study.

The interviews were done and the data has been retrieved, the researchers transposed the collected data into its corresponding range and scale and categorized it. The researchers evaluated the data gathered from the interview and analyzed the said data.

RESULTS AND DISCUSSION

The data that are gathered from the participants of this study are coded, analyzed, and categorized into themes in this section to further delve into the effects of climate change to the growth of plants.

3.1 Significant challenges that plant face due to climate change

Climate change determines the temperature, weather difference, rainfall totals, and the nature of meteorological phenomena such as the severity of storms. Significantly, these factors affect crop yield and production. Too much of rain or extreme storms may erode and wash away nutrients in the soil. Moreover, Kopeć, (2024) has stated that extreme weather events, such as droughts, floods, heat waves, and cold snaps, pose threats to crops. The high yield and quality in most cultivated plants depend on the quality of the soil. Additionally, Hatfield et al. (2017) extreme temperature and precipitation can prevent crops from growing. Extreme events, especially floods and droughts, can harm crops and reduce yields.

If the weather is too hot, the plant will either die or wilt. (C1, Excerpt 1)
The fruit of the plant may fall, and it will mature early. (C4, Excerpt 2)
Of course, in hot weather, there's a tendency the plant will wither or the leaves

might get burned. (T2, Excerpt 3)

Sunlight is crucial for plant growth and photosynthesis; excessive heat can have negative effects. Plants exposed to extreme heat can experience wilting, similar to sunburn in humans, leading to withering and eventual death. (T6, Excerpt 4)

In too much heat, there are effects to the plants in which cases the leaves will lighten in color and it can also injure the plant. (T3, Excerpt 5)

Based on the participants' narratives, plants when exposed to extreme heat would lead to wilting or death. Although plants need to be exposed to sunlight and is crucial for plant development, exposure to too much heat has negative effects. According to Cho (2022) Extreme precipitation events can disturb plant growth. Additionally, Hatfield et al., (2017) stated that with extreme temperature, drought, prevents crops from growing. Moreover, Ozdemir (2022) stated that even if sunlight is needed for plants to grow, eventually it will destroy the plants in the long run.

It will die if given too much water, and it won't grow well in too much heat. (C1, Excerpt 6)

With natural disasters like flood, the plants may not catch any nutrients and there is a tendency it will rot. (C4, Excerpt 7)

It can affect not just the plants but also its fruits. When there is flood, there is a possibility of soil erosion. Plant growth depends on the climate. (T2, Excerpt 8)

Rain or precipitation is vital for providing water to plants, as water acts as a universal solvent. Excessive water can flood the area, leading to erosion, particularly in the top layer of fertile soil. The presence of organic matter, known as humus, in the water can aid in plant growth and development. Nevertheless, if the rainfall is too heavy and causes flooding and erosion, it can have detrimental effects and damage the plants. (T6, Excerpt 9)

In flood, plants are highly affected; too much water can destroy the plant since there is a limit in how plants absorb water. With climate change, plants won't grow normally especially now, pollution is the one that caused it. Air pollution made by vehicles can produce harmful toxic gases like nitrogen oxide and ethylene. If it is exposed to these gases, it can be poisoned. (T3, Excerpt 10)

Additionally, even water is also a need of plants; too much of it would have negative effects. In natural occurrences like heavy rain and flood, the soil of the plants would be affected; it may remove the topsoil, leading to the soil being unable to hold the nutrients the plants have. It may be washed out or eroded, hence, soil erosion occurs. Moreover, Cho (2022) stated that extreme precipitation events can disturb plant growth. particularly in recently burned forest and make more vulnerable to flooding and soil to erosion. Then, Lawson et al., (2019) said that heavy rain or flooding may disrupt or alter how the plants develop and grow, disrupting pollination. To add up, Balasubramanian (2017) states that soil that is detached by accelerated water or wind erosion maybe transported considerable distances, since soil erosion is one of the issues and challenges that plants face whenever there is rain or flooding.

Climate change disrupts normal plant growth, leading to abnormal patterns and

reduced yields. (T1, Excerpt 11)

It may still grow but it won't bear yields. (C2, Excerpt 12)

It won't grow normally when it is affected by climate change because a factor that causes climate change is air pollution. Air pollution from vehicles produces harmful toxic gases like nitrogen oxide and ethylene. If the plants inhaled large amounts of those toxic gases, it would poison them that result to dying. (T3, Excerpt 13)

Climate change can have a profound effect on plant growth, particularly through abiotic factors like excessive rainfall, high levels of precipitation, or intense sunlight. These factors can significantly influence the growth and development of plants. (T6, Excerpt 14)

Moreover, climate change can indeed affect the normal growth of plants. Changing in temperature or increase in carbon dioxide has a great impact on plants growth hence it won't grow like how it used to be. This leads to abnormal development, decrease yields, and even plant death. Stated by Cho (2022) elevated levels of CO2 from climate change may enable plants to benefit from the carbon fertilization effect and use less water to grow, but it's not all good news for plants. It's more complicated than that, because climate change is also impacting other factors critical to plants' growth, such as nutrients, temperature, and water. As stated by Rhaman (2021), climate change will alter plant development in ways that will have significant impacts on the function of crop plants and plants in natural ecosystems. Additionally, Gray (2016) Climate change will alter plant development in ways that will have significant impacts on the function of crop plants and plants in natural ecosystems. Future growing conditions will bring increased temperature, increased frequency of extreme events including heatwaves and drought events, and changes in the composition of the atmosphere.

3.2 Climate change as the sole factor of reduction for the quality of plants

Not only climate change could ruin the plants growth, it could also be how the farmers take care of the plants, the way they water the plants, and the type of soil they use. Plants have different types of soil that is suited for them. It's not just climate change. (T4, Excerpt 16)

Actually, climate change can ruin the plants. But sometimes animals can also ruin our plants especially stray animals. (T5, Excerpt 17)

No, actually there are many factors and one of those is climate change. Other factor is the pests. Pests ruin our plants, animals and humans could also ruin the plants. As long as it has the ability to ruin the plants, they are already considered as pests. (T2, Excerpt 18)

Presence of pests can ruin plants. Number 1 causes that damage to growing some plants especially to crops are pests. There are other factors like bacteria, molds, viruses that ruin plants growth and diseases which are caused by animals. It doesn't only focus on climate change; there are many possibilities that contribute to plant quality reduction. (T3, Excerpt 19)

In addition to abiotic factors, biotic factors such as harmful microorganisms and plant pathogens can also affect and damage crops. Living organisms like harmful bacteria, insect pests, and weeds can have a detrimental effect on the growth and

development of plants. (T6, Excerpt 20)

Based on our participants' responses, climate change is not the sole factor contributing to plant quality reduction. Other factors are the presence of pests, stray animals, the suitability of soil, and humans. The participants believe that there are many factors that could ruin the quality of the plants and one of those is climate change. According to Raza et al. (2019) the land and its agriculture are being affected in different ways; variations in annual rainfall, average temperature, heat waves, modifications in weeds, pests or microbes, global change of atmospheric CO2 or ozone level, and fluctuations in sea level. Research from Saliu et al. (2023) stated that sustainable agricultural practices, including crop rotation, cover cropping, conservation tillage, and organic farming, are instrumental in enhancing soil health and increasing crop yields.

You will notice the changes in leaves, and it doesn't grow well. (C1, Excerpt 21)

You will observe the yields mature early, it will wilt and changed in color. (C4, Excerpt 22)

Too much heat and too much coldness could affect the quality of plants that results to decrease in yields, it will produce less yields due to climate change. If the crops are too exposed to heat, it will burn. Although plants need light or heat to grow, sometimes if it is too much, it will harm them. (T3, Excerpt 23)

Climate change affects the quality of plants especially fruit trees. If a fruit trees normally bear fruit in sunny weather however it suddenly rain, then the fruit which is normally sweet will get bitter because it absorbs the water from the rain. (T5, Excerpt 24)

Too much sunlight or extremely hot weather, such as the current conditions with a heat index of 42°C, often referred to as El Niño, negatively affects plants. It causes soil water to evaporate, preventing plants from absorbing it. (T7, Excerpt 25)

According to the responses of our participants, there are so many ways that they observed how climate change negatively affects the quality of plants. The change of color in plant leaves as well as its crops results in decreasing of yields. If the leaves turn yellowish, it is a sign that the plant is affected by climate change. Ostrowsky et al. (2019) stated that if leaves absorb light, they trap that heat. When leaves reflect light, the heat is reflected in the sky as well. This process controls so much heat that leaf reflectance is a large driving factor in the global climate. Stated by Cho (2022) An elevation in temperature accelerates the lifecycle of plants, resulting in faster maturation. This reduced duration for photosynthesis leads to a decline in grain production and diminished yields.

No, because even if you could revive it, if the plant is not taken care of, it would still rot. (C3, Excerpt 26)

We should have soil conservation. We should keep track on when the plants can be watered and be aware of the soil's water content because of extreme heat, it has a massive effect to the plants. If the plant will get burned, to revive the plant, the soil's moisture level should be high, in order for the plants to be revived. (T3, Excerpt 27)

Take care of the plants and we should always eliminate weeds. Weeds are the great competitor of crop in terms of absorbing nutrients in terms of water and agricultural practices can be used to be able to change and the growth would be good despite climate

change. (T4, Excerpt 28)

One of the factors to the climate change is the uses of synthetic fertilizer, some of the farmers using the chemical to have a big income they don't even care the affected by the nutrition of this chemical there any ways can minimize it by minimal use if synthetic in a way of alternative by using the organic fertilizers. (T9, Excerpt 29)

Yes, we can change back the quality of plants thru proper management. There will always a way like application of organic fertilizer. (T10, Excerpt 30)

There is a way to change or revive the quality of the plants and the participants' responses all connect to proper management. With proper techniques; the usage of organic fertilizers, continuous watering of the plants, elimination of weeds and decayed plants. Despite the effects of climate change, the quality of the plants could be revived or changed back. Moreover, Zheng et al. (2024) stated the potential of organic fertilization in restoring polluted soils and maintaining soil health by suppressing the lability of heavy metals and providing nutrients. The importance of organic fertilization in improving soil quality and ecosystem functioning. Also, Hellin (2023) stated that Synthetic fertilizers are a type of fertilizer designed to supplement natural soil fertility by providing essential nutrients to plants and crops. They are a key component for increasing yields and improving crop quality. Hence, we must eliminate weeds for the betterment of the plants.

3.3 Influence of climate change to the development of plants

Water plants in the morning or evening to avoid heat damage. (T1, Excerpt 31)

If it's extremely hot there is a high tendency that the leaves of the plant would be burned, the respiration of the plants would be high which is damaging to the plants. If there is heavy rain, the plants would be flooded; both should be exact or balanced. (T2, Excerpt 32)

It depends, because there are cases that if it's so hot but the water quantity and fertilizer quality is maintained, the growth would be continuous, as long as it is taken care of well. (T3, Excerpt 33)

Climate change has a significant effect on the growth and development of plants, particularly during crucial stages such as flower formation and fruit production. Without flowers, there will be no fruits. Therefore, climate change adversely affects the plants' ability to produce fruits due to its negative effects. (T6, Excerpt 34)

Climate change can slow down plant growth and development by altering crucial environmental conditions. (T8, Excerpt 35)

In conclusion, the impact of climate change on plant growth and development, particularly during critical stages like flower formation and fruit production, underscores the importance of implementing effective watering practices and proper management of agricultural inputs. Addressing these challenges requires proactive mitigation strategies and adaptive measures to sustainably manage agricultural systems and ensure food security amidst changing environmental conditions. According Cho (2022) Climate change will bring more frequent and severe extreme weather events, including extreme precipitation, wind disturbance, heat waves, and drought. Extreme precipitation events can disturb plant growth, particularly in recently burned forests, and make plants more vulnerable to flooding and soils to erosion. More frequent high winds can stress tree

stands. Narayan Lal et al., (2022) also said that higher temperature promotes sun burn and fruit cracking in many fruit crops and cause serious economic losses. Lastly, Fahad et al., (2021) stated that climatic changes influence all agriculture factors, which can potentially adversely affect their productivity. Plant activities are intimately associated with climate and concentration of atmospheric carbon dioxide which greatly influence plant development.

Usually, the plants' growth and development would not be good. It would weaken and the leaves would not grow bigger. (T4, Excerpt 36)

Climate change has a detrimental effect on plant reproduction, as it leads to increased heat and humidity levels. This can be observed during dry and hot nights, where the weather feels arid despite the presence of air. This condition, known as relative humidity, significantly affects the reproductive processes of plants. (T6, Excerpt 37)

Because of migration the reproduction is affected by the climate change. During the hot season they have many pests, so we are now using chemical to counter it. (T9, Excerpt 38)

Yes, there are many signs how climate change affected the productivity of plants like for example fruits of fruit tree or the harvest will also be low. (T10, Excerpt 39)

We can see how climate change slows down the productivity of the plants, because climate change could rapidly change its weather, either sunny or rainy. If it's sunny, it is possible that it won't grow normally. (T5, Excerpt 40)

There are various signs that they observe about the effects of climate change to the growth of plants. Most of the participants said that climate change will affect the productivity of plants and low harvesting of fruits. Hence, climate change indeed affects the productivity of the plants from the way they grow to their physical aspects that leads to less quality yields to harvest. Raza et al. (2019) said by climate change and food insecurity are the two major issues of the 21st century. Agricultural yield is considerably affected by the adverse weather. With the increase in temperature, the production of major crops has been reduced. While Juroszek et al., (2020) has stated that one of the major concerns with potential climate change is that the frequency of extreme weather events may increase, including cold and heat waves, droughts, heavy precipitation, flooding and storms. These extreme weather events may also affect plant pathogens and related crop disease risks. El-Saadony et al., (2022) also added that plant diseases and pests are risk factors that threaten global food security.

Planting depends on crop adaptation; some prefer moderate climates (T1, Excerpt 41)

Climate change can affect flowering and fruiting patterns by altering sunlight availability, crucial for photosynthesis (T8, Excerpt 42)

Climate change poses challenges right from the beginning of the plant's life cycle, starting with the need for fertile soil when sowing seeds. However, the changing climate has disrupted the traditional rainy season, leading to more frequent droughts and excessive sunlight. This has resulted in a scarcity of water, particularly in the Indanan extension, causing damage to crops in terms of growth, development, and fruit production. The lack of water and excessive heat often lead to seeds germinating but

failing to produce fruits, highlighting the absence of development despite growth. (T6, Excerpt 43)

It still depends, smoke can induce flowering. Ethylene is an essential plant hormone. Especially, the plant hormone ethylene can bear. (T3, Excerpt 44)

The ability of plants to produce flowers varies, with some not flowering at all and others known for their flowering capabilities. Climate change can influence the fruiting and flowering patterns of plants. (T7, Excerpt 45)

Based on the participants' responses, it can be concluded that climate change has a significant impact on the flowering and fruiting patterns of plants. The changing climate, including factors like sunlight availability and water scarcity, can disrupt the growth, development, and fruit production of crops. Additionally, the ability of plants to produce flowers can vary, and smoke and ethylene are factors that can induce flowering. Additionally, Rajatiya (2018), said that the changing of climatic parameters disturbs the flowering pattern. A change in field-level climate may alter the need and timing of irrigation. It affects the crop physiology, biochemistry, floral biology, biotic stresses like disease-pest incidence that results to the reduction of yield and quality of fruit crops. To add up, Isoda et al., (2021) stated plant hormones play important roles in plant growth and development and physiology, and in acclimation to environmental changes.

3.4 Farmers adapting to the changes of plants due to climate change

Of course, when the plants are accustomed to the rainy season then sunny season comes, you should really water the plants because once you neglect the plants, and there is a huge tendency that they will die. (C1, Excerpt 46)

If it is sunny season, we water the plants daily, morning and afternoon. (C2, Excerpt 47)

If it is rainy season, we minimize watering the plants. (C3, Excerpt 48)

We adjust to changes in plant growth through fertilizer management. (C4, Excerpt 49)

These responses show that there is more than one way to adjust to the changes in plants' growth caused by climate change one of it is watering the plants daily when the climate is too hot. It may be challenging for them as a caretaker, they still manage to adjust by keen observation and swift adaptation to the shifting of weather patterns. Hence, being flexible and responsive to the needs of plants regardless of climate change is the best way to ensure their survival and growth. Stated by Malhi et al. (2021) The usage of traditional management systems and agroecological management systems, namely biodiversification, soil management, and water harvesting, can help farmers adopt climate-resilient technologies. Co (2019) said the use of pesticides and chemicals can harm plant health and contribute to climate change by releasing harmful substances into the environment. By avoiding these substances, we can help support plant survival and reduce the negative impacts on the environment. As well as, Jin (2019) stated that agriculture is a significant source of greenhouse gas emissions, particularly methane and nitrous oxide. Improving farming practices, such as reducing tillage, incorporating cover crops, and reducing synthetic fertilizer use, can help reduce these emissions. Additionally,

reducing meat and dairy consumption or adopting a vegan diet can help reduce the demand for animal products and reduce the environmental impacts of agriculture. Moreover, Jazeera (2019) said planting trees is a simple and effective way to reduce carbon emissions, combat climate change, and promote sustainable land use practices. By supporting reforestation efforts and planting trees in our own communities, we can help to create a healthier planet for future generations.

It actually depends on the plants, especially in fruit trees you should take care of it well. One example is the petchay plant; you should remove some parts that are rotten in order for it to not contaminate the other plants. (C1, Excerpt 50)

We have planting techniques,the plant should have at least 5 leaves then we could plant it. (C2, Excerpt 51)

Yes, after we plant it, we put plastic on so that if it has fertilizer, the nutrients would go directly to the bottom and to the roots so that it will grow. (C3, Excerpt 52)

We observe the plant, because sometimes the leaves turn yellow it means it is low in nutrients, so we put cow manure then we water the plants. Then after 3 days, you can already see it changing. (C4, Excerpt 53)

In our participants' responses, it can be seen that the techniques used by the farmers are through observing the plant state, what plant it is, removing the rotten parts and then using organic fertilizers. The farmers suggest that we use organic fertilizers rather than chemical fertilizers, for it is not good for the plant it is also a factor contributing to climate change. According to Zhou et al. (2022) Organic fertilization practices can improve crop yields and soil quality. Moreover, Lemery (2023) stated that adopting practices associated with organic and regenerative agriculture, such as cover crops, pesticide use reduction, rotational grazing, and composting, can help nurture the soil and reduce emissions from nitrogen-based fertilizers. Additionally, according to Datta (2023), farmers can utilize climate forecasting tools, plant cover crops, and adopt other strategies to manage climate-related production threats. While Swenson (2022) apply fertilizers, prevent animals from entering streams, and take actions to minimize nutrient-laden runoff.

In my perspective, regarding of using fertilizer, there is such thing we called steps in planting crops. There must be a distance that must be followed; the crops must be arranged when planted. (C1, Excerpt 54)

We taught them the effects of climate change as well as the signs of climate change and also the signs that the crops are not growing well, in that situation, we advised them to use organic fertilizer like Vermi Cas. (C2, Excerpt 55)

They should plant the crops in a good way in order for them to avoid any damages to plants and for it to grow well. (C3, Excerpt 56)

We will check if there are any wilted plants so we can take action immediately. We will apply fertilizers such as Vermi Cas and Cow Manure for them to help themselves. (C4, Excerpt 57)

Based on the caretakers' statements they collectively emphasize the significance of adapting careful management practices in agriculture, especially amidst the challenges posed by climate change. They stress the necessity of careful fertilizer application,

recognition of climate change symptoms, utilization of organic fertilizers such as Vermi Cas, observing appropriate planting techniques, and quick intervention to address crop distress. Overall, their insights advocate for an approach to crop refinement aimed to nourish plant growth and productivity while effectively ease the adverse effects of climate change. Moreover, Czembor (2022) there are agricultural practices that involve changing planting dates. One such practice is the adaptive management of crop growing periods by adjusting sowing dates, as mentioned in a study on global crop yields. Czembor (2019) said that modifying planting dates in agriculture can help farmers maximize yields, improve crop health, and better cope with the impacts of climate change. Czembor (2020) proves in his research that farmers determine the optimal planting date for their crops based on factors like soil temperature, moisture, and expected weather conditions. The planting date is crucial as it influences crop development and yield potential. In practice, farmers consider soil temperature, aiming to plant once it has risen above a certain threshold, typically around 50°F, and is expected to continue to rise.

3.5 Agricultural practices to fight the climate change

As professional in this field, there are many ways to lessen the cause of climate change. Like for example, in farming, we can lessen the cause of climate change like for not burning the residues, instead of burning the residues, we will decompose it, make it into fertilizer. Minimize the use of chemical fertilizers, because burning those remains will produce methane gas which contributes to air pollution. (T9, Excerpt 58)

As professional practices I teach how the proper way to take care of plants by way of watering to minimize and to have a good growth and development of the plants (T4, Excerpt 59)

As a plant professional, I advise against improper garbage disposal, particularly burning materials like plastic soda bottles. This practice can harm the ozone layer and have a detrimental impact on the environment, leading to increased heat. (T7, Excerpt 60)

As a licensed agriculturist, we can provide assistance to the youth, students, stakeholders, and farmers in addressing climate change. There is an importance of patience and that climate change is a result of God's will. However, I also acknowledge the scientific understanding of environmental factors contributing to climate change. I encourage my students to have faith in God, be patient, and view climate change as a reminder to pray. (T6, Excerpt 61)

As a professional in the field of plants, the normal practice: which is planting more trees, plant more on organic. Like now they waste large quantities of fertilizers. But now the latest technology of agriculture, they have precision agriculture. Precision agriculture prevents the waste of the input which is the fertilizer, water and pesticides. A small amount is applied, but it can save more input. Excessive use and waste of inputs contribute to climate change for it causes land, air, and water pollution. So, we apply the actual practice, which is the precision agriculture; precise amount only needed to apply the inputs. (T3, Excerpt 62)

The following participants are licensed agriculturists or professional in field of agriculture, as they teach students about plants, they also preach the effects of climate

change as it is evident and affecting the plants growth. It includes in planting more trees, how to take care of the plants since it contributes to the lessening of the effects of climate change, not burning some residues, practicing proper garbage disposal, and proper use of agricultural input. As stated by Volk et al. (2023) Plants play a critical role in the global carbon cycle and are key to climate change mitigation and adaptation solutions. Through photosynthesis, plants remove carbon dioxide (CO_2) from the atmosphere and store it as plant biomass. Moreover, stated by Khan et al., (2023) the impacts of ecological stresses on plant growth and the mitigation of these impacts using plant growth promoting rhizobacteria (PGPR). The threats to plants due to the increase in global population and desertification, which further accelerate the negative impacts of climate change on plant growth and food supply. To add up, Choudhary et al.,(2022) said that the impact of climate change on the plant holobiont and developing mitigation strategies for sustainable agriculture. Understanding the effects of climate change on the plant holobiont at the agroecosystem level and implementing holistic mitigation strategies.

Adapt by selecting suitable crops each season and managing water effectively. (T1, Excerpt 63)

When it rains heavily, we need to prevent soil erosion that can damage our crops and nutrients. Is it necessary for us to plant copper crosses. These act as barriers to prevent excessive erosion of our plants. (T2, Excerpt 64)

Usually, we are undergoing process to eliminate trades so water the plants as much as possible so we will use organic fertilizers. (T4, Excerpt 65)

Tree planting is an agricultural practice that can contribute to regulating the temperature of our environment. Plants have the ability to stabilize temperatures, making it beneficial to plant more trees. (T7, Excerpt 66)

Agricultural practices promoting carbon sequestration can combat climate change impacts. (T8, Excerpt 67)

Based on the responses provided, adapting to climate change in agriculture involves selecting suitable crops, managing water effectively, preventing soil erosion, using organic fertilizers, planting trees for temperature regulation, and promoting carbon sequestration. These practices are crucial in mitigating the impacts of climate change on agriculture and ensuring sustainable farming. According to Grigorieva et al. (2023) use of different crops or crop varieties, and plant breeding or development of new crop varieties more suitable to the changing climate—higher temperatures and/or reduced precipitation and hence, water availability. In accordance to Belmin et al. (2023) climate change adaptation options that focus on transforming production systems, providing access to knowledge useful for climate change adaptation in agriculture, and coordinating and financing adaptation actions at territorial or sector scale. Then, stated by McCarthy et al. (2022) farmers are implementing various adaptation measures for agriculture, including the use of drought-resistant crops, shifting rain patterns, and investing in climate adaptation measures to tackle climate change challenges.

In plants, in planting date, there is this required month depends on whether if it is hot or cold but now, climate change changes yearly that there are times sunny season comes first than rainy season or vice versa and that affects the planting dates. (T2,

Excerpt 68)

Plants have their own season, especially those big crops like fruit trees, it is by season, and its date cannot be adjusted. We can still plant them anytime however it is hard for them to bear fruit because it has its exact time to produce. In some cases, perennial trees bear fruit once they reach a certain required height. Depending on its soil nutrition, macronutrients like hydrogen, oxygen, carbon, phosphorus, potassium and so on and so forth. If there is no lack of nutrients in the soil, you can still plant anytime. But when it comes to producing yields, it may take time because it has its fruiting season. (T3, Excerpt 69)

In terms of panting dates, yes because we will be looking forward to the climate. In every crop, they have their own different season, so if suited to the climate maybe is the time to plant the crops. (T4, Excerpt 70)

Agricultural practices can be adapted by adjusting planting dates to accommodate changes caused by climate change. Plants are classified as either short-day or long-day plants based on their daylight requirements for growth. However, climate change has disrupted the planting calendar, leading to shifts in the classification of plants. (T6, Excerpt 71)

To mitigate the effects of climate change, adjusting planting dates is a valuable agricultural practice. It is crucial to determine the appropriate seasons or specific dates for planting specific crops or plants. (T7, Excerpt 72)

Adjusting planting dates can help adapt to changing climates and optimize crop growth. (T8, Excerpt 73)

Based on the responses of our participants, it shows that there is changing planting dates to mitigate the effect of climate change. This means closely observing the climate and determining the best time to plant specific crops based on the suitable climate. By being responsive to the effects of climate change, we can optimize crop growth and ensure agricultural productivity regardless of the climate change. According to Grigorieva et al. (2023) 0ne of agricultural adaptation strategies is adjustments in planting dates such as changes in harvest and sowing dates, e.g., later sowings, sowings to suit rainfall variability, etc. Moreover, Jiang et al. (2021) changing planting dates is considered an effective adaptive strategy to mitigate the negative impacts of climate change on crop yields on a global scale, such as in Northeast China. Modelling adaptation strategies to reduce adverse impacts of climate change through adjusting planting dates can enhance crop resilience and productivity in changing climatic conditions.

Conclusions

The significant challenges that plant face when exposed to extreme heat would be wilting or the withering of plants, while in heavy rain or flood, there would be soil erosion whereas the nutrients of the plants would be washed away. The change in weather or increase in carbon dioxide would affect the plant growth, which leads to decreased yields and plant death.

Moreover, even climate change greatly affects plant growth and its quality, there are other factors contributing to it as well. The presence of pests, stray animals, state of

the soil, as well as humans could contribute to the decrease of plant quality. One sign where a plants' quality is affected is by observing its color. If a plant turns yellowish, it is affected by climate change and is not been taken care of. In order to revive or change its quality to its original, healthy state, proper management should be done. Techniques such as continuous watering of plants, removal of decayed parts, and adding organic fertilizers would revive the plant.

Additionally, the effect of climate change to plant growth and development especially during its fruiting stage is very critical. It could result to a low harvest of fruits and low productivity of plants since it affects how plants grow to their physical state. Changing of climate results to sunlight availability and water scarcity, can disrupt the growth, development, and fruit production of crops. Additionally, the ability of plants to produce flowers can vary, and smoke and ethylene are factors that can induce flowering.

As famers are the ones exposed to the actual plantation, it is challenging to adjust to climate change since it is undetermined. However, by keen observation and adaptation to weather patterns, one should still be responsive and flexible to the needs of the plants regardless climate change. In order to heed to plant needs, observing the plant state should be first in order to know what fertilizers and methods are suitable. Careful management and practices are to be observed and usage of organic fertilizers would effectively combat and prevent the effects of climate change.

It is concluded that planting more trees, plants, proper disposal of garbage, not burning plastics and residues, and proper use of agricultural input would lessen climate change and its effect.

Recommendations

Based on the findings of this qualitative study on climate change and its effect to the growth of plants, the following recommendations are proposed:

1. To the caretakers: Organic Fertilizer. The researchers recommend the usage of organic fertilizer to the caretakers/farmers rather than chemical fertilizers. Although chemical fertilizers make plants look physically healthy, its taste, development, and taste would differ and could be extremely harmful to one's health and the environment. As there are many factors contributing to plant quality reduction like the presence and effects of pests, organic fertilizers work in reviving plants. With organic fertilizers, plants could grow and absorb natural nutrients. It also helps with the lessening of climate change. Additionally, Singh (2012) stated that organic fertilizer, replenishes the soil, naturally, without leaving chemical residue, and gives the plants a healthier and are safer than chemical fertilizer. This would ideally produce good crop yield with minimal impact on ecological factors. To prove this, Verma et al., (2019) stated that to prevent the ill effects of chemicals to the plants and to the environment, organic fertilizers must be utilized for better soil and environmental management and effects.

2. To the caretakers and teachers. Greenhouse. The researches recommend both caretakers and teachers about greenhouse. Teachers may provide an insight and teach students the benefits of greenhouses to the plants development and its positive impact to the environment and caretakers/farmers could have plenty of harvest and could plant non-heat loving plants or fruits. Building a greenhouse protects the plants from external factors like heavy rain, wind, presence of animals or pests, and air contamination. It provides regulation of temperature and humidity inside, enhancing crop quality and yield. According to Slathia et al. (2018) with the use of greenhouse, the protected cultivation of high value crops has become irreplaceable both from economic and environmental points of view. It offers several advantages to grow high value crops with improved quality even under unfavorable and marginal environments and Zhang et al., (2022) states that greenhouses are crucial for sustainable crop production since it prolongs the production season of various crops by providing controlled indoor microclimate conditions.

3. To the caretakers: Mulching Techniques. Mulching, specifically plastic mulch maintains moisture and regulates temperature of the soil and prevents the growth of weeds. By applying mulching, it improves soil health and avoids erosion. El-Beltagi et al. (2022) stated in his study that plastic mulches can significantly improve soil health and pest management. One of the many benefits of mulching the soil surface is that it reduces soil evaporation or erosion brought on by wind or water. Mulching at a depth of 5 cm is the most often advised method for reducing weed development. Additionally, since soil erosion is one of the problems and a challenge for agriculture, Balasubramanian (2017) recommended practices such as mulching.

4. To the teachers: Organic Agriculture. The researchers recommend teachers organic agriculture to implement and teach agricultural students in order for students to be aware of the dangers and effects of using modern technology as a mode of farming. Since organic agriculture; usage of organic fertilizers, planting more crops and trees, using old crops to make fertilizers are ways to reducing climate change. Moreover, Holka et al. (2022) said that organic farming; an absence of mineral fertilizers eliminates greenhouse gases emissions from the application of fertilizers on the field as well as from fertilizer production. One of the solutions in mitigating climate change is agroforestry. This consists in mixing woody plants with arable, leading agricultural production in a sustainable and environmentally friendly manner. Additionally, Samui et al., (2024) stated that organically managed systems can help to mitigate climate change through careful regulation of soil nutrients, resulting in reduced nitrous oxide emissions from soils.

5. To the future researchers: Proper Management. The researchers recommend that the future researchers must first know how to properly manage and use the given agricultural practices in order for the plants to thrive even in extreme weather extremes. In extreme heat, plants need to be constantly watered to ensure a good amount of soil moisture level to prevent the withering of plants, while in rainy season; barriers or cover crops should be made in order for the plants not to be eroded. Stated by Haruna et al. (2020) one way to reduce soil erosion and manage soil and its nutrients for productivity is through cover crops. Cover crops are grown because of the numerous benefits they

provide, including protecting the soil from wind and water erosion. With the cover crops, the soil moisture or the water content would be conserved even in extreme heat. To add up, Verma et al., (2019) states that even though organic fertilizers are recommended, there are still limitations on how to use these applications and proper management should be addressed and evaluated. Moreover, Balasubramanian (2017) states that in order for a successful and long-term plant life, proper management of agricultural practices must be utilized.

Compliance with Ethical Standards

The study prioritized participant confidentiality, ensuring data is used solely for research purposes. The research was conducted in accordance with ethical guidelines and regulations. Key data was accessible only to authorized researchers. The study followed ethical principles in its design, implementation, and analysis. Results were analyzed and disseminated to contribute to scientific knowledge and inform future studies.

Acknowledgements

The authors of this study would like to express their profound gratitude to those who, or are in one way or the others, have enormously contributed to the success of this research exploration.

CONTEXTUALIZED AFRO-ASIAN LITERATURE MODULE AND STUDENTS' COMPREHENSION SKILLS

Babyjean S. Mokalid

Lambayong National High School, Lambayong, Sultan Kudarat, Philippines

https://doi.org/10.5281/zenodo.12074369

ABSTRACT

Lambayong National High School, as the biggest high school in the Municipality of Lambayong looked on matters that would enhance their students' comprehension skills in order to respond to the call of equipping learners with the 21st century skills and become competent enough in facing the most complicated world outside the four corners of the classroom. This paper worked on the use of Contextualized Afro-Asian Literature Module and Students' Comprehension Skills. The study tested the acceptability of the contextualized materials in terms of its content, relevance, usability and instructional quality that was validated as highly acceptable. The researcher used experimental method of research to the 30 grade 8 students of Lambayong National High School and 30 for the control group, which were randomly selected. Findings revealed that students from the control group did not meet the expectations in their pre-test and post-test, while the experimental group's performance did not also meet the expectation in the pre-test but turned very satisfactory after the integration of contextualized Afro-Asian literature module. These results further explained with the use of t-test using 0.05 level of significance, which revealed that there is a significant difference between the mean gain score of control and experimental groups which mean that the experimental group improved the students' comprehension skills after the utilization of contextualized Afro-Asian Literature Module.

Keywords: *Contextualized, Afro-Asian, Literature, Comprehension Skills, Quantitative, Module*

INTRODUCTION

The entire nation offers a challenging environment for developing a language strategy that can benefit the entire country with its distinctive archipelagos and varied local languages in the area. As a result, during the past century, different language strategies have been introduced in the schools for each cohort. Nowadays, students are exposed to a variety of concepts, individuals, and goods; as a result, opinions develop as quickly as societal changes.

Internationally, studies on comprehension ability focus on the different factors that affect the low-comprehension skills of students in English specifically in teaching literature. In the study of Hasibuan, et.al 2019; and Wang et.al 2017 in China they made mentioned that contextualization can help enable the transformation and construction of a larger motivational environment for students but their study focus only on Mathematics. Even the study of Supiyati, et.al 2019, context is directly related to everyday life, where culture and environment assumed to motivate students to recognize mathematics as part of everyday life aim to enhance the student's ability, deepen their understanding of all forms of mathematics, and to make meaningful mathematical connections. However, these studies on contextualization of material in the field of English, they did not provide issues focusing on its impact in uplifting the student's comprehension skills in English.

In the Philippines, almost everyone is literate. This makes comprehension as an unending issue in language literacy. The pinnacle of reading proficiency and the cornerstone of all reading procedures is comprehension. According to some academics, it is the main goal of reading since "one who does not understand what one reads is deemed as if one has not read." It is really important to develop students' comprehension skills since this serves as the pillar of all learnings aspects (Allcott, 2021).

The Department of Education, along with the implementation of the K to 12, anchored all the learning competencies in teaching English to a specified literary piece and this becomes more challenging to the part of educators considering that students' nowadays find it so uninteresting in reading long passages from the textbooks.

Lambayong National High School, as the biggest high school in the Municipality of Lambayong looks on matters that would enhance their students' comprehension skills in order to respond to the call of equipping learners with the 21st century skills and become competent enough in facing the most complicated world outside the four corners of the classroom.

The researcher, as one of those language teachers who had encountered the same dilemma, never stops of discovering a certain approach that would somehow address to this concern, and come with the experimentation of contextualized Afro-Asian Literature module in teaching literary folktales and its benefits on the students' comprehension skills.

Research Questions

Generally, the study focused on Contextualized Instructional Module in Afro-Asian Literature and Students' Comprehension Skills.

Specifically, this determined the following:

1. What is the extent of acceptability of Contextualized Afro-Asian Literature Module in developing students' comprehension skills in terms of:
    a. Content:;
    b. Relevance;
    c. Usability; and
    d. Instructional Quality?
2. What is the level of comprehension skills in Afro-Asian Literature of control group in the pre-test and post-test results?
3. What is the level of comprehension skills of experimental group in their pre-test and post-test results in Literary Folktales?
4. What is the mean gain score of both control and experimental goup?
5. Is there a significant difference on the comprehension skills of control group and experimental group in their pre-test result?
6. Is there a significant difference on the comprehension skills of control group and experimental group in their post-test result?
7. Is there a significant difference on the mean gain score of the comprehension skills of both control group and experimental group ?

METHODOLOGY

This study utilized the experimental method of research. The experimental approach entails changing one variable to see if it affects another variable. This approach uses controlled research techniques and random subject selection to test a hypothesis (Cherry, 2022). It tested the acceptability of Contextualized Afro-Asian Literature Module in terms of content; relevance; usability and instructional quality. This module was used in the experimental group to determine its impact on the students' comprehension skills in Afro-Asian Literature.

Participants of the Study

The participants of this study utilized 60 Grade 8 students of Lambayong National High School, Lambayong, Sultan Kudarat, who were enrolled for the school year 2019-2020. Respondents were chosen since their grade level primarily deals on Afro-Asian Literature in their English subject. A total of 30 grade 8 Emerald students was included in the control group and 30 grade 8 Amethyst students were utilized for the experimental group.

Sampling Technique

The selection of respondents was based on random sampling. The researcher randomly chose two sections from 10 Grade 8 classes in Lambayong National High School that represented the control and experimental groups. The researcher utilized draw lots method wherein she folded 10 paper slips and mark it with the letter C for the Control Group and another paper slip marked with letter E for the Experimental Group. The control group was taught using the traditional way. Traditional way of teaching signifies the use of board, paper and pen in the teaching process and included the whole passage from the book also. Further, the other group utilized Contextualized Afro-Asian Literature Module.

Data Gathering Instrument

The result of the study were gathered using survey questionnaire that assessed the acceptability of contextualized afro-asian literature module in terms of content, relevance, usability, and instructional quality. The survey questionnaire were rated by specialists in language teaching.

A researcher-modified tests anchored in the Learning Materials of Grade 8 issued by the Department of Education was used in the items that measured students' comprehension skills in Literary Folktales focusing on Afro-Asian Literature.

Data Gathering Procedure

The validation of the researcher's developed module was evaluated by Language Teaching experts to assure the acceptability of Contextualized Afro-Asian Literature Module.

After such, a letter was sent to the Schools Division Superintendent seeking permission for the researcher to administer the instrument on "Contextualized Afro-Asian Literature Module and The Students' Comprehension Skills.

Another letter was given to the school principal of Lambayong National High school asking permission to use the school as the venue of the study specifically, at the same time sought permit to utilize the Grade 8 students as participants for the study conducted.

The administration of the questionnaire was done personally by the researcher so that proper responses was elicited. The retrieval of the questionnaire was done right after the respondents answered the questionnaire. The data was then consolidated and interpreted.

Data Analysis

The frequency count, percentage, mean, and t-test were used to assess the data the researcher collected. The acceptability of Contextualized Afro-Asian Literature

Module in terms of content, relevance, usability, and instructional quality was described using frequency counts, percentages, and means.

Frequency count, mean and percentage was as well utilized in interpreting data that answered SOP 2, 3, and 4. The t-test was used to analyze the significant difference between the control group and experimental group on their comprehension skills in Afro-Asian Literary Folktales as well as their mean gain score that corresponded SOP 5, 6, and 7.

Scope and Limitations

The study was conducted at Lambayong National High School, focusing on enhancing the comprehension skills of Grade 8 students through the use of a contextualized Afro-Asian Literature module. The research scope included testing the acceptability of the module in terms of content, relevance, usability, and instructional quality, using an experimental method with a sample size of 60 students, divided equally into an experimental group and a control group. Despite the significant improvement observed in the experimental group, the study was limited by its relatively small sample size and the specific demographic and educational context of Lambayong National High School, which may affect the generalizability of the findings. Additionally, the study was constrained to a single grade level and did not account for long-term retention of comprehension skills or potential differences in individual student backgrounds and learning styles.

RESULTS and DISCUSSION

Table 1
Acceptability of Contextualized Afro-Asian Literature Module in the Students' Comprehension Skills

Indicators	Mean	Interpretation
Content	4.10	Highly Acceptable
Relevance	4.15	Highly Acceptable
Usability	4.25	Very Highly Acceptable
Instructional Quality	4.25	Very Highly Acceptable
Over-all Mean	**4.19**	**Highly Acceptable**

Table 1 shows the acceptability of contextualized Afro-Asian Literature Module among Grade 8 students of Lambayong National High School. It portrays that the highest was garnered by usability and instructional quality with a section mean of 4.25 respectively and described as very highly acceptable. It was followed by relevance obtaining a section mean of relevance and content got the lowest mean of 4.10 in which all the indicators were described as highly acceptable. It further elaborated that an over-

all mean of 4.19 signifies that contextualized Afro-Asian Literature Module is highly acceptable, wherein 80-89 % of the contextualized material followed the set standards in making instructional material.

This was contradicted by the results in the study of İlter (2017) which showed that the majority of teachers in their context, use lower-level strategies and practices when teaching contexts in their classrooms. In the context of their instruction for students to develop their learning skills, these teachers were not found to be using tactics that support the generally recognized knowledge and concepts about context teaching.

Table 2
Comprehension Skills of Control Group in their Pre-Test and Post-Test Results

		Pre Test			Post Test		
Group	**n**	**Mean**	**TR**	**Description**	**Mean**	**TR**	**Description**
Control	30	21.6	61	DNME	165.47	73	DNME

Legend:

DNME - Did Not Meet Expectations
TR – Transmuted Rating

Results above signifies the pretest and posttest scores of the control group of this study. It implies that the control group obtains the mean score of 21.6 with a transmuted rating of 61 which implies that the comprehension skills of the group in the pretest did not meet expectation. On the other hand, the group's posttest mean score still did not meet expectation gaining a mean score of 165.47 transmuted into 72. This further explains that the comprehension skills of the control group using the usual delivery of teaching in a classroom did not bid remarkable difference on their comprehension skills.

As a support to this result, McLaughlin (2002), mentioned that it is vital to split the concepts and explain tactics as more complex than various, individual talents or procedures in order to distinguish proficient readers. The justification is that employing certain skills is not as necessary as employing strategies, which necessitates the reader's usage of extra ways or tactics. Learners that encounter complex context can become more confused, which can result in less successful outcomes.

Table 3
Comprehension Skills of Experimental Group in their Pre-Test and Post-Test Results

Group	n	Pre Test Mean	Pre Test TR	Pre Test Description	Post Test Mean	Post Test TR	Post Test Description
Experimental	30	20.93	61	DNME	237.47	86	VS

Legend:

DNME - Did Not Meet Expectations
TR – Transmuted Rating
VS – Very Satisfactory

The table above presents the result on the comprehension skills of the experimental group. This portrays that the pretest mean score of the group is 20.93 transmuted into 61 which means that the result did not meet expectations. In addition, the group's posttest mean score is 237.47 with transmuted rating of 86 which was described as very satisfactory. This could be further interpreted that after the integration of contextualized Afro-Asian Literature Module among the grade 8 students, their comprehension skills increase further.

This was supported by Roe (2014) wherein he stated that reading and learning is highly intertwined, and consciousness in the learning process, knowledge about learning strategies, and abilities to use the strategies adequately are considered vitalTherefore, being able to separate students who have a strong chance of becoming high proficiency readers from those who are more likely to struggle with reading comprehension may be useful for teachers.

Table 4

Mean Gain Score of Control and Experimental Group

	Pre Test	Post Test	Mean Gain Score	TR	Description
Control	21.6	165.47	143.87	71	DNME
Experimental	20.93	237.47	216.54	82	S

Legend:

DNME - Did Not Meet Expectations
TR – Transmuted Rating
S – Satisfactory

Table 4 indicates the mean gain score among the participants of the study in both the control and experimental groups. It also elaborates that the mean gain score of the control group is 143.87 transmuted into 71 and its gain did not meet expectation. Furthermore, result implies that the mean gain score of the experimental group is 216.54 with a transmuted rating of 82 that symbolizes a satisfactory gain.

The above result is also congruent to the study of Ngag (2023), that the use of contextualized module manifested noticeable progress on students' learning in literature; therefore, it should be adopted by the schools, especially Indigenous Peoples (IPs) schools with IP members and be integrated into their classroom program.

Analysis on the Comprehension Skills of Control and Experimental Groups

One facet of linguistic proficiency that the learner must achieve is comprehension. Every topic calls for reading comprehension since reading is an integral part of every instruction. Students must thus possess strong comprehension skills.

Table 5
Results of T-Test Analysis on The Comparison of Pretest Scores Between Control Group and Experimental Group

Group	**n**	**Mean**	**df**	t-comp	t-tab	**Interpretation**
Control	30	21.6	58	0.22	2.001	Not Significant
Experimental	30	20.93				

α=0.05 level of significance

Results in this table elaborate the t-test analysis on the comparison of the pretest scores between the control and experimental groups. Data was tested using t-test at 0.05 level of significance and 58 degrees of freedom. It shows that the t-computed value is 0.22 and t-tabulated value is 2.001 Since the t-computed value is lesser than the t-tabulated data this could be interpreted as not significant and the first null hypothesis is accepted. These further states that the pretest scores of the two group is comparable. Therefore, this table implies that there is no significant difference between the pretest result of the control and experimental groups.

Table 6
Results of T-Test Analysis on the Comparison of Posttest Scores Between Control Group and Experimental Group

Group	n	Mean	df	t-comp	t-tab	Interpretation
Control	30	165.47	58	18.61	2.001	Significant
Experimental	30	237.47				

α=0.05 level of significance

Result portrays the comparison between the posttest result of control group and experimental group. Table presents data that were tested through t-test using 0.05 level of significance. It reveals that the t-computed value of 18.61 is greater that the t-tabulated value of 2.001, this only means that the second null hypothesis is rejected. Therefore, result indicates that there is a significant difference between the posttest scores of both control group and experimental group.

The findings corroborated Brown's (2007) claim that there are still several issues with reading comprehension acquisition. Students are occasionally just needed to read the material aloud before responding to questions about its subject matter. It is a method that excludes pupils' ability to think, preventing them from engaging in an active reading process.

Table 7
Results of T-Test Analysis on the Comparison of Mean Gain Scores Between Control Group and Experimental Group

Group	n	Mean	df	t-comp	t-tab	Interpretation
Control	30	143.87	58	15.63	2.001	Significant
Experimental	30	216.53				

α=0.05 level of significance

Table 7 consists result on the comparison of the mean gain score between the two participating groups. This was analyzed through t-test with 0.05 level of significance. It shows that the t-computed value is 15.63 and the t-tabulated value is 2.001 at 58 degrees of freedom. This further reveal that since the t-computed value obtained a higher result than the t-tabulated data this signifies to reject the third null hypothesis. Finally, it can be said that after the integration of the contextualized afro-asian literature module in the literary folktales of Grade 8 that there is a significant difference between the mean gain scores of controls and experimental groups. Therefore, contextualized Afro-Asian Literature Module improves the comprehension skills of the students.

Conclusions

In the light of the findings derived from this study, the following conclusions were deemed:

1. The contextualized Afro-Asian Literature Module is highly acceptable in terms of content, relevance, usability and instructional quality in teaching literary folktales. Thus, the integration of contextualized Afro-Asian Literature Module improved the comprehension skills of the experimental group.
2. Results further reveals that there is no significant difference between the pretest results of both groups, while their posttest results had a significant difference. Results further revealed that there is a significant difference between the mean gain score of control group and experimental group.
3. Contextualized Module played a vital role in uplifting the comprehension skills of the students in Afro-Asian Literature, therefore, it is rewarding to say that the integration of Contextualized Instructional Module is highly acceptable in teaching Literary Folktales among Grade 8 students of Lambayong National High School and further improved the comprehension skills of the students.

Recommendations

The following are the recommendations of the study based on the findings:

1. Language teachers may uplift the acceptability of contextualized Afro-Asian Literature Module through improving its content that provides opportunities for reflection and planning and include contents that are realistic and logical.
2. Department Head in English of Lambayong National High School may include in the conduct of LAC sessions the discussion in improving further the utilization of contextualized materials in language teaching to further elicit comprehension among students.
3. School administrators as well as language supervisors may consider the contextualized instruction in the teaching learning process for them to help in designing lessons that were contextualized to strengthen the comprehension skills of the students.
4. Using of Contextualized Afro-Asian Literature Module improved the students' comprehension skills. It is suggested for other researchers to use contextualized material as one the references in teaching reading.

Compliance with Ethical Standards

The study adhered to strict ethical standards to ensure the protection and well-being of all participants involved. Prior to the commencement of the study, approval was obtained from the relevant educational authorities at Lambayong National High School, ensuring that the research was conducted in accordance with institutional guidelines.

Informed consent was obtained from the parents or guardians of the Grade 8 students, clearly explaining the purpose, procedures, potential risks, and benefits of the study. Participation was entirely voluntary, and students were assured that their grades or standing in school would not be affected by their decision to participate or withdraw from the study at any time.

Confidentiality was rigorously maintained throughout the research process. All data collected were anonymized, and individual responses were kept confidential, accessible only to the researcher. The experimental and control groups were treated with equal respect and consideration, ensuring that no undue pressure or coercion was applied. Additionally, the study was designed to minimize any potential harm or discomfort to the students, with the content of the contextualized Afro-Asian Literature module being appropriate and sensitive to the cultural and developmental levels of the participants.

The findings of the study were reported honestly and accurately, with no fabrication, falsification, or inappropriate data manipulation. Any potential conflicts of interest were disclosed, and the study's limitations were acknowledged transparently. By adhering to these ethical principles, the study ensured the integrity of the research process and the welfare of the student participants.

Acknowledgments

In every journey, success is a collective effort, and the researcher wishes to acknowledge those who significantly aided in this study.

Special thanks go to Samson L. Molao, EdD, university president, and Mildred F. Accad, PhD, graduate school dean, for their support and guidance. Profound gratitude is extended to adviser Prof. Eva C. Polo, MAT, and committee members Cristobal C. Ambayon, PhD, Prof. Marjorie P. Lumogdang, Adrian Protacio, PhD, statistician Dr. Reynaldo Dalayap, Jr., and critic reader Amira Mae C. Gumanoy, PhD, for their expertise.

Thanks to validation experts Josephine L. Kabugatan, MT-II, Annabelle G. Baldonado, MT-II, and Instructor Jaime Boy Ngag Jr. Gratitude is also given to Dr. Raphael C. Fontanilla, CESO V, and Haron M. Kabugatan, for permitting the study, as well as the Grade 8 students of Lambayong National High School for their participation.

The researcher extends heartfelt thanks to friends Bai Laga S. Bantilan and Mojamel K. Pasandalan, her mother Pariha K. Sabal, her late father, her husband Datu Sherhan B. Mokalid, her children, and her siblings for their inspiration and support.

Above all, thanks to Allah (s.w.t) for the strength, wisdom, and confidence throughout this journey.

COPING STRATEGIES OF WORKING STUDENTS IN BS MARINE TRANSPORTATION AT SOUTHERN LUZON COLLEGE, DASMARIÑAS CITY, CAVITE

Allan C. Alcantara [1], Manuel R. Rosos [1], Marlon D. Andrada [2]

[1] College of Maritime, Southern Luzon College, Dasmariñas City, Cavite, Philippines
[2] College of Business Administration and Accountancy, AMA University, Quezon City, Philippines

https://doi.org/10.5281/zenodo.11630608

ABSTRACT

This study aimed to identify the coping strategies used by working students in the BS Marine Transportation program at Southern Luzon College in Dasmariñas City, Cavite. A survey was conducted with 50 working students to assess their use of various coping strategies. The results showed that the most commonly used strategies were time management, seeking social support, and prioritizing tasks. Differences in coping strategies were found based on gender and year level, with females reporting higher use of seeking social support and third-year students using time management more frequently than first-year students. The findings provide valuable insights into how working students in this demanding program manage the competing demands of work and school. Understanding these coping strategies is crucial for developing support systems and resources to help working students succeed academically and personally. The study highlights the resilience and adaptability of working students in the face of significant challenges.

Keywords: *coping strategies, time management, social support, support system*

INTRODUCTION

Working students face unique challenges in balancing the demands of employment and academic responsibilities (Betts, Ferrall, & Finnie, 2009). This is especially true for

students in demanding programs like BS Marine Transportation, which requires significant time and effort. Understanding how these students cope with stress and manage their multiple roles is important for supporting their success (O'Neill, Yoder, & Batt, 2019). Research has shown that working students often use various coping strategies to manage their stress and workload. For example, time management is a common strategy used by working students to balance their work and academic responsibilities (Bangquiao et al, 2023). Seeking social support from friends, family, or peers is another strategy that can help working students cope with stress.

Prioritizing tasks and setting goals can also be effective in managing the demands of work and school (Sajeevanie, 2023). Additionally, engaging in stress-reducing activities such as exercise or meditation can help working students manage their stress levels. Furthermore, studies have highlighted the importance of self-efficacy in coping with stress and achieving academic success. For instance, Gustafson (2015) found that students who believed in their ability to manage their time effectively were more likely to achieve good grades. Similarly, Bandura (1997) emphasized the role of self-efficacy in regulating behavior and achieving goals. Moreover, research has also shown that stress can have negative impacts on academic performance (Akanpaadgi et al, 2023). For instance, Choi et al. (2006) found that students who experienced higher levels of stress were more likely to report poor academic performance. Similarly, Amorte et al. (2013) found that stress was a significant predictor of academic performance among marine engineering students. Therefore, understanding how working students in the BS Marine Transportation program at Southern Luzon College cope with stress and manage their multiple roles is crucial for supporting their success.

Research Questions

The aim of the study is to seek answers on coping strategies of working students in the BS Marine Transportation program at Southern Luzon College. Specifically, the study tries to answer the following research questions:

1. How do working students in the BS Marine Transportation program at Southern Luzon College cope with the demands of balancing work and academic responsibilities?
2. What are the most commonly used coping strategies among working students in the BS Marine Transportation program?
3. Are there differences in coping strategies based on gender among working students in the BS Marine Transportation program?
4. How do coping strategies vary among different year levels of working students in the BS Marine Transportation program?
5. What role does social support play in the coping mechanisms of working students in the BS Marine Transportation program?
6. How do working students prioritize tasks to manage their workload effectively in the BS Marine Transportation program?
7. To what extent do stress-reducing activities contribute to the well-being of working students in the BS Marine Transportation program?

8. What are the challenges faced by working students in the BS Marine Transportation program, and how do they adapt their coping strategies to overcome these challenges?
9. How do self-efficacy beliefs influence the coping strategies of working students in the BS Marine Transportation program?
10. What recommendations can be made to support the coping strategies and well-being of working students in the BS Marine Transportation program at Southern Luzon College?

METHODOLOGY

Participants

A total of 50 working students enrolled in the BS Marine Transportation program at Southern Luzon College participated in the study. The sample included 46 males and 4 females, with 20 first-year students, 15 second-year students, and 15 third-year students.

Measures

A survey was developed to assess the coping strategies used by the participants. The survey included 20 items representing different coping strategies, such as time management, seeking social support, prioritizing tasks, and engaging in stress-reducing activities. Participants rated how frequently they used each strategy on a 5-point scale (1 = never, 5 = always).

Procedure

The survey was administered during class time with the permission of the instructors. Participants were informed of the purpose of the study and assured of the confidentiality of their responses. The completed surveys were collected and scored by the researchers.

RESULTS

Table 1: Analysis of Demographic Variables and Stress Management Strategies Among Students

Demographic Variable	Mean Score (M)	Standard Deviation (SD)	Frequency
Gender	3.8	0.9	50
Year Level	4.1	0.8	50
Time Management	4.2	0.8	50
Seeking Social Support	3.9	1.0	50
Prioritizing Tasks	3.7	0.9	50
Stress-Reducing Activities	2.5	1.2	50
Seeking Professional Help	2.1	1.0	50

Table 1: presents the results of a study examining the demographic variables and stress management strategies among students. The variables included are gender, year level, time management, seeking social support, prioritizing tasks, stress-reducing activities, and seeking professional help. The table provides the mean score (M), standard deviation (SD), and frequency for each variable.

Demographic Variables

1. **Gender**: The mean score for gender is 3.8, indicating that students generally report a moderate level of satisfaction with their gender. The standard deviation of 0.9 suggests that there is some variation in the responses, but the majority of students are clustered around the mean. The frequency is 50, indicating that all students provided responses for this variable.

   Independent samples t-tests were conducted to examine gender differences in coping strategies. Females reported using seeking social support more frequently than males ($t(48) = 2.34$, $p < .05$). No other significant gender differences were found.

2. **Year Level**: The mean score for year level is 4.1, indicating that students generally report a high level of satisfaction with their year level. The standard deviation of 0.8 suggests that there is some variation in the responses, but the majority of students are clustered around the mean. The frequency is 50, indicating that all students provided responses for this variable.

   One-way ANOVA tests were conducted to examine differences in coping strategies based on year level. Third-year students reported using time management more frequently than first-year students ($F(2, 47) = 4.56$, $p < .05$). No other significant year level differences were found.

3. **Descriptive Statistics**: The most frequently used coping strategies were time management ($M = 4.2$, $SD = 0.8$), seeking social support ($M = 3.9$, $SD = 1.0$), and prioritizing tasks ($M = 3.7$, $SD = 0.9$). The least frequently used strategies were engaging in stress-reducing activities ($M = 2.5$, $SD = 1.2$) and seeking professional help ($M = 2.1$, $SD = 1.0$).

Stress Management Strategies

1. **Time Management**: The mean score for time management is 4.2, indicating that students generally report a high level of satisfaction with their time management skills. The standard deviation of 0.8 suggests that there is some variation in the responses, but the majority of students are clustered around the mean. The frequency is 50, indicating that all students provided responses for this variable.

2. **Seeking Social Support**: The mean score for seeking social support is 3.9, indicating that students generally report a moderate level of satisfaction with seeking social support. The standard deviation of 1.0 suggests that there is some variation in the responses, but the majority of students are clustered around the mean. The frequency is 50, indicating that all students provided responses for this variable.

3. **Prioritizing Tasks**: The mean score for prioritizing tasks is 3.7, indicating that students generally report a moderate level of satisfaction with prioritizing tasks. The standard deviation of 0.9 suggests that there is some variation in the responses, but the majority of students are clustered around the mean. The frequency is 50, indicating that all students provided responses for this variable.

4. **Stress-Reducing Activities**: The mean score for stress-reducing activities is 2.5, indicating that students generally report a low level of satisfaction with stress-reducing activities. The standard deviation of 1.2 suggests that there is significant variation in the responses, with some students reporting higher satisfaction and

others reporting lower satisfaction. The frequency is 50, indicating that all students provided responses for this variable.

5. **Seeking Professional Help**: The mean score for seeking professional help is 2.1, indicating that students generally report a low level of satisfaction with seeking professional help. The standard deviation of 1.0 suggests that there is some variation in the responses, but the majority of students are clustered around the mean. The frequency is 50, indicating that all students provided responses for this variable.

Overall, the results suggest that students generally report moderate to high levels of satisfaction with their gender, year level, time management, and seeking social support. However, they report lower levels of satisfaction with stress-reducing activities and seeking professional help. These findings can inform strategies for improving student well-being and stress management.

Table 2: Analysis of Coping Strategies Among Students: Key Findings and Recommendations

Coping Strategy	Mean Score (M)	Standard Deviation (SD)	Key Findings
Time Management	4.2	0.8	Most frequently used strategy, significant difference in usage between year levels
Seeking Social Support	3.9	1.0	Commonly used strategy, higher usage among females
Prioritizing Tasks	3.7	0.9	Important strategy, no significant gender differences
Stress-Reducing Activities	2.5	1.2	Least frequently used strategy, potential area for intervention

Coping Strategy	Mean Score (M)	Standard Deviation (SD)	Key Findings
Seeking Professional Help	2.1	1.0	Low usage, indicates potential need for increased awareness of available support resources

Table 2: presents the results of a study examining the coping strategies used by students to manage stress and anxiety. The strategies included are time management, seeking social support, prioritizing tasks, stress-reducing activities, and seeking professional help. The table provides the mean score (M), standard deviation (SD), and key findings for each strategy.

Key Findings

1. **Time Management**: The mean score for time management is 4.2, indicating that it is the most frequently used coping strategy among students. The standard deviation of 0.8 suggests that there is some variation in the usage of this strategy, but the majority of students use it. The key finding is that there is a significant difference in the usage of time management between year levels, suggesting that younger students may need more support in developing this skill.

2. **Seeking Social Support**: The mean score for seeking social support is 3.9, indicating that it is a commonly used strategy. The standard deviation of 1.0 suggests that there is some variation in the usage of this strategy, but the majority of students use it. The key finding is that females use this strategy more frequently than males, suggesting that social support networks may be more important for female students.

3. **Prioritizing Tasks**: The mean score for prioritizing tasks is 3.7, indicating that it is an important strategy. The standard deviation of 0.9 suggests that there is some variation in the usage of this strategy, but the majority of students use it. The key finding is that there are no significant gender differences in the usage of this strategy, suggesting that both males and females use it equally.

4. **Stress-Reducing Activities**: The mean score for stress-reducing activities is 2.5, indicating that it is the least frequently used strategy. The standard deviation of 1.2 suggests that there is significant variation in the usage of this strategy, with some students using it more frequently than others. The key finding is that this strategy has potential as an area for intervention, as students may benefit from learning more effective stress-reducing techniques.

5. **Seeking Professional Help**: The mean score for seeking professional help is 2.1, indicating that it is the least used strategy. The standard deviation of 1.0 suggests that there is some variation in the usage of this strategy, but the majority of students do not use it. The key finding is that there is a potential need for increased awareness of available support resources, as students may not be aware of the resources available to them or may not feel comfortable using them.

Based on these findings, the following recommendations can be made:

1. **Develop Time Management Skills**: Younger students may need more support in developing time management skills, which are critical for managing stress and anxiety. Interventions such as workshops or online resources can help students develop effective time management strategies.

2. **Foster Social Support Networks**: Female students may benefit from social support networks, which can provide emotional support and help them cope with stress and anxiety. Interventions such as group counseling or peer support programs can help foster these networks.

3. **Prioritize Task Management**: Both males and females use prioritizing tasks as an important strategy, suggesting that it is a valuable skill for managing stress and anxiety. Interventions such as task management workshops or online resources can help students develop effective prioritization strategies.

4. **Intervene on Stress-Reducing Activities**: The low usage of stress-reducing activities suggests that students may benefit from learning more effective stress-reducing techniques. Interventions such as mindfulness or relaxation workshops can help students develop healthy coping strategies.

5. **Increase Awareness of Support Resources**: The low usage of seeking professional help suggests that students may not be aware of the resources available to them or may not feel comfortable using them. Interventions such as outreach programs or online resources can help increase awareness of support resources and encourage students to seek help when needed.

DISCUSSION

The findings of this study provide insights into the coping strategies used by working students in the BS Marine Transportation program at Southern Luzon College. The most frequently used strategies were time management, seeking social support, and prioritizing tasks, which aligns with previous research on coping strategies among working students. Gender differences were found in the use of seeking social support, with females reporting higher use of this strategy than males. This is consistent with research showing

that women are more likely to seek emotional support in response to stress. Year level differences were found in the use of time management, with third-year students reporting higher use of this strategy than first-year students. This may reflect the increased demands and experience of upper-level students in managing their time effectively. The findings have implications for supporting working students in this program. Providing resources and training on time management and prioritizing tasks may be particularly helpful. Encouraging students to seek social support and engage in stress-reducing activities could also promote their well-being and success. Future research should explore the effectiveness of different coping strategies in predicting academic performance and retention among working students in this program.

Conclusions

This study provides important insights into the coping strategies used by working students in the BS Marine Transportation program at Southern Luzon College. The findings highlight the resilience and adaptability of these students as they navigate the challenges of balancing work and academic responsibilities. The most commonly used strategies of time management, seeking social support, and prioritizing tasks align with previous research on effective coping mechanisms for working students. The differences found in coping strategies based on gender and year level underscore the importance of tailoring support to the unique needs of individual students. Providing resources and training on time management and prioritizing tasks may be particularly beneficial for first-year students, while encouraging all students to seek social support and engage in stress-reducing activities could promote their overall well-being and success. Future research should explore the effectiveness of different coping strategies in predicting academic performance and retention among working students in this program. Longitudinal studies could also shed light on how coping strategies evolve over the course of a student's academic career and how institutions can best support students at different stages. In conclusion, this study highlights the critical role that coping strategies play in the success of working students in demanding programs like BS Marine Transportation. By understanding and supporting these strategies, institutions can help working students thrive academically and personally, ultimately contributing to their long-term success in their chosen careers.

Recommendations

Based on the findings of this study, the following recommendations are made:

1. Provide training and resources on time management and prioritizing tasks to help working students effectively manage their workload and academic responsibilities.

2. Encourage working students to seek social support from friends, family, or peers to help them cope with stress and manage their multiple roles.

3. Offer stress-reducing activities such as exercise or meditation to help working students manage their stress levels and improve their overall well-being.

4. Provide support and resources to help working students develop self-efficacy and confidence in their ability to manage their time effectively and achieve academic success.

Compliance with Ethical Standards

This study, titled "Coping Strategies of Working Students in BS Marine Transportation at Southern Luzon College, Dasmariñas City, Cavite" was conducted in accordance with the ethical guidelines of Southern Luzon College. Informed consent was obtained from all participants, ensuring their understanding of the study's purpose and their right to withdraw at any time. Participant confidentiality was strictly maintained, with data anonymized and securely stored. The authors declare no conflicts of interest and received no specific funding for this research. All procedures complied with relevant laws and ethical standards.

Acknowledgments

The authors would like to acknowledge the support of the Southern Luzon College Dasmariñas City, Cavite for their approval and guidance throughout the study. We also appreciate the participation of the working students who took part in the survey from Southern Luzon College of Business, Maritime, Science and Technology, located at Burol Main, Dasmariñas City, Cavite.

We would like to give thanks to Ms. Jesusa B. Alberto, SLC Area Manager, for granting the necessary permission to conduct this study in the campus;

To their spouses, families and friends for their unwavering support to finish this study;

And above all, to the Almighty God for giving them courage and wisdom to succeed in this endeavor.

CULTIVATING RESILIENCE: THE COPING STRATEGIES OF TEACHERS IN HANDLING MULTI-GRADE CLASSES

Mary Jean M. Jabiñar[1] Michelle L. Mustacisa[2]

ABSTRACT

Multi-grade teaching is a strategy to expand access to education, particularly in remote areas. However, it presents challenges for teachers. This study explored the coping mechanisms employed by teachers handling multi-grade classes. Additionally, descriptive-correlation design was used. The study described teacher profiles (age, sex, education, etc.) and their attitudes towards multi-grade classes. It then investigated correlations between these profiles, the challenges encountered, and the coping mechanisms used. The findings revealed that teachers with higher educational attainment, relevant training, and positive attitudes towards multi-grade classes employed more effective coping mechanisms. The grade level taught was the only significant profile variable related to challenges faced. Also, a moderate, statistically significant correlation emerged between coping mechanisms and the challenges encountered. This suggests that teachers utilize their coping strategies based on the specific challenges they face in their multi-grade classrooms. In conclusion, teacher profiles, particularly educational attainment, training, and attitude, influence coping mechanisms in multi-grade settings. The challenges encountered also play a role, with teachers adapting their strategies accordingly.

INTRODUCTION

Nowadays, people's access to education is highly prioritized, as it is considered a right for every citizen. With that, learning opportunities become more available for students who were unable to grasp learning before. Also, through the Education for All (EFA) program, all students are entitled to learning that respects diversity.

According to Opertti and Zhang (2014), inclusive education supports high-quality and equitable education for all. With that, compulsory education is emphasized, which aims to give all citizens a fair start in life and equal opportunities as adults (Joyce, 2014). However, many countries in the Asia–Pacific region have millions of people living in scattered, thinly populated highlands, mountainous regions, and on small islands, which makes it difficult to provide high-quality education, particularly a high-quality primary education (Buaraphan, et al. 2018).

Therefore, Joyce (2014) highlighted the fact that multi-grade education is understood to be a practical option for expanding access to basic education for disadvantaged children, especially those living in rural areas. As emphasized by Taole (2014), multi-grade teaching schools is an important policy option for providing access to education for learners in remote areas. Thus, as a result of global focus on equality of education for students, especially in remote and thinly populated areas, multigrade teaching is predominant and is increasing (Shareefa, 2021).

Moreover, Kalender and Erdem (2021) emphasized that there are many reasons that make Multigrade Classroom Implementation (MCI) compulsory. Some of the most common reasons worldwide are dispersed settlement, social and economic conditions, difficulty in transportation and geographical features. While according to Dogan, et al. (2020), the common reasons for having multigrade classes are insufficient number of students, geographic or economic status and insufficient number of teachers for each grade.

In the Philippines, following Republic Act 9155, or the Governance of Basic Education Act of 2001, education has been made free and compulsory for all Filipino children (Msimanga, 2019). Thus, the Department of Education (DepEd) mandates the establishment of complete elementary schools in every barangay forming multigrade classes in some remote barangays (Naparan & Alinsug, 2021).

Additionally, Ramrathan and Mzimela (2016) highlighted that the concept multi-grade teaching is described in different ways such as multi-groups or multi-class or combination group teaching. Aside from that, according to Taole (2022), other terminologies of multi-grade teaching are multi-age, multi-stage, mixed grade, mixed classes, multi classes. Engin (2018) underlined that multigrade teaching is a practice in which students from different age, skill and class level continue their education and training together in the same class.

Furthermore, multigrade classrooms play effective roles because it enables the children living in rural and distant places to access education as a right since the most important reason for the presence of multigrade classroom is the scarcity of the students in rural areas (Karaçoban & Karakuş, 2022). With that, according to Khazaei et al. (2016), the main reason for organizing multi-grade classrooms is that the number of students of one grade is less than the minimum number of students determined for formally holding a classroom.

According to Çakir and Firat (2022), the advantages of multigrade classrooms are: students in multi grade classrooms are able to develop important skills such as study skills, self-learning, managing their own studies and conducting research, offer individual development chances to students on subjects they are interested in and talented in, offer students a chance of individual development in the subjects they are interested in and receive education in line with their individual differences, students in higher grades are also able to review their previous knowledge while coaching students in lower grades, and students are able to develop their socialization skills and emotional skills better.

Correspondingly, according to Taole (2020), diversity is also a factor to consider in teaching contexts at multigrade classes. In a multigrade classroom, learners have very different learning needs because of the range of ages and backgrounds in the class. Thus, teachers need to know how to differentiate student learning activities to cater for this range of needs (Bannister-Tyrrell & Pringle, 2021). In that manner, multigrade teaching can be seen as challenging because of the requirement to differentiate class material and activities to cater for children of different ages and stages (Quail & Smyth, 2014). Aside from this challenge of differentiation, in Africa, Turkey and Netherlands, multigrade teachers experience challenges such as transportation, illiteracy of parents, poor economic backgrounds, excessive effort of the teacher, lack of time, language problems and teacher challenges in the actual teaching and learning process.

In addition, in the study entitled “Instructional leadership in multi-grade classrooms: What can mono-grade teachers learn from their resilience?”, the findings show that teachers were faced with challenges including lack of proper training, insufficient support from stakeholders, not any workshops organized for multi-grade teachers and lack of resources at school (Ramrathan & Ngubane, 2013). Consequently, Engin (2018) revealed that the difficulties encountered by classroom teachers in multigrade teaching are excessive effort of the teacher, high expectations from the student, lack of time, difficulty in reaching the aims, non-teaching roles, not being supported, lack of education, physical conditions, and language problems.

Also, curricula across the globe are not structured for multi-grade teaching. Thus, drawing from the accounts of multi-grade teaching, especially in rural contexts, teachers teaching in these situations have to rely on their teacher agency to make decisions on teaching strategies, lesson context, lesson activities and teaching and learning resources to make some impact on learning (Ramrathan & Mzimela, 2016).

Therefore, the applications of multi-grade classes have certain limits such as lack

of application, sourcing, learning and teaching materials in the schools, few support of parents, negative perspective of education, the negative influence of limited village life on the professionality and social life of teachers. Correspondingly, classroom management, appropriate methods, finding techniques and creating learning spheres are difficulties that appear in multigrade classes (Çiftçi & Baykan, 2013). With that, it can be settled that teachers are faced with multiple challenges for teaching in multi-grade classrooms (Ramrathan & Ngubane, 2013).

As according to Çakir and Firat (2022), the disadvantages of multi grade classrooms are: class preparations are very time-consuming and not all teachers are equipped with the necessary skills and experience to teach in multi grade classrooms. Phajane (2014) emphasized that many teachers lack the knowledge and skills to manage multi-grade classes effectively as they have been trained for single-grade teaching.

Hence, as highlighted by Taole (2014), achieving excellence in teaching and learning in rural contexts, with the application of multigrade classes, remains a challenge for teachers and other sectors of the educational change endeavors. Nevertheless, Naparan and Alinsug (2021) highlighted that despite those limitations and challenges experienced by both teachers and pupils in multigrade school, students strived hard and tried their best to be meaningful and productive, and teachers employ several techniques and strategies to enhance the learners' abilities and skills. According to Naparan and Castaneda (2021), there are coping strategies or mechanisms employed by teachers in handling multi-grade classes such as strengthening one's faith through prayer, using the internet's power and the wealth of information, keeping to a schedule when performing duties and responsibilities, and renewing one's mind through the process of self-conditioning.

Furthermore, in the Philippines, there are 8,379 multigrade schools out of the 38,911 public schools (CNU, 2019). This number can be reasoned out with the data from the Philippine Statistics Authority, which states that the rural population, or those who lived in barangays classified as rural in 2020, comprised 50.10 million persons, or 46.0 percent of the total population in the country.

However, in the rural and remote areas of the Philippines, lack of training and insufficient resources and findings continue to be a teachers' problems in elementary schools (Naparan & Alinsug, 2021).

Moreover, aside from the lack of training for multigrade teachers, Naparan and Alinsug (2021) emphasized that teachers also complain of a lack of sufficient time for handling and managing multi-grade classes and recording the outputs of the learners for the multiple grade levels handled.

Thus, with all the data presented above, the researcher was encouraged to conduct this study. This study primarily aimed to determine the coping strategies employed by teachers in handling multi-grade classes. This study was conducted in rural elementary schools in a province in Eastern Visayas, Philippines.

Research Questions

This study aimed to determine the coping strategies employed by teachers handling multi-grade classes. Specifically, it sought answers to the following questions:

1. What is the profile of the teacher-respondents in terms of the following personal variates:
1.1 age and sex;
1.2 civil status;
1.3 highest educational attainment;
1.4 years of teaching in multi-grade class;
1.5 grade levels taught;
1.6 number of learners per grade level;
1.7 relevant in-service trainings;
1.8 attitude toward multi-grade classes?

2. What are the coping strategies employed by the teacher-respondents in handling multi-grade classes in terms of:
2.1 Curriculum Management and Organization;
2.2 Classroom Management Strategies;
2.3 Methodological aspects;
2.4 Material resources;
2.5 Time management?

3. Is there a significant relationship between the coping strategies employed by the teacher-respondents in handling multi-grade classes and their profile variates?

4. What are the challenges encountered by the teacher-respondents in handling multi-grade classes in terms of:
4.1 Curriculum Management and Organization;
4.2 Classroom Management Strategies;
4.3 Methodological aspects;
4.4 Material resources;
4.5 Time management?

5. Is there a significant relationship between the challenges encountered by the teacher-respondents in handling multi-grade classes and their profile variates?

6. Is there a significant relationship between the challenges encountered by the teacher-respondents in handling multi-grade classes and their coping strategies employed?

7. What interventions maybe derived based on the findings of this study?

METHODOLOGY

This research explored the coping mechanisms used by teachers in handling multi-grade classes in elementary schools. The study employed a quantitative approach with a descriptive-correlation design. Data was collected from 108 teachers in two districts using purposive sampling. A questionnaire with various sections was used to gather information on teacher profiles, attitudes towards multi-grade classes, challenges faced, and coping strategies. The questionnaire's validity was ensured through expert review and a test-retest method. To collect data, researchers obtained permission from school authorities and informed teachers about the study's objectives. Teacher participation was voluntary, and anonymity was offered. Questionnaires were administered to gain relevant information. Data analysis involved statistical tools like frequency counts, percentages, and various correlation coefficients. Software like Microsoft Excel and SPSS were used to analyze the data. The researchers sought to identify relationships between teacher profiles, the challenges they encountered, and the coping mechanisms they employed.

RESULTS AND DISCUSSION

The following were the salient findings of the study:

1. The majority of teachers are young (27-31 years old) and female. This suggests a youthful and predominantly female teaching force in the sample.

2. Most teachers are married (51.85%) but single teachers represent a still substantial portion of the respondents (48.15%). This could be correlated with the young age or influenced by the demands of the profession.

3. The majority of the teachers fall within the Master's Degree Unit Earner category. This can be linked to the ranking and promotion processes of teachers, wherein level of education is part of the criteria.

4. There was a split between relatively newer teachers (<10 years' experience) and those with longer tenure. Notably, teachers are absent with 16-20 years of experience.

5. The majority of teacher-respondents handle two grade levels: Grade 5 and Grade 6 learners (20.37%). However, it was revealed that there are teachers who are handling three classes.

6. The majority of teacher-respondents have 11 to 15 learners. This distribution reflects its alignment with DepED Order. No. 96, s. 1997 on the policies and guidelines in the organization and operation of multi-grade classes, as it was clearly stated in this policy guideline that a maximum of 35 pupils per multi-grade class shall be observed.

7. District and school-level in-service training is most common. National and

regional training is reported as less frequent.

8. Teacher-respondents have a generally positive attitude toward multi-grade classes. It was revealed that they enjoy dealing with pupils in the multi-grade classrooms.

9. The statements with the highest weighted means, suggesting the most frequent utilized coping mechanism along Curriculum Management and Organization are: “Provide a good sequence of topics to suit classroom and learners’ levels of learning” (4.54) and “Design a classroom activity starting from an easy level and going to a more complex one” (4.51).

10. The statements with the highest weighted means, suggesting the most frequent utilized coping mechanism along classroom management strategies are: “Establish verbal and nonverbal communication in the classroom” (4.38), “Provide students’ flexible grouping in multi-grade classroom” (4.29), and “Learners’ individual and group work is on display so they can see the value of their efforts” (4.07).

11. The statements with the highest weighted means, suggesting the most frequent utilized coping mechanism along Methodological Aspects are: “I take into account the learning styles and the type of intelligence of the students” (4.81) and “I design engaging activities, direct and indirect, that permanently capture the interest of students” (4.56).

12. The statement with the highest weighted mean, suggesting the most common utilized coping mechanism along Material Resources is “There is sufficient school and learning facilities for conducting lessons in good condition” (3.20).

13. The statement with the highest weighted means, suggesting the most frequent utilized coping mechanism along time management are: “I teach by grouping learners to maximize time for lesson discussion and activity” (4.36), “I craft the daily lesson log per learning area on time or in advance” (4.00), and “I prepare learning and instructional material a week before you discuss the lesson” (3.76).

14. The variables that have a significant correlation with teachers’ coping mechanisms are: highest educational attainment (weak correlation), relevant in-service training (weak), and attitude toward multi-grade classes.

15. The correlation between the variable highest educational attainment of teachers and their coping mechanisms suggests that teachers with higher educational levels tend to use more coping mechanisms to adjust to handling multi-grade classes. Also, the correlation between the variable attitude of teachers toward multi-grade classes and their coping mechanisms indicates that teachers who have a positive outlook towards multi-grade classes tend to

utilize more coping and adaptation mechanisms in handling multi-grade classes. Moreover, the variable relevant in-service training and their coping mechanisms indicates that teachers who have more trainings attended tend to use more coping or adaptation techniques in teaching.

16. The statements with the highest weighted means, suggesting curriculum management and organization as highly challenging are: “The crafting of questions for assessment purposes for multi-group learners is difficult” (3.56) and “The topics discussed with multi-grade learners are of varying complexity” (3.51).

17. The statements with the highest weighted means, suggesting classroom management strategies as highly challenging situations, are: “Unavailability of technologies such as computers and other gadgets” (3.67), “A noisy environment cannot be avoided during multi-grade classes” (3.62), and “Providing flexible grouping in a multi-grade classroom is hard to achieve” (3.57).

18. The statements with the highest weighted means, suggesting methodological aspects as highly challenging are: “Lack of relevant training about multi-grade teaching” (3.71), “Submission of weekly design or plan of the multi-grade activities” (3.65), and “Switching the lesson activity from a direct activity of one class to an indirect activity of the other class” (3.63).

19. The statements with the highest weighted means, suggesting material resources as highly challenging are: “There are no computers available in each classroom or for each teacher” (3.74), “There is no accessible Internet connection” (3.73), “Lack of resources such as learning materials, equipment, and facilities” (3.70), and “There is no functional library within the school” (3.57).

20. The statements with the highest weighted mean, suggesting time management as highly challenging is “There is difficulty in maximizing time for lesson discussion and activity” (3.55).

21. The variables (age and sex, civil status, years of teaching in multi-grade classes, number of learners handled, relevant in-service trainings, attitude toward multi-grade classes) showed moderate to very weak associations with challenges encountered by teacher-respondents in handling multi-grade classes, and their correlations were determined to be not statistically significant. Only one variable has a significant correlation with teachers’ challenges encountered: grade level handled.

22. The coping mechanisms employed by the teachers in handling multi-grade classes and the challenges encountered showed a moderate correlation. Also, their correlations were determined to be statistically significant. Thus, this indicates that the type of coping mechanism and strategy employed by the

teacher-respondents were relatively affected by the challenges encountered while handling multi-grade classes.

23. There was a strong desire for professional development opportunities, such as trainings, due to the reported less frequent national and regional training of the teacher respondents.

24. There was a strong encouragement to follow the principle of providing classroom discussion and activity, starting from an easy level and going to a more complex one, as the teachers revealed that it provides more effective learning.

Relationship Between the Coping Mechanism Employed by the Teachers in Handling Multi-Grade Classes and Their Challenges Encountered

The study found a significant connection between the challenges teachers face in multi-grade classrooms and the coping strategies they use. Researcher started with the assumption that no such relationship existed (null hypothesis). However, the analysis (p-value of 0.005, lower than the significance level of 0.05) showed strong evidence to reject this assumption.

Table 1

Relationship Between the Coping Strategies employed in Handling Multi-Grade Classes and Their Challenges Encountered

Indicator	Association		Chi-square Value	p-Value @ α=.05	Evaluation/ Decision
	Correlation	Degree			
Coping Strategies Employed in Handling Multi-grade classes and their Challenges Encountered	.267	Moderate	0.000	0.005	S / Reject Ho.

ω=*p*=<.001<.05 pairwise normality deviated from the norm

S = Significant
NS = Not Significant

Additionally, a moderate correlation was identified. This means teachers likely adjust their coping mechanisms based on the specific difficulties they encounter. For

example, a teacher struggling with assessments for multiple grade levels might adopt a coping strategy focused on creating differentiated assessments. Recognizing this link between challenges and coping mechanisms allows schools and professional development programs to offer more targeted support. Training on specific coping mechanisms could be combined with training on how to address common challenges in multi-grade settings. Ultimately, this finding emphasizes the importance of acknowledging these challenges and equipping teachers with the resources and strategies to effectively manage them.

Conclusions

This study investigated the experiences of teachers handling multi-grade classes. The findings reveal a profile of the teachers and the challenges they encounter, along with the coping mechanisms they employ.

1. The majority of teachers are young (27-31 years old) and female.

2. Most teachers have a Master's Degree and some experience teaching multi-grade classes.

3. There's a split between newer teachers and those with longer tenure, with a gap in the 16–20-year experience range.

4. Teachers reported a generally positive attitude towards multi-grade classes.

5. Common challenges included crafting assessments, managing a noisy environment, and a lack of relevant training on multi-grade teaching.

6. Teachers frequently used coping mechanisms like grouping students, planning lessons in advance, and differentiating instruction based on learning styles.

7. There was a weak but significant correlation between teachers' educational attainment, positive attitude, and the number of coping mechanisms they used.

8. The challenges faced by teachers significantly influence the coping mechanisms they adopt.

9. Schools and professional development programs can better support teachers by providing training on multi-grade specific strategies and addressing resource limitations.

10. A positive attitude towards multi-grade classes appears to be beneficial.

11. Invest in professional development focused on multi-grade teaching methods.

Recommendations

This study provides valuable insights into the experiences of teachers handling multi-grade classes. Here are some recommendations based on the findings:

1. Develop coping mechanisms: The study highlights the importance of using various coping mechanisms to manage multi-grade classrooms. Teachers should continue to explore and develop these strategies, particularly in areas like curriculum management, classroom management, and time management.

2. Seek professional development: Teachers with higher educational attainment and those who attended relevant in-service training reported utilizing more coping mechanisms. This suggests that professional development opportunities can be beneficial. Schools and districts should prioritize providing training on multi-grade teaching strategies.

3. Maintain a positive attitude: A positive attitude towards multi-grade classes correlated with using more coping mechanisms. Teachers who see the value in multi-grade teaching are likely to be more proactive in finding solutions to challenges.

4. Support teachers: Many challenges were reported, particularly regarding a lack of resources and training. Schools and districts should find ways to support teachers by providing adequate learning materials, equipment, and access to technology. Additionally, they should prioritize offering training programs specifically focused on multi-grade teaching methods.

5. Invest in professional development: The desire for more professional development opportunities was strong. Schools and districts should offer more frequent in-service training on multi-grade teaching, and advocate for participation in national and regional training programs.

6. The study suggests a youthful and predominantly female teaching force in this sample. This may be a factor to consider when designing professional development programs.

7. While the majority of teachers reported a positive attitude towards multi-grade classes, there is still room for improvement. Schools and districts can explore ways to foster a more positive view of multi-grade teaching through mentorship programs or sharing success stories.

By implementing these recommendations, schools and districts can better support teachers in multi-grade settings, ultimately leading to a more positive and effective learning environment for students.

Compliance with Ethical Standards

The research was conducted following ethical guidelines. This included getting approval beforehand, clearly explaining the study's purpose to participants (both in writing and verbally), and emphasizing their right to withdraw at any point without needing to explain their decision. Additionally, confidentiality of the participants' information was guaranteed.

Acknowledgments

This research would not have been possible without the invaluable support of several individuals and institutions.

The researcher expresses sincere gratitude to her thesis adviser, Dr. Michelle Mustacisa, for her guidance, encouragement, and invaluable feedback throughout the research process. Deep appreciation is also extended to the research panel composed of Dr. Guillermo Lagbo, Dr. Elena De Luna, and Dr. Imelda Uy for their critical review, insightful corrections, and constructive suggestions that significantly improved the study.

The researcher acknowledges the motivation and support received from Dr. Nimfa T. Torremoro, Dean of the College of Graduate Studies. Her encouragement played a key role in the researcher's pursuit of this study.

Special thanks are given to Ms. Janice R. Colebra for her unwavering support and expert guidance throughout the research process, especially during the publication of this research paper. Her vast knowledge of academic publishing proved invaluable as I navigated the complexities of submitting my work for publication. Her insights on selecting an appropriate journal, tailoring the manuscript to specific requirements, and addressing reviewer feedback were instrumental in bringing this paper to a wider audience

The researcher is grateful to the school heads of the elementary schools in Motiong and Jiabong Districts for granting permission to conduct the study within their institutions. Their cooperation was instrumental in facilitating data collection.

The researcher extends her deepest gratitude to all the teacher-respondents who participated in the study. Their willingness to share their experiences and insights through their responses formed the foundation of this research.

The researcher is incredibly thankful for the unwavering love and constant support of her family members – Marl Enzo Jabiñar, Simprosa Mabini, Yolanda Brin, Alberto Brin, Margielyn Cabarrubias, Ceo Cabarrubias, Marizza Mabini, Vanjo Cabarrubias, Ma Shiela Dianne Brin, Florie May Brin, Angelo Brin, and Rafael Cedrick Brin. Their encouragement and belief in her capabilities were a source of strength throughout the research journey.

Finally, the researcher expresses her deepest gratitude to Almighty God for the blessings of good health, well-being, knowledge, strength, courage, peace of mind, and comfort – all of which were essential for the successful completion of this study.

ABSTRACT

Ang pagsusuri na ito ay hinggil Dayalektolohiyang Pagdaluma't sa Wikang Surigaonon Clavernon sa Munisipalidad ng Claver. Nakaangkla ang pagsusuri na ito sa *Lexicostatistic* na lapit sa pagsusuri ng *dialect geography* ni Mckhaughan na kung saan pinaghahambing ang 200 *wordlist* ni Swadesh Morris sa 14 barangay na nabanggit. Ipinasalin sa 28 impormante ang *eliciting material* na *wordlist* na nagsisilbing instrumento para matukoy ang *cognate counts, cognate percentage* at *isogloss* ng mga leksikon. Natuklasan sa isinagawang pananaliksik na ang 14 barangay ng Claver, Surigao del Norte ay nagsasalita ng mga dayalekto ng iisang wika ang Surigaonon na may 81-96 *shared cognates percentage*. Mayroong barayti ng mga salita ang nabuo batay sa pagpapangkat-pangkat ng mga isogloss. Nakapagtala rin ang ilang mga barangay ng mahigit sa isang bilang ng mga leksikal aytem na masusuring doon lamang matatagpuan sa nasabing. May mga pormang *cognate* at hindi *cognate* naman ang nabuo. Sa mga cognate, paglilipat-diin sa isang salita, pagkakaltas na ponema, nagkakaroon ng pagkakaiba sa isang patinig at katinig. Napatunayan sa pag-aaral na ito na bagaman nagkaroon ng leksikal na varyasyon dulot ng heograpikong lokasyon ay nagkakaroon pa rin ng mutwal na pagkakaunawaan ang mga Surigaonon sa munisipalidad ng Claver. Inirerekomenda na minarapat na pag-aralan pa ang mga dayalektal na varyasyon ng Surigaonon-Clavernon na may tuon ponolohikal na batayan ng dayalektolohiya sa pamamagitan ng mga karagdagang saklaw ng lugar at bilang ng impormante at

minarapat na tangkilikin at pag-aralan nang mabuti ang dayalektong Surigaonon bilang midyum sa pagtuturo ng mga mag-aaral sa kindergartin hanggang baitang 3.

Keywords: *Pagsusuri, Dayalektolohiyang Pagdalumat, Wikang Surigaonon-Clavernon, Preliminaryong Pag-aaral, Lexicostatistic, at Dialect geography*

INTRODUCTION

Ang Pilipinas ay isa sa mga bansang may pinakamaraming wika sa buong daigdig. Isa sa mga dahilan ng pagkaiba-iba ng dayalekto sa Pilipinas ay ang heograpiya ng ating bansa. Ang bansang ito ay may isang kapuluan o grupo ng mga pulo at binubuo ito ng mahigit 7100 pulo. Ito ang naging dahilan ng pagkakaroon ng iba't ibang dayalekto dito sa bansa, ang pagkakaroon ng hiwa-hiwalay na mga pulo. Matagal nang interesado ang mga linggwista sa pagtukoy sa mga dahilan ng pagkakaiba-iba ng umiiral na mga wika at dayalekto. Bagama't marami sa mga dayuhan at lokal na pagsusuri ang naitala, marami pa rin ang natitira pang matutuklasan tungkol sa mga wika at dayalektong sinasalita sa maliliit na bayan gaya ng Claver, na sakop ng lalawigan Surigao del Norte na hindi pa napag-aaralan, naidokumento, o nailalarawan.

Itinuturing na lingua franca ng mga Clavernon ang Wikang Surigaonon na kung saan naman ay hindi nalalayo sa Wikang Cebuano. Gayunpaman, kahit parehong Surigaonon ang ginagamit ng mga Clavernon na naninirahan sa bayan ng Claver, na ang kapitolyo ay ang Surigao del Norte hindi pa rin maikakaila na may pagkakaiba sa tono, bigkas at maging sa leksikon bagamat nagkakaroon pa rin ng mutwal na pagkakaintindihan o mutual intelligibility ang mga taong naninirahan sa nasabing bayan. Ayon pa kay Endriga (2010) ang Binisaya (na sinasalita sa Mindanao) ay mulasa Cebuano, inilalarawan ang mga ito bilang natatanging wika sa kabila ng pag- aangkin ng mutual intelligibility sa wikang Cebuano ng Cebu. Dagdag pa niya, Cebuano at Binisaya bilang isang wika at ang Cebuano at Bisaya bilang isang taoaymapagpapalit.

Ayon kay McFarland (2004), mahirap ang paglapat ng depinisyon sa aktuwal na pag-aaral ng wika dahil kadalasang hindi malinaw ang hangganan ng isang wika o dayalek sa isa pang wika o dayalek, lalo na sa mga kaso ng *dialect continuum*. Sa isang *dialect continuum*, lumalaki ang pagkakaiba ng mga variety habang papalayo ang mga ito sa isa't isa. Ang mutwal na pagkakaintindihan o *mutual intelligibility* ay kapag ang dalawa o higit pang tao ay magkakaintindihan sa isang wika o mga wika na magkakaugnay. Ito ay isang konsepto na nagmumula sa hindi pagkakaintindihan sa isa't isa hanggang sa pagkakaintindihan ng mabuti sa isa't isa. Isa itong lihis o gradient, na may iba't ibang tao na nagkakaintindihan sa iba't ibang antas.

Ginagamit na batayan ng mga lingguwista ang *mutual intelligibility* sa pagkakaiba ng wika at dayalekto. Kapag ang dalawang tao ay nag-uusap at gumamit ng magkaibang speech variety at hindi sila nagkaintindihan, magkaibang wika ang kanilang ginamit. Samantala, kung ang dalawang nag-uusap ay gumamit ng magkaibang *speech variety*

at nagkaroon ng kaunting *disturbance* sa pag-unawa (dahil magkaiba ang punto o pagbigkas ng mga salita o gumamit ng ibang salita para sa iisang kahulugan), nagsasalita lang sila ng magkaibang dayalekto ng iisang wika. Halimbawa, ang Tagalog na sinasalita sa Metro Manila ay may mga dayalekto na: Tagalog-Bulacan, Tagalog-Batangas, Tagalog-Cavite, Tagalog-Laguna at iba pa.

Ang mga salita sa iba't ibang wika ay maaaring magkaroon ng iba't ibang kahulugan, kaya't ang mga wika na may magkatulad na kahulugan ay magkakaugnay. Ang mga pangkat ng mga wika na may katulad na mga tampok ay nagmula sa parehong pinagmulan. Gayunpaman, ang lahat ng uri ng pananalita kahit opisyal na wika ay maaaring maiklasipika bilang dayalek at ang lahat ng uri ng pananalita.

Sa kahulugang ibinigay ni Fishiak (1988) ang dayalektolohiya aypag-aaral sa mga dayalek. Ang pagkakaiba at pagbabago ay karaniwang nangyayari bilang resulta ng relatibong heyograpiko o panlipunang paghihiwalay at maaaringmakakaapekto sa bokabularyo, gramatika, o pagbigkas.

Ang mga dialectologist ng lahat ng mga persuasion, tradisyonal o sosyolinggwistiko, ay naglalagay ng malaking diin sa pagkolekta ng mahusay na data – ang disiplina ay mabigat na empirical. Ang lahat ng dialectology ay umaasa sa impormasyong nakuha mismo mula sa mga nagsasalita ng mga dayalekto mismo, at kaya ang *fieldwork* ay isang mahalagang bahagi ng paksa. Ang *fieldwork* na ito ay kadalasang nakakaubos ng oras (lumalabas ang mga isyu tulad ng kung paano ‘pumasok’ sa isang komunidad na sapat na sensitibo upang makuha ang tiwala ng mga miyembro nito; kung paano maghanap ng mga may katuturang tao na pag-aaralan, kung paano sila hikayatin na maging bahagi ng imbestigasyon, kabilang ang pagiging naitala; kung paano bawasan ang pagkagambala na dulot ng proseso ng pagkolekta ng data sa kanilang buhay; at kung paano gagantimpalaan ang komunidad para sa pakikipagtulungan nito) at nangangailangan ng dialectologist na maging makapal ang balat, nababaluktot, madaling pakisamahan at isang mahusay na kausap.

Ayon kina Chambers at Trudgill (1999), mayroong pitong uri ng batayan sa dayalektolohiya: (1) *lexical*, o ang paglalarawan ng mga pagkakaiba-iba ng mga salitang ginagamit ng speaker ng bawat lugar sa pagtukoy ng bagay, kalagayan, o kilos; (2) pagbigkas, kung saan tinitingnan ang paraan ng pagbigkas sa mga *lexical item* sa iba’t ibang lugar kung mayroong pagkakaiba; (3) *phonetic*, ang paghahanap ng pagkakaiba o contrast sa phonetic output; (4) *phonemic*, o ang pagtingin sa imbentaryo ng mga distinctive na segment at suprasegmental ng mga dayalektong pinag-aaralan; (5) *morphological*, kung saan kabilang ang mga paradigmatic, inflectional, at derivational na mga pagkakaiba sa bawat lugar; (6) *syntactic*, kung saan ang tinitingnan ay ang pagkakaiba sa aspekto ng pagbubuo ng pangungusap; at (7) *semantic*, o ang pagkakaiba sa pagbibigay-kahulugan sa mga linguistic unit sa bawat lugar na pinagaaralan.

Dagdag pa nina Chambers at Trudgill (1998), ang heyograpikal continua ay tumuturing sa malaking impluwensya ng distansya ng lugar sa pagkakaiba ng wika. Habang lumalayo sa isang lugar ang orihinal na wika, lumalaki rin ang posibilidad ng

pagbabago ng wika at maaaring hindi maunawaan ng mga pangunahing tagapagsalita ang pagbabagong iyon sa wika.

Ang *dialect geography* ay isang subfield ng dialectology. Sa mas malawak na kahulugan nito, sinasaklaw nito ang lahat ng pag-aaral na may kinalaman sa mga *spatial* na *variation* ng *linguistic phenomena*. Mas partikular na tumutukoy ito sa mga pag-aaral na gumagamit ng mga *linguistic* na mapa.

May iba't ibang paraan ng pag-aaral ng *dialect geography* ginagamit. Ang isang halimbawa ay sa pamamagitan ng pag-*survey* sa mga tao. Gayunpaman, nagmungkahi rin si Mckaughan (1964) ng tatlong pangunahing lapit o pamamaraan para sa pag-aaral ng dialect geography ito ay ang sumusunod: *comparative, lexicostatistics, at phonostatistics.*

Kung alin man sa tatlong ito ang mainam gamitin ay nagdedepende sa antas ng pagkakaiba sa pagitan ng mga dayalektong pinag-aaralan. Saad pa ni Mckaughan (1964), ang *phonostatistics* na metodo ay mas epektibong gamitin kung mayroong maliit lamang na pagkakaiba sa pagitan ng mga dayalek isang konkretong halimbawa nito ang maliit na pagbabago sa tunog. Habang ang *lexicostatistics* naman ay mainam na pamamaraan para sa paghahambing ng mga dayalektong may makabuluhang pagkakaiba upang karamihan sa mga leksikal aytem ay hindi na nakikilala pa ang pinagmulang angkan nito. Dagdag pa, ang pagtukoy ng *cognate percentage* ng mga inihahambing na word list ay proseso ng *lexicostatistics*. At ang pinakagamiting pamamaraan naman sa pagkokompara ng mga radikal na pagkakaiba ng wika sa loob ng *langauge family* ay ang *comparative* na metodo na kung saan ang maingat na pag-aaral ay kakailanganin para matukoy ang komon na pinagmulan ng mga leksikon sa mga wikang pinag-aaralan o di kaya'y sa gramatikal na mga pattern ang mga wika (Walrod,1978).

Ang layunin ng mga mananaliksik ay mailarawan at masuri ang mga dayalektal na baryasyon ng Wikang Surigaonon-Clavernon sa Munisipalidad ng Claver, Surigao del Norte.

Research Questions

Ang pag-aaral na ito ay hinggil sa paksang Dayalektolohiyang Pagdalumat ng Wikang Surigaonon-Clavernon sa Munisipalidad ng Claver, Surigao Del Norte: Isang Preliminaryong Pagsusuri. Upang matamo ang mga layuning ito, sinikap ng mananaliksik na masagot ang mga tiyak na katanungan batay sa mga sumusunod:

1. Ano ang magiging *cognate percentage* ng magkatulad at magkaibang *cognates* ng Wikang Surigaonon na sinasalita sa 14 na barangay sa bayan ng Claver, Surigao del Norte?
2. Paano mailalarawan ang mga leksikal aytem at ang nabuong porma ng isogloss ng Wikang Surigaonon na sinasalita sa 14 na barangay ng Claver, Surigao del Norte?

3. Paano masusuri ang mga dayalektal na varyasyon na nabubuo sa 14 na barangay ng Claver, Surigao del Norte?

METHODOLOGY

Ang pag-aaral na ito ay isang kwalitatibong uri ng pananaliksik na nilapatan ng deskriptibong pamamaraan sa linggwsitika sa pagdodokumento ng wika batay sa mga nakolektang datos. Ginamit din ng mananaliksik ang *lexicostatistic* na lapit sa pagsusuri at pag iinterpret ng dialect geography alinsunod sa balangkas ni Mckaughan. Ipinasalin ng mananaliksik ang 200 *wordlist* ni Morris Swadesh sa dalawamputwalong (28) mga impormante na nagmula sa 14 na barangay na sakop ng Munisipalidad ng Claver ayon sa kanilang wikang ginagamit.

Inihahambing ang talaan ng mga leksikon sa 14 na barangay ng Claver, Surigao del Norte upang malaman ang cognate percentage ng magkatulad at magkaibang mga leksikon; sa gayon matuklasan kung gaano kalapit o kalayo na ang mga dayalekto ng Surigaonon sa isa't isa. Binigyang interpretasyon ang dalawa bilang magkakogneyt at ginawan ng dialectal map ang mga leksikon na may nabuong pattern ng isogloss na inirerepresentang wika. Purposive sampling ang pamamaraang ginamit ng mananaliksik sa pagkuha ng mga impormante sa pag-aaral na ito. Sila ay nagmula sa 14 Barangay ng Claver, Surigao del Norte.

Ang instrumentong gagamitin sa pananaliksik na ito ay pakikipanayam na kung saan ang mga mananaliksik ay magtatanong sa mga respondente na siyang pagkukunan ng mga datos. Ang pagkuha ng impormasyon sa isang impormante ay may awtoridad o may personal na pagkaunawa sa paksa ng pananaliksik. *Eliciting Material* ang pangunahing instrumento na ginamit sa pangongolekta ng datos. Ito ay binubuo ng (200) na mga salita ng *Basic Core Vocabulary* ni Morris Swadesh na ginamit sa pag-aaral ni Zorc (1977) na *Bisayan Dialects of the Philippines*. Ang mga nakalap na datos ay pagsama-samahin at tutukuyin ang mga pangunahing opinyon ng mga respondente hinggil sa suliranin.

Ang nakalap na datos ay susuriin upang mas mapadali ang pagtataya rito. Gagamit ng *Lexicostatistics Analysis* ang mga mananaliksik na nilapatan ng *cognates percentage* ng dalawang *representative* languages upang ipresenta ang mga datos kung saan gagamit ng mga talaan upang suriin ang mga datos. Makikita sa ibaba ang interpretasyon ng *cognate percentage* ng dalawang representative language (Crowley:173; Javier, 2012). Ginamit itong batayan upang mabigyan ng angkop na paglalarawan ang dalawang nirepresentang wika bilang magka-ugnay o cognate.

Term	Cognate Percentage
Language	81-100
Family	36-81
Stock	12-36
Microphylum	4-12
Mesophylum	1-4
Macrophylum	<1

Talaan 1. Interpretasyon ng Cognate Percentage ng Pagkakaugnay-ugnay ng mga Wika

Maituturing na dayalekto ng isang wika, kung ang dalawang representative languages ay may 81- 100 *cognate percentage*. Kung ang dalawang representative languages naman ay may 36-81 *cognate percentage*, sila ay ipinapalagay na dalawang daughter languages na nanggaling sa isang ancestral proto language. Ganoon din ang interpretasyon para sa *stock, microphylum, mesophylum*, at *macrophylum*. Sa malawakang pagtanaw, ang dalawang magkaibang wikang gaya ng Tagalog at Ingles na pawang kasapi ng magkaibang *language family* (Tagalog ay sa Austronesian at ang Ingles ay sa Indo-European), ay ipinapalagay na mga kasapi ng magkaibang *macrophyla* (Javier, 2012).

RESULTS

Sa bahaging na ito ng pag-aaral ay inilalahad ang mga nalikom na datos na isinalin sa Surigaonong Claveronon mula sa batayang wika na Filipino. Binigyang pagpapakahulugan at pagsusuri ang mga ito upang matugunan ang mga layunin ng nasabing pag-aaral.

Makikita sa ibaba ang talaan ng mga *correspondence* ng mga probable cognate na pinaghambing-hambing sa bawat barangay (tingnan ang talaan 1). Sumunod dito ang talaan ng *percentages* ng cognates para sa bawat barangay (tingnan ang talaan 2).

Talaan 1. Lexicostatistical na paghahambing ng cognates counts sa bawat barangay.

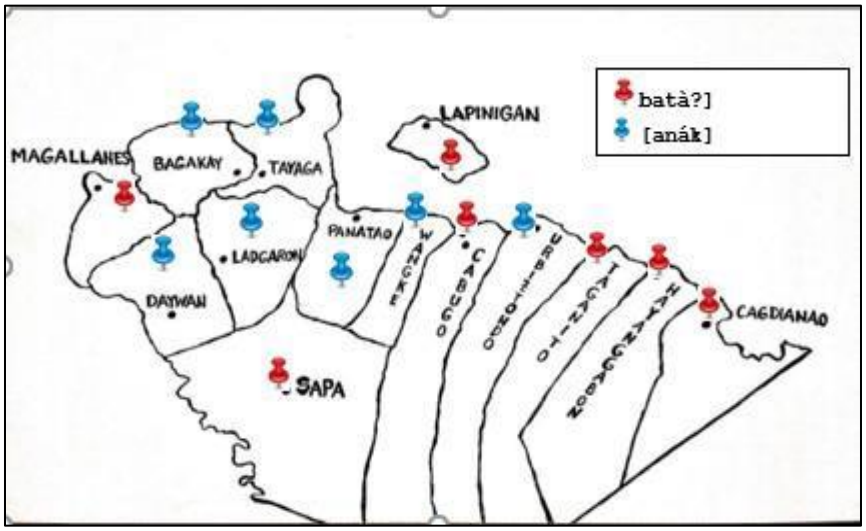
MGA *SET* NG *ISOGLOSS*

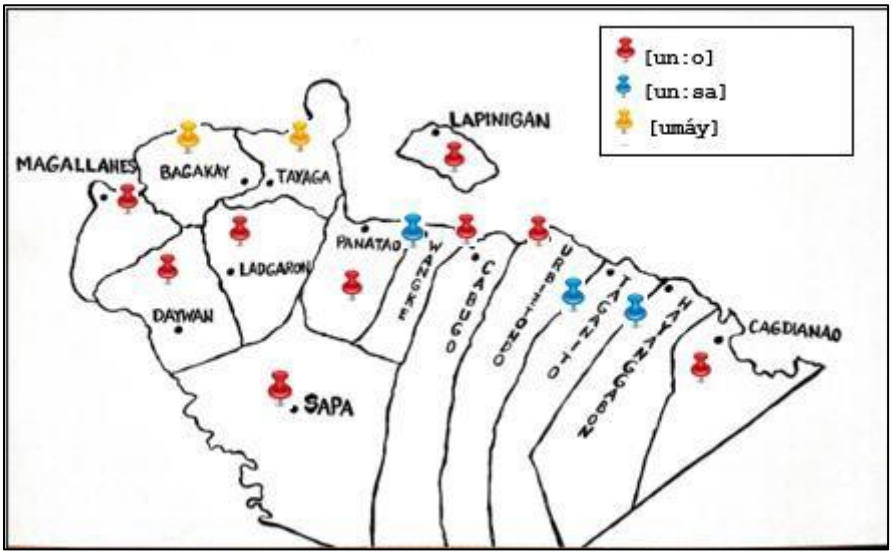
1. Isang Porma sa lahat maliban sa **Urbiztondo (Urb), Taganito (Tag), Daywan (Day), Cabugo (Cab), at isang porma sa Hayanggabon (Hay).**



“ama”	**[tátay]** (Wan, Mag, Sap, Lad, Lap, Pan, Tay, Cag)
	[amâ?] (Bag, Urb, Tag, Day, Cab)
	[amahán] (Hay)

Mapa 1 – Isang Porma sa lahat maliban sa Urb, Ta, Day, Cab, at isang porma sa Hay.

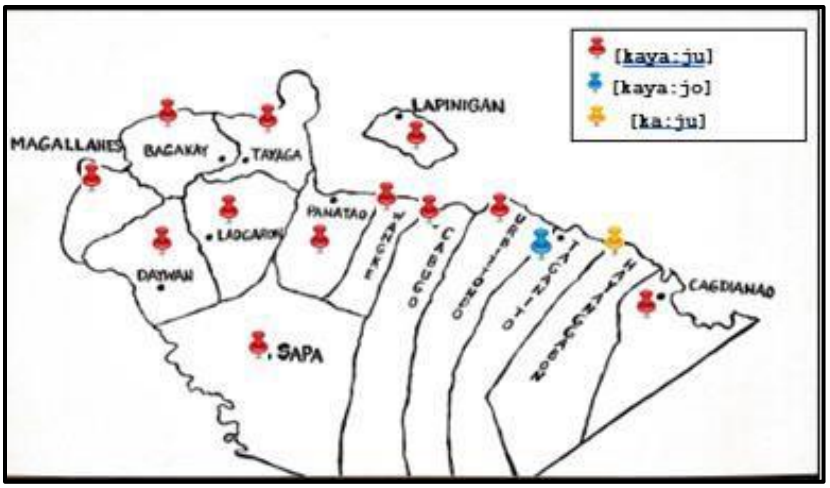
2. Isang Porma sa lahat maliban sa **Urbiztondo (Urb), Daywan (Day), Panatao (Pan), Ladgaron (Lad), Tayaga (Tay), at Wangke (Wan).**



“anak”	**[batà?]** (Tag, Hay, Cag, Sap, Mag, Lap, Cab)
	[anák] (Bag, Urb, Day, Pan, Lad, Tay, Wan)

Mapa 2 – Isang porma sa lahat maliban sa Urb, Day, Pan, Tay, Wan.

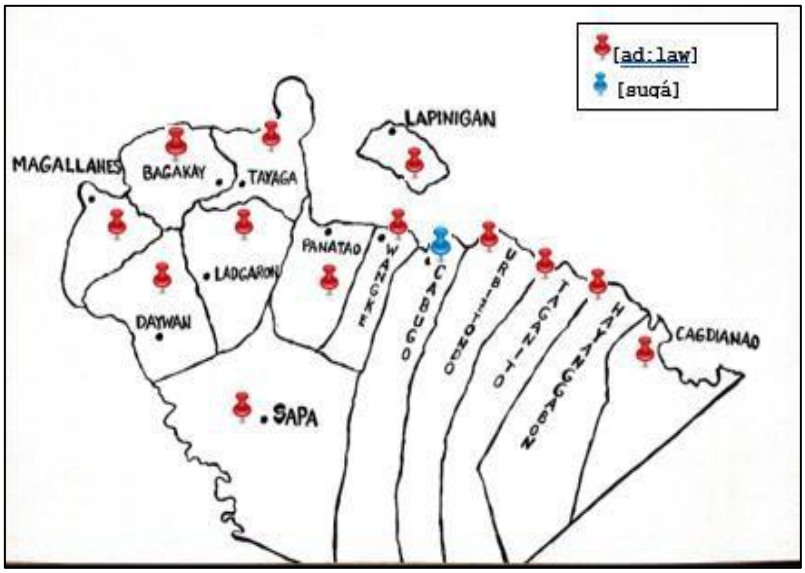
3. Isang Porma sa lahat maliban sa **Wangke (Wan), Taganito (Tag), Hayanggabon (Hay), Cabugo (Cab) at Bagakay (Bag), Tayaga (Tay).**



“ano”	**[un:o]** (Pan, Mag, Cag, Lap, Lad, Sap, Cab, Day, Urb)
	[un:sa] (Wan, Tag, Hay)
	[umáy] (Bag, Tay)

Mapa 3 – Isang Porma sa lahat maliban sa (Wan), (Tag), (Hay), at Bagakay (Bag), (Tay).

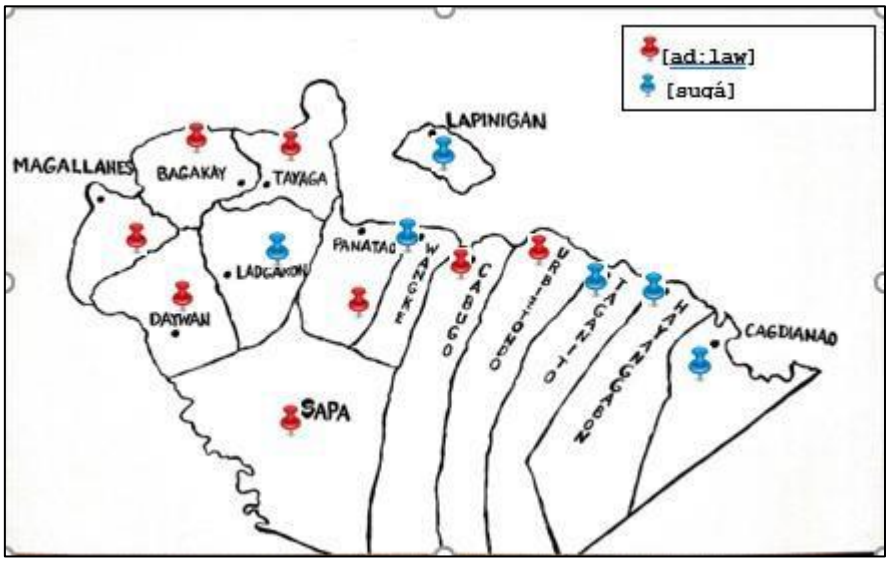
4. Isang Porma sa lahat maliban sa **Hayanggabon (Hay), at Taganito (Tag).**



“apoy”	**[kaya:ju]** (Sap, Lad, Lap, Cag, Mag, Urb, Pan, Tay, Wan, Day, Cab, Bag)
	[kaya:jo] (Tag)
	[ka:ju] (Hay)

Mapa 4 – Isang porma sa lahat maliban sa Hay at isang porma sa Tag.

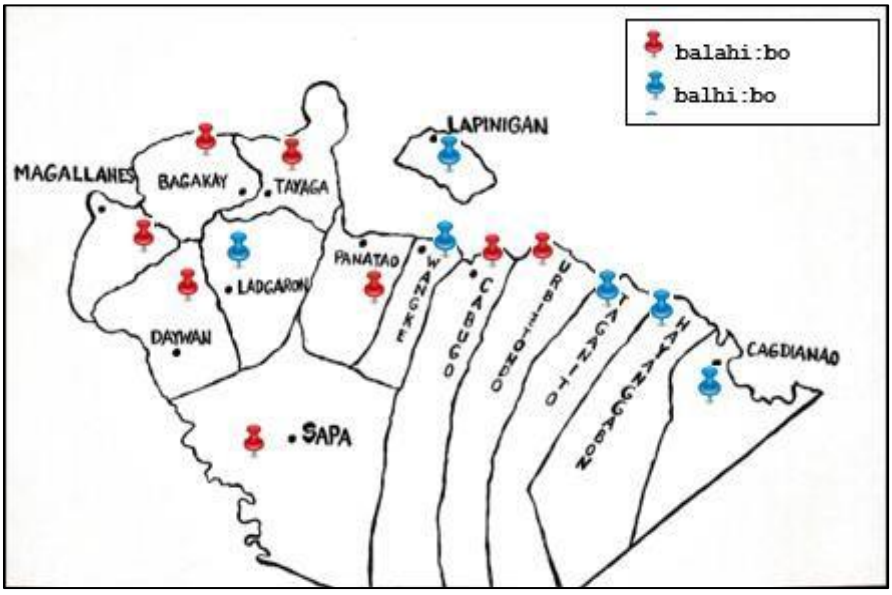
5. Isang Porma sa lahat maliban sa **Cabugo (Cab).**



“araw”	**[ad:law]** (Pan, Day, Wan, Cag, Lap, Tay, Mag, Sap, Tag, Hay, Lad, Urb, Bag)
	[sugá] (Cab)

Mapa 5 – Isang porma sa lahat maliban sa Cab.

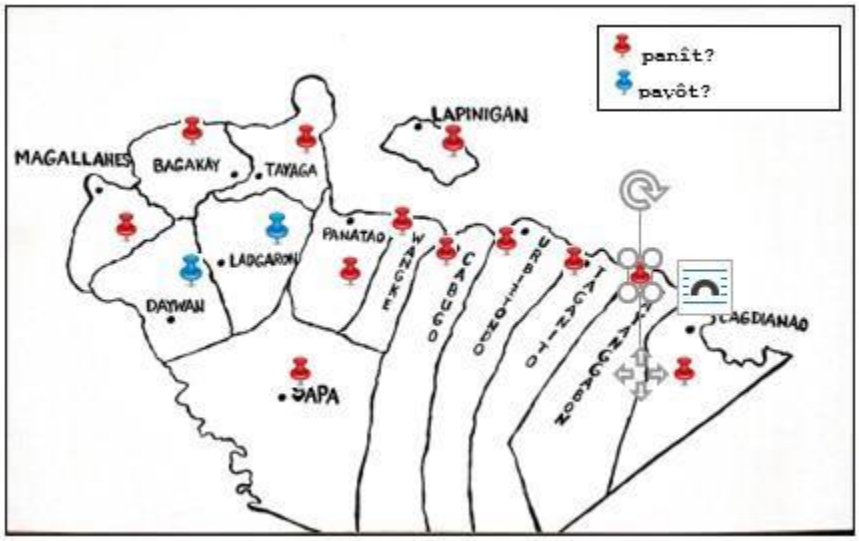
6. Isang Porma sa lahat maliban sa **Lapinigan (Lap), Ladgaron (Lad), Cagdianao (Cag), Hayanggabon (Hay), Wangke (Wan), at Taganito (Tag).**



“aso”	**[idù?]** (Sap, Cab, Tay, Mag, Pan, Day, Urb, Bag)
	[irô?] (Lap, Lad, Cag, Hay, Wan, Tag)

Mapa 6 – Isang porma sa lahat maliban sa Lap, Lad, Cag, Hay, Wan, Tag

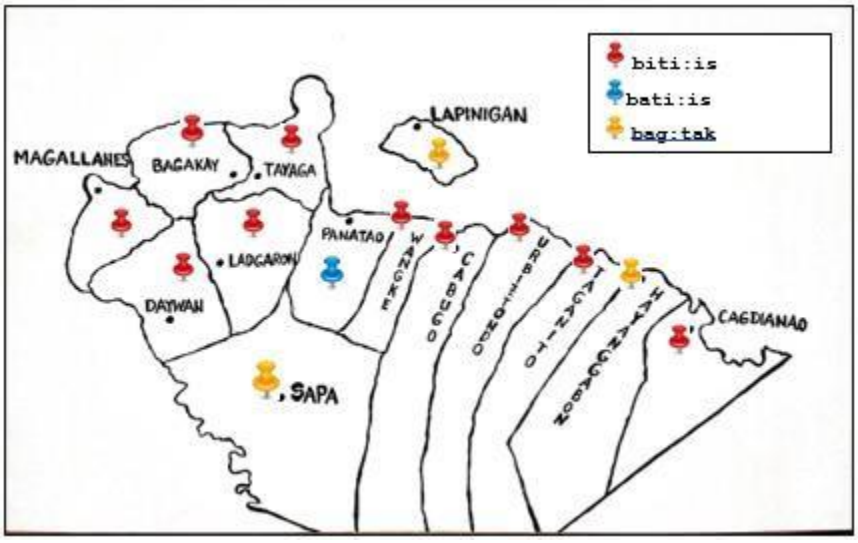
7. Isang Porma sa lahat maliban sa **Taganito (Tag), Hayanggabon (Hay), at Daywan (Day)**



“balahibo”	**[balahi:bo]** (Sap, Cab, Tay, Mag, Pan, Day, Urb, Bag)
	[balhi:bo] (Lap, Lad, Cag, Hay, Wan, Tag)

Mapa 7 – Isang porma sa lahat maliban sa Cag, Hay, Tag, Wan, Lap, Lad

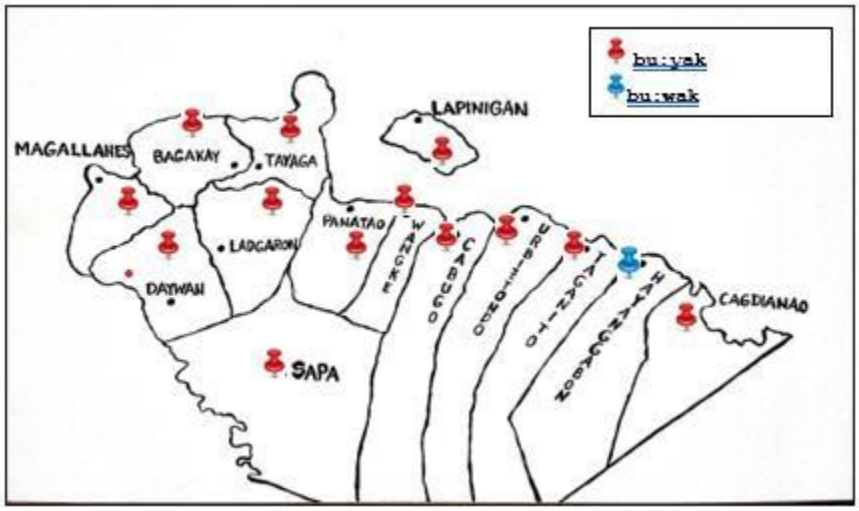
8. Isang Porma sa lahat maliban sa **Ladgaron (Lad), at Daywan (Day).**



“balat”	**[panît?]** (Cag, Cab, Tay, Hay, Tag, Mag, Pan, Urb, Wan, Sap, Lap, Bag)
	[payôt?] (Lad, Day)

Mapa 8 – Isang porma sa lahat maliban sa Day at Lad.

9. Isang Porma sa lahat maliban sa **Panatao (Pan), Lapinigan (Lap), Hayanggabon (Hay), Sapa (Sap).**



“binti”	**[biti:is]** (Wan, Tay, Urb, Lad, Day, Cab, Cag, Tag, Mag, Bag)
	[bati:is] (Pan)
	[bag:tak] (Lap, Hay, Sap)

Mapa 9 – Isang porma sa lahat maliban sa Pan at isang porma sa Sap, Lap, Hay.

10. Isang Porma sa lahat **maliban sa Hayanggabon (Hay).**

“bulalak”	**[bu:yak]** (Urb, Lad, Wan, Day, Tag, Mag, Tay, Lap, Pan, Cag, Cab, Sap, Bag)
	[bu:wak] (Hay)

Mapa 10 – Isang porma sa lahat maliban sa Hay.

MGA PATTERN NA NABUO

Mga Leksikal na Hindi *Cognate.*

Makikita sa ibaba ang mga sumusunod na ilang leksikal hindi *cognate*.

“ama”	**[tátay]** (Wan, Mag, Sap, Lad, Lap, Pan, Tay, Cag) **[amâ?]** (Bag, Urb, Tag, Day, Cab) **[amahán]** (Hay)
“bulalak”	**[bu:yak]** (Urb, Lad, Wan, Day, Tag, Mag, Tay, Lap, Pan, Cag, Cab, Sap, Bag) **[bu:wak]** (Hay)
“gabi”	**[duyóm]** (Urb, Cab, Tay, Lap, Sap, Pan, Lad, Hay, Cag, Mag, Day, Tag) **[gabií]** (Wan)
“gubat”	**[bu:kid]** (Wan, Sap, Day, Lap, Cag, Mag, Hay) **[lasáng]** (Tag, Cab, Pan, Urb) **[guyangán]** (Tay, Lad, Bag)

“hayop”	**[hajòp?]** (Urb, Cab, Bag, Tay, Lap, Sap, Pan, Lad, Hay, Cag, Mag, Day, Wan) **[mananâp?]** (Tag)

Mga Cognate na salita.

a) Paglilipat-diin sa isang salita.

[inâ?]	[inahán]
[amâ?]	[amahán]
[kaya:ju]	[ka:ju]

b) Pagdaragdag at Pagkakaltas na Ponema.

“apoy”	[kaya:ju] [ka:ju]
“balahibo”	[balahi:bo] [balhi:bo]
“itulak”	[itukyôd?] [ituyôd?] [tukyôd]
“mabuti”	[maradjáw] [marajáw]
“madumi”	[lipâ?] [malipâ?]

c) Pagkakaiba ng isang patinig ng salita.

- **Ponemang o-u**

1)	**“**apoy”	[kaya:jo]	[kaya:ju]
2)	“bulok”	[hayô?]	[hayû?]
3)	“iyan”	[jaón]	[jaún]
4)	“malayo”	[lajô?]	[lajû?]

- **Ponemang i-u**

1)	“sumipsip”	[nisupsôp?]	[nusupsôp?]
2)	“sumuka”	[nisu:ka]	[nusu:ka]
3)	“tumayo”	[nitin:dog]	[nutin:dog]

4) “dumating” [niabôt?] [nuabôt?]

5) “dumura” [niludâ?] [nuludâ?]

- **Ponemang a-i**

1) “lawa” [la:naw]
[li:naw]

d) Pagkakaiba ng isang patinig ng salita.

- **Ponemang y-j**

✓ “umihip” [nuhuyòp?]
[nuhujòp?]

✓ “lupa” [jutà]
[yutà]

- **Ponemang m-n**

✓ “umalam” [nuhibayó]
[muhibayó]

✓ “magsabi” [maglaóng]
[naglaóng]

✓ “lumangoy” [mulangóy]
[nulangóy]

✓ “lumaban” [mua:to]
[nua:to]

- **Ponemang d-l**

✓ “putulin” [putlón]
[putdón]

- **Ponemang k-m**

✓ “makapal” [kabagâ?]
[mabagâ?]

- **Ponemang d-r**

✓ “liparin” [lupadón]
[luparón]

DISCUSSION

Batay sa talaan 1, sa 200 leksikal aytems nakapagtala ng pinakamataas na bilang ang magkapares na barangay Ladgaron at Bagakay na may (94) *cognates*. Sumunod ang bilang na (82) na ito'y natamo ng barangay Lapinigan at ang barangay Cabugo na nakakuha ng (81) *cognates*. Pinakamababang cognates ang naitala ng Hayanggabon (59) *cognates* batay sa paghahambing nito sa barangay Panatao. Pumapangalawa sa pinakamababang bilang na (56) *cognates* ang naitala sa barangay Daywan.

Batay sa talaan 3, pinamataas na *cognate percentage* na 96% ang naitala ng barangay Ladgaron. Sumunod rito ang barangay Lapinigan na may *cognate percentage* na (83) at ang magkatabing barangay ng Cabugo at Wangke ay umabot sa (82) *cognate percentage*. Ang pinakamababa naman na *cognate percentage* (57) ang nakuha ng barangay Daywan sa paghahambing ng mga lesikon sa barangay Panatao. Sumunod rito ang barangay Hayanggabon na nakatamo ng (60) *cognate percentage*. Gayunman, kapansin-pansin din na bagaman malayo sa isa't isa ang mga barangay Lapinigan (75), Sapa (74), Ladgaron (77), at Bagakay (76), kakikitaan naman ng mataas na *cognate percentage* kung ikokompara ang kanilang kogneyts sa barangay Hayanggabon na may (61).

Makikita rin sa talaan na magkapareho ang *cognates percentage* na barangay ng Urbiztondo (70), Wangke (70), Taganito (70), Hayanggabon (70) kung ikokomapora sa kalapit na barangay na Cabugo (68). Magkapareho rin ng cognate percentage ang kalapit na mga barangay sa Hayanggabon (67), Taganito (67), Wangke (67) kung ikokompara natin sa kalapit na barangay na Urbiztondo (70).

Kung susuriin ang talaan sa itaas, masasabing ang bawat representative language ayon sa kanilang leksikon ay pawang mga dayalekto ng iisang wika ang Surigaonon. Maliban sa interpretasyong ito, nasuri rin sa pag-aaral ng mga datos na ang porsyento ng shared cognates ng barangay Sapa, Ladgaron at bagakay ay lubahang mataas sa kanila ng kanilang heograpikal na lokasyon. Bagaman magkalayo ang kanilang lokasyon sa mapa ng barangay Cabugo, masasabing iisang dayalekto lamang ang kanilang ginagamit ng mga ispiker na ninirahan sa mga lugar na nabanggit.

Ang kalagayang ito ay kahawig sa pag-aaral ni Walrod na pinamagatang Three criteria for establishing dialect boundaries. Sa pagtukoy ni Walrod sa *dialect boundaries* ng dayalektong Ifugao, napatunayan na ang Caba, Hapid, Ayangan, at Mayoyao ay nakapagtala ng mataas na *cognate percentage* ayon sa paghahambing ng mga leksikon sa lugar ng Batad. Patunay lamang na ang limang lugar na nabanggit ay nagsasalita ng iisang dayalekto, na ipinalagay na ang Batad ang linguistic center ngunit hindi ang geographical center (Walrod, 1978:7).

Kapansin-pansin din sa pagsusuri ng mga datos na habang papalayo nang papalayo ang mga lugar na pinaghahambing ay bumababa naman ang porsyento ng pagkakatulad ng mga leksikon nito. Isang magandang halimbawa rito ang mababang

porsyento ng 63, 58, 57 na naitala sa barangay ng Ladgaron, Bagakay at Tayaga sa paghahambing nito sa barangay Daywan.

Mga Set ng Isogloss

Tinitingnan sa dayalektolohiya ang pagkakaiba ng mga varayti ng isang wika. Isogloss ang tawag sa boundary kung saan nagkakaroon ng pagkakaiba sa isang linguistic na feature ang iba't ibang varayti (Chambers at Trudgill 89; Cunanan, 2015). Ang linguistic feature na ito ay maaaring tunog, diin, bokabularyo, atbp. Ang pagpatong-patong o kumpulan ng magkakatulad na isogloss ay tinatawag namang bundle ng isogloss, na maaaring tumukoy sa boundary ng mga dialect sa isa't isa (Chambers at Trudgill 96; Cunanan, 2015).

Ipapakita sa bahaging ito ang iba't ibang porma ng isogloss na nabuo mula sa pagsusuri.

1. Makikita sa grapiko bilang 1 na ang barangay Wangke, Magallanes, Sapa, Ladgaron, Lapinigan, Panatao, Tayaga, Bagakay, Cagdianao ay parehong gumagamit ng salitang "tátay" samantala ang barangay ng Urbiztundo, Taganito, Daywan Cabugo ay sila lamang ang gumagamit ng salitang "amâ?" at ang barangay Hayanggabon lamang ang gumagamit ng salitang "amahán". Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang "tátay" bilang panumbas sa wikang tagalog na Ama.

2. Makikita sa grapiko bilang 2 na ang barangay Taganito, Hayanggabon, Cagdianao, Sapa, Magallanes, Lapinigan, Cabugo ay parehong gumagamit ng salitang "batà?" samantala ang barangay ng Urbiztundo, Daywan, Panatao, Ladgaron, Tayaga, Bagakay, Wangke ay ang gumagamit naman ng salitang "anák". Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang "batà?" bilang panumbas sa wikang tagalog na Anak.

3. Makikita sa grapiko bilang 3 na ang barangay Panatao, Magallanes, Cagdianao, Lapnigan, Ladgaron, Sapa, Cabugo, Daywan, Urbiztundo ay parehong gumagamit ng salitang "un:o" samantala ang barangay ng Wangke, Taganito, Hayanggabon ay ang gumagamit naman ng salitang "un:sa" at tanging barangay Tayaga lamang ang gumagamit ng salitang "umáy". Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang "un:o" bilang panumbas sa wikang tagalog na ano.

4. Makikita sa grapiko bilang 4 na ang barangay Sapa, Ladgaron, Lapinigan, Cagdianao, Magallanes, Urbiztundo, Panatao, Tayaga, Bagakay, Wangke, Daywan, Cabugo ay parehong gumagamit ng salitang "kaya:ju" samantala ang barangay Taganito ay gumagamit ng salitang "kaya:jo" at tanging barangay Hayanggabon lang din ang gumagamit ng salitang "ka:ju". Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang "kaya:ju" bilang panumbas sa wikang tagalog na Apoy.

5. Makikita sa grapiko bilang 5 na ang barangay Panatao, Daywan, Wangke, Cagdianao, Lapinigan, Tayaga, Bagakay, Magallanes, Sapa, Taganito, Hayanggabon, Ladgaron, Urbiztundo ay parehong gumagamit ng salitang “ad:law” samantala tanging barangay Cabugo lamang ang gumagamit ng salitang “sugá”. Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang “ad:law” bilang panumbas sa wikang tagalog na Araw.

6. Makikita sa grapiko bilang 6 na ang barangay Sapa, Cabugo, Tayaga, Bagakay, Magallanes, Panatao, Daywan, Urbiztundo ay parehong gumagamit ng salitang “idù?” samantala ang barangay Lapinigan, Ladgaron, Cagdianao, Hayanggabon, Wangke, Taganito ay gumagamit naman ng salitang “irô?”. Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang “idù?” bilang panumbas sa wikang tagalog na Aso.

7. Makikita sa grapiko bilang 7 na ang barangay Sapa, Cabugo, Tayaga, Bagakay Magallanes, Panatao, Daywan, Urbiztundo ay parehong gumagamit ng salitang “balahi:bo” samantala ang barangay Lapinigan, Ladgaron, Cagdianao, Hayanggabon, Wangke, Taganito ay gumagamit naman ng salitang “balhi:bo”. Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang “balahi:bo” bilang panumbas sa wikang tagalog na Balahibo.

8. Makikita sa grapiko bilang 8 na ang barangay Cagdianao, Cabugo, Tayaga, Bagakay, Hayanggabon, Taganito, Magallanes, Panatao, Urbiztundo, Wangke, Sapa, Lapinigan ay parehong gumagamit ng salitang “panît?” samantala ang barangay Ladgaron, Daywan ang tanging gumagamit ng salitang “payôt?”. Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang “panît?” bilang panumbas sa wikang tagalog na balat.

9. Makikita sa grapiko bilang 9 na ang barangay Wangke, Tayaga, Bagakay, Urbiztundo, Ladgaron, Daywan, Cabugo, Cagdianao, Taganito, Magallanes ay parehong gumagamit ng salitang “biti:is” samantala ang barangay Panatao lamang ang tanging gumagamit ng salitang “bati:is” at ang salitang “bag:tak” naman ay parehong ginagamit ng barangay Lapinigan, Hayanggabon, at Sapa. Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang “biti:is” bilang panumbas sa wikang tagalog na Binti.

10. Makikita sa grapiko bilang 10 na ang barangay Urbiztundo, Ladgaron, Wangke, Daywan, Taganito, Magallanes, Tayaga, Bagakay, Lapinigan, Panatao, Cagdianao, Cabugo, Sapa ay parehong gumagamit ng salitang “bu:yak” samantala ang barangay Hayanggabon lamang ang tanging gumagamit ng salitang “bu:wak”. Samakatuwid mapapansin na karamihan sa mga barangay ang gumagamit ng salitang “bu:yak” bilang panumbas sa wikang tagalog na Bulaklak.

Mula sa nabuong porma ng mga isogloss gayundin sa pagmamapa ng dialectal variation gamit ang mga leksikal aytems, kapansin-pansin na halos magkakapareho lamang ang isinasalita o lingwahing ginagamit ng mga barangay na sakop ng

munisipalidad ng Claver, ngunit lumilitaw parin ang varyasyon o pagkakaiba sa mga lexicon, sa tuno o bigkas at maging sa diin. Higit na nakamamanha ang mga lexical na varyasyong nagaganap sa mga magkalapit na barangay.

Gayunpaman, may mga barangay din na kahit na malayo sa isa't isa ay kakikitaan parin ng maraming lexicon na magkakapareho, gayundin ang iilang mga barangay na di gaanong malapit ngunit maraming pagkakatulad at pagkakaiba sa kanilang mga lexicon.

Halimbawa sa salitang "gabi" labingtatlo sa labing apat na barangay ng Claver ang magkakapareho sa paggamit o pagbigkas nito sa wikang Sinurigaonon na kung saan ito ay tinatawag na "duyom" samantalang isang barangay lamang ang namumukodtanging gumagamit ng salitang "gabii" at ito ang barangay Wangke. Gayundin ang salitang "hayop" na kung saan ang barangay Taganito lamang ang nag-iisang barangay na mayroong ibang pagkasabi, ito ay tinatawag na "mananap" samantalang ang karamihan na barangay ay parehong gumagamit ng salitang "hajop" bilang katumbas ng salitang "hayop" sa wikang tagalog.

Mga Pattern na Nabuo

Ayon sa ginawang pagsusuri, makikitang mayroong mga cognate at hindi cognate na porma ang lumitaw sa mga datos na nakalap. Pinapahiwatig na ang cognate ay dalawa o higit pang mga salita na magkahawig ang porma at kahulugan ng mga ito o maaaring isiping nanggaling sa iisang naunang porma (Crowley 89; Javier, 2012). Kung kaya't sinanisikap ng mga mananaliksik na ilahad at ilarawan ang mga sumusunod na mga suring datos ayon sa mga nakalap sa iba't ibang barangay.

Sa ginawang pananaliksik mayroong 200 na mga leksikal aytems na ginamit sa pag-aaral at lumalabas sa pag-aaral na ito na mayroong 105 na leksikal aytem ang iisang porma para sa lahat ng barangay sa munisipalidad ng Claver Surigao del Norte, Ang ilan sa mga halimbawa nito ay ang mga sumusunod:

butó	bukóg	buwán	bu:yan	u:sok	asó
ugât?	gamôt?	butuín	bitu:on	pulá	puyá
itím	itóm	taón	tu:ig	i:log	subâ?

Makikita sa ginawang pagsusuri ang pagkakaroon ng hindi *cognate* na mga salita na ginagamit ng mga mamamayan sa pang-araw-araw na pakikipagkomunikasyon ibig sabihin, nagkakaroon ng barayti ng mga salita na ginagamit ng bawat barangay sa munisipalidad ng Claver.

Sa mga nasuring na datos, mapapansin ang pagkakaroon ng paglilipat diin sa mga salita na ginagamit ng iba't ibang barangay ng Claver na kung saan kasabay sa pagbabago nito ay ang tuldik lalo na kapag nagkakaroon ng panlapi sa isang salitang ugat at kapag kinakaltasan. Matutunghayan sa bilang 1, at 4 na pangkat ng isogloss ang pagkakaroon ng paglilipat ng diin, ibig sabihin, hindi magkakapareho ang diin ng mga

salita sa tatlong variety na ito sa lahat ng pagkakataon lalo na kapag nagkakaroon paglalapi at pagkakaltas ng isang ponema.

Makikita sa mga halimbawa ang pagkakaroon ng pagkakaltas at pagdaragdag ng mga ponema sa isang leksikal na salita. Bawat barangay ay nagpakita ng iba't ibang kaparaan sa kung paano ginamit ang isang salita sa pagbuo ng isang pangungusap na ginagamit nila sa barangay na kanilang kinabibilangan.

Sa ginawang pagsusuri ng cognates at hindi cognates na mga leksikal na salita, mapapansin na may mga pagbabagong nagaganap sa mga leksikon gaya ng paglilipat-diin sa isang salita, pagdaragdag at Pagkakaltas na Ponema, nagkakaiba sa isang patinig at katinig. Saad pa ni Paz et al., ang leksikal ay tumutukoy sa katuturan ng salita na maaaring magbago ang kahulugan sa pamamagitan ng pagsasama o pagdaragdag ng mga morpema na maaaring nasa anyong malaya at di-malayang morpema.

Conclusions

Mula sa mga datos at resultang nakalap ay nabuo ang mga sumusunod na konklusyon: 1) Natuklasan sa pagaaral na ito na ang 14 barangay ng Claver, Surigao del Norte ay nagsasalita ng mga dayalekto ng iisang wika ang Surigaonon na may 81-96 shared cognates percentage. 2) Natunghayan na may kabuuang 95 na barayti ng mga salita ang nabuo batay sa pagpapangkat-pangkat ng mga isogloss. Nakapagtala rin ang ilang mga barangay ng mahigit sa isang bilang ng mga leksikal aytem na masusuring doon lamang matatagpuan sa nasabing. At 3) May mga pormang cognate at hindi cognate naman ang nabuo. Sa mga cognate, paglilipatdiin sa isang salita, pagkakaltas na ponema, nagkakaroon ng pagkakaiba sa isang patinig at katinig. Napatunayan sa pag-aaral na ito na bagaman nagkaroon ng leksikal na varyasyon dulot ng heograpikong lokasyon ay nagkakaroon pa rin ng mutwal na pagkakaunawaan ang mga Surigaonon sa Claver, Surigao del Norte.

Recommendations

Batay sa mga natuklasan sa pagsusuri na ito, inirerekomenda ang mga sumusunod:

1. Para sa linguist, inirerekomendang pag-aralan ang mga dayalekto sa Claver, Surigao del Norte gamit ang iba pang antas na batayan sa pag-aaral ng dayalektolohiya.
2. Para sa mga mananaliksik, minarapat na pag-aralan pa ang mga dayalektal na varyasyon ng Surigaonon-Clavernon na may tuon polohikal na batayan ng dayalektolohiya sa pamamagitan ng mga karagdagang saklaw ng lugar at bilang ng impormante.
3. Para sa mga guro ng MTB-MLE sa Munisipalidad ng Claver, minarapat na tangkilikin at pag-aralan nang mabuti ang dayalektong Surigaonon bilang midyum sa pagtuturo ng mga mag-aaral sa kindergartin hanggang baitang 3.

Compliance with Ethical Standards

Ang mga mananaliksik ay tiyak na sumunod sa mga alituntunin at pamantayan sa pagsasagawa ng kanyang pananaliksik. Isang linggo ang araw na iginugol ng mananaliksik sa pangangalap ng datos. Nagsagawa rin ng sistematikong hakbang ang mga mananaliksik para maging maayos ang pangonglekta ng datos sa panahon ng fildwork. Una, pagpunta sa Opisina ng Municipal Planning & Development Office. Humingi ng pahintulot ang mananaliksik sa pamunuan ng MPDO (Municipal Planning and Development Office) para malaman ang kabuuang populasyon ng Surigaonong ispiker sa 14 na barangay ng Munisipalidad ng Claver na sakop ng pag-aaral na ito. Pangalawa, paghingi ng Pahintulot sa Barangay Kapitan ng 14 na Barangay. Sumulat ng liham ang mananaliksik sa Barangay Kapitan ng mga barangay na sakop ng pag-aaral na ito upang humingi ng pahintulot para makakuha ng datos. Ipinaliwag din ng mananaliksik ang layunin ng pag-aaral maging ang krayterya sa pagpili ng dalawang impormante sa bawat barangay. Pangatlo, pagbisita sa bawat Barangay. Pinuntahan ng mga mananaliksik ang lugar at ipinasalin ang (200) leksikal aytem sa mga piling impormante ayon sa kanilang wikang sinasalita. Isinailalim ang pananaliksik sa pagsusuri ng Research Ethics Committee ng paaralan upang tiyakin ang pagsunod sa mga alituntunin at maiwasan ang paglabag sa karapatan ng sinuman. Inilahad din ang pananaliksik sa plagiarism checker upang matiyak ang orihinalidad nito. Sumunod rin ang pananaliksik sa Data Privacy Act of 2012 para sa proteksyon laban sa hindi kanais-nais na publisidad.

Acknowledgments

Unang-una, lubos po kaming nagpapasalamat sa Panginoong Maykapal sa lahat ng biyaya na ipinagkaloob sa amin lalo na sa pananaliksik na aming isinagawa. Nagpapasasalamat din po ang mga mananaliksik sa mga sumusunod na indibidwal na malaki ang naging bahagi sa pag- aaral sa pamamagitan ng kanilang tulong, kontribusyon, at suporta upang maging matagumpay ang nasabing pag-aaral. Taos-pusong pasasalamat ang aming ipinaaabot sa lahat ng indibidwal, grupo ng indibidwal at maging mga tanggapan na naging bahagi ng tagumpay ng pag-aaral na ito. Si Gng. Geraldine Serdan na gumabay, tumulong, at nagbahagi ng kaalaman upang maging matagumpay ang pananaliksik na ito. Ang lahat ng ito ay may malaking parte sa likod ng pagkakabuo at tagumpay ng pamanahong papel na ito na kung hindi dahil sa inyo ay hindi naming ito magagawa at matatapos ng maayos sa loob lamang ng maikling panahon. Sa tagapayo na si G. Denzel Mark A. Ciruela, para sa paggabay at supportang ibinigay sa mga mananaliksik upang maipagpatuloy at matapo ang isinagawang pag-aaral.

DEVELOPING THE READING LEVEL OF GRADE THREE NON-READERS THROUGH PROJECT GRP (Guided Reading Procedure)

Darwin F. Tabernilla

Candelaria Elementary School – Main, Candelaria, Quezon Province, Philippines

https://doi.org/10.5281/zenodo.11767812

ABSTRACT

The study dealt with the developing of the reading level of Grade Three Non-Readers by using the Project GRP (Guided Reading Procedure). It was quantitative-descriptive research conducted at Candelaria Elementary School-Main, specifically within the Grade 3 Faith learners, using a purposive sampling technique. The study aimed to assess the impact of the Guided Reading Procedure on non-reader learners and how it affected the classroom's standing in the reading program. To gather data in the acceptability level, a survey-questionnaire (self-made) was used, and data was collected in March 2023 using Google Forms. The data was presented in tabular form and analyzed using the Likert Scale. A conference with the parents and guardians of the non-reader learners was conducted, which resulted in a memorandum of understanding regarding the implementation of the program. This suggests that there was a collaborative effort to support the learners in their reading journey. The results showed progress among the non-reader learners through everyday reading monitoring and progress checks. However, the study faced challenges with absenteeism among the participants, which hindered the full implementation of the program. Despite this issue, seven learners managed to complete the program and demonstrated progress in their reading level, transitioning from non-readers to slow readers. This indicates that using a suitable reading material or program can be effective in improving the reading level of learners. In summary, the study showcased the positive impact of the Guided Reading Procedure in improving reading level among Grade Three Faith Non-Readers. It also highlighted the importance of addressing absenteeism to ensure the successful implementation of such reading interventions.

Keywords: *Guided-Reading Procedure, Non-readers, absenteeism*

INTRODUCTION

The global pandemic brought deprivation to learners' opportunity to develop their reading comprehension skills. The lack of support and guidance from home; and teacher-presence in the reading program, and access to internet during the two-year battle hindered the reading progress.

The future success of children lies in the ability to read fluently and understand what is read. Studies show that at least one out of five students significantly have difficulty in reading acquisition (Therrien, 2004). It can now be inferred that difficulty and the child's struggle in reading, to some extent, is an indication of an underlying learning disability. Basically, the problems are related to several varying factors exclusively related to reading. Usually, learners are not phonemically aware, failing to grasp the alphabetic principle and then applying these skills in a rapid and fluent manner and somehow relate reading to their own simple experiences (Belbes et al, 2022).

According to Mays (2008), many minority children are labeled as "at-risk," "developmentally delayed," and "not ready to learn" according to academic achievement in U.S. public schools today. As the minority population in the United States continues to grow, the rapidly increasing epidemic of students left behind academically is a concern for early childhood educators nationwide. According to Carter (2008), the term "at-risk" primarily refers to those students from families and communities with limited resources and correspondingly low educational outcomes. That is, at-risk students are those who are most likely to fail or drop out of school due to the challenges of poverty, broken homes, violence, limited English language proficiency, and other disadvantages in their family and community contexts. Furthermore, because the associations among race, ethnicity, and low academic performance and/or school failure are positive, the term "at risk" has become increasingly code or synonymous with low-income (or poor) and racial and ethnic minority students. Additionally, although "at risk" mainly pertains to class, ethnicity, gender, language skills, race, and academic achievement; however, many other classifications of students could be assigned to the at-risk category such as alcohol- and drug-dependent youth; physically and learning-disabled students; rural students; and students with mental health conditions.

With this matter, learners with problem in the phonemic awareness cause numerous non-readers to be remediate right away. The result of this study will help both the learners and the school to have zero non-readers, at the very least lessen its number. Reading is core to academic progress, because it underpins content-area learning in all subjects.

Researcher Küçükoğlu (2013), has found that teaching reading strategies is a key element in developing student comprehension. However, many teachers lack a solid foundation for teaching these reading comprehension strategies. Therefore, teachers need to be prepared on how to design effective comprehension strategies and how to

teach these strategies to their students. Therefore, this study aims to study the effective reading strategies in order to improve reading skills in language classes.

Upon coping up with the pandemic situation, schools give way to focus on the reading skills of the learners through various reading program, interventions, and remediations. Despite of the efforts, still a high number of non-readers were reported among grade three learners especially in the Grade Three Faith Section.

In the study of Davis et al, (2016), stated that adjustment means the act or process of changing or adjusting something or the cognitive flexibility of the teacher to respond to non-readers.

Strategies are high level plan to achieve one or more goals under conditions of uncertainty or simply the skill of making or carrying out plans to achieve a goal.

Students needed to be trained or guided on the use of different reading strategies so that they would know how to apply these strategies for successful comprehension of academic materials. Teachers will require the skills in order to teach reading strategies that will assist learners in understanding and applying the appropriate strategies to become skilled readers.

Scaffolds refer to the temporary support that the teacher uses to help the learners reach higher levels of comprehension and skill acquisition that they would not be able to achieve without assistance. Scaffolding refers to a variety of instructional techniques, which are used to move students progressively toward better understanding and, ultimately, greater independence in the learning process. This study endeavors to help novice reading teachers adjust their strategies in teaching nonreaders.

According to Adapon and Mangila (2020) education in the Philippines is hindered by poverty, technology, and lack of motivation and inspiration, especially reading education. Despite the socio-economic status, many Filipinos are unable to learn. Some families don’t have enough money to send their kids to school; thus, kids grow up without being able to read and write. Some families are marginally fortunate that they can send their children to a public school; however, their children are learning basic reading at a plodding pace as there are not enough teachers and up-to-date reading materials in this school.

Remedial reading program has been established for a long time in Philippine basic education system. As a matter of fact, Genero’s study (as cited in Gatcho & Bautista, 2019) disclosed how elementary and secondary schools of the country established their remedial reading programs to aid struggling readers. Principals should encourage their teachers to evaluate their learners’ reading levels so they could provide appropriate interventions for them. Even though remediation among struggling readers has been practiced for several decades, it has reached it optimum only through the Department of Education (DepEd) Order 45, series of 2002 – Reading Literacy Program in the Elementary Schools.

According to Kennedy (2010), provision of a multifaceted professional development program for teachers is essential in addressing underachievement in literacy. When professional development is customized rather than pre-packaged, takes place over an extended period of time, and supports use of a range of research-based approaches (including a strong, ongoing focus on student achievement), it can have a major impact on student achievement, motivation, and engagement. Additionally, it is important that teacher creativity and individuality is honored throughout the professional development. Teachers in the study valued the opportunity to design a literacy program that aligned with the research base, responded to the needs of students, and provided autonomy for them to respond in unique and personal ways to the pedagogical content strategies they had learned. A systematic, coherent, integrated, and cognitively challenging curriculum is especially important in a high-poverty context. The design of the balanced literacy framework allowed for the development of students' creativity and agency, capitalized on their interests, and offered them choice and control over activities.

Parental involvement is another important factor in encouraging literacy and building proficient readers. Parental involvement in children's education has long been believed to promote a range of academic outcomes, including higher achievement, greater engagement in schoolwork, and lower dropout rates (Park & Holloway, 2017).

Guided Reading is a school-based intervention to improve the literacy achievement in students. All students benefit when teachers use the Guided Reading instructional model. Guided Reading is a component of a balanced literacy program providing differentiated, small-group reading instruction to four to six students with similar strengths and instructional needs or to heterogeneously grouped students. This approach to reading instruction provides teachers the opportunity to explicitly teach children the skills and comprehension strategies students need, thus facilitating the acquisition of reading proficiency. Some of the benefits of using the Guided Reading instructional model include individualized instruction, the use of books at students' reading levels, the opportunity to create and sustain meaning, the exposure to language that is context embedded, the structured format of the lesson, and the systematic evaluation of students' progress (Avalos, Plasencia, Chavez, & Rascon, 2007).

Likewise, this study is also beneficial to them in strategic management, when they employ effective learning in the classroom. Thus, this study provides new perspectives in seeing teachers' needs in teaching nonreaders more effectively.

Research Questions

This research aimed to develop the reading level of Grade Three Faith non-readers through Project GRP (Guided Reading Procedure).

Specifically, it sought to answer the following:

1. What is the reading level of grade three non-reader pupils during pre-test?
2. What is the reading level of grade three non-reader pupils during post-test?
3. Is there any significant difference between the pre-test and post-test results of grade three non-readers in reading level?

4. What is the acceptability level of Project GRP in terms of:
   A. Teacher-Respondents
      a. Content
      b. Presentation
      c. Appropriateness in target users
   B. Learner-Respondents
      a. Content
      b. Presentation
      c. Appropriateness in target users

Hypothesis:

There is no significant difference in the MPS pre-test and post-test results of Grade Three Non-readers in reading level using Project GRP.

METHODOLOGY

A. Participants and/or other Sources of Data and Information

The study involved seven selected learners from Grade III-Faith of Candelaria Elementary School – Main for SY 2022-2023 who were identified as non-readers. The reading intervention was facilitated by the researcher himself and lasted for the whole quarter.

Furthermore, Primary Teachers were also involved in the study to validate the reading materials used in Project GRP. Their role was likely to review and ensure the appropriateness and effectiveness of the materials in helping the non-reader learners enhance their reading skills.

The use of purposive sampling technique indicates that the researcher deliberately selected the participants based on specific criteria, in this case, non-readers from Grade III-Faith. This approach allowed the researcher to focus on the target group most in need of reading intervention.

With these details, it's evident that the study had a well-defined approach to address the reading difficulties of non-reader learners. The combination of Project GRP and the involvement of primary teachers for material validation, contributed to the positive progress observed in the seven participating non-reader learners.

B. Data Gathering Methods

The data collection followed a systematic timeline to assess the effectiveness of the reading intervention (Project GRP) and validate the reading materials used.

Upon crafting the Project GRP reading material and the pre-test, it was validated by the primary teachers; and the result were gathered, collected, analyzed, and tabulated. Before implementing the reading intervention (Project GRP), a pre-test

was conducted. This pre-assessment likely measured the baseline reading level of the seven selected non-reader learners. It aimed to establish their starting point before receiving any intervention. After the pre-assessment, the reading intervention was facilitated by the researcher. During this period, the non-reader pupils received targeted instruction and support to improve their reading skills. Following the completion of the intervention, a post-test was conducted to measure the reading level of the non-reader pupils after they had received the intervention. This post-assessment allowed the researcher to evaluate the impact of Project GRP on the participants' reading level.

In parallel with the implementation of Project GRP, the primary teachers were involved in validating the reading materials used in the intervention. The validity of the materials was assessed to ensure that they were appropriate, effective, and aligned with the objectives of the study. The results of both the pre-assessment and post-assessment, as well as the findings from the material validity measurement, were gathered and tabulated. The data were then analyzed to determine the effectiveness of the reading intervention and the validity of the materials used.

By following this timeline and systematically collected and analyzed data, the study can provide valuable insights into the impact of Project GRP on developing the reading level of Grade III-Faith non-reader learners. It also ensured that the reading material used was reliable and valid for the target audience.

C. Data Analysis

It is evident that the researcher employed a quantitative-descriptive research approach. Specifically, a pre-experimental design was utilized to investigate the significant difference between the pre- and post-assessment results of 3rd grade pupils' reading level. Instead, the researcher focused on measuring the changes in the reading level of the seven selected 3rd grade learners before and after the intervention. By comparing the pre-assessment and post-assessment results, the researcher aimed to determine if there was a significant improvement in the learners' reading level as a result of the intervention. The study's quantitative nature allows for the use of statistical analyses to assess the significance of the differences observed in the pre- and post-assessment results, providing more objective evidence of the intervention's impact on the learners' reading level.

To determine the reading level of the respondents, the researcher adopted the computation of the Phil-IRI Reading Level.

Using the result of the pre- and post-test assessment, dependent t-test was used to analyze the significant difference of the two assessments.

For the validity of the material, weighted mean was used to determine its level of acceptability in terms of content, presentation, and appropriateness to target user.

Paired samples dependent t-test is used to accept the null hypothesis. Impression at 0.05 level of significance for one-tailed since the study used the same group of pupils on both pre- and post-reading assessment.

Data were gathered, tabulated, and analyzed accordingly. Tabular method was used in the presentation of numerical data and validity of the material.

RESULTS

Table 1
Reading Level of the Grade Three Faith during Pre-Test

Learners' Name	# of Miscues	Word Reading Level	# Words in the Pre-Test	Reading Level
Learner 1	45	49.438	89	FRUSTRATION
Learner 2	39	56.180	89	FRUSTRATION
Learner 3	55	38.202	89	FRUSTRATION
Learner 4	29	67.416	89	FRUSTRATION
Learner 5	47	47.191	89	FRUSTRATION
Learner 6	18	79.775	89	FRUSTRATION
Learner 7	21	76.404	89	FRUSTRATION

Table 2
Reading Level of the Grade Three Faith during Post-Test

Learners' Name	# of Miscues	Word Reading Level	# Words in the Pre-Test	Reading Level
Learner 1	11	87.640	89	FRUSTRATION
Learner 2	25	71.910	89	FRUSTRATION
Learner 3	32	64.045	89	FRUSTRATION
Learner 4	18	79.775	89	FRUSTRATION
Learner 5	33	62.921	89	FRUSTRATION
Learner 6	15	83.146	89	FRUSTRATION
Learner 7	17	80.899	89	FRUSTRATION

Table 3
Comparison of the Pre-Test and Post-Test Mean Scores of the Respondents after Using the Material

	MEAN	SD	MEAN DIFFERENCE	DIFFERENCE	COMPUTED VALUE	TABULAR VALUE	INTERPRETATION
PRE-TEST	11.714	2.119	14.429	0	**6.975**	2.00	**SIGNIFICANT**
POST-TEST	26.143	5.986

DISCUSSION

Table 1 showed that all of the respondents fall under the Frustration Reading Level during the Pre-test Assessment. Learner 6 has the least number of misread words during the pre-test while Learners 1, 3, and 5 got the highest number of misread with 45, 55, and 47 respectively.

Table 2 showed that the respondents were fall under the Frustration Reading Level after using the validated Project GRP reading material. On the other hand, the respondents were remained in the Frustration Reading Level after using the reading material. Hence, it showed a drop down in the number of miscues and increase their word reading level.

Table 3 presents the summary of values for testing the significant difference between the pre-test and post-test scores of the respondents.

Among the seven respondents, the mean of the obtained pre-test scores is 11.714 with a standard deviation of 2.119 and the mean of the post-test scores is 26.143 with a standard deviation of 5.986, respectively resulting to a mean difference of 14.429.

There is a notable difference in the standard deviation of pre- and post-test. The standard deviation of post-test is higher than of the pre-test. When subjected to t-test, it garnered a t-value of 6.975 which is higher than the tabular value of 2.00 at 0.05 level of significance. Thus, the hypothesis which states that there is a significant difference between the scores of the learners in the pre- and post-test before and after the use of the Project GRP reading material is approved.

Table 4.1.1 shows the weighted mean distribution of the perceived level of acceptability of the Project GRP Reading Material in terms of content. The evaluators evaluated the content with five statements with the following weighted mean – statement 1 got 3.567, statement 2 got 3.500, statement 3 had 3.467, statement 4 received 3.633 and statement 5 got 3.600 with a remark of highly acceptable (statements 1, 4 and 5) and acceptable for statements 2 and 3.

Over-all, the Project GRP Reading Material in terms of content got an average weighted mean of 3.553 that falls on highly acceptable remark.

Poor reading level among children and youth is an ongoing concern. Data show stagnant performance in reading achievement over the past decades only about one-third of fourth-graders exhibiting proficient reading skills (Snyder, De Brey, & Dillow, 2016). Low reading achievement is associated with adversities in several areas, including educational progress, employment opportunities, and health outcomes (Ritchie & Bates, 2013).

Absolutely, teaching reading strategies to students is crucial for their successful comprehension of academic materials. When students are trained or guided in using different reading strategies, they become equipped with the necessary tools to understand and engage with various texts effectively.

Teachers play a vital role in this process as they need to be skilled in teaching these reading strategies effectively. Professional development and ongoing training for teachers are essential to equip them with the necessary skills and knowledge to instruct students in reading strategies. Teachers should model the use of these strategies and provide ample opportunities for students to practice and apply them independently.

By integrating reading strategies instruction into the curriculum, educators can foster a classroom environment where students become skilled readers capable of comprehending and analyzing a wide range of academic materials. This, in turn, will have a positive impact on their overall academic performance and success.

Table 4.1.2 shows the weighted mean distribution of the perceived level of acceptability of the Project GRP Reading Material in terms of presentation. The evaluators evaluated the presentation with six statements with the following weighted mean – statement 1 got 3.400, statement 2 got 3.567, statement 3 had 3.633, statement 4 received 3.500, statement 5 got 3.600 and statement 6 got 3.533 with a remark of highly acceptable (statements 2, 3, 5 and 6) and acceptable for statements 1 and 4. Over-all, the Project GRP Reading Material in terms of presentation got an average weighted mean of 3.539 that falls on highly acceptable remark.

There are lots of strategies for improving the reading skills of a learner. As cited in Pourhosein & Sabouri (2016), the following are some of the effective ways: activating and using background knowledge; generating and asking questions; making inferences; predicting; summarizing; visualizing; and comprehension monitoring.

In response to the pupils' poor reading skills, the Department of Education issued DepEd Memorandum No. 173, s. 2019 to make every learner a proficient reader where schools across the country are tasked to develop their reading skills. There is a need to strengthen every learner's reading proficiency and nurture a culture of reading, which is a requisite skill in all content areas (Cabalo & Cabalo, 2019).

As important as foundational word-reading and bridging skills are to reading comprehension, research has shown that they are not sufficient for strong comprehension. For example, just because a reader can fluently read the words in "Not Just a Hole in the Ground" does not mean that the reader will glean from the article the characteristics of summer and winter woodchuck burrows. That understanding requires a broader range of knowledge, strategies, and dispositions (Duke, Ward, & Pearson, 2021).

Consistency in providing suitable reading materials is crucial in supporting learners' optimal learning and development, allowing them to progress at their own pace. Here are some reasons why consistency in reading materials is beneficial for learners.

Consistent reading materials ensure that learners receive a continuous and structured learning experience. This continuity helps build upon previously acquired knowledge and skills, fostering a deeper understanding of concepts over time. Regular exposure to consistent reading materials allows learners to practice and build fluency in reading. Familiarity with the format and content of the materials enables them to read with greater ease and speed. Consistency creates a sense of comfort and confidence in learners. When they know what to expect from the reading materials, they are more willing to engage with them and take ownership of their learning.

Providing consistent reading materials tailored to learners' needs and interests allows for personalized learning experiences. Learners can focus on topics and themes that resonate with them, which enhances their motivation and engagement. Repeated exposure to key concepts and vocabulary in consistent reading materials reinforces learning and aids in long-term retention. Consistency does not mean a one-size-fits-all approach. Educators can use a consistent framework while differentiating reading materials to accommodate learners' diverse needs and abilities. Using consistent reading materials makes it easier for educators to monitor learners' progress effectively. They can assess how learners are mastering concepts and skills over time. Consistent exposure to reading materials encourages learners to develop regular reading habits. As they become accustomed to engaging with reading materials, they are more likely to pursue independent reading beyond the classroom.

Consistency allows educators to scaffold learning appropriately, gradually introducing more complex reading materials as learners advance their skills. Consistent reading materials streamline lesson planning for educators, allowing them to focus on instructional strategies and differentiation rather than constantly seeking new materials.

By maintaining consistency in the selection of reading materials, educators can create a stable and supportive learning environment that empowers learners to explore, grow, and succeed in their reading journey at their own pace. This approach fosters love for reading and lifelong learning in students, which is essential for their academic and personal development.

Table 4.1.3 shows the weighted mean distribution of the perceived level of acceptability of the Project GRP Reading Material in terms of appropriateness to the target users. The evaluators evaluated the presentation with six statements with the following weighted mean – statement 1 got 3.500, statement 2 got 3.600, statement 3 had 3.567, statement 4 received 3.533, statement 5 got 3.500 and statement 6 got 3.400 with a remark of highly acceptable (statements 2, 3 and 4) and acceptable for statements 1, 5 and 6. Over-all, the Project GRP Reading Material in terms of appropriateness to the target users got an average weighted mean of 3.517 that falls on highly acceptable remark.

In considering the science of reading, many researchers cite the National Reading Panel’s (National Institute of Child Health and Human Development, 2000) review and analysis of research related to reading instruction, which identified five key concepts in

reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. Although these “big five” are certainly important, and each has received attention in this piece, they do not represent an exhaustive list of contributors to reading that teachers should consider when designing literacy instruction. Scientific research has shown that motivation for reading is another important determinant of reading comprehension; one that we ignore at our peril.

Absolutely, presenting suited reading materials is essential in helping learners acquire the necessary knowledge and skills. When reading materials are appropriately selected, they cater to the learners' current level of comprehension, interests, and learning needs. This alignment ensures that learners can effectively engage with the material, which enhances their learning experience and outcomes.

When learners find the reading materials interesting and relevant to their lives, they are more likely to be motivated to read and learn from them. This engagement fosters a positive attitude towards reading and learning. Reading materials that match the learners' current reading abilities and background knowledge increase the chances of successful comprehension. Learners are more likely to understand and retain the information presented.

Suited reading materials allow learners to practice and apply the reading strategies they have been taught. This practice helps them develop their reading skills further. Success in comprehending suited reading materials boosts learners' confidence in their reading abilities. This confidence encourages them to tackle more challenging texts in the future. Providing reading materials that reflect the learners' culture, experiences, and backgrounds validates their identities and creates a more inclusive learning environment. Suited reading materials allow educators to differentiate instruction, catering to the diverse needs and abilities of individual learners within the classroom.

When learners can read and understand materials on their own, they become more independent learners, able to explore and acquire knowledge beyond the classroom setting. It is essential for educators to consider learners' proficiency levels, interests, and learning goals when selecting reading materials. This may involve using various texts, including fiction, non-fiction, poetry, and digital resources. Regularly assessing learners' progress and adjusting the materials accordingly ensure that they continue to receive appropriately suited content as they advance in their reading abilities.

Ultimately, providing suited reading materials is a foundational aspect of effective reading instruction, contributing significantly to learners' overall academic growth and lifelong learning journey.

Table 4.2.1 shows the weighted mean distribution of the perceived level of acceptability of the Project GRP Reading Material in terms of content. The pupil-respondents evaluated the content with the following weighted mean of 3.571, 3.714, 3.857, 4.000 and 4.000 respectively from the statements 1 to 5 with highly acceptable remarks on all the statements.

All five statements received weighted mean scores indicating "highly acceptable" levels of perceived acceptability from the pupil-respondents. Specifically, statements 4 and 5 garnered the highest ratings with a weighted mean of 4.000, suggesting strong approval and satisfaction regarding certain aspects or criteria of the reading material's content.

Based on the pupil-respondent’s evaluations, this average weighted mean of 3.829 falls within the "highly acceptable" range. This indicates that, collectively, the respondents view the content of the Project GRP Reading Material favorably, highlighting its quality, relevance, and effectiveness in meeting their instructional or learning needs.

In summary, the findings underscore a positive perception among pupil-respondents regarding the content of the Project GRP Reading Material. The consistently high weighted mean scores across all statements reflect a consensus of "high acceptability," affirming the material's overall quality and suitability from the perspective of those directly engaging with it.

Table 4.2.2 shows the weighted mean distribution of the perceived level of acceptability of the Project GRP Reading Material in terms of presentation. Statements 1, 3, 4, 5, and 6 received weighted mean scores indicating a "highly acceptable" level of perceived acceptability from the pupil-respondents. Specifically, these statements reflect strong approval and satisfaction concerning various aspects or criteria related to the presentation of the reading material. Statement 2 garnered a weighted mean score of 3.429, falling within the "acceptable" range. While this statement meets the basic acceptability criteria, it may suggest areas for potential improvement or refinement in the presentation aspect evaluated.

Considering the collective evaluations across all statements, the Project GRP Reading Material achieved an average weighted mean score of 3.690 in terms of presentation. The cumulative weighted mean of 3.690 positions the reading material within the "highly acceptable" category. This indicates a favorable perception among pupil-respondents regarding the overall quality, effectiveness, and appeal of the reading material's presentation.

In summary, the findings from Table 4.2.2 highlight a predominantly positive perception among pupil-respondents concerning the presentation of the Project GRP Reading Material. While most statements received ratings of "highly acceptable," the material demonstrates strong alignment with respondents' expectations and needs. However, targeted attention to areas with "acceptable" ratings could further enhance the presentation's effectiveness and overall acceptability among users.

Table 4.2.3 shows the weighted mean distribution of the perceived level of acceptability of the Project GRP Reading Material in terms of appropriateness to the target users. The pupil-respondents evaluated the presentation with five statements with the following weighted mean – statement 1 and 3 got 3.714, statement 2 and 5 got 3.857, while statement 4 received 4.000.

The majority of the statements, specifically statements 1, 3, 4, and 5, received weighted mean scores indicating a "highly acceptable" level of perceived appropriateness for the target users. These ratings suggest that the respondents find these aspects of the reading material well-suited, relevant, and aligned with the needs and preferences of the intended audience.

Statement 4 stands out with a weighted mean score of 4.000, indicating an exceptionally high level of appropriateness as perceived by the pupil-respondents. This suggests that this particular aspect or criterion of the reading material resonates strongly with the target users, meeting or exceeding their expectations and requirements.

Aggregating the evaluations across all statements, the Project GRP Reading Material achieved an average weighted mean score of 3.829 concerning its appropriateness to the target users. With an average weighted mean of 3.829, the reading material falls within the "highly acceptable" category regarding its appropriateness for the intended users. This indicates a strong alignment between the material's design, content, and presentation and the preferences, needs, and expectations of the target audience, as perceived by the pupil-respondents.

In summary, Table 4.2.3's findings underscore a predominantly positive perception among pupil-respondents regarding the Project GRP Reading Material's appropriateness for its target users. The consistently high weighted mean scores across most statements reflect a consensus of "high acceptability," highlighting the material's relevance, effectiveness, and suitability for its intended audience.

Conclusions

In light of this research, which aimed to develop the reading level of Grade Three Faith non-readers through Project GRP (Guided Reading Procedure), the following conclusions were made after the study.

1. The researcher used a suited reading material for the grade three non-readers addressing the learner’s problem in reading skills. Though the result showed that majority of the learners tested were on the frustration level before and after using the Project GRP, it was evident that there was a progress in their reading skills. The lessen numbers of miscues before and after using the reading material were also marked as their progress.
2. There is a significant difference between the pre-test and post-test results of grade three non-readers in reading level.
3. The validated reading material made by the researcher were coherently addressed the gap in reading among the grade three non-readers. The continuation of the reading content from sounds to stories valued the reading habit among the respondents (both the teacher-validators and learner-validators) which showed the Tables 4.1.1 to 4.2.3 with a remark of highly acceptable.

Recommendations

To make the study more effective and authentic, the following recommendations are proposed:

1. To enhance the generalizability of the findings, increase the number of participants involved in the study. Include a control group that does not receive the Project GRP intervention. This will help the comparing the effectiveness of the information more accurately and ruling out the factors that might influence the learners' reading level.
2. Provide professional development for teachers on the implementation of the Project GRP to ensure consistency and effectiveness in its delivery. The collection and analyzation feedback from teachers can strengthen the usability and impact of the reading materials and intervention. Also, the involve of the parents in the reading intervention process by providing them with strategies and resources to support their children's reading development at home. can influence reading practices on students' progress to understand the holistic impact of the intervention.
3. Gather feedback from students about their experiences and perceptions of the reading intervention to identify areas for improvement and use these feedbacks to make iterative improvements to the Project GRP, ensuring that it remains responsive to the needs of the learners.

Acknowledgments

The researcher wishes to extend his heartfelt appreciation to the following individuals who exerted effort for the success and completion of this action research:

Mrs. Jasmine V. Laguador, School Principal III and CES Main Master Teachers for patiently giving guidance, technical assistance, and giving constructive comments and suggestions for the improvement of the study;

CES Main Primary Teachers who served as the evaluators of the Project GRP Reading Material to determine its level of acceptability;

Grade Three Teachers for the moral support, guidance, effort, and exemplar collaboration to finish and conduct the Guided Reading Procedure;

Grade Three Faith learners for their time and effort as the main respondents in the study;

School and District Research Committees for the effort, guidance, and support to take a leap in research and to address problems;

Dr. Ma. Theresa Fornel, Sir Argel Gonzales, Ms. Edelie Gucon, for their time, expertise, knowledge and efforts who served as the school's resource speakers during In-SEARCH 1.0;

Mr. Dante, Mrs. Aida, and Ms. Anadeth Tabernilla, for their love and moral support to make this study possible;

And above all, Lord Almighty, the source of wisdom, strength and overflowing blessings needed in the completion of his study, the one who never missed to take care of His beloved children, to You be the glory, honor, power and all praises.

ABSTRACT

This study aimed to design, develop, test, and evaluate a Modular Integrated Amplifier Simulator for use in electronics education. The simulator was developed using a developmental and descriptive research approach, following a systematic process of planning, design, assembly, testing, and validation. It consisted of various modules, including a power supply, pre-amplifier, tone control, 5-band graphic equalizer, and channel 1 and 2 power amplifiers. The construction and wiring procedures were detailed, and a comprehensive user's manual was created. The performance of the simulator was evaluated in terms of its ability to simulate various troubles, as well as the activities and features it offered. Additionally, the acceptability of the simulator and user's manual was assessed by students, faculty, and experts using a 5-point Likert scale. Results showed that the simulator was rated very highly in terms of design, construction, functionality, durability, safety, and instructional applicability. The user's manual was also well-received for its comprehensibility, suitability, and ease of use. No significant differences were found in the acceptability ratings across the different respondent groups. The study concludes that the Modular Integrated Amplifier Simulator is an effective and reliable educational tool that enhances the learning experience for electronics students. Recommendations include pursuing intellectual property protection and further enhancing the simulator based on user feedback.

INTRODUCTION

In the field of teacher education, particularly within electronics courses, the use of instructional materials such as laboratory equipment and activity manuals is essential. Practical tasks are crucial for achieving effective and meaningful teaching and learning experiences, as laboratory facilities enhance and simplify these processes. Instructional materials, whether created or purchased, facilitate the transmission of organized knowledge, skills, and attitudes to students. By visually representing the material covered in class, these teaching aids make learning more tangible and effective. The sequence in which students interact with these resources significantly impacts their ability to complete activities successfully. Therefore, instructional materials are vital for improving the understanding and retention of factual knowledge by providing a realistic experience.

State universities and colleges (SUCs) in the Philippines face several challenges, with the lack of instructional resources being a primary concern. Many SUCs have expressed a need to upgrade their infrastructure and equipment. According to a survey by the Japan International Cooperation Agency (2015), 41 out of 52 SUC respondents (79%) indicated a desire to build and upgrade their facilities and equipment. This issue is also prevalent in the Department of Education, where secondary school teachers often lack available instructional materials, hindering the quality of education. Addressing this issue is crucial for enhancing the overall learning experience and outcomes for students in the Philippines.

In a study by Cayabas and Sumeg-ang (2023), teachers reported challenges in designing educational materials. Despite these challenges, they recognized the invaluable role of these materials in facilitating successful teaching and encouraging meaningful learning experiences. Teachers in the Philippines rely on instructional materials to aid in transferring knowledge, skills, and attitudes to their students. The effectiveness of the teaching and learning process heavily depends on how well these materials are utilized in the classroom. Therefore, these teaching materials must be well-developed and aligned with class objectives to maximize their impact and improve student performance. The use of instructional materials also encourages students to study independently. However, due to a lack of resources, some teachers may forgo using instructional materials. The Department of Education has implemented policies mandating that teachers adapt their lesson plans to the needs of the teaching and learning process.

Vocational secondary schools require instructional materials such as mock-ups and simulators to help students understand and visualize the concepts being taught. Teaching would be more productive with instructional materials that students can see and experience through hands-on training. Integrating trainer mock-ups into the educational system would likely involve collaboration between academic institutions and industry stakeholders. The government, through the Department of Education (DepEd) or the Commission on Higher Education (CHED), may provide guidelines on curriculum development that encourage practical, hands-on learning experiences.

The K–12 Basic Education Program (RA No. 10533, 2013) introduces curriculum modifications to better meet the needs of the contemporary world. This program upholds the constitutional mandate to establish, maintain, and support a complete, adequate, and integrated system of education relevant to the needs of the people and society. Technology and Livelihood Education (TLE) is one of the disciplines that must be taught in grades 7 through 10 under the K–12 BEP framework. TLE focuses on providing students with practical skills and knowledge in various fields, preparing them for both further education and the workforce. TLE encompasses different learning areas, including Home Economics, Industrial Arts, Information and Communication Technology (ICT), and Agri-Fishery Arts. The primary goal of TLE is to develop practical skills applicable to real-world situations through hands-on activities, experiments, and projects.

Several vocational secondary schools in the City of Ilagan, such as the Isabela School of Arts and Trades – Main, San Antonio National-Agro-Industrial and Vocational High School, and San Rafael National and Vocational High School, offer technical-vocational courses with various specializations, including electronics technology.

The researcher, having completed a Bachelor of Technical Teacher Education (BTTE) with a major in Electronics Technology and currently a teacher at Isabela School of Arts and Trades Main Campus, identified a lack of instructional materials for electronics subjects. This initiative aims to enhance the quality of learning experiences, preparing students effectively for their future vocations. By developing these training tools, the researcher hopes to bridge the gap between theoretical knowledge and practical application in electronics. Providing students with hands-on learning opportunities will better equip them for success in their chosen careers.

In schools focusing on Industrial Education, teachers encounter critical challenges such as the need for appropriate and relevant laboratory equipment, apparatus, and trainers for laboratory classes. Teachers of various specializations must be resourceful and strategically committed to solving these problems to meet learners' training needs. Through the teacher's initiative and resourcefulness, a mock-up of training equipment will be crafted using local materials, making it cost-effective.

Developing a mock-up or simulator is believed to improve the teaching-learning process. This mock-up or trainer can provide laboratory activities for learners, enhancing their understanding of different principles in the electronics industry.

According to Mei et al. (2022), an integrated amplifier circuit is a vital component of any sound system, intended to be used as the final block in an integrated amplifier chain to increase the input signal to a level sufficient to drive loads. Amplifiers are widely used in electronic circuits to make an electronic signal larger without affecting the signal. Commonly, amplifiers are associated with audio devices like radios, CD players, or home stereos. An amplifier or electronic amplifier increases the power of a signal by modifying the output of the power supply to produce a stronger output signal compared to the input signal (Omar, Daud, & Rahman, 2020).

In the 21st century, digital signal processing and multimedia applications have further shaped the landscape of integrated amplifier simulators. Research by Wang and Liu (2015) explored the integration of digital amplifiers in training modules, showcasing the adaptability of these tools to contemporary technological trends. Despite advancements, challenges such as affordability, accessibility, and the need for continuous updates to keep pace with technological innovations remain pertinent in the ongoing development of integrated amplifiers for educational purposes (Brown & Clark, 2022).

Instructional materials play a crucial role in education by enhancing learning experiences. They provide visual aids, examples, and practical applications, promoting better understanding and retention of information. Well-designed materials cater to various learning styles, making lessons more accessible and engaging for students.

Sadiq and Zamir (2014) state that the expanding teacher planning program necessitates creating instructional materials, practical manuals, and designs that meet national market needs. According to Siudad and Aliazas (2022), individual differences in learning styles stem from strengths and preferences, with individuals responding differently to environmental, social, physical, psychological, and emotional stimuli (Carada et al., 2022).

The Philippines' constantly evolving educational environment has given rise to exciting new developments in teaching and learning. Teaching has become one of the most challenging professions in the modern era due to the need to adapt to these changes and stay relevant in the fifth industrial revolution. Teachers must lead 21st-century learners who are critical thinkers, creative, communicative, and collaborative (Gepilla, 2020).

Instructional resources are part of the curriculum enactment process, bridging the gap between the official and operational curriculum (Remillard & Heck, 2014). They refer to materials that help teachers with lesson instruction and play a crucial role in national education systems. To use instructional materials effectively, teachers must invest significant time and effort in developing a thorough understanding of the involved concepts. They must also ensure explicitness in teaching materials to communicate concepts effectively to students (Leong et al., 2019).

Dhakal (2020) emphasizes that instructional materials are necessary for incorporating into the teaching-learning process to help students benefit maximally from learning experiences. These materials include printed, graphic, objects, audiovisuals, boards, and local materials, among others. For instructional materials to be meaningful and effective, they must meet characteristics such as variety, economy, adaptability, and accuracy. They must be well-designed, instructionally recognized, address learners' needs, and be portable, durable, relevant, and economical. The language used should be simple, unambiguous, and communicative to all types of learners.

Olayinka (2016) highlights the importance of instructional materials in developing learners' intellectual abilities and achieving teaching and learning objectives. Students taught with instructional materials outperform those who are not. Furthermore, instructional materials can enhance student engagement and motivation, catering to different learning styles and preferences.

Ezeliora et al. (2021) found that incorporating instructional materials supports teaching and learning, contributing to improved academic performance and retention. Their study showed that students with access to well-designed instructional materials exhibited higher engagement and understanding of course material. This underscores the importance of utilizing various resources to enhance the overall learning experience for students.

John Dewey, an influential American philosopher, psychologist, and educational reformer, is closely associated with the concept of "learning by doing." His theories on education and social reform, known as the "John Dewey Theory," advocate for experiential learning, which emphasizes active engagement with the material over passive listening or memorization. Dewey also promoted progressive questioning and dialogue methods to enable more meaningful classroom exchanges. Aligned with Dewey's educational theory, this study aimed to develop a mock-up or trainer to allow learners to broaden their knowledge and experience.

Research Questions

This research aimed to design, develop, test, and evaluate the Integrated Amplifier Simulator. Specifically, the study sought answers to the following questions:

1. What is the process of designing and developing the proposed integrated amplifier simulator in terms of:
    a. physical, structure, and components;
    b. circuit and wiring installation; and
    c. user’s manual.
2. What is the performance of the integrated amplifier simulator in terms of:
    a. troubles;
    b. activities; and
    c. features.
3. What is the level of acceptability of the proposed integrated amplifier simulator in terms of:
    a. design and construction,
    b. functionality,
    c. durability,
    d. safety, and
    e. instructional applicability.
4. What is the level of acceptability of the developed user’s manual in terms of:
    a. comprehensibility;
    b. suitability; and

c. ease of use.

5. Is there a significant difference in the general level of acceptability of the developed integrated amplifier simulator as perceived by the:
   a. students;
   b. faculty members; and
   c. experts?
6. Is there a significant difference in the general level of acceptability of the developed user's manual as perceived by the;
   a. faculty members; and
   b. experts?
7. What are the comments and suggestions offered by the respondents for the improvement of the developed integrated amplifier simulator?

METHODOLOGY

Research Design

The Integrated Amplifier Simulator at Isabela School of Arts and Trades - Main was developed using a developmental and descriptive research approach. This study methodically adhered to steps such as planning, design, assembly/processing, testing, and validation in the development of the trainer. The technical enhancement was implemented through revisions based on experimental results observed and documented before, during, and following the construction phase of the trainer.

Materials and Methods

A. Development of the Trainer

Following a certain construction procedure based on the project design led to the development of instructional materials/simulators. Thus, listed below is the procedure to be done as follows:

1. Project Design

With the use of block diagrams, the technical design of the project is illustrated below.

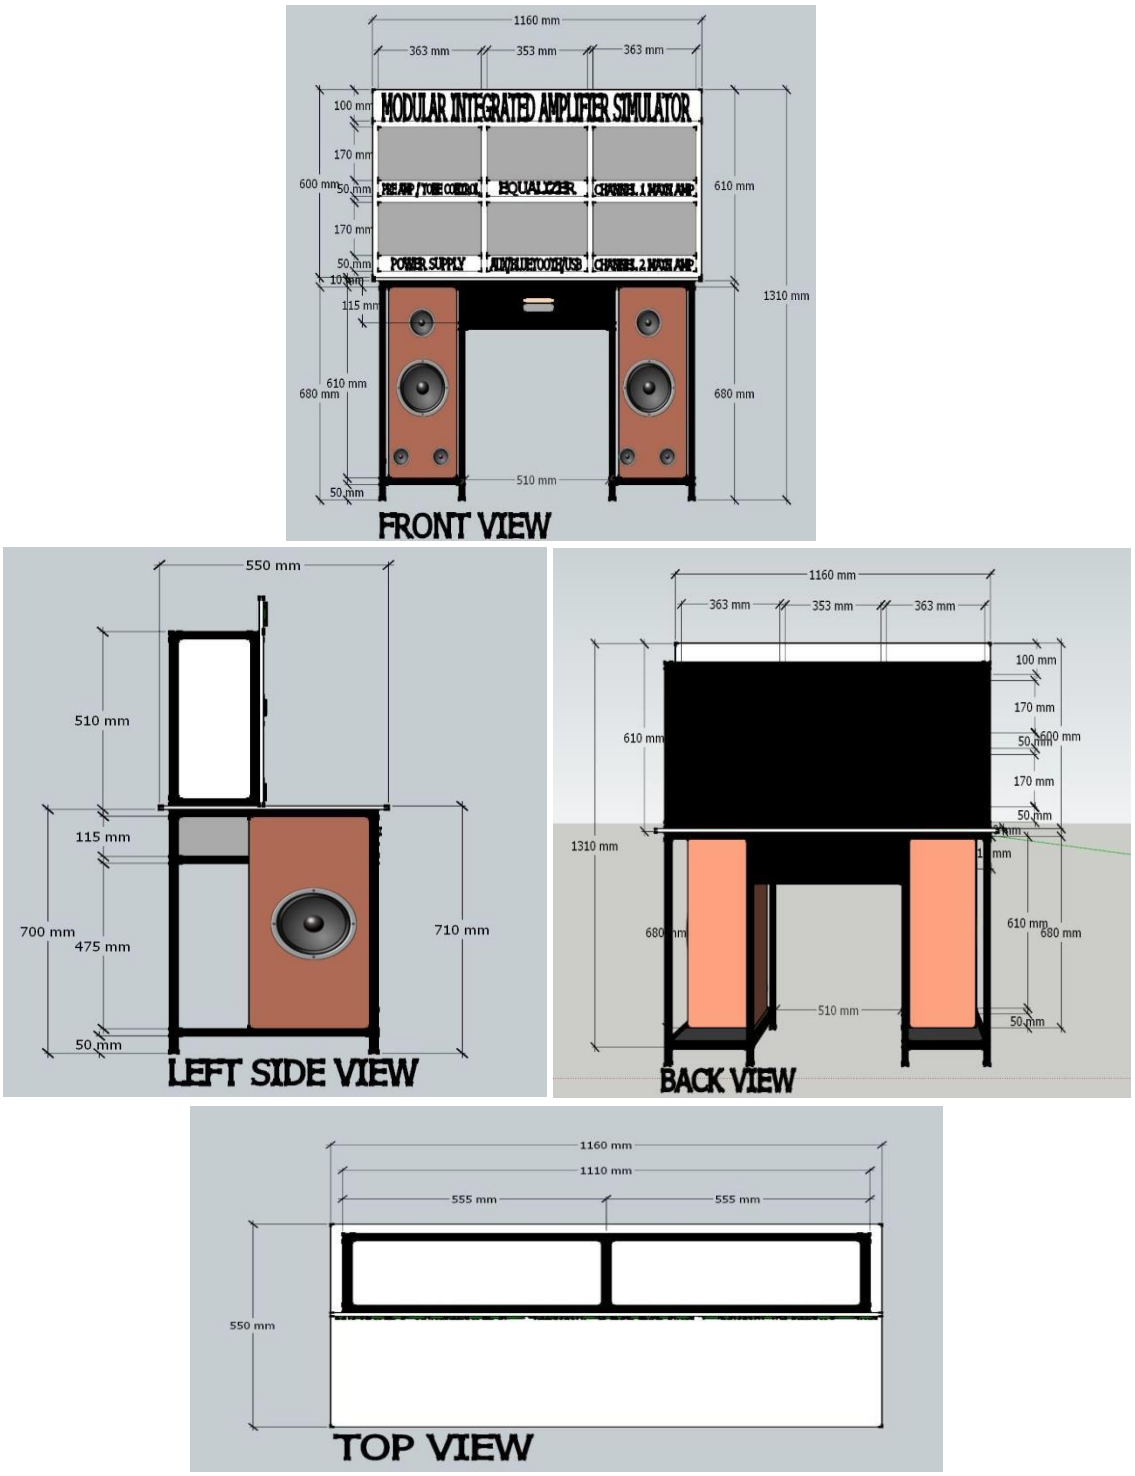

Figure 1. Design of the Proposed Projec

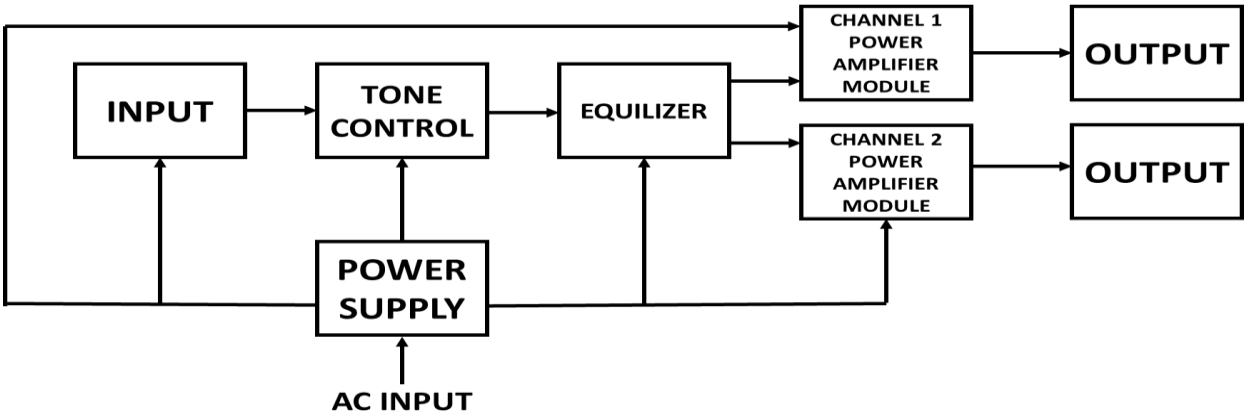

Figure 2. Block Diagram of the trainer which shows the project's composition, main sections, and connections.

2. Construction Procedure

The following are the proposed step-by-step procedures for the fabrication of the Modular Integrated Amplifier Simulator:

a. Prepare the materials needed in constructing the trainer.
b. Identify the voltage test points.
c. Assemble the casing of the simulator.
d. Mount the components to the casing.
e. Bore holes for the terminal connections of component and device components for the activity board.
f. Mount and solder terminals of the different stages/sections.
g. Label different sections/stages of the trainer with stickers on the board based on the layout design of the simulator panel
h. Test and record technical results subject to modifications and revisions if needed.

a. Constructing the tour case

The researcher will be in charge of assembling the project's Tour case based on the specified design, provided that the necessary tools and equipment are available.

b. Testing Procedures

The trainer underwent several tests and modifications before, during, and after the construction period. The results and observed technical faults were improved to ensure the system's performance and usefulness.

A. Bills of Supplies and Materials

Quality	Unit	Description	Unit Cost	Total Cost
1	Pc	Plywood ¾	250.00	250.00
3	Pcs	Epoxy Primer	200.00	600.00
3	Pcs	Cutting Disc	25.00	75.00
4	Pcs	Tubular 1X1X1.5	375.00	1,500.00
1	Pc	Plain Sheet Metal 1.2mm	1,600.00	1,600.00
1	Pc	Plain Sheet Metal 0.5mm	330.00	330.00
1	Box	Rivet	200.00	200.00
2	Pcs	7372 Blank Amplifier Module	210.00	420.00
2	Pcs	Equalizer	320.00	640.00
1	Pc	Toroidal Transformer 733	1,500.00	1,500.00
10	Pcs	Transistor/A1941-C5198	140.00	1.400.00
2	Pcs	Electrolytic Capacitor 10,000uf/63v	200.00	400.00
1	Pc	Pre-Amplifier Tone Control Module	300.00	300.00
50	Pcs	Banana Jack Male	20.00	1,000.00
50	Pcs	Banana Jack Female	18.00	900.00
1	Pc	Bluetooth Speaker	300.00	300.00
2	Pcs	Speaker D8 400watts	1,250.00	2,500.00
2	Pcs	Mid-Range Speaker	300.00	600.00
2	Pcs	Tweeter	100.00	200.00
1	Pc	Speaker Protector	400.00	400.00
1	Pcs	Mylar Capacitor 104/250v	130.00	130.00
1	Pc	Transistor 1 Ampere	200.00	200.00
16	Pcs	Speaker Box Corner	25.00	400.00
6	Meters	Speaker wire	35.00	210.00

4	Pcs	Spray Paint Gray	125.00	500.00
3	Pcs	Spray Paint Black	125.00	375.00
4	Pcs	Spray Pain White	125.00	500.00
1	Liter	Boysen Quick Dry Enamel White	215.00	215.00
1	Pc	Formika Brown	700.00	700.00
1	Bottle	Rugby	110.00	110.00
Total Cost				**18,455.00**

Selection and Description of Respondents

Sixty (60) respondents were randomly selected from Technical Vocational Schools, Isabela State University – Ilagan Campus, TESDA-ISAT, and Electronic Shops.

RESPONDENTS	Number of Respondents
Faculty Members	
Technical Vocational School Electronics Teachers	**13**
Isabela State University – Ilagan Campus	**2**
Experts	
Technical Education and Skills Development Authority-ISAT	**1**
Electronic Shop/Technician	**9**
Electronic Students	
Junior High School Students	**35**
Total	**60**

Research Instrument

The employed instruments in the evaluations of the developed trainer and the user's manual. The instrument used for the developed trainer was an adaptation to the instruments used in the study of Dioso (2024) titled "Development and Evaluation of Hybrid Photovoltaic (Pv) Electrical System Modular Trainer", Angangan (2021) titled "Manually- Operated and PLC Ready Motor Control Trainer" and Bartolome (2019) titled "Development and Acceptability of Industrial Motor Control Trainer". The collected data

for the acceptability of the simulator were tallied and analyzed using the 5-point Likert Scale below:

A. Design and Construction

Weight	Mean Range	Qualitative Description
5	4.20 – 5.00	Very Good
4	3.40 – 4.19	Good
3	2.60 – 3.39	Moderately Good
2	1.80 – 2.59	Sometimes Good
1	1.00 – 1.79	Not at all Good

B. Functionality

Weight	Mean Range	Qualitative Description
5	4.20 – 5.00	Very Functional
4	3.40 – 4.19	Functional
3	2.60 – 3.39	Moderately Functional
2	1.80 – 2.59	Sometimes Functional
1	1.00 – 1.79	Not at all Functional

C. Durability

Weight	Mean Range	Qualitative Description
5	4.20 – 5.00	Very Durable
4	3.40 – 4.19	Durable
3	2.60 – 3.39	Fairly Durable
2	1.80 – 2.59	Least Durable
1	1.00 – 1.79	Not Durable

D. Safety

Weight	Mean Range	Qualitative Description
5	4.20 – 5.00	Very Safe
4	3.40 – 4.19	Safe
3	2.60 – 3.39	Fairly Safe
2	1.80 – 2.59	Least Safe
1	1.00 – 1.79	Not Safe

E. Instructional Applicability

Weight	Mean Range	Qualitative Description
5	4.20 – 5.00	Very Applicable
4	3.40 – 4.19	Applicable
3	2.60 – 3.39	Fairly Applicable
2	1.80 – 2.59	Least Applicable
1	1.00 – 1.79	Not Applicable

As for the evaluation of the developed user's manual, this instrument was adapted to instruments used in the study of Makabenta G G. (2019) Learning Module for improved performance in Physics of Senior High School students. The collected data for the acceptability of the user's manual will be tallied and analyzed using the 5-point Likert Scale below:

A. Comprehensibility

Weight	Mean Range	Qualitative Description
5	4.20 – 5.00	Strongly Agree
4	3.40 – 4.19	Agree
3	2.60 – 3.39	Moderately Agree
2	1.80 – 2.59	Disagree
1	1.00 – 1.79	Strongly Disagree

B. Suitability

Weight	Mean Range	Qualitative Description
5	4.20 – 5.00	Strong Agree
4	3.40 – 4.19	Agree
3	2.60 – 3.39	Moderate Agree
2	1.80 – 2.59	Disagree
1	1.00 – 1.79	Strongly Disagree

C. Ease of Use

Weight	Mean Range	Qualitative Description
5	4.20 – 5.00	Strong Agree
4	3.40 – 4.19	Agree
3	2.60 – 3.39	Moderate Agree
2	1.80 – 2.59	Disagree
1	1.00 – 1.79	Strongly Disagree

Data Gathering Procedure

A. Technical Performance

The data on technical performance were gathered through physical structure and components, circuit and wiring installation, troubles, and features with time duration during the operation of the trainer. Further data on simulated faults were recorded through actual simulation of troubles and simultaneous observation.

B. Acceptability

The permission to conduct the study via technical performance evaluation was obtained from the respondents. After permission was granted, the questionnaire was administered. The researcher personally discussed with the evaluators how to answer the questionnaires. Then, the researcher retrieved the completed questionnaires. The Likert scale was employed to describe the evaluation. The acceptability of the developed user's manual was evaluated in terms of comprehensibility, suitability, and ease of use.

Research Locale

The research was conducted at selected Technical Vocational Schools, Isabela State University – Ilagan Campus, TESDA-ISAT, and Electronic Shop/Technicians in the City of Ilagan.

RESULTS AND DISCUSSION

1. Project Design and Development

a. *Description of the Physical Structure and Components of the Integrated Amplifier Simulator*

Panel board of the simulator. This is where the module of the integrated amplifier is located. The panel board includes a Pre-amplifier, Tone Control, Power Supply, 5-band Graphic Equalizer, Channel 1 and 2 Power Amplifier Module, and Bluetooth.

Pre-amplifier and tone control module. A pre-amplifier is a virtual representation of the circuit that processes low-level audio signals before they are amplified to a higher power level by the power amplifier section. The pre-amplifier includes components such as a resistor, capacitor, and transistor. The tone control allows users to adjust the balance of different frequency ranges (typically bass, midrange, and low) to shape the sound according to their preferences.

Power supply module. The power supply is a critical component that provides the necessary electrical power for the amplifier to function. It is composed of the following components namely: Transformer, Rectifier diode, Filter capacitor, Voltage regulator, and

Fuse. These components work together to convert the incoming AC power into a stable DC voltage that can be used by the amplifier. The power supply module ensures that the amplifier receives consistent and clean power for optimal performance.

A **5-band graphic equalizer** is a tool that allows users to adjust the amplitude of specific frequency bands, providing fine-tuned control over the audio signal's frequency response. The equalizer splits the audio spectrum into five distinct bands, each centered around a specific frequency. Typical frequencies for a 5-band graphic equalizer are 100 Hz(Bass), 350 Hz (Low Midrange), 1 kHz (Midrange), 3.5 kHz (Upper Midrange), and 10 kHz (Treble). This can be useful for correcting any imbalances in the sound output or enhancing certain frequencies to achieve a desired audio effect. Users can customize the equalizer settings to suit their preferences and optimize the listening experience.

The channel 1 and 2 power amplifiers are the final amplification stage that boosts the audio signal to a level capable of driving speakers. It includes comprehensive simulations of the input stage, voltage amplification stage, driver stage, and output stage, with real-time feedback on performance metrics such as distortion, frequency response, and efficiency. The channel 1 and 2 power amplifier also allow for adjustments to be made to optimize the audio output for different speaker configurations or room acoustics. This ensures that the amplified signal is delivered accurately and efficiently to provide high-quality sound reproduction.

A Bluetooth is a device that combines the functions of an audio amplifier with Bluetooth wireless connectivity. This integration allows for seamless streaming of audio content from Bluetooth-enabled devices, such as smartphones, tablets, and computers, directly to the amplifier without the need for physical cables.

A speaker is used to simulate and analyze audio performance within an audio system. It allows for the testing of various components such as microphones, amplifiers, and speakers to ensure they are functioning properly. It also has working table for checking of components of simulator and it includes drawer where they can store the tools and materials.

B. Circuit and wiring installation

Procedures on how to connect the circuit to the different modules of the simulator

1. Connect Bluetooth output to pre-amplifier input using an RCA male plug.
2. From output of pre-amplifier, connect the pre-amplifier to 5 band graphic equalizer to input.
3. From the output of the 5-band graphic equalizer, connect the RCA plug to the input of channel 1 and channel 2 of the power amplifier.
4. From the power supply, connect Vcc+ output to Vcc+ input of channel 1 power amplifier and connect Vcc+ input channe1 to Vcc+ input of channel 2 power amplifier.

5. Connect the ground output of the power supply to the ground input of the channel 1 power amplifier and connect the ground input of channel 1 to the ground input of the channel 2 power amplifier.
6. Connect Vcc- output of power supply to Vcc- input of channel 1 power amplifier and connect Vcc- input channel 1 to Vcc- input of channel 2 power amplifier.
7. From the power supply, connect AC output 12v to AC input 12v of 5 band graphic equalizer.
8. From channel 1 of the power amplifier, connect the speaker output to speaker 1 input.
9. From channel 2 of the power amplifier, connect the speaker output to the speaker 2 input.
10. Turn on the simulator.

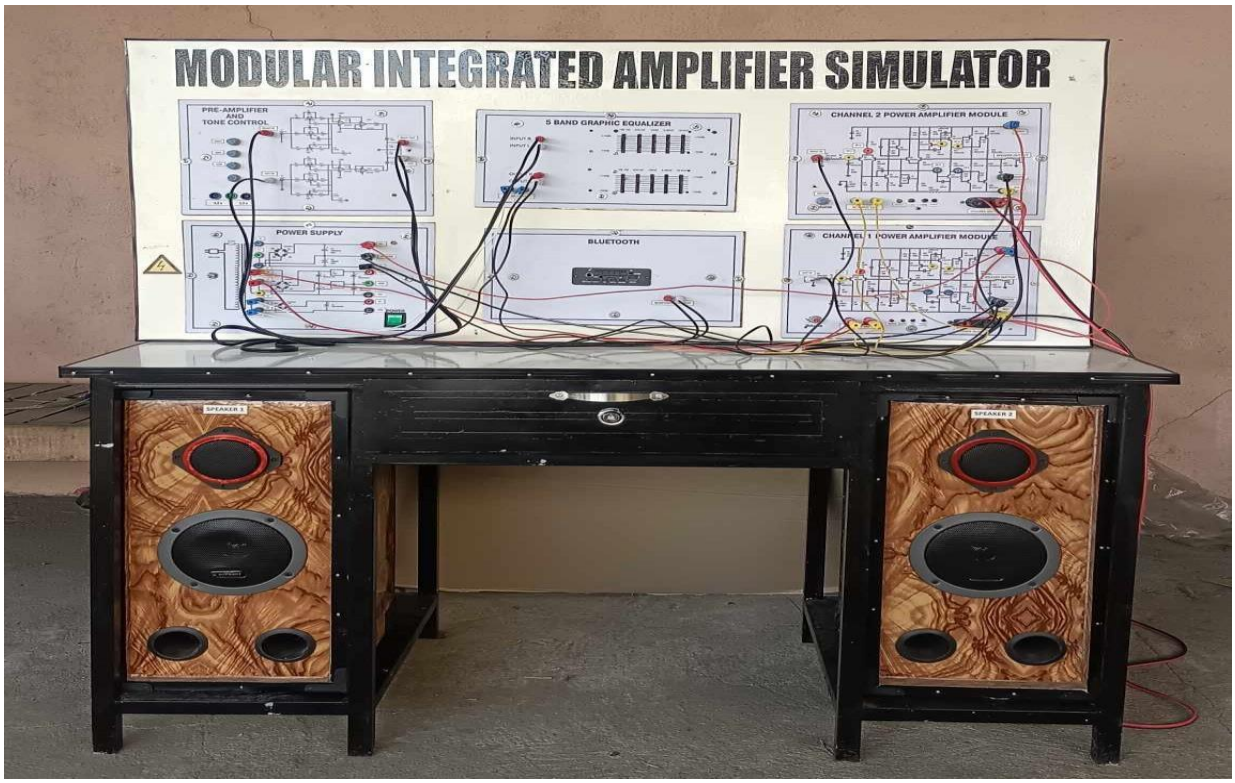

Figure 3. The Modular Integrated Amplifier Simulator

C. The User's Manual

The User's Manual of Modular Integrated Amplifier Simulator contains instructions on how to use the simulator. It also includes information and activities of the simulator for electronics students such as power supply module, Pre-Amplifier, tone control, channel 1 and channel 2 power amplifier.

Table 1. Performance of the Integrated Amplifier Simulator in Terms of Trouble Simulation

MODULES	TROUBLES
POWER SUPPLY	No power Noise and Hum Voltage Fluctuations Overheating
Pre-Amplifier and Tone Control	Noise and hiss Distortion Imbalance Loss of signal
Channel 1 and 2 Power Amplifier	Distortion Overheating Clipping Hum and Noise

Table 2. Performance of the Integrated Amplifier Simulator in Terms of Activities

LESSON	NUMBER CLASS HOURS		ACTIVITY
	Lectures Hours	Activity time allotted for student	
1. Wiring connection of module/section of the simulator	35 minutes	15 minutes	Wiring the complete module/section of the panel board
POWER SUPPLY MODULE			
2. Identify and describe the components of power supply	20 minutes	10 minutes	Identifying and describing the components of power supply
3. Interpret Schematics diagram	20 minutes	10 minutes	Interpreting the schematic diagram of power supply
4. Voltage measurement	20 minutes	10 minutes	Checking the voltage of power supply
5. Diagramming (Schematic)	30 minutes	20 minutes	Sketching the schematic diagram of power supply
PRE-AMPLIFIER AND TONE CONTROL			
6. Identify the parts and components of pre-amplifier and tone control	20 minutes	10 minutes	Identifying the parts and components of pre-amplifier and tone control
7. Interpret the schematic diagram	20 minutes	10 minutes	Interpreting the schematic diagram of pre-amplifier
8. Signal tracing	20 minutes	10 minutes	Tracing the signal of pre-amplifier
9. Diagramming (Schematic)	30 minutes	20 minutes	Sketching the schematic diagram of pre-amplifier and tone control

CHANNEL 1 AND 2 POWER AMPLIFIER MODULE			
10. Identify the parts and components of channels 1 and 2 of the power amplifier	40 minutes	20 Minutes	Identifying the parts and components of channels 1 and 2 of the power amplifier
11. Interpret the schematic diagram	40 minutes	20 minutes	Interpreting the schematic diagram of channels 1 and 2 of the power amplifier
12. Signal tracing	20 minutes	10 minutes	Tracing the signal of channels 1 and 2 of the power amplifier
13. Diagramming (Schematic)	40 minutes	20 minutes	Sketching the whole twin tub simulator

The table above shows the lessons and number of class hours of every module and activities of the Modular Integrated Amplifier Simulator.

2. Project Evaluation

Table 3. Level of Acceptability of Developed Integrated Amplifier Stimulator in Terms of Design and Construction, Functionality, Durability, Safety, and Instructional Applicability

A. Design and Construction	**Mean**	**Standard Deviation**	**Description**
1. The simulator has a unique design and construction.	5.00	0.00	Very Good
2. The simulator can be easily reproduced for student use.	4.92	0.28	Very Good
3. The simulator has components that are well assembled and visible for easy understanding	4.95	0.22	Very Good
4. The simulator has component that are tough and tension resistant.	4.80	0.40	Very Good
5. The simulator is stable and in good condition.	4.92	0.28	Very Good
Average	**4.92**	**0.13**	**Very Good**
B. Functionality	**Mean**	**Standard Deviation**	**Description**
1. The simulator shows the actual operation of an integrated amplifier	4.88	0.32	Very Functional
2. The simulator can serve its purpose efficiently.	4.97	0.18	Very Functional
3. The simulator is easy to operate and maintain.	4.85	0.36	Very Functional
4. The simulator is made up of real electronics components used in the operation, testing, and troubleshooting procedures.	4.83	0.38	Very Functional

5. The simulator can be manipulated by students for easy understanding of concepts.	4.97	0.18	Very Functional
Average	***4.90***	***0.30***	***Very Functional***
C. Durability	**Mean**	**Standard Deviation**	**Description**
1. The materials used in the simulator can be used for longer period.	4.92	0.28	Very Durable
2. The simulator components and different modules are fixed and sturdy.	4.88	0.32	Very Durable
3. The simulator has a long-lasting condition	4.92	0.28	Very Durable
4. The simulator wire and conductor used are in good condition	4.92	0.28	Very Durable
5. All components of the simulator are durable and can work well for laboratory activities.	4.91	0.18	Very Durable
Average	***4.92***	***0.279***	***Very Durable***
D. Safety	**Mean**	**Standard Deviation**	**Description**
1. The simulator is equipped with safety and protective devices.	4.95	0.22	Very Safe
2. Connectors are insulated to prevent short circuits and electrocution.	4.90	0.30	Very Safe
3. The simulator is easy to maintain	4.83	0.38	Very Safe
4. The simulator has movable parts which are properly mounted for safety	4.90	0.30	Very Safe
5. The simulator is safe to use and user-friendly.	4.93	0.25	Very Safe
Average	***4.87***	***0.34***	***Very Safe***
E. Instructional Applicability	**Mean**	**Standard Deviation**	**Description**
1. The simulator is effective for instructional and shop work use.	4.93	0.25	Very Applicable
2. The simulator is suited to student's specialization in electronics subjects for the laboratory.	4.88	0.32	Very Applicable
3. The operation and manipulation of the simulator are according to the needed performance for each activity.	4.93	0.25	Very Applicable

4. The simulator can be used to improve the teaching-learning process.	4.85	0.36	Very Applicable
5. The simulator is suited for Electronics Junior High School learners.	4.97	0.18	Very Applicable
Average	***4.91***	***0.14***	***Very Applicable***

The table exhibits the level of acceptability of the developed integrated amplifier simulator.

As shown in the table, the design and construction was evaluated as very good by the respondents. All the characteristics under this criterion were rated with very high mean scores. With a mean of 4.95, being the highest rating, the evaluators agree that the simulator's components are well-assembled and visible, which aids in understanding its operation. This indicates that the simulator is well-received by users.

Similarly, in terms of its functionality, the developed integrated amplifier simulator is highly functional, as evidenced by the high ratings across various functionality criteria. It effectively demonstrates the actual operation of an integrated amplifier, serves its purpose efficiently, is easy to operate and maintain, uses real electronic components, and is manipulable for easy understanding by students. The high average mean score of 4.90 and described as very functional and the relatively low standard deviation confirm that the simulator is well-regarded for its functionality.

With regard to its durability, the developed integrated amplifier simulator is highly durable, as evidenced by the high ratings across various durability criteria. The materials used, the sturdiness of components, the long-lasting condition, and the quality of wires and conductors all contribute to the overall perception of the simulator's durability. The evaluators agreed that the product is very durable as evidenced by its overall mean score of 4.92. This implies that the simulator is well-regarded for its durability.

Additionally, the developed integrated amplifier simulator is highly regarded for its safety. With high ratings across various safety criteria described as very safe, the simulator is equipped with necessary safety and protective devices, has insulated connectors, is easy to maintain, has properly mounted movable parts, and is user-friendly. The overall mean of 4.87 for safety indicates that the integrated amplifier simulator is highly regarded for its safety features. This high rating demonstrates strong confidence among respondents in the simulator's safety, making it a reliable and secure tool for educational purposes.

Moreover, the developed integrated amplifier simulator is highly regarded for its instructional applicability. The high ratings across various criteria, including effectiveness for instructional and shop work use, suitability for students specializing in electronics, performance in operation and manipulation, potential to improve the teaching-learning process, and suitability for Electronics Junior High School learners, confirm its value as

an educational tool. The mean score of 4.91 for the instructional applicability of the integrated amplifier simulator implies that it is highly valued as an educational tool.

Table 4. Level of Acceptability of the User's Manual in Terms of Comprehensibility, Suitability, and Ease of Use

A. Comprehensibility	Mean	Standard Deviation	Description
1. The procedures/steps in the activity manual are presented in a manner that could be easily grasped by the students.	4.80	0.41	Strongly Agree
2. The evaluation in the activity manual could easily be understood by the students.	4.84	0.37	Strongly Agree
Average	***4.82***	***0.28***	***Strongly Agree***
B. Suitability			
1. The objectives in the activity manual are suitable to the content and activities.	4.80	0.41	Strongly Agree
2. The symbols and diagrams in the user's manual are suitable to the activities.	4.96	0.20	Strongly Agree
Average	***4.88***	***0.22***	***Strongly Agree***
C. Ease of Use			
1. All activities in the laboratory manual can be performed in the simulator.	5.00	0.00	Strongly Agree
2. The learning content in the user's manual provides useful information to the student in performing various integrated amplifier tasks.	4.88	0.33	Strongly Agree
Average	***4.94***	***0.16***	***Strongly Agree***

The table presents the level of acceptability of the developed user's manual in terms of its comprehensibility, suitability, and ease of use.

As evident in the table, in terms of Comprehensibility, the mean ratings for statements 1 and 2 indicate strong agreement, 4.80 and 4.84, respectively, suggesting that students find the procedures, steps, and evaluations presented in the manual easy to grasp. The average for this criterion is 4.82, still within the "Strongly Agree" range, further confirming the high level of comprehensibility.

Regarding its Suitability, both statements in this section also receive high mean ratings of 4.80 and 4.96, indicating strong agreement regarding the suitability of objectives, symbols, and diagrams to the content and activities. The mean score of 4.85 suggests that the high level of suitability for the user's manual is strongly agreed by the evaluators.

In terms of Ease of Use, both statements in this category receive exceptionally high mean ratings of 05.00 and 4.88, showing strong agreement that all activities can be performed in the simulator and that the learning content provides useful information for performing various tasks. The average for this section is 4.94 out of 5, reinforcing the perception that the manual is highly user-friendly and provides valuable information for performing tasks.

The data suggests that the developed user's manual is highly regarded by students in terms of comprehensibility, suitability of content, symbols, and diagrams, as well as ease of use. The consistently high mean ratings and low standard deviations across all sections indicate a strong consensus among students regarding the quality of the manual.

Table 5. Comparison in the General Acceptability of the Developed Integrated Amplifier Stimulator as perceived by the Faculty Members, Experts, and Students

Criteria	F value	p-value	Comparison	Decision	Remark
Design and Construction	1.82	0.71	p-value > 0.05	Accept Ho	the difference is not significant
Functionality	0.53	0.59	p-value > 0.05	Accept Ho	the difference is not significant
Durability	3.24	0.05	p-value = 0.05	Accept Ho	the difference is not significant
Safety	3.12	0.05	p-value = 0.05	Accept Ho	the difference is not significant
Instructional Applicability	0.06	0.94	p-value > 0.05	Accept Ho	the difference is not significant

This table displays the comparison of the general acceptability of the Developed Integrated Amplifier Stimulator as perceived by evaluators across different criteria. The criteria include Design and Construction, Functionality, Durability, Safety, and Instructional Applicability.

For Design and Construction, the F value is 1.82, and the p-value is 0.71, which is greater than 0.05. With a ρ-value greater than the significance level (0.05), the decision is to accept the null hypothesis (H_0), indicating that the difference in perceptions of design and construction among evaluators is not statistically significant.

With regard to its Functionality, the F value is 0.53, and the ρ-value is 0.59, both of which are greater than 0.05. Similar to Design and Construction, the decision here is to accept the null hypothesis, suggesting that there is no significant difference in evaluators' perceptions regarding the functionality of the Integrated Amplifier Stimulator.

In terms of Durability and Safety, for both Durability and Safety, the F values are 3.24 and 3.12, respectively, with ρ-values of 0.05. The p-values are exactly at the significance level of 0.05. However, the decision is still to accept the null hypothesis, indicating that the perceived differences in durability and safety are not statistically significant.

Regarding its Instructional Applicability, the F value is 0.06, and theρ-value is 0.94, both well above 0.05. As with the other criteria, the decision is to accept the null hypothesis, suggesting that there is no significant difference in evaluators' perceptions regarding the instructional applicability of the Integrated Amplifier Stimulator.

Data reveal that across all criteria, the ρ-values are greater than 0.05, except for Durability and Safety, where they are exactly 0.05. However, in all cases, the decision is to accept the null hypothesis, indicating that the differences in evaluators' perceptions are not statistically significant. This suggests that the Integrated Amplifier Stimulator is generally perceived similarly across different criteria by the evaluators.

Table 6. Comparison in the General Level of Acceptability of the Developed User's Manual as Perceived Faculty Members and Experts

Criteria	F value	p-value	Comparison	Decision	Remark
Comprehensibility	3.25	0.08	p-value > 0.05	Accept H_0	the difference is not significant
Suitability	0.31	0.58	p-value > 0.05	Accept H_0	the difference is not significant
Ease of Use	2.30	0.0.14	p-value > 0.05	Accept H_0	the difference is not significant

The table presents the comparison of the general level of acceptability of the developed User's Manual as perceived by faculty members and experts across different criteria, including Comprehensibility, Suitability, and Ease of Use.

With regard to its Comprehensibility, The F value is 3.25, and the ρ-value is 0.08, slightly above 0.05. With a ρ-value greater than the significance level (0.05), the decision is to accept the null hypothesis (H_0), indicating that the difference in perceptions of comprehensibility between faculty members and experts is not statistically significant. However, it's worth noting that the p-value is relatively close to 0.05, suggesting a potential trend toward significance.

Regarding Suitability, the F value is 0.31, and the p-value is 0.58, both well above 0.05. Similar to Comprehensibility, the decision here is to accept the null hypothesis, indicating that there is no significant difference in perceptions of suitability between faculty members and experts.

With Ease of Use, the F value is 2.30, and the p-value is 0.14, above 0.05. Once again, the decision is to accept the null hypothesis, suggesting that the difference in perceptions of ease of use between faculty members and experts is not statistically significant. Similar to Comprehensibility, the ρ-value is relatively close to 0.05, indicating a potential trend.

It is therefore conclude that since the ρ-values are greater than 0.05 across all criteria, results suggest that there is no statistically significant difference in perceptions between faculty members and experts regarding the Developed User's Manual. However, for Comprehensibility and Ease of Use, the p-values are close to 0.05, indicating a potential trend or a need for further investigation with a larger sample size.

Comments and Suggestions Offered by the Respondents for the Improvement of the Developed Integrated Amplifier Simulator

Based on the evaluation of the respondents, the following comments and suggestions were offered:

1. Instead of using a banana connector, other heavy-duty connector should be used for longer usage.
2. Testing instruments can be installed for actual measuring purposes.
3. Incorporate fault or trouble switches with indicators for the simulation of troubles.
4. Install heavy-duty ball casters for easier mobility.
5. Safety features such as circuit breaker for AC and fuse for DC

Conclusions

The results of this study affirm that the *Modular Integrated Amplifier Simulator* is a highly effective and reliable educational tool for electronics students. The simulator excels in design, functionality, durability, safety, and instructional applicability, as reflected in the consistently high ratings from faculty, experts, and students. The user manual complements the simulator by being clear, suitable, and user-friendly. Overall, the simulator significantly enhances the learning experience by providing a practical and comprehensive understanding of integrated amplifier operation. Recommendations for enhancements, such as more robust connectors and fault simulation features, promise to further improve its effectiveness and longevity.

Recommendations

Based on the findings and conclusions, the following recommendations are offered:

1. The developed *Modular Integrated Amplifier Simulator* should be applied for Utility Model and Industrial Design registration at the Intellectual Property Office of the Philippines (IPOPHIL) for the intellectual property protection of the prototype.
2. Similar studies may be conducted to increase the number of instructional devices in the technology areas.
3. The potential use of the simulator should be further enhanced by increasing the number of troubles and test points. Actual defective spare parts may be incorporated into the design.
4. A copyright registration of the user's manual should be applied for.

Compliance with Ethical Standards

As the author of this study, I declare that all ethical standards were strictly adhered to throughout the research process. Informed consent was obtained from all participants, who were fully informed of the study's objectives and procedures, and they were assured of their freedom to withdraw from the study at any time without any repercussions. The anonymity and confidentiality of the respondents were rigorously maintained to protect their privacy and well-being. There was no conflict of interest in the conduct of this study, and all efforts were made to ensure that the research was conducted impartially and objectively. Plagiarism was strictly avoided, and the originality of the work was upheld. The interpretation of the findings was conducted without any bias, and the results were utilized solely for research purposes. This adherence to ethical standards underscores the integrity and credibility of the study.

Acknowledgments

I would like to express my deepest gratitude to my adviser for his invaluable guidance and support throughout this research. My sincere thanks go to the participants of the study for their time and cooperation. I am also grateful to the authors of the instruments I borrowed, whose work significantly contributed to this study. Special thanks to my colleagues and the school heads for their encouragement and assistance. Lastly, I am profoundly thankful to my loved ones for their unwavering support and understanding during this research journey.

ABSTRACT

Design and construction of various trainers, prototypes and/ or simulators in most schools in teaching the fundamental concepts of electronics and electricity has been long proven to be effective in schools as it provides real- life situations and conditions to imitate circuits and other related technical conditions. This study was aimed to design and evaluate a Basic Electronics Trainer, to help improve teaching the basics of the course Electronics to would-be technicians. The use of this apparatus will be maximized since the apparatus can provide students with series of laboratory activities that would enhance their understanding of the work, functions, circuit connections, and applications of basic electronic devices which are all essential in understanding the building blocks of electronic products. This study presents the basic concept of designing and constructing the trainer. Simulations and experiments are based on the fundamental operations of power supply circuits and other experiments and activities focused on the theory of operation of semiconductor devices such as diodes, transistors, thyristors and integrated circuit regulators. Using locally-available components, devices and instruments, the trainer presented herein proved to be feasible as an alternative resource against costly commercially-made trainers in the market that offer similar training/ learning outputs. Based on the evaluation conducted by select-experts and field technicians in the locality as to the workability, effectiveness, durability, aesthetics and safety, the trainer was found out to be highly acceptable. Furthermore, this study comes with an Activity Manual to provide at least a substantial number of experiments on basic theoretical concept of operation in Electronics technology, thus proving the usability of the trainer.

Keywords: *electronics and electrical technology, trainers design, prototype*

INTRODUCTION

Today, our society has come to a point where almost every person in all walks of life is greatly influenced by technological breakthroughs brought about by electronics. Every day, thousands of people around the world buy their needed appliances such as television and radio receivers, home theatre systems, video players and recorders, microwave ovens, air conditioning units, telephones, personal computer units, and many others. In our country alone, our government has spent billions of pesos in purchasing electronic goods used in transportation, communication, medical diagnosis and treatment, agriculture, crime detection, traffic control and many more for the last five years. With the growing demand for electronic products used for household and industry, the increase in the need for skilled manpower which would serve as assemblers, installers, repair and maintenance workers, and electronic products specialists have also grown inevitably.

Because of the clear demand by the electronics industry for skilled electronic technicians and product specialists, the Philippine school system, specifically those offering technology courses are challenged to train and produce the needed manpower by the industry. In line with this challenge, the schools in the country are expected to produce quality technical and vocational training that will conform to the standards set by the electronics industry. Knowing the promising career that awaits every electronics technology student, in the electronics industry, basic and advanced courses in Electronics have become one of the main program offerings in many technical and vocational schools all over the country. Recent enrolment records in the country now show the dramatic increase in the number of students in the course.

For the schools to be able to produce competent graduates equipped with standard skills needed for employment, these technical and vocational schools must at least provide the students with relevant laboratory facilities, rich learning activities and technical training. In order to attain a more effective and meaningful teaching and learning activities in electronics course, shop teachers and students must be exposed to relevant learning materials, resources, demonstration and practical laboratory activities. Shop fundamentals and laboratory principles that are properly taught by technology instructors are more effectively learned by students and become more permanent in their hearts and minds when they are given the opportunity to experience actual “hands-on” activities on various laboratory experiments. In addition, basic theories and principles of electronic devices and apparatuses are best understood when actual activities on their practical uses and applications are given emphasis.

But the problem lies mostly with most technical schools having little or no appropriate tools, equipment, laboratory apparatuses, experiment manuals and trainers in electronics laboratory classes. As a result of this, the quality of education that their graduates possess, in terms of knowledge and skills, do not match the standard competencies needed by the industry because of inadequate training facilities. In Isabela State University-Ilagan Campus alone, one of the perennial problems confronted by the school is the inadequacy, or worse,

the absence of appropriate and relevant laboratory equipment in most shop classes due to cost-cutting of budget intended for laboratory equipment, gadgets and apparatuses. The situation becomes more difficult when students continue to flock to technology courses despite the lack of these training facilities in the class.

In the course Electronics Technology for instance, the enrolment this school year has peaked to its maximum and to the instructors' and students' dismay, still not even a single training gadget or apparatus was procured to at least partially ease the need for a training apparatus. The quality of technical training, sought by students, through relevant and appropriate training activities in Electronics Technology has been greatly affected and compromised. As a consequence of this, instructors of Electronics Technology were deprived of their privilege to teach their respective fields of specialization competently and on the other hand, students enrolled in the course were also denied of their right to a better and more relevant technical training through adequate laboratory facility.

With this reality, the electronics instructor is therefore challenged to find ways and means to partially solve the existing problem. Amidst this situation, the initiative and resourcefulness of the instructor is sought to design and improvise training equipment made from supplies and materials found in the local market as a cheaper alternative for commercially-available equipment. With the present problem on the inadequacy of laboratory learning equipment in Electronics Technology course, the researcher, came up with this idea of conducting this study to introduce new learning experiences in the course and to eventually sustain the student's interest to pursue his chosen career.

The researcher strongly believes that with the construction of this proposed Basic Electronics Trainer, teaching the basics of the course to would-be technicians will be greatly improved and the use of this apparatus will be maximized since the apparatus can provide students with series of laboratory activities that would enhance their understanding of the work, functions, circuit connections, and applications of basic electronic devices which are all essential in understanding the building blocks of electronic products.

Research Objectives

This study aimed to develop and evaluate a Basic Electronics Trainer for Electronics Technology students of Isabela State University-Ilagan Campus.

More specifically, it sought to achieve the following objectives:

1. design and construct a Basic Electronics Trainer;
2. test the functionality of the apparatus by conducting various experiments concerning practical electronic circuits through the use and application of active and passive electronic devices;
3. revise the gadget based on the results of the tests on the apparatus to further improve its existing features and capabilities; and
4. determine the level of acceptability of the developed Basic Electronics Trainer in terms of:
   a. design
   b. construction
   c. functionality, and

d. safety

METHODOLOGY

The study employed a mixed-method research design namely, the Project Development Method (PDM) because the researcher conceptualized the design and specifications of the Basic Electronics Trainer, and use the descriptive method of research in his study to obtain reliable, consistent, and actual results. Various authorities define descriptive research as a scientific method which involves observing and describing the behavior of a subject without influencing it in any way. This type of research is used to describe the data and characteristics about what is being studied. Although the data description is factual, accurate and systematic, the research cannot describe what caused a situation. In other words, descriptive research can be said to have a low requirement for internal validity.

The respondents of the study were selected technology instructors from the College of Industrial Technology and Education and from the College of Electrical and Electronics Engineering of the Isabela State University-Ilagan Campus, Ilagan, Isabela. Technology teachers from the nearby technical / vocational school offering Radio Mechanics were also tapped to evaluate the project. A number of technicians from different electronics shops and centers in the locality were also invited by the researcher to evaluate his work.

Table 1. Distribution of the Teacher/Technician Respondents of the Study

Teacher / Technican Respondents by Name of Schools and Shops	Population	Actual Sample Size	Percentage
Isabela State University-Ilagan Campus	8	**8**	100
Isabela School of Arts and Trades-Ilagan	2	**1**	50
San Jose Reyes Robotics Center - Ilagan	2	**2**	50
BOY Electronics Shop-Calamagui	2	**1**	50
FRANCIS Electronics Service Center-Baligatan	2	**1**	50
SANTOS Audio/Video Center- Baligatan	1	**1**	100
OBENA'S Electronics Shop – Cauayan City	1	**1**	100
Total	**18**	**15**	**83**

Knowing the capability and competence of these instructors, teachers and technicians in the field, the researcher has chosen them to evaluate the Trainer. These respondents were asked to accomplish an evaluation form that determines the acceptability and functionality of the trainer

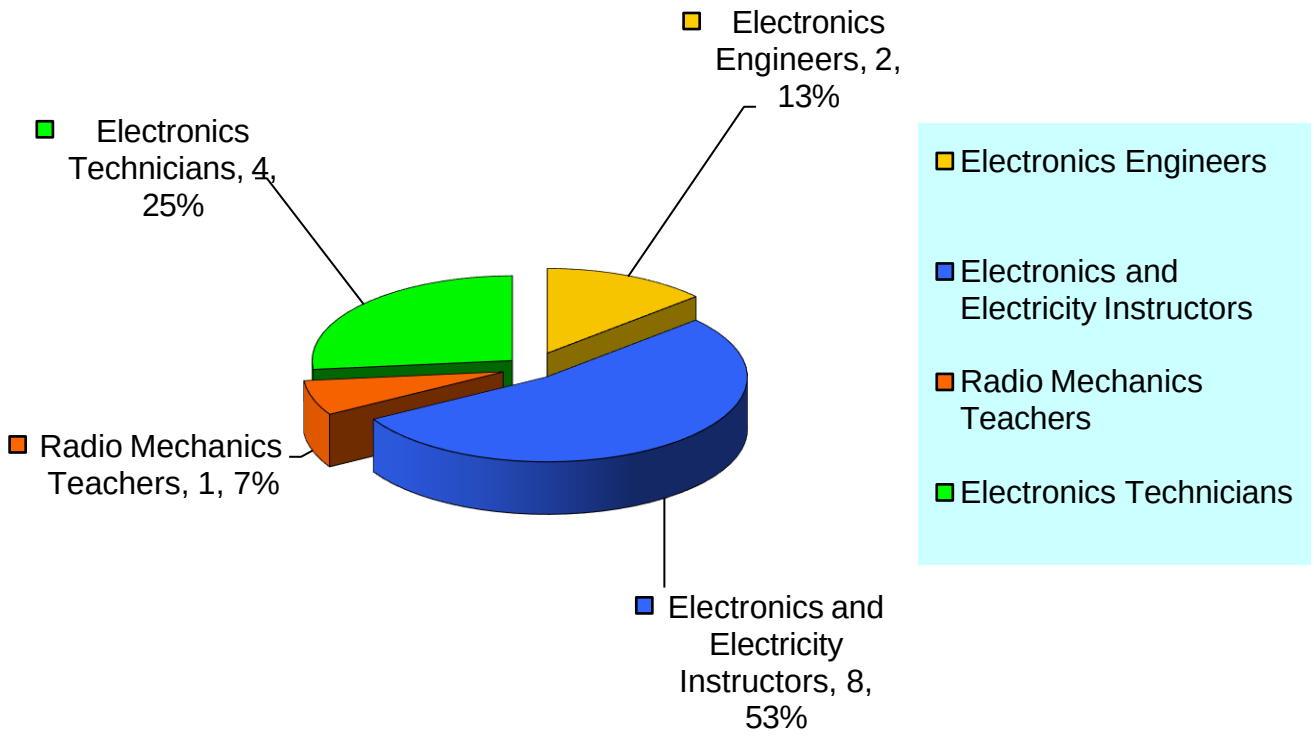

Figure 1. Composition of Respondents of the Study by Profession

The pie chart shown in **Figure 1** shows the composition of respondents who conducted evaluation of the project. The total respondents were composed of two (2) Electronics Engineers, eight (8) Instructors teaching Electronics and Electricity, one (1) Radio Mechanics Teacher from the secondary school and four (4) shop technicians from different electronics service centers and shops in the locality.

Various ways on how to gather and collect the appropriate data needed in the development of the basic electronics trainer were considered by the researcher. These data, which is in a form of figures obtained from surveys, was used by the researcher to draw conclusions on his project. Data is an essential part in conducting the study and in developing the project.

Before the researcher could conduct the evaluation of his project, formal invitations to target respondents, through their school administrators and superiors were made by the researcher and countersigned by his adviser. Letters were sent to Isabela State University-

Ilagan, Isabela School of Arts and Trades, San Jose Reyes Robotics Center, and to different electronics repair shops and centers in the locality.

The evaluation of the project was conducted at the Industrial Technology Building of ISU-Ilagan. Respondents from nearby technical schools and electronics service centers/shops were invited to personally inspect the gadget, perform activities on the trainer and accomplish evaluation forms or questionnaires. The evaluation questionnaire used in the study was based and adopted some instruments used by Canceran (2019), Corbillon (2019) and Makabenta (2019) in their studies, however, to make them more effective and appropriate, some improvements and modifications were made by the researchers on these instruments. The modified instrument let the respondents evaluate the developed trainer as to its design, construction, functionality, and, safety.

In order to analyze the collected data, the statistical tool used in this study is the weighted mean. This was computed to find out the acceptability of the project as perceived by the respondents. The scale shown in the following pages was used to interpret the computed weighted mean for each indicator.

SCALE	VERBAL DESCRIPTION
4.21—5.0	Highly Acceptable
3.41—4.20	Acceptable
2.61—3.40	Unacceptable
1.81—2.60	Moderately Unacceptable
1.0—1.80	Highly Unacceptable

RESULTS AND DISCUSSION

To further enrich his understanding of the study, the researchers used library materials such as books, journals, newsletters and other related studies about educational technology projects and the development of trainers used in electrical and electronics instruction. Websites were used extensively to carefully examine of internet articles about construction of trainers that bear direct significance to the study were also conducted to give the researcher additional information and facts needed in developing the project.

1. Design and Construction of the Proposed Project

The programs of works for the construction of the Basic Electronics Trainer are as follows:

A. Planning. This involves the drawing of schematic diagrams to provide useful illustrations of circuits of the project.

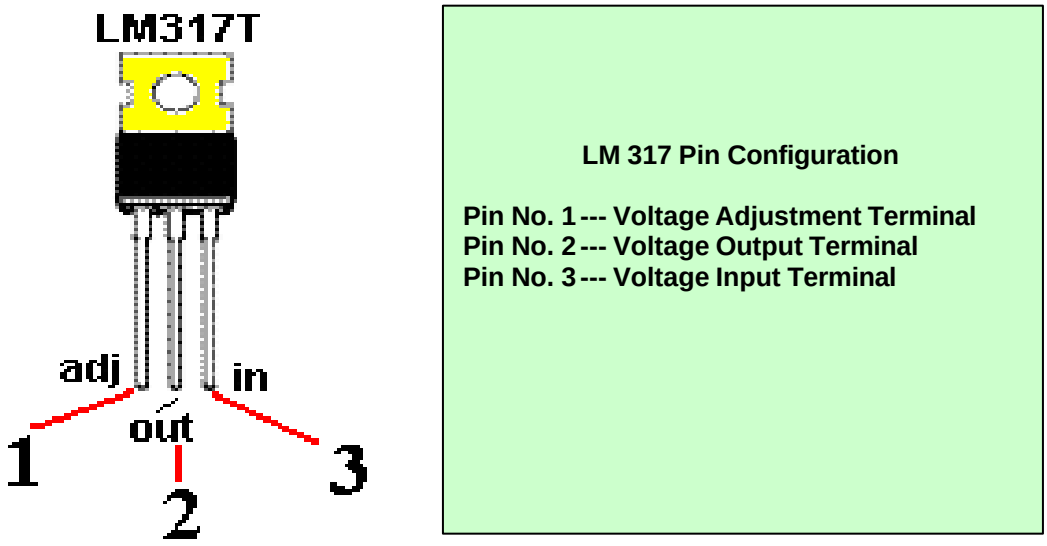

Figure 2. Standard Pin Assignment of an LM317 Voltage Regulator IC

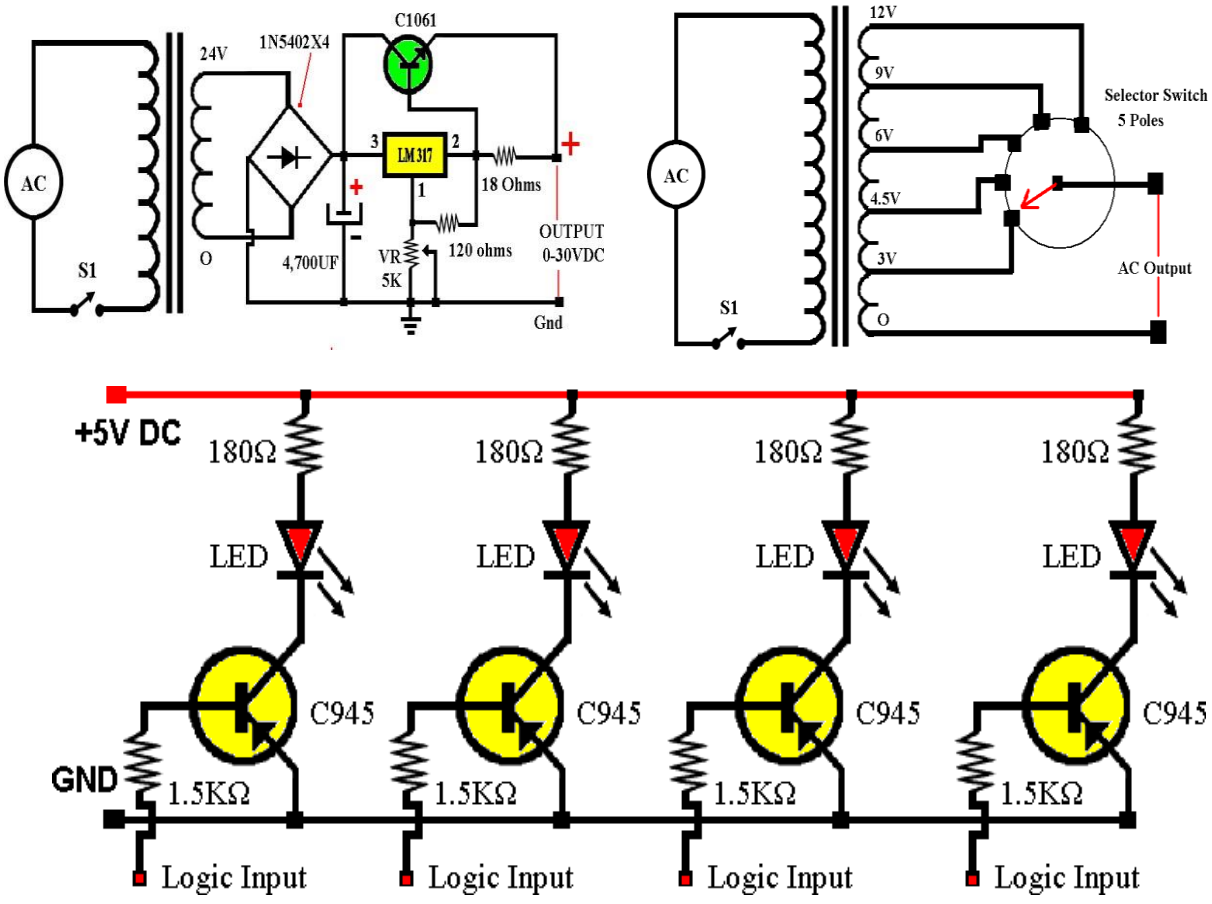

Figure 3. Schematic Diagram of the Variable DC Power Supply, Multiple Output AC Power Supply, and Digital Logic LED Display.

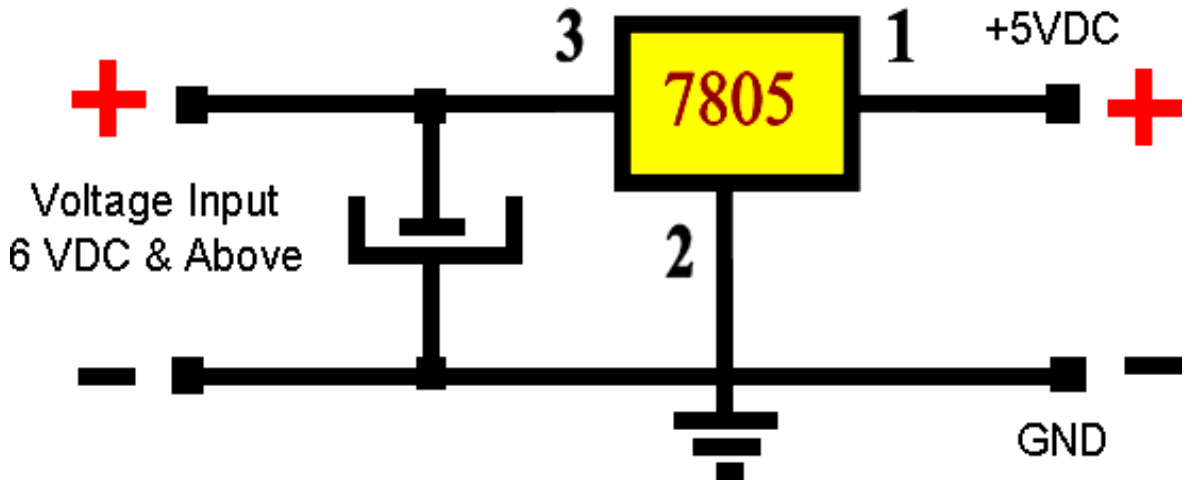

Figure 4. Schematic Diagram of the +5 Volts DC Regulator Using 7805 IC

B. **Designing and Lay-outing**. This refers the making of circuit designs and drawing plans for the project.

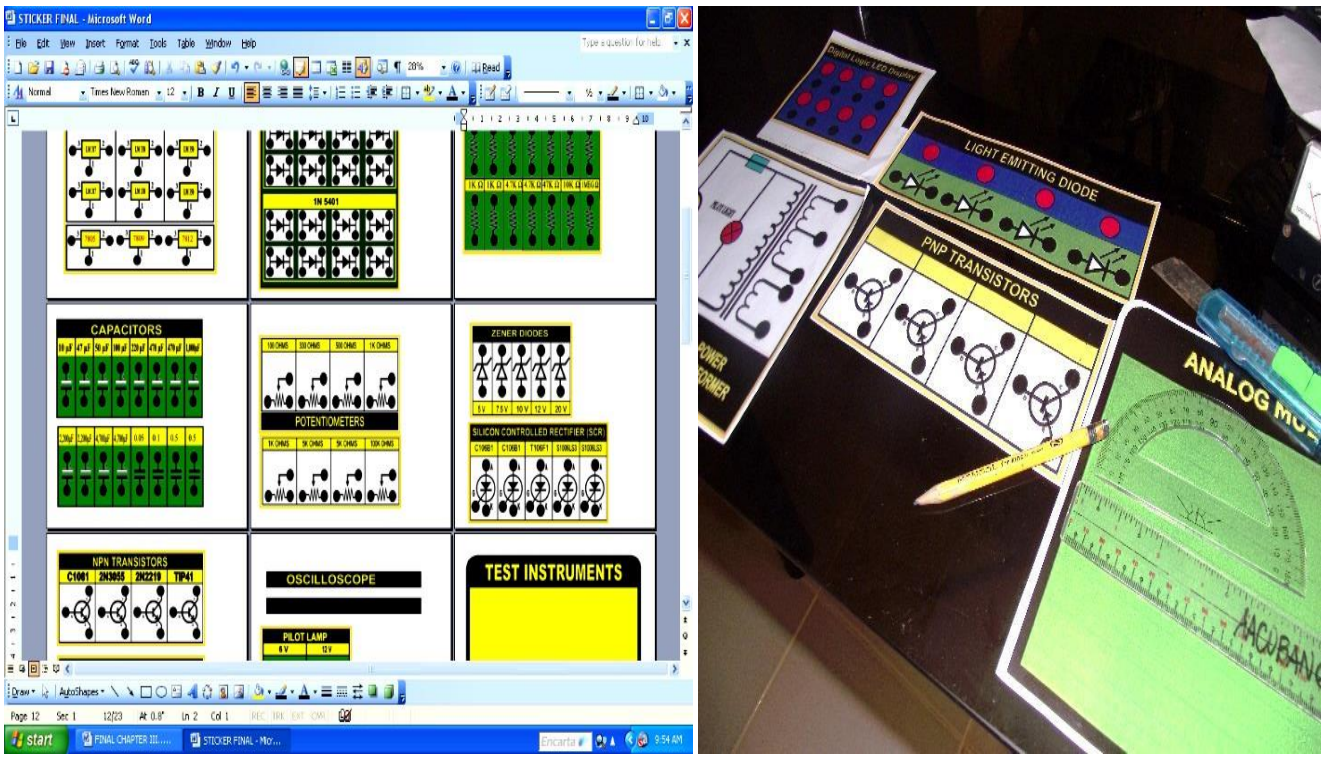

Figure 5. Snapshot of the Stickers Designed on the Computer and Lay-outing the Stickers on the Acrylic Board

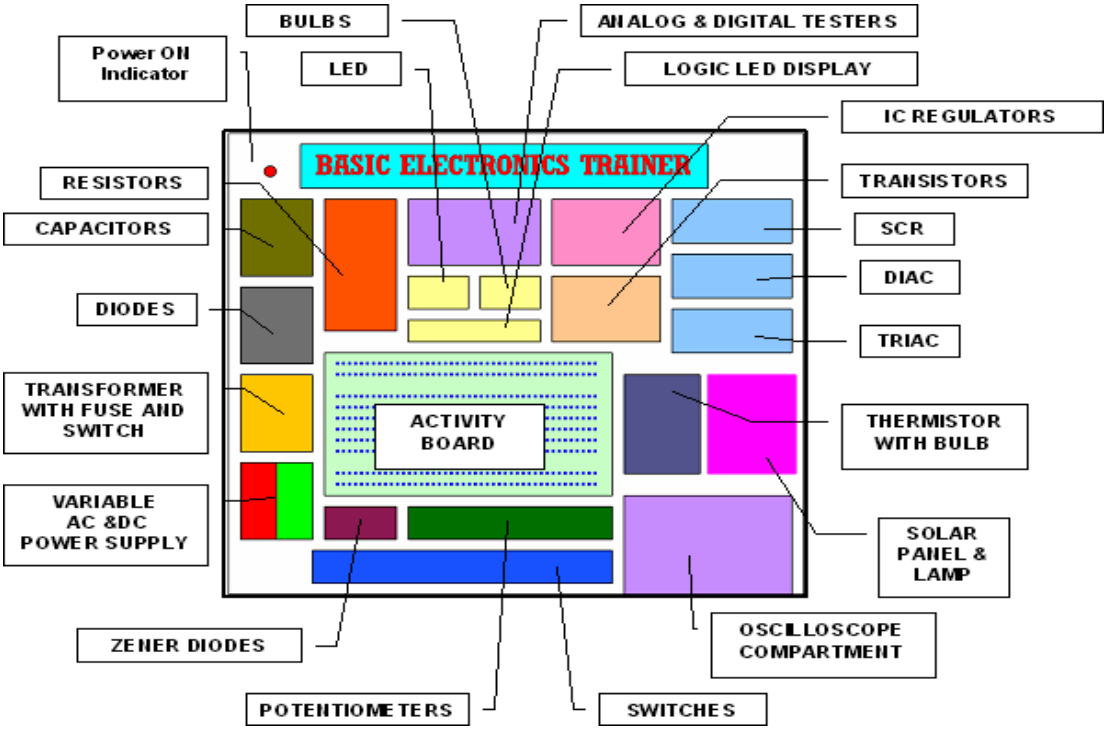

Figure 6. Layout Design of the Trainer Panel Indicating the Actual Locations of Devices and Instruments

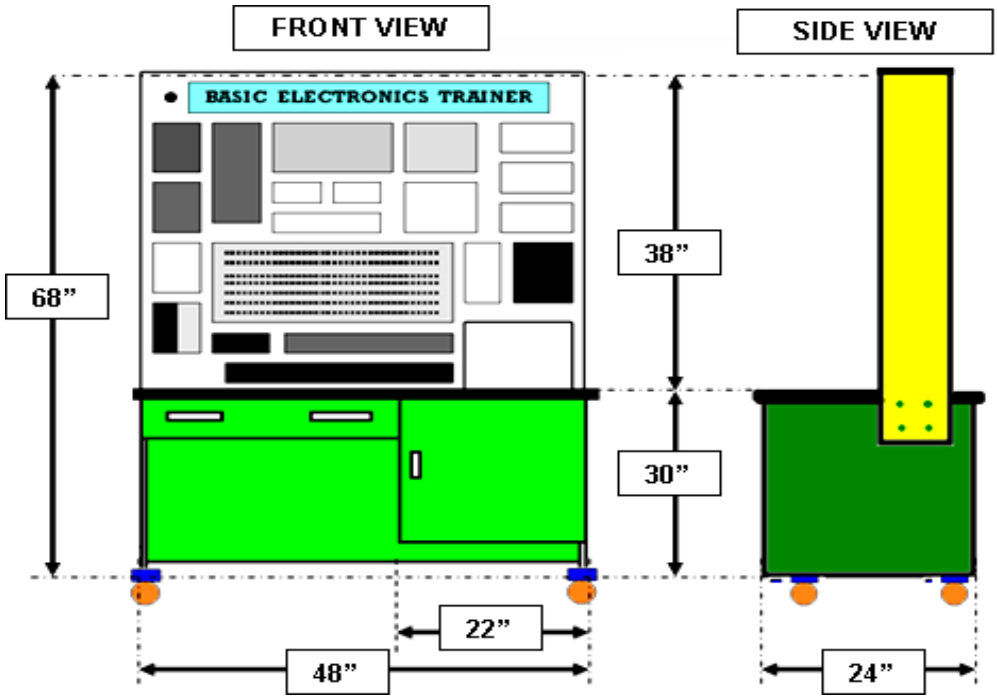

Figure 7. Front and Side View of the Basic Electronics Trainer

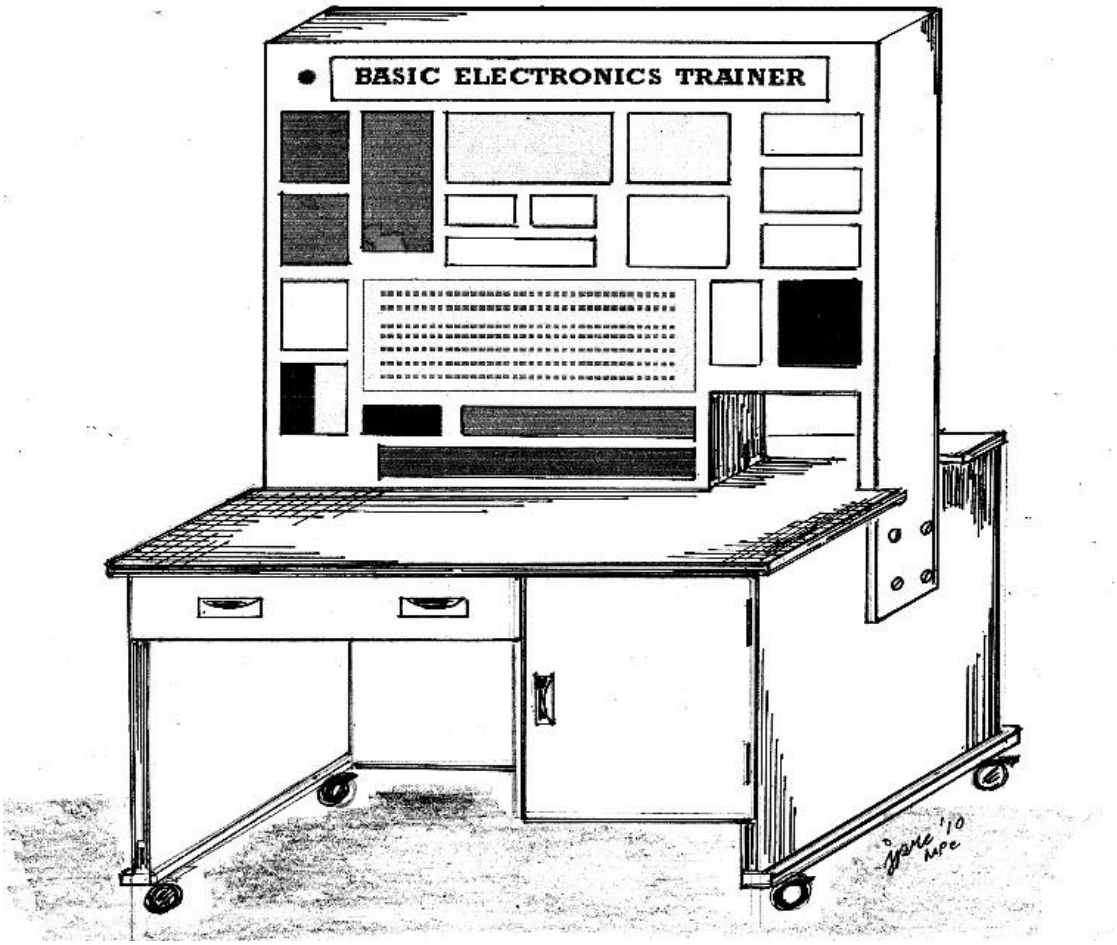

Figure 8. Perspective Drawing of the Basic Electronics Trainer

C. Constructing the Basic Electronics Trainer.

For the construction of the project, the following were taken into consideration:

The constructed Basic Electronics Trainer was suited to the curriculum/subjects of BS Industrial Technology major in Electronics and Electrical Technology and industry experts' level of understanding. The trainer was constructed utilizing used electrical devices from different firms locally and commercially available materials and supplies.

The first step in constructing the project is to prepare the necessary supplies, materials, tools and equipment. cut the acrylic sheet to the specified dimensions (38"x48") with an acrylic cutter tool, followed by removing the acrylic protective cover. The fourth step is to apply the stickers to the acrylic board according to the layout design of the trainer panel. The fifth step is to drill holes for the banana jacks that will connect components, devices, and the activity board. The sixth step is to cut compartment holes for additional devices like panel meters and test instruments. Finally, install banana jacks in all of the terminal holes.

2. Testing of the developed Project

Figure 9. Photo of the Researcher Conducting the Actual Testing of the Trainer

This is the stage wherein the project is put on its operation where power is applied to the transformers and power supplies. The actual testing of all the experiments on the Activity Manual is performed by the researcher. All observations, corrections and modifications during this process were recorded and filed.

3. Revision of the developed Project

In order to improve the operations of the trainer, a series of try-outs and testing were conducted right after the project has been completed. A number of defects were diagnosed during the testing period. To be able to correct the faults, corrections were made to resolve the defects on the trainer.

Table 2. Defects found and Revisions Made

Defects	Changes Made
1. Erratic voltage readings on the AC panel meter.	Connected a diode to the panel meter convert AC to DC.
2. Waveform displayed is erroneous.	Repaired ground connection of the oscilloscope test probe.
3. + 5 volts DC reading too high.	Improper pin connection of the 7805 IC.
4. Thermistor is not exhibiting normal resistance reading when exposed to heat	Thermistor is positioned as close as possible to the heater resistor.
5. Thermistor 12v-lamp shuts down during operation.	Replaced a smaller 12-v bulb with a much higher filament resistance

Figure 10. Photos of the Completed Basic Electronics Trainer

Description of the Completed Project

The following paragraphs discuss the parts and function, interrelationship of the parts, limitations and capabilities of the project.

1. **Parts and Functions.** The parts and functions of the Basic Electronics Trainer and its function are listed and discussed below:

2. Panel Board. This is the main activity board made of acrylic plastic material mounted a wooden frame. All components and devices needed in performing various laboratory activities and interconnecting them are mounted at the back. Terminals for these components and devices are accessed only through its corresponding banana jacks. The back panel is covered by a much thinner clear acrylic plastic to let students take a view on how the trainer was constructed. The project is specifically designed as a demonstration gadget to clearly show and prove the basic principles behind electronic components and devices.

3. **AC and DC Power Supply Modules.** These circuits provide the needed varying amount of AC and DC voltages for the various laboratory activities in the project. The AC power supply has a selector switch to instantly shift voltage output of 3v, 4.5v, 6v, 9v and 12 vAC. Similarly, the DC power supply produces a varying amount of 1.3v to 30 vDC.

4. **Connect-All Activity Board.** This part of the project provides the interconnection of components and devices. Similar to a breadboard activity board principle, an array of vertical and horizontal banana jacks are interconnected to form the activity board. Assembling of the different circuits is done through banana plugs or connectors. All banana plugs and jacks were of heavy-duty material and the wire used for the connectors is automotive wire No. 16 to ensure durability.

5. Table, Drawer and Cabinet. The table is made up of a ¾-inch thick plywood that functions as the base for the project. A drawer and a cabinet are provided for storing connectors, tools, materials and test equipment.

6. **Component Modules and Assembly**. The components used in the project are all found on the panel board and individually labeled. Schematic symbols and diagrams are also shown to help the user of the project identify the correct polarity and pin configurations of components and devices.

7. **Test Equipment**. Digital and analog multitesters are mounted on the trainer to be used in voltage and resistance reading, component testing and comparing voltage readings. A compartment for an oscilloscope is also provided on the lower right portion of the panel. The oscilloscope will be used in demonstrating the voltage waveform of various signals.

8. **Main AC Panel Control**. This is located at the back portion of the trainer wherein instruments for controlling and monitoring the 220-VAC line are performed. As a safety feature, the project is equipped with a circuit breaker and a main switch to switch on and shut down the main AC power line.

Features of the Project

The completed project can be used for visual instruction and as activity and experiment board for individual or group use. The project is also found to be convenient and safe to use. As a visual instruction device, the project can be used to demonstrate operating principles of basic components such as resistors, capacitors, diodes, transistors,

transformers, and integrated circuit. Various circuit can be assembled to prove the capabilities of active and passive components to make significant changes to the characteristics and amount of voltage. Since test instruments such as multi-meters and oscilloscope are provided, the trainer can be used for demonstrating various experiments that needed monitoring of the amount and waveforms of voltages.

As an activity board, the project can be used by individual or group of students in performing the different laboratory activities prescribed in the Activity manual. Since the project uses banana connectors to interconnect the different components and devices, soldering and de-soldering of parts in assembling the circuits are eliminated, thus making the project convenient and efficient to use. Fuses and circuit breakers are also installed on the primary and secondary circuits of the power supply system, ensuring that the power is cut off during short circuits. Users of the trainer are ensured that they are insulated from the 220-vAC line because the trainer back panel is covered with a clear acrylic plastic sheet. The user of the trainer will only be working on low DC voltages ranging from 1.3vDC to 30vDC, rated at 1.5 amperes, thus making the user safe from electrical shocks. A cooling fan is also installed to make sure that power transformers and other heat-generating devices are cooled during operation.

The main panel board and table of project are designed to be detached from each other to facilitate the transportation of the device from one place to another. At least ten (10) metal screws hold the main trainer panel to the base/table. Ball casters are also installed to easily move the project around a certain place. Ball casters can be locked to put the apparatus intact during actual use.

4. Evaluation of the Project

One of the important elements of the study is the evaluation of the completed Basic Electronics Trainer and its Activity Manual.

The table on the following page shows the summary of the evaluation and the mean rating for each criterion on the acceptability of the trainer along with the corresponding verbal interpretation.

Table 3. Summary of the Ratings Given by Respondents on the Acceptability of the Completed Project

CRITERIA AND INDICATORS	RATING	
	Mean	Verbal Interpretation
A. Design		
1. The frame and base of the trainer is stable.	5.0	Highly Acceptable
2. The dimensions of the parts are proportion.	5.0	Highly Acceptable
3. The devices and components are in order and		Highly Acceptable

accessible.	4.86	
4. Labels and symbols on the panel are visible.	4.66	Highly Acceptable
5. Storage for tools, materials and equipment are provided in the trainer.	5.0	Highly Acceptable
AVERAGE	**4.90**	**Highly Acceptable**
B. Construction		
1. The setup of the internal parts is organized.	4.86	Highly Acceptable
2. The materials used in the construction of the trainer are durable.	4.86	Highly Acceptable
3. The connections of devices, parts and components are neatly done.	4.6	Highly Acceptable
4. All the devices and components are purposeful/ useful.	4.73	Highly Acceptable
5. The general construction of the trainer is well done.	4.86	Highly Acceptable
6. The cost of the trainer is reasonable.	4.93	Highly Acceptable
7. The parts of the trainer are locally available.	4.93	Highly Acceptable
AVERAGE	**4.82**	**Highly Acceptable**
C. Functionality		
1. The trainer panel is easy to use and operate.	4.66	Highly Acceptable
2. The trainer has a low maintenance needs.	4.93	Highly Acceptable
3. The trainer serves the purpose of a basic electronics trainer.	4.8	Highly Acceptable
4. Activities and experiments can be performed on the activity board.	5.0	Highly Acceptable
5. The trainer can be used by students individually or by group.	5.0	Highly Acceptable
AVERAGE	**4.87**	**Highly Acceptable**
D. Safety		
1. The design of the trainer enables the user to work safely.	5.0	Highly Acceptable
2. The 220-volt line is insulated making the trainer safe to use.	4.93	Highly Acceptable
3. The trainer provides activities and experiments that use low voltage.	5.0	Highly Acceptable
4. Safety devices such as fuse and breakers are installed		Highly Acceptable

on the trainer.	4.8	
AVERAGE	**4.93**	**Highly Acceptable**
Overall Mean	**4.88**	**Highly Acceptable**

Based from the results obtained, the completed Basic Electronics Trainer received mean ratings of 4.90, 4.82, 4.87 and 4.93 for the design, construction, functionality and safety, respectively. The instructional gadget was perceived to be highly acceptable by the respondents in all the criteria presented. The computed overall mean is 4.88 which suggest that the trainer is highly acceptable. It can also be said that the constructed trainer is well designed and durable, functional, safe to use, easy to maintain and of lower cost.

The results agreed by the findings of Milkić et al. (2018) found that using a trainer in a laboratory setting can help students learn new skills and knowledge. Furthermore, it was demonstrated that the developed trainer can serve as a solid foundation for the creation of new teaching methods for academic studies in renewable energy

In the same vein, Santos (2019) study found that his constructed trainer was suitable for addressing the inadequacy of training equipment used both in electrical and electronics technology.

Conclusions

The basic electronics trainer can be constructed using locally available materials and resources. The trainer is feasible and highly acceptable for instructional purposes. The trainer has been meticulously designed and built to meet the needs of educational curricula as well as industry standards. Electronics Engineers, Instructors teaching Electronics and Electricity, Radio Mechanics Teachers from secondary schools, and shop technicians from various electronics service centers and shops. All of them gave the trainer high ratings for design, construction, functionality, and safety. This emphasizes the significance of considering diverse perspectives when designing educational tools.

Recommendations

Based on the above-mentioned findings and conclusions, the following recommendations were cited:

1. school administrators should encourage other technology instructors to develop other related instructional apparatus to further improve teaching-learning in electronics;
2. technology instructors in other technology areas should be encouraged to conduct similar study to improve instruction in their respective fields;
3. budget and financial assistance should be extended to researchers who are conducting similar studies;
4. other trainers should be developed to provide a wider coverage in the teaching of basic electronics; and

5. similar and much improved trainers should be fabricated to be used by other departments in the campus.

Compliance with Ethical Standards

Following ethical standards, this research adheres to principles of integrity, respect, and responsibility towards all the participants involved. Before the conduct of the basic electronics trainer, the researcher obtained informed consent from the participants, ensuring their understanding of the study's purpose, procedures, and potential risks. Confidentiality and anonymity were preserved throughout data collection, analysis, and dissemination, safeguarding participants' privacy. Moreover, the researcher made sure that there was no conflict of interest in conducting the study, avoided plagiarism issues, and no bias was made in the interpretation of the results of the study. Finally, he ensured that the findings were used only for the research.

Acknowledgments

The researcher wishes to acknowledge his colleagues in the program for their help and support that made the study a great success. Also, he thanks his school heads, and family for their support and guidance throughout the conduct of his study.

ABSTRACT

This study aimed to develop and validate a module in Combinatorics and Probability for Grade 10 learners. Existing problems from the Department of Education's current curriculum, such as the lack of teaching resources and learning materials for Combinatorics and Probability and the recorded low mean percentage score in the subject, made the researcher conceptualize the development of a module in Combinatorics and Probability. The development and validation of the module in Combinatorics and Probability for grade 10 learners adapted and utilized the ADDIE model, which consists of five steps, namely: (1) Analysis, (2) Design, (3) Development, (4) Implementation, and (5) Evaluation. The module was developed in terms of the objectives of each lesson, essential content, language used, and assessment and evaluation activities. The developed module was distributed to the mathematics teachers and master teachers, who assess and evaluate the validity of the module using four criteria: development of the objectives of each lesson, selection of essential content, selection of the language used, and development of the assessment and evaluation activities. The validation result revealed that the developed module is very much valid. The validated module was pilot-tested among 30 students whose academic performance was determined in terms of knowledge acquisition using pretest-posttest result analysis. Positive learning was determined based on the mean percentage score of the students' pretest and posttest with the net gain of 46.40 which shows that the learners' performance in the subject significantly improved obtaining outstanding (87%) and very satisfactory (13%) rating in the posttest. The mean score of the pilot-tested is 44.87. In general, the developed module is a potential learning material that will provide teachers and learners with what is needed for the teaching and learning process and will enhance the mathematical skills of grade 10 learners in Combinatorics and Probability.

INTRODUCTION

Mathematics subject is a fundamental part of the school curriculum. This subject is an instrument for the development of all other sciences. Mathematics is all around us. Knowingly and unknowingly, we use Mathematics in our everyday lives (Gafoor et al, 2015). Mathematics provides us with an effective way of building mental discipline and encourages logical reasoning and mental rigor. In addition, mathematical concepts and knowledge play a significant role in better understanding other subjects such as Science, Social studies, and even Music and Arts (International Mathematical Union, 2020). Students' performance in Mathematics is consistently given attention in different countries because it is regarded as a main subject, which is significant for the growth and development of the nation. Capuno et al (2019) noted that Mathematics is challenging for Filipino students.

Even before the pandemic in 2020, the Philippines faced challenges in mathematics education. The Philippines has consistently performed poorly in international mathematics large-scale assessments. One of the tools used to gauge the quality of education worldwide is the Programme for International Student Assessment (PISA). The Organisation for Economic Co-operation and Development (OECD) conducts PISA every three years to assess the Mathematics, Science, and Reading knowledge and skills of 15-year-old students worldwide. Results of 2018 showed that the Philippines ranked the second lowest in Science and Mathematics among 79 countries. PISA results revealed that the Philippines obtained an average score of 353 in mathematics. The survey suggested interventions should be made with students from countries like the Philippines (CNN Philippines, 2019). The Department of Education states that with the PISA results reflecting learners' performance in the National Achievement Test, there is urgency in addressing issues and gaps in attaining the quality of education in the Philippines (DepEd, 2019).

The COVID-19 pandemic over the last two years has exacerbated the current education crisis and widened the learning gap in Mathematics among young students (Sooknanan and Seemungal, 2023). The situation led to a decline in math learning, as students may need more remediation to progress to new lessons, leading to learning gaps (Torres, 2021).

The Department of Education (DepEd) said that the Philippines' poor showing in the 2022 PISA indicates a five-to-six-year lag in learning competencies in the country. The Philippines ranked 77th out of 81 countries globally in the student assessment conducted by the OECD for 15-year-old learners. In the 2022 student assessment, the country scored approximately 120 points lower than the average scores, with 355 in Math, 347 in Reading, and 356 in Science.

Combinatorics is a field of Mathematics concerned with the problems of selection, arrangement, and operation within a finite or discrete system (Grunbaum et al, 2024). Combinatorics is an initial material about probability consisting of basic rules of counting, permutation, and combination. Probability is a beneficial concept in everyday life as it is essential in decision-making (Meika et al, 2018). At a higher level, permutation and combination materials are essential in learning discrete Mathematics (National Council of Teachers of Mathematics, 2020). Moreover, NCTM states that combinatorics is essential as it is an integral part of the Mathematics curriculum from elementary to high school (National Council of Teachers of Mathematics, 2020). Using the basic rules of calculation, permutations, and the right combinations of problem-solving skills is challenging. This is in line with Wraughton and Nolan (2012), who state that understanding the rules of counting is challenging for students, especially when they struggle to determine when and how to apply rules of multiplication, permutation, and combinations in calculation.

According to Mashiach et al (2004), combinatorics is a mathematical topic considered challenging to teach and learn. Also, according to Spiegelhalter (2011), probability is unintuitive and difficult. There are mathematical problems that introduce the idea that uncertainty is something that can be discussed and analyzed. One way to overcome such challenges in learning combinatorics and probability is to present the combinatorics problem from daily life. In studying permutations and combinations, students need a relevant real-world context to stimulate learning and knowledge (Busadeea et al, 2013). Along with this, Sukoriyanto et al (2016) stated that permutation and combination materials require problems in the form of real-world issues to retain their knowledge.

The lack of teaching resources and learning materials for Combinatorics and Probability and the low mean percentage score of the third quarterly assessment in the subject mentioned above were the reasons which made the researcher conceptualize the development of a module in Combinatorics and Probability. The consolidated result of the third quarterly examination's Mean Percentage Score (MPS) of students in Gasan District for the last five years was recorded, which became one of the bases for the researcher to develop a module in Combinatorics and Probability. The third quarter MPS of Gasan District in Mathematics 10 for the last five years are as follows: 52.5 in 2019, 64.2 in 2020, 55.2 in 2021, 58.2 in 2022, and 56.89 in 2023. With these results, grade 10 learners are on the average level of mastery in Mathematics 10 in the third quarter.

Integrating Self-Learning Modules (SLMs) with alternative learning delivery modalities (LDMs) will help DepEd ensure that all learners have access to quality basic education, even those learners who cannot come to school every day because of financial issues. The development of instructional design and materials ensures that learners achieve specific learning goals or educational outcomes reflected in the education curriculum and provide relevant instructions suitable for a wide range of learning environments. According to the DepEd Secretary Leonor M. Briones, as stated by Malipot (2020), the SLMs and other LDMs are in place to address the needs of every learner. They cover all the bases to ensure that basic education is accessible.

Aside from the scarcity or lack of learning materials, there is a need to design and develop the material to help grade 10 learners understand the concept of Combinatorics and Probability. Thus, the researcher was encouraged and determined to develop a module.

The main purpose of this study is to develop and validate a module in Combinatorics and Probability for Grade 10 learners. It focused on proving that Combinatorics and Probability in the third quarter for grade 10 can be taught significantly using instructional modules. Specifically, the topics included in the module are based on the Most Essential Competencies (MELCs), which include the following: Permutations of objects, Combinations of objects, Solving Problems on Permutations and Combinations, Probability of Compound Events, Union and Intersections of Events, and Solving Problems on Probability.

The researcher utilized the ADDIE model to design and develop the learning module. The ADDIE model is a structured and systematic approach that helps solve learning problems by tailoring the learning resources to meet students' needs and characteristics. This model comprises five stages: analysis, design, development, implementation, and evaluation.

The module covered Combinatorics and Probability, which deals with selection, arrangement, and operation within a finite system (Torio et al, 2018) and was explicitly designed for Grade 10 students. On the other hand, the probability is the likelihood of something happening. When unsure about an event's outcome, we can discuss the probabilities of specific results and how probable they are. The probability of an event can only be from 0 to 1, and it can also be expressed as a percentage (Khan et al, 2020).

Significant research has been conducted on the development and validation of educational modules. However, further studies are needed to assess the effectiveness and benefits of module development on the curriculum. Thus, there is a need to adequately explore the development and validation of Mathematics lessons such as Combinatorics and Probability.

Research Questions

The main purpose of this study is to develop a module in Combinatorics and Probability as an alternative delivery mode of instruction to reach Grade 10 learners.

Specifically, it sought to answer the following questions:

1. How does the module in Combinatorics and Probability for grade 10 learners was developed in terms of:
   1.1 development of the intended learning outcomes,
   1.2 selection of the essential content,
   1.3 selection of the language used,
   1.4 development of the assessment and evaluation activities,

1.5 selection of references from available teaching and learning sources,
1.6 time frame of development, and
1.7 development of cover page and packaging?

2. What is the level of validity of the developed module as assessed by the Mathematics teachers and master teachers in terms of:
   2.1 lesson's objectives,
   2.2 content,
   2.3 language used
   2.4 assessment and evaluation activities?

3. What are the comments/feedback and suggestions of the experts/validators to help enhance the developed module in Combinatorics and Probability

4. What enhanced module could be developed by the researcher based on the validation made by the respondents?

5. What impact does the enhance module have on Grade 10 learners' knowledge acquisition performance, as assessed through pretest and posttest result analysis?

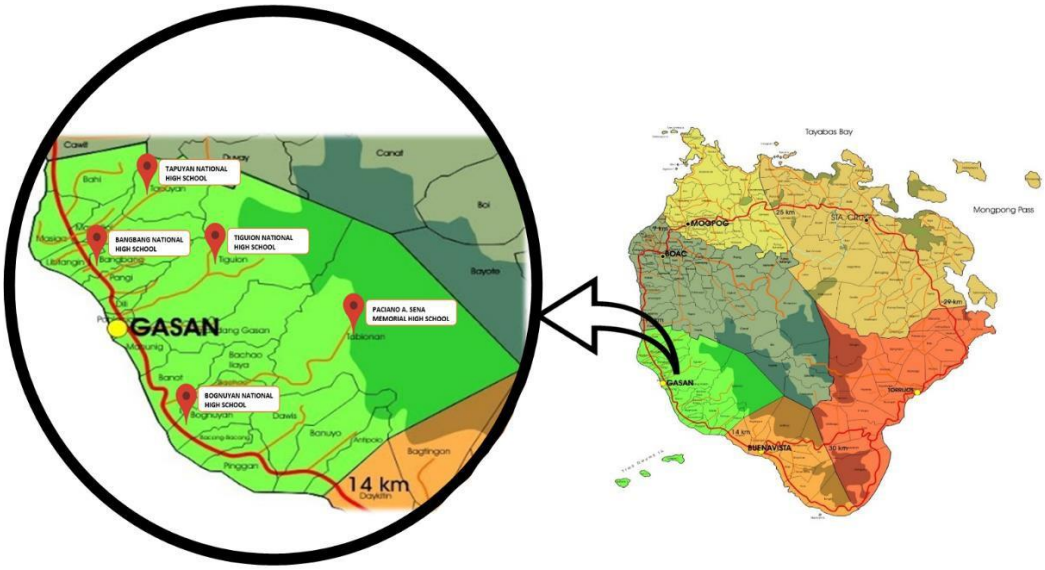
METHODOLOGY

Research Design

This study employed a descriptive-evaluative research design, which focused on the know-how of developing and validating the module in Combinatorics and Probability for Grade 10 learners.

The ADDIE model was utilized to develop and validate the Combinatorics and Probability module for Grade 10 students. ADDIE means Analysis, Design, Development, Implementation, and Evaluation. The module's goals, target audience, and resources were analyzed in the analysis phase. In the design phase, essential content, objectives, and strategies aligned with the instructional goals were selected and designed. The development phase includes developing objectives, selecting essential content, determining the language used, and developing assessment and evaluation activities. In the implementation phase, the pre-crafted module was distributed to Mathematics teachers and master teachers for validation. In the evaluation phase, the module was assessed for developing lesson objectives, selecting essential content and language used, and developing assessment and evaluation activities. Each criterion has quantifying statements on which the evaluators based their assessment of the module.

This study utilized a survey questionnaire that included a 5-point Likert scale and checklist format. Content experts reviewed the collected data, and their suggestions were obtained through document analysis for further refinement of the module.



In the end, this study appraised the impact of the developed module in students' performance in Combinatorics and Probability topics in Grade 10 Quarter 3. The data was analyzed and interpreted using suitable statistical measures.

Research Locale

This study was conducted in the province of Marinduque. This province belongs to the 81 provinces in the Philippine archipelago. Marinduque is considered the geographical center of the Philippines by the Luzon Datum of 1911, the mother of all Philippine geodetic surveys. The province is a "heart-shaped" island situated between Tayabas Bay and the Sibuyan Sea. Hence, the moniker "The Heart of the Philippines" was adopted. The province is located in the South Western Tagalog Region, also known as MIMAROPA, which was formerly designated as Region IV-B. The most widely accepted theory regarding the etymology of the province's name is that it is a hispanized corruption of either "malindig" or "malindug," which means "stand tall" or "elegant." This refers to the possibly active volcano in the island's southern section, Mount Malindig. The province of Marinduque comprises six (6) towns: Boac (the province's capital), Mogpog, Santa Cruz, Torrijos, Buenavista, and Gasan.

Specifically, this study was conducted among mathematics teachers and master teachers teaching mathematics 10 in the third quarter, combined with combinatorics and probability in the five (5) high schools in Gasan District. These include the following public high schools, as shown in Figure 3: Bangbang National High School, Bognuyan National High School, Paciano A. Sena Memorial High School, Tapuyan National High School, and Tiguion National High School.

Figure 3:
Map of Marinduque and Gasan Town

Research Population and Sample

The study's respondents were the Mathematics teachers and master teachers teaching grade 10 Mathematics. There are five (5) teacher-experts teaching Mathematics 10 in Gasan District, one teacher for each school. Participants are chosen on purpose because they are experts in the subject. Thus, the researcher employed purposive sampling to appraise the responses and data needed in the study holistically. Since the developed module caters to students studying Combinatorics and Probability, Grade 10 learners also constituted the population of the study which lasted for 9 weeks. The module was used by the 30 students of Bangbang National High School for further validation as well as to determine its effect on learners' performance.

Research Instrument

To interpret the level of validity of the developed module in Combinatorics and Probability, the researcher used the standardized Module Evaluation Checklist adapted from the study of scholars to develop and evaluate materials. The researcher utilized the questionnaire in checklist form used by Salazar (2018) to assess the content validity of the developed module in terms of objectives, essential content, language used, and assessment and evaluation activities.

The questionnaire consists of two (2) parts: (1) the participant's present status and qualifications and (2) the Evaluation Checklist for the Validity of the Developed Module. Part I of the questionnaire includes a demographic profile and workload profile, which gathered personal information about the teacher respondents, such as age, sex, civil status, length of service, area of specialization, civil service eligibility, current teaching position, subject taught, educational attainment, and professional training/seminar attended. Part II is the Evaluation Checklist for the validity of the developed module, which is divided into four (4) parts: (1) specific objectives of each lesson with five (5) listed characteristics of the objectives, (2) content of the module with ten (10) listed characteristics of the content, (3) language used with five (5) listed characteristics of the language used, and (4) assessment and evaluation activities with ten (10) listed characteristics of the assessment and evaluation activities. The evaluation checklist has five (5) degrees of intensity, with weights of five (5) being the highest rating and one (1) being the lowest rating. The scales of the statistical values adapted to assess the aspects are as follows:

Table 1.
Likert Scale for Evaluating Content Validity

Arbitrary Value	Weighted Mean	Description	Verbal Interpretation
5	4.20 – 5.00	Excellent	Very Much Valid
4	3.40 – 4.19	Very Satisfactory	Much Valid
3	2.60 – 3.39	Satisfactory	Moderately Valid
2	1.80 – 2.59	Fair	Less Valid
1	1.00 – 1.79	Poor	Not Valid

The researcher devised pretest and posttest which were also validated by the mathematics teachers and master teachers. These tests are almost parallel and with the same difficulty level based on the contents of the module. Each item has four choices with which one is correct. Each test was administered in paper-pencil-test mode within a 60-minute period. The contents are also in consonance with the competencies specified in the Most Essential Learning Competencies (MELCs). The results of these tests were used to evaluate the effect of using the module to the learners' performance on the lessons of Combinatorics and Probability.

Data Gathering Procedure

Seeking Approval to Conduct the Study. First, the researcher sent a request letter to Dr. Lynn G. Mendoza, the Schools Division Superintendent of the Division of Marinduque, through the HR Office, asking permission to conduct the study in the five (5) public high schools in Gasan District through the distribution of survey questionnaires. The researcher also asked permission through a letter from Mr. Gueller Dee V. Salazar to adapt the instrument he used in his 2018 study to validate a developed module.

Administration and Retrieval of Questionnaires. Upon granting the researcher's request to adopt the research instrument used by Salazar (2018) and the approval of the Division Superintendent of Marinduque, the researcher printed a copy of the survey form and submitted it to the school district Supervisor of Gasan, Dr. Elvin C Perlas. The printed copy of the survey and consent forms were then personally distributed to the respondents. The researcher went to five (5) public high schools in Gasan District. These include the following public high schools: Bangbang National High School, Bognuyan National High School, Paciano A. Sena Memorial High School, Tapuyan National High School, and Tiguion National High School. The researcher gave the respondents one to two weeks to complete the questionnaire. Afterward, the researcher collected the completed survey questionnaires at the principal's respective office, and then the researcher consolidated the data. The researcher also did in-person interviews to validate the data gathered through the survey.

Collation, Organization, and Analysis of Data. After retrieving and collecting all the data needed, it was encoded, collated, organized, and statistically treated using the

appropriate statistical tools. Results were considered by the researcher in module revision and development.

Revision of the Developed Module in Combinatorics and Probability. After analyzing the respondents' results, comments, and suggestions, the study concluded that the developed module is very much valid. Based on the feedback received, the researcher revised certain parts of the module to transform it into a valuable learning resource for grade 10 students.

The final copy was implemented in the teaching-learning process using 30 students in Bangbang National High School. The researcher utilized the results of pretest and posttest administered to appraise the effect of the developed module to the learners' performance for the whole third quarter.

Statistical Treatment

The researcher statistically examined the collected data to provide answers to the study questions. The researcher recorded and tabulated the frequency of responses on the level of validity of the developed module in terms of the objectives of each lesson, essential content, the language used, and assessment and evaluation activities with which each category has quantifying statements.

The mean scores were computed to measure the respondent's evaluation of the developed module regarding the objectives of each lesson, essential content, language used, and assessment and evaluation activities.

The results of the evaluation of teachers and content experts to the instrument were coded on the 5-point Likert Scale determination per criterion, wherein the higher scores embody more positive responses. Scores were analyzed using a descriptive data analysis procedure. The scales of the statistical values adapted to assess the aspects are as follows:

Likert Scale for Evaluating Content Validity

Arbitrary Value	Weighted Mean	Description	Verbal Interpretation
5	4.20 – 5.00	Excellent	Very Much Valid
4	3.40 – 4.19	Very Satisfactory	Much Valid
3	2.60 – 3.39	Satisfactory	Moderately Valid
2	1.80 – 2.59	Fair	Less Valid
1	1.00 – 1.79	Poor	Not Valid

RESULTS

Stages / Phases of Module Development

1. Development of the Intended Learning Outcomes (ILOs)

Intended Learning Outcomes (ILOs) specify what learners are expected to know, understand, and be able to do as a result of an educational activity. These outcomes serve as a guide for the researcher in designing and developing the module in Combinatorics and Probability for Grade 10 learners. Developing ILOs is a crucial step in crafting the module. They should be specific, measurable, achievable, relevant, and time-bound (SMART).

First, the researcher defined the learning goals. The researcher began by clearly defining what the grade 10 learners of Gasan District should achieve by the end of the third quarter. The researcher considered the Most Essential Learning Competencies (MELCs) prescribed by the Department of Education (DepEd). These competencies were provided by DepEd for schools and teachers to use as the primary resource in choosing and implementing varied learning techniques and strategies appropriately.

The Department of Education (DepEd) has instructed schools to consult the Most Essential Learning Competencies (MELCs) when creating learning activity sheets, self-learning modules, and other instructional materials. Furthermore, schools are encouraged to adhere to the MELCs' content and to avoid creating new lists of learning competencies for different subject areas (Llego, 2023).

Table 2.
Most Essential Learning Competencies of Mathematics 10 Third Quarter

Quarter	Content Standards The learner...	Performance Standards The learner...	Most Essential Learning Competencies The learner...	Duration	K to 12 CG Code
Q3	demonstrates understanding of key concepts of combinatorics and probability	is able to use precise counting technique and probability in formulating conclusions and making decisions.	illustrates the permutation of objects.	Week 1 to 2	M10SP-IIIa-1
			solves problems involving permutations.		M10SP-IIIb-1
			illustrates the combination of objects.	Week 3 to 4	M10SP-IIIc-1
			differentiates permutation from combination of n objects taken r at a time.		M10SP-IIIc-2
			solves problems involving permutations and combinations.	Week 5	M10SP-IIId-e-1
			illustrates events, and union and intersection of events.	Week 6	M10SP-IIIf-1

illustrates the probability of a union of two events.	Week 7	M10SP-IIIg-1
finds the probability of (A∪B).	Week 8	M10SP-IIIg-h-1
illustrates mutually exclusive events.	Week 9	M10SP-IIIi-1
solves problems nvolving probability.		M10SP-IIIi-j-1

Table 2 above shows the Most Essential Learning Competencies of Mathematics 10 in the third quarter. These competencies are the intended learning outcomes which the researcher considered as a guide in designing and developing the module.

After identifying the learning goals/learning competencies, the researcher broke down the overarching goals into smaller, more manageable learning objectives, skills, or attitudes that learners should gain. The researcher ensures that each aim is aligned with the curriculum standards and overall goals and is achievable within the module's scope to be developed.

The study of Zalun (2023) revealed that the Most Essential Learning Competencies (MELCs) is highly utilized in terms of learning resources content validity, appropriateness of learners' activities, congruency of the lesson plan, alignment of the assessment, and time budget. It also revealed that the MELCs have a strong relationship with the level of learning development.

Next, the researcher applied Bloom's taxonomy to guide her in developing learning objectives. Bloom's taxonomy categorized learning objectives into six levels, ranging from simple recall of information to higher-order thinking skills such as evaluation and creation. The researcher ensured that learning objectives covered a range of cognitive levels to promote deep learning.

Each learning objective was expressed using precise, actionable verbs that describe observable behaviors. Action verbs such as analyze, evaluate, synthesize, and apply indicate the level of cognitive engagement required of learners. The vague and ambiguous language that can lead to confusion was avoided. The researcher reviewed the learning objectives to ensure that these are specific, clear, and unambiguous. Unnecessary jargon or complex language that may hinder understanding was removed. Each objective communicates precisely what learners are expected to accomplish. Also, learning objectives are sequenced logically, allowing for progression and coherence, starting from foundational concepts and skills to more advanced topics.

The researcher also considered the diverse needs and backgrounds of the learners when crafting learning objectives. The objectives are inclusive and accessible to all learners, regardless of their experience and prior knowledge.

Finally, the researcher reviewed the identified learning objectives multiple times to ensure they meet the learners' needs and align with the overall instructional goals. Based

on feedback from the teacher-respondents, the researcher revised parts of the objectives as needed.

2. Selection of the essential content

The researcher followed several steps in selecting the essential content of the module to be developed. The first step was to identify learning objectives. The researcher then clearly defined what the learners should achieve by the end of the third quarter.

The most important topics are determined for achieving the learning objectives. The researcher identified the core concepts and information essential for understanding the subject matter, which will be the module's focus. The topics/lessons under Mathematics 10 Combinatorics and Probability for Quarter 3 are listed per module every week, Module 1 to Module 10, with K to 12 curriculum guide codes. These are as follows:

- Module 1 – Week 1: Illustrating Permutations of Objects (M10SP-IIIa-1)
  - Lesson 1: Illustrating Permutation of Distinct Objects
  - Lesson 2: Illustrating Permutation of Non-Distinct Objects
  - Lesson 3: Illustrating Circular Permutation of Objects
- Module 2 – Week 2: Solving Problems involving Permutations of Objects (M10SP-IIIb-1)
  - Lesson 1: Solving Problems involving Permutations of Objects
- Module 3 – Week 3: Illustrating Combinations of Objects (M10SP-IIIc-1)
  - Lesson 1: Illustrating Combinations of Objects
  - Lesson 2: Differentiating Permutation and Combination
- Module 4 – Week 4: Combination of *n* Objects Taken *r* at a Time (M10SP-IIIc-2)
  - Lesson 1: Combination of *n* objects taken *r* at a time
- Module 5 – Week 5: Solving Problems involving Permutations and Combinations (M10SP-IIId-e-1)
  - Lesson 1: Solving Problems involving Permutations and Combinations
- Module 6 – Week 6: Events, and Union and Intersection of Events (M10SP-IIIf-1)
  - Lesson 1: Illustrating Different Types of Events
  - Lesson 2: Illustrating Union, and Intersection of Events
- Module 7 – Week 7: Probability of The Union of Two Events (M10SP-IIIg-1)
  - Lesson 1: Probability of The Union of Two Events
- Module 8 – Week 8: Solving the Probability of $A \cup B$ (M10SP-IIIg-h-1)
  - Lesson 1: Solving the Probability of $A \cup B$
- Module 9 – Week 9: Illustrating Mutually Exclusive Events (M10SP-IIIi-1)
  - Lesson 1: Illustrating Mutually Exclusive Events
- Module 10 – Week 10: Solving Problems involving Probabilities (M10SP-IIIj-1)
  - Lesson 1: Solving the Probability of Independent Events and Dependent Events
  - Lesson 2: Solving Conditional Probability

Another important aspect considered by the researcher is the learners' needs. Understanding the background, prior knowledge, and learning preferences of the grade 10 learners of Gasan District is considered. It is recorded that for the last five years, the Mean Percentage Score (MPS) of the third quarterly assessment of the grade 10 learners

of Gasan District has been low. The least mastered competencies were also noted. The researcher tailored the content to meet the learners' needs and level of understanding.

The researcher also ensured that the content was aligned with the relevant curriculum standards or learning outcomes to develop a module covering what is required for the grade 10 learners in the third quarter. All available content was reviewed, and unnecessary or tangential information was filtered out, keeping the focus on key concepts and principles that are directly relevant to the learning objectives. Each lesson in the module reflects the most important aspects of what is being taught.

The researcher also utilized frameworks such as Bloom's taxonomy to ensure that the selected content covers various levels of cognitive complexity, from basic understanding to higher-order thinking skills such as analysis and evaluation. Complex topics were broken down into smaller, more manageable, and easier-to-understand topics. Information was presented in a structured manner that facilitates understanding and retention. Different topics are presented accurately and precisely with a variety of supplementary activities. Ideas, concepts, and points presented are well-expressed.

The study of Omer et al (2001) stated that a module can be organized if it is constructed in logical ways by the nature of the lesson and the characteristics of the students it is intended for, such as from simple to complex, from known to unknown, from facts and fragmented knowledge to laws and comprehensive relationships, from the whole to the part, and from the ancient to the contemporary, which are arranged logically and sequentially.

Learning experiences with the developed module are enhanced by including visual aids such as diagrams, charts, and illustrations. Visual presentations presented in the module will help clarify complex concepts and improve comprehension among learners. The researcher also includes real-life examples and applications to demonstrate how the content is relevant and applicable in practical contexts. This helps learners connect theoretical knowledge to practical situations. The researcher reviewed and refined the module based on feedback from the teacher-respondent. The contents are adjusted to improve relevance, clarity, and effectiveness in achieving the learning objectives.

3. Selection of the language used

Several factors were considered by the researcher when selecting the appropriate language for crafting the module. These include the target audience, subject matter, and context.

The researcher researched the demographics, language proficiency, and cultural background of grade 10 learners to determine the language they were most comfortable with.

The language used in the module is designed to be accessible to the learners. The researcher avoided overly technical or academic language, ensuring the vocabulary and

instructions suited the learners' age and educational background. The instructions are presented in a clear, unambiguous, and easy-to-follow manner, enhancing the learners' comprehension of the module's content.

The language used supports the learning objectives. The researcher ensured that the language chosen communicates and engages learners effectively. The researcher sees to it that words are correctly used. The module is accompanied by clear and specific directions for their use. The lessons are presented in sentences and paragraphs that are grammatically correct.

The researcher also considered localization, which involves adapting the content linguistically and culturally to make it more relevant and understandable to the learners.

The researcher was able to gather and seek feedback from the teacher-respondents as evaluators of the developed module. This helped the researcher assess whether the language used resonates with learners and effectively communicates the content. The researcher made sure that consistency was maintained throughout the module in terms of terminology, style, and tone to avoid confusion and enhance learning continuity.

4. Development of assessment and evaluation activities

Developing assessment and evaluation activities for the module involved careful consideration of the learning objectives, content, and the learners' needs. The researcher clearly defined what the learners should achieve by the end of the lesson, and learning objectives or outcomes guided the researcher in the developing assessment and evaluation activities.

Knowing the learners' backgrounds, knowledge levels, and preferences helps the researcher tailor assessment activities to their needs and ensure they are engaging and relevant.

The researcher carefully considers appropriate assessment methods based on the learning objectives and the nature of the content. Assessment and evaluation activities are carefully designed to measure the intended learning outcomes. The researcher ensures that each assessment item is related to specific learning objectives. The module has a provision for self-assessment.

The researcher also provided clear instructions for assessment and evaluation activities. The purpose of each assessment activity and detailed instructions on how to do and complete it are stated clearly. These include information on the evaluation criteria and any relevant resources or materials.

The researcher ensured that assessment and evaluation items measure higher-order thinking skills, improving understanding and retention of the content.

Assessment activities are created with inclusive features that cater to diverse learning needs, including those who have learning difficulties. The test items are written carefully to ensure that learners can understand them. Moreover, the answer to one item provides a clue to the answer to another item.

With feedback from the teacher-respondent to the developed module, the researcher revised and refined assessment strategies as needed.

5. Selection of references from available teaching and learning sources

Though there are a limited number of available teaching and learning resources and materials for Grade 10, these resources are great sources and references used by the researcher in developing the module in Combinatorics and Probability.

In planning and crafting the module, thoughtful analysis of factors affecting the quality of teaching and learning was done. Such factors are problems and needs of the current curriculum and resources used in teaching. Content coverage of teaching materials and resources available are broad and general. Some are with abstract concepts. Some are experimental in nature and with research-based lessons. Some contents need prior knowledge to be understood. These identified gaps were taken into consideration in the process of structuring learning into the module to suit learning conditions.

The most important topics are determined for achieving the learning objectives. The researcher identified the core concepts and information essential for understanding the subject matter, which will be the module's focus. The developed module is more specific and comes with step-by-step procedure or solution to a given task or problem for learners to easily understand the topics discussed in the module.

Authors and their ideas from the resources used to develop the module in Combinatorics and Probability were properly cited and given credits to acknowledge the contribution of other writers and researchers in the developed module.

The researcher used the following resources, cited in APA format, as references in the developed module:

Callanta, Melvin, Canonigo, Allan, Chua, Arnaldo, Cruz, Jerry, Esparrago, Mirla, Garcia, Elino, Magnaye, Aries, Orines, Fernando, Perez, Rowena and Concepcion Ternida. *Mathematics Grade 10 Learner's*. Pasig: Department of Education, 2015

Oronce, Orlando, and Marilyn Mendoza. *E-Math 10*. Manila: Rex Bookstore, Inc., 2017.

Torio, Von, Ibanez, Jean, and Tiamzon, Ernan. *Smart in Math 10.* Quezon City. Isa-Jecho Publishing, Inc., 2018

6. Time frame of development

It took the researcher almost a year to complete the process of development and validation of the module in Combinatorics and Probability for Grade 10 learners. Table 3 below shows the time frame of the module development.

Table 3.
Time frame of Module Development

Time	Activity
July 2023 to September 2023	Development and crafting of the module
October 2023	Distribution of the pre-crafted module and survey checklist to the respondents for evaluation
November 2023	Retrieval of the survey checklist
December 2023 to January 2024	Revision and editing of the Developed Module based on feedback of the respondents
February 2024 to March 2024	Pilot testing of the Developed Module

In July 2023, the researcher started the development of the module. The lack of teaching resources and learning materials for Combinatorics and Probability and the low mean percentage score in the third quarter in Mathematics 10 were the reasons which made the researcher conceptualize the development of the module.

Even before the pandemic in 2020, the Philippines faced challenges in mathematics education. The Philippines has consistently performed poorly in international mathematics large-scale assessments.

Meanwhile, Combinatorics is a mathematical topic considered challenging to teach and learn according to the study of Mashiach et al (2004), and Probability is unintuitive and difficult according to Spiegelhalter (2011). These support the study of Capuno et al (2019) saying Mathematics is challenging for Filipino students. That is why there is a need to design and develop the material to help Grade 10 learners understand the concept of Combinatorics and Probability.

From July to September 2023, the researcher developed and crafted the module in Combinatorics and Probability for Grade 10 learners. ADDIE model was adapted and utilized in the development and validation of the module. The module's goals, target audience, and resources were analyzed in the analysis phase. In the design phase, essential content, objectives, and strategies aligned with the instructional goals were selected and designed. The development phase includes developing objectives, selecting essential content, determining the language used, and developing assessment and evaluation activities.

Before the distribution of the pre-crafted module to the respondents (teacher-validators) in October 2023, the researcher seek approval to conduct the study. First, the researcher sent a request letter to Dr. Lynn G. Mendoza, the Schools Division Superintendent of the Division of Marinduque, through the HR Office, asking permission to conduct the study in the five (5) public high schools in Gasan District through the distribution of survey questionnaires. The researcher also asked permission through a letter from Mr. Gueller Dee V. Salazar to adapt the instrument he used in his 2018 study to validate a developed module. Upon granting the researcher's request to adopt the research instrument used by Salazar (2018) and the approval of the Division Superintendent of Marinduque, the researcher printed a copy of the survey form and submitted it to the school district Supervisor of Gasan, Dr. Elvin C Perlas. The printed copy of the survey and consent forms were then personally distributed to the respondents. The researcher went to five (5) public high schools in Gasan District.

In November 2023, the researcher collected the completed survey questionnaires at the principal's respective office, and then the researcher consolidated the data. The researcher also did in-person interviews to validate the data gathered through the survey. After retrieving and collecting all the data needed, it was encoded, collated, organized, and statistically treated using the appropriate statistical tools. Results were considered by the researcher in module revision and development.

After analyzing the respondents' results, comments, and suggestions, the study concluded that the developed module is very much valid. Based on the feedback received, the researcher revised certain parts of the module to transform it into a valuable learning resource for grade 10 students from December 2023 to January 2024.

From February to March 2024, the final copy was implemented in the teaching-learning process using 30 students in Bangbang National High School. The researcher utilized the results of pretest and posttest administered to appraise the effect of the developed module on the learners' performance for the whole third quarter of the school year 2023-2024.

7. Development of cover page and packaging

According to evolutionary psychology, judging a book by its cover page is an inherent human trait based on survival, so first impressions matter immensely. Therefore, when designing a cover page for the development of a learning material, a captivating cover page is vital for making an expression. The cover page sets the tone of the content. It hints at what the content is about and is the first thing the reader is confronted with.

The researcher considered many elements to have a good and attractive design of the cover page of the developed module. The contrast, balance, emphasis, proportion, hierarchy, repetition, rhythm, pattern, white space, variety and unit.

The purpose of the content and the target audience of the module are considered by the researcher to create stand-out cover page and packaging. The questions "What am I creating and who is it for?", "What message do I want to convey?", and "Who am I

trying to reach?" are considered and answered by the researcher in creating the cover page of the developed module.

To create a compelling cover page and packaging, it's essential to include a vital visual element that aligns with the theme of the content. The researcher chose a visual element that grabs attention without overwhelming the viewers, a captivating image, or an eye-catching graphic about the module. The researcher wanted to capture the learners' attention but not overwhelm them. Using too many different types of visuals on the same page are avoided to maintain a clean or organized look. The researcher chose a harmonious color palette that aligns with the purpose of the module, and target audience – the Grade 10 learners

The researcher experimented with different lay-outs and arrangements of the visuals and illustrations in the cover page of the developed module to find the perfect balance which will captivate the learners' attention. A balanced composition ensures that the cover page looks visually appealing and professional.

Level of Validity of the Developed Module

The draft of the module was written and printed. The developed module was distributed to the evaluators/validators of the module, the secondary school mathematics teachers, and master teachers teaching Mathematics 10 Third quarter, Combinatorics and Probability topics in Gasan District. Using the survey checklist adapted from the validated evaluation instrument Salazar (2018) used, the module was assessed and evaluated according to the four criteria: the lesson's objectives, essential content, the language used, and assessment and evaluation activities. Each criterion had quantifying statements on which the evaluators based their assessment of the module.

Table 4.
Rating on the Characteristics of the Specific Objectives of the Developed Module

Indicators	Frequency					Average	D	DI
	5	4	3	2	1			
1. Each lesson in the module is accompanied by specific objectives.	5	0	0	0	0	5.00	Excellent	VMV
2. The words used in the objectives are clear and easily understood.	4	1	0	0	0	4.80	Excellent	VMV
3. The specific objectives are realistic.	4	1	0	0	0	4.80	Excellent	VMV
4. The objectives are measurable	5	0	0	0	0	5.00	Excellent	VMV
5. The specific objectives are attainable within specified time limit.	2	3	0	0	0	4.40	Excellent	VMV

Composite Mean	**4.80**	**Excellent**	**VMV**

Legend:

1.00 – 1.79	*poor*	*not valid (NV)*
1.80 – 2.59	*fair*	*less valid (LV)*
2.60 – 3.39	*satisfactory*	*moderately valid (ModV)*
3.40 – 4.19	*very satisfactory*	*much valid (MV)*
4.20 – 5.00	*excellent*	*very much valid (VMV)*
D	*Description*	
DI	*Descriptive Interpretation*	

Table 4 presents the ratings given by the mathematics teachers and master teachers on the specific objectives of the module.

The specific objectives of each lesson in the module were rated very much valid, with a composite mean of 4.80. Evaluators gave the highest average rating of 5.0, considering that the module is accompanied by specific objectives that are clear and easily understood, realistic, measurable, and attainable within a specific time limit.

Specific objectives accompany each lesson in the module. Defined learning goals are broken down into smaller, more manageable learning objectives describing the knowledge, skills, or attitudes the learners should gain.

The words used in the objectives are clear and easily understood. Each learning objective uses precise, actionable verbs describing observable behaviors. Action verbs such as analyze, evaluate, synthesize, and apply indicate the level of cognitive engagement required of learners. Vague or ambiguous language that can lead to confusion is avoided.

The learning objectives are sequenced in a logical order that allows for progression and coherence, starting with foundational concepts and skills and moving on to more advanced topics.

The objectives are realistic, measurable, and attainable within the specified time limit. Each objective communicates precisely what learners are expected to accomplish within the time.

As Donnelly and Fitzmaurice (2005) noted in their study, the module must be accompanied by distinct learning objectives so that learners are aware of what they must do after engaging in the learning process.

Table 5.
Rating on the Content of the Module

Indicators	Frequency 5	4	3	2	1	Average	D	DI
1. Each lesson reflects the most important aspects of what is being taught.	3	2	0	0	0	4.60	Excellent	VMV
2. The lessons are presented at a pace that allows for reflection and review.	5	0	0	0	0	5.00	Excellent	VMV
3. There is adequate provision for supplementary activities/exercises.	3	2	0	0	0	4.60	Excellent	VMV
4. The content leads to the attainment of the objectives.	4	1	0	0	0	4.80	Excellent	VMV
5. There is adequate presentation/discussion of content.	4	1	0	0	0	4.80	Excellent	VMV
6. The information about the different topics is accurate and precise.	4	1	0	0	0	4.80	Excellent	VMV
7. There is variety of supplementary activities	4	1	0	0	0	4.80	Excellent	VMV
8. The ideas, concepts, and points presented are well-expressed.	4	0	1	0	0	4.60	Excellent	VMV
9. The examples presented are current, accurate, and defensible.	2	3	0	0	0	4.40	Excellent	VMV
10. The lessons are aligned on the curriculum.	5	0	0	0	0	5.00	Excellent	VMV
Composite Mean						**4.74**	**Excellent**	**VMV**

Legend:

1.00 – 1.79	*poor*	*not valid (NV)*
1.80 – 2.59	*fair*	*less valid (LV)*
2.60 – 3.39	*satisfactory*	*moderately valid (ModV)*
3.40 – 4.19	*very satisfactory*	*much valid (MV)*
4.20 – 5.00	*excellent*	*very much valid (VMV)*
D	*Description*	
DI	*Descriptive Interpretation*	

Table 5 provides the evaluators' rating of the content of the module. The module's content was rated using the ten (10) specific criteria with a composite mean of 4.74, which is very much valid. Based on the rating, it can be noted that each lesson reflects the most important aspects of what is being taught. Also, the lessons in the module are presented at a pace that allows for reflection and review. That is why the evaluators' highest rating was five (5) on that specific criterion. The module's contents also lead to attaining the objectives, and there is an adequate presentation and discussion of content. The

module's content is aligned with the relevant curriculum standards or learning outcomes covering the topics required for Grade 10 learners in the third quarter.

The content leads to the attainment of the objectives. In the study conducted by Roman (2016), it was emphasized that the content contributes to the assessment of the module's validity.

The module enriches learning experiences by incorporating visual aids such as diagrams, charts, and illustrations. These visual presentations serve a practical purpose, clarifying complex concepts and enhancing comprehension among learners. Real-life examples and applications demonstrate the relevance and applicability of the content in practical contexts, ensuring that learners can apply their knowledge effectively.

Lai and Neuby (2012) found that the quality of the graphics presented in a module can affect how it is interpreted, and the benefits derived from using it. Pictures and other visual aids decrease the need for extended textual descriptions. Graphics can enhance understanding, inference, prospective discovery, and learner motivation.

Table 6.
Rating on the Language Used in the Module

Indicators	Frequency 5	4	3	2	1	Average	D	DI
1. The words used in the module are correctly used.	4	1	0	0	0	4.80	Excellent	VMV
2. The module is accompanied by clear and specific directions for their use.	5	0	0	0	0	5.00	Excellent	VMV
3. The vocabulary used is suitable to the reading and understanding level of students to whom the modules are intended.	4	1	0	0	0	4.80	Excellent	VMV
4. Instructions to the students are clear, unambiguous, and easy to follow.	4	1	0	0	0	4.80	Excellent	VMV
5. The lessons are presented in paragraph/sentences that are grammatically correct.	4	1	0	0	0	4.80	Excellent	VMV
Composite Mean						**4.84**	**Excellent**	**VMV**

Legend:

1.00 – 1.79	*poor*	*not valid (NV)*
1.80 – 2.59	*fair*	*less valid (LV)*
2.60 – 3.39	*satisfactory*	*moderately valid (ModV)*
3.40 – 4.19	*very satisfactory*	*much valid (MV)*
4.20 – 5.00	*excellent*	*very much valid (VMV)*
D	*Description*	
DI	*Descriptive Interpretation*	

Table 6 shows the rating of the mathematics teachers and mathematics teachers on the language used in the module.

The language usage of the module has a composite mean of 4.84. This means that the choice of words is very much valid and appropriate to the learners' reading ability and accompanied by clear and specific directions for their use.

The language used in the module is accessible to the learners, meaning they are familiar with the words used. Words used in the module can be easily understood by the learners. There are no technical or academic languages that are hard to understand.

Similarly, the level of readability of words is appropriate to the learners' age and educational background. The vocabulary used suits the reading and understanding level of learners to whom the module is intended. Instructions to the students are clear, unambiguous, and easy to follow. Clear instructions make learners do and finish the task accurately and precisely.

The language used supports the module's learning objectives. Chosen language effectively communicates concepts and engages learners. Words in the module are used correctly. The lessons are presented in paragraphs and sentences that are grammatically correct.

When creating a concise and clear concept, language, ideas, and structure for the module, consideration must be given to the learner's learning capacities, preferences, and degree of knowledge. According to Salazar (2018), in his study, the module's clarity must be given with clear information and language to facilitate learning.

Table 7.
Rating on the Assessment and Evaluation Activities in the Module

Indicators	Frequency					Average	D	DI
	5	4	3	2	1			
1. The module has provision for self-assessment.	5	0	0	0	0	5.00	Excellent	VMV
2. The items help increase understanding and retention of the content.	4	1	0	0	0	4.80	Excellent	VMV
3. The items focus on important objectives and content of the lessons.	5	0	0	0	0	5.00	Excellent	VMV
4. The items in the evaluation are congruent to the specific objectives.	5	0	0	0	0	5.00	Excellent	VMV
5. There are items which measure higher thinking skills.	5	0	0	0	0	5.00	Excellent	VMV

6. The items are grammatically correct.	5	0	0	0	0	5.00	Excellent	VMV
7. The items are arranged from easy to difficult.	3	2	0	0	0	4.60	Excellent	VMV
8. The test items are written at a level that students can understand.	3	2	0	0	0	4.60	Excellent	VMV
9. The answer to one item furnishes or gives clue to the answer in another item.	3	1	1	0	0	4.40	Excellent	VMV
10. The items cover the important competencies to be developed.	4	1	0	0	0	4.80	Excellent	VMV
Composite Mean						**4.82**	**Excellent**	**VMV**

Legend:

1.00 – 1.79	*poor*	*not valid (NV)*
1.80 – 2.59	*fair*	*less valid (LV)*
2.60 – 3.39	*satisfactory*	*moderately valid (ModV)*
3.40 – 4.19	*very satisfactory*	*much valid (MV)*
4.20 – 5.00	*excellent*	*very much valid (VMV)*
D	*Description*	
DI	*Descriptive Interpretation*	

Table 7 presents the rating given by the mathematics teachers and master teachers on the assessment and evaluation activities in the module.

The evaluation format gained a composite mean of 4.82, meaning the set of assessment tools was very much valid. The evaluation tools used in the developed module measure what is supposed to be measured.

Assessment methods are appropriate based on the learning objectives and the nature of the content. Assessment activities directly measure the intended learning outcomes. Each assessment item is related to specific learning objectives. Instructions for each assessment and evaluation activity are provided clearly. The purpose of each assessment activity and detailed instructions on how to do and complete the task are clearly stated.

Assessment and evaluation items help increase understanding and retention of the content. Some items measure higher-order thinking skills. The items are grammatically correct. The items are arranged from easy to complex. Considering accessibility and inclusivity in the assessment, assessment activities are made accessible to all learners, including those with learning disabilities or diverse learning needs. Answers to one item furnishes or gives clues to the answer in another item. The test items are written carefully at a level that learners can understand. Also, items in the assessment and evaluation activities of the developed module cover the essential competencies to be developed by learners. Items focus on important objectives of the lessons.

According to Heramil (2016), a self-learning module has been designed to aid learners who cannot attend individual or group education sessions. This module provides learning activities and assessment and evaluation of the students, enabling learners to work independently at their own pace rather than the group's pace, which can either be too fast or too slow for some learners.

Result of the Validation of the Developed Module

Table 8.
Summary Result of Rating on the Validation of the Developed Module

Indicators	Mean	D	DI
I. Characteristics of the specific objectives of the module	4.80	Excellent	VMV
II. Characteristics of the content of the module	4.74	Excellent	VMV
III. Characteristics of the language used	4.84	Excellent	VMV
IV. Characteristics of evaluation activities	4.82	Excellent	VMV
Average Weighted Mean	**4.80**	**Excellent**	**VMV**

Legend:

1.00 – 1.79	*poor*	*not valid (NV)*
1.80 – 2.59	*fair*	*less valid (LV)*
2.60 – 3.39	*satisfactory*	*moderately valid (ModV)*
3.40 – 4.19	*very satisfactory*	*much valid (MV)*
4.20 – 5.00	*excellent*	*very much valid (VMV)*
D	*Description*	
DI	*Descriptive Interpretation*	

Table 8 presents the rating summary result on the developed module's validation. The module developed by the researcher is very much valid, as reflected by the ratings of the evaluators—the mathematics teachers and the master teachers of Gasan District. After thorough analysis and computation of the survey checklist result used as the research instrument to evaluate the developed module, the average weighted mean of 4.80, which is very much valid, is the general experts' feedback on the developed module.

The evaluation result confirmed that the output module is very much valid. Though there are minor issues, comments, feedback, and suggestions by the validators which need to be considered. In general, the developed module is near to a perfect learning resource that will provide the teachers and learners with what is needed for the teaching and learning process, a module that will help create self-phase learning and that will significantly enhance the mathematical skills of students, potentially transforming their academic journey. The module may serve as a relevant learning resource that may increase the potential in mathematical skills through reasoning and analogy aligned with the DepEd curriculum and content standards.

Comments, Feedback, and Suggestions of the Validators to help Enhance the Developed Module

- There should be an introduction or preface about the topic or lesson for the week. This may include but is not limited to the importance of the lesson as to why it is essential to teach and learn. While the content itself is most important, a strong introduction can engage learners, provide context, and outline what learners are going to learn. Introductions, even brief ones, can make a huge difference for the learners' learning experience. A strong introduction can hook learners and pique their interests (Amanda, 2023).

- There should be a table of content so that lessons will be seen easily. A table of contents is a page or section of books, modules, and other learning materials that lists the chapters or sections of the material and their corresponding page number. The table of contents serves two purposes: 1). It gives users an overview of the document's contents and organization, and 2). It allows readers to go directly to a specific section of a document.

- In the discussion part of the lesson in the module, the writer / researcher may apply the 3E's (Engage, Elaborate, and Evaluate).

Engage. The part or section of the module which provides activity / activities to gain an understanding of the students' prior knowledge and identify knowledge gaps if there is. This part also fosters an interest in the upcoming concepts so that students will be ready to learn.

Elaborate. This phase focuses on giving students space to apply what they've learned. This helps them to develop a deeper understanding of the lesson.

Evaluate. It is in this phase of the module which provides activity / activities to see whether learners have a complete grasp of the core concepts discussed.

- Examples provided in each of the lessons in the developed module should be localized and contextualized especially in the problem-solving part of the lesson. Localization and contextualization are crucial in education because these ensure that learning materials are accessible and relevant to students across different linguistic and cultural backgrounds. Essential content should be aligned with local languages, customs, and cultural norms.

The Enhanced Module in Combinatorics and Probability

As a result of the validation and series of revision, the enhanced module in Combinatorics and Probability for Grade 10 learners can be a potential learning material that can help assist teachers in presenting lessons in Combinatorics and Probability.

The enhanced module is packed wholly and systematically with a set of planned learning experiences inside designed to help students to comprehend specific learning goals and competencies. This module is different from other existing modules in Mathematics because examples provided in the module are localized and contextualized making them to be easily understood by learners.

Earlier studies show how instructional materials can assist teachers in presenting their lesson logically and sequentially to the learners (Isola, 2010), as supported by Abdu-Raheem (2014), who showed in his study how instructional materials aid explanations and make the learning of subject matter understandable to learners during the teaching-learning process.

Pretest and Posttest Analysis Using the Developed Module

The validated copy of the module in Combinatorics and Probability was pilot tested among the 30 grade 10 learners. Learner's performance was determined by calculating the percentage of students who showed improvement in their scores after they underwent learning through the module using pretest and posttest assessments. The difference in mean percentage score (MPS) which is equal to 46.40 indicates that the learners significantly acquired knowledge in the lessons. This further implies that the utilization of the developed module led students to have a better performance.

Furthermore, the utilization of the material not only enhanced comprehension and knowledge but also piqued the student's interest in the subject as observed during the pilot testing. It was clear that students were actively engaged in the learning process with the teacher acting as a facilitator (Raman, 2006). The developed module likely supports independent learning. This aligns with Naval (2014), in his research, indicating that students tend to engage with modules at their preferred times, and this particular module made them to be interested in learning. Consequently, students exhibited high concentration due to the learner-centered exercises included in the module (Lea, 2003).

The increase in MPS from the pretest to posttest indicates that positive learning occurred. The posttest scores reflect that 45 out of 50 items were correctly answered by the learners with an MPS of 89.74. The analysis results displayed in Table 9 show that the majority of the students performed well in the subject. Posttest rating reveals that 87% of the learners had an outstanding rating and 13% had very satisfactory rating.

Table 9.
Performance of Learners Using the Result of Pretest and Posttest Analysis

Difference in MPS of Pretest and Posttest										
Type of Test	**No. of Cases**	**No. of Items**	**HPS**	**LPS**	**HSO**	**LSO**	**Mean**	**MPS**	**SD**	**Difference in MPS (Posttest – Pretest)**
Pretest	30	50	50	0	35	11	21.67	43.34	6.12	46.40
Posttest	30	50	50	0	50	38	44.87	89.74	2.97	

Learner Progress and Achievement in Pretest and Posttest						
Descriptors	**Grading Scale**	**Remarks**	**Pretest**		**Posttest**	
			No. of Learners	**%**	**No. of Learners**	**%**
Outstanding	90 – 100	Passed	0	0%	26	87%
Very Satisfactory	85 – 89	Passed	0	%	4	13%
Satisfactory	80 – 84	Passed	1	3%	0	0%
Fairly Satisfactory	75 – 79	Passed	1	3%	0	0%
Did not meet Expectations	Below 75	Failed	28	94%	0	0%
		Total	30	100%	30	100%

Note: Computation of Learners' Progress and Achievement in Pretest and Posttest was based on DepEd Order No. 8 s. 2015

DISCUSSION

Summary of Findings

This study aimed to develop and validate a module in Combinatorics and Probability for Grade 10 learners. The lack of teaching resources and learning materials for Combinatorics and Probability and the low mean percentage score in the third quarterly assessment of the subject mentioned above are the existing problems from the current curriculum of the Department of Education. These are the reasons that made the researcher conceptualize the development of the module in Combinatorics and Probability for Grade 10 learners. The researcher used the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) model to develop the module.

The module in Combinatorics and Probability for Grade 10 learners was developed in terms of:

- Development of the intended learning outcomes

Learning goals are defined considering the Most Essential Learning Competencies (MELCs) prescribed by the Department of Education (DepEd). These learning goals were broken down into smaller, more manageable objectives aligned with the curriculum standards and overall goals. These learning outcomes/objectives were specific, measurable, achievable, relevant, and time-bound (SMART).

- Selection of the essential content

The core concepts and information essential for understanding the subject matter were identified and will be the module's focus. The topics/lessons under Mathematics 10 Combinatorics and Probability for Quarter 3 are listed per module every week, Module 1 to Module 10, with K to 12 curriculum guide codes. These are as follows:

Module 1 – Week 1: Illustrating Permutations of Objects (M10SP-IIIa-1)
- Lesson 1: Illustrating Permutation of Distinct Objects
- Lesson 2: Illustrating Permutation of Non-Distinct Objects
- Lesson 3: Illustrating Circular Permutation of Objects

Module 2 – Week 2: Solving Problems involving Permutations of Objects (M10SP-IIIb-1)
- Lesson 1: Solving Problems involving Permutations of Objects

Module 3 – Week 3: Illustrating Combinations of Objects (M10SP-IIIc-1)
- Lesson 1: Illustrating Combinations of Objects
- Lesson 2: Differentiating Permutation and Combination

Module 4 – Week 4: Combination of *n* Objects Taken *r* at a Time (M10SP-IIIc-2)
- Lesson 1: Combination of *n* objects taken *r* at a time

Module 5 – Week 5: Solving Problems involving Permutations and Combinations (M10SP-IIId-e-1)
- Lesson 1: Solving Problems involving Permutations and Combinations

Module 6 – Week 6: Events, and Union and Intersection of Events (M10SP-IIIf-1)
- Lesson 1: Illustrating Different Types of Events
- Lesson 2: Illustrating Union, and Intersection of Events

Module 7 – Week 7: Probability of The Union of Two Events (M10SP-IIIg-1)
- Lesson 1: Probability of The Union of Two Events

Module 8 – Week 8: Solving the Probability of $A \cup B$ (M10SP-IIIg-h-1)
- Lesson 1: Solving the Probability of $A \cup B$

Module 9 – Week 9: Illustrating Mutually Exclusive Events (M10SP-IIIi-1)
- Lesson 1: Illustrating Mutually Exclusive Events

Module 10 – Week 10: Solving Problems involving Probabilities (M10SP-IIIj-1)
- Lesson 1: Solving the Probability of Independent Events and Dependent Events
- Lesson 2: Solving Conditional Probability

Learners' backgrounds, prior knowledge, and learning preferences were considered. The content is aligned with the curriculum standards and learning outcomes. The content covers levels of cognitive complexity, from basic understanding to higher-order thinking skills. Different topics are presented accurately and precisely with a variety of supplementary materials. Ideas, concepts, and points presented are well-expressed.

The content and learning experiences were enhanced by visual aids such as illustrations, diagrams, and charts, which help clarify complex concepts and improve comprehension.

- Selection of the language used

The vocabulary used is suitable for the reading and understanding level of the learners to whom the modules are intended. The instructions are clear, unambiguous, and easy to follow. The language used supports the learning objectives. The language chosen communicates and engages learners effectively. The module uses correct words. It is accompanied by clear and specific directions for its use. The lessons are presented in sentences and paragraphs that are grammatically correct.

- Development of the assessment and evaluation activities

Assessment activities are accessible to all learners, including those with learning difficulties or diverse learning needs. Test items are carefully written at a level that learners can understand. The assessment and evaluation items help increase understanding and retention of the content. Items measure higher-order thinking skills. The answer to one item furnishes or gives a clue to the answer to another item.

- Selection of references from available teaching and learning sources

Though there are a limited number of available teaching and learning resources and materials for Grade 10, these resources are great sources and references used by the researcher in developing the module in Combinatorics and Probability. The most important topics are determined for achieving the learning objectives. The researcher identified the core concepts and information essential for understanding the subject matter, which will be the module's focus. Authors and their ideas from the resources used to develop the module in Combinatorics and Probability were properly cited and given credits to acknowledge the contribution of other writers and researchers in the developed module.

- Time frame of the development
  - ✓ July 2023 to September 2023 – Development and crafting of the module
  - ✓ October 2023 – Distribution of the pre-crafted module and survey checklist to the respondents for evaluation
  - ✓ November 2023 – Retrieval of the survey checklist
  - ✓ December 2023 to January 2024 – Revision and editing of the Developed Module based on feedback of the respondents
  - ✓ February 2024 to March 2024 – Pilot testing of the Developed Module

- Development of cover page and packaging

The researcher experimented with different lay-outs and arrangements of the visuals and illustrations in the cover page of the developed module to find the perfect balance which will captivate the learners' attention. A balanced composition ensures that the cover page looks visually appealing and professional.

The draft of the module was written, printed, and validated. The module was assessed and evaluated in four general categories with quantifying statements on which

the validators based their module assessment. The four categories with the result are as follows:

- specific objectives of each lesson in the module with a mean of 4.8,
- content of the module with a mean of 4.74,
- language used with a mean of 4.84, and
- assessment and evaluation activities with a mean of 4.82.

The result revealed that the developed module was considered very much valid, with an average weighted mean of 4.8. Comments, feedback, and suggestions from the validators are noted and taken into consideration to enhance the module.

Positive learning was determined by computing the percentage of students who showed improvement in their scores after they underwent learning through the module. The mean percentage score of students' pretest and posttest were compared and a difference of 46.40 shows that the students significantly improved their performance in the subject. There were 87% and 13% of learners who obtained outstanding rating and very satisfactory rating in posttest respectively. The mean score of the pilot students is 44.87.

The developed module in Combinatorics and Probability for Grade 10 learners is a potential learning resource that can be used to teach Grade 10 Combinatorics and Probability topics in Quarter 3.

Conclusions

Based on the data gathered using the standardized module evaluation checklist adapted from a validated scholarly work published as material for development and validation, it can be concluded that the developed module in Combinatorics and Probability for Grade 10 learners is very much valid. The developed module in Combinatorics and Probability for Grade 10 learners is a potential learning resource that can be used in teaching Grade 10 Mathematics Combinatorics and Probability topics in the third quarter.

Pilot-testing verified these conclusions through an obtained difference of 46.40 in the MPS using the pretest-posttest analysis. This is supported by the performance of 87% of students who obtained an outstanding rating and 13% of students who obtained a very satisfactory rating.

Indeed, the developed module can provide teachers and learners with what is needed to teach and learn Combinatorics and Probability. It can help learners create self-phase learning and enhance their mathematical skills. The module may serve as a relevant learning resource that can increase the learners' potential in mathematical skills through reasoning and analogy aligned with the DepEd curriculum and content standards.

Recommendations

Based on the results and conclusions of the study, the following recommendations are offered:

1. The respondents/validators of the developed module in Combinatorics and Probability for Grade 10 learners are the mathematics teachers and master teachers in Gasan District who are teaching Mathematics 10, specifically Combinatorics and Probability. To increase the developed module's validity, the researcher highly suggests testing the module into a series of evaluations and assessments by a more significant number of evaluators and widening the scope of the study. Subjecting the developed module to experts in module writing and publication will also increase its validity.

2. This study mainly focused on the development and validation of the module in Combinatorics and Probability for Grade 10 learners. The questionnaire, in checklist form adapted from the validated evaluation instrument used by other researchers, was distributed among the Mathematics teachers and master teachers in Gasan District who are teaching Mathematics 10, specifically Combinatorics and Probability. They are the validators of the developed module. For further refinement, the researcher recommends also considering students' evaluation if one will conduct development and validation of the module to identify learners' feedback after using the module.

3. For further study, the researcher also recommends testing the developed module's effectiveness by letting the grade 10 learners from other school use the module to learn the lesson on Combinatorics and Probability for the third quarter in Mathematics 10 to increase its validity.

4. The developed module in Combinatorics and Probability for Grade 10 learners is a potential learning resource that can be used in teaching Grade 10 Combinatorics and Probability topics in the third quarter. The developed module can provide the teachers and learners with what is needed in teaching and learning Combinatorics and Probability. This module can help learners create self-phase learning and enhance their mathematical skills. When given the opportunity to use the module as a reference, researchers may continue to elaborate and improve the existing content of Combinatorics and Probability. Contextualization and localization of examples are encouraged for the content of the module.

5. The need for teaching resources in Mathematics lessons, such as Combinatorics and Probability topics, is one of the reasons why the researcher conceptualizes developing and validating modules in Combinatorics and Probability for Grade 10 learners. The government may allocate funds for this kind of study about the development and validation of modules because such studies will produce potential learning modules and materials to help teachers in teaching.

6. Essentially, the success of the module may depend on the competence, enthusiasm, and confidence of the Mathematics teacher and the ability of the students in making use of the learning activities provided.

Compliance with Ethical Standards

It is true that developing and crafting a module is a process that requires time, commitment, and a thoughtful, systematic approach.

This study involved human participation for the evaluation of the developed module and its impact on the performance of the learners. Several considerations for this undertaking are truly necessary for the purpose of ensuring the privacy as well as the security of the participants. These concerns were identified in advance so as to prevent future problems that would arise during the research process. Among the significant issues which were considered include consent, confidentiality, and data protection.

During the conduct of the study, survey forms and interview methods were drafted in a very clear and concise manner to prevent confusion. Participants in this research were given ample time to respond to the survey checklist to avoid errors and inaccuracies in their answers. The respondents were also given a waiver and information that they do not wish to disclose. The respondents' cooperation was eagerly sought after. They were assured that the data gathered would be treated with strict confidence. These were done with the hope that this would promote trust between the researcher and the respondents.

Acknowledgments

This study is a fruit of the researcher's love for education caused by the perfect fusion of determination, resourcefulness, willingness, wisdom, and blessings shared by these people to whom the researcher is genuinely grateful:

To her thesis adviser and statistician, Dr. Noel R. Palomares, for his expertise and guidance in making this study a meaningful reality. His suggestions and support helped the researcher a lot.

To the members of the Committee on Oral Examination chaired by the Marinduque State College President Dr. Diosdado P. Zulueta, and the members, Dr. Leodegario M. Jalos Jr. and Mrs. Ma. Teresa Chavez. Their constructive feedback and points for improvement will be treasured not only in this research study but in her heart.

To her editor, Mrs. Annie M. Ruiz, and copy editor, Ms. Cristina S. Atienza for sharing their time to edit this research study.

To the Marinduque State College Graduate School staff headed by their untiring Dean, Dr. Julieta Q. Nabos, who has patiently planted the seeds of knowledge the researcher needs to pass this endeavor.

To her Grade 10 students who became part of this research work. They have given the researcher enough reason to pursue this study. Their dedication is amazingly motivating.

To her Dear Teachers and fellows in Bangbang National High School, to her respondents from other schools in the District of Gasan, Mrs. Emily M. Soleta, Mr. Dahrel Morales, Mrs. Cherry S. Jandusay, Mrs. Ruffa M. Monroyo, and Mrs. Joan L. Constantino. She is so blessed to have their assistance and motivation.

To her family, Mama Gerlie, Papa Noel, and Kuya Jeordan. To her boyfriend, Gueller Dee. Their constant support every step of the way will soon be paid off.

Above all, the researcher gives gratitude to the Lord, for having them all. God is always there along the journey, carrying her diploma and cheering her up silently.

You are ALL in her HEART.

ABSTRACT

The study aimed to develop and validate the Supplemental Instructional Materials Module in Linear Inequalities in Mathematics 8 based on the Least Mastered Competencies for the Second Quarter of Grade 8 learners at Buenavista National High School and Cabong National High School. Two hundred sixty-five learners participated in this study. A survey questionnaire was distributed to the Grade 8 learners in the two public schools of Buenavista District I. The Supplemental Instructional Materials were developed and validated by the four (4) Masters Teachers. In terms of validity of contents, equity and accessibility, instructional design and support, assessment, presentations and organization, and replicability, having a composite mean of 4.25, all these ratings are considered outstanding. Based on the data it was concluded that the enhanced Supplemental Instructional Materials was developed, and all the parts met its validity. Based on the findings and conclusion, it is highly recommended that administrator's curriculum planners, educators, and teachers be allowed to use the developed learning materials. Learners may also use the learning materials as a guide in Quarter 2 in Mathematics 8. Moreover, future researchers may also use the study findings as a reference in crafting and developing learning materials.

Keywords: *Mathematics 8, Linear Inequalities, Supplemental Instructional Materials (SIM)*

INTRODUCTION

Mathematics is considered one of the most complicated academic disciplines in school settings. The diversified nature of problem-solving taught in secondary

education is difficult for many students worldwide, including those in the Philippines. Nowadays, mathematics education tries to build the capacity for investigation, hypothesis formation, logical thinking organization, non-routine problem solving, and the establishing of linkages between mathematical concepts, and other intellectual domains. Mathematics is an essential component of education and is necessary at all curriculum levels. As a result, this subject necessitates intense mental focus and logical thinking. People considered mathematics to be a challenging topic. Many students perform poorly in Mathematics and find the subject very challenging.

According to Antiporda (2014), learners' performance in Mathematics at the end of secondary education has not improved over the last decade. This assertion is corroborated by the National Achievement Test (NAT) performance of the country's high schools, which fell from 50.7% in the 2007-2008 school year to 46.3% in the 2011-2012 school year, as well as its low ranking of 115th out of 142 states in the Global Competitiveness Report. Furthermore, according to international test results such as the 2003 TIMSS (Trends in International Mathematics and Science Study), the Philippines placed 34th out of 38 nations in HS II Math. Similarly, 2008 data reveal that even with only the Science high schools competing in the Advanced Mathematics category, the Philippines ranked last (Department of Education 2010).

According to the PISA (2018) findings, the Philippines placed last out of 79 participating nations, with mathematics being second to bottom. Unfortunately, at least 78% of students in the Philippines did not meet the minimum competency standards in each of the three PISA courses. Only 19% met the minimal competency level for overall Mathematics outcomes. This emphasizes the critical need to reform the country's education system and create more possibilities for pupils to succeed.

During the Buenavista District I school-based Numeracy Test, the total test results declined by 5% compared to 2022. In the school year 2022-2023, the result declined depending on the percentage of the test, and it did not meet the objective passing percentage of at least 75%.

In response to the perceived needs of the education sector, the Department of Education (DepEd) has continued to advocate for changes to the primary education curriculum. The establishment of Republic Act No. 10533 prepared the ground introducing of K-12 education in the Philippines. However, implementing the curriculum is challenging, mainly when teaching Junior High School Mathematics, because the K-12 curriculum employs a spiral progression strategy across courses. Learners should be educated about topics ranging from elementary to complicated. The spiral progression technique is intended to build on the same principles at each grade level and advance in complexity from kindergarten to Grade 10 (DepEd Order 21 S. 2019; Enhanced Basic Education Act of 2013). Furthermore, skipping the core topics in mathematics will result in low academic performance. Many students had to deal with these challenges, contributing to poor performance across all areas.

Firestone (2016) stated that when learners are given the assistance they require while learning something new, they have a better probability of employing that knowledge independently, and mastery and retention of the concepts, and abilities are guaranteed.

Furthermore, the emphasis on instruction is on providing teachers with the resources they need to help students build cognitive learning skills. Estacio (2015) explains that the teaching-learning process "depends on how the goals are attained at the end of the process, and thus the realization of these goals relies on the teacher who chooses the right methodology, and strategy, which are relevant instructional materials and valid and reliable assessment tools." It promotes student learning, which leads to improved performance and achievement. Furthermore, instructional materials must reflect students' interests, knowledge, understanding, abilities, needs, and experiences. When offering quality education, one should not overstate the importance of instructional materials in effective instruction. Aside from the introductory textbook, using instructional materials is essential for meaningful and effective teaching".

As a result, the Department of Education (DepEd) released a statement advising that schools strengthen the competencies required to improve the performance of all students across the country. One of the recommendations is to provide materials to improve school competencies (DepEd Order No. 39, 2012). SIM is a remedial tool that assists students at their current knowledge level, enhancing their academic performance. Similarly, DepEd Order No. 08, Series of urges teachers to implement remediation when students are already struggling in a subject, as evidenced by low ratings in any learning area. Studies from Asian countries that applied Supplemental Instructional Materials to know how effective implementing these interventions are, but these are limited only in context, number of participants, respondents, the variables included in the study, and the methodology in teaching in which this study was made. Arpilleda (2021) emphasizes that SIM, a well-structured and thoroughly organized piece of content, will help students who do not have a firm grasp of the idea overcome such issues.

According to Bandang and Parangat (2022), most of the teachers developed a variety of intervention items for pupils who struggled with math. In remedial sessions, Supplemental Instructional Materials (SIM focuses on the learners' least-mastered mathematics skills. It is a learning tool that assists students in mastering competency-based abilities not often taught in the classroom.

To increase students' mathematical skills, math teachers must be original, imaginative, and creative while producing strategic intervention materials.

It is a resource available to students to help them learn and master competency-based skills that they could not gain through traditional classroom instruction. SIM is a comprehensive technique that assists students, particularly those underperforming in becoming self-directed and productive learners. SIM evaluations will most likely use a variety of approaches to allow students to demonstrate their learning through task performance and application to real-world circumstances. (SIMs) are intended to help professors provide students with the motivation to excel in their courses (Sinco et al.,2020).

Furthermore, extra instructional materials required pupils to satisfy defined competency standards while developing lifelong learning skills. The purpose of this study is to determine the extent to which activities contribute to the development of mathematical competence.

The biggest challenge for teachers is to improve their students' performance in mathematics. The mathematics department at Buenavista National High School is now hosting the researcher, whose goal is to reduce the proportion of students who perform poorly in mathematics. To make it possible, Mathematics teachers conducted a numeracy test last school year, and yielded poor results. Strategic intervention material was currently used by the Mathematics Department to improve the poor performance of learners in mathematics. The outcomes of these projects did not meet the targeted percentage, so the researcher ought to develop supplemental instructional materials. She came up with this study to improve the academic performance of the grade 8 learners in mathematics, specifically in the Second Quarter of the school year, so the researcher comes up with identified the least mastered competencies for the last three consecutive years to develop new supplemental instructional materials and validated by the experts.

Research Questions

This research aimed to determine the Development and Validation of the Supplemental Instructional Materials Module on Linear Inequality. Specifically, this study sought to answer the following questions:

1. What are the least mastered competencies identified based on the Trends Analysis for the last five years?

2. What are the difficulties encountered by the Grade 8 learners in mastering the learning competencies in Mathematics 8 in Linear Inequalities?

3. What Supplemental Instructional Materials can be developed based on the Identified Least Mastered Competencies specifically in Linear Inequalities?

4. What is the level of validity of Supplemental Instructional Materials as assessed by the validators in terms of:

    4.1 Content

    4.2 Equity and Accessibility

    4.3 Assessment

    4.4 Presentation and Organization

    4.5 Instructional Design and Support

    4.6 Replicability?

5. What are the recommendations given by the validators to improve the Supplemental Instructional Materials?

METHODOLOGY

This chapter elucidated the methodologies and protocols that enable the researcher to carry out the study effectively. This chapter focused on various aspects of the research study, including the research design, research locale, research population and sampling, research instrument, data gathering procedure, and statistical treatment.

Research Design

This study used descriptive research methodologies, both quantitative and qualitative. Identifying patterns based on the least learned competencies from prior years. We made a SIM based on the patterns in Numeracy Test Results. The SIM was validated to see whether learners improved their performance regarding the least learned competencies in Mathematics 8, specifically the Linear Inequalities in Two Variables lesson.

The researcher developed and validated Supplemental Instructional Materials (SIM) since the previous SIM did not successfully meet the target percentage.
The researcher used the least mastered competencies based on trends encompassing the second quarter of Grade 8 learners' Most Essential Learning Competencies (MELCs) as defined by the Department of Education. The produced extra instructional materials will be reviewed and validated by the mathematics department's master teachers and a school principal.
This study gathered data from prior years' least mastered competencies results. Respondents identified the obstacles experienced in the learning skills and validated the development of extra instructional materials.

Research Locale Population and Sampling

The study focuses on two types of respondents. The first group includes professionals who will validate the materials. The second group of respondents are the public schools in Buenavista Quezon's District 1 for the 2023-2024 school year. The researcher focused solely on all grade 8 students in all public schools in Buenavista District 1 who participated in this study.

The study includes all 265 grade 8 students, or 100% of the population, currently enrolled in Buenavista National High School and Cabong National High School.

This purposive sampling method enabled the researcher to gather valuable insights and data relevant to the research objectives while facilitating the development of Supplemental Instructional Materials (SIM) anchored to the specific needs of Grade 8 learners in the public schools of Buenavista, District 1.

The Population of the Study

Name of Schools	The population of Grade 8 Learners	Percentage
Buenavista National High School	237	89.43%
Cabong National Hugh School	28	10.57%
Total Number	265	100%

Research Instrument

The researcher developed and validated Supplemental Instructional Materials (SIM) in response to the critical challenges of secondary schools in District 1, namely the least taught abilities in Mathematics 8. The primary research tool used in this study is a Teacher-Constructed for Trend Analysis Data Retrieval and Secondary Data Analysis of 5 years of Item Analysis Results to comprehensively evaluate the least mastered competencies of Grade 8 learners in Mathematics 8, specifically in the Second Quarter. To assure the validity and reliability of the Item Analysis, a comprehensive validation method was used.

It is critical to note that Trend Analysis Data Retrieval is an accurate method for identifying the least mastered competencies. Each standard in the curriculum guide determines the distribution of topics on the exam, ensuring a thorough and competency-based evaluation.

Five-point Likert Rating Scale Interpretation

Scale	**Range Interval**	**Verbal Interpretation**	**Qualitative Description**
5	4.20 - 5.00	Always Encountered (AE)	Learners are consistently encountered in their learning competencies in Mathematics 8. They always encountered difficulties that lead to least mastered competencies of Grade 8 learners.
4	3.40 – 4.19	Often Encountered (OE)	Learners are regularly encountered in their learning competencies in Mathematics 8

3	2.60 – 3.39	Sometimes Encountered (SE)	Learners are frequently encountered in their learning competencies in Mathematics 8. They sometimes encountered difficulties that lead to least mastered competencies of Grade 8 learners.
2	1.80 – 2.59	Rarely Encountered (RE)	Learners are seldom encountered in their learning competencies in Mathematics 8. They rarely encountered difficulties that lead to least mastered competencies of Grade 8 learners.
1	1.00 – 1.79	Never Encountered (NE)	Learners are least encountered in their learning competencies in Mathematics 8. They never encountered difficulties that lead to least mastered competencies of Grade 8 learners.

Data Gathering Procedures

The researcher's primary tool for gathering the necessary data and information for problem-solving is the least mastered competencies based on the previous year's patterns.

In this study, the researcher used a Teacher-Constructed Trend Analysis Data Retrieval explicitly intended to examine the least learned competencies in Mathematics 8 during the second quarter of the school year.

Following completion, the responses were encoded. These results were combined and analyzed using the item analysis algorithm to provide a complete picture of the student's performance in Mathematics 8. This analysis not only evaluates their overall performance but also identifies learning gaps and areas of Grade 8 students.

Supplemental Instructional Materials (SIM) were created based on a trend analysis of the least mastered competencies. After producing (SIM) the materials are validated by the master’s teachers. To ensure its reliability and validity, it is related to how consistent and trustworthy the study is, ensuring that these materials will undoubtedly be validated by school principals and master teachers. The goal is to ensure that the study does not produce inconsistent outcomes.

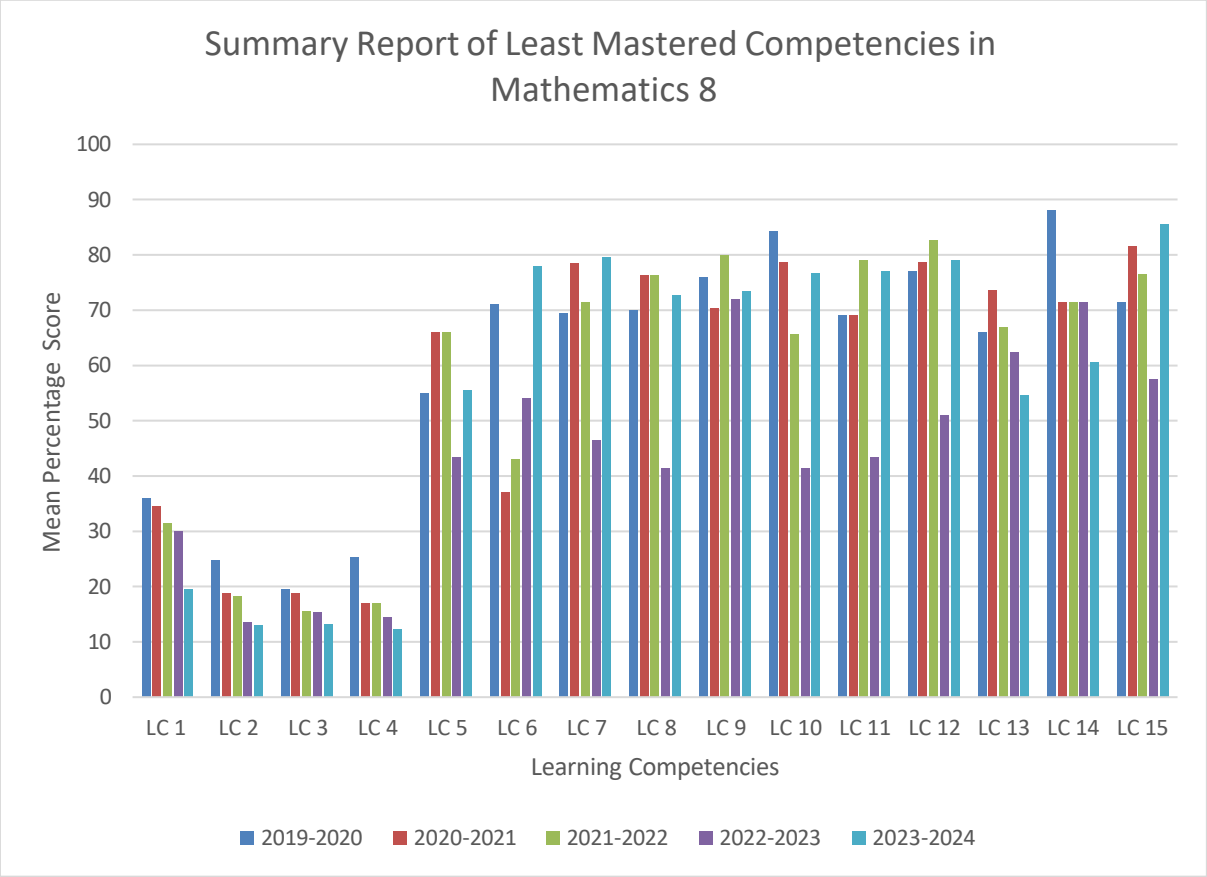
For ethical considerations, a letter was noted by the Dean and adviser requesting the endorsement of the undertaking. Upon approval, the researcher will seek permission from the principal and discuss the process of the conduct of the study.

Statistical Treatment of Data

Supplemental Instructional Materials (SIM) were generated using a trend analysis of the least mastered competencies. After completing (SIM), the researcher validated by professionals, to ensure its reliability and validity, considering how consistent and trustworthy the study is, as these materials will almost certainly be validated by school principals and master instructors. The goal is to ensure that the study yields consistent results. The study's validity was determined by how well it measured what it was intended to measure. Trends Analysis Data Retrieval results are conveyed to data users using Mean Percentage Scores (MPS) and descriptive equivalent for data utilization to create Supplemental Instructional Materials (SIM). Specified below is the mastery level:

Legend	Descriptive Equivalent
96%-100%	Mastered
86%-95%	Closely Approx. Mastery
66%-85%	Moving toward Mastery
35%-65%	Average
16%-34%	Low
5%-15%	Very Low
0%-4%	No Mastery

The data on challenges or issues were evaluated using a survey questionnaire to identify the kind of difficulties that the learners encountered.



The table below is used to evaluate the data collected from the Validity survey, which was validated by an expert.

Scale for the Evaluation Criterion for SIM Validation

Mean Interval	Verbal Interpretation
4.20 – 5.00	Outstanding
3.40 – 4.19	Very Satisfactory
2.60 – 3.39	Satisfactory
1.80 – 2.59	Less Satisfactory
1.00 – 1.79	Unsatisfactory

RESULTS

Part I. The Least Mastered Competencies

Additionally, solving problems involving linear inequalities in two variables (LC3) also presents the decreasing of mean percentage score 20,19,16,15 and 13 from low mastery to a very low mastery that leads the topic to least mastered competency. Solving problems involving linear inequalities requires strong algebraic skills, such as manipulating equations, simplifying expressions, and solving equations. Learners with weak algebraic skills may struggle to apply these skills effectively in solving problems involving linear inequalities.

Likewise, solves problems involving systems of linear inequalities in two variables (LC4) gained the decreasing of mean percentage score of (25,17,1715 and 12) that leads the topic to a very low mastery. Understanding how to graph and interpret systems of linear inequalities on a coordinate plane can be challenging. Learners may struggle with accurately plotting the lines and shading the correct regions to represent the solution set. By addressing these difficulties and employing effective learning strategies, learners can improve their performance and achieve a higher mean percentage score in solving problems involving systems of linear inequalities in two variables.

In addition, the rest learning competencies of the second quarter gained from average to closely approaching mastery leads to the learners fully understanding the

topics. Mastery involves building upon prior knowledge and making connections between different mathematical topics. Understanding the interconnectedness of mathematical concepts promotes a holistic understanding and facilitates the acquisition of new knowledge. Mastery in mathematics requires a deep understanding of fundamental concepts and principles. It involves going beyond superficial knowledge and developing a thorough comprehension of mathematical ideas and their interconnections.

This study has highlighted the least learned competencies from the last five years, indicating where learners struggle and need additional support. This decline may also be influenced by the quality of academic performances impacted by these challenges.

Table 1

Identified Most Trends of Least Mastered Competencies in Mathematics 8 during the Second Quarter of the School Year: 2019-2024.

Second Quarter	Content Standards	Performance Standards	Identified Most Trends of Least Mastered Competencies in Grade 8 Mathematics in Second Quarter (SY. 2019-2024)
2	Demonstrates key concepts of linear inequalities in two variables, systems of linear inequalities in two variables, and linear functions.	Formulate and solve accurately real-life problems involving linear inequalities in two variables, systems of linear inequalities in two variables, and linear functions.	Illustrates and graphs linear inequalities in two variables.

			uses inductive or deductive reasoning in an argument.
			writes a proof (both direct and indirect).

Table 1 depicts the identified least mastered competencies in Mathematics 8 during the second quarter of the 2019-2024 school year, as supported by Gosselin (2014), the lowest level of applied skills and knowledge that should enable learners to successfully function in educational and other life situations. According to the statistics provided, the majority of the least mastered competencies in the second quarter are linear inequalities between two variables. Identifying the reasons for the least mastered competencies is critical. It enables focused interventions, differentiated instruction, and the development of methods to address the individual issues that students experience. Addressing these factors will provide learners with the support and opportunities to deepen their mastery of their abilities. According to Toquero (2020), SIMs have evolved into teacher assistance materials that assist students in mastering least-learned competencies.

Through this, the study developed and validated supplemental materials to give learners extra practice opportunities to reinforce their understanding of mathematical concepts. Through repeated practice, learners can strengthen their skills and improve their proficiency in the least mastered competencies.

According to Suarez and Casinillo (2020), materials are intended to support teachers and educators in effectively teaching and supporting students in learning various subjects or skills. It is important to note that while supplemental instructional materials can be beneficial, they should be used in conjunction with regular classroom instruction and teacher guidance. Teachers should provide guidance, monitor progress, and ensure that the materials align with the curriculum and learning objectives. By combining the use of supplemental materials with effective teaching strategies, teachers can address the least mastered competencies of students more comprehensively and effectively.

Part II. Difficulties Encountered by the Grade 8 Learners in Learning Competencies in Mathematics 8.

Table 2

Difficulties Encountered by the Grade 8 Learners in Learning Competencies in Mathematics 8 in the Second Quarter

I. Formulate and solve accurately real-life problems involving linear inequalities in two variables, Systems of linear inequalities in two variables, and linear functions."	**5**	**4**	**3**	**2**	**1**	**Mean**	**Adjectival Rating**	**Rank**
1. Confused in identifying linear inequality symbols.	132	97	20	7	9	4.27	AE	2
2. Lack of ability to visualize graphs in linear inequalities in two variables.	115	85	32	12	21	3.98	OE	4

3. Difficulties in solving problems involving linear inequalities in two variables.	125	79	40	9	12	4.12	AE	3
4. Weakness in understanding the concept of solving problems involving systems of linear inequalities in two variables.	154	82	20	5	4	4.42	AE	1
5. Struggling on how to construct graphs and illustrate a linear function and its (a) domain; (b) range; (c) table of values; (d) intercepts; and (e) slope.	128	55	32	14	36	3.85	OE	5
6. Misconception of identifying the relationship between the hypothesis and the conclusion of an if-then statement.	155	23	21	26	30	3.82	0E	6
II. Communicate mathematical thinking with coherence and clarity in formulating and analyzing arguments.								
7. Struggles in understanding the concept of the inverse, converse, and contrapositive of an if-then statement.	34	76	65	44	46	3.03	SE	8
8. Difficulty in analyzing the equivalences of (a) the statement and its contrapositive; and (b) the converse and inverse of a statement.	45	34	58	79	49	2.80	SE	9
9. Lack of understanding of the concept of inductive and deductive reasoning.	57	48	20	21	119	2.63	SE	10
10. Weak conceptual understanding in writing a proof (both direct and indirect).	41	66	82	25	51	3.08	SE	7
Composite Mean						**3.61**	**OE**	

Legend:

4.20 -5.00	*Always Encountered (AE)*
3.40 - 4.19	*Often Encountered (OE)*
2.60 - 3.39	*Sometimes Encountered (SE)*
1.80 - 2.59	*Rarely Encountered (RE)*
1.00 - 1.79	*Never Encountered (NE)*

Table 2 displays the outcomes of the issues the students encountered. As a result, the most common difficulty they experienced, with a mean percentage score of 4.42, was understanding the notion of solving problems involving systems of linear

inequalities in two variables. The concept of systems of linear inequalities in two variables might be esoteric and difficult to grasp. Students may fail to comprehend how the inequalities are depicted. Students may struggle if they have not yet mastered these.

This confusion can cause students who have not mastered these core math abilities to suffer. Additionally, learners failed to recognize linear inequality symbols, with a mean score of 4.27. This suggests that students frequently become confused among the numerous inequality symbols, especially the 'greater than or equal to' (≥) and 'less than or equal to' (≤) symbols. This confusion can lead to mistakes in interpreting and solving inequalities.

Furthermore, difficulties in solving problems involving linear inequalities in two variables exceed the learners' "Always Encountered" mean score of 4.12. The learners frequently had difficulty visualizing graphs with linear inequalities in two variables, with a mean score of 3.98. Struggling with how to construct graphs and illustrate a linear function and its (a) domain; (b) range; (c) table of values; (d) intercepts; and (e) slope? With a mean score percentage of 3.85, this means that understanding and applying these concepts necessitates a solid understanding of the underlying mathematics. Learners may struggle to comprehend these abstract concepts, particularly if they lack a strong foundation in mathematics or have not yet established good spatial reasoning skills.

Finally, the misconception of identifying the relationship between the hypothesis and the conclusion of an if-then statement exceeds a mean score of 3.82, understanding the concept of the inverse, converse, and contrapositive of an if-then statement mean score of 3.03, analyzing the equivalences of (a) the statement and its contrapositive; and (b) the converse and inverse of a statement (2.80), understanding of the concept of inductive and deductive reasoning (2.63).

Part III. Supplemental Instructional Materials Developed

The materials were created to help students grasp the Second Quarter's least learned competencies, which are linear inequalities in two variables. Supplemental instructional materials can provide additional support, enrichment, and differentiation to help students learn more effectively. Students' learning is greatly aided when the teacher teaches at the appropriately pace. A teacher who has advanced in their chosen field of specialization is characterized by his ability to organize and design curriculum materials appropriate for the student's level of preparation and understanding. These materials are great resources for promoting deeper comprehension, engagement, and motivation, which leads to better educational outcomes.

Part IV. Validity of the Developed Supplemental Instructional Materials

Table 3 *Validity of Supplemental Instructional Materials*

Criteria	Mean	Verbal Interpretation
Content	4.08	VS
Equity and Accessibility	4.08	VS
Assessment	4.25	O
Organization and Presentation	4.42	O
Instructional Design and Support	4.08	VS
Replicability	4.60	O
Composite Mean	4.25	O

Legend:

4.20-5.00	*Outstanding (O)*
3.40-4.19	*Very Satisfactory (VS)*
2.60-3.39	*Satisfactory (S)*
1.80-2.59	*Less Satisfactory (LS)*
1.00-1.79	*Unsatisfactory (U)*
12-20 as the total score	*Passed*

The supplemental Instructional Materials in Grade 8 Mathematics were evaluated and validated by four (4) Junior Schools Master Teachers in content, equity, and accessibility, assessment, organization and presentation, instructional design and support, and replicability.

Based on Table 3, among the six criteria, Replicability got the highest mean score of 4.60. It revealed that the SIM obtained consistent results. Regarding of organization and presentation, the developed materials are valid and supported by a mean score of 4.42. It means that the lessons are clear, understandable, and interactive so that the learners can acquire new skills.

Moreover, the assessment of the developed Supplemental Instructional Materials got a mean score of 4.25 and was described as very satisfactory, which explained that the assessment of the materials is suited and appropriate to the learners and meets the targeted learning objectives.

In terms of content, equality and accessibility, and instructional design and support, all these categories received the same mean score of 4.08, indicating that the lessons' material is linked with the curriculum and that learners are engaged in higher-ordered thinking abilities. Similarly, the equality and accessibility of the lessons make

it easy for learners to adapt the lessons to the school's learning resources. Finally, instructional design and support are super, indicating that the resources are well-organized and appropriate for the learners.

Part V. Recommendation of the Validators

Based on the validators' comments and ideas, make a recommendation to enhance and improve the materials. Validator 1 suggested adding visuals to draw the learner's attention to the information. However, the images should be relevant, acceptable, and serve the learning objectives. Images should complement the text rather than distract or overwhelm learners. Accessibility should be carefully considered, to ensure that resources are inclusive and accessible to students with visual impairments and other disabilities.

Validator 2 recommended correct formatting and consistency with font style, size, and spacing. Consistent formatting makes the text clear and easy to read. Appropriate font size and spacing between letters, words, and lines improve readability, allowing learners to understand the text better and creating a visual hierarchy within the contents. Headings, subheadings, and sections can be distinguished by font size, style, or space, allowing students to quickly identify and navigate the information easily. This organizing structure enhances general knowledge and ease of usage. Validator 3 recommended revising the directions/procedures to offer clear and concise instructions that are simple to follow. This clarity helps learners better understand the task requirements, eliminating confusion and doubt. Finally, Validator 4 recommended including some engaging activities. Engaging activities draw students' attention and pique their interest, making the learning process more pleasurable and inspiring. When students are interested and motivated, they are more likely to interact with the materials and invest in their education.

These recommendations are relevant to improve the materials and to help learners struggling in mathematics 8.

DISCUSSION

The following are the findings of the study:

This research aimed to determine the Development and Validation of the Supplemental Instructional Materials Module on Linear Inequality Least mastered competencies are identified based on the Trends Analysis for the last 5 years.

1. According to the trends in performance for the last five years of Grade 8 learners, there are specific competencies in Mathematics 8 that the learners struggled with, particularly linear inequalities in two variables, which require effort to master.
2. Difficulties encountered by the Grade 8 learners in mastering the learning competencies in Mathematics 8.

The Grade 8 students struggled with linear inequalities in two variables, explicitly addressing the inequalities. One of the difficulties encountered by the

students is understanding the notion of solving problems involving systems of linear inequalities in two variables, with the highest mean score of 4.42. Identifying linear inequalities symbol with a mean score of 4.27. Difficulties handling problems with linear inequalities in two variables, with a mean score of 4.12. Visualizing graphs with linear inequalities in two variables, with a mean score of 3.98. The learners are struggling to create graphs that depict a linear function and its (a) domain, (b) range, (c) table of values, (d) intercepts, and (e) slope with a mean score percentage of 3.85. Lastly, the misconception of identifying the relationship between the hypothesis and the conclusion of an if-then statement exceeds a mean score of 3.82, understanding the concept of the inverse, converse, and contrapositive of an if-then statement mean score of 3.03, analyzing the equivalences of (a) the statement and its contrapositive; and (b) the converse and inverse of a statement (2.80), understanding of the concept of inductive and deductive reasoning (2.63).

3. Supplemental Instructional Materials are developed based on the least mastered competencies.

To address the least mastered competencies and difficulties encountered by the Grade 8 learners, supplemental instructional material was developed. First, the most identified least mastered competencies were identified, educators can tailor their instruction and support to meet the unique needs of learners, promote greater learning outcomes, and foster more inclusive and effective learning strategies. Likewise, allows educators to address the specific needs of each student, regardless of their starting point, and provide opportunities for academic success and to provide an appropriate activity that can help the learners easily understand the topic. Specifically, the difficulties in solving linear inequalities in two variables, and additionally, solving word problems that involve real-life situations allows learners to apply their knowledge in their everyday lives.

Second, understanding the difficulties learner
s encounter in math informs curriculum development and revision. It helps identify areas that require more attention, adjustments, or alternative approaches to ensure that the curriculum meets the needs of all learners.

3. The validity of Strategic Intervention Materials (SIM) in terms of:

3.1 Content The validity is “Very Satisfactory” with a mean percentage of 4.08.

3.2 Equity and Accessibility the validity is “Very Satisfactory” with a mean percentage of 4.08.

3.3 Assessment the validity is “Outstanding” with a mean percentage of 4.25.

3.4 Presentation and Organization the validity is “Outstanding” with a mean percentage of 4.42.

3.5 Instructional Design and Support the validity is “Very Satisfactory” with a mean percentage of 4.08.

Overall, the composite mean score of the validated SIM is 4.25, which means these materials passed the six criteria.

4. Recommendations given by the validators.

Most of the validators provide a recommendation to enhance and improve the materials. The validators suggested inputting more images to attract the learner's attention to the materials, the proper formatting and consistency of the font style, size, and spacing, and revising the directions/procedures on task and more engaging

activities. These recommendations are relevant to improve the materials and to help learners struggling in mathematics 8.

Conclusions

Below are the conclusions based on the findings of the study.

1. The results of the least mastered competencies of Grade 8 learners indicate that there are specific competencies that need to be addressed to gain valuable insights into the competencies that learners have consistently struggled with. This analysis can inform targeted strategies and improvements to enhance student learning and address areas of weakness.

2. By thoroughly analyzing the difficulties encountered by the Grade 8 learners in mathematics. Based on the overall mean percentage score, learners struggled more with understanding and solving the linear inequalities in two variables. By addressing the difficulties, we gain a deeper understanding of the challenges learners face and develop effective strategies to support their learning.

3. In summary, developing supplemental instructional materials plays vital role in enhancing learning, supporting differentiation, promoting personalized learning, addressing gaps, and fostering engagement among learners. These materials provide valuable resources and support to educators and learners, ultimately contributing to improved educational outcomes.

4. Based on criteria of content, equity and accessibility, assessment, presentation and organization, instructional design and support, and replicability, the criterion for validating supplemental instructional materials involves a thorough evaluation to ensure that the materials meet specific standards and criteria. Overall, the mean percentage of 4.25 validated materials for all six criteria. By conducting a comprehensive analysis based on the validation criteria, we can ensure that the supplemental instructional materials meet the required standards and effectively support teaching and learning.

5. Most of the validators provide a recommendation to enhance and improve the materials.

Recommendations of the validators help ensure the quality of the validated math materials. By identifying areas for improvement or enhancement, recommendations contribute to refining the materials, making them more accurate, relevant, and effective in supporting student learning.

The validators suggested inputting more images to attract the learner's attention to the materials, the proper formatting and consistency of the font style, size, and spacing, and revising the directions/procedures on task and more engaging activities. These recommendations are relevant to improve the materials and to help learners struggling in mathematics.

Lastly, as a result of these studies the utilization of these materials can be used as a basis for the lesson in the Second Quarter of Mathematics 8. These modules are

designed to guide both teachers and learners through a series of lessons and activities that build on each other, promoting a progressive understanding of mathematical concepts in mathematics 8. Modules are often aligned with the curriculum standards and learning objectives. They help ensure that the content covered in the modules aligns with the specific grade-level expectations and educational standards.

Recommendations

Based on the conclusions, the following recommendations as a result of offered:

1. Since the study developed and validated supplemental instructional material specifically in linear inequalities in two variables, administrators and curriculum planners may allow the use of the developed materials in improving Mathematics instructions.
2. Based on the findings, the content validity of the developed learning materials is very valid, thus educators and teachers may use this as an alternative material in teaching Linear Inequalities in Two Variables.
3. The materials are designed to make it easy to understand and could also develop the higher critical thinking needed for life-long learning for learners. Thus, the students may use these learning materials as a guide in Mathematics 8 lessons specifically in Linear Inequalities in Two Variables.
4. Findings of this study may be used by future researchers in conducting similar research or may be used as a reference in crafting and developing Supplemental Instructional Materials in other subject areas.

Compliance with Ethical Standards

The study ensured the informed consent was given to the following respondents. Freedom to withdraw from the study at any time, anonymity of the respondents was maintained, the respondents' well-being was safeguarded, no conflict of interests exists in the conduct of the study, plagiarism was strictly avoided, there was no bias in the interpretation of the findings and that the results were used purely for research.

Acknowledgments

The researcher wishes to express his heartfelt gratitude to the persons with wholehearted cooperation, support and guidance, especially to all who extended contribution and assistance in various ways towards the completion of this study and make this a reality.

Foremost, our GOD ALMIGHTY, the provider and source of all enlightenment and power, for giving his knowledge, perseverance, hope and determination to make his study possible.

To Marinduque State College President Dr. Diosdado P. Zulueta, for his leadership and selfless assistance when needed;

Dr. Leodegario M. Jalos, Jr., Chairperson of Extended Graduate Programs of Marinduque State College, for his untiring support, technical assistance and continuous guidance to the researcher in order for this study to be a success;

Dean of Graduate Studies of Quezonian Educational College, Inc. Dr. Rizalie M. Lim, for her encouragement and moral support for seeing this research through the end;

Dr. Noel R. Palomares, her adviser, for his valuable suggestions, guidance and patience in checking this paper and for the enlightenment shared about the importance of this study;

Engr. Willer A. Dayahan and Mr. Renante S. Camay, for their generously contributing time and expertise of this study as statistician;

Dr. Annalyn J. Decena, for constructing the structure of research as a grammarian and editor;

Ms. Annie M. Ruiz, for constructing the structure of research as copy editor;

Members of the defense panel Dr. Diosdado P. Zulueta, Dr. Julieta Q. Nabos, and Dr. Rogel L. Limpiada for their pertinent comments and advice on how to make the study better;

Ms. Liezl M. Manoy; MSC's Support Staff, Graduate School, for her unending moral support;

Grade 8 learners of Buenavista National High School and Cabong National High School, for actively participating in the conduct of study;

Ms. Angelaine C. Escolano, Ms Janice Irish O. Hernandez, and Mrs.Karen Ruth M. Rodriguez, for their unending support and understanding to finish this study;

Mrs. Alden B. Cuales, her parent, and her siblings, Noela B. Cuales and Clifford B. Cuales for their unending care and love that inspire her a lot to pursue this study;

To all great and wonderful people whose names do not appear above for whatever assistance extended with sincerity, a million thanks to each one of you.

DEVELOPMENT, UTILIZATION, AND NUTRITIONAL VALUE OF SUPPLEMENTED TILAPIA (*Oreochromis niloticus*) FLOUR PASTRY PRODUCTS

Marissa C. Abad [1] and Evelyn B. Cristobal, Ed.D. [2]

[1] Abuan National High School, Schools Division of the City of Ilagan, Department of Education, Philippines

ABSTRACT

This research investigates the development and nutritional assessment of supplemented tilapia *(Oreochromis niloticus)* flour pastry products, focusing on caramel tart, coconut dumplings, and yema empanaditas. The study aimed to innovate pastry recipes by incorporating tilapia flour, which was prepared through a process of cleaning, steaming, and grinding tilapia fish. The pastry products were evaluated for sensory attributes such as appearance, aroma, taste, and texture by 100 respondents across various age groups, using a five-point hedonic scale. Results indicated high consumer acceptability, with caramel tart scoring the highest in taste. Nutritional analysis of the pastries revealed significant levels of crude protein and fat, particularly in the yema empanaditas, which had a protein content of 15.07%. Shelf-life assessment showed that the pastries could maintain quality for several days at room temperature, with enhanced preservation in sealed containers. The findings suggest that tilapia flour can be effectively used in pastry production, offering a nutritious and appealing food option. This study emphasizes the potential for creating diverse and economically viable food products from fish flour, promoting dietary diversity, and supporting the economic development of tilapia farming communities.

Keywords: *Tilapia, Pastry products, caramel tart, coconut dumplings, yema empanaditas, sensory evaluation, consumer acceptability*

INTRODUCTION

The Philippines, known for its hospitality and natural beauty, is home to a diverse array of aquatic species, many of which are vital to both the economy and cultural practices. The nation's rivers and coastal regions are not only tourist attractions but also crucial habitats for various fish species. In the City of Ilagan, local fishermen have harnessed technology to cultivate Nile tilapia *(Oreochromis niloticus)* in man-made ponds, increasing their availability for commercial and personal use.

The Philippines predominantly cultures three tilapia species: Nile tilapia, Mozambique tilapia *(Oreochromis mossambicus)*, and Blue tilapia *(Oreochromis aureus)*. With production levels rising annually, tilapia has become a key aquaculture species, particularly in Region 2, where it is mainly consumed fresh, with minimal processing into other products (Department of Agriculture - Bureau of Fisheries and Aquatic Resources, 2001).

Dhanapal et al. (2010) have demonstrated that fresh tilapia meat is suitable for developing ready-to-eat and value-added products, including pastries. This research aims to explore the potential of tilapia meat as a primary ingredient in pastry products, thereby enhancing their nutritional value and acceptability.

Nile tilapia, a freshwater fish native to Africa, has become a global favorite due to its versatility and nutritional benefits. It is a popular Filipino dish, often grilled, broiled, steamed, or baked. Nile tilapia is an excellent source of protein, crude fat, crude protein, vitamins, minerals, polyunsaturated fatty acids, and omega-3 fatty acids, with lower mercury levels compared to other fish. Integrating tilapia into pastry products offers nutritious and affordable options for meals and snacks, potentially reducing malnutrition and unemployment by providing essential nutrients and economic opportunities (Izquierdo et al., 2004; Tafur, 2009; Cortés-Sánchez et al., 2019; WHO, 2020).

In the context of Abuan National High School in Cabecera 27, City of Ilagan, the absence of a school canteen means that teachers and students often purchase snacks from outside, which are typically less nutritious. Moreover, many parents in Abuan seek additional livelihoods to support their children’s education and meet daily needs. This situation inspired the researcher to develop nutritious food options using tilapia flour.

Borja and Gemora (2016) highlight the importance Filipinos place on preparing nutritious food, emphasizing the need for adequate nutrition to support growth, maintenance, and repair of cells and tissues. Given the widespread availability and affordability of tilapia, incorporating it into pastry products could address these nutritional needs while providing new economic opportunities.

The study focused on creating and evaluating tilapia-based pastry products—caramel tart, coconut dumplings, and yema empanaditas—in terms of appearance, aroma, taste, texture, and overall acceptability across various age groups. It also examined the nutritional value and shelf life of these products at room temperature. The

research aimed to meet the dual objectives of providing healthy snack options for students and teachers and offering sustainable livelihoods for local parents.

According to the Philippine Statistics Authority, fish and fishery products are the principal protein source for Filipinos, with an annual consumption of 37 kg per person, making up about 12% of total protein intake (BFAR, 2019). Protein from fish is crucial as it contributes significantly to the diet, supporting food security and nutrition (Farzana et al., 2014; Akinoso et al., 2010). In Africa, tilapia is a readily available protein source, accessible to many (Ande et al., 2012). Additionally, tilapia provides 23 grams of protein per 3-ounce serving, making it a valuable food for older adults to prevent age-related muscle loss (Rust, 2020).

The 2020-2025 Dietary Guidelines for Americans recommend consuming seafood twice a week to gain the health benefits associated with omega-3 fatty acids, which are found in tilapia. Omega-3s are linked to reduced risks of diseases such as hypertension, diabetes, and arthritis (Simopoulos, 2011). They also help lower triglyceride levels and increase good cholesterol, contributing to heart health (Hibbs et al., 2018).

The popularity of tilapia in the Philippines has soared, earning it the nickname "aquatic chicken" due to its bland flavor and rapid growth. The Bureau of Fisheries and Aquatic Resources has significantly contributed to this growth by promoting tilapia farming across the country, especially during the COVID-19 pandemic, to support food security (Fitzsimmons, 2005; Manalili, 2020).

Tilapia's versatility extends beyond fresh consumption; it can be processed into various forms, including smoked, dried, and canned fish, with different preservation methods affecting its nutritional composition (Holma and Maalekuu, 2013). For instance, dried fish products like fish crackers and fish galletas are popular snacks in Asian countries, indicating the potential for developing similar products in the Philippines (Nurul et al., 2009; Taewee, 2011).

This research aimed to develop and assess tilapia-based pastry products to provide nutritious and appealing food options while supporting local economies through sustainable fish farming and food processing innovations. By leveraging tilapia's health benefits and availability, this study sought to enhance dietary nutrition and create new livelihood opportunities in the Philippines.

Research Questions

This study explored the development, utilization, and nutritional value of supplemented Tilapia (*Oreochromis niloticus*) flour Pastry Products. Specifically, it sought to answer the following questions:

1. What are the processes involved in developing tilapia pastry food products?
   a. Caramel tart
   b. Coconut dumplings

c. Yema empanaditas

2. What is the level of acceptability of Tilapia pastry products in terms of:
   a. appearance /color
   b. aroma
   c. taste
   d. texture
3. What is the general level of acceptability of Tilapia pastry food products as evaluated by the following groups of respondents:
   a. children
   b. teenagers
   c. adults
   d. experts
4. Is there a significant difference in the general acceptability of the following tilapia pastry food products a. Caramel tart, b. Coconut dumplings, c. Yema empanaditas across age groups?
5. What is the nutritive value of Tilapia pastry food products?
6. What is the shelf-life of tilapia pastry products at room temperature and number of days?

METHODOLOGY

Materials

1. Tools and Equipment

As shown below, preparation tools and equipment were used during the study.

Table 1. Tools and Equipment used in the preparation of Tilapia pastry food products

DESCRIPTION					
Preparation Tools	**Measuring Tools**	**Mixing Tools**	**Cutting Tools**	**Baking Tools**	**Equipment**
Flour Sifter	Measuring spoons	Mixing Bowl small, medium, Large	Knife	Baking pan	Traditional stove *(kalang de kahoy)*
Spatula	Measuring cups	Wire whisk	Kitchen scissors	Tart molder	Meat grinder
Rolling pin		Ladle		Pastry brush	Steamer
Utility tray					Electric Oven

Ingredients

Table 2 shows the ingredients used in the production of Tilapia Pastry Food Products.

Table 2. The proportion of ingredients used in the preparation of Tilapia pastry food products

Ingredients For Dough	Caramel Tart	Coconut Dumplings	Yema Empanaditas
Tilapia Flour (Sifted)	1 Cup	1 Cup	1 Cup
All -Purpose Flour (Sifted)	1 Cup	1 Cup	1 Cup
Cold Butter Cup	8 Tablespoon	8 Tablespoon	8 Tables Spoon
Water	1 ½ Tablespoon	1 ½ Tablespoon	1 ½ Tablespoon
Vinegar	2 Teaspoon	2 Teaspoon	2 Teaspoon
Egg	1 Piece Medium	1 Piece Medium	1 Piece Medium
Salt	½ Teaspoon	½ Teaspoon	½ Teaspoon
	Caramel Filling	**Coconut Filling**	**Yema Filling**
	1/2 cup light brown sugar	½ cup grated coconut	¼ cup All- Purpose Flour
	1 cup Alaska evaporated milk	¼ cup light brown sugar	½ cup water
	1 tablespoon butter cup	¼ cup butter cup	1 small egg yolk
	4 tablespoon cornstarch		1/8 cup butter cup
	2 pieces medium egg		2/3 cups Alaska condensed milk

Developmental Procedure

To perform the research properly, the flow chart of the procedures in making *tilapia pastry food products* such as caramel tart, coconut dumplings, and yema empanaditas was consistently followed. The needed tools, materials equipment, and ingredients were prepared and followed by mixing the major ingredients, cooking, cooling, and packing.

The developmental procedure began with the preparation of tilapia flour, the preparation of dough for the caramel tart, coconut dumpling, and yema empanaditas, the preparation of three different fillings, making the caramel tart, coconut dumplings and yema empanaditas, and baking.

Preparation of Tilapia Flour

The preparation of tilapia flour began by first cleaning the Nile tilapia. The scales and visceral contents were removed using a sharp knife, and the gills and tail were cut off with kitchen scissors. The tilapia was then washed thoroughly with potable water. Next, six cups of water were poured into a steamer, and the tilapia was steamed for 20 minutes. After steaming, the fish was allowed to cool. Once cooled, the top skin was removed by hand, and the fish meat was collected, ensuring all bones and remaining skin were discarded. The collected fish meat was ground using a meat grinder until it resembled wet flour. This ground fish meat was then spread out for sun drying over 2-3 days. When it was partially dried, it was ground again to pulverize it further. The fish meat was then returned to the sun for additional drying, being stirred occasionally to ensure even dryness. Once the desired dryness was achieved, the tilapia flour was sifted using a sieve to make it fine. Finally, the produced tilapia flour was stored in a closed microwave container to maintain its dryness and protect it from moisture and contaminants. This method ensured that the flour remained protein-rich and suitable for various culinary applications.

Preparation of Caramel Tart

To begin the preparation, all necessary ingredients were measured. In a mixing bowl, 1 cup of tilapia flour, 1 cup of all-purpose flour, 8 tablespoons of cold butter, 1 ½ tablespoons of water, 2 teaspoons of vinegar, 1 medium egg, and ½ teaspoon of salt were combined. After mixing these ingredients, the dough was formed into a ball, covered with plastic wrap, and left to proof for 30 minutes.

Once proofed, the working surface was lightly dusted with a small amount of all-purpose flour, and the dough was kneaded until it became pliable. Using a rolling pin, the dough was flattened and portioned with a stainless glass, with each portion equivalent to 1 tablespoon. Boat-shaped tart molds were greased with a little butter, the dough portions were placed into the molds, and 1 teaspoon of caramel filling was added to each.

The oven was preheated to 180°C (355°F), and the tarts were baked for 10 minutes until cooked. After baking, the tarts were allowed to cool before being stored in a storage box.

Preparation of Caramel Filling

The preparation began by measuring all the needed ingredients. In a bowl, 1/2 cup of brown sugar, 1 cup of Alaska evaporated milk, 4 tablespoons of cornstarch, and 2 eggs were mixed using a wire whisk. A pan was placed over low heat, and butter was melted in the pan. The mixture was then poured into the pan, and stirring continued until it cooked and thickened. Once the caramel filling was cooked, it was allowed to cool before being used.

Preparation of Coconut Dumpling

The preparation began by measuring all the necessary ingredients. In a mixing bowl, 1 cup of tilapia flour, 1 cup of all-purpose flour, 8 tablespoons of cold butter, 1 ½ tablespoons of water, 2 teaspoons of vinegar, 1 medium egg, and ½ teaspoon of salt were combined. The mixed dough was formed into a ball, covered with plastic wrap, and left to proof for 30 minutes. After proofing, the working surface was lightly dusted with a small amount of all-purpose flour, and the dough was kneaded until it became pliable. Using a rolling pin, the dough was flattened and portioned using a stainless glass, with each portion equivalent to 1 tablespoon. Each portion was picked up with both palms, filled with 1 teaspoon of coconut filling, and folded to form a ball shape, similar to a ping-pong ball. The oven was preheated to 180°C (355°F), and the dough balls were baked for 10 minutes until cooked. After baking, the coconut dumplings were allowed to cool before being stored in a storage box.

Preparation of Coconut Filling

The preparation began by measuring the needed ingredients. A pan was placed over low heat, and the butter was added, allowing it to melt. Once the butter had melted, the grated coconut and light brown sugar were added to the pan. The mixture was stirred continuously until it was cooked through. After cooking, the coconut filling was allowed to cool before being used.

Preparation of Yema Empanaditas

The preparation began by measuring all the needed ingredients. In a mixing bowl, 1 cup of tilapia flour, 1 cup of all-purpose flour, 8 tablespoons of cold butter, 1 ½ tablespoons of water, 2 teaspoons of vinegar, 1 medium egg, and ½ teaspoon of salt were combined. The dough was then formed into a ball, covered with plastic wrap, and allowed to proof for 30 minutes.

After proofing, the working surface was lightly dusted with a small amount of all-purpose flour, and the dough was kneaded until it reached a pliable consistency. The dough was flattened with a rolling pin to approximately 1/8 inch thickness, and circles were cut out using a glass with a 2-inch diameter.

For each circle, half of the dough's circumference was estimated, and 1 teaspoon of yema filling was added. The dough was folded over the filling, and the edges were crimped with water and a fork to seal them securely.

The oven was preheated to 180°C (355°F), and the filled pastries were baked for approximately 10 minutes, or until they were fully cooked. Once baked, the yema empanaditas were allowed to cool before being transferred to a storage box.

Preparation of Yema Filling

The preparation began by measuring all the needed ingredients. The flour was placed in a pan over low heat and toasted until it turned light brown, which took about 5 minutes. Once toasted, the flour was transferred to a bowl.

In a separate pan, the butter was melted over low heat. The mixture of condensed milk, toasted flour, egg, and water was then poured into the pan with the melted butter. The mixture was stirred continuously with a ladle until it thickened to the point where it could easily be molded into shapes. Once the mixture reached the desired consistency, it was set aside to cool.

Preparation of Tilapia Pastry Food Products **(a) Caramel tart (b) Coconut dumplings (c) Yema empanaditas**

A flow diagram of the procedure for making the Tilapia Pastry Food Products (Caramel tart, Coconut dumplings, and Yema empanaditas) is shown in Figure 1 below.

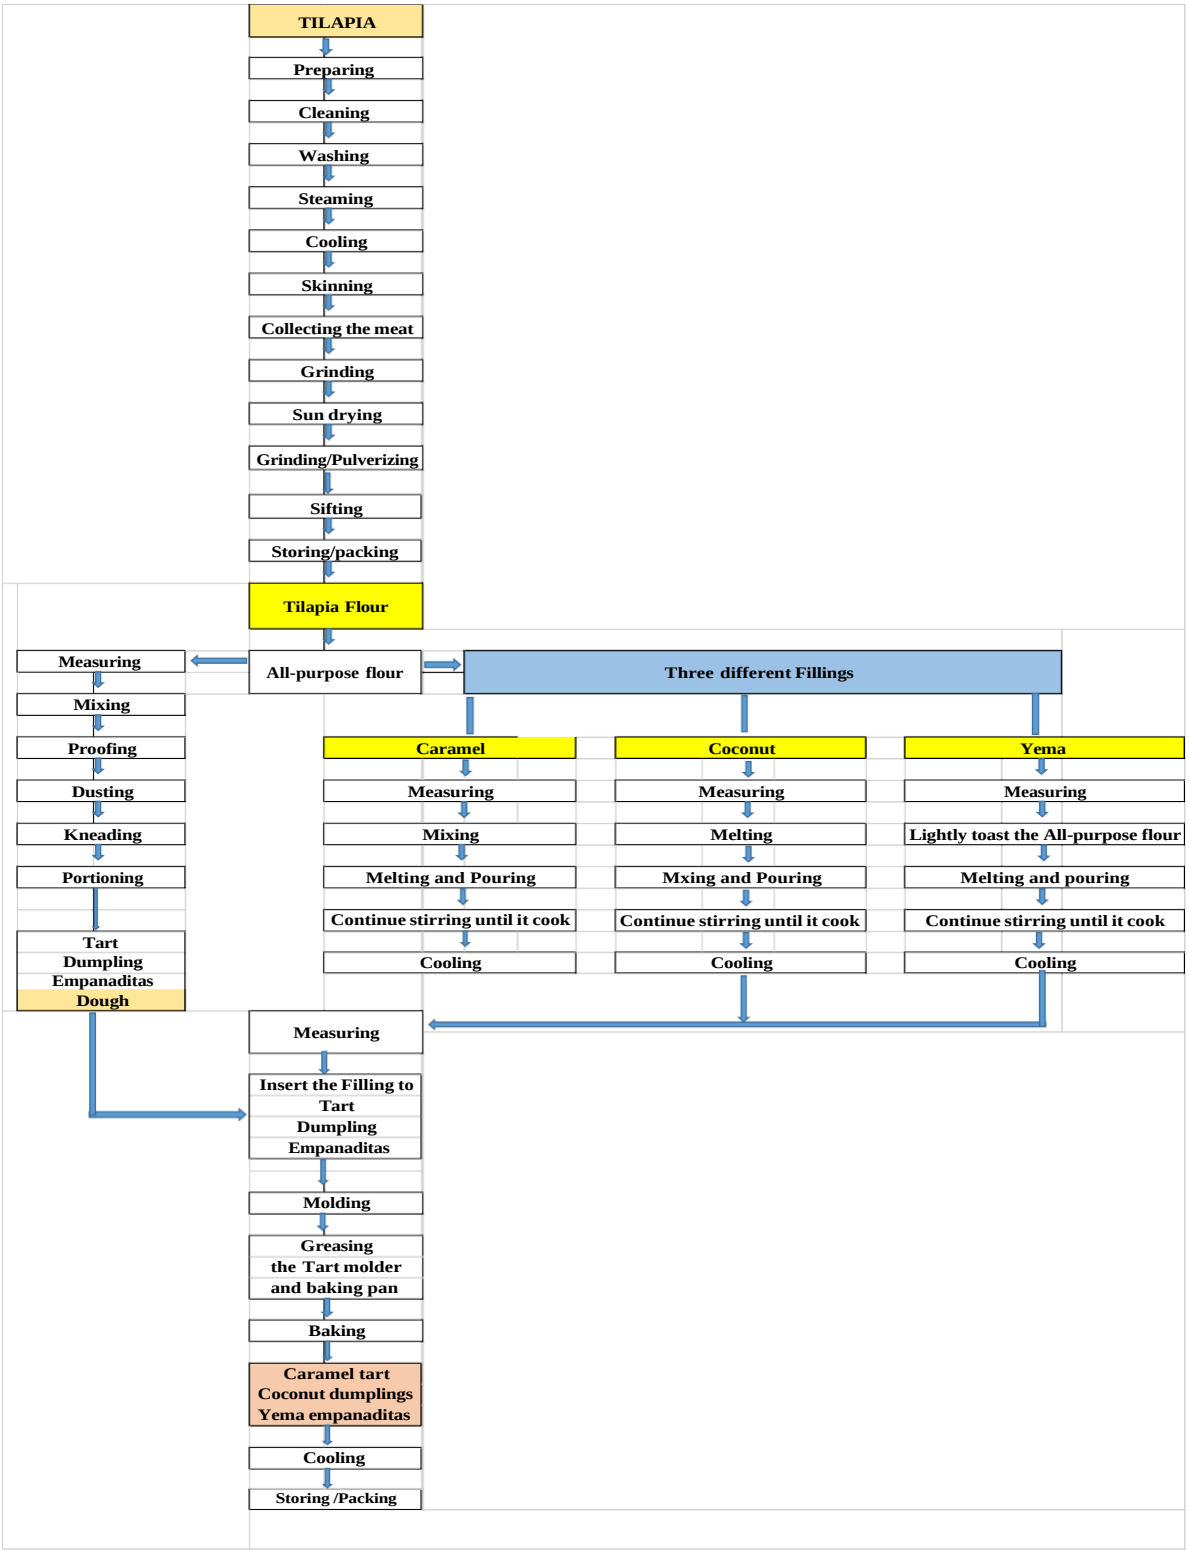

Figure 1. Flow Diagram of the Procedure for Making Tilapia Pastry Food Products

Data Gathering Instrument

The study used a modified instrument from the 2017 study of Prof. Catherine M. Aggabao titled “Macaroons with Shoots from Different Species of Bamboo” at Isabela State University Ilagan Campus. The modified instrument consisted of evaluation criteria on the utilization and nutritional value of tilapia pastry products. The data were gathered through the administered questionnaire checklist to the respondents.

Data Gathering Procedure

Permission to conduct the study through sensory evaluation was requested with the respondents consisting of Children (7-12), Teenagers (13-18), Adults (19-above), and Teachers. After permission was granted, administration of the questionnaires followed. Directions concerning the completion of the questionnaires was discussed by the researcher to the evaluators personally. Copies of the questionnaire checklist were retrieved after they were completed by the respondents. The sensory evaluation through a questionnaire checklist was used to gather information about the utilization and nutritional value of tilapia pastry food products. The observation method was applied to determine the changes in the appearance/color, aroma, taste, and texture.

Sensory Evaluation

The finished products were evaluated by one hundred (100) evaluators from varied age groups who were selected and properly oriented on what and how to evaluate the products using the scorecard with the sample code.

The tilapia pastry products were served. Each evaluator was asked to taste the samples from each food product. Data on the appearance/color, aroma, taste, texture, and general acceptability of each pastry food product were collected, interpreted, and analyzed.

To determine the acceptability of tilapia pastry products made from Nile tilapia flour in terms of appearance/color, aroma, taste, and texture, a score sheet and a five-point hedonic scale with descriptive rating were used.

Scale	Numeric Rating	Descriptive Rating
5	4.50-5.00	Highly Acceptable
4	3.50-4.49	Moderately Acceptable
3	2.50-3.49	Acceptable
2	1.50-2.49	Fairly Acceptable
1	1.00-1.49	Not Acceptable

RESULTS AND DISCUSSION

Product Development

The development of tilapia flour-based pastries involved several meticulous stages. Initially, fresh tilapia was prepared, thoroughly cleaned, and washed under running water. The cleaned tilapia was then steamed until fully cooked, ensuring easy separation of the meat. After steaming, the fish was allowed to cool, and the skin was removed. The meat was carefully collected, separated from bones and other inedible parts, and ground to a fine consistency. This ground meat was sun-dried until completely dehydrated and then pulverized into fine flour. The flour was sifted to achieve a uniform texture and subsequently stored in airtight containers.

For dough preparation, precise measurements of tilapia flour and other ingredients were taken, mixed to form a dough, and allowed to rest and rise during the proofing stage. The dough was dusted lightly to prevent sticking, kneaded until smooth and elastic, and portioned for individual pastries. The filling preparation entailed measuring, cooking, and cooling the ingredients as per the recipe.

Different samples were created to determine the optimal recipe for tilapia pastry products, varying the measurements of Nile tilapia flour to ensure the best quality and acceptability. The best-performing recipe was then used to make caramel tarts, coconut dumplings, and yema empanaditas. This comprehensive process led to the development of high-quality tilapia flour-based pastries that were standardized for consistent production.

Acceptability of Tilapia Pastry Food Products

Table 3. Level of acceptability of Tilapia pastry food products in terms of appearance/color, aroma, taste, and texture.

Variant	Criteria	Mean	SD	Descriptive Interpretation
Caramel Tart	Appearance	4.67	0.49	Highly Acceptable
	Aroma	4.52	0.67	Highly Acceptable
	Taste	4.78	0.41	Highly Acceptable
	Texture	4.61	0.57	Highly Acceptable
Average		**4.64**	**0.31**	**Highly Acceptable**
Coconut Dumpling	Appearance	4.46	0.67	Moderately acceptable
	Aroma	4.37	0.75	Moderately acceptable
	Taste	4.57	0.59	Highly Acceptable
	Texture	4.58	0.57	Highly Acceptable
Average		**4.49**	**0.38**	**Moderately acceptable**
Yema Empanaditas	Appearance	4.63	0.52	Highly Acceptable
	Aroma	4.51	0.59	Highly Acceptable
	Taste	4.70	0.48	Highly Acceptable
	Texture	4.31	0.70	Moderately acceptable
Average		**4.54**	**0.34**	**Highly Acceptable**

The table presents the level of acceptability of tilapia pastry products among the four groups of respondents in terms of appearance/color, aroma, taste, and texture.

The analysis of respondents' perceptions regarding the acceptability of Tilapia pastry products reveals distinct patterns across three variants: Caramel Tart, Coconut dumplings, and Yema Empanaditas.

For the *Caramel Tart* variant, respondents consistently rated it highly acceptable across all criteria, with mean scores ranging from 4.52 to 4.78. Notably, it garnered particularly strong approval for taste, with a mean score of 4.78, indicating its exceptional flavor.

Conversely, the *Coconut Dumpling* variant, while still moderately acceptable overall with an average mean score of 4.49, received slightly lower ratings for appearance and aroma, with mean scores of 4.46 and 4.37 respectively. However, it excelled in taste and texture, with mean scores of 4.57 and 4.58 respectively.

Lastly, the *Yema Empanaditas* variant exhibited consistently high mean scores across appearance, aroma, and taste, with scores above 4.5, indicating high acceptability. However, its texture received a moderately acceptable rating, with a mean score of 4.31. Despite this, the overall average score of 4.54 suggests that Yema Empanaditas remains highly acceptable.

Overall, the findings underscore the favorable reception of Tilapia pastry products among respondents, with variations observed in specific attributes across different product variants.

General Acceptability Rating of Tilapia Pastry Food Products across Groups of Respondents

Table 4. The general level of acceptability of *Caramel tart* as evaluated by children, teenagers, adults, and experts

Respondents	Product	Criteria	Mean	SD	Descriptive Interpretation
Children	Caramel Tart	Appearance	4.48	0.59	Moderately acceptable
		Aroma	4.52	0.65	Highly Acceptable
		Taste	4.60	0.50	Highly Acceptable
		Texture	4.36	0.70	moderately acceptable
		Overall Mean	**4.49**	**0.24**	**moderately acceptable**
Teenagers		Appearance	4.68	0.48	Highly Acceptable
		Aroma	4.40	0.71	moderately acceptable
		Taste	4.80	0.41	Highly Acceptable
		Texture	4.44	0.58	moderately acceptable
		Overall Mean	**4.58**	**0.28**	**Highly Acceptable**
Adults		Appearance	4.68	0.48	Highly Acceptable
		Aroma	4.44	0.77	moderately acceptable
		Taste	4.76	0.44	Highly Acceptable
		Texture	4.72	0.46	Highly Acceptable
		Overall Mean	**4.65**	**0.31**	**Highly Acceptable**
Experts		Appearance	4.84	0.37	Highly Acceptable
		Aroma	4.72	0.54	Highly Acceptable
		Taste	4.96	0.20	Highly Acceptable
		Texture	4.92	0.28	Highly Acceptable
		Overall Mean	**4.86**	**0.30**	**Highly Acceptable**

The analysis of respondents' evaluations regarding the acceptability of Tilapia pastry food products specifically **Caramel Tart** reveals variations in perceptions across different age groups and expert opinions.

Children's responses indicate a moderately acceptable perception of the Caramel Tart variant, with mean scores ranging from 4.36 to 4.60 across appearance, aroma, taste, and texture. Despite some variability, the overall mean score for children is 4.49, suggesting a moderate level of acceptability among this demographic.

Teenagers, on the other hand, rated the Caramel Tart variant more favorably, with mean scores ranging from 4.40 to 4.80 across criteria. Their overall mean score of 4.58 indicates a highly acceptable perception of the product, particularly in terms of appearance, taste, and overall acceptability.

Adult respondents rated the Caramel Tart variant similarly to teenagers, with mean scores ranging from 4.44 to 4.76 across criteria. Their overall mean score of 4.65 indicates a highly acceptable perception of the product, with particularly high ratings for taste and texture.

In contrast, *experts* evaluated the Caramel Tart variant even more positively, with mean scores ranging from 4.72 to 4.96 across criteria. Their overall mean score of 4.86 suggests a highly favorable perception of the product, with consistently high ratings across all evaluated aspects.

Overall, while there are slight variations in the perception of Caramel Tart among different respondent groups, the general trend indicates a high level of acceptability across all demographics, with experts showing the most positive evaluations.

Table 5. The general level of acceptability of *Coconut Dumplings* as evaluated by children, teenagers, adults, and experts

Respondents	Product	Criteria	Mean	SD	Descriptive Interpretation
Children	Coconut Dumpling	Appearance	4.28	0.74	Moderately acceptable
		Aroma	4.20	0.82	Moderately acceptable
		Taste	4.40	0.64	Moderately acceptable
		Texture	4.60	0.50	Highly Acceptable
		Overall Mean	**4.37**	**0.31**	**Moderately acceptable**
Teenagers		Appearance	4.28	0.74	Moderately acceptable
		Aroma	4.28	0.74	Moderately acceptable
		Taste	4.64	0.49	Highly Acceptable
		Texture	4.68	0.48	Highly Acceptable
		Overall Mean	**4.47**	**0.33**	**Moderately acceptable**
Adults		Appearance	4.48	0.65	Moderately acceptable
		Aroma	4.24	0.78	Moderately acceptable
		Taste	4.36	0.70	Moderately acceptable
		Texture	4.28	0.74	Moderately acceptable
		Overall Mean	**4.34**	**0.37**	**Moderately acceptable**
Experts		Appearance	4.80	0.41	Highly Acceptable
		Aroma	4.76	0.52	Highly Acceptable
		Taste	4.88	0.33	Highly Acceptable
		Texture	4.76	0.43	Highly Acceptable
		Overall Mean	**4.80**	**0.35**	**Highly Acceptable**

The respondents' perceptions regarding the acceptability of **Coconut Dumplings** show varying perspectives across different age groups and expert opinions.

Children provided moderately acceptable ratings for the Coconut Dumpling variant, with mean scores ranging from 4.20 to 4.60 across appearance, aroma, taste, and texture. Despite the variability in ratings, the overall mean score for children is 4.37, suggesting a moderately acceptable perception among this demographic.

Similarly, *teenagers* rated the Coconut Dumpling variant as moderately acceptable, with mean scores ranging from 4.28 to 4.68 across the criteria. However,

their overall mean score of 4.47 indicates a slightly higher level of acceptability compared to children.

Adult respondents also rated the Coconut Dumpling variant as moderately acceptable, with mean scores ranging from 4.24 to 4.48 across the criteria. Their overall mean score of 4.34 aligns with the perceptions of children and teenagers, indicating a consistent level of acceptability across different age groups.

In contrast, *experts* evaluated the Coconut Dumpling variant more positively, with mean scores ranging from 4.76 to 4.88 across criteria. Their overall mean score of 4.80 suggests a highly favorable perception of the product, with consistently high ratings across all evaluated aspects.

Overall, while there are variations in the perception of Coconut Dumplings among different respondent groups, the general trend indicates a moderately acceptable level of acceptability across all demographics, with experts providing the most positive evaluations.

Table 6. The general level of acceptability of *Yema Empanaditas* as evaluated by children, teenagers, adults, and experts

Respondents	Product	Criteria	Mean	SD	Descriptive Interpretation
Children	Yema Empanaditas	Appearance	4.64	0.57	Highly Acceptable
		Aroma	4.44	0.58	Moderately acceptable
		Taste	4.60	0.50	Highly Acceptable
		Texture	3.92	0.70	Moderately acceptable
		Overall Mean	**4.40**	**0.31**	**Moderately acceptable**
Teenagers		Appearance	4.44	0.51	Moderately acceptable
		Aroma	4.36	0.58	Moderately acceptable
		Taste	4.80	0.41	Highly Acceptable
		Texture	4.44	0.58	Moderately acceptable
		Overall Mean	**4.53**	**0.19**	**Highly Acceptable**
Adults		Appearance	4.56	0.58	Highly Acceptable
		Aroma	4.36	0.70	Moderately acceptable
		Taste	4.48	0.59	Moderately acceptable
		Texture	4.08	0.76	Moderately acceptable
		Overall Mean	**4.37**	**0.36**	**Moderately acceptable**
Experts		Appearance	4.88	0.33	Highly Acceptable
		Aroma	4.80	0.41	Highly Acceptable
		Taste	4.92	0.28	Highly Acceptable
		Texture	4.80	0.41	Highly Acceptable
		Overall Mean	**4.85**	**0.27**	**Highly Acceptable**

The table presents the level of acceptability of the four groups of respondents of *Yema Empanaditas.*

Children rated the Yema Empanaditas variant as moderately acceptable, with mean scores ranging from 3.92 to 4.64 across appearance, aroma, taste, and texture. While

aspects like appearance and taste were highly acceptable, texture received a lower rating, contributing to an overall mean score of 4.40, indicating a moderately acceptable perception among this demographic.

Conversely, *teenagers* perceived the Yema Empanaditas variant more favorably, with mean scores ranging from 4.36 to 4.80 across criteria. Their overall mean score of 4.53 suggests a highly acceptable perception of the product, particularly in terms of taste, which received the highest rating among all criteria.

Adult respondents rated the Yema Empanaditas variant similarly to children, with mean scores ranging from 4.08 to 4.56 across criteria. Their overall mean score of 4.37 aligns with the perceptions of children, indicating a consistent level of moderately acceptable acceptability across different age groups.

In contrast, *experts* evaluated the Yema Empanaditas variant more positively, with mean scores ranging from 4.80 to 4.92 across criteria. Their overall mean score of 4.85 suggests a highly favorable perception of the product, with consistently high ratings across all evaluated aspects, particularly in appearance, aroma, taste, and texture.

Overall, while there are variations in the perception of Yema Empanaditas among different respondent groups, the general trend indicates a moderately to a highly acceptable level of acceptability across all demographics, with experts providing the most positive evaluations.

Comparison in the Acceptability of Three Tilapia Pastry Food Products

Table 5. Comparison in the General Acceptability of Tilapia Pastry Food Products

Food products	F-value	p-value	Comparison	Decision	Remarks
Caramel Tart	7.65	0.00	p-value < 0.05	Reject Ho	Difference is significant
Coconut Dumpling	9.45	0.00	p-value < 0.05	Reject Ho	Difference is significant
Yema Empanaditas	14.37	0.00	p-value < 0.05	Reject Ho	Difference is significant

Table 6. Post-hoc analysis using Tukey HSD on the significant difference of the respondents' general acceptability of Tilapia Pastry Food Products

Dependent Variable	Groups		Mean Difference	p-value
Caramel Tart	Children	Teenagers	-0.09	0.68
		Adults	-0.16	0.20
		Experts	-0.37*	0.00
	Teenagers	Children	0.09	0.68
		Adults	-0.07	0.82
		Experts	-0.28*	0.00
	Adults	Children	0.16	0.20
		Teenagers	0.07	0.82
		Experts	-0.21	0.05
	Experts	Children	0.37*	0.00
		Teenager	0.28*	0.00
		Adults	0.21	0.05
Coconut Dumpling	Children	Teenagers	-0.10	0.73
		Adults	0.03	0.99
		Experts	-0.43*	0.00
	Teenager	Children	0.10	0.73
		Adults	0.13	0.54
		Experts	-0.33*	0.00
	Adults	Children	-0.03	0.99
		Teenagers	-0.13	0.54
		Experts	-0.46*	0.00
	Experts	Children	0.43*	0.00
		Teenager	0.33*	0.00
		Adults	0.46*	0.00
Yema Empanaditas	Children	Teenagers	-0.13	0.39
		Adults	0.03	0.98
		Experts	-0.45*	0.00
	Teenager	Children	0.13	0.39
		Adults	0.16	0.21
		Experts	-0.32*	0.00
	Adults	Children	-0.03	0.98
		Teenagers	-0.16	0.21
		Experts	-0.48*	0.00
	Experts	Children	0.45*	0.00
		Teenager	0.32*	0.00
		Adults	0.48*	0.00

The table presents the analysis of the significant difference in the general acceptability of the three tilapia pastry products across children, teenagers, adults, and

experts. It also includes a Post Hoc Analysis using Tukey HSD to determine which among the groups differ in perceptions.

The analysis reveals a significant difference in the general acceptability of the three tilapia pastry food products (Caramel Tart, Coconut Dumpling, and Yema Empanaditas) across age groups, as indicated by the obtained F-values and p-values
.

For *Caramel Tart*, the F-value of 7.65 with a p-value less than 0.05 indicates a rejection of the null hypothesis, signifying a significant difference in acceptability across age groups. Specifically, post-hoc analysis using Tukey HSD reveals significant differences between children and experts, as well as between teenagers and experts, with experts rating the Caramel Tart significantly higher in general acceptability compared to both children and teenagers
.

Similarly, for *Coconut Dumpling*, the F-value of 9.45 with a p-value less than 0.05 signifies a significant difference in acceptability across age groups. Post-hoc analysis shows significant differences between children and experts, as well as between teenagers and experts, with experts rating the Coconut Dumpling significantly higher in general acceptability compared to both children and teenagers.

For *Yema Empanaditas*, the F-value of 14.37 with a p-value less than 0.05 also indicates a significant difference in acceptability across age groups. Post-hoc analysis reveals significant differences between children and experts, between teenagers and experts, and between adults and experts, with experts rating Yema Empanaditas significantly higher in general acceptability compared to all other age groups.

In summary, the F-values and p-values confirm significant differences in the general acceptability of all three tilapia pastry food products across age groups, with experts consistently rating them higher compared to children, teenagers, and adults.

Table 6. Nutritive Value of Tilapia Pastry Food Products Report of Analysis

Lab. No	Sample Description	Crude Protein	Crude Fat	Moisture
		%	%	%
FT-24-0005	Yema empanaditas, 1	15.07	15.09	25.48
FT-24-0006	Coconut dumplings, 2	13.46	14.10	19.74
FT-24-0007	Caramel tart, 3	11.49	14.45	33.15

Note: 1) *Sample will be kept only for a month from the date received; 2) environmental conditions, Temperature: 25 Degrees °C±3, Relative Humidity: 40-60%*

Table 6 shows the result of the Analysis of Tilapia pastry food products conducted by the Department of Agriculture Regional Field Office No.02 Tuguegarao City, Cagayan Integrated Laboratory Division with laboratory number FT24- 005-007 the requested service/s Crude Fat, Crude Protein and Moisture.

The *Caramel Tart* based on the test semi-automatic Kjeldahl method using the Reference Method (AOAC Official Method 984.13) has a Crude Protein of 11. 49%; ANKOM Filter Bag Technique using the Reference Method (In-house method) has Crude Fat of 14.45%; the Gravimetric Method using the Reference Method (AOAC Official Method 934.0) has moisture of 33.15%.

The *Coconut Dumplings* based on the test semi-automatic Kjeldahl method using the Reference Method (AOAC Official Method 984.13) have a Crude Protein of 13. 46%; ANKOM Filter Bag Technique using the Reference Method (In-house method) has Crude Fat of 14.10 %; the Gravimetric Method using the Reference Method (AOAC Official Method 934.0) has moisture of 19.74%.

The *Yema Empanaditas* based on the test semi-automatic Kjeldahl method using the Reference Method (AOAC Official Method 984.13) has a Crude Protein of 15.07%; ANKOM Filter Bag Technique using the Reference Method (In-house method) has Crude Fat 15.09 %; the Gravimetric Method using the Reference Method (AOAC Official Method 934.0) has moisture of 25.08%.

Shelf-Life of Tilapia Pastry Products at Normal Room Temperature

An 11-day observation was conducted on caramel tart, coconut dumplings, and yema empanaditas stored at normal room temperature. The following observations were noted:

Day 1: The caramel tart, coconut dumplings, and yema empanaditas had perfect appearance, aroma, taste, and texture.
Day 2: The pastries maintained their perfect appearance, aroma, taste, and texture.
Day 3: When exposed to open air, the crusts of all three pastries became crumbly and hard.
Day 4: The crusts remained hard.
Day 5: No additional changes were observed.
Day 6: No changes occurred.
Day 7: No changes were observed.
Day 8: No changes were observed.
Day 9: The aroma decreased, with a reduction in the initial fishy smell.
Day 10: The crusts of the pastries hardened further.
Day 11: The crusts maintained their color and firmness, but an unpleasant smell indicating spoilage was present in the fillings.

Shelf-Life of Tilapia Pastry Products in Normal Room Temperature in a Closed Microwave Container

A five-day observation was also conducted on caramel tart, coconut dumplings, and yema empanaditas stored at normal room temperature in tightly sealed containers. The following observations were noted:

Day 1: The pastries had perfect appearance, aroma, taste, and texture.
Day 2: The pastries maintained their normal condition.
Day 3: The crusts of the pastries reduced in firmness.
Day 4: The crusts became soft.
Day 5:

- The caramel tart's crust became soft, and white molds with discoloration formed on the filling.
- The coconut dumpling's crust became soft, with a white spider-web-like structure forming between the coconut filling and producing a foul odor.
- The yema empanaditas' crust became soft, and the filling became moist and produced a foul odor indicating spoilage.

Conclusions

The development and evaluation of tilapia *(Oreochromis niloticus)* flour-based pastry products, namely caramel tarts, coconut dumplings, and yema empanaditas, prove their high nutritional value and general acceptability across various demographics. The process of creating these pastries ensures the production of high-quality, standardized products. The acceptability ratings indicate an extreme preference for the caramel tart variant, while all three products received favorable evaluations, especially from expert respondents. Nutritional analysis confirmed that these pastries are rich in protein and provide essential nutrients, aligning with the benefits of fish consumption in the diet. Shelf-life studies highlighted the importance of proper storage to maintain quality and prevent spoilage. Overall, tilapia pastry products offer a nutritious, appealing food option with broad acceptability, emphasizing their potential as innovative and healthy additions to the culinary market.

Recommendations

In light of the findings and conclusions, this study has the following recommendations:

1. Recipes should be continuously refined to enhance the sensory attributes of tilapia pastry products. The focus should be on improving aspects such as appearance, aroma, taste, and texture to ensure consistent high acceptability across all variants.
2. The consumers should be educated about the nutritional value of tilapia pastry products, emphasizing their high protein content and essential nutrient profile. This

should be done through packaging labels, marketing materials, or nutritional awareness campaigns.

3. Marketing strategies should be tailored to target specific demographic groups based on their preferences and perceptions. For instance, the unique flavors and textures of each variant should be highlighted to appeal to diverse consumer segments.
4. There should be clear guidelines on proper storage to maintain product quality and prolong shelf-life. This may include recommending airtight containers or refrigeration to prevent moisture absorption and spoilage.
5. Continuous innovation in tilapia pastry product development like exploring new flavors, fillings, and pastry formats should be encouraged. This could involve collaborating with culinary experts or conducting consumer surveys to identify emerging trends and preferences.
6. Implementation of stringent quality control measures throughout the production process to ensure consistency and adherence to standards should be in place. Regular sensory evaluations and nutritional analyses can help maintain product quality and meet consumer expectations.
7. Foster collaboration between the academe, industry, and government agencies (DOST, DA, and DTI) to further research on tilapia pastry products. This could include investigating innovative processing techniques, exploring novel ingredients, and evaluating the health benefits of consuming these products

Compliance with Ethical Standards

The researcher's unwavering commitment to ethical standards is evident in the meticulous adherence to principles of integrity, respect, and responsibility towards participants. Prior to the study, informed consent was obtained, ensuring participants' understanding of the research purpose and procedures, while maintaining confidentiality and anonymity throughout. By avoiding conflicts of interest, plagiarism, and bias, the researcher upheld the study's credibility and trustworthiness and ensured that the findings were used solely for research purposes, reflecting a dedication to ethical research conduct.

Acknowledgments

The researcher expresses heartfelt gratitude to her research adviser, the study participants, colleagues, friends, and beloved family for their invaluable help, support, and guidance throughout the research endeavor. Their contributions have been instrumental

in the successful conduct of the study, reflecting a deep appreciation for their assistance and encouragement.

ABSTRACT

This pre-experimental study investigates the impact of the Innovative Talking Pen on the macro skills of third-grade learners. The research employs a comprehensive design to explore real-life experiences, perceptions, and narratives of both teachers and learners within their natural learning environment. Twenty Grade III learners and five teachers from the Division of Misamis Oriental participated, and ethical considerations were taken into account through proper permissions and informed consent. An adapted and modified rubric was used to determine the Listening and Viewing, Speaking, and writing skills results of the learners. While in reading we utilized the Phil-IRI assessment. Researcher-made interview questions are also one of the instruments for the teacher-participants. Initial assessments demonstrated competencies spanning from "Good" to "Average," and “Frustration” in reading providing a foundation for the intervention. After the program, learners exhibited a steady and positive improvement, resulting in an overall average score of "Excellent" in listening, viewing, speaking, and writing, and "Instructional" in reading. Paired t-tests confirmed significant differences, validating the effectiveness of the Talking Pen. The teacher also concluded through an interview that utilizing a talking pen engages students and motivates them to participate actively in class. This study highlights the significant impact of the Talking Pen in improving macro skills, and recommends its incorporation into daily classroom practices. The results demonstrate that interactive and technology-enhanced methods. The study suggests that educators should adapt and invest in Talking Pens, creating a stimulating learning environment where students can participate actively in the learning process. This research adds to the ongoing discussion on innovative teaching tools and their positive

effect on language development, emphasizing the value of keeping up with current educational trends.

Keywords: *listening and viewing, speaking, reading, writing skills*

INTRODUCTION

For effective and meaningful communication every individual must develop the four macro skills of language – Listening and Viewing, Speaking, Reading, and Writing. Macro Skills are the foundation and largest skills that an individual needs to master to communicate and comprehend well. As stated in DepEd Order No 47, s. 2016, Early Childhood learners must always demonstrate the expected competency, always participate in different activities and work independently, and always perform tasks advanced in some aspects including Language, Literacy, and Communication Domains that focus on the four macro skills – Listening and Viewing, Speaking, Reading, and Writing.

In the Early Childhood Progress Report Card stipulated in DepEd Order No. 47, s. 2016 also known as Omnibus Policy on Early Childhood Education, the first macro skill is listening and viewing. This allows Early Childhood Educators to develop the Listening and Viewing Skills of Early Childhood by allowing them to listen attentively, recall details, analyze videos, photographs, pictures, and television, discriminate objects and pictures, and predict story outcomes. In the Canadian Common Curriculum Framework, viewing is defined as ‘an active process of attending and comprehending visual media, such as television, advertising images, films, diagrams, symbols, photographs, videos, drama, drawings, sculpture, and paintings.’ Listening and viewing are essential for effective communication, enabling early childhood learners to gain a deeper understanding of others' perspectives and fostering empathy. They also facilitate the absorption of information from various media, enhancing learning and information retention.

Speaking skills are equally important skills that an early childhood learner needs to develop consistently as well. As stated by Spratt, et al. (2005) speaking involves the speaker using speech to express meanings to other people. In the same line, Nunan says that speaking is a productive oral skill. It involves the production of verbal utterances to comprehend meaning. In addition, speaking is a social communication that aims at sharing values and traditions that bind a community together (Richards & Renandya, 2002). In the Early Childhood Curriculum of the Philippines, educators assess the speaking skills of early childhood learners by observing if the child uses proper expression and polite greetings, talks about details of objects, and participates actively in class activities such as poems and rhymes. Speaking is crucial for expressing one's thoughts, ideas, and emotions, fostering effective communication and connection with others. It also plays a pivotal role in academic success, as it allows early childhood learners to articulate their expertise and influence those around them.

Just like the other macro skills, reading is also essential for every learner. Reading is about analyzing written and printed letters and words. For early childhood learners, reading is crucial as it lays the foundation for literacy and language development, helping them build vocabulary, comprehension, and communication skills essential for future academic success. Additionally, reading at this age sparks curiosity, imagination, and a love for books, setting the stage for a lifelong passion for learning. With that, Early Childhood educators develop reading skills by introducing letter sounds and names and interpreting information from books, pictures, and other printed materials.

Lastly, writing is also equally essential for early childhood learners. It helps them develop fine motor skills, hand-eye coordination, and the ability to express their thoughts and ideas. It also serves as a creative outlet, enabling young learners to communicate and share their experiences, which is fundamental for their cognitive and emotional development. Early childhood educators develop writing skills through regular practice, coloring, tracing and even drawing.

As generations evolve, so do the interests of early childhood learners in developing their four macro skills. Young children today exhibit less enthusiasm for traditional instructional materials that educators typically use in their daily classes. Charts, manipulative yet not interactive materials, and other traditional instructional materials are less attractive to young children. Early childhood learners are exposed to technology and that makes them interested in something associated with technology. The study showed that 1234 early childhood educators agreed that using digital technology, such as cameras, video games, computers, tablets, TV, ebooks, internet, smartphones, etc., had a strong influence in assisting learning (Blackwell et al., 2014). In the context of this research, the researcher observed that young children are unmotivated and less engaged in class while learning. With that, it is a great challenge for an educator to look for manipulative materials that are interactive as well and that will assist the learner in their learning even if the teacher is not around.

The researchers discovered the existence of a Talking Pen Learning Tool. According to the Grolier website, talking or reading pen is a thematic learning sequence based on everyday situations and common encounters that focuses on building key language skills such as vocabulary, grammar and sentence patterns, reading and comprehension, speaking and pronunciation, writing, and listening and viewing. Additionally, it provides extensive read-aloud audio that helps boost a child’s language confidence. Children can practice independently at ease and in their own time having a talking pen as their guide. In addition, researcher suggests that audiobooks give students practice with accurately tracking text, which eventually leads to word recognition. The talking pen also attempts to teach children the pre-reading skills of letter perception and phonemic awareness on an exercise page of the textbook.

This innovative, interactive talking pen is aligned with Lev Vygotsky's Zone of Proximal Development (ZPD) and scaffolding theory, which emphasizes that learners can achieve greater progress when they have supportive individuals and tools to assist them, compared to when they learn in isolation without such aid. Moreover, the scaffolding

theory is a learning tool that learners use to advance levels in the zone of proximal development. Additionally, learning tools can also boost and increase their engagement, and motivation, and improve retention. It can help the learner develop certain competencies in a more systematic approach.

With that, the researcher believes that talking pens can provide early childhood learners an aid to master the four macro skills of Literacy, Language, and Communication Domain while learning with teachers and even independently. The talking pen can provide appropriate learning experiences and help them develop and even realize their potential in the four macro skills. This provides immediate feedback and guidance as the learners engage with it. Over time, as the learner's skills improve, learners can start using the talking pen with less assistance and it develop independence.

Thus, this study sought to investigate the effectiveness of Talking Pen in improving the macro skills of Grade III learners from the Division of Misamis Oriental for the school year 2023-2024.

Research Questions

As children are leaning towards a technological world, education must as well adapt to the changes and trends of the generation for better learning. Talking Pen is one of the interactive and engaging materials that children can play with while learning. Thus this study seeks to investigate the effectiveness of the talking pen in the macro skills such as listening and viewing, speaking, reading, and writing, of the Early Childhood Learners. Specifically, this study aims to address the following questions:

1. What are the level of performance skills of Grade III Learners before and after the conduct of Innovative Talking Pen in terms of:
   1.1. Listening and Viewing;
   1.2. Speaking;
   1.3. Reading;
   1.4. Writing?
2. Is there a significant difference between the level of macro skills of the Grade III Learners before and after utilizing the Innovative Talking Pen?
3. What are the teachers' feedback on incorporating a talking pen?

METHODOLOGY

Design

This research employs a pre-experimental study design to offer a comprehensive and context-specific examination of the influence of the Innovative Talking Pen on third-grade learners' macro skills. The pre-experimental design incorporates certain experimental elements while omitting others, resulting in an experiment that falls short of being classified as truly experimental. This design facilitates an in-depth exploration of

the real-life experiences, perceptions, and narratives of both teachers and students within their natural learning environment, allowing us to uncover the nuanced aspects of the Talking Pen's effectiveness.

Participants

The participants of this study encompass twenty (20) Grade III learners and five (5) teachers from the Division of Misamis Oriental. This study used a random sampling procedure in identifying the teachers first and later on identifying the participants randomly.

Research Instrument

The study utilized a researcher-made assessment to collect mixed-method data, to evaluate the effectiveness of the Innovative Talking Pen on the macro skills of third-grade students. In listening and Viewing, the researchers adapted and modified rubrics from Paul Krupakar (2020) to assess the listening and viewing skills of the participants. In Speaking Skills, the researcher adapted and modified rubrics from Shahidah and Umasugi (2021) to assess the speaking skills of the participants. In reading, the researcher adapted the Philippine Informal Reading Inventory. Lastly, in writing, the researcher adapted and modified rubrics from Goodwin and Kirkpatrick (2023) to assess the writing skills of the participants.

The questionnaire's content validity and reliability were carefully considered during its development. To ensure content validity, a panel of experts that included Public School Supervisors and two (2) Master Teachers critically reviewed the items and provided feedback and suggestions to enhance the questionnaire's clarity, relevance, and alignment with the study objectives. The instrument’s internal consistency was assessed using Cronbach's alpha coefficient with the result of 0.87 which implies a ‘Good’ research instrument’, with the obtained value confirming the instrument's reliability and the consistent measurement of intended constructs.

Statistical Treatment

Descriptive statistics, including mean scores, were used to analyze the quantitative data and assess the overall and individual competency-level perceptions of both teachers and students regarding the Talking Pen intervention. Pre-test and post-test means were compared using paired t-tests to determine the effectiveness of the intervention. The researcher also used thematic analysis in the qualitative data from the teacher’s interview to find the feedback from the teachers.

RESULTS

This research sought to find the effectiveness of the talking pen in the macro skills of Early Childhood learners. Thus, the results of the data were collected and presented in tabular form. The interpretation was discussed thoroughly in this study.

1. What is the level of macro skills of Grade III Learners before and after the conduct of Innovative Talking Pen in terms of;

1.1 Listening and Viewing;
1.2 Speaking;
1.3 Reading; and
1.4 Writing?

To find the effectiveness of the innovative talking pen, there is a need to find the results of the pre-assessment test and the post-assessment test. These data were considered essential in the way that they provided a clear and transparent impact of the talking pen on the macro skills of the learners.

Table 1:
Learners' Listening and Viewing Skills Results

Expected Competency	Pre-test		Post-test	
	Mean	Description	Mean	Description
Level of Engagement (10 pts)	5.8	Good	9.4	Excellent
Topic Awareness (10 pts)	4.9	Average	7.5	Good
Fluency in English (10 pts)	3.5	Average	5.0	Good
Non-verbal Communication (10 pts)	4.8	Average	8.3	Good
Listening Span (10 pts)	6.0	Good	8.9	Excellent
Viewing Span (10 pts)	6.7	Good	9.1	Excellent
Total	**5.28**	**Good**	**8.03**	**Excellent**

Table 2:
Learners' Speaking Skills Results

Expected Competency	Pre-test		Post-test	
	Mean	Description	Mean	Description
Grammar (5 pts)	1.9	Good	3.5	Good
Vocabulary (5 pts)	2.3	Average	3.6	Good

Fluency (5 pts)	2.9	Good	3.7	Good
Pronunciation (5 pts)	2.9	Good	4.0	Excellent
Accuracy (5 pts)	2.7	Good	3.9	Excellent
Comprehensibility (5 pts)	3.1	Average	3.9	Excellent
Total	**2.63**	**Good**	**3.76**	**Excellent**

Table 3:
Learners' Reading Skills Results

Expected Competency	Pre-test		Post-test	
	Mean	**Description**	**Mean**	**Description**
Word Reading	78	Frustration	95	Instructional
Comprehension	52	Frustration	68	Instructional

Table 4:
Learners' Writing Skills Results

Rubrics	Pre-test		Post-test	
	Mean Scores	**Description**	**Mean Scores**	**Description**
Function (15 pts)	7.4	Average	10.5	Good
Format (20 pts.)	13.1	Good	16.0	Excellent
Content (50 pts.)	24.0	Average	34.5	Average
Grammar and Mechanics (15 pts.)	6.5	Average	9.2	Average
Total	51	Average	70.2	Average

2. Is there a significant difference between the level of macro skills of the Grade III Learners before and after utilizing the Innovative Talking Pen?

To find the effectiveness of the innovative talking pen, there is a need to consider the significant difference between the pre-test and post-test assessment. These data were considered essential in the way that they provided a clear and transparent impact of the talking pen on the macro skills of the learners. The table 5 presents the result of the data computed using the paired t-test that includes the four (4) macro skills such as listening and viewing, speaking, reading, and writing.

Table 5:
Significant Difference

Macro Skills	Pre-test	Post-Test Mean	p-value	Interpretation
Listening and Viewing	5.28	8.03	.013	S
Speaking	2.75	3.76	.042	S
Reading	65	82	.019	S
Writing	51	70.2	.086	NS

3. What are the teachers' feedback in incorporating a talking pen?

To find the effectiveness of the innovative talking pen, there is a need to consider the feedback of the teacher-implementer of the talking pen. These data were considered essential in the way that they provided a clear and transparent impact of the talking pen on the macro skills of the learners.

Table 6:
Teacher's Feedback on Talking Pen

Themes	Sample supporting significant statement
Listening and Viewing Skills	*"Students demonstrate improved understanding of spoken language as they engage with audio content provided by the talking pen."* *"Listening to correct pronunciation models through the pen can contribute to improved pronunciation skills."* *"Students can recall details from stories/poems/songs listened to."* *"They can relate story events to personal experiences"* *"They can sequence events from a story listened to"* *"can discriminate objects/pictures as same and different, identifies missing parts of objects/pictures, and identifies which objects do not belong to the group"*
Speaking Skills	*"My students can talk about details of objects, people, etc. using appropriate speaking vocabulary"* *"They can participate actively in class activities and discussions by responding to questions accordingly."* *"Students can retell simple stories or narrate personal experiences"*
Reading Skills	*"Interactive read-aloud and additional explanations provided by the pen can help students better understand and comprehend written texts."*

	"It is engaging in the way that students improved their word recognition skills, and their fluency as well. *"interpret information from simple pictographs, maps, and other environmental print"* *"Students can distinguish words that rhyme."*
Writing Skills	*"Students can write words correctly."* *"My students have shown little improvement in sentence structure and independence in writing."*

DISCUSSION

Listening and viewing are the first macro skills that a child develops. It is their one way to communicate with people around them. In daily life, listening is an everyday activity that has an important role in receiving information (Nushi & Orouji, 2020). Rost (2013) stated that listening refers to a complex process that allows people to comprehend spoken language. Language is a main tool of communication and it is confirmed as a connection of human beings. However, communication does not include only speaking, but also listening which is the way to understand and feel how the conversation or relationship going on (Djabborova 2020). The teacher must incorporate different strategies to enhance learners' listening skills.

Table 1 presents the pretest and posttest of Listening and Viewing. The total mean score for listening and viewing skills for the pretest is 5.28, which falls within the "Good" range. This means that the participants have a good-level skill in Listening and Viewing which includes the level of engagement, awareness of the topic, fluency in English, Non-verbal communication, listening span, as well as viewing span. This implies that learners actively participate in the discussion and show interest in the class discussion, asking for clarifications, and sharing their ideas even before the incorporation of the talking pen. The table also presents that students have a good-level viewing span with a 6.7 mean score. This implies that students can watch certain educational videos. Moreover, the table presents that Fluency in English obtains the lowest mean among the criteria obtaining a 3.5 mean score. This implies that students need to improve their fluency with the help of the talking pen.

Table 1 also presents the post-assessment test results which obtained an 8.03 mean score from the criteria which includes level of engagement, awareness of the topic, fluency in English, Non-verbal communication, listening span, as well as viewing span. This reveals that students improved their listening and viewing skills with the help of the talking pen. Students can interpret and communicate using non-verbal cues. They can learn and talk about the topics. The table also presents that students obtain the highest mean 9.4 in the Level of Engagement criteria. This means that after the integration of the talking pen, students can actively participate in the class discussion by asking questions, and confidently share ideas and thoughts. In contrast, the table presents the lowest mean 5.0 'Good' in Fluency. This implies that students still need to learn more in expressing

their ideas fluently in English. However, despite being the lowest among the criteria, the table also shows that there is an improvement in the student in terms of fluency in English.

The data from table 1 shows the improvement of the students in listening and viewing skills. Students improve their listening and viewing skills by utilizing the talking pen which allows them to be more motivated and engaged in the class. Learning is the development of new knowledge, skills, or attitudes as an individual interacts with learning resources (Karlina et al., 2020). This means that through learning resources, and the talking pen, students can be actively engaged and motivated in class. They are confident in sharing their ideas and thoughts, asking questions, and showing interest in learning from the discussion.

The second macro skill developed in the child is their speaking skills. Speaking skills are not developed naturally. The child acquire and develops their speaking skills from the people around them. What the child hears from their mother, father, or even from the community, is the basis of how the child speaks. Even though the child already developed his speaking skills at home, there is still a need to develop his speaking skills at school to communicate effectively. Teaching speaking has been given much importance at school for many years. This is the reason why most of the competencies in the K to 12 curriculum push learners to perform various activities that deal with speaking such as declaration, reciting of poems, reporting, oral reading, etc. Making the proper sounds, selecting the appropriate words, and understanding structures are only a portion of speaking (Rao, 2019).

Table 2 presents the results of the pre-assessment test and post-assessment test of the speaking skills of the Early Childhood learners. The rubrics include grammar, vocabulary, fluency, pronunciation, accuracy, and comprehensibility which are considered the most effective criteria in assessing the speaking skills of the students (Syahidah & Umasugi, 2021). In the pre-test assessment, it shows that the student obtains 2.63 mean scores or ‘Good’. This implies that students have average grammar, comprehensibility, and vocabulary skills, and are good in fluency, pronunciation, and accuracy skills. This implies that students need to regularly review rules in grammar, practice correct grammar in speaking, read books, and learn new words. Students also need to engage in speaking activities in school such as poem recitation and other activities to enhance their speaking skills. This also implies that students still need to improve their pronunciation. Through listening to how the talking pen pronounces the words, students need to imitate the pen. Lastly, the data implies that students still need to practice, improve, and enhance their speaking skills.

Table 2 also presents the post-assessment test that obtains 3.76 ‘Excellent.’ This implies that after the implementation of the talking pen, students improve and enhance their speaking skills. They improve in proper grammar and gradually enhance their skills in using correct structure and word forms. This also implies that students enhance their vocabulary skills and can express their thoughts effectively. The table also presents the pronunciation that obtained the highest mean score from the post-assessment test. This implies that students improve their skills in speaking the correct and clear pronunciation

when speaking in the class discussion. Lastly, this reveals that talking pens helped the students improve their speaking skills which serves as one of the most essential skills of a human being.

Learners can easily adjust and enhance their speaking skills and learn at their own pace through the help of a speaking pen (Tsubak & Maeda, 2020). This provides a supplementary statement that talking pens influence the speaking skills of the students. Regularly practicing correct pronunciation provides confidence in sharing ideas and thoughts.

Table 3 presents the Learners' Reading Skills Results. After the pretest, it was found that the average score for learners in oral reading was 78, while in comprehension it was 52, which both classified as "frustration". This indicates that these learners require additional guidance and support from both parents and teachers to enhance their reading abilities. It is important to note that these learners may currently possess low reading skills. To address this, the Department of Education's Every Child A Reader Program (ECARP) aims to ensure that every child can read by the end of Grade Three (DepEd Order No. 45 s 2002). To achieve this goal, DepEd has implemented various intervention and remediation programs through teachers. The DepEd Division of Misamis Oriental has introduced the Be More Power V 200 reading program, which aims to teach learners at least 200 MELCs-based vocabulary words within 10 weeks.

On the other hand, table 3 also shows the post-test results with a mean of 95 in oral reading and 68 in comprehension both reflected as instructional in reading level. This means that most of the learners can respond to the teachers while administering the Phil-IRI. These types of learners need intervention to develop further their reading ability. It indicates that these learners have average reading skills. It signifies that teachers need activities to develop the reading skills of these learners. These learners can read the passage with a little scaffolding from the teachers or parents. So, they need activities and more time in reading to enhance their reading skills. It could be noticed that in their reading activities, most learners find it hard to read some words in a selection. Teachers still need to explain some words for them to understand. A study revealed that programs like the "Read to Live" program improve learners' reading ability (Sampang, 2023) .

Writing skill has a vital role in learning because it is needed to support the learners' academic success (Aliyu, 2020). Writing skill is a thinking tool for the other three language skills and language components, such as vocabulary, pronunciation, and grammar (Khazrouni, 2019). Learning activities using a talking pen can be an alternative method to the learning process. It can make students happy to learn and active to learn (Iffah & Rodiyah, 2022).

Table 4 presents the data from pre-assessment and post-assessment of the writing skills of the early childhood learners, particularly Grade III learners. The rubrics contain Function, format, content, grammar, and mechanics that are considered the most effective criteria in assessing the writing skills of the students (Goodwin & Kirkpatrick, 2023).

In the pre-assessment, table 4 presents that students obtain a mean total of 51 or in the ‘Average’ Level. This means that students still need to improve and enhance their writing skills using the talking pen. This means that students lack exposure to writing that will help them develop and improve their skills. Moreover, the data also implies that students must regularly practice writing from simple to complex to improve their writing skills. This also implies that students must explore and engage their self in materials that would improve their skills. Although they already have the skills in writing or expressing their ideas through writing, the data still shows that student needs to enhance their skills.

Table 4 also shows the post-assessment of the wiring skills of the students who obtain 70.2 or ‘Avarge level’. Despite being level at the range of average, there is still improvement in the students as shown in the table. This simply means that talking pen has an impact on the skills of the students in writing. Although it did not have a huge impact compared to the other macro skills, it still showed an increase in mean scores. At the end of the implementation of the talking pen, students can improve their way of expressing a clear understanding of a certain topic. They also improve when it comes to the format of the paper such as the structure that helps convey the message of their composition. The results also show improvement in expressing the clear purpose of the composition. Lastly, they also improve a little in grammar and mechanics that involve the use of tenses and punctuation in written communication.

In listening and viewing, table 4 shows that there is a significant difference between the pre-test and post-test of the early childhood learner with a p-value of .013. This means that with the help of the talking pen, students can improve their listening and viewing skills. This also implies that talking the pen is an effective teaching tool in developing and enhancing the skills of the students in terms of listening and viewing. Children develop their listening and viewing based on their environment and the usual things happening around them. Developing listening and viewing skills at school requires learning resources such as radio, speaking pens, TV, etc. (Karlina et al., 2020).

In speaking skills, table 5 shows that there is a significant difference between the pre-test and post-test of the early childhood learner with a p-value of 0.042. This means that talking pens have a great impact on the development and enhancement of the speaking skills of early childhood learners. It improves their pronunciation skills and develops confidence in active class participants. Learners can easily adjust and enhance their speaking skills and learn at their own pace through the help of a speaking pen (Tsubak & Maeda, 2020). This provides a supplementary statement that talking pens influence the speaking skills of the students. Regularly practicing correct pronunciation provides confidence in sharing ideas and thoughts.

In reading skills, table 5 shows that there is a significant difference between the pre-test and post-test of the early childhood learner with a p-value of 0.019. This means that talking pens have a great impact on the development and enhancement of the reading skills of early childhood learners. This implies that by utilizing the talking pen, students can improve their reading skills, and their ability to recognize words. Abdullah (2018) added that reading can be improved by the use of some activities and techniques

such as skimming and scanning and with the use of technology. Technology can thus play a great role in students' learning outcomes. The results of the Rufaidah et al. (2021) study show that students are better readers in incorporating technology into their reading practices at home or in school.

In writing skills, table 5 shows that there is no significant difference between the pre-test and post-test of the early childhood learner with a p-value of 0.086. Although the data on the writing skills shows improvement in the student's ability in writing, still there is no great difference between the two assessments. This means that students still need to practice their writing skills further by utilizing the talking pen for better results. This also implies that talking pen has a limited interaction with it comes to writing and in more focus on improving pronunciation, vocabulary, and fluency.

After implementing the Talking Pen Innovation, these are the feedback from the teachers as shown in table 6:

Listening and Viewing Skills. Listening is defined by Demirel (2003) as a skill of understanding a speaker’s message correctly and reacting accordingly by Ergin and Birol (2000) as a psychological process that starts with being aware of and paying attention to sound and speaking images, continues with identifying and remembering certain auditory signs; and that ends up with making sense of them. In utilizing the talking pen in developing the listening and viewing skills of the students, teachers revealed that student improves their attention and focus by listening to stories, poems, and songs from the pens and actively engaging in viewing pictures from the books. Additionally, students also show improved proficiency in active listening and can listen attentively to stories, poems, and songs. Students also show their ability to recall details, sequence events, and infer characters from the stories they listened to.

Speaking Skills. Speaking is the skill that allows every student to communicate effectively. These skills allow the student to relay information verbally to others. The teacher revealed that speaking is one of the important skills that needs to be improved and developed well. That is why, various activities are implemented inside the classroom to develop the speaking skills of the students such as reciting poems, sharing ideas and thoughts, and narrating stories. With the help of the innovative talking pen, teacher 4 reveals that students can participate actively in class such as reciting poems, rhymes, and responding to the discussion. Additionally, students can retell simple stories and narrate them in the class. As talking pens boost engagement and motivation, students can learn by asking simple questions and talking about details and people using appropriate speaking vocabulary. Students also improve their confidence in speaking and sharing their ideas and thoughts inside and outside the classroom. It also enhances student’s fluency during oral activities. It also enhances students’ intonation, pronunciation, and articulation making it easier for the teacher to understand the students. Lastly, it also increased engagement in oral activities like poems reciting, and conversation.

Reading Skills. Reading is one of the important skills in language learning (Yu, 2015). It is generally defined as the process of recognition and comprehension of written materials (Heriyawati, Saukah, & Widiati, 2018). In a similar vein, Kasımi (2012), Pearson and Cervetti (2013), and Alyousef (2005) argue that reading is a complex process integrating some cognitive processes, skills, text knowledge, strategic knowledge, and contexts to construct meaning from reading material and interpret the information. In the digital era, students as readers should master the micro kills and macro skills of reading comprehension to comprehend multimodal texts. The reading skills cover micro-skills and macros skills of reading comprehension (Brown & Abewickrama, 2010). With that, through utilizing a talking pen, teachers reveal that students demonstrate improvement in word recognition skills and enhance fluency in reading. This also improves students' pronunciation and articulation accurately and presents better comprehension of the content they read. Teacher 4 stated that students improved their retention and recall of information. Additionally, student increased independence in reading, increased engagement and interest in reading, and can use talking pens to read and explore text on their own.

Writing Skills. Writing skill has a vital role in learning because it is needed to support the learners' academic success (Aliyu, 2020). Writing skill is a thinking tool for vocabulary, pronunciation, and grammar (Khazrouni, 2019). Khazrouni further claimed that English writing skill has an important role for EFL learners to develop several skills in their English learning, such as analyzing, arguing, and critical thinking skills. Through the use of a talking pen, Teacher 3 claimed that students can slightly improve their spelling skills and be able to write words from dictation. However, teacher 3 also claimed that among the macro skills, writing skills have the least improvement in utilizing a talking pen. Teacher 2, additionally mentioned that talking pen has helped students gain basic knowledge in sentence structure although it takes time to understand and develop. Furthermore, students develop independence in writing correct spelling and clarity.

Conclusions

The results of this study demonstrate the impact of the Talking Pen intervention on improving macro skills among learners, especially in Listening and Viewing, Speaking, and Reading Skills. The researchers concluded the effectiveness of talking pens in improving the Listening and Viewing, Speaking, and Reading Skills of the learners. Based on the results, the researchers reflect on how tiny interactive and manipulative materials have a huge impact on learners, especially in enhancing and improving their macro skills. The researchers made a realization that learners are more motivated and engaging in class discussions where the trends in their generation are incorporated just like talking pens.

Recommendations

In light of the results and findings in the study, the researchers recommend incorporating a talking pen in the daily class, especially for remediation and intervention classes. Talking pen is an example of an interactive and manipulative material that is an essential tool in developing macro skills in students in this contemporary world. Additionally, the research recommends creating a conducive venue where students can enjoy and engage themselves in learning concepts utilizing a talking pen. The researcher also recommends allocating a budget to invest in talking pens, especially in Early Childhood Children where children need to be motivated while learning.

Compliance with Ethical Standards

To ensure ethical considerations, we have sought and obtained proper permissions from the relevant authorities and secured informed consent from all participants before data collection. The researcher assured them that their responses would be kept confidential.

Acknowledgments

First and foremost, to Almighty God for giving them wisdom that put them where they are now and for giving them strength in times when they felt weak and down. May the glory and honor be upon Him. The researchers would like to express their endless appreciation and gratitude to the people who helped them make this work successful. To their parents, Verano and Emma Damasing, for the constant support. To their Professor Doctor Joel Potane, thank you for the untiring support in reviewing our paper.

ABSTRACT

Through Sequential Exploratory Mixed Method research, the study aimed to measure the comprehension ability of 190 Grade 6 pupils in reading Filipino using the Philippine Informal Reading Inventory (Phil-IRI), and analyze the various factors that affects their reading comprehension skills. Based on the results, it was discovered that the level of comprehension of the respondents which obtained a weighted mean of 49.78 was in *frustration*. The study also found that the low comprehension level of the respondents is influenced by a collective internal and external factor such as interest, insufficient reading materials, low exposure to language, absenteeism, and lack of reading habit. From the collected data, it is recommended for the reading teachers to develop an appropriate reading activity that give emphasis on the specific needs of the students and takes into account the factors that influence the ability of the students to understand reading text and materials in Filipino.

Keywords: *comprehension skills, factors affecting reading skills, reading in Filipino*

INTRODUCTION (INTRODUKSIYON)

Ang pagbasa ay isa sa mga mahalagang makrong kasanayang dapat taglayin ng isang indibiduwal sapagkat ito ang pundasyon ng pagkatuto at dito nagsisimula ang pagkuha ng mga kaalaman mula sa pinakasimple hanggang sa pinakakomplikadong

impormasyon. Kaugnay nito, ang pagpapatupad ng R.A. 10533, o ang K–12 *Basic Education Program* ay nakatali sa kahalagahan ng pagpapataas ng mga kasanayan sa pagbabasa ng mga mag-aaral. Ang ganitong mga hangarin ng kurikulum ay malinaw na nakabalangkas sa DepEd Memorandum No. 173, s. 2019, na sumusuporta sa implementasyon ng programang K-12 na patuloy na tumutupad sa mandato na magprodyus ng produktibo at responsableng mamamayan na nagtataglay ng mahahalagang kasanayan para sa patuloy na pagkatuto. Kaya naman, hinikayat ng Kagawaran na bigyang-tuon ng mga guro ang paglinang sa kasanayan ng mga mag-aaral sa pagbasa bilang integral na salik sa pagkatuto.

Ganoon pa man, kapansin-pansin ang suliranin sa literasi ng mga mag-aaral sa pagbabasa. Sa datos ng DepEd (2019), nakita na maraming mag-aaral ang nahihirapan na makamit ang mga pamantayan sa pagkatuto sa *early language, literacy and numeracy*. Binigyang-diin ng DepEd (2022) na ang mababang performans na ito sa pagkatuto ay bunga ng mababang kasanayan sa pag-unawa sa pagbasa ng mga mag-aaral. Ang mga mag-aaral sa elementarya at hayskul ay parehong may kakulangan sa mga kasanayan sa literasi sa parehong wika at nilalaman, higit sa lahat sa pagbabasa. Ayon pa sa ulat ng Department of Eduaction Regional Office 8 (2022), 9 mula sa bawat 10 mag-aaral ay may mababang kasanayan sa pagbasa. Ang datos na ito ay isang seryosong suliranin na nangangailangan ng agarang aksiyon dahil ang pagbabasa ang pundasyon sa pagkatuto ng mga mag-aaral.

Ang literasi sa pagbasa ay tinitingnan bilang pundasyon para sa ganap na pakikilahok sa kontemporanyong lipunan. Ang *Programme for International Student Assessment* (PISA) ay nananawagan sa mga mag-aaral na isama at ilapat ang tekstuwal na impormasyon, at mga imbak na kaalaman sa pagganap sa lipunan (Roque et al., 2023). Kaya naman, ang DepEd ay tumugon sa suliraning ito sa pamamagitan ng paglulunsad ng mga programa at hakbang upang maisakatuparan ang kahingian sa pangangailangan sa mabungang pagbasa ng mga mag-aaral. Isa na rito ang paggamit ng *Philippine Informal Reading Inventory* (Phil-IRI). Ito ay pagtataya sa kahusayan sa pagbasa ng mga mag-aaral sa pamamagitan ng pagkilala ng salita at pag-unawa sa pagbasa sa Ingles at Filipino sa pamamagitan ng pagmamarka sa mga mag-aaral sa kawastuhan ng pagkilala ng salita at mga tanong sa pag-unawa batay sa isang set ng pamantayan sa antas ng pagbasa (DepEd, 2018; Aquino & De Vera, 2018).

Ang pagpapatupad ng Phil-IRI ay direktang tumutugon sa layunin ng DepEd na linangin ang kahusayan sa pagbasa ng bawat batang Pilipino. Ang impormal na imbentaryong ito ay gumagamit ng mga markadong sipi upang sukatin ang pagganap ng isang indibiduwal na mag-aaral sa pasalitang pagbabasa, tahimik na pagbabasa, at pag-unawa sa pakikinig upang matiyak ang antas ng kasanayan sa pagbasa ng mag-aaral. Ang Phil-IRI ay sumusukat sa mga kakayahan ng mga mag-aaral at pangkalahatang pagganap sa pagbasa, at ang impormasyong nakuha sa pamamagitan nito ay maaaring magamit upang bumuo o iakma ang silid-aralan, maliit na grupo, o indibidwal na pagtuturo upang umangkop sa mga pangangailangan at kakayahan ng mga mag-aaral (DepEd, 2018).

Sa pag-aaral na ito, binigyang-halaga ang paggamit ng Phil-IRI bilang mapagkakatiwalaang *tool* upang tayain ang antas ng pag-unawa ng mga mag-aaral sa pagbasa sa Filipino. Bagamat ang ganitong tuon ay nakita na sa ilang pag-aaral, ninais tugunan ng mananaliksik ang pagtukoy sa kasanayan ng mga mag-aaral hindi lamang sa kuwantitatibong pagsukat bagkus ay kasama sa saklaw ng pananaliksik ang pagsipat sa mga salik na nakaaapekto sa kakayahan ng mga mag-aaral sa pag-unawa sa mga babasahing Filipino. Sa konteksto ng pag-aaral, ang parehong tuon ay magbibigay ng mga emperikal na batayan upang bumuo at magpatupad ng programang pangklasrum na naaayon sa aktuwal na pangangailangan ng mga mag-aaral tungo sa pagpapaunlad ng literasi sa pagbasa. Ito ay isang paraan upang magkaroon ng angkop na programang pangklasrum at magbigay ng solusyon mula sa maykrolebel na antas patungo sa mas malawak na saklaw ng pagtugon sa matagal nang suliranin ng Kagawaran hinggil sa literasi ng mga mag-aaral sa pagbabasa.

Research Questions (Layunin ng Pag-aaral)

Ang pag-aaral na ito ay nakatuon sa pagtukoy sa antas ng kasanayan sa pag-unawa sa pagbasa ng mga mag-aaral at pagsusuri sa mga salik na nakaaapekto rito. Tinitiyak sap ag-aaral na masagot ang sumusunod:

1. Ano ang antas ng pag-unawa ng mga mag-aaral sa pagbasa sa Filipino?
2. Ano ang mga salik na nakaaapekto sa pag-unawa ng mga mag-aaral sa pagbasa sa Filipino?

Review of Literature and Studies (Rebyu sa mga Literatura at Pag-aaral)

Ang pagbasa ay isang magandang gawaing pangkaisipan na naghihikayat ng interaktibong pakikisangkot ng isang indibiduwal sa parehong haka at katotohanan. Ito ay isang paraan upang palawakin ang kamalayan ng isang tao sa mga umiiral na usapin at kalagayang panlipunan sa pamamagitan ng pagbibigay kahulugan at/o interpretasyon sa mga nakalimbag na simbolo. Ayon pa kina Quintino at Abagon (2021), ang pagbabasa ay isa sa mga pangunahing kasanayan sa wika na dapat pinagkadalubhasaan ng mga mag-aaral. Sa pamamagitan ng pagbabasa, natutuklasan ang malawak na kaisipan ng teksto tungo sa mabungang pagkatuto. Dagdag pa ni Delgado (2015), ang pagbasa ay isang kognitibong proseso ng pag-unawa sa mensaheng nakalimbag o ng ano mang wikang nakasulat. Giit pa niya, ang pagbasa ay daan tungo sa kaalaman. Samakatuwid, ang pagbabasa ay isa sa mga pangunahing kasanayan upang masiguro ang matagumpay na pagkatuto sa Filipino at iba pang lawak ng pagkatuto.

Ang kasanayan sa pagbasa ay isa sa mga pinakamahalagang kasanayan dahil ito ang pundasyon ng pagtamo ng kaalaman at pag-unawa sa ano mang asignatura (Tajinan & Tajinan, 2023). Kaya naman, ito ay isang mahalagang pagsasaalang-alang sa pagbuo at pagdisenyo ng mga pagpaplanong pampagkatuto upang maisama bilang integral na elemento ang pagbasa sa ano mang gawaing pangklasrum. Ayon pa kina Erkek (2022) at Krawits et al. (2022), ang pagbasa ay gumaganap ng mahalagang papel upang

gabayan at tulungan ang isang indibiduwal na tingnan ang realidad ng mundo sapagakat ang pagmomodelo sa kalagayan at suliraning nararanasan sa loob o labas ng paaralan ay itinatanghal sa pamamagitan ng mga simbolong pangwika. Ang pag-unawa sa pagbasa ay nagbibigay-daan sa mambabasa na magkaroon ng bukas na pagtingin sa mga katotohanang umiiral dahil ito ang naglulundo sa paghubog ng mga kahulugan gamit ang wika.

Ayon pa kina Roque et al. (2023), ang pagbabasa ay mahalaga para sa tagumpay sa maraming magkakaibang sosyo-ekonomikong industriya. Ang pagbabasa ay isang mahalagang kasanayang dapat taglayin ng lahat sapagkat ang pag-unawa sa pagbasa at katatasan dito ay mga kasanayang lubos na pinahahalagahan sa panlipunan at pang-ekonomiyang pag-unlad. Mula sa ganitong katotohanan, hindi maitatanggi na sa kasalukuyan, maraming kabataan ang nahihirapan pa rin sa pagbabasa.

Ang mga suliranin sa mababang literasi sa pagbasa ng mga mag-aaral ay matagal ng sabjek ng iba't ibang programang pang-edukasyon sa Pilipinas. Ang Kagawaran ay nagtalaga ng mga pagsasanay para sa mga guro, nagtaguyod ng mga proyektong nauugnay sa pagbasa, at naglunsad ng pagpapayaman sa mga pasilidad at kagamitan upang makapagbigay ng solusyon sa nasabing suliranin. Subalit sa kabila ng ganitong pagsisikap, kapansin-pansin pa rin ang mababang pagganap ng mga mag-aaral. Sa isinagawang pagtaya sa 2018 Program for International Student Assessment (PISA) ng Organization for Economic Co-operation and Development (OECD), nakakuha lamang ng ranggong 340 ang Pilipinas, na mas mababa sa *average* ng mga kalahok na bansa ng OECD (DepEd, 2019).

Dagdag pa, sa konteksto ng paglipat ng modalidad ng pagtuturo patungong *Modular Distance Learning* (MDL) sa panahon ng pandemya, natuklasan ng UNICEF na sa 122 na mga bansa, ang mga paaralan sa Pilipinas ang may pinakamahabang yugto ng panahon ng pagsasara ng paaralan at nanatili sa MDL. Bilang resulta, wala pang 15% ng mga mag-aaral, o humigit-kumulang tatlo sa bawat 20, ang nakararanas ng kahirapan sa pagbasa ng mga simpleng teksto. Ang datos na ito ng UNICEF ay nagpapakita ng tinatawag na *learning poverty* sa Pilipinas – tinukoy ng *World Bank* bilang bahagi ng 10 taong-gulang na hindi nakababasa o nakauunawa ng isang simpleng kuwento—na higit sa 85 porsiyento, na bahagyang mas mahusay kaysa sa pagtatantya ng World Bank na kasing taas ng 90 porsiyento noong Nobyembre ng nakaraang taon (De Vera, 2022).

Ang ganitong kaso ng pagbaba ng literasi sa pagbasa ng mga mag-aaral ay mas higit na nakababahala lalo pa't nagkaroon ng mas malawak na puwang sa pagitan ng sinubaybayang pag-aaral dahil sa modalidad ng pagtuturo sa panahon ng pandemya. Sa ganitong moda ng pagtuturo, maraming mag-aaral ang nangangailangan ng gabay mula sa guro upang maunawaan nang lubos ang mga aralin. Sang-ayon dito ang mga guro sapagkat ang mga materyales sa pag-aaral ay hindi maunawaan nang mabuti ng mga mag-aaral sa onlayn na pag-aaral, na nagreresulta sa maraming mga mag-aaral na magtamo ng mababang performans sa pagkatuto. Isa sa mga kahirapan na kinaharap ng mga mag-aaral sa mga gawain sa pagbabasa ay ang kahirapan sa pag-unawa sa pagbasa, lalo na ang mga mahahabang teksto (Daulay & Nurmnalina, 2021; Kuşdemir &

Bulut, 2018).

Sa konteksto ng pag-aaral, mahihinuha mula sa binanggit na sanhi ng mababang kasanayan sa pag-unawa sa pagbasa ng mga mag-aaral na isang malaking salik ang kawalan ng sapat na paggabay at suporta mula sa guro sa pagkatuto ng mga mag-aaral. Ang MDL na pansamantalang solusyon sa pagsasara ng mga paaralan sa panahon ng COVID-19 ay mas nagdulot ng suliranin sa literasi ng mga mag-aaral sa pagbasa dahil sa paraan ng pagkatuto, uri ng materyal na ginagamit sa pag-aaral, at kawalan ng sapat na fidbak at *reinforcement* upang tugunan ang puwang (gap) at kakulangan sa pag-unawa ng mga mag-aaral.

Dagdag pa, ang paggamit ng modernisadong paraan ng pagtuturo ay maisaalang-alang din bilang balakid sa literasi sa pagbasa ng mga mag-aaral lalo na sa mga babasahing Filipino. Paliwanag nina Parado at Reduban (2020), dahil sa modernisadong pagtuturo, ang lahat ay nagbago kasama na rito ang mundo ng pagbasa. Ang mga mag-aaral ngayon ay babad sa internet na dahilan kung bakit karamihan sa mga ito ang hindi makapagbasa ng mga libro at ginagawang katuwiran ang mas mabilis na akses sa mga e-book.

Dahil sa pagbabagong ito, mas naitulak ang marami pang dahilan upang unti-unting bumaba ang interes ng mga mag-aaral sa pagbasa ng mga akdang Filipino na sa huli ay naging dahilan ng pagbaba ng kakayahan sa pag-unawa sa pagbasa ng Filipino. Ayon sa sarbey ng National Book Development Board ([NBDB], 2012) na ginawa taong 2003, 2007, at 2012. Sa taong 2003, tinatayang nasa 94% sa mga Pilipino ang nagbabasa ng mga materyal na babasahin. Ibig sabihin na sa taong ito ay mataas pa ang paggamit sa mga akdang Filipino sa pagbasa at nakapaglalaan pa ng oras sa pagbasa ng Filipino. Subalit ang ganitong datos ay nakitaan ng makabuluhang pagbaba ng 2% noong 2007. Pagkatapos ng limang (5) taon ay mas higit pang nakita ang pagdeklayn ng bahagdan. Nang 2012, bumaba sa 88% na lamang sa mga Pilipino ang nagbabasa ng babasahing Filipino. Bagamat hindi ito gaanong malaki, makabuluhan pa rin ang datos ng sarbey dahil ipinakikita lamang nito ang patuloy na pagbaba ng interes sa pagbabasa ng Filipino.

Samakatuwid, ang mga nalikom na datos mula sa mga literatura ay pagpapakita lamang sa kabuoang kaligiran ng suliranin sa mababang literasi ng pag-unawa sa pagbasa ng mga mag-aaral. Ang pagpapatibay na ito ay paglalarawan sa suliranin at pagtalakay sa mga potensiyal na salik na nakaaapekto sa patuloy na pagbaba ng kasanayan ng mga mag-aaral sa pagbasa. Sa ganoon, nararapat lamang ang pagsasagawa ng mas malawak na pagbibigay-tuon sa suliranin upang makabuo ng mga angkop na interbensiyon. Tulad ng mga binanggit, mahalaga ang papel na ginagampanan ng pagbasa sa pagkatuto ng mga mag-aaral sapagkat ito ang pundasyon ng paglago ng kaalaman ng bawat indibiduwal dahil ang kasanayan sa pagbasa ay itinuturing na esensiyal na pangangailangan sa kasalukuyan.

Ang mababang literasi sa pag-unawa sa pagbasa ay maaaring tingnan bilang produkto ng kolektibong salik na nakaaapekto sa pag-unlad ng mga mag-aaral sa larang

ng pagbasa. Kaugnay nito, mahalagang matukoy ang antas ng kasanayan sa pagbasa ng mga mag-aaral dahil isa ito sa mga balakid na nakaaapekto sa pag-unawa sa pagbasa ng mga mag-aaral. Paliwanag ni Cimmiyotti (2013), mahalagang bigyang-pansin ang paglinang sa pagbasa dahil ito ang pundasyon ng lahat ng akademikong pag-aaral. Giit niya, ang mga mag-aaral na walang kasanayan sa mabungang pagbasa ay may limitadong pagkakataon na makamit ang malawak na oportunidad sa pagtamo at akses sa malawak na impormasyon. Ganoon pa man, kaakibat na gampanin sa pagsulong ng literasi sa pagbasa ang pagpapataas ng interes ng mga mag-aaral sa pagbasa. Sa isinagawang pag-aaral nina Parado at Reduban (2020), napatunayang may malaking kaugnayan ang interes sa pagbasa sa mga babasahing Filipino sa pagtataguyod ng mabungang pagbasa at pag-unawa ng mga mag-aaral. Kung ganoon, ang unang pagsasaalang-alang sa paglinang sa kakayahan ng mga mag-aaral sa pagbasa ay ang pagpukaw sa interes ng mga ito upang madaling madebelop sa mga mag-aaral ang kasanayan sa pagbasa at matagumpay na makisangkot sa ano mang gawaing may kinalaman sa pagbasa sa Filipino**.**

Samantala, sa isinagawang pag-aaral nina Roque et al. (2023) hinggil sa pagtaya sa abilidad ng mga mag-aaral sa pagbasa sa *post-pandemic* bilang batayan sa pagbuo ng *remediation program*, natuklasan na ilan sa mga nakaaapekto sa kasanayan ng mga mag-aaral sa pagbasa ay ang kanilang demograpikong profayl. Nakita na kung ibabatay sa *grade level* ng mga mag-aaral ang abilidad nito sa pagbasa, mababa ang kasanayan ng mga ito. Ganoon din, nakita sa isinagawang pag-aaral na karaniwan sa mga *non-readers* ay mga lalaki bagamat malaking bilang sa mga naging respondenteng lalaki ay mga *independent readers*. Sa huli, tinitingnan ng mga magulang ng mga mag-aaral na ang panloob na salik hinggil sa kahandaan at motibasyon o interes ng mga mag-aaral ay isa sa mga pangunahing balakid na nagreresulta sa mababang kasanayan sa pag-unawa sa pagbasa. Kasama rin sa mga natukoy na salik ang kawalan ng sapat na gabay sa pag-aaral sa ilalim ng Modular Distance Learning (MDL) sa panahon ng pandemya.

Sa pag-aaral naman nina Guimba at Alico (2015), napatunayan na ang mababang antas ng pag-unawa ng mga mag-aaral ay makabuluhang nauugnay sa pandamdaming salik ng pagkabalisa (anxiety) ng mga mag-aaral. Napatunayan na ang pagkabalisa sa pagbabasa ay umiiral. Sa katunayan, ang pag-aaral na ito ay nagpatunay na ang pagkabalisa sa pagbabasa ay nakita sa tatlong magkakaibang kategorya sa pagbasa, katulad ng *top-down* na pagbabasa, *bottom-up* na pagbabasa, at pagbabasa sa silid-aralan. Tulad ng natuklasan sa pag-aaral, ang mga mag-aaral sa pangkalahatan ay may mataas na pagkabalisa (anxiety) sa lahat ng kategorya ng pagbabasa. Isa sa mga dahilan nito ay ang kaligirang pangwika na nagsaad na ang hindi pagiging pamilyar sa wika ng materyal ay nakapagdudulot ng mataas na antas ng pagkabalisa sa pagbasa na sa huli ay nakaaapekto sa antas ng kanilang pag-unawa.

Kaya naman, batay sa mga natuklasan sa pag-aaral nina Roque et al. (2023) at Guimba at Alico (2015), isang mahalagang pagsasaalang-alang sa pagtuturo ang pagbibigay-diin sa uri ng materyal na gagamitin sa pagbasa at ang pagbibigay ng mga gawaing nagtataguyod ng pagpapataas sa interes at motibasyon ng mga mag-aaral. Ang pagbibigay konsiderasyon sa mga salik na ito ay katulad na tuon ng kasalukuyang pag-

aaral sapagkat ang ganitong mga input ang gagamiting lunsaran at batayan ng mananaliksik sa pagbuo ng programang pangklasrum na nagtataguyod sa pagpapaunlad ng kasanayan ng mga mag-aaral sa pag-unawa sa pagbasa sa Filipino.

Paliwanag pa nina Almirol at Catoto (2022), ang mga guro ay gumanap ng isang mahalagang papel sa panahon ng kawalan ng katiyakan sa pagtulong sa kanilang mga mag-aaral na mapahusay ang kanilang mga kasanayan sa pagbabasa sa wika. Ito ay sa kabila ng matagumpay na resulta ng kanilang isinagawang pag-aaral upang bigyang solusyon ang mababang performans ng mga mag-aaral sa pagbasa. Napatunayan sa pag-aaral na ito na binago ng programa sa pagbasa ang buhay ng mga mag-aaral. Nakita na ito ay isang epektibong diskarte batay sa iba't ibang mga aktibidad na ibinigay ng guro. Maliban dito, ang presensiya at paggabay ng guro ay nakatutulong dahil nagagawang magtanong ng mga mag-aaral ng mga bagay na mahirap gawin nang mag-isa. Dagdag pa, maaari lang maging matatas na mambabasa ang mag-aaral kung bibigyan sila ng mga tekstong nakalimbag, at mga *digital* na materyales, pati na rin ang pagsasanay sa kanila sa pamamagitan ng pagmomodelo at *shared practice* na humahantong sa *autonomous* na pagsasanay.

Sa konteksto ng Modular Distance Learning (MDL), tinitingnan ng ilang mananaliksik ang paraang ito bilang sanhi ng mas pagbaba sa kasanayan ng mga mag-aaral sa pagbasa. Sa isinagawang pag-aaral nina Gueta at Janer (2021), hinggil sa mga hamon sa *distance learning* gamit ang *Self-Learning Modules (SLM)*, natuklasan sa resulta ng pagsusulit na ang paggamit ng SLM sa taong panuruan 2021-2022 ay nakababahala sapagkat ang *literacy rate* ng mga mag-aaral ay mas mababa sa *average*, at naobserbahan na ang mga mag-aaral ay nakararanas ng kahirapan sa pag-unawa sa pagbasa. Ang ganitong dahilan ay iniuugnay sa mahinang koneksiyon sa mga malalayong lokasyon, pati na rin ang kakulangan ng mga mapagkukunan sa pagbabasa sa bansa.

Ang paglipat ng sistemang pang-edukasyon patungong MDL sa panahon ng pandemya ay nagdulot ng maraming epekto sa kalidad ng pagtuturo at pagkatuto. Ipinaliwanag sa pag-aaral nina Sucena et al. (2022), na ang mga pangmatagalang panlipunang implikasyon ng sistemang ito ng pag-aaral ay tila malala dahil nagkaroon ito ng direktang epekto sa parehong maikli at pangmatagalang karanasan ng mga guro at mga mag-aaral. Halimbawa, sa panandaliang panahon, ipinakita ng mga pananaliksik na ang pagsasara ng mga paaralan sa panahon ng COVID-19 ay nagbunga ng malaking pagkalugi sa pag-aaral, lalo na para sa mga mag-aaral na may mababang pagganap sa pagkatuto na maaaring magkaroon ng pangmatagalang epekto sa personal na kakayahan sa pagbabasa at mga potensyal na epekto sa pagbaba ng antas ng pag-unawa sa pagbasa. Dagdag pa ni Bol (2020), ang ganitong sistema ay nagbigay-diin sa hindi pagkakapantay-pantay ng mga mag-aaral dahil sa mga pagkakaiba-iba sa akses at pagkakataon na matuto sa bahay.

Ang mga punto ng pagpapaliwanag mula sa mga binanggit na resulta ng mga pag-aaral ay pagtatanghal lamang sa gampanin ng kabuoang edukatibong proseso sa paglinang sa kasanayan ng mga mag-aaral sa pagbasa. Magkaakibat ang papel na

ginagampanan ng parehong guro at mag-aaral sa pagdebelop sa mga kasanayang ito kung kayat nararapat lamang na magkaroon ng pantay na pag-unawa sa kalikasan ng kakayahan ng isang indibiduwal at pag-unawa sa pangangailangan nito upang maiangkop at maibigay ang sapat na suporta sa mag-aaral tungo sa epektibong pagkatuto. Sa usapin ng pagbasa, kinakailangang naiaangkop ng guro ang mga gawain at materyal na ibinibigay upang mas maging makabuluhan ito sa bata.

Binigyang-diin sa pag-aaral nina Claessen et al. (2020), na ang suliranin sa pagbasa ay isang usaping nakikita sa lipunan ng tao. Malinaw na ipinakita sa resulta ng *Programme for International Student Assessment* (PISA) 2018 na ang pagbasa ay isa sa mga saklaw na kung saan ang mga mag-aaral sa Pilipinas na nasa labinlimang taong gulang (15) ay nakakuha ng mababang marka at may *average reading score* lamang na 340 na mababa kumpara sa mga ibang mga bansang lumahok sa PISA 2018. Ang Pilipinas ay nagkamit lamang ng makabuluhang rate ng mababang pagganap sa lahat ng mga bansang kalahok. Ibig sabihin, 80% ng mga Pilipinong mag-aaral ay hindi nakaabot sa pinakamababang antas ng kasanayan sa pagbasa.

Kaugnay sa suliraning ito, ang Kagawaran ng Edukasyon ay naglunsad ng programang *Hamon: Bawat Bata Bumabasa* (3Bs) upang paigtingin ang adbokasiya para sa pagbabasa at sa pamamagitan ng pagtugon sa gampanin ng mga guro at pag-ako na gawing mambabasa ang bawat mag-aaral ayon sa antas o baitang ng kaniyang pag-aaral. Ang inisyatibang ito ng Kagawaran ay isang makulay na pag-asa para sa mga mag-aaral na nakararanas ng kahirapan sa pagbasa na makawala sa mababang literasi sa pagbasa sa pamamagitan ng pagbibigay ng maayos at angkop na kapaligiran sa pagbasa, programang pagtuturo, at suportang pampamilya.

Mahihinuhang ang mga kapaligiran sa pagbabasa ay dapat na idinidisenyo upang maalis ang mga kahirapan sa pagbabasa ng mga mag-aaral at upang maging maluwag ang kanilang pakiramdam at malayang maipahayag ang kanilang sarili. Bilang karagdagan, ang pagkatuto ng mga mag-aaral ay dapat na sinusuportahan ng mga materyal na naaayon sa kanilang mga interes at kakayahan kasama ang suporta mula sa guro at sa mga miyembro ng pamilya ng mga mag-aaral. Ayon pa kina Torgesen (2000) at Westwood (2008), ang pananaliksik ay nagpapatunay sa kabisaan ng pagpapaalam sa mga mag-aaral sa kahirapang nararanasan, at mga programang nakabatay sa diskarte na isinasagawa sa pakikipagtulungan ng guro at pamilya.

Sa kabila ng mga binabanggit ng mga pag-aaral hinggil sa suliranin sa mababang literasi ng mga mag-aaral sa pagbasa, hindi maikakaila ang mga aksiyon at pagtugon ng kagawaran at ibang mga iskolar upang makapaglaan ng mga nararapat na pagpapasya sa paglutas sa suliraning ito. Sa pag-aaral nina Abeberesse et al. (2014), natuklasan ang pagpapatupad ng mga programa sa pagbasa, halimbawa ang pagbibigay ng mga materyal na angkop sa gulang ng mag-aaral ay isang mainam na paraan. Sinasanay nito ang mga guro sa pagbuo at paggamit, at sumusuporta sa mga inisyal na pagkilos upang pataasin ang literasi ng mga mag-aaral sa pagbasa. Sa ilalim ng programa, nakita ang makabuluhang pag-unlad ng mga mag-aaral na nagpatuloy hanggang sa unang tatlong buwan pagkatapos ng implementasyon ng programa. Ganoon pa man, ang positibong

pagtaas ng performans sa pagbasa ay nakitaan ng pagbaba pagkatapos nito dahil marahil sa hindi naipagpatuloy at nasubaybayan ng mga guro ang programa sa pagbasa. Ganoon pa man, Maganda ang nakitang epekto nito sa mga mag-aaral sapagkat sa pamamagitan nito ay nahihikayat ang mga mag-aaral na magbasa sa kani-kanilang tahanan.

Dagdag pa, sa isinagawang pag-aaral nina Tomas et al. (2021), hinggil sa kahirapang nararanasan sa pagbasa ng mga mag-aaral ng Dibisyon ng Aurora, napatunayang karamihan sa mga mag-aaral ay nasa *frustration level*. Samakatuwid, ang pangangailangan para sa pagpapabuti sa antas ng pagbasa ay dapat isaalang-alang sa pagbuo ng mga plano sa pagpapaunlad para sa mga mag-aaral. Gayundin, nakitang baryabol ang kawalan ng masteri ng mga mag-aaral sa mga elemento ng pagbasa, presensiya ng *learners-at-risk*, at kawalan ng kultura sa pagbabasa bilang mga salik na nakaaapekto sa mababang literasi sa pagbasa ng mga mag-aaral. Kaugnay nito, binigyang-diin rin nila ang mungkahing programa at gawain sa pagbasa bilang bahagi sa paglikha ng kontekstuwalisasyon ng kurikulum sa pagbasa at magamit bilang mga hakbangin sa literasi sa pagbabasa sa mga paaralan. Ang mga hakbangin na ito ay ikinategorya bilang *Literacy Program*, *Individualized Reading Recovery Program at Enrichment/Enhancement Program.* Ang mga hakbangin na ito ay maaaring isaalang-alang ng mga paaralan sa pagpapaunlad ng kakayahan sa pagbasa ng mga mag-aaral.

Batay sa mga nalikom na kaugnay na pag-aaral, malawak na naipakita ang kalagayan ng literasi sa pagbasa ng mga mag-aaral. Ito ay isang usaping akademiko na nakita na bago pa man ang transisyon ng modalidad ng pagtuturo sa panahon ng pandemya. Ang mga emperikal na datos na bunga ng masusing pananaliksik ay pagpapatibay sa pangangailangan ng pagpapalawak at pagdaragdag ng mga opsiyon sa pagpapatupad ng mga programang nauugnay sa pagbasa upang pataasin ang kakayahan ng mga mag-aaral sa mabungang pagbasa at maging kritikal sa pag-unawa sa mga babasahing materyal maging ito man ay para sa layuning akademiko o sa aktuwal na pakikibaka sa patuloy na umuunlad na ika-21 siglong lipunan. Ganoon din, malawak ang pagtalakay mula sa mga artikulo, pananaliksik at publikasyon hinggil sa pagsasaalang-alang sa mga pagunahing pangangailangan ng mga mag-aaral sa pagbasa sa pagbuo at pagdisenyo ng mga proyektong pampaaralan, programang pangklasrum na ang tuon ay sa paghubog sa mga mag-aaral na may sapat na kasanayan sa pagbasa. Sa huli, mahihinuhang ang suliraning ito ay hindi lamang dapat tingnan bilang pangangailangan sa pagpasa ng asignatura kung hindi bilang esensiyal na kasanayang dapat taglayin ng isang indibiduwal sa pagharap sa komplikadong lipunan.

METHODOLOGY (METODOLOHIYA)

Tinalakay sa bahaging ito ang ginamit na disenyo, ang lokal at mga kalahok ng pananaliksik, ang ginamit na instrumento, ang paraan ng pangangalap ng datos, at mga ginamit na tritment sa pagsusuri at pagpapakahulugan sa mga datos ng pag-aaral.

Research Design (Disenyo ng Pag-aaral)

Ang pag-aaral na ito ay isang *mixed method* na pananaliksik na gumamit ng *Explanatory Design: Participant Selection Model*. Ang ganitong disenyo ng pananaliksik ay naglalayong maglahad ng pangkalahatang paglalarawan at pagpapakahulugan sa suliranin ng pananaliksik sa pamamagitan ng mga kuwantitatibong datos na binibigyan ng mas malawak na pagsusuri gamit ang kuwalitatibong impormasyon mula sa mga naging kalahok ng pag-aaral (Subedi, 2016; Creswell & Clark, 2007). Sa konteksto ng kasalukuyang pananaliksik, ang disenyong ito ay angkop gamitin sapagkat nilayon ng mga mananaliksik na magkaroon ng mas malawak na pag-unawa sa suliranin ng mga mag-aaral partikular sa mababang literasi sa pag-unawa sa pagbasa ng Filipino. Ang pagtaya at pagsukat sa antas ng pag-unawa ng mga mag-aaral sa pamamagitan ng kuwantitatibong datos ay mas mainam na masuri upang maipakita ang mga kaugnay na salik na may makabuluhang epekto sa performans ng mga mag-aaral sa pagbasa. Sa ganoon, ang parehong kuwantitatibo at kuwalitatibong datos ay mainam na batayan sa pagbuo ng ano mang interbensiyon o programang pangklasrum na nauugnay sa pagsuporta, pagpapatibay at pagpapaunlad sa kakayahan sa pag-unawa sa pagbasa sa Filipino.

Research Local (Lokal ng Pag-aaral)

Ang pag-aaral na ito ay isinagawa sa isa sa mga Mababang Paaralan sa Dibisyon ng Tacloban, Lungsod Tacloban. Ang nasabing paaralan ay pinili ng mga mananaliksik sapagkat kapansin-pansin ang malaking bilang ng mga mag-aaral na nakararanas ng kahirapan sa pagbasa sa parehong Ingles at Filipino. Batay sa paunang pagtaya ng mananaliksik, nakita na isa ang Filipino sa mga lawak ng pag-aaral na kinakailangang bigyang-pansin upang mas maging mabunga ang pagkatuto ng mga mag-aaral hindi lamang sa nasabing asignatura kung hindi sa iba pa. Ang Filipino bilang asignatura ay nakikita bilang hamon sa mga mag-aaral partikular sa mababang kaalaman sa wika na isang makabuluhang salik sa pag-unawa sa mga babasahing Filipino.

Respondents and Participants (Respondente at Kalahok ng Pag-aaral)

Ang respondente ng pag-aaral na ito ang mga mag-aaral sa ikaanim (6) na baitang sa isa mga Mababang Paaralan sa Dibisyon ng Tacloban, Lungsod Tacloban. Ang paraan ng pangangalap ng datos sa pananaliksik na ito ay hinati sa dalawa. Dahil dito, mayroong dalawang paraan ng pagkuha sa mga respondente at kalahok ng pag-aaral. Sa unang bahagi ay isinagawa ng mananaliksik ang pagtaya sa antas ng pag-unawa ng mga mag-aaral sa pagbasa ng Filipino. *Take all* ang naging paraan ng pagkuha sa respondente na may kabuoang bilang na 190. Samantala, sa ikalawang bahagi naman ng pangangalap – ang kuwalitatibong datos, pinili ang 9 na kalahok sa pamamagitan ng *purposive sampling* na naging bahagi ng isinagawang pakikipanayam sa paraang *Focus Group Discussion* (FGD). Ang ganitong bilang ng kalahok (9) ayon kay Creswell (2013), ay ideyal na sukat depende sa punto sa isang pag-aaral kung saan paulit-ulit na lamang ang impormasyong nakakalap at wala nang bagong nadaragdag.

Research Instrument (Instrumento ng Pag-aaral)

Ang pananaliksik na ito ay gumamit ng dalawang instrumento. Para sa pagtugon sa unang layunin ng pananaliksik ay ginamit ng mga mananaliksik ang *adopted standardized tool* sa pagtaya sa kakayahan ng mga mag-aaral sa pagbasa – Ang *Philippine Informal Reading Inventory* (Phil-IRI) sa Filipino upang sukatin ang antas ng pag-unawa ng mga mag-aaral sa pagbasa ng Filipino. Sa konteksto ng pananaliksik, ang paggamit ng Phil-IRI ay isang mabisang *tool* lalo pa't ang kagamitang ito ay isang *institutionalized tool* na ginagamit ng DepEd sa pagtaya sa kasanayan sa pagbasa ng mga mag-aaral. Samantala, sa ikalawang bahagi naman ng pag-aaral ay ginamit ng mga mananaliksik ng *semi-structured questionnaire* sa paraang pakikipanayam upang tugunan ang ikalawang layunin ng pag-aaral. Ginamit ang talatanungang ito upang magkaroon ng pagkakataon at kalayaan na magbigay ng karagdagan tanong kung sakaling hindi pa matugunan ng kalahok ang pangangailangan ng panayam. Sa pagtiyak sa kalidad ng talatanungan sa ikalawang bahagi ng pangangalap, idinaan ito sa balidasyon ng tatlong eksperto sa larang ng pagtuturo at pagbasa upang masigurado na tumpak at kapani-paniwala ang ginamit na talatanungan at hindi magkamit ng ano mang paglabag sa etikal na pamantayan ng pagsasagawa ng pangangalap ng datos.

Data Gathering Procedure (Paraan ng Pangangalap ng Datos)

Dalawang yugto ang paraan ng pangangalap ng datos ng pananaliksik. Sa unang yugto, isinagawa ng mananaliksik ang pagtaya sa kasanayan ng 190 na mga mag-aaral sa pag-unawa sa Filipino sa pamamagitan paggamit ng *Philippine Informal Reading Inventory* (Phil-IRI). Pagkatapos ng pagtaya ay tinukoy ng mananaliksik ang mga mag-aaral na nakapagtala ng mababang marka o iyong mga nasa frustration na antas ang pag-unawa. Gamit ang *purposive sampling*, pinili ang 9 na kalahok para sa isang pakikipanayam na isinagawa sa pamamagitan ng *Focus Group Discussion* (FGD) upang malikom ang datos hinggil sa mga potensiyal na salik na nakaaapekto sa pag-unawa sa Filipino.

Treatment and Analysis (Tritment at Paraan ng Pagsusuri)

Para sa kuwantitatibong datos, ginamit ng mananaliksik ang istandard na pormula ng *Philippine Informal Reading Inventory* (Phil-IRI) upang kompyutin ang antas ng pag-unawa ng mga respondente sa pagbasa ng Filipino. Samantala, sa kuwalitatibong datos ng pag-aaral, ginamit ang pamamaraan na nakabatay sa *Braune at Clark's Thematic Analysis* (2006). Ang prosesong ito kinasasangkutan ng anim (6) na hakbang: (1) *Pagkilala sa datos*; (2) *Coding*; (3) *Pagbuo ng mga Tema; (4) Pagsusuri sa mga Tema; (5) Pagtukoy at Pagbibigay ng Pangalan sa mga Tema*; at (6) *Pagsulat.*

RESULTS (RESULTA)

1. Antas ng Pag-unawa ng mga Mag-aaral sa Pagbasa sa Filipino

Upang matugunan ang layunin ng pag-aaral, ginamit ng mananaliksik ang *Philippine Informal Reading Inventory* (Phil-IRI) na isang mapagkakatiwalaan at istandardisadong kagamitan sa pagsukat sa kasanayan sa pagbasa ng mga mag-aaral. Isinagawa ang pagtaya sa mga mag-aaral ng ika-6 na baitang na may kabuoang bilang na 190.

Talahanayan 1
Antas ng pag-unawa ng mga mag-aaral sa ika-6 na baitang

Pangkat	Antas ng Pag-unawa	Blg.	Bahagdan	*Average Score*	*Mean*	Antas ng Pag-unawa
A	Independent	7	18.41%	12.11	60.53	*Instructional*
	Instructional	17	44.73%			
	Frustration	14	36.84%			
	Kabuoan	**38**	**100%**			
B	Independent	0	0%	4.64	23.194	*Frustration*
	Instructional	0	0%			
	Frustration	36	100%			
	Kabuoan	**36**	**100%**			
C	Independent	5	13.15%	13	65	*Instructional*
	Instructional	30	78.95%			
	Frustration	3	7.89%			
	Kabuoan	**38**	**100%**			
D	Independent	5	12.5%	7.52	37.62	*Frustration*
	Instructional	3	7.5%			
	Frustration	32	80%			
	Kabuoan	**40**	**100%**			
E	Independent	0	0%	12.53	62.63	*Instructional*
	Instructional	36	94.74%			
	Frustration	2	5.26%			
	Kabuoan	**38**	**100%**			
				Weighted Mean	**49.80**	***Frustration***

Ipinakita ng Talahanayan 1 ang antas ng pag-unawa ng mga mag-aaral sa ika-6 na baitang sa pagbasa sa Filipino. Mula sa mga naitalang *mean* ng bawat pangkat (A-60.53; B-23.19; C-65; D-37.62; at E-62.63) ay nakakuha lamang ng *weighted mean* na 49.80 sa kabuoan na nangangahulugang nasa *frustration level* ang antas ng pag-unawa ng mga mag-aaral.

Batay sa mga nakalap na datos, natuklasan sa pananaliksik na ito na mula sa 190 respondente ay umabot sa 87 mag-aaral na katumbas ng 46% mula sa populasyon ang natukoy na nasa *frustration level* ang pag-unawa sa pagbasa sa Filipino. 45% naman o may katumbas na bilang na 86 sa mga respondente ang nasa *instructional level*,

samantalang nasa 8.94% o katumbas ng 17 na mag-aaral ang nasa *independent level* ang pag-unawa. Sa kabuoan ng datos mula sa mga nakuhang *mean* ng 5 pangkat na naging respondente ng pag-aaral, ay naitala ang kabuoang *mean* na 49.80 na nangangahulugang nasa *frustration* ang antas ng pag-unawa ng mga mag-aaral sa pagbasa sa Filipino.

2. Mga Salik na Nakaaapekto sa Pag-unawa ng mga mag-aaral sa Pagbasa

Talahanayan 2
Mga salik na nakaaapekto sap ag-unawa ng mga mag-aaral

Kategorya	Tema (Salik)
Panloob na Salik *(Internal Factor)*	1. Mababang Kaalaman sa Wika 2. Kawalan ng Interes sa Pagbasa. 3. Mababang Kasanayan sa Pagbasa (Poor fluency skills). 4. Kakulangan ng Interes at Eksposyur sa wika 5. Kawalan ng Tiyak na Estratehiya sa Pagkatuto *6.* Madalas na Pagliban sa Klase (Absenteeism).
Panlabas na Salik *(External Factor)*	1. Kawalan ng Gabay mula sa Guro at Magulang 2. Kakulangan ng mga Materyal sa Pagbasa 3. Di-angkop na Nilalaman ng mga Babasahing Materyal 4. Kawalan ng Oras sa Pagbasa sa Bahay

Ipinakita ng Talahanayan 2 ang resulta ng isinagawang pakikipanayam sa mga kalahok. Naging bahagi ng kasalukuyang pananaliksik ang pagtukoy sa mga salik na nakaaapekto sa kasanayan sa pag-unawa sa pagbasa sa Filipino. Layunin nitong mailarawan nang mas malalim at maunawaan ang parehong panloob (internal) at panlabas (external) na salik na maaaring mayroong direktang epekto kung bakit mababa o nasa *frustration* na antas ang kasanayan sa pag-unawa ng mga mag-aaral. Batay sa isinagawang pakikipanayam sa mga piling mag-aaral ay nakita bilang mga panloob na salik na nakaaapekto sa pag-unawa ng mga mag-aaral sa pagbasa sa Filipino ang mababang kaalaman sa wika, kawalan ng interes sa pagbasa, mababang kasanayan sa pagbasa (poor fluency skills), kakulangan ng interes at eksposyur sa wika, kawalan ng tiyak na estratehiya sa pagkatuto, at ang madalas na pagliban sa klase (absenteeism). Bilang karagdagan, natuklasan din sa pag-aaral na ito ang kolektibong salik panlabas (external factors) sa mababang kasanayan sa pag-unawa sa pagbasa ng mga mag-aaral kagaya ng kawalan ng gabay mula sa mga guro at magulang, kakulangan ng mga materyal sa pagbasa, hindi angkop na mga nilalaman sa mga babasahing materyal, at ang kawalan ng oras sa pagbabasa sa bahay. Kaya naman, ang mga natukoy na salik ay kailangang bigyang-pansin upang matugunan ang pangangailangan sa pgapapataas ng literasi sa pagbasa. Dapat na bigyang-diin ang mga ito upang magkaroon ng mabungang pagganap ang mga mag-aaral at higit sa lahat ay mabigyan ng angkop na interbensiyon ang nasabing suliranin.

DISCUSSION (PAGTALAKAY)

1. Antas ng Pag-unawa ng mga Mag-aaral sa Pagbasa sa Filipino

Ipinakita sa Talahanayan 1 ang naging resulta ng isinagawang pagsukat sa antas ng pag-unawa ng mga mag-aaral sa ika-6 na baitang hinggil sa pagbasa sa Filipino. Mahihinuha mula sa datos ng pag-aaral na sa pangkat A ng mga mag-aaral sa Baitang 6 ay mayroon lamang 7 o katumbas na 18.41% na mga mag-aaral ang nasa *independent* na antas ng pag-unawa. Samantala, mayroon namang 17 mag-aaral ang nasa *instructional* na antas na may katumbas na 44.73% habang 14 naman ang nasa *frustration level* na mga mag-aaral o katumbas ng 36.84% mula sa 38 na kabuoang bilang ng mga mag-aaral sa pangkat A. Sa kabuoan, nakuha ang nasabing pangkat ng *average score* na 12.11 na may *mean* na 60.53 na may pagpapakahulugang nasa *instructional level* ang antas ng pag-unawa ng mga mag-aaral sa pangkat A. Sa pangkat B, kapansin-pansin ang datos na nakuha mula sa isinagawang pagsusulit sapagkat lahat ng mga mag-aaral na katumbas ng 100% ay nasa *frustration level*. Ang kabuoang bilang na 36 sa nasabing pangkat ay mayroon lamang 4.64 na *average score* na may *mean* na 23.194 na mababa sa inaasahang antas ng pag-unawa sa pagbasa. Sa Pangkat C naman, nakapagtala ng 5 o may katumbas na 13.15% mula sa kabuoan ang nasa *independent level*, 30 naman ang nasa *instructional* na kumakatawan sa 78.95% ng kabuoang populasyon ng nasabing pangkat. Samantala mayroon ding 3 o katumbas ng 7.89% na mga mag-aaral na nasa *frustration level*.

Sa kabuoan, nakakuha ng *average score* na 13 ang pangkat na may *mean* na 65 at naihahanay sa *instructional* na antas sa pagbasa. Samantala, kapansin-pansin din ang datos mula sa pangkat D sapagkat umabot sa 80% na may katumbas na bilang na 32 mula sa 40 mag-aaral ang naitalang nasa *frustration level* ang pag-unawa. 5 o 12.5% naman ang *independent* at 3 o 7.5% ang nasa *instructional*. Ang nasabing pangkat ay mayroong *average score* na 7.52 na may *mean* na 37.62 na nangangahulugang nasa *frustration level* ang antas ng pagbasa ng pangkat D. Sa huli, nahati lamang ang datos ng pangkat E sa dalawang antas sapagkat walang naitala sa *independent level*. 36 o katumbas ng 94.74% ang nasa *instructional* habang 2 o 5.26% naman ang nasa *frustration*. Sa kabuoan mayroong 12.53 na *average score* ang pangkat na may *mean* na 62.63 na nangangahulugang nasa *frustration* ang antas ng pangkat E.

Sa pangkalahatan, ipinakita ng Talahanayan 1 ang antas ng pag-unawa ng mga mag-aaral sa ika-6 na baitang sa pagbasa sa Filipino. Mula sa mga naitalang *mean* ng bawat pangkat (A-60.53; B-23.19; C-65; D-37.62; at E-62.63) ay nakakuha lamang ng *weighted mean* na 49.80 sa kabuoan na nangangahulugang nasa *frustration level* ang antas ng pag-unawa ng mga mag-aaral.

Ang resulta ng pag-aaral ay makabuluhang naiuugnay sa natuklasan sa pananaliksik nina Caraig at Quimbo (2022), na nasa 7% lamang ng mga respondente ang nasa *mastery level* samantalang umabot ng 44% ang mga may *poor comprehension* sa pagbasa ng mga araling pang-agham. Dagdag pa, napatunayan sa pananaliksik nina Tomas et al. (2021), na karamihan sa mga mag-aaral sa kasalukuyan mula sa kanilang mga naging respondente mula baitang 1 hanggang 7 ay nasa *frustration level* ang pag-

unawa sa pagbasa. Kaya naman, mula sa natuklasan at mga binanggit na datos ng pag-aaral, hindi maikakaila ang pangangailangan sa pagsasagawa ng mga interbensiyon at programang tutugon sa nasabing suliranin upang pataasin ang literasi ng mga mag-aaral sa pagbasa.

2. Mga Salik na Nakaaapekto sa Pag-unawa ng mga Mag-aaral sa Pagbasa

2.1. Mga Panloob na Salik (Internal Factors)

Ang panloob na salik ay tumutukoy sa ano mang mga balakid o hadlang na nakaaapekto sa tagumpay ng isang pagkilos o gawain. Sa konteksto ng kasalukuyang pag-aaral, binigyang-diin nito ang mga salik panloob sa mga mag-aaral na nag-uugnay sa kanilang mga pansarili at personal na balakid. Batay sa isinagawang pagsusuri sa kasanayan sa pagbasa ng mga mag-aaral sa ika-6 na baitang, natuklasan ang sumusunod na mga panloob na salik na lubos na nakaaapekto sa komprehensiyon sa pagbasa sa Filipino.

Mababang Kaalaman sa Wika. Sa konteksto ng pananaliksik, natuklasan na isa sa mga salik na nakaaapekto sa pag-unawa ng mga mag-aaral sa pagbasa sa Filipino ay ang mababang bukabolaryo sa Filipino. Karaniwan sa mga kalahok ang kakulangan ng pag-unawa sa ilang mga salitang nakikita sa mga babasahing Filipino na nagiging sanhi upang hindi lubos na maunawaan ang kabuoan ng binabasang teksto. Ayon sa pagsasalaysay ng mga kalahok, may mga salita sa Filipino na masyadong malalim at di-pamilyar sa kanila. Naging karaniwang gawi ng mga kalahok na magtanong sa guro o ‘di naman kaya ay sumangguni sa diksiyonaryo, o mag-search sa internet ng mga kahulugan o katumbas na salita ng nasabing termino upang kahit papaano ay mailapit sa pinakaangkop na kahulugan ang salita. Ganoon pa man, natuklasan din na ang ganitong gawi ng mga mag-aaral ay hindi gaanong epektibo sapagkat karamihan sa mga salitang nakikita sa internet ay hindi rin kapani-paniwala at hindi sa lahat ng pagkakataon ay tama. Mainam lang din ang estilong ito para sa mga kalahok kung ang pagbasa ay isang gawaing pangklasrum lamang na maaaring magtanong sa guro. Sa mga pagsusulit, pansariling hamon ito sa mga kalahok sapagkat hindi pinahihintulutan ang pagtatanong na sa huli ay nagreresulta ng mababa o maling pag-unawa sa binabasa.

Ayon Kina Guinto at Carada (2023), ang pagpapalawak sa bokabularyo ay mahalaga upang lubos na mapaunlad ang pagkatuto ng mga mag-aaral sapagkat ang kakulangan sa kasanayan sa bokabularyo ay maaaring maging malaking hadlang sa pag-unawa sa pagbasa sa ano mang teksto o akdang pampanitikan. Sa kasalukuyan na mas lalo pang umuunlad ang wika lalo na sa paglawak ng talasalitan ng wikang Filipino dulot ng teknolohiya, mas lalong nagkakaroon ng malawak na balakid para lubos na makamit ang kahusayan ng mga mag-aaral sa paggamit ng Filipino at positibong naisasalin bilang wika ng pagbasa. Kaya naman, mahalagang palawakin din ng mga guro ng Filipino ang paggamit ng iba’t ibang paraan, estratehiya, at mga kagamitan upang maisabay sa mabilis na pag-unlad ng wika ang mga praktikang pedagohikal. Sa ganitong konteksto, napatunayan sa pananaliksik nina Guinto at Carada (2023), na ang paggamit ng mga

video lesson ay isang mainam na paraan para pataasin ang bokabularyo ng mga mag-aaral. Sa ganitong paraan, natutugunan ang salik na natuklasan ng pag-aaral na ito hinggil sa mababang kaalaman sa wika ng mga mag-aaral.

Kawalan ng Interes sa Pagbasa. Ang pagganyak sa pag-aaral ay isang mahalagang salik upang maging matagumpay ang pagkatuto, at sa huli ay makapagprodyus ng mga de-kalidad na gradweyt. Maaari itong makita at magmula mismo sa pansariling interes (intrinsic) o 'di naman kaya ay sa mga panlabas na hikayat (extrinsic) (Pranitasari, 2017). Sa pananaliksik na ito, natuklasan na isa sa mga salik na nakaaapekto sa pag-unawa ng mga mag-aaral ay ang kawalan ng interes sa pagbasa. Nakita mula sa mga salaysay ng mga kalahok na mababa ang kanilang pagganyak sa mga gawaing pagbasa, at hindi gaanong nabibigyan ng panahon ang akademikong gawain na ito. Ayon sa datos ng pag-aaral, ang pagbasa ay isang mabigat na gawain para sa mga mag-aaral. Mabilis na mabagot ang mga kalahok sa pagbasa lalo na sa mga akdang pampanitikan na hindi malinaw at hindi gaanong maunawaan ang mga nilalaman.

Ang pagbasa ay pundasyon ng mas malawak pang pagkatuto. Ang ano mang akademikong pagpaplano ay nagsasangkot ng mga akto ng pagbasa kung kayat marapat lamang na bigyang-pansin ng mga guro ang paglinang sa interes ng mga mag-aaral sa gawaing ito. Sa konteksto ng pag-aaral, ang natuklasan ay makabuluhang naiuugnay sa naging resulta ng pag-aaral nina Parado at Reduban (2020), na nagbigay-diin sa makabuluhang ugnayan ng interes sa pag-unawa sa pagbasa ng mga mag-aaral. Napatunayan sa kanilang pananaliksik na may malaking epekto ang interes sa pagbasa sa mga babasahing Filipino sa pagtataguyod ng mabungang pag-unawa ng mga mag-aaral. Dagdag pa, natuklasan din sa isinagawang pananaliksik nina Estremera, M. at Estremera, G. (2028), ang isa sa mga salik na nakaaapekto sa kasanayan sa pagbasa ng mga mag-aaral. Nakita sa *pupil factors* ang kawalan ng motibasyon ng mga mag-aaral sa pagbasa na nakakuha ng 89.06% na may kabuoang mean 83.75 bilang makabuluhang salik na nakaaapekto sa performans ng mga mag-aaral sa pagbasa. Ang mga nabanggit na datos mula sa mga naunang pananaliksik ay pagpapakita lamang na isang makabuluhang usapin ang paglinang sa interes ng mga mag-aaral sa mga gawaing pagbasa upang maitaas ang kalidad ng pagkatuto ng mga mag-aaral partikular sa pagbasa at pag-unawa.

Mababang Kasanayan sa Pagbasa (Poor fluency skills). Sa pananaliksik na ito, natuklasan na karaniwan sa mga kalahok na nasa *frustration level* ng pagbasa ay nahihirapan sa pinakapayak na proseso ng pagbasa. Nakita ang kahirapan at mababang kasanayan ng mga mag-aaral ang pagkilala sa mga salitang Filipino, pagkilala sa tunog at bigkas, at suliranin sa *fluency*. Sa isinagawang obserbasyon ng mga mananaliksik mula sa pagpapabasa ng isang maikling teksto, nakita na karaniwang suliranin ng mga kalahok ang pagbigkas sa mga mahahabang salita. Nakita rin ang suliranin sa tuloy-tuloy na pagbigkas sa mga ito na nakaaapekto sa estruktural at ponolohikal na katangian ng wika. Ang ganitong suliranin sa pagbasa ay isang seryosong usapin lalo pa't nasa ika-6 na baitang na ang mga kalahok na sanay inaasahang nagtataglay na mga batayang kasanayan (basic skills) sa pagbasa. Ang mga nakitang suliranin sa aspektong ito ay

hindi maikakailang mga makabuluhang salik na malinaw na naglalarawan sa usapin ng mababang komprehensiyon ng mga mag-aaral.

Sa isinagawang pag-aaral nina Roque et al. (2023) hinggil sa pagtaya sa abilidad ng mga mag-aaral sa pagbasa sa *post-pandemic* bilang batayan sa pagbuo ng *remediation program*, natuklasan na marami sa mga mag-aaral sa *post-pandemic* ang may mababang kasanayan sa pagbasa. Nakita na kung ibabatay sa *grade level* ng mga mag-aaral ang abilidad nito sa pagbasa, mababa ang kasanayan ng mga ito. Ang ganitong suliranin ay nakita ng kagawaran bilang resulta ng mabilisang paglilipat ng modalidad ng pagtuturo sa panahon ng pandemya dahil sa pagpapatupad ng *Distance Learning*. Natuklasan sa pananaliksik nina Gueta at Janer (2021), hinggil sa mga hamon sa *distance learning* gamit ang *Self-Learning Modules (SLM)*, na ang paggamit ng SLM sa taong panuruan 2021-2022 ay nakababahala sapagkat ang *literacy rate* ng mga mag-aaral ay mas mababa sa *average*, at naobserbahan na ang mga mag-aaral ay nakararanas ng kahirapan sa pag-unawa sa pagbasa. Ganoon pa man, ang mga resulta ng pagtataya sa kasanayan sa pagbasa ng mga mag-aaral ay bunga ng kolektibong salik at isa lamang ang paggamit ng SLM sa mga ito.

Kakulangan ng Interes at Eksposyur sa wika. Sa kasalukuyang panahon, ang modernisasyon ng wika ay nagdulot ng patuloy na suliranin sa estandardisasyon at intelektuwalisasyon ng wikang Filipino. Ang pag-usbong ng mga makabagong wika na hindi umaaayon sa kumbensiyonal at gramatikal na panuntunan ng wikang Filipino ay naging palasak sa siklo ng komunikasyon lalo na sa kabataan sa kasalukuyang henerasyon. Bagamat isang katotohanan at likas na katangian ng wika ang pagiging dinamiko nito, hindi rin maitatanggi ang pagdeklayn ng kamalayan ng kabataan sa tamang gamit ng wika sa kasalukuyan. Ang suliranin sa mababang literasi ng mga mag-aaral sa Filipino ay nakita mula sa mga isinagawang pag-aaral na nagbigay ng malinaw na lunsaran sa pangangailangan ng pagbibigay-tuon sa nasabing usapin. Sa pag-aaral ni Peñeda (2017), natuklasan na ang suliranin sa mababang kakayahang pangwika ng mga mag-aaral ay karaniwang nakatuon sa kamaliang nauugnay sa morpolohikal, sintaktikal at leksikal na aspekto ng Filipino dahil sa paggamit ng mga makabagong anyo ng wika. Sa kasalukuyan na umiiral ang wika ng kabataan ay mas lalong nakababahala ang suliraning ito. Ayon pa kay Zahid (2023), ang paggamit ng makabagong wika kagaya ng balbal sa kasalukuyan ay nagdudulot ng mababang kasanayan sa mga mag-aaral dahil sa ang karaniwang gamit at anyo nito ay lumilihis sa tamang gramar at bokabularyo. Sa ganitong konteksto, hindi maihihiwalay na ang penomenong ito ay lubos na nakaaapekto sa kasanayan ng mga mag-aaral sa pagbasa.

Sa pag**-**aaral na ito, natuklasan na mababa ang eksposyur ng mga kalahok sa Filipino. Bagay na tinitingnan bilang dagdag na salik sa mababang pagganap sa mga gawaing pagbasa. Ayon sa salaysay ng mga kalahok, ang wikang Filipino ay hindi gaanong nakikitaan ng lawak sa larang ng komersiyo at komunikasyon. Ayon sa mga kalahok, hindi nila gaanong binibigyan ng interes ang Filipino sapagkat halos sa lahat ng pagkakataon ay mas angat ang wikang Ingles. Karamihan sa kanilang mga nakikita mula sa iba't ibang *social media platforms* ay nasa wikang Ingles, ang mga nakapaskil na artikulo, balita, at iba pang pagpapahayag ay karaniwang nakasulat sa Ingles. Paliwanag

pa ng mga kalahok, sa konteksto ng kalakalan at transakiyon, mas gamitin ang wikang Ingles halimbawa sa mga *job interview*s, at iba pa. Sa kanilang mga asignatura sa klasrum, mas marami at mas karaniwan ang paggamit ng Ingles kumpara sa Filipino. Samantala, sa mga ordinaryong pakikipag-ugnayan, hindi rin gaanong binibigyan ng pansin ang mga gramatikal na panuntunan ng wika lalo pa at mas gamitin sa kasalukuyan ang mga makabagong wika ng mga Gen Z kagaya ng pinaiikli, binabaliktad, pinaghahalo, at mga bagong buong mga termino. Paliwanag ni Rulete (2018), ang ganitong sitwasyon sa mababang kaalaman sa Filipino ay mahihinuhang produkto ng pag-usbong ng mga makabagong wika sa kasalukuyan. Ayon sa kaniya, karaniwang nadadala sa mga akademikong gamit ang paraang ito na nagreresulta ng pagkakamali sa gamit ng Filipino bilang akademikong wika. Samakatuwid, ang kawalan ng interes at eksposyur ng mga mag-aaral sa Filipino ay isang makabuluhang salik na nakaaapekto sa pag-unawa sa mga babasahing Filipino.

Kawalan ng Tiyak na Estratehiya sa Pagkatuto. Natuklasan sa isinagawang pakikipanayam sa mga kalahok na isa sa mga nakikitang salik sa mababang pagganap sa mga gawaing pagbasa ay ang kawalan ng tiyak na estratehiya sa pagkatuto. Ang mga kalahok sa ika-6 na baitang na may mababang pag-unawa sa mga babasahing Filipino ay hindi malay sa mga potensiyal na estratehiya at teknik upang mapaunlad ang kasanayan sa pag-unawa sa pagbasa. Ayon sa paglalahad ng mga kalahok, umaasa lamang sila sa mga gawaing ibinibigay ng kanilang guro. Sa paraang ito, na panlahat ang lapit na ginagamit ng guro ay hindi nakikita ng mga kalahok ang mga tiyak na kahinaan at kalakasan upang bigyan ng solusyon ang kanilang mababang pagganap sa mga gawaing pagbasa. Sa paglalarawan, ang guro ay nagbibigay lamang ng mga babasahing materyal halimbawa maikling kuwento na babasahin sa isang tiyak at limitadong oras. Pagkatapos nito, ay magkakaroon ng pagtalakay sa mga gabay na tanong mula sa sangguniang aklat na sasagutin. Karaniwan din ang pagbibigay ng pagsusulit. Sa ganitong mga gawain, kung ano lamang ang naunawaan ng mga kalahok ay iyon lamang ang kanilang naibabahagi at naisasagot. Samakatuwid, ang mga tiyak na pangangailangan ay hindi gaanong natutugunan. Dagdag pa, ang mga angkop na estratehiya at paraan ayon sa kalakasan ng mga mag-aaral ay hindi nakikita at hindi naisasagawa.

Miuugnay ang resulta ng pag-aaral na ito sa natuklasan sa pananaliksik nina Estremera at Estremera (2018) na ang kawalan ng epektibong estratehiya sa pagkatuto ay isang makabuluhang salik na nakaaapekto sa kasanayan sa pagbasa ng mga mag-aaral. Sa katunayan, sa kanilang isinagawang pananaliksik, ang salik hinggil *poor study habit* ng mga mag-aaral ay nakakuha ng 100% na nagpakita bilang pinakamataas na salik sa mababang pag-unawa ng mga mag-aaral sa pagbasa. Ang mga datos na ito ng pag-aaral ay kinompirma mula sa isinagawang pananaliksik nina Sulaiman at Harpiansi (2022), na naghinuha na may makabuluhang ugnayan ang estratehiya sa pagkatuto sa pag-unlad ng kasanayan sa pagbasa ng isang mag-aaral. Kaya naman, isang pangangailangan na bigyang-diin ng mga guro ang paghikayat sa mga mag-aaral na tuklasin ang mga kakayahang pang-akademiko upang malinang ang mga kasanayan sa pagbasa.

Madalas na Pagliban sa Klase (Absenteeism). Ang pagdalo sa mga pisikal na pagkaklase ay isang mahalagang salik upang matiyak ang tagumpay ng isang mag-aaral sa isang tiyak na larang at lawak ng pagkatuto. Ang kaniyang presensiya sa loob ng klasrum ay isang pangangailangan upang makasabay sa mga gawaing itinatakda, at lubos na maunawaan ang mga lekturang ibinibigay ng guro. Subalit sa konteksto ng pag-aaral, nakita na karaniwan sa mga kalahok na nasa antas ng *frustration* ang kasanayan sa pag-unawa ay madalas na liban o wala sa klase. Natuklasan sa pananaliksik na ang mga kalahok ng pag-aaral ay iyong mga madalas na liban sa klase. Kaugnay nito, hindi lamang sa pagbasa kompromiso ang performans ng mga kalahok kung hindi maging iba pang aspekto ng pagkatuto at asignatura.

Ang ganitong usapin hinggil sa paksa ng pananaliksik ay nakitang resulta ng sosyo-ekomikong estado ng mga mag-aaral. Pinatunayan sa pag-aaral nina Roque et al. (2023), na may makabuluhang kaugnayan ang sosyo-demograpikong profayl ng mga mag-aaral kasama na ang sosyo-ekonomikong estado sa kanilang performans sa paaralan partikular sa pagbasa. Dagdag pa, kinompirma sa pananaliksik nina Tomas et al. (2021), na ang madalas na pagliban sa klase ng mga mag-aaral ay maiuugnay sa mababang katayuang sosyo-ekonomik ng mga magulang ng mga mag-aaral. Paliwanag nila, minsan ang mga mag-aaral ay tumutulong sa bahay sa pagpapatakbo ng mga gawain at pag-aalaga sa kanilang mga nakababatang kapatid. Subalit higit lalo, karaniwang pinipili ng ilang mag-aaral na lumiban sa mga klase dahil sa kanilang kawalan ng kakayahan sa pagbasa. Ang mababang kasanayan ay nagdudulot sa kanila ng pagkawala ng kumpiyansa sa sarili. Ipinaliwanag sa papel nina Guimba at Alico (2015), na ang mababang antas ng pag-unawa ng mga mag-aaral sa pagbasa ay makabuluhang nauugnay sa pandamdaming salik ng pagkabalisa (anxiety) ng mga mag-aaral. Kaya naman, mas pinipili na lamang nila ang lumiban sa klase na sa dulo ay nagreresulta ng seryosong akademikong suliranin lalo na sa literasi sa pagbasa.

Sa kabuoan, nakita bilang mga panloob na salik na nakaaapekto sa pag-unawa ng mga mag-aaral sa pagbasa ng Filipino ang mababang kaalaman sa wika, kawalan ng interes sa pagbasa, mababang kasanayan sa pagbasa (poor fluency skills), kakulangan ng interes at eksposyur sa wika, kawalan ng tiyak na estratehiya sa pagkatuto, at ang madalas na pagliban sa klase (absenteeism). Kaya naman, ang mga natukoy na salik ay kailangang bigyang-pansin upang matugunan ang pangangailangan sa pgapapataas ng literasi sa pagbasa. Dapat na bigyang-diin ang mga ito upang magkaroon ng mabungang pagganap ang mga mag-aaral at higit sa lahat ay mabigyan ng angkop na interbensiyon ang nasabing suliranin.

2.2. Mga Panlabas na Salik (External Factor)

Sa bahaging ito, natukoy ng mga mananaliksik ang mga potensiyal na panlabas na salik (external factor) na nakaaapekto sa pag-unawa sa pagbasa ng mga mag-aaral sa mga babasahing Filipino. Ang panlabas na salik ay tumutukoy sa mga aspektong wala o labas sa kontrol ng mga mag-aaral na maaaring makabuluhang kontribyutor na nagdudulot ng mababang pagganap sa mga gawaing pagbasa. Sa konteksto ng pananaliksik, nakita ang sumusunod na salik:

Kawalan ng Gabay mula sa Guro at Magulang. Lumabas mula sa pakikipanayam sa mga kalahok ang kakulangan ng suporta mula sa mga guro at magulang kaugnay sa pagtamo ng mga kasanayan sa pagbasa ng mga mag-aaral. Natuklasan na sa aspekto ng guro ay hindi gaanong nabibigyan ng sapat na oras ang paglinang sa mga gawaing pagbasa, at walang angkop na interbensiyon mula sa mga ito upang mailundo ang pagkamit sa mga inaasahang kompetensi sa pagbasa. Dagdag pa, nakita rin sa datos at pagsusuri sa mga nakalap na tugon mula sa mga kalahok na walang aktibong paglahok ang kanilang mga magulang sa mga gawaing pagbasa. Walang ibinibigay na mga suportang edukasyonal labas sa klasrum ang mga magulang sa kanilang mga anak. Walang mga itinatakdang oras ang kanilang mga magulang na gugugol sa mga gawaing pagbasa at walang interbensiyong inihahatid ang mga ito sa kabila ng kasalukuyang kalagayan ng mga mag-aaral sa kasanayan sa pagbasa.

Ang paglinang sa mga kasanayan sa pagbasa ay isang mahalagang pangangailangan lalo na sa kasalukuyan dahil ito ang simula ng kanilang pagtamo ng kamalayan hinggil sa lipunang kinabibilangan. Ayon pa nga kina Erkek (2022) at Krawits et al. (2022), ang pagbasa ay gumaganap ng mahalagang papel upang gabayan at tulungan ang isang indibiduwal na tingnan ang realidad ng mundo sapagakat ang pagmomodelo sa kalagayan at suliraning nararanasan sa loob o labas ng paaralan ay itinatanghal sa pamamagitan ng mga simbolong pangwika. Ang pag-unawa sa pagbasa ay nagbibigay-daan sa mambabasa na magkaroon ng bukas na pagtingin sa mga katotohanang umiiral dahil ito ang naglulundo sa paghubog ng mga kahulugan gamit ang wika. Samakatuwid, hindi maitatanggi na malaki ang responsibilidad ng kapaligirang sosyal ng mga mag-aaral upang tulungan silang matamo ang mga pangunahing kasanayan sa pagbasa.

Kakulangan ng mga Materyal sa Pagbasa. Sa konteksto ng sistemang pang-edukasyon sa Pilipinas, hindi maikakaila ang kakulangan ng mga kagamitang edukasyonal na magagamit sa pagkatuto ng mga mag-aaral. Sa Datos ng Department of Education (2019), nakita na ang ideyal at inaasahang 1:1 na *ratio* ng mga kagamitang pampagkatuto kagaya ng mga aklat-aralin ay hindi naipatutupad sa maraming pampublikong paaralan sa bansa. Isa sa mga nakitang dahilan nito ay ang kakulangan ng mapagkukunan at ang patuloy na paglobo ng populasyon sa mga paaralan. Sa konteksto ng asignaturang Filipino, nakita mula sa isinagawang ebalwasyon ng mga Education Program Supervisors (EPS) at Public Schools District Supervisors (PSDS) ng Dibisyon ng Leyte ang kakulangan at pangangailangan sa enhansment ng mga materyales lalong-lalo na sa sabjek na Filipino (DepEd, 2021).

Sa pag**-**aaral na ito, natuklasan mula sa pagsusuri sa mga salik na nakaaapekto sa kasanayan sa pagbasa ng mga mag-aaral ang suliraning binanggit partikular sa kawalan at kakulangan ng mga babasahing materyal sa Filipino. Sa paglalarawan ng mga kalahok, hindi sumasapat ang mga aklat na ibinibigay ng mga guro na pinagsasaluhan ng dalawa o higit pang mag-aaral. Ang kawalan ng mga babasahing madaling maakses ng mga mag-aaral sa klasrum ay wala o hindi rin sapat, walang mga babasahing materyal na umaaayon sa kanilang hilig at panlasa, at walang pagdaragdag o pagpapaunlad sa mga ito.

Nilalaman ng mga Babasahing Materyal. Natuklasan na isa sa mga salik na nakaaapekto sa performans ng mga mag-aaral sa pagbasa ang uri ng nilalaman mula sa mga binabasang materyal. Ang pagkawala ng kanilang interes at motibasyon ay dulot ng mga kagamitang hindi umaangkop sa kanilang panlasa at interes na humahantong sa hindi gaanong paglahok sa mga gawaing pagbasa sa klase. Paliwanag ng mga kalahok, isang malaking tulong para sa kanila kung bibigyan sila ng mga kagamitang umaayon sa kanilang interes upang sa unti-unti ay mas maging aktibo sila sa pagsangkot sa mga gawaing pagbasa.

Ang salik na natukoy sa pag-aaral na ito ay umaayon sa naging resulta ng pag-aaral nina Abeberese et al. (2014), na nagbigay-diin na ang pagpapatupad ng mga programa sa pagbasa, halimbawa ang pagbibigay ng mga materyal na angkop sa gulang at interes ng mag-aaral ay isang mainam na paraan. Sinasanay nito ang mga guro sa pagbuo at paggamit, at sumusuporta sa mga inisyal na pagkilos upang pataasin ang literasi ng mga mag-aaral sa pagbasa. Sa kanilang pananaliksik, nakita na ang pagpapatupad ng mga programang naaayon sa pangangailangan ng mga mag-aaral ay nakapagpakita ng makabuluhang pagtaas sa performans ng mga mag-aaral sa pagbasa. Sumang-ayon din sa ganitong konsepto ang naging resulta ng pananaliksik nina Guimba at Alico (2015), na isang mahalagang pagsasaalang-alang sa pagtuturo sa pagbasa ang pagbibigay-diin sa uri ng materyal na gagamitin at ang pagbibigay ng mga gawaing nagtataguyod ng pagpapataas sa interes at motibasyon ng mga mag-aaral.

Batay sa mga datos na ito, kapansin-pansin ang potensiyal na solusyon na maaaring lumutas sa matagal na at mas lalo pang lumalalang suliranin sa mababang literasi sa pagbasa. Kung bibigyang-pansin lamang ang mga angkop na pagpaplano at pagpapasya sa pagpapatupad ng mga programa sa pagbabasa ay natitiyak ang pag-akyat ng istadistika sa kasanayan sa pagbasa sa bansa.

Kawalan ng Oras sa Pagbasa sa Bahay. Natuklasan sa pag-aaral na walang itinatalagang oras ang mga kalahok para sa pagbabasa ng mga materyal na may layuning akademiko pagkatapos ng pagkaklase at kapag sila ay nasa kaniya-kaniyang tahanan na. Ayon sa salaysay ng mga kalahok, hindi nagiging regular na bahagi ng kanilang mga gawain ang magbasa ng iba’t ibang materyal maliban na lamang kung ito ay isang takdang-aralin. Marami ring pagkakataon na kahit na ang mga takdang-aralin ay hindi na napag-aaralan sa tahanan dahil sa pagkaubos ng oras sa pagbababad sa kanilang mga *gadgets* at walang humpay na pagsangkot sa birtuwal na espasyo. Dagdag na dahilan din ng mga kalahok ang mga inaatas na gawaing bahay ng mga magulang kung kayat ang panahon na dapat ay sa pagbabasa ay hindi na nagagawa.

Paliwanag nina Tomas et al. (2021), ang mababang kasanayan sa pagbasa ng mga mag-aaral ay nauugat sa kawalan ng kultura sa pagbabasa na tinitingnan bilang produkto ng kawalan ng pagkakataon para sa *independent reading*, kakulangan ng mga materyales sa pagbabasa, hindi pagbibigay ng sapat na patnubay sa mga mag-aaral, kawalan ng pakikipagtulungan ng mga magulang, guro at mga mag-aaral sa mga gawaing pagbasa, hindi tamang pagpapatupad ng mga programa sa pagbasa, at

kawalan ng sapat na pagsubaybay sa pag-unlad ng mag-aaral sa panahon ng interbensyon. Samakatuwid, ang mga kolektibong dahilan na naglundo sa natukoy na salik ay isang suliranin kayang matugunan kung maisasaalang-alang lamang ang mga ito. Mahalagang maisanib sa sitema at kultura ng mga mag-aaral ang pagbabasa upang sa kanilang mga personal na pagpapasya ay makapaglaan ng oras at prayoridad sa mga gawaing pagbasa.

Conclusions (Kongklusyon)

Batay sa mga nalikom na datos ng pag-aaral ay nabuo ang sumusunod na konklusyon na sumasagot sa mga naging pangunahing layunin ng pananaliksik: (1) Ang antas ng pag-unawa sa pagbasa ng mga mag-aaral sa ika-6 na baitang ay nasa *frustration level* na may katumbas na 49.80 na *mean*. 87 (46%) sa mga respondente ang nasa *frustration level*, 86 (45%) ang nasa *instructional level* habang 17 (9%) lamang ang nasa *independent level*; at (2) Parehong mayroong panloob (internal) at panlabas (external) na mga salik na nakaaapekto sa mababang kasanayan sa pag-unawa sa pagbabasa ng mga mag-aaral. Natuklasan sa pag-aaral na ang mga panloob na salik ay ang mababang kaalaman sa wika, kawalan ng interes sa pagbasa, mababang kasanayan sa pagbasa (poor fluency skills), kakulangan ng interes at eksposyur sa wika, kawalan ng tiyak na estratehiya sa pagkatuto, at ang madalas na pagliban sa klase (absenteeism). Samantala, ang mga panlabas na salik naman ay ang kawalan ng gabay mula sa mga guro at magulang, kakulangan ng mga materyal sa pagbasa, hindi angkop na mga nilalaman sa mga babasahing materyal, at ang kawalan ng oras sa pagbabasa sa bahay.

Recommendations (Rekomendasyon)

Mula sa mga natuklasan at nabuong kongklusyon ng pag-aaral, mariing iminumungkahi ng mananaliksik ang pagsagawa ng sistematikong pagsusuri sa kasanayan ng mga mag-aaral sa pag-unawa at pagbasa. Magpatupad ng mga interbensiyon sa pagbasa ayon sa pangangailangan ng mga mag-aaral kagaya ng mga *remediation* at *enrichment reading programs*. Ganoon din, tiyakin na mayroong maayos at sistematikong paraan ng pagsubaybay sa implementasyon at nagiging pag-unlad ng mga mag-aaral. Ganoon din, mainam na isanib at isaalang-alang sa instruksiyonal na pagpaplano ang mga salik na nakaaapekto sa antas ng pag-unawa ng mga mag-aaral sa pagbasa. Gumamit ng mga estratehiya at kagamitan na maghihikayat ng aktibong pagsangkot sa mga gawaing pagbasa, at magkaroon ng mga gawaing magsasangkot sa mga mag-aaral sa mas mabungang pag-unawa. Sa mga kagamitan, mainam na maisasaalang-alang ang interes at panlasa ng mga mag-aaral sa mga genreng binabasa. Ganoon din, mainam na maisangkot sa proseso ng paglinang sa kasanayan ng mga mag-aaral sa pag-unawa ang kapaligirang sosyal kagaya ng kanilang mga magulang.

Compliance with Ethical Standards

Ang etikal na konsiderasyon ay tumutukoy sa koleksiyon ng mga prinsipyo at pagpapahalaga na dapat sundin habang ginagawa ang pananaliksik. Ang mga pagsasaalang-alang sa etika ay nagtiyak na walang sino man ang kumilos sa paraang

nakakasama sa lipunan o isang indibiduwal (Bhasin, 2020). Sa ganitong paraan nililimitahan ang pagkilos ng mananaliksik na walang isinasaalang-alang na mga hangganan. Sa pag-aaral na ito, tiniyak ng mananaliksik ang etikal na pamantayan sa pagsasagawa ng pananaliksik lalo pa't tao ang mga kasangkot ng kasalakuyang pag-aaral. Tiniyak ng mananaliksik na ang ano mang pagkilos at proseso ay dumaan sa pagkuha ng permiso at konsent, ang paglahok sa pag-aaral ay boluntaryo at hindi sapilitan, pribado at kumpidensiyal ang pagkakakilanlan at ang mga personal na impormasyon ng lahat ng kasangkot sa pag-aaral bilang mahigpit na pagtalima sa RA 10173 o ang *Data Privacy Act* of 2012. Dagdag pa, malaya at ligtas ang espasyo ng kabuoang proseso ng pangangalap ng datos para sa mga respondente at kalahok. Sa usapin ng katapatan sa pagsusuri ng mga malilikom na datos, pinairal ng mananaliksik ang obhektibong pagtingin at paglalarawan, at tiniyak na hindi maimpluwensiyahan ng mga personal at kiling na pagtingin ang tritment sa mga makuhang datos ng pag-aaral.

Acknowledgments

Kinikilala at pinasasalamatan ng mga mananaliksik ang punong guro, mga guro at mga mag-aaral na napiling lokal ng pag-aaral sa kanilang pagbibigay ng pagkakataon na maisakatuparan ang pag-aaral na ito. Lubos ding pinasasalamatan ng mga mananaliksik ang kani-kanilang pamilya para sa pagbibigay ng moral at pinansiyal na suporta upang maisagawa at maging matagumpay ang pananaliksik na ito.

ABSTRACT

The level of employee engagement in work is an essential predictor of work performance. Sustaining it to a greater extent would help Company M to improve its organizational performance. This study determined 1) the level of organizational performance in terms of financial and non-financial dimensions; 2) the level of employee engagement according to leadership, communication, career opportunities, nature of job and compensation and benefits of Company M's business support functions; 3) the model that significantly impacted the organizational performance of Company M; and 4) the strategies formulated and to be implemented by Company M to increase employee engagement towards organizational performance. A mixed methods approach applying the sequential explanatory research design was used to support the objectives of the study. The data were gathered in quantitative and qualitative phases with 150 respondents and three participants from each employee level. The quantitative data were analyzed through frequencies, percentages, means, and stepwise regression while qualitative data were presented through summaries of thematic constructs and analysis. The findings of the study revealed that Company M's level of organizational performance in terms of overall financial and non-financial dimensions exhibited "neither good nor poor relative performance" and "good relative performance", respectively. Its level of employee engagement indicated that "employees were engaged" by almost all the engagement drivers except for compensation and benefits where "employees were neither engaged nor disengaged". Most of the models formulated revealed that "leadership" was the most significant and strongest predictor while "nature of job" was the least significant predictor. Few significant employee engagement variables affected organizational performance variables inversely due to certain factors as validated through the qualitative interviews. The researcher recommended that the formulated strategies be adopted by Company M;

a similar study be conducted by other companies to cover all employees and other employee engagement variables for more extensive findings.

Keywords: *Career Opportunities, Communication, Compensation and Benefits, Employee Engagement, Engagement Drivers, Leadership, Nature of Job, Organizational Performance*

INTRODUCTION

The local and global economies are becoming very dynamic. Industries worldwide are becoming more competitive to adapt to the fast-developing changes brought about by technology and several other factors. To cope with these inevitable changes, organizations must develop strategic plans to survive and remain in the loop of conducting their businesses. It is for this reason that organizations need people who are committed to the challenges of making things happen by making the right decisions at the right time. Employees who are engaged produce results more and fulfill customer's requirements better. Keeping them engaged in their jobs is an unceasing challenge. Company M has a workforce of more than 900 employees who contributed to the success of its business despite the pandemic. Investing on their engagement will drive the business back to its normal pace. Through the measurement and identification of the engagement drivers, the company can determine the extent of its impact and can install strategies to increase employee engagement and organizational performance.

Research Objectives

This study provided a clear insight into the impact of employee engagement on the organizational performance of Company M. The following were the specific objectives for the analysis in this study:

1. To measure the level of organizational performance of Company M in terms of: a) Financial dimensions and b) Non-Financial dimensions;
2. To determine the level of employee engagement of Company M according to the following drivers: a) Leadership, b) Communication, c) Career Opportunities, d) Nature of Job and e) Compensation and Benefits.
3. To formulate a model containing engagement drivers that significantly impact the organizational performance of Company M; and
4. To create strategies to be implemented by Company M to increase employee engagement towards organizational performance.

Research Framework

The theoretical framework that the researcher used as basis for the study was the Social Exchange Theory (SET) which originated from an American sociologist, George Homans, in 1958 when he published an article named "Social Behavior as Exchange"

(Tulane University, 2018). The SET theoretical basis substantiates the reasons why employees choose to engage in their work, either in a good or bad way, depending on the economic and socio-emotional resources gained from their institution, or even choose to remain in their institution (Dajani, 2015).

The study was guided by the flowchart shown in Figure 1 illustrating the measurement and analysis of the organizational performance and employee engagement of Company M. Then, a model was developed to depict the significant engagement drivers affecting the organizational performance of Company M and was used as basis to formulate specific strategies for enhancing employee engagement and organizational performance.

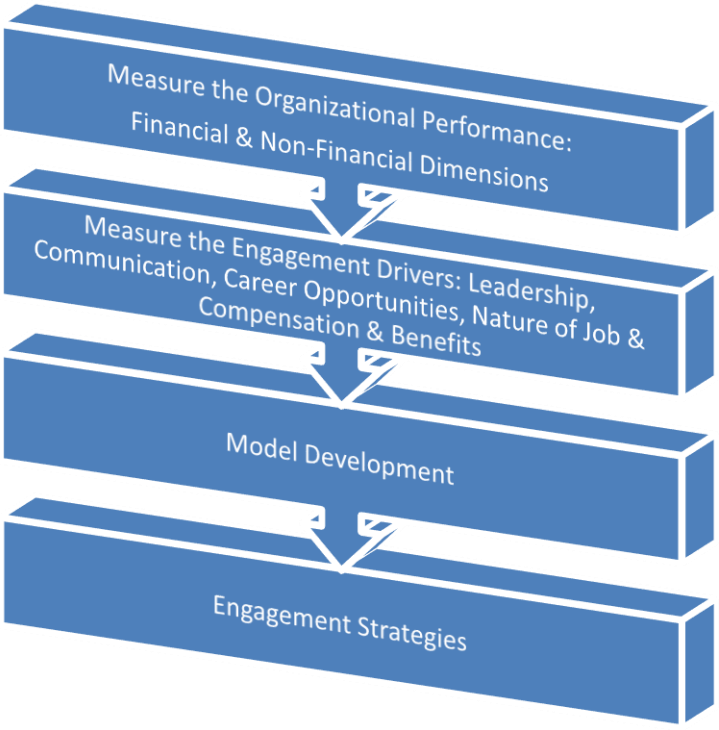

Figure 1. Conceptual framework of the study

Significance of the Study

Theory. This research tested the applicability of the Social Exchange Theory (SET) which explains why employees opt to remain in their work, according to the economic and socio-emotional benefits derived from the organization (Dajani, 2015). This study will guide other manufacturing industries in assessing their organizational performance and engagement.

Policy. This research will be useful to the management of Company M in creating and implementing policies and strategies that will increase organizational performance by identifying and improving the extent of employee engagement.

Practice. The knowledge that will be obtained from this research may help 1) the officers of Company M and other business leaders in evaluating the level of employee engagement in improving business' performance; 2) the employees in achieving job satisfaction and engagement and producing quality work; and 3) the researcher in applying the knowledge and skills in enhancing employee engagement towards organizational performance.

Social Action. This research may contribute to society by assisting business leaders and employees in other industries to set and sustain suitable policies and programs so that organizational performance will be achieved through employee engagement.

Scope and Limitations

The study was only limited to the perceptions of employees under business support functions of Company M at the time the survey was done as well as in the determination of the significant engagement contributors to organizational performance of Company M and establishment of strategies to enhance engagement.

Definition of Terms

Career opportunities. The professional development of employees.
Communication. The act of transferring information from one place, person or group to another. It involves one sender, a message and a recipient.
Compensation. The salaries received by the employee from an employer.
Employee or personal engagement. This refers to "the harnessing of organization members' selves to their work roles; in engagement, people employ and express themselves physically, cognitively, and emotionally during role performances" (Diogene, 2017).
Engagement drivers. The deep-down feelings and emotions that employees have about their position, management and organization which translates to employee needs, well-being and increased levels of energy, passion and action.
Leadership. The leaders or actions of leading in an organization.
Nature of job. The type of work that an employee does.
Organizational performance. The ability of organizations to meet the needs of stakeholders and its own needs for survival (Obeidat, 2016).

Review of Related Literature

Previous research on the topics of employee engagement, its drivers and organizational performance were objectively evaluated to give theoretical basis and to help the researcher determine the type of research to be adopted. The concept of employee engagement was developed by William A. Kahn in 1990 through his study involving summer camp and architecture employees to understand the psychological conditions- meaningfulness, safety and availability that lead to employee's engagement in the workplace (Diogene, 2017). In today's business world, it is vital to understand the specific drivers of employee engagement. Employee engagement was proven to contribute to the businesses' productivity and work performance. The most dominant

factor of employee engagement was leadership aside from work-life balance, communication, and pay and benefits (Othman, Rapi, Alias, Jahya, and Loon, 2019). Viloria (2018) revealed in his study that the significance of the job as perceived by the employee was the only internal engagement driver. Hoque, Awang, Siddiqui and Sabiu (2018) investigated the positive impact of compensation system on employee performance resulting to employee engagement. The study of Iddagoda and Gunawardana (2017) investigated the connection between employee engagement and perceived financial performance (i.e. profit growth, sales growth, and operating cost) of listed companies where the results showed that employee engagement had significant positive effect on perceived financial performance. A related study by Muller et al. (2018) concluded that employee engagement had a significantly positive impact on organizational performance when the latter was measured using the elements of balanced scorecard.

METHODOLOGY

Research Design

A mixed methods approach applying the sequential explanatory research design were used to support the set objectives of this study.

Research Locale

The study was performed in Company M, a Japanese manufacturing company engaged in the assembly and distribution of quality trucks, buses, and spare parts.

Population and Sampling Design

The identified population frame of the study was the list of Company M employees under the business support functions as of September 31, 2020 employing the Proportionate Stratified Sampling method with employee category as stratification variable. The sample was determined through the formula of the Philippine Social Science Council Survey.

Research Instrument

The researcher used a survey questionnaire of 35 items employing a 5-point Likert scale through Google forms. The said instrument was a combination of self-constructed statements from the literature review and valid items adapted from previous studies.

Data Gathering Procedure

The researcher secured permission from Company M to perform the research. Quantitative data were initially collected through the online questionnaire which was validated and tested using Cronbach's coefficient alpha before tabulation and analysis.

The qualitative phase consisted of interviews with three selected participants. The integrated quantitative and qualitative results answered the set objectives of the study.

Management and Treatment of Data

The data analysis developed for this research were as follows:

Table 1. Data Analysis Matrix

RESEARCH QUESTIONS	DATA	INSTRUMENT	ANALYSIS
1. What is the level of organizational performance of Company M in terms of: a) Financial and b) Non-Financial dimensions?	Quantitative → Qualitative	Survey → Questionnaire Interview	Descriptive Thematic Analysis
2. What is the level of employee engagement of Company M according to the following drivers? a) Leadership, b) Communication, c) Career Opportunities, d) Nature of Job, e) Compensation and Benefits	Quantitative → Qualitative	Survey → Questionnaire Interview	Descriptive Thematic Analysis
3. What model can be formulated containing engagement drivers that significantly impact the organizational performance of Company M?	Quantitative → Qualitative	Survey → Questionnaire Interview	Stepwise multiple regression Thematic Analysis
4. What are the strategies to be formulated and implemented by Company M to increase employee engagement towards organizational performance?	Results of the Study	Survey → Questionnaire Interview, Desk Research	Textual Analysis

RESULTS AND DISCUSSION

The quantitative and qualitative results are presented based on the data analysis discussed in the preceding section. The questionnaire's validity was checked while its reliability was measured using the Cronbach's coefficient alpha test of internal consistency where results showed that all Cronbach's alpha figures calculated were above the threshold- Organizational Performance: Financial Dimension (0.7734) and Non-Financial Dimension (0.8944); Employee Engagement: Leadership (0.8375), Communication (0.8679), Career Opportunities (0.9468), Nature of Job (0.7759), and Compensation and Benefits (0.9535).

I. Level of Organizational Performance

In Table 2, the resulting level of financial organizational performance (with total mean of 3.39) as perceived by the respondents was "neither good nor poor relative performance" which proved that on the average, high profit, positive sales growth and low operating cost of Company M cannot be assured at this time which might be due to the unfavorable financial situation caused by the instability of the economy in the pandemic. Emplify (2019) cited research conducted by Willis Towers Watson which reported that organizations with high employee engagement had up to three times higher operating margin than those with low employee engagement. This result will lead one to infer that Company M might have lower employee engagement because of the respondent's neutral perceptions on its organizational performance. The results also showed that the total mean of 3.65 for the total non-financial dimension translated that the company had a "Good relative performance" which also conformed to the highest percentage of

responses. These results substantiated the study of Muller et. al (2018) that employee engagement had significant influence on the organizational performance. Thus, it can be inferred that the employee engagement of Company M contributed to the good relative performance.

Table 2. Mean ratings and percentage of responses per rating on the level of organizational performance of Company M

DESCRIPTION	MEAN	VERBAL INTERPRETATION	PERCENTAGE OF RESPONSES PER RATING				
			1 - SD	2 - D	3 - N	4 - A	5 - SA
Total Financial Dimension	3.39	Neither good nor poor relative performance	1.57%	9.10%	44.00%	39.07%	6.27%
Total Non-Financial Dimension	3.65	Good relative performance	1.13%	6.00%	28.43%	55.30%	9.13%

Based on the interview with the participants, common themes that emerged for the financial and non-financial organizational performance are illustrated in Table 3.

Table 3. Thematic Analysis and Narratives for Research Question 1

DIMEN-SION	THEMES	NARRATIVES
Financial	Achieving Profit	*I believe that due to the pandemic we have, the sales went low but still we are striving because unlike any other companies, we are still open and operating. There is work meaning there are orders. Profit is not that high.*
	Outcomes of sales	*The sales team is made aware of the company direction and projection. Employee can align the strategy towards the direction/projection.*
	Effect of operating cost	*Instead of buying machinery our company is continuing to provide jobs to skilled workers especially on the production line. With that said, there is an operating cost that may be higher than other companies that rely on machineries.*
Non-Financial	Managing Customers	*This company is in its current state because its customers are treated like kings by having total customer support.*
	Managing Internal Processes	*The employee's productivity and product/service quality are ensured by monitoring performance of employees and compliance with ISO standards.*
	Continuous Quality Improvement	*We do not end with just selling our products, we offer after-sales services to our client to provide them quality services even after buying our products.*

II. Level of Employee Engagement

In Table 4, the mean ratings of the four engagement drivers indicated that "employees were engaged" and these results were aligned with the highest percentage of responses. These findings were consistent with the studies of Dajani (2015), Obeidat

(2016) and Viloria (2018) that revealed the leadership's predictive power of employee engagement, the reciprocal interconnection between management and employees and the need to stimulate jobs to support engagement, and that career growth opportunities were vital drivers of productivity and retention. Moreover, the "employees were neither engaged nor disengaged" by compensation and benefits since their perceptions were neutral on three out of its five indicators. With this result, one thing was definite that it is not enough to engage the employees. Company M can be guided by the study of Hoque et. al (2018) that indicated that compensation systems can alleviate employee's work performance towards engagement.

Table 4. Means and percentage responses on the level of employee engagement

DESCRIPTION	MEAN	VERBAL INTERPRETATION	PERCENTAGE OF RESPONSES PER RATING				
			1 – SD	2 – D	3 – N	4 – A	5-SA
Total Leadership	3.61	Employees were engaged.	2.00%	8.68%	29.18%	46.94%	13.20%
Total Communication	3.70	Employees were engaged.	1.33%	7.20%	28.33%	46.48%	16.68%
Total Career Opportunities	3.62	Employees were engaged.	3.00%	7.15%	30.00%	42.33%	17.53%
Total Nature of Job	3.91	Employees were engaged.	2.50%	2.35%	23.00%	47.65%	24.50%
Total Compensation and Benefits	3.39	Employees were neither engaged nor disengaged.	3.68%	9.68%	36.00%	39.15%	11.50%

The results of the interview with the participants led to emerging themes that showed why and how Company M ensured employee engagement in terms of the five engagement drivers. Table 5 shows the narratives for the themes derived.

Table 5. Thematic analysis and narratives for research question 2

THEMES	NARRATIVES
Leadership Outcomes	*To maintain employee engagement, the company must stay as a going concern company through succession planning, and training.*
Advantages of Communication	*This company maintains communication within the department and company-wide. This is done through information dissemination in the form of email/text blasts, campaign drives and online meetings.*
Motivating career advancement programs	*Career Opportunities provide challenges, and these vary in every line of work. Not all nature of work in our company has a high career ladder. Having programs for skills development encourage employees to advance their skills.*
Engaging Manner of Job Assignment	*For better performance of employees, employee's job should be clear through the orientation upon employment and regular feedback and suggestion from superiors.*
Advantages of Compensation and Benefits	*This serves as one of the motivating factors that keep me engaged in my work in exchange for my services in the company through the company's on-time and accurate delivery of fair pay and benefits to employees.*

III. Model formulated containing engagement drivers that significantly impact the organizational performance of Company M per combination of variables

The researcher analyzed the data gathered through the Stepwise Regression Method in SPSS which generated the list of key employee engagement predictors of the organizational performance of Company M. The regression determined the characteristics that had the greatest influence on the organizational performance. A final model is identified per scenario or combination of employee engagement and organizational performance variables (i.e. 18 combinations) to come up with detailed analysis and recommended strategies.

Figure 2 shows the resulting significant predictors where leadership consistently showed its strongest impact to total organizational performance, total financial (positive sales growth and lower operating cost) and non-financial dimensions (customer, internal process, learning and innovations performance). However, negative b-coefficient results for career opportunities, compensation and benefits, communication and nature of job variables caused decreasing impact to organizational performance variables. This information provided the researcher to devise strategies to help in turning the negative to positive impact of these engagement predictors to the identified organizational performance variables.

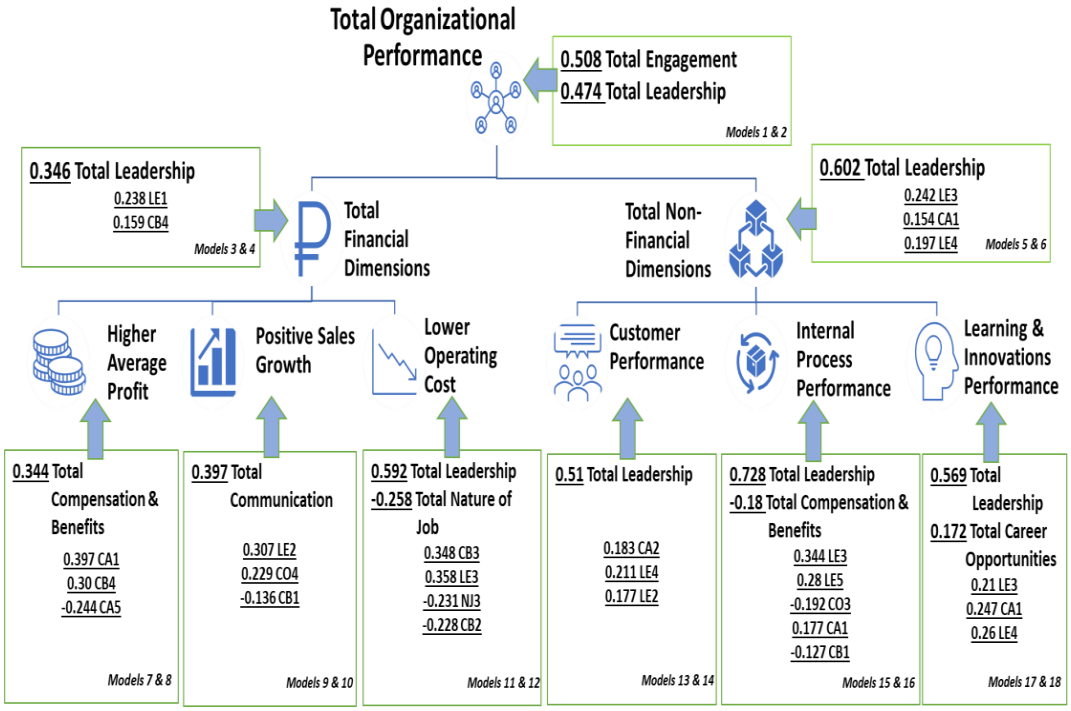

Figure 2. Significant predictors of organizational performance of Company M with unstandardized b coefficients

Common themes per model were derived through interviews as shown in Table 6.

Table 6. Thematic analysis and narratives for research question 3 (Models 1-18)

MODELS	THEMES	NARRATIVES
1	Engaging factors of total organizational performance	The company has existing programs that address the different employee engagement factors (example: training, compensation and benefits, company, kaizen activities) to improve overall organizational performance. These are done through the unified efforts of management and employees.
2	Positive Drivers of Overall Leadership	Leadership style affects company performance through the treatment of employees as partners. Harmonious relationship with employees may lead to company's success.
3 & 4	Drivers of Total Leadership	Many managers are involved in the decision making especially before funding or planning an activity or project, leading to many ideas before execution of plans. Routine meetings and conference to better understand the problem before releasing funds or jumping into the plan.
	Leader's capability	The leaders of Company M are capable to lead and contribute to the financial organizational performance through their skills, work experience and good working relationship with stakeholders.
	Outcome of Understanding Compensation and Benefits	Knowing the benefits offered by the company will help employees be motivated by explaining compensation and benefits upon appraisal.
5 & 6	Drivers of Total Leadership	Managers evaluate the needs of employees and provide benefits in accordance with the law through orientation and open communication at all levels.
	Effect of leader's communication	Communication of vision is the starting point of acting on achieving the company's targets by clear directions of leaders and cooperation among the employees.
	Leader's communication Venues	Employees need to know the status or issues of the company that may affect them by having general assemblies and information sharing.
	Professional advancement	I am interested to further widen my set skills by learning new things.
7 & 8	Contribution of fair pay to profit	The compensation and benefits of the employee make him satisfied and contribute to high profits. The employee works efficiently and effectively to maximize the resources of the company.
	Reasons for career advancement	I feel that my performance will improve if my career grows in the company, and this will contribute to the average profit by achieving my KPIs that would certainly contribute to profit goals.
	Knowledge of compensation and benefits	If an employee will understand his benefits, then he will not feel that he receives less package than other employees by explaining their compensation and benefits before they even start working.
	Outcomes of Motivation	Employee motivation results in proactiveness that maximizes company resources. However, the demand for product is down during the pandemic due to low financial capability.
9 & 10	Result of proper Communication	Overall communication was vital in contributing to the sales growth of the company. However, I can say that during pandemic, there is a big decrease in sales across all industries.
	Contributing factors of inter-department communication	If there is smooth communication between inter-departments, goals are achieved at a much smoother and faster rate. This is done by creating team building programs that involve various departments.
	Leadership factors contributing to sales growth	Employees execute the plans of the top management. Recognition and incentives are given to loyalty awardees.
	Compensation and benefits factors for achieving sales growth	Compensation is a factor of employee's engagement in work by having competitive compensation and benefits offered by management. Employees are paid more for their work during the pandemic. Even during the ECQ, the employees continued to receive their salaries and were allowed to use their leaves in advance even if they had not yet earned. There is a decrease in the sales growth because of the pandemic.
11 & 12	Basis for leadership	Hiring of qualified leader by micromanaging to minimize resources and maximize output.
	Contributions of Nature of Job	Job improvements help lower operating costs through Kaizen competition. New government regulations during pandemic increased operating cost of the company.
	Effect of proper job knowledge	Understanding of job reduces operating cost by minimizing errors.
	Outcomes for job security	Company is still thriving even in pandemic through employees' cooperation towards company goals.
	Contributors of profit	Employee's awareness that profit affects compensation and benefits by being cost conscious and participating in Kaizen activities.
	Effect of leader's communication	The company's vision helps employees understand their work clearly by its dissemination inside and outside the company.
13 & 14	Contribution of Leaders	Leaders are proven to lead employees by meeting customer needs and adapting new technology for better quality of services and products.
	Consideration of employees	Employees are the executor of programs for customer's total support by prioritizing their concerns.
	Leader's communication venues	Sharing information with employees for their awareness by suggesting ideas that may help resolve issues in the company.
	Outcome of developing skills	Opportunity to be multi-tasking by studying other areas for additional learnings.
15 & 16	Contribution of Leadership	Clear communication of leader's commitment to quality through established quality control and regular conduct of internal/external controls/audits.
	Effect of leader's communication	The company's vision reflects on product quality by understanding what the client needs along with the vision for better output.
	Leadership's regard for taking feedback	Having regular meetings to discuss current company issues and listen to employee concerns.
	Factors affecting internal process	Well-compensated employees are motivated to perform beyond expectations for the company by maximizing resources. The implementation of new government or company policies might affect or limit the productivity of employee.
	Factors for achieving internal process improvement	Being paid fairly can be a factor in a company's service quality through the motivation it brings in doing jobs. But if employee is complacent with his work performance, product/service quality will not improve.
	Reasons for improving internal process	By sharing ideas, employees see different aspects to perform their jobs through Kaizen activities.
	Reasons for improving internal process	Employee's growth with the company enables concern on the image and quality of the company by doing well in jobs.
17 & 18	Leadership Actions	Improvements in the process will enhance products and services offered which will also make transactions easier and attract new clients.
	Leadership communication goals	Leader's clear dissemination of goals to all employees through regular meetings and discussion of company issues.
	Purpose of Leader's communication	Employees are well-informed about issues and can anticipate the possible problems arising from the issues and be able to propose countermeasures through discussion in meetings.
	Factors affecting learning innovations	Being innovative can lead employees to develop new skills which is beneficial for new career opportunities in the company.
	Contribution of career growth	Company ensures professional growth by widenings skills of employees and offering challenging tasks as opportunities for new learnings and advancement.

IV. Strategies for Implementation of Company M to Increase Employee Engagement Towards Organizational Performance

The results of the quantitative analysis of this research shown in Figure 2 were used by the researcher in formulating the following strategies: 1) reinforcement of the leadership team by enhancing leadership skills and commitment, designing meaningful work, and providing resources and coaching employees, and having formal succession planning program; 2) development of career opportunities by creating a career path program, regular update of job descriptions, clarification of performance standards and integration of training and development; 3) improvement of compensation and benefits by making it competitive and having a formal salary structure, 4) intensification of communication through the formation of internal communications team and gaining employee's trust through transparency, 5) enhancement of nature of job by finalizing job evaluation program and giving employees variety of tasks where their skills can be stimulated, 6) focusing strategies for Models 5 and 6 with the highest adjusted R-squared and 7) creation of an organizational performance risk response team from the management team whose task is to formulate action plans to help lessen the impact of Covid-19 in Company M.

Conclusions

The following conclusions were arrived at: 1) The level of organizational performance of Company M would serve as basis to further enhance its engagement strategies towards maximizing its overall organizational performance especially on its financial dimensions and achieve "Very Good Relative Performance" level; 2) The resulting level of employee engagement suggested that Company M must make both tangible and intangible efforts to achieve a highly engaged workforce by putting more emphasis on its compensation and benefits indicators; 3) The resulting 18 models showed that leadership was the strongest significant predictor and that almost all the significant engagement predictors had positive effect while six models had negative effect to the organizational variables; and 4) Company M should emphasize the reinforcement of its leadership team as this factor proved to be the strongest predictor of organizational performance and focus on reversing the negative effect of significant employee engagement predictors. It is also equally important to consider enhancing the other significant employee engagement factors as these contributed significantly to organizational performance.

Recommendations

Based on the summary of significant findings and conclusions presented, the researcher derived the following recommendations:

1. That Company M adopt the strategies formulated in this research for the purpose of increasing employee engagement towards organizational performance.

2. That a similar research study be conducted by other researchers covering all employees to have holistic scope on the perceptions of the employees across the company.
3. That a related study be conducted by other researchers involving any other company or companies in similar industries with the same objective of improving employee engagement towards organizational performance. It would provide more rational and sound data that can be beneficial for the company or companies.
4. That a study be conducted by other researchers to further cover other employee engagement and organizational performance indicators. Through this, more comprehensive information on how to make more effective strategies will be arrived at on the grounds of more extensive and reliable findings.

Compliance with Ethical Standards

As this study involved human participants, the ethical concerns were considered during the design of research and were approved by the Letran Graduate School and Company M management before the data collection began. The ethical concerns of informed consent, risk of harm, confidentiality and anonymity and conflict of interests were considered. The researcher secured the necessary approvals from the Letran Graduate School before the research commenced. The name of the company was codified as Company M and there was no need to collect the names of the employees. A Letter of Intent was submitted to the Human Resources Management and Development Department of Company M to allow the employees to become the subjects of the study. Then, the informed consent of employees was secured before participation in the study. Any personal or other information gathered was treated with strict confidentiality in accordance with the Data Privacy Act of 2012. The data collection and processing and interpretation of results were done by the researcher. Bias in the results and conflict of interest were avoided and, at the same time, the participant was protected from potential harm and the validity and integrity of results were assured.

Acknowledgements

The researcher would like to thank the Lord Jesus Christ, who made everything possible for her to complete this research. She also extends sincere love and gratitude to her family, friends and colleagues who provided support, encouragement and inspiration in overcoming the challenges of this research during the pandemic. To God be the glory!

EMPOWERING INDIGENOUS PEOPLE *(IP'S)* COMMUNITIES IN ALBAY, PHILIPPINES USING PURPLE SWEET POTATO PLUS FOOD PRODUCTS

Eden M. Llamera, Ed.D., Engr. Sienna B. Llamera

Technology and Entrepreneurship Department, Bicol University Polangui, Polangui, Albay Philippines

https://doi.org/10.5281/zenodo.11514541

ABSTRACT

Purple sweet potato is foreseen as one of the root crops that provide colorful appearance in the family meal. The impact of this study illustrates a chain of technology transfer to Indigenous People who were noted of creativity and industry. This study "Empowering Indigenous People Communities in Albay Philippines Using Purple Sweet Potato Plus Food Products," was focused on developing and standardizing recipes using purple sweet potato (*Ipomoea batatas lam*.) variety. The recipes were a combination with other root crops giving higher value enhancing IP's life skills future entrepreneurial activity. The study on physico-chemical characteristics revealed purple sweet potato flour is nutritious having 72.06% MC, 3.34 %ww Ash, 86.265 Carbohydrates, 4.65% Protein and fat 1.015%ww. The raw purple sweet potato has Deep Lilac //Violet, RGB: (66, 63, 104), #8E61BA, HSV: (244^{o}, 39%, 41%), flour with Bouquet //Faded Violet: Pink, after 3 months of storage the color was Fine, pinkish brown powder with L*57.7, a* 10.3, b* 12.1 and h 46.7 using RM 200QC imaging. The 9-point Hedonic scale was used in evaluating the organoleptic and kinesthetic sensory characteristics of each product. Weighted mean aided the interpretation determining the best proportion for each kind. Rank Preference and Kramer's Rank-sum Test result indicated *Purple Sweet Potato Plus Buchipan* as the most preferred product. The IP's enhanced processing skills development got 4.4 weighted mean described as 'Strongly Agree." A Learning Materials was an output of the study used as a reference in developing processing skills of Indigenous Peoples' in Albay for economic sustainability and resiliency.

Keywords: *plus food products, color retention, standardized, organoleptic and kinesthetic*

INTRODUCTION

According to RA 8371 s. of 1997 Chapter VI, Section 36 on Sustainable Agro Technical Development (1997), the state shall recognize the right of ICCs/IPs to a sustainable agro-technological development and shall formulate and implement programs of action for each effective implementation. The state shall likewise promote bio-genetic and resource management systems among the ICCs/IPs and shall encourage cooperation among government agencies to ensure the successful sustainable development of ICCs/IPs. The university mandate is to conduct researches, provide specialized instruction for social transformation and development. This rationalizes the use of sweet potato and other native crops as an opportunity to explore and provide standardized recipes to help enhance the processing capabilities of “Indigenous People” in Albay. Developing processing skills and integrating the good and cleaner production can provide a support system in producing food products for entrepreneurial commodity. New processing techniques can be used as basis for starting a homebased small business enterprise that can augment family income for “*Indigenous People* ” community.

Studying purple sweet potato paved the idea of processing this root crop into flour and determine the color retention and nutrient in it. Processing sweet potatoes present an excellent opportunity for food waste reduction. This is true because most parts of the plant are edible, including leaves, peel, roots, and vines. Regional processors have reported that between 30 and 50% of production typically gets thrown away during processing, but using some creativity, this can be avoidable (DA, 2012). Purple sweet potato is a good source of energy that can supply material that help the body do the activities. Standardizing a recipe for the purple sweet potato can build a reference providing step by step procedures that can be followed to make a wholesome food product.

According to Types of Sweet Potatoes-Complete List and Guide (2022), Sweet potato is classified as a dicotyledonous plant or a vine species, sweet potatoes belong to the morning glory family Convolvulaceae with scientific name of *Ipomoea batatas lam*. Many recipes were developed from its roots, which are tube-like, starchy, sweet, having vibrant-colored root vegetable consumed and loved. Sweet potato is rich in fiber, vitamins, and minerals, having anti-oxidant properties. This type of vegetable root crop help in supporting healthy vision due to its vitamin A content, and Vitamin C boosting the immune system, and even fight off cancer-causing toxins (Turong, 2018). One of the impressive about colorful sweet potato is that they offer fantastic benefits like anthocyanins and rich in anti-oxidants.

Mohanraj and Sivansankar (2014), studied on giving a bird's-eye view of the nutritional value, health benefits, phytochemical composition, and medicinal properties of sweet potato. Specifically, this review outlines the biological activities of some of the sweet potato compounds that have been isolated, the pharmacological action of the sweet

potato extract, clinical studies, and plausible medicinal applications of sweet potato and demonstrates the potential of sweet potato as a medicinal food. The study gave a vision of studying the purple sweet potato physico-chemical characteristics to have a notably formation of nutritive content of the local harvest of purple sweet potato.

One of the studies conducted was the development of a process for producing sweet potato chips. “Sweet potato tubers sliced to 0.5 by 0.5 cm size were dehydrated at 70 degrees C for various times (0, 90, 105, 120, 135, 150, 165 minutes Baldwin, (2023). The determination of the moisture content of the dehydrated chips and sensory evaluation of the dehydrated and fried chips were carried out to establish optimum dehydration time and moisture which corresponded to optimum quality the same way as the chip’s recipe in the present study which differ in using the purple sweet potato variety, the time and style variates in different ways. The significance of this study with the present study showing the same intent but of different procedures and findings. Moreover, the present study, have developed different recipes and made a compilation of each into a learning material purposively providing a reference for household consumption or for entrepreneurial activity.

Pulverizing and retaining the purple color of sweet potato is a challenge that this research has to enfold. This variety is known for its sensitivity to processing. It has an enzyme that when not exposed to sun or dried after chopping, it easily gets spoiled. The cause for the demand of sweet potato starch in the Philippines is due to the extraction rate and the finished product is of good quality. The study reveals the drying time and the rasping machine plays a key role, and the most common starch grating machine on the market today is the RU series of super rasping machine (Olantunde et.al., 2016). The sun drying are method appropriated to IP’s conventional technology for milling while food processing steps are simple and can be followed. The purple color in sweet potato is retained even after series of sun drying and rigorous pulverizing processes.

In the study of De Los Santos, Maat and Ventura (2017), imparted the tuberous root of orange sweet potato variety into ketchup. The Raw orange sweet potato (OSP) and the developed ketchup were subjected to proximate, total dietary fiber, Vitamin A analysis, physicochemical and microbiological analysis. The proximate analysis of the ketchup showed that OSP ketchup is a poor source of protein (0.53g/100g) and fat (none-detected). However, the ash content increased (2.1g/100g) and there is a decrease of carbohydrate content (18.77g/100g) due to the process of boiling. The utilization of orange sweet potato motivated the researcher to use the purple sweet potato by creating six (6) different food products. The acceptability of the purple sweet potato plus food products was sought. The color retention and physico-chemical attributes described that local purple variety is a potential commodity producing quality colorful food products for entrepreneurial commodity.

According to Lirag (2019), a study on sweet potato has found its niche in the global market and is now outpacing other primary staple foods not only because of its desirability for human consumption but as an immediate source of income. The study examined the factors affecting the profitability of sweet potato production in Camarines Sur, Philippines.

The researcher used purposive sampling technique to select the 108 farmer-respondents. A structured questionnaire was used and focused group discussion were the main tools for gathering data. Cost and return analysis and return on investment were used to determine the profitability of sweet potato production. This study cited were considered related to the present study in determining the marketability of the different purple sweet potato plus food products.

This study used the purple variety of sweet potato giving full potential for possible entrepreneurial food products. The importance of purple color was considered to make a colorful food without using artificial coloring. Its natural purple color is known for rich in anti-oxidants, energy, and vitamin content. This study has an aspiration of increasing awareness on the beauty and nutritional benefits from sweet purple potato. Standardized food products will be taught to indigenous communities identified native local folks' communities. The importance of helping the indigenous people is a priority of this research. Indeed, enhancing the processing capability of IP's using purple sweet potato is a valued achievement of this study.

Research Questions

The general objectives of the study were focused on Empowering Indigenous People Communities in Albay Philippines Using Sweet Potato Plus Food Products. The study was focused on the development and standardization of purple sweet potato plus food products enhancing the processing capability of the Indigenous People in Albay teaching life-skills for sustainable economic development. Specifically, it sought the following: (1) determine the physico-chemical characteristics of the colored sweet potato as to: weight and dimension, %usable parts, %moisture content, % flour recovery, color retention, yeast & mold count and proximate analysis of the flour; (2) develop and standardize the correct proportions of ingredients and procedures of the colored Sweet Potato Plus Food Products; (3) Test the acceptability of the Sweet Potato Plus Food Product in terms of organoleptic and kinesthetic characteristics; (4) Determine the most preferred product and its fat content; (5) Identify the potential marketability of the colored sweet potato plus food products; (6) Create a Learning Materials on processing of sweet potato plus food product for enhance processing capability of the indigenous people in Albay, Philippines.

METHODOLOGY

Descriptive research is a process of describing the characteristics of the population or phenomenon studied. It focuses on the "what" and "why" of the research subject (McCombes, 2023). It was understood that descriptive research "describes" the subject without covering "why" it happens. This methodology was used to described the phenomena on the acceptability of the food products by the 20 IP respondents of the study. Trials were made in standardizing the different recipes of the purple sweet potato. These recipes were compiled in a learning material a reference used in the enhancing of processing capability of the indigenous people using sweet potato plus food products.

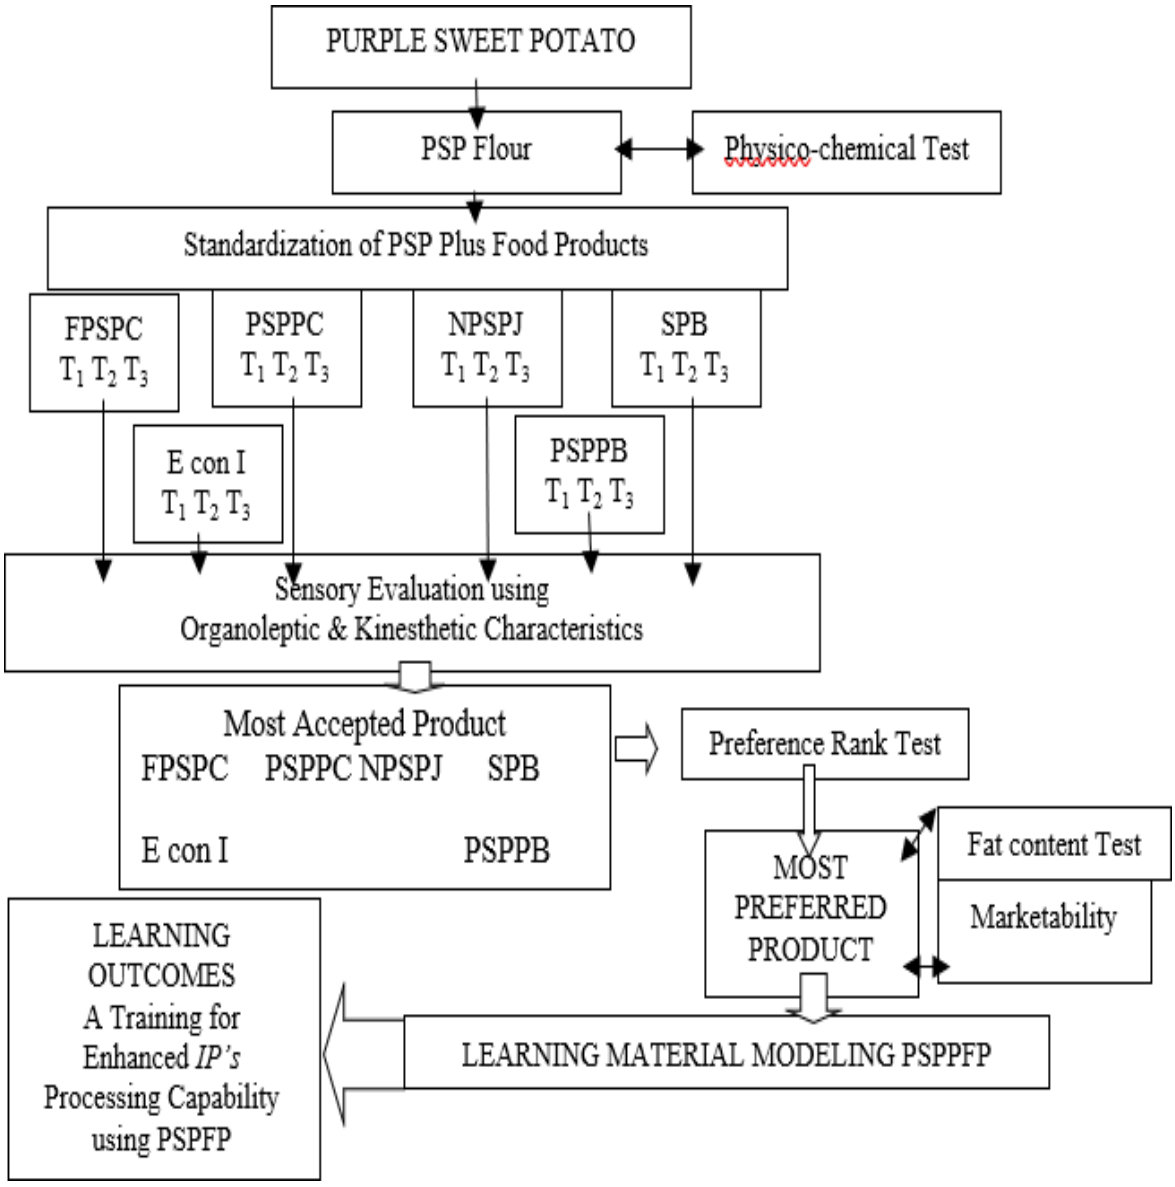

Figure 1. The Paradigm of Methodology of the Study

The product development and standardization of the recipes were lay on formulating a new product using trial method. Correct proportions of ingredients were tried until the acceptable color, aroma, taste and texture were achieved. It is very important to note that the market potential of sweet potato products are constantly increasing with 5.9% and 6.7% respectively (DA Guide, 2020). The taste the presentations of foods are important aspect to consider the salability of these produce. The technique of processing procedures considers the entire life journey of a product that an indigenous people can easily understood to follow. The acceptability of the finished food products used 9-point Hedonic scale in evaluating the organoleptic characteristics as to aroma, color, and taste,

while kinesthetic characteristics evaluate the mouthfeel and texture. The weighted mean was used in the interpretation on the “level of acceptability” of the food products. The Rank Preference Test was used in selecting the most preferred product. The Kramer’s Rank-sum Test aid in determining the “level of significance difference” among the products. At the end, the standardized accepted recipes were compiled in a Learning Material Modeling the Processing of Purple Sweet Potato Plus Food Products for Enhancing the Processing Capabilities of the IP’s was an output of the study.

RESULTS

The NSIC-SP 25 purple sweet potato variety was used in standardization of the food products. The purple variety is locally known as “inubi” (purple) . This is a special type of sweet potato having a distinct characteristic compared to other varieties. Rich purple color on food provides phytochemicals known as anthocyanins. According to studies, the best source of anthocyanins component is purple and blue color which is present in purple sweet potato. The “antioxidant effects have been linked to lower risk of myocardial infarction in young and middle-aged women.” These nutritional qualities are unnoticed, thus giving importance to the great nutrition benefits. The purpose of processing purple sweet potato into flour is to give a longer shelf-life and economic value of ready to use flour. This resonates in giving value on propagating and producing the sweet potato purple variety.

3.1. The Physico-Chemical Characteristics of Purple Sweet Potato

3.1.1 Weight and Dimension

The study used 10 samples of different sizes to get the average weight and dimension of purple sweet potato. An electronic vernier caliper was used to get the dimensions of the samples of raw potato. Table 1 showed different weight and dimension with an average, 12.5 centimeters, 18.05 centimeters circumference and length with 176 centimeters respectively. It is common to purple sweet potato to have medium size, not too big or small neither.

3.1.2. Percent (%) Usable Parts

The percent usable parts reveal data on how many parts of the purple sweet potato are removed and how many are used in producing flour from the samples. The 2,000 grams or 2 kilos of purple sweet potato used as sample for producing flour. From the sample, the waste part has 60.5 grams, minimal waste was observed because the peel was not removed and only trimmings are discarded from the sweet potato rhizomes. It can be noted that there were 96.95% (percent) usable parts or 1,934.5 grams of the purple sweet potato were used for flour production.

3.1.3. Percent (%) Moisture Content

For easy drying, the chipped purple sweet potato was thinly chopped using the thickness of 0.02 mm. The chips were dried under the heat of the sun for 8 days. The drying started at 8:00 o'clock in the morning until 4:00 o'clock in the afternoon to get the peak heat from the sunlight. It consumed 8 consecutive days or 64 hours to fully dry the raw chips.

Table 1. The % Moisture Content of the Dried Chips Purple Sweet Potato Using Sundried Method

Day	Weight (g)	% MC
0	1,935.5	-
1	1,740.6	10.06
2	1,533	20.79
3	1,222,87	36.81
4	998.5	48. 41
5	775.65	59.92
6	624.1	68
7	601.7	69
8	540.6	72.06

The final moisture content was very important in milling processes of the raw chips. The chips should have the hard crisp chips texture to get the fineness of a flour. The removed moisture of purple sweet potato was recorded with 72.06% removed moisture after 8 days from continued sun drying. The retained moisture content during the pulverizing of the purple sweet potato chips was 27. 94% which was higher than normal standard storage of wheat with 11% moisture.

3.1.4. Percent (%) Flour Recovery

The Purple Sweet Potato was milled using the rice milling technology. After milling there was 445.65 grams or 82.43% flour recovery.

Weight of the recovered flour after milling	-	445.65
Divide by the original weight of the sample	-	/540.6
Quotient obtained	-	.8243
Multiplied by 100	-	x100
% Flour recovery	-	82.43%

3.1.5. Color Retention of Purple Sweet Potato Flour

The raw purple sweet potato has a color of sweet purple with a little of white strands on its whole crop grain. This variety is recognized upon looking at the vine of rhizomes. The presence of deep violet color can be seen in stem of the leaf of purple sweet potato. For

scientific data, a colorimeter is used to determine what type of purple color found in this crop.

Using a Computer Information Engineering (CEI) standard illuminant D65 and standard observer (2^{o}), the raw purple sweet potato has a deep lilac color in in a colorimeter with a following:

Raw Chips

Flour

Plate 1. The Raw and the Processed Flour of Purple Sweet Potato

The color family of the purple sweet potato is “Deep Lilac” belonging to Violet #8E61BA, with Red 66, Green 63, and Blue 104 values, Hue Saturation Values of 244^{o}, 39%, 41% of the red, green and blue respectively, Registry Abstraction Layer (RAL) Code of 4011 as Pearl Violet or Violet.

The color of the powdered purple sweet potato was a real light purple or having a lavender hue. The texture of the flour when rubbed between fingers was a little grainy or rough. The aroma was nice and sweet. The color was naturally nude pale violet, Bouquet “Faded Violet: Pink” is likely the true color as revealed in the results. The cooked flour was been observed having a very dark color when processed purple sweet potato plus into food products. All of the three products from steamed, fried chips and even processed flour added with other ingredients, have noted with dark color of deep violet. The cooked produced becomes almost black color in the human naked eye showed a registry abstraction layer (RAL) has 4007/Purple violet or fall into #4F293A described as Dark Violet-Pink.

Table 2. Report of Analysis on the Color Retention of the Purple Sweet Potato Flour after 3 months of storage

Item No.	Sample & Lab Code	Sample Description	Parameter	Method Used	Result
			L*	TM-Ch-070 with reference to	57.7
	Purple Sweet	Fine pinkish	a*	RM200QC Imaging	10.3
1	Potato Flour	brown powder	b*	Spectrometer	12.1
	(CHE-0565)	in plastic	C*		15.9
		1x ~ 100g	h	(CIEL*a*b* and CIE	48.7
				L*C*h Color Space)	

3.1.6. The Yeast and Mold Count of the Purple Sweet Potato flour

Longer storage of a flour depends on the slowing of microbial growth of the yeast and molds in the purple sweet potato flour. The growth of yeast and mold in the flour can cause deterioration and may lead to early spoilage of a product. Occurrence of abnormal color, flavor and odor was an indicator that the flour is already infested by bacteria or yeast and molds that deter taste and palatability. A flour may seem to be as mold free but when subjected into microbial test it is already contaminated with bacteria after 3 months of storage. To assure its edibility the purple Sweet Potato flour was tested at DOST Region V for a laboratory examination on yeast and mold count.

The yeast and mold was aready present in three months of storage having 3.9×10^4 coliforming unit. This indicates that the flour was already infested with bacteria making it unfit for human conssumption. The presence of colony forming units in the flour was an indicator that it is no longer clean and safe. This is true to the stored purple sweet potato flour characterized by slight off odor, aflatoxins taste, caking texture and growth of weevils in the flour. According to standards, the allowable amount for human ingestions of yeast and mold will only have ≤10,000 CFU/g to avoid fatalities and complications. Therefore, the shelf-life of the purple sweet potato flour expires in 3 months of storage .

3.1.7. Proximate Analysis of Purple Sweet Potato Flour

The proximate analysis is a scientific method used to determine the approximate amounts of substances within purple sweet potato flour. The percentage of components within the food material in purple sweet potato flour can contribute to its nutritive value and flexibility when combined to other ingredients to make a delectable food product. The test was done to emphasize important nutrient that are present in the locally processed flour. The 250g of Purple Sweet Potato Flour contains the following: Moisture 5.14 %ww; Ash, 3.34 %ww; Protein 4.65 (Block Digestion -Kjeildahl); Fat, 1.01 %ww; Carbohydrate,

86.28 %ww. The essential source of anti-oxidant revealed the following: Fiber**:** 3.3 grams, Manganese**:** 6% of the Daily Value (DV), Copper: 21% of the DV, Iron: 2% of the DV, Potassium**:** 8% of the DV, Vitamin B6**:** 18% of the DV, Vitamin C**:**14% of the DV.

It can be noted that the purple sweet potatoes are a good source of beta-carotene. It is even richer source of anthocyanin pigments, characterized by its purple color. The antioxidants can help reduce inflammation and boost immune system. Purple sweet potatoes have about three times richer in anthocyanin content as signified by its deep purple color. The deeper purple color the richer the vitamin content it has.

3.2. The Standardized Recipes of Purple Sweet Potato Plus Food Products

Standardization of recipes pave an important set of instructions for making a food dish from various ingredients. The recipe provides the amounts and proportions of ingredients and methods of procedures that will consistently produce a high-quality food product. There are six Purple Sweet Potato Plus Food Products prepared by the study.

The recipes used two material processes, used the raw rhizomes for standardizing the following recipes: There were 4 products such as Flavored Purple Sweet Potato Chips, Purple Sweet Potato Plus Candy, Sweet Purple Banban and Nutri Purple Sweet Potato Jam uses raw purple variety, all others used the flour. The standardized recipes are having simple procedures, easy to prepare and follow.

3.2.1 Flavored Purple Sweet Potato Chips

Ingredients: 1 kilo Purple Sweet Potato, ½ Teaspoon salt, 2 Kilos Oil (for Frying) and 1 Pack Cheese of Barbeque Flavor.

Procedure:

Wash thoroughly camote rhizomes. Drain until dry. Cut into chips about 0.2 cm thick or as desired (using chipper). Drizzle with salt leave for 1 minute. Heat oil until hot. Deep fry the purple sweet potato raw chips. Cook by stirring to avoid burning of chips. When chippy texture is obtained, take it out off from the oil and immediately drain off the oil. Let it cool Put inside a plastic bag and pour in the cheese or barbeque flavor and shake a little to adhere the flavor onto the chips. Pack into individual packs. Label.

3.2.2. Purple Sweet Potato Plus Candy

Ingredients:1 cup cooked and mashed purple sweet potato, 2/3 cup white sugar,1 tablespoon butter, ½ cup powdered milk, ½ cup chopped Pilinuts.

Procedure; Wash the raw sweet potato and boil to cook. Removed the peel and mashed until obtained fine texture. Mix all ingredients. Put all mixed ingredients in a carajay. Cook mixture in a very low fire. Continue stirring to prevent from sticking

into the pan. Continue stirring until the mixture becomes soft hard but pliable. Remove from fire when mixture forms a ball while being stirred. Flatten the mixture in a prepared greased pan while hot. Divide the mixture into desired sizes. Let it cool. Wrap into a colored cellophane or desired wrapper. Pack and label.

3.2.3. Nutri-Purple Sweet Potato Plus Jam

Ingredients: 3 cups Raw Purple Sweet Potato, 1 cup white Taro, 2 cups sugar, 2 cans evaporated milk (big can), 2 Teaspoon vanilla..

Procedure: Peel both purple sweet potato and taro. Wash thoroughly to remove soil from the rhizomes. Grate the rhizomes into fine coarse texture. Set aside. Pour into carajay the following: Milk, sugar and mix together. Dissolve sugar thoroughly and add the taro and sweet purple potato. Cook in a low fire until thick like a jam. Cook until spreadable texture is obtained. Cool and pack in a sterilized jar. Pasteurized the product for about 30 minutes. Remove from water and pat dry. Put label. Seal.

3.2.4. Empanaditas Con Inube

Ingredients for the dough (crust): 3 cups All Purpose Flour, 1 1/2 bar butter, 1 tablespoon sugar,pinch of salt 10 tablespoon of cold water.

Procedure for the crust: Sift flour, sugar in a bowl. Add butter. Mix the butter, sugar and flour using a fork in cutting motion. Continue cutting butter into flour until pea size is obtained. Divide the mixture into small balls. Flatten the balls and put onto Empanaditas molder or cutter. Fill in with nutri-purple sweet potato jam. Close the edges using molder. Cut off excess mixture. See to it that the Empanaditas is fully close by putting a pressure onto the edge of dough. Heat oil. Deep fry until golden brown texture on the crust is achieve. Drain let it cool. Pack and label. Filling: Nutri-Purple Sweet Potato Plus Jam

3.2.5. The Food products from Purple Sweet Potato Flour

There were only two standardized food products developed using the purple sweet potato flour. These products use simple procedures and requires simple technology so that the indigenous people could follow the step-by-step procedures in preparing the food products.

3.2.6. Purple Sweet Potato Plus Buchipan

Ingredients: 1 ½ cup hot water, 2/3 cup white sugar, 3 cups sticky rice flour, ½ cup Purple Sweet Potato flour. Sesame seeds (for coating), Oil for frying.

Procedures: Combine hot water and sugar. Mix until it thoroughly dissolved. Pour in little by little the sticky rice and purple sweet potato flour. Mix thoroughly for 2 -3 minutes until well combined. Close mixture with cloth. Rest mixture for 15 minutes.

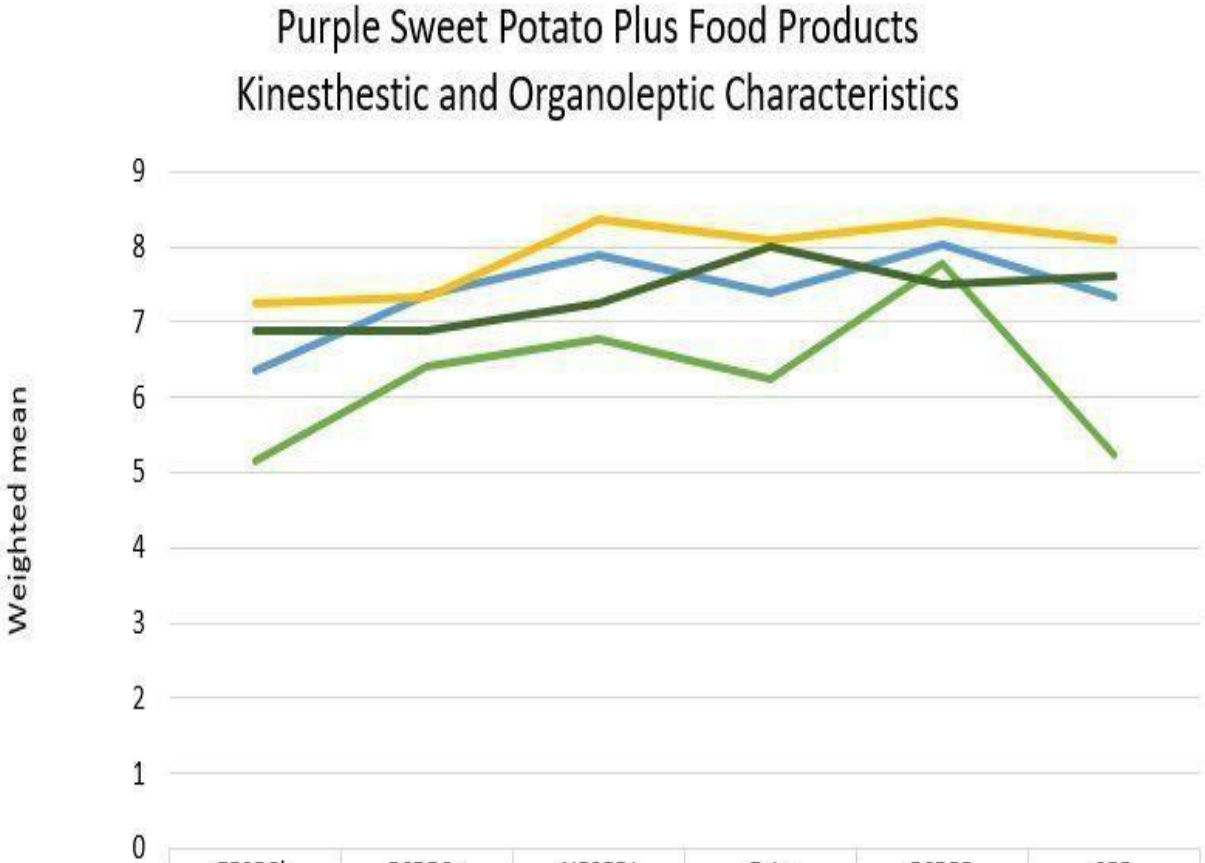
After 15 minutes, form mixture into rod and cut into desired weight. Form into a ball. Flatten the balls using the heel of the palm. Put in the filling (Nutri-Purple Sweet Potato Plus Jam). Seal and set aside until all are form into round ball. Roll onto sesame seeds, until well coated. Heat oil and deep fry. When Buchipan is already light brown, when balls are already floating on top of oil it is an indication that the Buchipan is cook. Get it from oil and drain. Let it cool. Pack and label.

3.2.7. Sweet Purple Banban

Ingredients: 2 cups Purple Sweet Potato Flour, 1 cup sticky rice flour, 1 cup shredded buko, 1 ½ cup sugar, 2 tablespoon vanilla, 2 cups evaporated milk (big can), Banana leaves (for wrapping of mixture)

Procedures: In a bowl mix purple sweet potato flour and sticky rice, sugar. Pour in milk and vanilla. Mix well until blended. Add Buko and blend well. Pour mixture in a banana leaf and close by folding both ends very well. Arrange all Banban into a kettle and steam for 30 minutes or until cook. Cool and serve with brown rice coffee.

3.3. The Acceptability Purple Sweet Potato Plus Products using Organoleptic and Kinesthetic Characteristics



There were six (6) different purple sweet potato plus food product accepted by the respondents emphasizing the qualitative descriptive analysis and interpretations in the attributed likelihood of the product:

The flavored purple sweet potato chips are having a deep dark purple color. The chip's cracking texture was crispy noted with a good balance of taste of sweet potato and flavorings. The chips are a bit comparable having a texture like but a little harder than of the commercialized potato chips in the market. An observation showing smear was noted and the oil inside was visible but it doesn't affect the texture of the product. Indeed, the acceptability in taste showed the general weighted mean of 7.26 having a qualitative descriptive interpretation of 'Like Moderately.'

The purple sweet potato plus candy was made up of steamed purple sweet potato and Pilinuts added with other ingredients. The candy was cut into a bar and packed. The level of acceptability of the candy showed on aroma with weighted mean of 6.4 described as "Like Moderately." The aroma of gentle sweet mediated the receptors of taste buds having just enough sweet obtaining a weighed mean of 7.34 described as "Like Moderately" respectively.

The nutri-purple sweet potato plus jam obtained the weighted mean of 7.89 for color attributes with a qualitative description of "Likely Very Much." The combinations of ingredients showed strong likelihood of the product. The prominence of the sweet potato taste was noted with highest weighted mean of 8.36 interpreted as "Like Very Much."

The Empanaditas con Inube is delicious product from purple sweet potato. Hence, the soft crispy crust was a remarkable characteristic of Empanaditas. Emphasizing taste of sweetness and saltiness blend together producing a sumptuous food product. The taste and texture almost same to each other obtaining a weighted mean of 8.1 for taste and 8.0 for texture have a qualitative description of “Like Very Much” respectively.

	FPSPCh	PSPPCn	NPSPPJ	EcIn	PSPPB	SPB
Aroma	5.14	6.4	6.76	6.24	7.78	5.24
Color	6.36	7.36	7.89	7.38	8.02	7.32
Taste	7.26	7.34	8.36	8.1	8.34	8.08
Texture	6.88	6.88	7.24	8	7.5	7.62

Figure 2. The Acceptability of the Purple Sweet Potato Plus Food Products in Terms of Kinesthetic and Organoleptic Characteristics

The Purple Sweet Potato Plus Buchipan showed a remarkable likelihood among the flour by-products. It has a general weighted mean of 7.91 having a qualitative descriptive

interpretation of “Like Very Much.” The color and taste of the Buchanan was noted as the most accepted product with a weighted mean of 8.02 and 8.34, respectively. Among all the standardized product sweet purple Banban was known for native delicacy that are commonly prepared for snacks. These products can be prepared using either raw or flour. This Banban used the sweet potato flour together with other ingredients. The Banban uses milk instead of water which makes it more delicious and nutritious food product. It can be noted that the observation of having a good taste was supported by its level of acceptability on taste having a weighted mean of 8.08 with a qualitative descriptive interpretation of “Like Very Much.”

3.4. The Most Preferred Product

The rank preference test is commonly used in selecting the best products using the level of ranks from the value given or assigned as to which is the best product or the worst product as perceived by the respondents. Table 3 showed the results on best product preferences. This is the most appropriate statistical tool on determining food product preferences. The following steps were done to arrive at correct analysis for most preferred product.

Among the 20 respondents (n=20) who evaluated 6 different sample samples (R=6) using the 5% level of significance, the corresponding ranks in the Kramer’s Rank-sum test used the 52-88 range to test its level of significance. It showed that the H_o of the study stated that when sum of the samples falls in the range or within the range given all of the samples will no differ from each other. If the total sum of each type falls below or above the range given, it can be said the product that has a lower or higher value will be declared as the odd or different sample from the other sample. The “Purple Sweet Potato Plus Buchipan” obtained a lower rank sum of 41 describe as the odd sample, is the “Most Preferred Product.’

Table 3. The Ranking for Preference for Standardized Recipes of Purple Sweet Potato Plus Food Products

Panelists	Rank per Sample					
	N-PSPJ	PSPPCan	FPSPCh	EcI	PSPPB	SPB
1	6	5	2	3	1	4
2	5	1	3	6	2	4
3	2	3	1	4	5	6
4	1	4	5	6	2	3
5	2	5	4	3	1	6
6	1	5	6	3	2	4
1	2	5	6	3	2	4
8	2	5	6	3	1	4
9	3	5	6	4	2	1
10	6	5	4	3	1	2
11	2	5	6	3	1	4
12	6	1	3	2	4	5

13	1	5	4	2	3	6
14	6	3	4	2	1	5
15	3	6	4	1	2	5
16	6	3	4	2	5	1
17	6	3	4	1	2	5
18	2	6	4	3	1	5
19	2	6	4	3	1	5
20	1	6	5	4	2	3
Total Rank	65	87	85	61	**41**	82
Rank 1 = Best and Rank 6 = Worst						

The Fat content of the most preferred product.

Fat is needed for the properly absorption of fat-soluble vitamins in human body. It adds flavor to food products with distinct satiety. Human needs fat to help the brain cells function well, besides needing it in maintaining supple knees and glossy hair. Result of analysis provides for every 25g of Nutri-Purple Sweet Potato Plus Buchipan there were 133 calories, 8 g of fat, 0.7 g of protein, 15 g of carbohydrate and 2.3 g sugar.

3.5. Potential Marketability of Purple Sweet Potato Plus Food Products

There were 50 consumers responders were asked if they would buy Purple Sweet Potato Plus Food Products and these were their responses. It can be noted that Purple Sweet Potato Plus Buchipan (PSPPB) have 14 or 28% willingness of buying the product, ranks second is Empanaditas con Inube with indicated 10 or 20% willingness to buy. Meanwhile the Nutri-Purple Sweet Potato Jam got 8 or 16%, Purple Sweet Potato Candy got 7 or 14% while Sweet Purple Banban got 6 or 12% and Flavored Purple Sweet Potato Chips got 5 or 10% willingness to buy respectively.

The illustration on marketability goes to show that “Purple Sweet Potato Plus Buchipan” was the most preferred product that customers would like to buy followed by Empanaditas con “Inube (Purple).: The products are marketable and could be used as the homebased products for the *IP* community.

3.6 The Learning Materials on Processing Purple Sweet Potato Plus Food Products: Enhancing the Processing Capability of the Indigenous People in Selected Municipality in Albay, Philippines

3.6.1 Prologue

The learning materials on processing purple sweet potato into food products is a useful material that can be disseminated to households specifically the Indigenous People

community. This learning material will serve as a reference to facilitate the learning of the local folks.

The learning materials contain simple recipes that can be followed by the learners. All food products use raw materials that are available in the local market and in the farm of the community. Processing is simple and can be followed by anyone who got interest in processing local foods. Besides, the featured food product will not alter the culture of the *IP's* but rather will enhance their food processing skills integrating the cleaner good manufacturing standards for food safety.

Food products that are presented in this Learning Materials is modelling a simple but delicious and nutritious food product. This can be used as family business items that can be marketable in the community. The products draw demand because of its sumptuous taste that can fully provide energy when consumed. The products contain no preservatives added, natural color is coming from its natural purple pigment. The products are used as food, snacks and appetizers too. This product is rich in "*Flavonoids Vitamins"* an anti-oxidant with high nutritive content of carbohydrate and protein. (Note: the Learning Materials were written separately)

3.6.2. Results of the Initializing Training of the Indigenous People using the Learning Materials on Processing Purple Sweet Potato Plus, Food Products

The results on initializing training were taken from 16 respondents during the training conducted in June 27-28, 2022 at BUPC Dormstel participated by selected Indigenous People from Malabnig, Guinobatam; Danao, Polangui; and Joroan, Tiwi, Albay. This was an in-house live-in training. The trainees were given an training for 2 days to see if they could learn and can improve their processing skills using the purple sweet potato plus food products. The evaluation of the training has a 4.7 weighted mean which interpreted as 'Strongly Agree.' This means that the training proceedings were acceptable and believed to enhance the processing capability of the Indigenous People. On the other hand, on the item number 11, in the question "training time allotment was sufficient" got only 4.4 weighted mean which interpreted 'strongly agree.' The training time was sufficient to cover all the important skills to be developed during the training.

3.6.3 Enhanced Processing Capability of the Indigenous People Using Sweet Potato Plus Food Products

The training was intended to form and develop the processing capability of the indigenous people in selected municipality in Albay using purple sweet potato plus food products. A questionnaire was given to the 16 trainees who were actively participated in the initializing training for enhanced processing capability using purple sweet potato plus food products. During the training each were given a learning material to read. A lecture, demonstration and return demonstration were performed carrying out the actual application of food processing. Each of the trainees were given an opportunity to illustrate a capability on

processing the recipes shown in the learning materials for Purple Sweet Potato Plus Food recipes.

3.6.4 Results on Enhanced Processing Skills Capability of the Indigenous People

The data showed that the IP's can identify the ingredients that has been used in preparing the different recipes of the purple sweet potato plus food products showing a weighted mean of 4.8 and has the ability to present food product with a rating of 4.8 which was described as "Strongly Agree" respectively.

DISCUSSION

Physical characteristics of the sweet potato were as follows: the average weight and dimension of the 10 samples was 12.5cm length, circumference 18.05cm, and 176 gram. The Percent usable parts were 96.8% and got at moisture content of 72.06%, flour recovery of 82.43%.

Color retention for raw purple sweet potato is deep lilac violet with a Registry Abstraction Layer (RAL) of 4001 Pearl Violet. The color of the new processed purple sweet potato flour was Bouquet, Faded Violet with Registry Abstraction Layer of 4009 Pastel Violet. After 3 months of storage the color becomes fine pinkish brown. The color of the processed products of steamed potato four have a Registry Abstraction Layer of 4007 as purple violet and fall into #4F described as Dark Violet-Pink.

Yeast and mold count of the stored purple sweet potato was having 39x104 CFU*/g. The results on Proximate analysis for the flour using 250 grams sample, it has a moisture of 5.14%, ash of 3.34%, protein of 4.65% ant fat of 1.01% and carbohydrate content of 86.28%.

Standardized recipes were the following: Flavored Purple Sweet Potato, Purple Sweet Potato Plus Candy, Nutri-Purple Sweet Potato Jam, Empanaditas con Inube, Purple Sweet Potato Buchipan, Sweet Purple Banban.

The acceptability of the Purple Sweet Potato on organoleptic and kinesthetic characteristics reveals the following: Flavored Purple Sweet Potato Chips got a weighted mean of 7.16, Purple Sweet Potato Plus Candy with 7.25 described as "Like Moderately" respectively. The Empanaditas con Inube with 7.72 which have a qualitative description of 'Like Very Much,' meanwhile the highest weighted obtained among the sample products was Nutri-purple Sweet Potato Jam with 7.89 with qualitative descriptive analysis of 'Like Very Much.' Sweet Potato Flour Food Products showed Purple Sweet Potato Buchipan weighted mean of 7.82 described as Like Very Much, Sweet Purple Banban weighted mean of 7.57 interpreted as "Like Very Much." The most preferred product Purple Sweet Potato Plus Buchipan with a Total Rank of 41 as significance different sample among others.

There were 8 grams of fat per 250 grams sample of Purple Sweet Potato Plus Buchipan Food Product.

The potential marketability showed Purple Sweet Potato Plus Buchipan of 28% likeness, Empanaditas con Inube with 20%, Nutri-Purple Sweet Potato Jam have 16%, Purple Sweet Potato Candy 14%, Sweet Purple Banban 12%, Flavored-Purple Sweet Potato Chips got 10%.

Learning Material for Enhancing Processing Capability of Indigenous People in Selected Musicality in Albay was presented. The initializing training evaluation got 4.7 general weighted mean which describes as 'Strongly Agree,' and the enhance processing capability of the indigenous people got 4.4 general weighted mean which was described as "Strongly Agree' respectively.

Conclusions

In summary, physico-chemical characteristics of the purple sweet potato are of notable importance to assume that the local farm products are nutritious and can provide full energy consumptions to human needs. Color of purple sweet potato is retained even after processing and storing of the flour. Recipes on Purple Sweet Potato were standardized and can be a potential food merchandise in the market. Food products can be introduced to children to have new choice of snacks to offer in the school canteens.

The most preferred food product was Purple Sweet Potato Plus Buchipan. Production of these food products can be a potential entrepreneurial engagement of IP's, household, or gender as an additional income for the family. Learning Materials on Processing Purple Sweet Potato Plus Food Product was a tool in enhancing the processing capability of the indigenous People in Albay, Philippines. These learning materials can be a potential reference to teach simple recipes that are easy to follow and have it sold in the customers. Use of the Training Plan and Learning materials as the output of the study impliedly enhanced the processing capability of the indigenous people using sweet potato plus food products, can be continuously implemented in the extension program of the college.

Recommendations

The educational resources that have been produced are extremely valuable for university extension activities. It is possible to apply for utility model and copyright patent applications for additional recipes. A compilation book that contains standardized recipes and processes is currently being developed. It is highly recommended to actively promote the wide distribution of these educational resources to other educational institutions.

Additionally, it is encouraged to explore research opportunities for other agricultural products.

Compliance with Ethical Standards

This research complied with the Ethical Standards required by Bicol University Research and Development Management Office upon approval by the University President. Likewise, this research was approved by the Director of National Commission on Indigenous People Office Region V Iriga City, Camarines Sur. Hence, all activities were highly coordinated with the said offices, Indigenous People Chieftains, Municipal Mayors and Barangay Chairman of the respondents of the study. The output of the study were used to train the selected Indigenous People in Albay to improve their processing capability using the local root crops grown in the locality for sustainable economic development.

Acknowledgments

We would like to thank the Regional Director of National Commission on Indigenous People, Regional Office V at San Isidro, Iriga City, Camarines Sur, and Tribal Chieftains of the Indigenous Cultural Communities of Mapaco, Guinobatan, Albay, Danao, Polangui Albay, and Joroan Tiwi Albay.

ENHANCING LEADERSHIP THROUGH GOOGLE APPLICATION TOOLS IN SELECTED PUBLIC AND PRIVATE SCHOOLS

Marvin S. Garrido

FIRST College, National Teachers College, Tanauan City, Batangas, Philippines

https://doi.org/10.5281/zenodo.11547003

ABSTRACT

The main goal of this study is to examine the integration of Google Application Tools with leadership effectiveness among school leaders in public and private schools of Tanauan and Sto.Tomas City Division, Batangas. The researcher aims to explore how such tools impact leadership practices, decision-making processes, communication, and organizational performance more broadly. Proponents utilized a quantitative approach that employs quantitative surveys. The investigation aims to deeply explore the phenomenon of leader perception and experience based on the use of Google Application Tools in their roles of leadership. The implication of this paper has discovered advantages in adopting Google Application Tools for enhancing leadership performance in their organization, hence providing recommendations to leaders, authorities and academics in dissemination of technology for leadership betterment and keeping track of the innovation in the contemporary world.

Keywords: *Google Application Tools, Web Video Conferencing, Electronic Learning*

INTRODUCTION

The leaders in an organization are one of the biggest parts for the management to be successful and for all the team members to be productive and perform well in their designated area. Leadership is significantly important to improve the environment for learning, the school conducts teacher growth and ensures student learning outcomes. As technology continues to evolve at a rapid pace, leaders are introduced to new tools and

new platforms to help them be more effective and efficient. The Google Application Tools, including, Google Drive, Google Classroom, Google Meet etc. provides a comprehensive set of functionalities designed to fulfill the varied requirements of educational leaders. This paper investigates the use of these tools in schools by principals of both the public and private sectors, in order to delineate their effects on leadership performance.

On the other hand, there are a range of studies that have explored the application of Google Apps in various fields. Andreeva (2019) highlights the use of Google Apps in e-learning, emphasizing its cost-effectiveness, accessibility, and versatility. Similarly, Pawar (2019) discusses the potential of Google Tools in library and information services, noting their ability to enhance user experience. Gonzales (2021) focuses on the use of Google Apps in teaching practice, reporting significant time savings and improved student performance. Alvim (2018) underscores the importance of simplicity and focus in collaborative work, drawing on the experience of Google Apps workshops. These studies collectively underscore the wide-ranging benefits of Google Apps in different professional and educational contexts. While Fu (2020) focuses on the use of Android raw Global Navigation Satellite System measurement datasets for precise positioning and Liang (2018) provides a broader perspective, reviewing the applications and impacts of Google Earth, particularly in Geographic Information Science, remote sensing, and geosciences. These studies collectively underscore the diverse and significant role of Google Application Tools in different domains.

As to Santos (2021), in the study "Google Classroom: Beyond the Traditional Setting" stated that school leaders utilize Google application tools to enhance their leadership performance. Through interviews and surveys with principals and administrators, the study explores the adoption, challenges, and benefits of using Google Application Tools such as Google Drive, Google Classroom, and Google Meet. Findings from the study indicate that school leaders in both public and private schools increasingly rely on Google application tools to streamline administrative tasks, improve communication with stakeholders, and foster collaboration among teachers and staff members. However, the study also identifies challenges such as limited access to technology, inadequate training, and privacy concerns that hinder the effective use of Google Application Tools.

The study of Torrato et al (2021), "Using Web Video Conferencing to Conduct a Program as a Proposed Model toward Teacher Leadership and Academic Vitality in the Philippines" demonstrated that the use of WVC had an overall positive outcome on participants' performance. Video conferencing has flourished with the development of various services on the Internet. Video conferencing, as a way of open and distance learning, provides education and training in a more flexible way than the regular teaching methods. Technology is an essential component of this training program. However, training quality relies on teaching, cognitive, and social presence, rather than on technology. Nonetheless, technology remains an important platform that supports professional development activities. The completion of this study reflected positively on the success of the use of WVC to conduct the Sustaining Teacher Leadership and

Academic Vitality through Research program. Thereby, affirming that with the halt of face-to-face learning, learning can be achieved.

According to Dutta (2018), about "Google Apps and Their Applications in eLearning: A Study " Technology has played an immense role in each and every sphere among which the educational sector is not an exception. The role of technology in the sphere of education is increasing at a phenomenal rate which has even revolutionized the traditional process of teaching-learning. Development of different types of technological tools catered these diverse backgrounds and demands of learners in the educational system. This is among the most important explosions propelled by the internet transformation. Education beyond face to face is no more simply an assemblage of words understandable only by a few but the present situation it has become a part and parcel of everybody's life. This process operates through various apps & tools. Google provides different apps & tools for these purposes. Google plays a role as a panacea for the e-Education system. This study mainly focuses on a few Google Application Tools such as Google Classroom, G-mail, Google Meet, Google Drive, and Google Forms. The main objective of the article is to highlight the role of Google apps and tools in imparting education beyond the traditional classroom. It further focuses on the various purposes of using the same, various problems faced in using such tools along with probable solutions. Also highlight the librarian's role to improve the application of Google apps and tools.

The study of Hussaini and Libata (2020), about the study entitled "Effectiveness of Google Classroom as a Digital Tool in Teaching and Learning: Students' Perceptions" indicated that Google Classroom is effective in improving Students access and attentiveness towards learning, knowledge and skills gained through Google Classroom makes Students to be active learners, as a Digital Tool, it provides meaningful feedback to both Students and Parents. However, Poor network hinders students from effective utilization of Google Classroom; thus, submitting their work late. Therefore, teachers should integrate the conventional teaching with Google Classroom to improve Students' Performance. Google Classroom should also be a form of assessing Students' Assessment through online Assignments and Quizzes; hence making Students to participate actively in Educational Technology Classes. The University should also provide a standard network to enable Students to join Google Classroom and submit their assignments on time.

Furthermore, the researchers aim to know if the use of Google Application Tools by leaders from public and private schools of Tanauan and Sto.Tomas City Division, Batangas helps in their leadership in their organization and if their work has become more smooth and if it has been easier for them to communicate with their team members due to the use of modern communication methods using Google Application Tools.

Research Questions

This study is an attempt to identify the enhancing leadership through Google Application Tools in selected public and private schools.

Specifically, this study would like to answer the following questions:

1. What is the profile of the selected public and private school leaders in terms of:
    1.1 Age
    1.2 Gender
    1.3 School Types
    1.4 Length of Leading Experience

2. What are the enhancement of using Google Application Tools by the leaders performance in selected public and private schools in terms of:
    2.1 Managerial Skills
    2.2 Career Innovation
    2.3 Time Management

3. What is the level of effectiveness of using Google Application Tools in enhancing selected public and private school leader's performance in terms of:
    3.1 Technological Advancement
    3.2 Job Performance
    3.3 Resolving Work Issues

4. Is there a significant difference between selected public and private school leader's performance in using Google Application Tools?

METHODOLOGY

This research adopts a quantitative approach in investigating the use of Google Application Tools by the school leaders. The results of this study will be used to design a quantitative survey of a purposive sample of primary, secondary and tertiary leaders and school district administrators from public and private schools of Tanauan and Sto.Tomas City Division, Batangas. Drawing on these experiences, the surveys will ask participants about the enhancement and effectiveness by using Google Application Tools. The findings will also be complemented with quantitative survey data that are collected from a larger sample, to be able to address whether Google Application Tools are widely employed and effective in education.

There are multiple factors used by the researchers to assess the enhancement of leaders' performance by utilizing Google Application Tools. These may include managerial skills, career innovation, time management, technological advancement, job performance, resolving work issues. However, the scope of this study will focus on enhancements and effectiveness of using Google Application Tools by the leader's performance. This study is limited to some selected public and private schools of Tanauan and Sto.Tomas City Division. It covers the teacher's profile which includes age, gender, school types, and length of leading experience that make this study manageable to various constraints of the enhancements and effectiveness of using Google Application Tools by the leader's performance.

The validity of the instrument used in gathering the data prepared by the researcher is presented to an external individual from the proponent workplace that has an expertise in the field of research. The draft of the questionnaire is analyzed considering its contents, structure and purpose. It is anticipated that there will be some revision on the different items based on the construction of the final draft of the instrument. The draft is also presented to the researcher instructor in Doctorate Degree, and other three experts in the field. To check the reliability of the questionnaire it is multiplied to one private and one public school to compare. It is understood that the leaders who were used in checking the reliability of the questionnaire will not be the same respondents of the study to be conducted; they may come from other public and private schools. This shows that the validity and reliability of the questionnaire that is being used to conduct the study ensures an accurate result from selected public and private schools by using Google Application Tools in enhancing leadership performance.

RESULTS

The results deal with the presentation, analysis and interpretation of the data gathered with regard to using Google Application Tools from selected public and private schools in enhancing leadership performance.

Specifically the purpose of this study is to find the answer in the following queries.

1. **On the Profile of the Respondents in terms of Age, Gender, School Types and Length of Leading Experience.**

Table 1.1
Profile of the Leaders in Terms of Age

Age	Frequency	Percentage
24 - 26	6	7.50%
27 - 29	19	23.75%
30 - 32	7	8.75%
33 - above	48	60%
Total	80	100%

.

The table shows the distribution of the respondents according to their age. Majority of the leaders are age 33 - above with frequency count of 48 or 60 percent, followed by 27 - 29 years old with frequency count of 19 or 23.75 percent, then 30 - 32 years old with frequency count of 7 or 8.75 percent and lastly the leaders aging 24- 26 with frequency count of 6 or 7.50 percent.

From the findings it was revealed that the majority of the leaders of ages 33 - above are utilizing Google Application Tools in enhancing leadership. This implies that they keep up in technology learning advancement despite their age.

Table 1.2
Profile of the Leaders in Terms of Gender

Gender	Frequency	Percentage
Male	25	31.25%
Female	55	68.75%
Total	80	100%

The data in the table indicate the distribution of respondents according to their gender. Most of the leaders are female with frequency count of 55 or 68.75 percent, along with the male leaders with frequency count of 25 or 31.25 percent.

This implies that the majority of the leaders in the mentioned areas were female and sincerely engaged in using Google Application Tools in enhancing leadership.

Table 1.3
Profile of the Leaders in Terms of School Types

School Types	Frequency	Percentage
Public	40	50%
Private	40	50%
Total	80	100%

The table shows the distribution of the respondents according to school types. It uses public school leaders with frequency count of 40 or 50 percent and private school leaders with frequency count of 40 or 50 percent.

This implies that the respondents used in this study were equal to formally assess the accurate result in gathering the data in both selected public and private schools.

Table 1.4
Profile of the Leaders in Terms of Length of Leading Experience

Length of leading experience	Frequency	Percentage
1 - 5	28	35%
6 - 10	5	6.25%
11 - 15	12	15%

16 - 20	30	37.50%
21 - 25	2	2.50%
26 - above	3	3.75%
Total	80	100%

The table shows the distribution of the respondents according to length of leading experience. Majority of the leaders has 16 - 20 years of leading experience with frequency count of 30 or 37.50 percent, followed by 1 - 5 years of leading experience with frequency count of 28 or 35 percent, then 11 - 15 years of leading experience with frequency count of 12 or 15 percent, next is 6 - 10 years of leading experience with frequency count of 5 or 6.25 percent, another is 26 - above years of leading experience with frequency count of 3 or 3.27 percent, and lastly is 21 - 25 years of leading experience with frequency count of 2 or 2.50 percent.

This implies that leaders with 16 - 20 years of leading experience have the highest count and are indeed capable in utilizing Google Application Tools in enhancing leadership.

2. **The enhancement of using Google Application Tools by the leaders performance in selected public and private schools in terms of Managerial Skills, Career Innovation, and Time Management.**

Table 2.1
The enhancement of using Google Application Tools by the leader's performance in terms of Managerial Skills

Indicators	Public Leaders			Private Leaders			Total		
Managerial Skills	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**
2.1.1 Have you been more effective in conveying information clearly to your team through Google Application Tools?	4.48	Agree	1.25	4.40	Agree	4.5	4.44	Agree	3.5
2.1.2 Do you become more organized in managing your team using Google Application Tools?	4.48	Agree	1.25	4.40	Agree	4.5	4.44	Agree	3.5
2.1.3 Have you become more competent in using Google Application Tools to enhance the collaboration and productivity of your team's work?	3.95	Agree	5	4.48	Agree	3	4.22	Agree	5
2.1.4 Do you feel that it is easier for you to share tasks with your	4.48	Agree	1.25	4.50	Strongly Agree	2	4.49	Agree	2

team through Google Application Tools?									
2.1.5 Have you improved your team's work even when remote collaboration is happening using Google Application Tools?	4.48	Agree	1.25	4.60	Strongly Agree	1	4.54	Strongly Agree	1
Composite Mean	**4.37**	**Agree**		**4.48**	**Agree**		**4.43**	**Agree**	

The table shows the enhancement of using Google Application Tools by the leader's performance in terms of managerial skills. Public and private leaders perceived that they have improved their team work even when remote collaboration is happening using Google Application Tools which obtain the weighted mean of **4.54** with verbal interpretation of Strongly Agree on rank number **1**. This implies that it improves the collaboration of the team even with distance communication.

Moreover, leaders feel that it is easier for them to share tasks with their team through Google Application Tool which obtains the weighted mean score of **4.49** with Agree verbal interpretation on rank number **2**. This implies that leaders can easily interact with his team by sharing the tasks.

Furthermore, leaders have been more effective in conveying information clearly to their team through Google Application Tools which obtains the weighted mean score of **4.44** with verbal interpretation of Agree on rank number **3.5** and leaders become more organized in managing their team using Google Application Tools which also obtains the weighted mean score of **4.44** with verbal interpretation of Agree on rank number **3.5.** This implies that leaders can easily disseminate and manage information through their colleagues using Google Application Tools.

Leaders become more competent in using Google Application Tools to enhance the collaboration and productivity of their team's work which obtained the weighted mean score of **4.22** with verbal interpretation of Agree on rank number **5**. This implies that using Google Application Tools the team becomes more knowledgeable in their work.

The computed composite mean obtained a score of **4.43** with verbal interpretation of **Agree**. This implies that with Google Application Tools, leaders can more effectively organize their workload and promote team communication.

Table 2.2
The enhancement of using Google Application Tools by the leader's performance in terms of Career Innovation

Indicators	Public Leaders			Private Leaders			Total		
Career Innovation	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**

2.2.1 Has the use of Google Application Tools improved your performance at work?	4.00	Agree	4.5	3.98	Agree	1.5	3.99	Agree	4
2.2.2 Do you believe that employing Google Application Tools has made you a more successful leader?	4.00	Agree	4.5	3.90	Agree	3	3.95	Agree	5
2.2.3 How often do you feel encouraged to think creatively and propose innovative ideas related to your career and role using Google Application Tools?	4.48	Agree	1.33	3.88	Agree	4	4.18	Agree	2
2.2.4 Do you think using Google Application Tools helps you become more professional and keeps up with cutting-edge developments in your field of work?	4.48	Agree	1.33	3.98	Agree	1.5	4.23	Agree	1
2.2.5 Have you used Google Application Tools to generate innovative ideas for the betterment of your institution?	4.48	Agree	1.33	3.83	Agree	5	4.16	Agree	3
Composite Mean	**4.29**	**Agree**		**3.91**	**Agree**		**4.10**	**Agree**	

The table shows the enhancement of using Google Application Tools by the leader's performance in terms of career innovation. Public and private leaders perceived that they think using Google Application Tools helps them become more professional and keeps up with cutting-edge developments in their field of work which obtained the weighted mean of **4.23** with verbal interpretation of Agree on rank number **1**. This implies that leaders become more proficient and innovative in the nature of their works.

Moreover, leaders feel encouraged to think creatively and propose innovative ideas related to their career and role using Google Application Tools which obtains the weighted mean score of **4.18** with Agree verbal interpretation on rank number **2**. This implies that leaders have the sense to contemplate resourcefully and create new ideas for the betterment of his work.

Leaders used Google Application Tools to generate innovative ideas for the betterment of their institution which obtains the weighted mean score of **4.16** with Agree verbal interpretation on rank number **3**. This implies that leaders produce advanced concepts for the improvement of the organization using Google Application Tools.

Furthermore, leaders used Google Application Tools to improve their performances at work which obtains the weighted mean score of **3.99** with Agree verbal interpretation on rank number **4**. This implies that leader's work more smoothly using Google Application Tools.

Leaders believe that employing Google Application Tools has made them a more successful leader which obtains the weighted mean score of **3.95** with Agree verbal

interpretation on rank number **5**. This implies that leaders became better leaders in their organization due to the use of Google Application Tools.

The composite mean obtained a score of **4.10** with verbal interpretation of **Agree**. This implies that when it comes to career innovation with the use of Google Application Tools in leadership, leaders have become more resilient to change.

Table 2.3
The enhancement of using Google Application Tools by the leader's performance in terms of Time Management

Indicators	Public Leaders			Private Leaders			Total		
Time Management	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**
2.3.1 With Google Application Tools, has it been simpler for you to keep track and manage your deadlines?	3.95	Agree	4.5	4.30	Agree	5	4.13	Agree	5
2.3.2 Do you find that the integration of various Google Application Tools contributes to time efficiency in your daily work tasks?	4.48	Agree	1.33	4.63	Strongly Agree	1	4.56	Strongly Agree	1
2.3.3 When arranging meetings and activities with your team, can using Google Application Tools improve communication and efficiency in real time?	3.95	Agree	4.5	4.50	Strongly Agree	3	4.23	Agree	4
2.3.4 Do you think using Google Application Tools supports your time management even more because of working remotely or in a virtual environment?	4.48	Agree	1.33	4.60	Strongly Agree	2	4.54	Strongly Agree	2
2.3.5 Do you believe that using Google Application Tools improved your overall time efficiency in finishing team duties or projects?	4.48	Agree	1.33	4.45	Agree	4	4.47	Agree	3
Composite Mean	**4.27**	**Agree**		**4.50**	**Strongly Agree**		**4.39**	**Agree**	

The table shows the enhancement of using Google Application Tools by the leader's performance in terms of time management. Public and private leaders find that the integration of various Google Application Tools contributes to time efficiency in their daily work tasks which obtained the weighted mean of **4.56** with verbal interpretation of Agree on rank number **1**. This implies that leaders are more effective at managing their time to complete tasks and perform better.

Moreover, leaders think that using Google Application Tools supports their time management even more because of working remotely or in a virtual environment which obtains the weighted mean score of **4.54** with Strongly Agree verbal interpretation on rank number **2**. This implies that leaders can still operate more efficiently and are able to effectively manage their time despite the distance between them and their teammates.

Leaders believe that using Google Application Tools improved their overall time efficiency in finishing team duties or projects which obtains the weighted mean score of **4.47** with Agree verbal interpretation on rank number 3. This implies that leaders utilize Google Application Tools to do their jobs more quickly.

Furthermore, leaders arrange meetings and activities with their team, using Google Application Tools improve communication and efficiency in real time which obtains the weighted mean score of **4.23** with Agree verbal interpretation on rank number **4**. This implies that leaders can more easily set meetings onsite or even online due to the use of Google Application Tools.

Leaders perceived that with the used Google Application Tools, it has been simpler for them to keep track and manage their deadlines which obtains the weighted mean score of **4.13** with Agree verbal interpretation on rank number **5**. This implies that using Google Application Tools has made it easier for leaders to understand and monitor task deadlines.

The composite mean obtained a score of **4.39** with verbal interpretation of **Agree**. This implies that leaders find it easier to use Google Application Tools to manage their time at work, even completing things faster than usual and setting up meetings with their teammates despite the team members' distances from one another.

3. **The level of effectiveness of using Google Application Tools in enhancing selected public and private school leader's performance in terms of Technological Advancement, Job Performance, and Resolving Work Issues.**

Table 3.1
The level of effectiveness of using Google Application Tools in enhancing leader's performance in terms of Technological Advancement

Indicators	Public Leaders			Private Leaders			Total		
Technological Advancement	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**
3.1.1 Has the use of Google Application Tools enhanced your technological knowledge?	4.48	Agree	1.25	4.63	Strongly Agree	4	4.56	Strongly Agree	3
3.1.2 Do you think using Google Application Tools	4.48	Agree	1.25	4.68	Strongly Agree	1.5	4.58	Strongly Agree	1

would make it easier for you to learn about the next modern aspects of technology?									
3.1.3 Have Google Application Tools improved your computer literacy?	4.48	Agree	1.25	4.65	Strongly Agree	3	4.57	Strongly Agree	2
3.1.4 Do you think that, even with today's technological advancements, Google Application Tools are secure to protect the data from your work?	4.48	Agree	1.25	4.60	Strongly Agree	5	4.54	Strongly Agree	4
3.1.5 Have you gained confidence in your ability to use technology, especially Google Application Tools for work-related tasks?	3.95	Agree	5	4.68	Strongly Agree	1.5	4.32	Agree	5
Composite Mean	**4.37**	**Agree**		**4.65**	**Strongly Agree**		**4.51**	**Strongly Agree**	

The table shows the level of effectiveness of using Google Application Tools in enhancing leader performance in terms of Technological Advancement. Public and private leaders think that using Google Application Tools would make it easier for them to learn about the next modern aspects of technology which obtained the weighted mean of **4.58** with verbal interpretation of Strongly Agree on rank number **1**. This implies that leaders think they can stay up to date with emerging, trendy forms of technology.

Moreover, leaders believe that using Google Application Tools improved their computer literacy which obtains the weighted mean score of **4.57** with Strongly Agree verbal interpretation on rank number **2**. This implies that leaders feel that by utilizing Google Application Tools, they can use computers more effectively.

Leaders perceived that by the use of Google Application Tools it enhanced their technological knowledge which obtains the weighted mean score of **4.56** with Strongly Agree verbal interpretation on rank number **3**. This implies that leaders believe that through the use of Google Application Tools, they have improved their technological skills.

Furthermore, leaders think that, even with today's technological advancements, Google Application Tools are secure to protect the data from your work which obtains the weighted mean score of **4.54** with Strongly Agree verbal interpretation on rank number **4**. This implies that leaders think that by using Google Application Tools, their data is safe even with the wide range of technologies in use.

Leaders gained confidence in their ability to use technology, especially Google Application Tools for work-related tasks which obtains the weighted mean score of **4.32** with Agree verbal interpretation on rank number **5**. This implies that leaders believe that

they are now more capable in using modern technologies through the use of Google Application Tools.

The composite mean obtained a score of **4.51** with verbal interpretation of **Strongly Agree**. This implies that leaders think that by utilizing Google Application Tools, they have improved their computer skills and are able to keep up with emerging technologies.

Table 3.2
The level of effectiveness of using Google Application Tools in enhancing leader's performance in terms of Job Performance

Indicators	Public Leaders			Private Leaders			Total		
Job Performance	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**
3.2.1 To what extent do you think Google Application Tools help you complete tasks and work more efficiently?	4.48	Agree	1.33	4.40	Agree	5	4.44	Agree	3
3.2.2 Has utilizing Google Application Tools for task delegation and team collaboration enhanced your performance at work?	4.48	Agree	1.33	4.48	Agree	4	4.48	Agree	2
3.2.3 Do you think that using Google Application Tools has made your work easier?	3.95	Agree	4.5	4.55	Strongly Agree	1.5	4.25	Agree	4
3.2.4 Has using Google Application Tools made you more productive at work?	3.95	Agree	4.5	4.53	Strongly Agree	3	4.24	Agree	5
3.2.5 In light of Google Application Tools' assistance, how satisfied are you with the work you've done?	4.48	Agree	1.33	4.55	Strongly Agree	1.5	4.52	Strongly Agree	1
Composite Mean	**4.27**	**Agree**		**4.50**	**Strongly Agree**		**4.39**	**Agree**	

The table shows the level of effectiveness of using Google Application Tools in enhancing leader performance in terms of Technological Advancement. Public and private leaders perceived that In light of Google Application Tools' assistance, they are satisfied with the work they've done which obtained the weighted mean of **4.52** with verbal interpretation of Strongly Agree on rank number **1**. This implies that leaders believe that they are able to perform their tasks better by utilizing Google Application Tools.

Moreover, leaders utilizing Google Application Tools for task delegation and team collaboration enhance their performance at work which obtains the weighted mean score of **4.48** with Agree verbal interpretation on rank number **2**. This implies that the usage of

Google Application Tools made it simpler for leaders to distribute work to their team members.

Leaders think that Google Application Tools help them complete tasks and work more efficiently which obtains the weighted mean score of **4.44** with Agree verbal interpretation on rank number **3**. This implies that leaders think using Google Application Tools will enable them to complete their work more quickly.

Furthermore, leaders think that using Google Application Tools has made their work easier which obtains the weighted mean score of **4.25** with Agree verbal interpretation on rank number **4**. This implies that leaders think using Google Application Tools will make it easier for them to complete their work.

Leaders perceived that using Google Application Tools made them more productive at work which obtains the weighted mean score of **4.24** with Agree verbal interpretation on rank number **5**. This implies that leaders became more prolific at work by using Google Application Tools.

The composite mean obtained a score of **4.39** with verbal interpretation of **Agree**. This implies that using Google Application Tools has helped leaders work more efficiently, communicate with colleagues more effectively, and complete tasks more quickly.

Table 3.3
The level of effectiveness of using Google Application Tools in enhancing leader's performance in terms of Resolving Work Issues

Indicators	Public Leaders			Private Leaders			Total		
Resolving Work Issues	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**	**WM**	**V.I**	**Rank**
3.3.1 Are you satisfied with how Google Application Tools is helping you with your work?	4.48	Agree	1.33	4.63	Strongly Agree	2	4.56	Strongly Agree	1
3.3.2 Has making use of Google Application Tools made it simpler for you to communicate with others?	4.48	Agree	1.33	4.10	Agree	5	4.29	Agree	4
3.3.3 Does using Google Application Tools make attending meetings and seminars simpler for you?	3.95	Agree	4.5	4.78	Strongly Agree	1	4.37	Agree	3
3.3.4 Have you solved your lack of knowledge when it comes to technology using Google Application Tools?	3.95	Agree	4.5	4.30	Strongly Agree	4	4.13	Agree	5

3.3.5 Has the use of Google Application Tools improved the effectiveness of your work?	4.48	Agree	1.33	4.60	Agree	3	4.54	Strongly Agree	2
Composite Mean	**4.27**	**Agree**		**4.48**	**Agree**		**4.38**	**Agree**	

This table shows the level of effectiveness of using Google Application Tools in enhancing leader performance in terms of Technological Advancement. Public and private leaders are satisfied with how Google Application Tools is helping them with their work which obtained the weighted mean of **4.56** with verbal interpretation of Strongly Agree on rank number **1**. This implies that leaders think Google Application Tools are beneficial to them in their work.

Moreover, with the use of Google Application Tools leaders improved the effectiveness of their work which obtains the weighted mean score of **4.54** with Strongly Agree verbal interpretation on rank number **2**. This implies that leaders think Google Application Tools has helped them become more productive at work.

Leaders believed that using Google Application Tools make attending meetings and seminars simpler for them which obtain the weighted mean score of **4.37** with Agree verbal interpretation on rank number **3**. This implies that the adoption of Google Application Tools has made it simpler for leaders to attend meetings and seminars both in person and virtually.

Furthermore, with the use of Google Application Tools leaders made it simpler to communicate with others which obtain the weighted mean score of **4.29** with Agree verbal interpretation on rank number **4**. This implies that it has become easier for leaders to contact their team members due to the use of Google Application Tools.

Leaders perceived that by using Google Application Tools solved their lack of knowledge when it comes to technology which obtains the weighted mean score of **4.13** with Agree verbal interpretation on rank number **5**. This implies that leaders have become better when it comes to using technology because of Google Application Tools.

The composite mean obtained a score of **4.38** with verbal interpretation of **Agree**. This implies that using Google Application Tools helps leaders handle issues more rapidly when they are at work.

4. **Is there a significant difference between selected public and private school leader's performance in using Google Application Tools?**

Table 4.1
The enhancement of using Google Application Tools by the leader's performance in selected public and private schools in terms of Managerial Skills, Career Innovation, and Time Management

Independent Samples T-Test

Independent Samples T-Test

		Statistic	df	p	Mean difference	SE difference
B	Student's t	0.0681 [a]	4.00	0.949	0.0133	0.196
	Mann-Whitney U	3.00		0.700	−0.130	

Note. H_a $\mu_{Public} \neq \mu_{Private}$

[a] Levene's test is significant ($p < .05$), suggesting a violation of the assumption of equal variances

Assumptions

Homogeneity of Variances Test (Levene's)

	F	df	df2	p
B	11.0	1	4	0.030

Note. A low p-value suggests a violation of the assumption of equal variances

P-Value = 0.951646 is greater than the Significant level of 0.05, this indicates that the result is not statistically significant. It fails to reject the null hypothesis. In simpler terms, there isn't enough evidence to conclude that there's a significant difference between the two variables.

Table 4.2
The level of effectiveness of using Google Application Tools in enhancing selected public and private school leader's performance in terms of Technological Advancement, Job Performance, and Resolving Work Issues

Independent Samples T-Test

Independent Samples T-Test

							95% Confidence Interval	
		Statistic	df	p	Mean difference	SE difference	Lower	Upper
B	Student's t	−3.80	4.00	0.019	−0.240	0.0632	−0.415	−0.0646
	Welch's t	−3.80	3.34	0.026	−0.240	0.0632	−0.430	−0.0502
	Mann-Whitney U	0.00		0.077	−0.230		−0.380	−0.110

Note. H_a $\mu_{Public} \neq \mu_{Private}$

Assumptions

Homogeneity of Variances Test (Levene's)

	F	df	df2	p
B	1.50	1	4	0.287

Note. A low p-value suggests a violation of the assumption of equal variances

P-value of 0.02642 < alpha (0.05): This indicates that the result is statistically significant. It rejects the null hypothesis in favor of the alternative hypothesis. Therefore, it concludes that there is a significant difference between the two variables that are being compared.

DISCUSSION

The researcher conducted this study to know the leadership performance between the public and private schools leaders in accordance with the fact that two types of organizations may have different strategies in managing their team. The proponent found out that leaders from public and private schools can keep up with the use of modern technologies and they both know how to use Google Application Tools regardless of their age, gender, school types, and their length of leading experiences. Leaders know how to communicate well with their teammates with the use of modern technologies and utilize the features of Google Application Tools well. Perhaps with the development of technology, the Department of Education is able to stay up to date with the latest technology trends and make sure that the quality of education will be better as technology also develops. As said by Santos, J., school leaders utilize Google application tools to

enhance their leadership performance and explore the adoption, challenges, and benefits of using Google Application Tools such as Google Drive, Google Classroom, and Google Meet. The study indicates that school leaders in both public and private schools increasingly rely on Google application tools to streamline administrative tasks, improve communication with stakeholders, and foster collaboration among teachers and staff members.

Conclusions

With reference to the data collected, the following conclusions were drawn by the researcher:

1. The researcher concluded that age, gender, school types, and leading experiences are not the basis for keeping up with modern technologies when it comes to leading an organization. Leaders can easily keep up with new trends in technology to make their work easier and to be more efficient in leading their team members.

2. The public and private leaders perceived that they improved their leadership by using Google Application Tools. It has become easier for them to be more effectively organized in their workload and promote team communication, become more resilient to change, and find it easier to use Google Application Tools to manage their time at work, even completing things faster than usual and setting up meetings with their teammates despite the team members' distances from one another.

3. The public and private leaders agreed with the effectiveness of using Google Application Tools they think that by utilizing Google Application Tools, they have improved their computer skills and are able to keep up with emerging technologies, helping them work more efficiently and communicate with colleagues more effectively, and complete tasks more quickly and help leaders handle issues more rapidly when they are at work.

4. Given the performance of two groups of respondents with regards to the cited variables related to enhancing leadership through Google Application Tools are generally showing no significant difference, it could be concluded that the public and private leaders possess common and similar capabilities in adapting to new technology trends that resulted in a better way of leading.

Recommendations

The data obtained, led in the formulation of the following recommendations and suggestions.

1. Conduct a similar study and use public and private leaders from other districts or divisions.
2. It could also be recommended that the specific division may conduct an evaluation of the leader's performance to assess if there are things that should be improved and if there are new technology trends that should be known.

3. The proponents also recommended using other variables in identifying other factors or effects in utilizing the Google Application Tools by the leaders.
4. It could also be suggested to conduct a study like this and use other respondents such as teachers and students.
5. The leaders should always be ready for technological change for them to quickly adopt when there is a new technology platform that is needed to apply in the organization.
6. Leaders should attend programs or seminars associated with new trends of technology to nurture their technological skills.
7. The researchers recommended to the future researchers to use references from national libraries to grasp more resources about enhancing leadership through Google Application Tools.
8. Future researchers must provide more useful information about the study by using other types of methodology in data gathering procedure.
9. Future researchers must also conduct the study in other regions to have at least different areas of knowledge and open up to different opinions and new ideas to the respondents.
10. The researcher recommended to the future researchers to widen the respondents to gather more ideas, opinions, perceptions and insights for the betterment of the study.

Compliance with Ethical Standards

All procedures performed by the researcher in this study were formally informed and asked the permission of the school leaders. The proponents also ensure that the respondents are willingly participating in gathering the data and the respondents had given the right to withdraw their participation at any time. The respondents' participation in the study and responses to the questions are confidential. Data used in reports will be presented in a manner that prevents identifications of individuals and protects the respondent's individual identity. The references used in this study were provided by the researchers to prevent plagiarism, and the study's findings were only utilized for research.

Acknowledgments

The proponent would like to extend his profound gratitude and appreciation to the following person who helped him for making this project possible.

First and foremost, the Almighty God for the guidance, determination and wisdom he gave the proponent for the completion of this study.

The researcher would like to express his sincere gratitude to Liseo V. Vergara DEM, Public Schools District Supervisor, SDO Sto.Tomas City for guiding and sharing his knowledge to the researcher.

Ma’am Josephine Dimaplis, his statistician for helping the researcher to accurately interpret the collected data of this study.

Dr. Dennis G. Caballes, his subject teacher at National Teachers College who contributed his knowledge that helped the researcher, accomplished this study.

To the family, friends, and colleagues who are always there when they are needed the most, for giving inspiration and support. And to those people whom they meet along the way that make this study become successful, a warmth thanks to all of you.

ABSTRACT

This action research focuses on enhancing learner retention in biology through visual-based pedagogy, particularly focusing on Grade 10 students at Musuan Integrated School (MIS) during the 2023-2024 school year. The rationale stems from the uncertainties post-pandemic and the need for improved teaching methodologies in biological education. The study aligns with Philippine Education Program goals and research insights emphasizing contextualized instructional materials and the efficacy of visuals in promoting learning. The research utilized a Two-shot Post-test design with mixed methods, integrating quantitative data from a 40-item multiple-choice test and qualitative data from semi-structured interviews. The study aimed to assess if significant differences existed in pre-test and post-test scores after implementing visual-based pedagogy. Results revealed a substantive increase in post-intervention assessment scores, indicating statistically significant improvements in conceptual mastery and retention. Students' perceptions highlighted the positive impact of visual-based pedagogy on learning environments, collaborative learning, and effective outcomes. These findings underscore the efficacy of visual aids and interactive activities in fostering deep comprehension and knowledge retention, aligning with previous research findings. Recommendations include incorporating visual-based pedagogy and technology with diverse visuals such flowcharts, diagrams, pictures, computer simulations, video presentations. This can lead to fostering positive learning environments, emphasizing

hands-on activities, and continuous support for sustained effectiveness. Further research and professional development are encouraged to explore and implement innovative strategies in visual-based instruction for enhanced learning outcomes.

Keywords: *Visual-Based Pedagogy, Retention, Perception, Pre-Test, Immediate Post-Test, Delayed Post.*

INTRODUCTION

The pandemic profound modification and the current status of the learners in this post-pandemic setting are currently indefinite and do not show the right succession of clear improvement of the teaching-learning process especially in the field of biological education and its multidisciplinary concept. Biology is the most visually appealing of all sciences. However, many teaching aids can be employed extensively in the teaching of biology to bring the subject to life in the students' minds by developing animated mental images (T. Demissie et al., 2016). The Philippine Education Program has strengthened academic foundations with local and accessible resources, aligning with the RA 10533 (Enhanced Basic Education Act of 2016) requirements for a contextualized and global curriculum. In the insights of (LPT, 2020) & (Garin et al. 2017). Utilizing contextualized instructional materials unlocks students' maximum learning potential, leading to improved academic performance. Furthermore, poor teaching strategies and inadequate resources result in less engagement in lessons and using visual aids, audio-visual tools, and tangible materials enhances students' understanding capabilities, leading to impressive learning outcomes (Rivera & Sanchez, 2020) and (Kaminski & Sloutsky, 2020).

According to Cuban (2014), it suggests that 83% of what we learn is through sight, making it a dominant factor. Additionally, people tend to remember 30% of what they see, emphasizing the effectiveness of visuals. Therefore, it is morally right to engage students in the teaching and learning process by stimulating them or keeping them engaged. Moreover, Visual Based Pedagogy can be a number of different types of educational resources that be also views as beneficial instructional and learning visual aids, including like motion pictures, video games, television shows, and synchronized audio-slide projectors, PCs, computer-assisted instructions, and more equipment that multimedia promotes quicker communication in foreign languages (Ahmad, 2016). However, the majority of educators in Musuan Integrated School (MIS) use less sufficient visual aids as part of their teaching strategies. This has a direct impact on learning outcomes and could create obstacles for the teaching and learning process.

In the study of Adebisi et al. (2021). It's highlighted that the idea of utilizing science learning materials to teach biology concepts has a notable impact on enhancing students' ability to retain information and ultimately boosts the academic performance of senior high school students. According to Jamal Raiyn (2016), visual-based pedagogy represents an impactful classroom learning strategy that places a strong emphasis on conveying information through visual mediums, including images, diagrams, flowcharts, and

interactive simulations. The teacher's role involves overseeing the learning process and determining the most effective means to enhance higher-order thinking (HOT) skills. Employing this approach can significantly aid students in memorizing key biological concepts and comprehending complex biological processes (Sumarmin R., 2018).

Analyzing the differences in retention results achieved through visual-based pedagogy can be instrumental in shaping action plans and fostering educational innovation. By comparing the performance of students with higher and lower retention rates, educators can pinpoint effective strategies used by high-retention students and share these practices more widely. Furthermore, Shabiralyani et al. (2015) emphasize that visual aids play a crucial role in encouraging students during the learning process, ensuring better understanding of lessons, generating interest in the subject matter, aiding in the permanent retention of learned materials, enhancing students' vocabulary, and providing direct experiences for the students.

The results of this research have value for learners, teachers, and school administrators as they shed light on the crucial role of the learning environment in nurturing students' knowledge and skills. The purpose of this study is to enhance the retention of biology concepts through visual-based pedagogy. Identify if there is a significant difference in the 1st and 2nd post-test scores of students following the implementation.

Research Questions

The study investigated the effects of using Visual-Based Pedagogy on Enhancing Retention of Biology Concept on the Grade 10 learners of Musuan Integrated School, in the third quarter of the School Year 2023-2024.

Specifically, it sought to answer the following questions:

1. What is the level of students’ retention of biology concepts when expose to Visual-Based Pedagogy in terms of:
    a. Pre-test?
    b. Immediate Post-test?
    c. Delayed Post-test?
2. Is there a significant difference on students’ retention in Biology when exposed to Visual-Based Pedagogy in terms of:
    a. Pre-test compared to Immediate post-test scores.
    b. Pre-test compared to Delayed post-test scores.

METHODOLOGY

The study employed a Two-shot Post-test design to gauge the participants' retention of the subject matter. Before the intervention, a pre-test was administered, followed by a post-test. After that, a second shot post-test was administered after a two-week interval.

A. Participants and/or Other Sources of Information and Data

Research Design

The study employed a mixed method research design utilizing both quantitative and qualitative data gathering procedures. This study utilized a Two-shot post-test and focused on the systematic collection, analysis, and interpretation of numerical data to address research questions or test hypotheses. Meanwhile, qualitative data on the perceptions of learners with the use of this approach was also explored. It utilizes thematic analysis where themes and core ideas were sought from a semi-structured interview questionnaire given to the learners.

In gathering information, the researchers utilized forty (40) item multiple choice tests focusing on the concept of biology specifically the Endocrine System for Grade 10 students during the first semester of the school year 2023-2024.

Locale of the Study

Figure 1. *Map of MIS, showing the research locale.*

The Community-Based Action Research (CBAR) that was conducted took place at Musuan Integrated School (MIS), located in Musuan, Maramag, Bukidnon, Philippines. MIS administered a comprehensive educational program, encompassing kindergarten through junior high school, and operated under the auspices of the Department of Education. Renowned for its exemplary track record in both academic and non-academic pursuits, MIS stood as a beacon of educational excellence in the region.

Participants of the Study

The participants of the study were the Grade 10 students under the Enhanced K–12 Basic Education Curriculum of Musuan Integrated School (MIS) for the school year 2023–2024. The researchers only chose the subtopics of Endocrine System prior to focusing on biology concepts in the implementation of a visual-based pedagogy intervention. The study only covered the final term of the second semester.

Instrumentation

The researcher designed and constructed a forty (40) item multiple-choice test to measure the level of retention of the learners. A two-way table of specification (TOS) was prepared prior to the making of the test items. The test was subjected to content validation by an expert in biology to determine if the constructed test items would be appropriate to test the learners' retention.

The retention of students in statistics and probability was analyzed and interpreted using the table below. The DepEd Order No.8 series of 2015 grading scale with the corresponding descriptor was modified in interpreting the retention level of the students.

Percent Scale	Descriptive Rating	Qualitative Description
90%-100%	Outstanding	Very High Retention
85%-89%	Very Satisfying	High Retention
80%-84%	Satisfying	Moderate
75%-79%	Fairly Satisfying	Low Retention
Below 75%	Did Not Meet Expectation	Very Low Retention

B. Data Gathering Methods

The following steps were taken to gather the needed data from identified participants: (1) Approval was sought from IERC for the conduct of the study. (2) Permission was obtained from the school head in order to conduct the action research. (3) Then the researchers oriented the students on how the visual-based pedagogy would be implemented.

Before implementing the intervention, a pre-test was administered to the intact Grade 10 students. Subsequently, a visual-based pedagogy intervention was employed to enhance retention of complex biology concepts. Following the intervention, the students underwent a post-test after a two-week interval the delayed post-test then followed.

A semi-structured interview questionnaire was also given to the learners to determine their perception on the use of visual based pedagogy.

Data Analysis

Descriptive statistics were employed to assess the level of retention among learners both before and after the intervention. To ascertain if a significant difference existed in the retention of learners before and after the intervention, a paired t-test was utilized.

(Ping & Renandya, 2020) explain that the t-test is utilized to compare two sets of scores, determining whether the average score (referred to as the mean score) of the first set differs significantly from that of the second set. Descriptive statistics is used in this research because it best describes and summarizes the data by providing an overview of the important characteristics of the sample (George, 2023).

For the qualitative data, a thematic analysis from the students' responses was utilized to determine the student's perception on the use of Visual Based Pedagogy in Biology instruction.

RESULTS

This section presented the analysis and interpretation from the data gathered in determining the retention of the students using the visual-based pedagogy on the Grade 10 learners of Musuan Integrated School for the School Year 2023-2024. The groups of data presented in this section were based on the order of action research questions posed in this study.

For Quantitative Result:

Level of Student's Retention Before and After the Intervention

Table 1 presents the students' prior knowledge and retention before and after the intervention.

Table 1. Students Retention Before and After the Intervention.

Percent Scale	Pre-Test		Immediate post-test		Delayed post-test		Qualitative Description
	N	%	N	%	N	%	
90%-100%	0	0	1	2	2	3	Very High Retention
85%-89%	0	0	1	2	7	12	High Retention
80%-84%	0	0	8	13	12	20	Moderate
75%-79%	0	0	16	27	10	17	Low Retention
74%- Below	60	100	34	57	29	48	Very Low Retention
Mean	11.97		27.65		29.07		
SD	3.46		4.26		4.36		

Difference on Learner's pre-test, Immediate Post-test and Delayed Post-test

Table 2. Difference of the Learners pre-test, Immediate Post-test and Delayed post-test.

Pair	Mean	SD	t	Sig (2-tailed)
pre-test- Immediate Post-Test	-15.68	5.31	-22.88	.000
pre-test- Delayed Post-Test	-17.10	5.33	-24.86	.000

**Significant at P< 0.05*

Difference on Learner's Immediate Post-test and Delayed Post-test

Table 3. Presents the difference of Immediate Post-test and Delayed Post-test.

Pair	Mean	Std. Deviation	t	df	Sig (2-tailed)
post-test_1 -post-test_2	-1.41667	1.63947	-6.693	59	.000

Significant at P< 0.05

For Qualitative Result:

Student's perception on the Use of Visual Based Pedagogy

Table 4. Major Themes and Core Ideas of the Student's Perception on the Use of Visual Based Pedagogy.

Major Themes	Sub Theme	Core Ideas
Effective Learning Outcome	Positive Learning Environment	• Learning is fun and interesting • Group collaboration
	Improve Retention Level	• Better understanding through Contextualize content • Lessons made easier to remember

DISCUSSION

Quantitative Discussion

As shown in table 1, all of the student's pre-test score was below 74% indicating a qualitative interpretation of Very Low Retention with an overall mean score of 11.97 (SD=3.469). This might be attributed to student's little information and less prior knowledge on the lessons before receiving a formal instruction using the strategic Visual Based Pedagogy. This result conforms to the report of Guskey and McTighe (2016), that pre-assessment is teachers' way of determining students' prior knowledge before the instruction is given.

The tabulated data presents compelling evidence of a substantive upsurge in

learners' post-intervention assessment scores. Notably, a mean score of 27.65 (SD=4.26) indicates a statistically significant enhancement in conceptual mastery following the implementation of visual-based pedagogy. Furthermore, the persistence of elevated scores in the delayed post-test, averaging at 29.07 (SD=4.36) even after a two-week interval, underscores the durability of the observed learning gains. These findings resonate with the efficacy of visual-based instructional strategies in fostering deep comprehension and knowledge retention. The outcomes not only underscore the immediate impact of the intervention but also provide empirical validation for its sustained effectiveness in promoting enduring conceptual understanding among learners.

The study's outcomes suggest that utilizing visual-based teaching methods is highly effective in improving information retention, especially for understanding complex biology topics. The comparison between immediate and delayed post-test scores highlights a notable improvement, indicating a high level of retention among students following the intervention. These findings are in line with research by Vanichvasin P (2021), which revealed that students exposed to visual-based learning demonstrate enhanced attention spans, comprehension abilities, and retention skills. Two weeks following the immediate post-test, a delayed post-test was administered, yielding positive results. Additionally, visual-based approaches contribute to memory enhancement by aiding in the recall, retention, and retrieval of course material. It's worth noting that such methods also stimulate greater student motivation, interest, and satisfaction, ultimately resulting in improved memorization and overall academic performance.

As reflected in the table 2, the negative mean difference indicated that the mean score of learners is higher in the post-test compared to the pre-test scores of learners. This means that the use of visual based strategies has been beneficial to the learners. In addition, it can be noted that the difference between the pre-test and post-test scores of learners resulted in a p-value of 0.000 which is significant at $p<0.05$. The result shows that there is a significant difference in the scores of the learners before and after the intervention is employed so therefore the null hypothesis is rejected.

This result is congruent to the study of Pem K (2019) states those engaged in visual-based learning methods show significant advancements in higher-order cognitive abilities, critical thinking prowess, and retention of knowledge especially in the field of biology.

As reflected in the table 3, the negative mean difference indicates that the mean scores of the Delayed Post-test compared to the immediate post-test are higher. This indicates that the students have retained the information in the given 40 item test.

In addition, it can be noted that the difference between the immediate post-test scores and the delayed post-test scores have resulted in a p value of 0.000 which is significant at $p<0.05$. This means that there is a significant difference between the scores of the learners after a two-week interval.

This result can be due to the fact that the researchers did not alter a change in the

test questionnaire in the delayed post-test which contributed to the student's retention rate. In Federer's (2014) study, an intriguing finding emerged in which the familiarity of questions, especially those enriched with visual elements, significantly shaped students' responses. This implies that the order of questions might not wield as much influence on scores as factors like question familiarity and the presence of visual aids do. Consequently, the study's outcomes shed light on the efficacy of visual-based pedagogy in student learning. The observed improvement in students' overall scores across pre-test, immediate post-test, and delayed post-test underscores the profound impact of such interventions.

Qualitative Discussion

Positive Learning Environment

Visual-based pedagogy made the lesson captivating for learners. It also encouraged active participation in discussions, especially given the visually appealing nature of the endocrine system topic. Students found video simulations in the discussion to be both motivating and effective. Additionally, they enjoyed engaging in hands-on activities such as "Label me, complete me," which served to assess their prior knowledge. An unlabeled illustration of the endocrine system was provided for identification purposes. Furthermore, a group activity involved creating posters depicting potential problems resulting from endocrine system dysfunction, which were then presented to the class.

The researcher's interest was piqued by the participants' responses in the questionnaire. Their answers indicated that the activities made the subject interesting and not boring. Similarly, another student recalled, *"As a student, the experience of identifying and labeling the anatomy of the endocrine system and its functions was enjoyable. Our biology class is fun because of group activities where we can share knowledge with each other."*

This result is similar to the findings of Bulunuz (2011) who revealed that student's involvement through activities were found exciting, fun and interesting and that students who found the lessons fun and interesting are highly motivated as it creates a positive learning environment thus enhances their participation and engagement of learners in the class (Fallon, Walsh and Prendergast, 2013). This agrees with the work of Gillani (2009) who discovered that when instructional technology is applied as a supplementary approach in teaching of Biology; the students of the experimental group were more attentive because the use of instructional technology stimulated interest and enhanced the motivational level of students. Therefore, the students found learning enjoyable as they collaborated with their peers or group mates, fostering engagement and active participation in group activities. This collaborative approach likely enhanced their understanding of the material through shared insights and perspectives, contributing to a more comprehensive learning experience.

Improve Retention Level

An integral discovery from this study underscores the effectiveness of employing visual-based pedagogy as an intervention in the learning process. Utilizing modern visual aids and leveraging technology to deliver instructional materials not only encourages active student participation but also significantly enhances retention of key concepts. Visual stimuli have been shown to capture students' attention more effectively than traditional teaching methods, leading to increased retention of key concepts. Additionally, the use of visuals can help make complex information more understandable and memorable for students. Overall, incorporating visual-based pedagogy can greatly enhance the learning experience and improve students' ability to grasp and retain important information.

This concept is related to the statement of three students who similarly cited that, "*By implementing visual based pedagogy, there are many lessons that I figured out clearly".* "*The activities conducted in this subject helped me a lot in my studies, because it helped me understand the topics very well".* "*Nakatabang jud siya, kay masabtan man og maayo ang mga functions sa kada organs responsible for secreting hormones especially kay naay pictures and video presentations".*

This agrees with the work of Shabiralyani et al. (2015) emphasizes that visual based play a crucial role in encouraging students during the learning process, ensuring better understanding of lessons, generating interest in the subject matter, aiding in the higher retention of learned materials, enhancing students' vocabulary, and providing direct experiences for the students. Additionally, Cope (2014) stated that active participation during instruction increases learning and retention. Students learn more efficiently by participating in instruction. To further support this idea, Iji, (2002) and Chianson (2014), stated that retention in biology is not acquired by mere rote learning but through appropriate instructional delivery approach. In conclusion, utilizing visual-based pedagogy with the integration of visual aids such as videos, images, diagrams, and interactive multimedia presentations to convey information and concepts to students. When combined with technology, such as interactive whiteboards, educational software, and online resources, these visual tools can offer dynamic significant benefits in terms of student learning and retention.

Conclusions

Based on the gathered results from the study, the researchers concluded the following:

The results highlight the effectiveness of visual-based pedagogy in improving students' retention. The findings support the use of visual aids and interactive activities to enhance learning outcomes. Students' positive perception of the approach underscores the importance of creating an engaging learning environment. The study aligns with previous research, emphasizing the benefits of visual-based learning in attention span, comprehension, retention, and memory.

Recommendations

Based on the results and discussion, the following recommendations are made:

1. Educators should incorporate visual-based pedagogy by using visual aids like charts, diagrams, simulation, and video presentation to enhance learning outcomes.
2. Creating a positive learning environment through collaboration and interactive discussions can further enhance students' engagement and participation.
3. Emphasize the use of hands-on activities to facilitate better understanding and retention of the content.
4. Provide continuous support and reinforcement to sustain the effectiveness of visual-based pedagogy.
5. Further research and professional development should be pursued to explore more effective strategies and stay updated with advancements in visual-based instruction.

Compliance with Ethical Standards

1. We, CHRISCENTE JOSE CABUNGCAL, CARLA MARIE CAPUYAN, MA. THERESA ISABEL DECHOSA, DARAH FAYE SABIO, CATHERINE SALDUA, the researchers of the study entitled **"ENHANCING RETENTION OF BIOLOGY CONCEPT THROUGH VISUAL-BASED PEDAGOGY"**. This form is part of a process called "informed consent" to allow you to understand this study before deciding whether or not to take part. This study is being conducted by the researchers in Musuan Integrated School, Musuan, Maramag, Bukidnon. Any information you provide will be kept anonymous. The researchers will not use your personal information for any purposes outside of this research study. Also, the researchers will not include your name or anything that could identify you in the study reports. Pieces of information provided by the participants will be treated with utmost care and held confidentiality.
2. The participation of the participants is completely voluntary and may withdraw from the study at any time. The study is completely anonymous; therefore, it does not require them to provide their name or any other identity information. Furthermore, the research data will be collected is ensured to be for academic purposes only and will remain confidential.
3. We hereby declare that we do not have any personal conflict of interest that may arise from our application and submission of our research proposal. We understand that our research proposal may be returned to us if found out that there is conflict of interest during the initial screening as per (insert RMG provision). Further, in case any form of conflict of interest (possible or actual) which may inadvertently emerge during the conduct of our research, we will duly report it to the research committee for immediate action. We understand that we may be held accountable by the Department of Education and (insert grant mechanism) for any conflict of interest which we have intentionally concealed.

4. Plagiarism was strictly avoided by ensuring that all sources and references were properly cited and original contributions were clearly distinguished. Furthermore, there was no bias in the interpretation of the findings. The data was analyzed impartially, and conclusions were drawn based solely on the evidence collected. Finally, the results of the study were used purely for research purposes, contributing to the academic and scientific understanding of the subject matter, with no intention for commercial exploitation.

Acknowledgments

First and foremost, the researchers would want to express their gratitude to the Almighty God for providing them with the resources, wisdom, and favors necessary to carry out the research effectively. The following people have also helped the researchers out, and they would like to express their sincere gratitude to them:

Ms. Raihana Toke, whose encouragement, advice, and insights significantly improved our action research paper.

Ms. Garin Boiser, our friendly and approachable research adviser, for sharing valuable ideas and suggestions that enhanced the study's significance. We also express ongoing appreciation for her interest in the subject, feedback, and encouragement.

Mr. Milbert B. Bernel, for his expertise in proofreading and reviewing the research data and Cristila Marie Ibonia for helping in statistical analysis and running the data.

Grade 10 students of Musuan Integrated School, for their active cooperation and participation during the conduct of the study.

Researchers' family, for their unwavering love, support, and financial assistance, serving as our greatest sources of inspiration and motivation.

Block mates and friends, who faced similar challenges during the research process, and were always there to lend a helping hand and uplift each other.

EVALUATING PROFIT DISPARITIES IN SELLING VEGETABLES: ROLLING STORE VS MARKET STALL

Trinidad De Leon Jose

College of Business Administration and Accountancy, AMA University, Quezon City, Philippines

https://doi.org/10.5281/zenodo.11479529

ABSTRACT

In examining profit disparities between rolling stores and market stalls in the vegetable retail sector, several factors emerge as pivotal. The rolling store, characterized by mobility and flexibility, offers convenience to customers by reaching them directly in their neighborhoods. Conversely, market stalls operate within fixed locations, providing stability but potentially limiting customer accessibility. Profit differentials stem from operational costs, market dynamics, and consumer behavior. Rolling stores incur lower overhead costs, primarily due to reduced infrastructure and operational expenses compared to market stalls. However, this advantage may be offset by higher transportation costs associated with frequent mobility. Market stalls benefit from a consistent customer base and established foot traffic, fostering predictability in sales volume. Nonetheless, they face competition from neighboring stalls and must contend with seasonal fluctuations. Consumer preferences play a crucial role in shaping profit differentials. While rolling stores offer convenience and proximity, market stalls often boast a wider variety of produce and the opportunity for interpersonal engagement. Consumer demographics and socioeconomic factors influence purchasing decisions, with convenience-oriented shoppers favoring rolling stores and those valuing variety and interaction gravitating towards market stalls. Furthermore, market competition and pricing strategies impact profit differentials. Rolling stores may leverage their mobility to target underserved areas or adjust prices based on demand elasticity. Market stalls, conversely, engage in price competition within a fixed location, necessitating differentiation through product quality or service.

Keywords: *profit disparities, rolling stores, market stalls, interpersonal engagement*

INTRODUCTION

There can be variations in terms of selling vegetables, which are rolling vegetable stores and market stalls (Manucdoc, 2019). In this study, the researchers are identifying which is more efficient in terms of sales. And, to know how rolling stores can be effective to entrepreneurs in selling their products. These issues can make it hard for entrepreneurs to make sales. Rolling stores can be a difficult method because sometimes, the products are not purchased by people, it is also more hassle because they are the ones that are finding their customers (Kennedy et a., 2009). On the other hand, a market stall can also be a hassle, because it only stays in one place. People struggle because they even need to go to their store to buy their products. Rolling Store might struggle to find more customers, so they should find a place that will attract people to buy their products and loyal customers. Also, to be earlier for the customers that are trying to find more viand for breakfast and lunch. On the other hand, market stalls can also be a hassle, market stall owners should find a more crowded area to gain more consumers that will buy their product. In the dynamic landscape of entrepreneurial ventures, the competition between various business models has always been a topic of significant interest and importance. One such intriguing juxtaposition is the comparison between "Rolling Stores" and "Market Stalls" in the context of profit disparities.

These two business models represent distinct approaches to retail and commerce, each with its own set of advantages and challenges. The "Rolling Store" concept entails mobile retail operations, often utilizing vehicles to bring products directly to consumers' doorsteps, providing convenience and accessibility. On the other hand, "Market Stalls" are stationary, often open-air setups in local markets, offering a more traditional shopping experience (Tulukan et al., 2024). This quantitative research seeks to delve into this comparative analysis, aiming to discover on the factors influencing the financial success of rolling stores in contrast to market stalls. By systematically assessing and interpreting the data, the researchers aim to provide valuable insights for entrepreneurs, and stakeholders in the retail industry, making a better understanding of the dynamic retail landscape in today's market-driven economy.

A market stall can be challenging because it only stays in one place, People struggle because they even need to go their store to buy their products (Yu and Pan, 2020). Rolling Store might struggle to find more customers, so they should find a place that will attract people to buy their products and loyal customers. Also, to be earlier for the customers that are trying to find more viand for breakfast and lunch. On the other hand, market stalls can also be a hassle, market stall owners should find a more crowded area to gain more consumers that will buy their product. The contribution of this study is to identify which one people would choose more, and which is more efficient between rolling store and market stalls. And, which the two of them gains more sales and profit. And to discover which of the two is more efficient if you're going to start a business. A rolling store or a market stall. Many past and present projects have aimed to increase children’s vegetable consumption by increasing children’s exposure to vegetables. For instance, gardening, distribution of free vegetable baskets to classrooms, and parental

initiative to consume fruits and vegetables improved the younger generation's preference (Holloway et al., 2023).

METHODOLOGY

The information about the research and sampling procedures utilized by the researcher is provided in this chapter. The research design employed, the data gathering techniques and the discussion of data analysis are shown in this chapter.

Research Design

This study used the explanatory-sequential method. This is a two-phased method of gathering data. The first phase involved collecting quantitative data, followed by the collection of qualitative data. Qualitative data was used to support and explain quantitative results.

Quantitative data collection was conducted using online survey questionnaires. Through this survey, the difficulties, challenges, lessons and how they handled different consumers were obtained and measured based on the responses of the vegetable marketers. The survey questionnaire also had interview questions which were open-ended. They were used to support quantitative data. The data collected were organized and interpreted.

Data Gathering Techniques

To gather the data needed, permission to conduct the study was sought first. A letter was sent to the authority requesting permission to conduct surveys using survey questionnaires to the respondents. After the permission was given, the researcher discussed personally with the school principal how the survey would be performed. The researchers will conduct their research by doing a Likert scale interview questions and accepting study protocols before the interview. To get material from a specific source, researchers must get permission first from the Curriculum chairman and School Principal. The collection of data involved two phases with each phase using a different set of tools. The first phase focused on the collection of quantitative data through survey questionnaires. The survey questionnaire was intended for vegetable marketers was composed of two parts. The first part is about determining the monthly profit of both stores, while the second part is determining how they overcome difficulties in terms of decrease in sales.

The second phase of the study focused on the gathering of qualitative data. Interview question forms were given to selected vegetable marketers. The interview questions aimed to discover the monthly profit of a rolling store and a market stall.

Sampling Procedures

In choosing the respondents of the study, Purposive Sampling will be used, because of a certain criterion that all respondents should be a vegetable store owner only. Likert scale method is to be conducted. There is 1 vegetable store owner-respondent each for rolling store and market stall in this study.

Data Analysis Scheme

Survey questionnaires were collected, tabulated, tallied, and analyzed. T-test was used to describe the Profit disparities of vegetable stores.

T-Test is to be used to determine the statistical significance of results, The researcher will employ the following statistical tools to summarize and interpret the numerical data of the study.

T-test. This statistic was used to describe the quantitative data and used the Paired Samples t-test to Compare means of two groups called Rolling Store and Market Stall.

Research Instrument

A carefully structured questionnaire was implemented to elicit the necessary information about the evaluation of the differences in the profit of a rolling vegetable store and market stall will be designed by the researchers to gather the data for this study.

RESULTS AND DISCUSSION

This chapter deals with the presentation, analysis and interpretation of the data collected and the results of the statistical treatment employed in the study with the purpose of describing the profit differences between a Rolling Vegetable Store and a Market Vegetable Stall.

Vegetables are an important part of the human diet and a major source of biologically active substances such as vitamins, dietary fiber, antioxidants, and cholesterol-lowering compounds. Despite a large amount of information on this topic, the nutritional quality of vegetables has not been defined. Historically, the value of many plant nutrients and health-promoting compounds was discovered by trial and error (Hounsome et al, 2008).

Vegetable crops show variable responses to stressful conditions with physiological, biochemical, metabolic and morphological changes that occasionally lead to changes in chemical composition and visual appearance of the final products. Eustressors are various biological, physical or chemical stressful factors that trigger the *signaling pathways* leading to a higher bioactive compounds content and quality

attributes of vegetable products. Therefore, its application could be a useful tool in modern horticulture towards fulfilling the agro-food industry and consumers' demands for high quality and functional vegetable products (Paul et al, 2018). Vegetables are horticultural crops that have a high market absorption. Modern market that is considered to have many advantages does not necessarily reduce consumers' shopping interest at traditional markets. Traditional markets appear to have different characteristics and visitor segments from modern markets. This is to determine the level of consumers' satisfaction of vegetables towards the marketing mix in the traditional markets (Yaqin et al, 2023). Farmers' markets are predominantly fresh food markets that operate regularly within a community where farmers and often retailers, sell produce and associated products directly to consumers. The variables affecting the determination of the sale price of vegetable which is constant over time in a supermarket. It focuses on the non-organic vegetables with a fixed selling price over time such as spinach, beet, and parsley (Miranda, 2017). To investigate and control quality, one must be able to measure quality-related attributes. Quality of produce encompasses sensory attributes, nutritive values, chemical constituents, mechanical properties, functional properties and defects. Instrumental measurements are often preferred to sensory evaluations in research and commercial situations because they reduce variations in judgment among individuals and can provide a common language among researchers, industry and consumers.

Presentation, Analysis and Interpretation of Data

This chapter deals with the presentation, analysis, and interpretation of the data collected and the results of the statistical treatment employed in the study to determine the monthly profit between the rolling vegetable store and market stall.

Table 1. Comparison of a rolling store and a market stall on attributes of their store and products.

Attributes of a Rolling Store and a Market stall	Rolling Store N = 1			Market Stall N = 1		
		SD	VD		SD	VD
A. Quality						
1. The vegetables in your store are consistently fresh.	3.00	0	A	3.00	0	A
2. The color of your vegetables positively influences customer purchasing decisions.	3.00	0	A	3.00	0	A
3. The texture of your vegetables distinguishes your store from competitors.	3.00	0	A	3.00	0	A
4. . The size options available in your store are enough for customers.	3.00	0	A	3.00	0	A
5. The size of your vegetables influences customer purchasing decisions.	3.00	0	A	3.00	0	A

Overall Mean	15	0	A	15	0	A
B. Price						
1. The pricing of vegetables in your store is perceived as fair by customers	4.00	0	SA	4.00	0	SA
2. The pricing aligns well with the economic preferences of your target customers.	3.00	0	A	4.00	0	SA
3. Customers feel they get value for money with the prices in your store.	3.00	0	A	4.00	0	SA
4. Your pricing strategy contributes positively to customer loyalty.	3.00	0	A	4.00	0	SA
5. Your store effectively suits the value of vegetables in relation to their prices.	3.00	0	A	4.00	0	SA
Overall Mean	16	0	A	20	0	A
C. Availability						
1. Your store maintains a consistent supply of a wide variety of vegetables.	3.00	0	A	3.00	0	A
2. Your store effectively manages and restocks inventory to minimize shortages.	3.00	0	A	3.00	0	A
3. Your store adapts well to seasonal changes in vegetable availability.	3.00	0	A	3.00	0	A
4. Your store communicates effectively with suppliers to ensure a steady source of vegetables.	3.00	0	A	3.00	0	A
5. Your store consistently has popular and in-demand vegetables in stock.	3.00	0	A	3.00	0	A
Overall Mean	15	0	A	15	0	A
D. Customer Satisfaction						
1. You are satisfied with the overall level of customer satisfaction achieved by your store.	4.00	0	SA	4.00	0	SA
2. Your store meets or exceeds customer expectations in terms of service and interaction.	3.00	0	A	3.00	0	A
3. Your store has built a loyal customer base over time.	3.00	0	A	4.00	0	SA
4. Your store effectively addresses and resolves customer concerns or issues in a timely manner.	3.00	0	A	3.00	0	A
5. Your store utilizes customer feedback to make improvements and enhance the overall shopping experience.	4.00	0	SA	3.00	0	A
Overall Mean	17	0	A	17	0	A

Legend:

Scale (VD)	Verbal Description (VD)	Scale	Verbal Description
3.26 – 4.00	Strongly Agree (SA)	1.76 – 2.50	Disagree (D)
2.51 – 3.25 (SD)	Agree (A)	1.00 – 1.75	Strongly Disagree

Table 1 compares the profit of rolling store and a market stall on Attributes of a Rolling Store and a Market stall in terms of quality, price, availability, and customer satisfaction accordingly, to determine the profit of both rolling store and market stall. On Quality, both stores rated item #1-5 with the mean of (i.e., $\bar{x}$RollingStore = 3.00; SD = 0 and $\bar{x}$MarketStall = 3.00; SD = 0) such that they 'agree' that the quality of their products regarding the profit of their store is good when it comes to their consumers.

In addition, with the attribute of their vegetable's Price, both rolling store and market stall rated item #1 with the mean of (i.e., $\bar{x}$RollingStore = 4.00; SD = 0 and $\bar{x}$Teachers = 4.00; SD = 0) such that they 'strongly agree' that the price of their products is moderate and average for their consumers regarding their profit to be average for the day, however, the rolling store differed in

item #2-5, the owner only chose 'agree' with the mean of (i.e., $\bar{x}$RollingStore = 3.00; SD = 0), such that they 'agree' and 'strongly agree' that the rolling store one just agreed that the store effectively suits the value of vegetables in relation to their prices. With the availability of their vegetables, both rolling store and market stall both rated item #1-5 with the mean of (i.e., $\bar{x}$RollingStore = 3.00; SD = 0 and $\bar{x}$MarketStall = 3.00; SD = 0) such that they 'agree' that their store maintains a consistent supply of a wide variety of vegetables. Lastly, both rolling store owner and market stall rated item #1 in the fourth sub-variable which was customer satisfaction had almost the same answers with the mean of (i.e., $\bar{x}$RollingStore = 4.00; SD = 0 and $\bar{x}$MarketStall = 4.00; SD = 0) such that they 'strongly agree' that their products always pleases and values their consumers. On item #2, both store owners only chose 'agree' with mean of (i.e., $\bar{x}$RollingStore = 3.00; SD = 0 and $\bar{x}$MarketStall = 3.00; SD = 0). In addition, in item #3, only the rolling store owner chose 'agree' with the mean of (i.e., $\bar{x}$RollingStore = 3.00; SD = 0 and $\bar{x}$MarketStall = 4.00; SD = 0). On item #4, both store owners have the save extent of agreement, they chose 'agree' with the mean of (i.e., $\bar{x}$RollingStore = 3.00; SD = 0 and $\bar{x}$MarketStall = 3.00; SD = 0). Lastly, in item #5, the market vegetable stall owner was the one who only chose 'agree', while the rolling store owner chose 'strongly agree' with the mean of (i.e., $\bar{x}$RollingStore = 4.00; SD = 0 and $\bar{x}$MarketStall = 3.00; SD = 0).

Overall, to note that for all of the item statements on quality, price, availability and customer satisfaction, both groups had responded 'agree' to 'strongly agree' only. (i.e., $2.51 \leq \bar{x} \leq 3.25$ and $3.26 \leq \bar{x} \leq 4.00$, respectively). Generally, the results imply that the rolling store and market stall had similar to strongly agreed on perceptions on the attributes of their vegetable products, expressed in terms of Quality (i.e., $\bar{x}$RollingStore = 15; SD = 0 and $\bar{x}$MarketStall = 15; SD = 0); Price (i.e., $\bar{x}$RollingStore = 16; SD = 0 and $\bar{x}$MarketStall = 20; SD = 0); and, Availability (i.e., $\bar{x}$RollingStore = 15; SD = 0 and

$\bar{x}$MarketStall = 15; SD = 0); Customer Satisfaction (i.e., $\bar{x}$RollingStore = 17; SD = 0 and $\bar{x}$MarketStall = 17; SD = 0).

Table 2. Difference between Rolling Vegetable Store and Market Stall in terms of its attributes that influence profitability

Variable	Rolling Vegetable Store N=1		Market Vegetable Stall N=1		t-value	CV	p-value
	Mean	SD	Mean	SD			
Attributes of vegetable stores that influence profitability of Rolling Vegetable Store and Market Vegetable Stall							
A. Quality	5	0	5	0	0	0	0
B. Price	3.6	1.6733200507	5	0	-1.8708281	2.77645105	0.04965
C. Availability	5	0	5	0	0	0	0
D.Customer Satisfaction	5	0	5	0	0	0	0

In Table 2, the researchers realized that in both method of selling their vegetable products, the quality, availability, and customer satisfaction matters in the profitability of their stores. The price matters, but it is average pricing anyway, so it doesn't affect much in their sales, as long as anybody is buying their products, except when they increase their amount of price, because when price increases, the demand decreases. Unlike market stalls, rolling stores may find it very hard and easy at the same time to find consumers, in terms of geographical limit, they have a very wide range of geographical range because they can go from place to another place, but it is a hassle at the same time, because of their vehicle repairs, gasoline for their vehicle, time management, and more. According to Syverson (2004), better markets does not actually lead to productivity. The finding implies that investment in markets access and infrastructure provides less advancement in agricultural productivity, whereas programs targeted on enhancements

in farm structure and capital have the potential to increase both productivity and market participation. the factors affecting the productivity and profitability of vegetable production. The study showed that access to credit, selling price, fertilizer quantity and gender were significant and positively related to the productivity of the vegetable farmers while distance to market was negatively related to productivity.

Conclusions

Using the procedures described in the preceding chapter, the answers to the problem raised in the study were ascertained and summarized as follows.

For all the statements on quality, price, availability, and customer satisfaction. both groups had responded ‘agree’ to ‘strongly agree’. The results imply that the rolling store and market stall had positively perceived on attributes of the vegetables. This study employed the sequential-explanatory research design under mixed-methodology. It utilized standardized questionnaires in determining the monthly profit of Rolling Store and a Market Stall. It also made use of interview questions, which are open-ended, in the form of structured interview. The responses in terms of using qualitative data of these interview questions were used to corroborate the quantitative data gathered thru the use of standardized questionnaires. The respondents of the study were the rolling vegetable store owner and market vegetable stall owner.

Based on the findings of the study, the following conclusions were drawn:

- There is a significant difference in the perceptions of the rolling vegetable store owner and market vegetable stall owner on the attributes of vegetables, expressed in terms of quality, price, availability, and customer satisfaction.
- There is a significant difference in the challenges they face every day between the rolling vegetable store owner and market vegetable stall owner
- There is a significant difference on their method of selling their vegetable products between a rolling store and market stall to their consumers.
- There is a significant difference between the profit of rolling store and a market stall on selling vegetables expressed in terms of quality, price, availability, and customer satisfaction.
- There is a significant difference between a rolling store and a market stall by their geographic range, area control, loyal consumers, and their method of selling vegetables.
- There is a significant difference between the lessons they gain from each other with their methods of selling their products.
- There is a significant difference between the rolling vegetable store and the market vegetable store on how they handle different consumers.

Recommendations

Considering the findings and conclusions of the study, the following recommendations were presented.

- The rolling stores and market stalls may offer diverse vegetable products than usual to increase more profit and attract more customers.
- The rolling stores and market stalls may set competitive prices for their vegetables. They may consider bundling options or discounts for larger purchases to encourage customers to buy more.
- Both stores could use signboards for anybody to know that they're selling vegetables and to attract more customers to buy their products.
- Both stores could use megaphones, to attract more consumers to buy their products.
- Both stores must keep the products to be always fresh.
- Both stores should handle their customers with active listening, empathy, problem-solving, and maintaining professionalism.

Compliance with Ethical Standards

The author declares that there is no conflict of interest. Informed consent was obtained from all individual participants involved in the study. No specific funding was received from any public, commercial, or not-for-profit sectors to support this research. The data generated and analyzed during the study are available from the corresponding author upon reasonable request.

Acknowledgments

I would like to express our heartfelt gratitude to the customers and online sellers who have generously supported and guided us throughout our research on examining the impact of online selling techniques on customer satisfaction. Your valuable contributions have been instrumental in the success of our study. Despite facing challenges along the way, I remained determined and persevered. I would also like to extend our thanks to God, as His presence and guidance have been constant throughout this research journey. Without Him, we would not have been able to complete this study and overcome obstacles.

I would also like to express our gratitude to Julius Fabian, for his valuable insights and guidance during our research. His expertise and guidance have steered us in the right direction and helped us make informed decisions.

Last but not least, we would like to extend our heartfelt thanks to all the customers and online sellers who took the time to participate in our survey. Your willingness to share your experiences and support our study is deeply appreciated. Your love and support have been a driving force behind our dedication and sacrifices throughout this research.

EXPERIENCES OF TEACHERS IN TEACHING MATHEMATICS USING MOTHER TONGUE-BASED MULTILINGUAL INSTRUCTION ACROSS SOUTH LUZON

Grace P. Escolano [1] and Annalyn J. Decena, Ph.D. [2]

ABSTRACT

The study aims to determine teachers' experiences in teaching Mathematics using Mother Tongue-Based instruction. The Philippine curriculum for Kindergarten to Grade 3 emphasizes using the mother tongue in teaching and learning Mathematics. The study used qualitative research design to gain data on the experiences, challenges, and strategies of teachers in South Luzon. The study revealed that Mother Tongue-Based Multilingual Education significantly improves instructional practices and student learning outcomes in Mathematics. MTB-MLE enhances engagement, comprehension, and problem-solving, fostering confidence and active class participation. However, despite its benefits, MTB-MLE presents challenges for teachers, including language barriers and resource limitations. Translation difficulties and inadequate instructional materials hinder student comprehension and engagement in Mathematics learning. Moreover, the results suggest that teachers' training programs focusing on MTB-MLE implementation strategies should be conducted and provide ongoing support and resources for educators. There should be enough support to teachers in implementing MTB-MLE effectively by providing leadership, resources, and professional development opportunities.

INTRODUCTION

Learning in one's mother tongue (MT), commonly referred to as the native language, is gaining increasing popularity both locally and globally, with organizations such as UNESCO and UNICEF endorsing this approach (Burton, 2013; Jacob, 2016). Governments in countries like Bangladesh, India, Nepal, and Papua New Guinea have shown growing interest in incorporating mother tongue instruction to advance MT education. Since the inception of the Mother Tongue-Based Multilingual Education (MTB-MLE) initiative in 2009, there have been expanded scholarship opportunities in the Philippines for learning in one's mother tongue. typically, during their critical developmental period, or it can be the first language learned, the one they are most proficient in, use the most frequently, and strongly identify with (Kosonen & Young, 2009).), advocating for bilingual and multilingual education across all schooling levels and promoting learners' right to receive education in their language to foster inclusivity and preserve linguistic diversity.

Language plays an important role in understanding Mathematical concepts. Familiarity or lack of it may determine the failures and success. Human beings since in the history used language to communicate, resolve conflicts, and solve numerical problems. It is one attribute that sets humans apart from all other creatures and binds humans together across all geographic barriers. Language serves as the bridge to understanding. Thus, even learning Mathematics requires linguistic skills. In recent years, there has been a growing recognition of the importance of embracing learners' mother tongues as a foundation for learning. The Mother Tongue-Based Multilingual Education (MTB-MLE) policy has been at the forefront of educational reform efforts in the Philippines, emphasizing the use of native languages as a medium of instruction in the early years of schooling. This approach aims to improve comprehension, enhance critical thinking, and foster a deeper understanding of subjects, including Mathematics.

In the Philippines, one of the latest developments in the educational system is the Mother Tongue – Based Multilingual Education (MTB-MLE). MTB-MLE refers to the use of learners' mother tongue and two or more additional languages as Languages of Instruction (LoI) in school. In other contexts, the term is used to describe bilingual education across multiple language communities—each community using its mother tongue aside from the official school language of instruction. In South Asia multilingual education usually follows the first definition, learning and using multiple languages in school.

As South Luzon's educational landscape adapts to the MTB-MLE framework, it is crucial to understand the experiences of teachers on the frontlines of this transformative shift. This research is the rich tapestry of educators' experiences in teaching Mathematics using mother tongue-based multilingual education in South Luzon.

This introductory exploration, will outline the context and significance of this study, highlight the objectives, and provide a glimpse into the methods employed to capture the perspectives of these dedicated educators. Through the voices of South Luzon's teachers, it aims to unravel the challenges, successes, and lessons learned in implementing MTB-MLE in Mathematics instruction, shedding light on the path toward a more inclusive and effective education system.

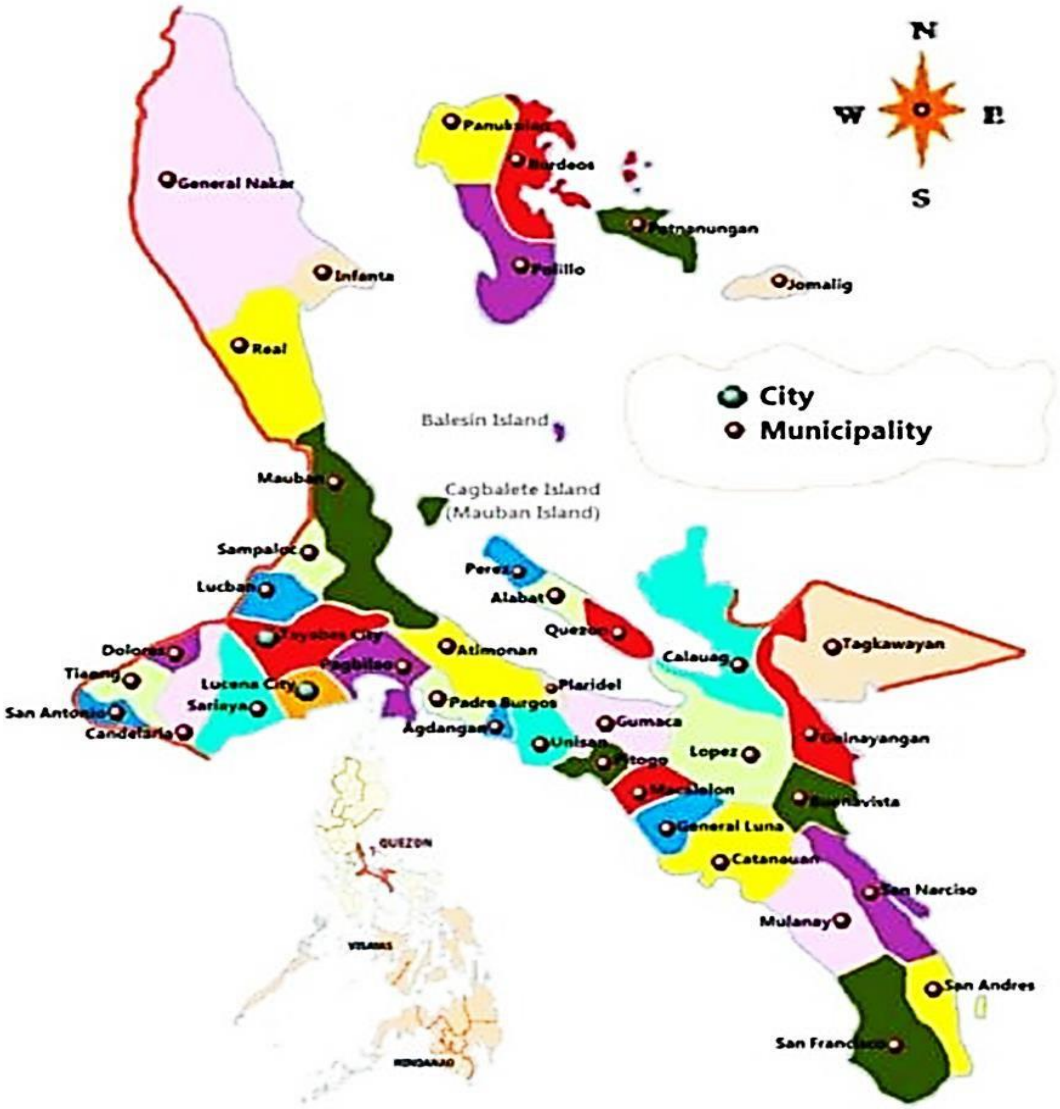
In addition to adding to the expanding corpus of knowledge on multilingual education, this study provides insightful information that can guide curriculum design, policy decisions, and pedagogical approaches in South Luzon and elsewhere. Gaining insight into the experiences of educators can help create a mathematics education system that is more egalitarian and culturally sensitive, eventually promoting the holistic development of the students in the area.

Research Questions

1. What are the positive and negative experiences of teachers in teaching Mathematics in primary using Mother Tongue Based Multilingual Instruction?
   1.1 Tagalog
   1.2 Bicol
2. What are the challenges towards the use of MTB-MLE as a medium of instruction in Mathematics encountered by the teachers?
   2.1 Tagalog
   2.2 Bicol
3. What coping mechanism of teachers in addressing challenges encountered by the Teachers in Teaching Mathematics using Mother Tongue –Multilingual Instruction?
   3.1 Tagalog
   3.2 Bicol
4. What program can be made to enhance the sustainability and effectiveness of using Mother Tongue in Teaching Mathematics?

METHODOLOGY

Research Design



The research used a qualitative research design to gain in-depth insights into the experiences, challenges, and strategies of teachers in South Luzon. Qualitative research is well-suited for exploring complex phenomena and understanding the lived experiences of participants. This design allows for a nuanced exploration of the multifaceted aspects of MTB-MLE in Mathematics instruction.

Research Locale

Luzon sits at the northern end of the Philippines and is the country's largest and most populous island. It's known for its mountains. Bender of Southern beyond Quezon is the Bicol region, which encompasses the remainder of Southern Luzon and includes the mainland provinces of Camarines Norte. Camarines Sur, Albay, and Sorsogon, and the islands of Catanduanes and Masbate. Quezon is officially the Province in the Philippines located in the Calabarzon region of Luzon. Kalilayan was the first known name of the province upon its creation in 1591. The study is to be conducted across selected elementary schools in Quezon and Bicol Region. The researcher chose the school in Quezon respondents namely, Pedro Cabangon Elementary School Located at Brgy. Mascariña, Quezon, Quezon and Del Pilar Elementary School Located at Brgy. Del Pilar Quezon, Quezon. While across the Bicol Region, Dygico Elementary School Sta Elena Camarines Norte and San Pedro Elementary School San Pedro, Camarines Norte. The participants were composed of 6 teachers in Quezon District who are actively teaching MTB-MLE and teachers from Grades 1-3 in Dygico Elementary School and San Pedro Elementary School.

The choice of South Luzon is based on its linguistic diversity and the significant implementation of MTB-MLE in the region.

Research Population and Sample

The research population for this study encompasses educators based in South Luzon actively engaged in instructing Mathematics through the Mother Tongue-Based Multilingual Education (MTB-MLE) framework. This diverse group of teachers represents various linguistic backgrounds and spans different educational levels. To ensure a comprehensive and representative sample, a purposive sampling technique was utilized. near the researcher These chosen schools were specifically identified for their implementation of MTB-MLE in Tagalog, and Bicol languages, aligning with the study's focus on multilingual instructional contexts.

Table 1. *Respondents of the study*

District/Division	School	Mother Tongue	Number of Respondents
District of Quezon, Division of Quezon	Pedro Cabangon Elementary School	Tagalog	3
	Del Pilar Elementary School	Tagalog	3
Sta. Elena District Division of Camarines Norte	Dygico Elementary School	Bicol	3
San Pedro District Division of Camarines Norte	San Pedro Elementary School	Bicol	3
Total			12

RESULTS

Part 1. The Positive and Negative Experiences of Teachers in Teaching Mathematics in Primary Using Mother Tongue-Based Multilingual Instruction

Table 2
The Positive Experiences of Teachers in Teaching Mathematics in Primary Using Mother Tongue-Based Multilingual Instruction in Tagalog

Theme	Sub-theme	Experiences
Positive Experiences	Learners Engagement	Ang paggamit ng Mother tongue sa pagtuturo ng math ay may positibong resulta dahil mas naiintihan nila ang aralin nasasagot nila ng mas Madali ang mga suliranin o problem solving dahil mas Madali nilang maunawaan ang mga katanungan. Malaki ang naitutulong MTB In teaching -learning Mathematics, dahil nakakaresponse agad sila sa mga tanong ng guro. My learners understand the lesson clearly they are not ashamed in participating the activities dahil nga sa sila ay nakakapagsalita ng ating native dialect na mother tongue which is tagalog. Based on experiences learners easily understand the activities gamit ang mother tongue

		Mas madali intindihin mula isa hanggang sampu ok naman ang paggamit ng MTB Ok naman kasi nga yong panuto tagalog. Sa Mathematics kapag mother tongue mas nauunawaan nila.
	Conceptual Clarity	Sa mathematical concept kagaya ng sinabi ko kapag may mga problem solving mas Madali na nilang maunawan ito ex four fundamentals pagdadagdag mas Madali nila itong maunawaan Sa problem solving mas Madali lng nilang ma analyze ang mga situation kapag Mother tongue ang gamit. Dahil nga sa mother tongue ang gamit nila mas malinaw na sa kanila mga instruction mas Madali na nilang nasasagutan ang mga lesson at exam sa Mathematics. With the used of MTB as a medium instruction mas nauunawan nila ang lesson pagpapaliwanag ng mga procedure mas Madali nilang maintindihan. Learners answer and cooperate easily in most activities when they easily understand the task given to them. Sa akin po pinapababaw ko pa po ung mga salita para mas maunawaan
	Teaching Effectiveness	Napansin ko na mas mataas ang result ng mps nila unlike dati na mababa Lahat ng mga learners ay nagpaparticipate sa mga activies at nasasagot nila ng tama ang mga problem kaya alam ko na mas effective ang aking pagtuturo sa kanila. Sometimes some mathematical terminilogy are hindi madaling mtranslate sa tagalog pero dahil nga sa mother tongue mas nagging effective naman ung teaching ko.

		Mas madali sa min bilang guro magprepare ng materials mas Madali mag isip ng concept kasi ng MTB. For me as a teacher, I easily find the effectiveness of my teaching strategies and how I use them to help learners continue to the next lesson. Active po silang sumagot kapag mother tongue ang gamit dahil mas nauunawaan nila ang lesson

Table 2 presents the positive experiences of teachers utilizing Mother Tongue Based Multilingual Education (MTB-MLE) in teaching Mathematics in primary education, particularly in Tagalog, three main themes emerge from the data: Learners Engagement, Conceptual Clarity, and Teaching Effectiveness, each highlighting specific advantages observed by the teachers.

In terms of learners' Engagement, teachers report that learners understand lessons better and can answer questions more readily when taught in their mother tongue. This improved comprehension leads to more active participation and immediate responses to teacher inquiries. Furthermore, using Tagalog reduces learners' fear or shame, encouraging them to participate more willingly in classroom activities. The cultural relevance of commands and instructions in Tagalog resonates more deeply with learners, fostering a sense of connection and comfort in the learning environment.

When it comes to Conceptual Clarity, the use of the mother tongue simplifies problem-solving for learners. Mathematical concepts and problems explained in Tagalog are easier for learners to grasp and analyze. Teachers also find that instructions given in the mother tongue are clearer, helping learners to understand and complete their lessons and exams more effectively. This clarity leads to improved cooperation among learners as they can better comprehend and follow the tasks assigned to them.

Regarding Teaching Effectiveness, teachers observe that learners' mean percentage scores have improved, indicating better academic performance. The use of Tagalog encourages all learners to participate in activities and solve problems correctly, demonstrating the effectiveness of this teaching approach. Additionally, teachers find it easier to prepare materials and conceptualize teaching strategies when using Tagalog, which enhances their overall teaching effectiveness. Despite some challenges in translating technical mathematical terms, the overall benefits of using the mother tongue outweigh these difficulties, resulting in more effective teaching.

It implies that the positive experiences of teachers in using Tagalog as MTB-MLE in teaching Mathematics underscore its potential to enhance learning outcomes and promote learners' engagement. By addressing challenges and leveraging the benefits of MTB-MLE, educators can create a more effective and inclusive learning environment that caters to the diverse linguistic needs of learners in primary education.

Table 3

The Negative Experiences of Teachers in Teaching Mathematics in Primary Using Mother Tongue-Based Multilingual Instruction in Tagalog

Theme	Sub-theme	Experiences
Negative Experiences	*Language Barriers*	*May naexperience na ako about jan yong bata ay galing sa ibang lugar medyo nahirapan ang bata dahil used na used siya sa mother tongue niya medyo mahirap sa part naming dagdag trabaho dahil kailangan mo talaga gumawa paraan para makaunawa ung bata.* *In teaching Mathematics may mga termenologies sa MTB na mahirap maunawaan ng learners like grade one, mas Madali sa kanila ung greater than kaysa sa labis ng isa.Sa fraction naman yong ¼ ay mas madalas nilangg maunawaan kaysa sangkapat, at sa counting or reading.* *Yong ibang tagalog words ay nahihirapan silang unawain* *May Mga case ako dati na yong bata ay from other regions like bicol na kung saan yon ung nakasanayan nila kaya kailangan ko pang mag search ng translation ng dialect nila.* *For me, some terminologies used in Mathematics were complicated to translate in the mother tongue and they are also complicated to understand.*
	Learners Reception	*Kagaya ng sinabi ko ung bata ay galing sa ibang lugar yong bata ay nagkaroon ng struggle.* *When teaching Mathematics in Elementary grade there are some challenges encountered one of them is mas mahirap silang maunawaan ang ibang mga salita na isinalin sa tagalog* *Nahihirapan lalo na pag yong mga words ay bago sa pandinig nila.*

		Mahirap po kasi meron used sa english nahihirapan talaga sila. *Yes! there were instances when learners were confused and did not understand it easily* *Challenging talaga siya sa part ko lalo na at nasanay sila sa English kaya need humanap ng paraan na mas mapadali nila mainitindihan yong mga instruction.*
	Resource Limitations	*Kulang tayo sa mga materials kaya sana maglabas pa sila ng maraming books na nakasalin sa Mother Tongue.* *Kulang at pilit kang gagawa ng mga instructional materials par mas maunawaan ng mga learners ang lesson na nakaka consume pa ng maraming oras para lng maunawaan nila.* *Minsan nakakaapekto ito sa mga mag-aaral lalo na at di sapat ang resources* *Medyo po kasi kulang yong mga materials books but nagagawan ng paraan.* *Teachers had a hard time executing the lesson because of limited resources and also the lack of training and takes time for me and I think other teachers to go to the next lesson* *The teacher had a hard time to execute the lesson because of limited resources and the lack of training and takes time for me and I think to another teacher to go to the next lesson*

Table 3 presents the negative experiences of teachers in teaching Mathematics in primary using Tagalog as a mother tongue-based multilingual education.

Teachers face significant challenges in teaching Mathematics using Mother Tongue Multilingual Education (MTB), particularly due to language barriers. learners, especially those from different linguistic backgrounds, struggle to grasp mathematical

concepts presented in Tagalog, even though they are more accustomed to their mother tongue. This leads to difficulties in communication and comprehension, hindering effective teaching and learning. To address language barriers, educators need to adopt diverse instructional strategies that cater to the linguistic diversity of learners. This may include providing bilingual or multilingual resources, offering language support programs, and fostering a culturally responsive learning environment. Additionally, teacher training programs should focus on equipping educators with the necessary skills and tools to effectively teach Mathematics in multilingual settings, thereby improving learner engagement.

The reception of Mother Tongue Based Multilingual Education (MTB) in Mathematics varies among learners, influenced by factors such as language background and instructional support. Some learners may struggle to understand mathematical concepts presented in Tagalog, leading to confusion and frustration. However, with adequate support and encouragement, learners demonstrate resilience and willingness to learn, highlighting the importance of fostering a supportive learning environment. Educators must prioritize creating inclusive learning environments where learners feel supported and valued, regardless of their language background. This involves providing individualized support to learners who may struggle with language comprehension, implementing collaborative learning activities that promote peer interaction and support, and celebrating linguistic and cultural diversity in the classroom. By addressing learners' diverse needs and fostering a positive learning environment, educators can enhance learners' reception of MTB in Mathematics and promote equitable access to education for all learners.

Resource limitations pose significant challenges to the implementation of Mother tongue-based Multilingual Education (MTB) in Mathematics, impacting the quality of instruction and learning outcomes. Teachers often lack sufficient instructional materials and training opportunities, forcing them to create local materials and adapt teaching strategies to address resource gaps. This not only consumes valuable time and effort but also affects the effectiveness of teaching and learning. Addressing resource limitations requires a multi-faceted approach that involves both policy-level interventions and localized strategies. Governments and educational authorities should prioritize investment in education infrastructure, including the provision of adequate instructional materials, training opportunities for teachers, and support for curriculum development in local languages. Additionally, educators can leverage existing resources more efficiently through collaborative networks, sharing best practices, and tapping into community resources. By addressing resource limitations comprehensively, educators can enhance the implementation of MTB in Mathematics and improve Learners' learning outcomes.

Furthermore, a balance between mastery of the facts of higher-order thinking skills translated into the native dialect must be forged by the teachers in their choice of a teaching strategy, selecting an appropriate teaching strategy suited for the level of the learner, and mastery of the prerequisite knowledge or concept as translated in the native dialect (Ball, 2010) as cited by Tortola (2021)

Table 4

The Positive Experiences of Teachers in Teaching Mathematics in Primary Using Mother Tongue-Based Multilingual Instruction in Bicol

Theme	Sub-theme	Experiences
Positive Experiences	*Learners Engagement*	*.* *Actually, ang case naming ay tagalog speaking nagkaton lamang ay karamihan ng mga estudyante ay Bicolano. Base sa experience namin sa mtb-mle, mas productive nilang gamitin sapagkat nauunawaan nila dahil nita-translate namin ito sa tagalog o sa bicol para mas maintindihan nila pero siyempre may mga mathematical term na hindi naman talaga maitra-translate.* *Mas Maganda mas naiintindihan nila lalo na sa mga problem situation unlike before na English ang gamit mas Maganda naiintidihan nila ung mga problem* *Pag kase mtb-mle, nung mag training ng k-12 mas maiintindihan nila sa tagalog pero yung mga terminology ay nagiiba na, nagiging mahirap. Kaya ang ginawa ko Nagtagalog ako ng sampuan, isahan, nagreklamo ang mga bata* *May enhacement yong kanilang learning ung mga bata ay nag increase ang confidence dahil mas naiintindihan nila yong lesson.* *Based po sa aking experience learners will easily understand using MTB-MLE as a medium of instruction* *Mas ok yong sa ngayon kasi nga mother tongue so mas naipapaliwanag ng maayos*
	Conceptual Clarity	*Malinaw na sa kanila ang lenggwahe kaya nagiging mas madali para sa estudyante na maintindihan ang mga konsepto o terms ng matematika.* *Naeexpress din nila mas naiintidihanan nila mas mganda yong interaction naiintidihan nila lalo na sa mga problem solving.* *Pag mother tongue mas Madali nilang maunawaan pag sinabi mong magdadagdag nasasagot agad nila ung tanong*

		Using mother tongue in mathematical concept mas malinaw na sa kanila yong mga instruction dahil naiintihan na nga nila ito. *Tama yon mam lalo na sa problem solving naiintidihan na agad nila yong panuto kasi mother tongue ang gamit dati kailangan mo pang itranslate para maunawaan.* *Learners answer and cooperate Easily when an easy task is given to them*
	Teaching Effectiveness	*In teaching effectiveness, mas Madali nilang nauunawaan dahil araw-araw na naitututuro, ang problema lang na kapag sa higher grade ay English so nagkakaron sila ng after shocked sila pero epektibo talaga siya.* *Di ba sabi ko kanina mayron kaming batang ang gamit sa bahay ay dos bente pero sinasabi ko sa kaniya na iyon ay Spanish word tapos tintranslate ko na lng na yong dos ay dalawa mas Maganda ang tagalog kaya lng mas sanay sila sa ingles dahil ang tinuturo sa bahay ay one two three* *Gumagamit ng mga mateials para mas maging effective yong pagtuturo ko* *Ang teacher ay dapat na maging effective sa pagtuturo para mas lumawak ang understanding at pagkatuto ng bata.* *Effective po lalo na sa exam mabilis nilang maunawaan mabilis nilang masasagutan yong mga exam.* *Effective po kase mother tongue.*

Table 4 presents the positive experiences of teachers employing Bicol as their Mother Tongue Based Multilingual Education (MTB-MLE) in teaching Mathematics in the Bicol region focusing on learners' engagement, conceptual clarity, and teaching effectiveness.

Teachers observe that using MTB-MLE significantly enhances engagement, especially when lessons are translated into Tagalog or Bicol. Most learners are Bicolano,

and they respond better to instruction in their native language, leading to more productive lessons. This approach helps learners comprehend better and participate more actively. Teachers note that learners understand problem situations better in their mother tongue compared to English, which was previously used. Although there are challenges with terminology differences, especially when transitioning between Tagalog and Bicol, the overall engagement and confidence of learners have increased. This boost in confidence is attributed to their improved understanding of the lessons, facilitated by the use of their mother tongue.

Using the mother tongue in teaching mathematical concepts enhances learners' understanding and clarity. Teachers find that instructions are clearer, and learners grasp mathematical terms and concepts more effectively. When learners speak and learn in their mother tongue, they can express themselves better and engage more meaningfully in problem-solving activities. This clarity extends to specific instructions, making it easier for learners to follow along and respond accurately. Teachers report that ‘earners immediately understand and apply instructions when taught in their mother tongue, reducing the need for repeated explanations. This immediate comprehension leads to smoother classroom interactions and better academic performance in Mathematics.

Teachers experience improved teaching effectiveness with the use of Bicol as MTB-MLE. Daily instruction in the mother tongue helps learners understand lessons more easily, leading to better academic outcomes. Although there is a noted challenge when learners transition to higher grades where English is the primary medium of instruction, the foundational understanding built through MTB-MLE remains beneficial. Teachers find that using materials in the mother tongue makes lessons more effective and helps learners quickly grasp and retain mathematical concepts. This effectiveness is particularly evident in exams, where learners demonstrate quicker understanding and accurate responses. Teachers emphasize that being effective in their instruction is crucial for expanding learners learning and understanding. Overall, the use of the mother tongue proves to be an effective strategy in enhancing the teaching and learning process in primary Mathematics education.

The positive experiences with MTB-MLE in Bicol highlight the need for educational policies that support multilingual education, especially in regions with diverse linguistic backgrounds. Developing comprehensive bilingual or multilingual resources can help standardize terminology and improve understanding. Providing continuous professional development and training for teachers in MTB-MLE methodologies is essential to equip them with effective strategies for engaging learners and enhancing conceptual clarity. Allocating adequate resources, including textbooks and teaching aids in both Tagalog and regional dialects, is crucial to support MTB-MLE. Additionally, involving parents and the community in the educational process can reinforce classroom learning and provide additional support for learners. Regular assessment and feedback mechanisms can help identify best practices and areas for improvement, ensuring the sustained success of MTB-MLE programs. By addressing these implications, the effectiveness of teaching Mathematics in primary education using MTB-MLE in Bicol can be further enhanced, leading to better academic outcomes and Learners’ engagement.

According to Englis, & Boholano (2021), the use of mother-tongue in teaching Mathematics is effective in acquiring Mathematical knowledge. The teachers are well-prepared in terms of content and instructional material preparation. Moreover, the contextualized and innovative model in teaching Mathematics using mother-tongue helps in acquiring basic skills in Mathematics hence, to help Mathematics teachers making use of this model, this finding would be a great help to the primary teachers in Mathematics as well as the institution the value of contextualization and innovation as core functions in teaching strategies where the school administrators will continually support the teachers development plan and provide the tools and equipment needed on teaching.

Table 5
The Negative Experiences of Teachers in Teaching Mathematics in Primary Using Mother Tongue-Based Multilingual Instruction in Bicol

Theme	Sub-theme	Bicol
Negative Experiences	*Language Barriers*	*Sabi nga diba every individual is a unique. Sa case ko ngayon, hati-hati ay, may mga hirap sa tagalog so kailangan ko itranslate sa bicol pero nahihirapan pa rin sila ,pero may ibang estudyante na mas naiintindihan sa English. So kapag hindi nila nauunawan sa mtb-mle ay ginagamitan na ng English. May ibang estudyante na magtatanong talaga ng "ma'am ano po yung hatiin sa ganun" ay diba divide yun kaya kailangan pa itranslate. Pero kase may mga malalalim na salita na hindi naman matratranslate sa mtb-mle.* *Minsan cguro kulang din ang experience ng bata sa mga vocabulary, hindi nila masyadong maintindihan dahil may mas malalim na terms katulad sa problem solving (Ano ang itinatanong?tagalog na un di pa rin nila maintindihan)* *Hindi ako nagbibicol pero nakakaintindi ako ng Bicol dahit taga Lopez ako kaya ng magkaroon ako ng learner na taga bicol medyo nahirapan ako kaya nagresearch ako ng salita ng bicol para maunawaan niya ako siyempre kinakausap ko siya ng bicol dahil hindi niya maintindihan ang salita ng tagalog.* *Marami tayong naeencounter na mga words lalo na pagmay transfer galing sa ibang lugar bukod sa nahihirapan ang bata ganun din si*

		teacher kasi pareho nilang hindi alam yong mother tongue nila. *Katulad ko mam may Bicol akong eskwela ang sinasabi hala sige imikin mo at translate ko nag bibicol ako kapag may mga studyante akong bicol sa place value hirap sila sa mother tongue kase mas sanay sila sa English* *may mga bata kasi na sanay sa English lalo na sa numbers may mga case kami na nagsasabi na mam translate mo nga sa ng English*.
	Learners Reception	*Ay kadakol baga, o dakalunod o ibig-sabihin ay madami rin. Kase hindi naman lahat ng bata ay mas nauunawaan nila ang matematika base sa pag-aaral nila. Sabi nila pag mother tongue ay effective ni waray pero sa aming sitwasyon baga, effective kung lahat ng bata ay matutukan pero katulad dito na kapag nasa loob ng bahay ay babalik yung bata tapos sasabihin nila ay di raw naintindihan ng mga magulang nung bata at magtatanong ulit. Yan ang problema, mother tounge nga ay di makasagot su magura wara na, nganga baga.* *Ang mga bata hindi pare pareho ang ability may mga bata na magaling sa math meron namang slow so pag ginagamit natin ang mtb dahil pareho kami ng language naiintihan naman niya* *Mayron nag struggle na bata sabi ko nga lalo na kapag yong bata ay galing ng ibang lugar na iba ang mother tongue halimbawa galing bicol marunong ako magbicol kasi galing ako ng Cam Sur kaya Madali sa akin dahil kaya kung magbicol katulad ng saro, duwa,tulo, binibicol ko siya siyempre pero at the same time titranslate ko din in tagalog.* *Ay meron di ba English ang gamit nila sa day Care kaya pagdating sa Grade I may mga nahihirapan dahil sanay sila sa tagalog bukod*

		don mahaba ang tagalog kapag isinulat kaya umaayaw sila magsulat.
	Resource Limitations	*So, Resource limitations Diba ngayon ay digital na, ay gapos na lang ang resources kada method mi tanghali maka og-tug di an ki maray ng makautol ng makaupod baga, pulpugol tayo makaugod lalo na mang ganiyan tayo ay uginat IM na o numeracy. Kung ang tanong dun Ay English ay mother tounge, ay patay baga. So lahat ng resources, kailangan mo i-provide yun para maintidihan ma pa real objects, pudpud na ba yung deped diyan na mga indigenous materials. Walang limitasyon, kung hanggang kaya ipasok para maunawaan ay ipapasok.* *Kulang kami ng mga books lalo ma last year merong mga hindi nagsuli lalo nat may mga books kaming ang gamit na ay sampuan na words. Pero meron naman nakukuhaan lalo na ngayon.* *Yong mga books ng mag K-12 kaunti lng nabigay samin kaya nag share ang bata tapos sulat na lng sa board.* *Ang ating teaching materials ay limitado lng pero may mga internet access naman kaso dito samin medyo mahina.* Kanya kanyang provide at may mga teachers guide naman

Table 5 presents the negative experiences of teachers in teaching Mathematics in primary using Mother Tongue Based Multilingual Instruction in Bicol

The experience of language barriers in Mother Tongue Multilingual Education (MTB-MLE) in Bicol underscores the complexity of linguistic diversity in educational settings. Teachers face challenges in translating mathematical concepts from Tagalog to Bicol, as some terms may not have direct equivalents. Additionally, learners may struggle with deeper concepts like problem-solving due to language limitations, impacting their comprehension and learning experiences. Despite efforts to bridge the language gap,

such as using English for clarification, challenges persist for both learners and teachers, particularly when learners come from different linguistic backgrounds.

The reception of MTB-MLE in Mathematics among learners in Bicol varies based on individual abilities, linguistic backgrounds, and previous experiences with Mathematics instruction. While MTB-MLE may be effective for some learners, others may struggle, particularly if they come from different linguistic backgrounds or have varying levels of mathematical proficiency. Teachers play a crucial role in supporting Learners understanding by providing language support and adapting instructional strategies to meet diverse learning needs. However, challenges persist, particularly when learners transition from daycare to Grade I, where they may encounter difficulties due to language preferences and writing conventions.

Resource limitations pose significant challenges to the effective implementation of MTB-MLE in Mathematics instruction in Bicol. Teachers lack adequate instructional materials, including books and digital resources, impacting their ability to deliver high-quality instruction. Despite efforts to supplement resources with internet access and teacher guides, limitations persist, leading to reliance on shared materials and improvised teaching methods. Additionally, challenges arise in accessing indigenous materials and ensuring equitable distribution of resources across schools.

It implies that language barriers require a multi-pronged approach that acknowledges the diverse linguistic landscape of the classroom. Educators should collaborate with local communities to develop comprehensive language resources that cater to the specific needs of learners, including translations of mathematical terms and concepts. Professional development programs should focus on equipping teachers with strategies for effectively teaching in multilingual environments, such as code-switching and incorporating culturally relevant examples. Moreover, educational policies should prioritize the inclusion of diverse languages in curriculum development and instructional materials, ensuring equitable access to education for all learners. Enhancing Learner's reception of MTB-MLE in Mathematics requires a holistic approach that addresses individual learning needs and linguistic diversity. Educators should implement differentiated instruction strategies that accommodate diverse learning styles and abilities, providing additional support for learners who may struggle with mathematical concepts. Furthermore, a collaboration between educators, parents, and communities is essential to create a supportive learning environment that values linguistic diversity and promotes academic success for all learners. By fostering a culture of inclusivity and support, educators can empower learners to overcome challenges and thrive in Mathematics education. Moreover, resource limitations required systemic changes at both policy and practice levels. Educational authorities should prioritize investment in educational infrastructure, including the provision of sufficient instructional materials and digital resources, to support effective teaching and learning. Furthermore, professional development programs should equip teachers with the skills and knowledge to utilize available resources effectively and adapt teaching strategies to meet diverse learning needs. Collaborative efforts between government agencies, educational institutions, and

community stakeholders are essential to ensure equitable access to resources and promote educational equity in Bicol and beyond.

Part II. The Challenges Towards the Use of MTB-MLE as a Medium of Instruction in Mathematics Encountered by the Teachers

Table 6

The Challenges Towards the Use of MTB-MLE as a Medium of Instruction in Mathematics Encountered by the Teachers in Tagalog

Theme	Sub-theme	Experiences
Challenges of MTB-MLE in Mathematics	*Curriculum Alignment*	*Di po ako sure kung align kasi nga English ang curriculum guide tapos tagalog mo siya ituturo* *Challenge yong paggamit dahil walang training lalo na yong mga bagong guro dahil ng una pa lng talagang ang gamit ay English* *It is appropriate in primary level lalo na ta karamihan sa mga bata ay di nakaka intindi ng Ingles but mas sanay sila na English ang tawag sa bilang.* *Di po masyado kasi English nga sa CG need mo pa translate yong iba. Dagdag trabaho kay teacher kung pano niya ituturo yong lesson* *Hindi siya align Hirap si teacher in executing lessons although tagalog mo sya ituturo may mga words talaga na kahit kami hirap maunawaan ito.* *For me, some terminologies in Mathematics were complicated to translate into their mother tongue and they are also complicated to understand by learners*
	Teacher Preparedness	*Para sa akin di siya ganun ka challenging dahil mas nakatulong siya sa akin basta gamit ay mother tongue*

		Siguro yong mga cahallenges naming yong ibang bata ay di particular in counting numbers *Siyempre pag tagalog mas Madali nilang matulungan ang mga anak nila* *I need more training to help me as a teacher to execute the lesson and to disseminate the effectiveness of using MTB-MLE*
	Parental Involvement	*Mas aware ang magulang dahil un ang gamit nila sa bahay pero minsan may mga trermenology na hindi nila maintindihan.* *Sa parents naman pag may mga homework yong mga learner na hindi rin maunawaan ng mga parents yong mga instruction na naka-MTB-MLE dahil ung mga siinaunang parents ay nasanay sila ang gamit ay ingles* *Yong di napapafollow up sa bahat ang mga bata* *Parents should have a positive attitude towards helping and should follow up on the learnings of the learners at home so that the skills that were learned at school will not be easily forgotten* *Sa parent wala masyado pakialam sa mga anak*

Table 5 presents the challenges to the use of MTB-MLE as a medium of instruction in Mathematics encountered by the teachers in Tagalog. Curriculum alignment highlights the challenges and successes of aligning the Mother Tongue Based Multilingual Education (MTB-MLE) approach with the Mathematics curriculum. Teachers express varying degrees of ease or difficulty in implementing MTB-MLE in Mathematics instruction, depending on their familiarity with the curriculum and the training they have received. While some teachers find it relatively easy to align the MTB-MLE approach with the curriculum, others struggle due to complex mathematical terminologies and lack of training. Despite these challenges, teachers acknowledge the benefits of using MTB-MLE, particularly in helping both teachers and learners understand lesson objectives and execute activities effectively. Enhancing curriculum alignment requires targeted support for teachers, including comprehensive training on curriculum objectives and strategies for

integrating MTB-MLE in Mathematics instruction. Professional development programs should focus on building teachers' capacity to effectively translate complex mathematical concepts into mother tongue languages and adapt instructional materials to suit diverse learning needs. Additionally, educational authorities should provide ongoing guidance and resources to support teachers in aligning MTB-MLE with the Mathematics curriculum, ensuring consistency and effectiveness in teaching practices.

Teacher preparedness underscores the challenges faced by teachers in implementing MTB-MLE in Mathematics due to inadequate training and preparation. Teachers express a need for more training to effectively execute lessons and disseminate the effectiveness of using MTB-MLE. Some teachers attribute challenges in teaching mother tongue languages to their lack of preparation and training, particularly in adapting instructional strategies to suit diverse learning needs. However, despite these challenges, teachers recognize the importance of continuous professional development in enhancing their capacity to deliver high-quality MTB-MLE instruction. Improving teacher preparedness requires comprehensive training programs that equip educators with the knowledge, skills, and resources needed to effectively implement MTB-MLE in Mathematics instruction. Educational authorities should prioritize professional development opportunities that address teachers' specific needs, including training on curriculum alignment, language proficiency, and instructional strategies. Additionally, mentorship programs and peer support networks can provide ongoing guidance and assistance to teachers as they navigate the challenges of implementing MTB-MLE in Mathematics. By investing in teacher preparedness, educational stakeholders can ensure that educators are equipped to deliver equitable and effective Mathematics instruction in multilingual settings. Parental involvement highlights the role of parents in supporting MTB-MLE in Mathematics education and the challenges they face in understanding and engaging with the curriculum. Parents' awareness and understanding of MTB-MLE vary, with some being more familiar with the language used at home and others struggling to comprehend the terminology used in the curriculum. While some parents actively support their children's learning by assisting with homework, others may lack the knowledge or inclination to engage with the MTB-MLE approach.

Promoting parental involvement in MTB-MLE requires targeted outreach and support initiatives that empower parents to actively engage in their children's education. Schools and educational authorities should provide resources and information in languages accessible to parents, including translations of curriculum materials and guidance on how to support MTB-MLE at home. Additionally, parent-teacher collaboration platforms and workshops can facilitate communication and collaboration between educators and parents, fostering a supportive learning environment for learners. By promoting parental involvement, educators can enhance the effectiveness of MTB-MLE in Mathematics education and promote positive learning outcomes for all learners.

Melencion (2017) as cited by Tortola (2021), stated that some teachers are asked to teach some other language or vernacular, multilingual dialects that are unfamiliar to them. This points to the difficulty of using the MTBMLE since there are different variations of the mother tongue even in one locality.

Table 7

The Challenges Towards the Use of MTB-MLE as a Medium of Instruction in Mathematics Encountered by the Teachers in Bicol

Theme	Sub-theme	Experiences
Challenges of MTB-MLE in Mathematics	*Curriculum Alignment*	*Dito nga kami sa mtb-mle naglulukso ay kase hindi naman naming lahat nauunawaan ay kahit din ng mga bata, sa matematika naman ay may mga terms talaga na hindi talaga matra-translate sa mother tongue, kaya english na gagamtiin niyan kumbaga kailangan mo lang i-open sa bata na di mo yan kaya maintranslate sa tagalog, para alam nila kung ano ba ang mga pwedeng itranslate sa tagalog. Sa alignment di naman marami pa need eenhance.* *Ayan namang curriculum, bago yan niimplement pinag-aralan but in some aspect kulang sila sa preparation.* *Hindi po masyado kasi marami mga terms na kahit guro nahihirapan kasi nga kulang sa explanation si teacher ang nahihirapan magiisip pa siya kung pano ito translate* *Dati nga kasi English kailangan mo pa explain sa mother tongue nila so ngayon hindi na kasi nga ang gamit na ay mtb pero yong once tens hundreds naforce si teacher na ituro talaga ito* *English sa curriculum guide tapos ang itututuro ay tagalog translate na lng sa mtb nila siyempre align naman.* *May mga estudyanteng galing sa ibang lugar like Bicol kasi may mga bumabalik dito sa atin a naninirahan na don na ung bata yon na yong nakagisnan na experience ko na po yon ayon po nagresearch ako ng dialect nila.*

	Teacher Preparedness	*Hindi masyado kase nga kulang pa ako sa trainings* *Challenging talaga sa amin bilang guro lalo na at pagdaating ng grade 4 english na ang gamit nila sa Mathematics. Kahit pa sabihin na mother tongue ang hirap pa rin sa part namin lalo na kapag ang bata ay walang interest at mas gusto nila ay English lalo na pagdating sa bilang.* *Sa mga bagong guro walang training hirap pa sila Oo meron tayong mga trainings, pero pili lang ang naattend dito sa min.* *Kaya sana magbigay ng training pa sa mga guro para mas maimprove pa ang kakayahan nila sa paggamit ng mother tongue.*
	Parental Involvement	*Mahirap sa magulang kase limatado o depende rin kung nag-aabyad ang magulang sa kanilang mga anak na fo-follow up nila yun. May iba kase na sariling sikap ang estudyante, wala kang makukuhang suporta sa magulang lalo na kapag single mother na may trabaho o isang kahig isang tuka baga dun nagiging mahirap. Kaya dun na inaasa sa school lalo na kapag bakasyon pero kapag supportive ang parents makikita mo talaga na sobrang nageexcell ang bata sa klase kase nakaka follow up.* *Yan ang pinaka problema. Maganda yung mga bata na ang parents nila ay supportive or yung mga maalwan kase mas natutukan nila ang bata. At yung mga bata nasa strugglers or struggling learner, kase yung mga magulang ay nagtratrabaho kaya hindi na natutukan ang anak nila. At yung educational background nung parents, pano kung hindi rin alam ng magulang ang mga lessons pag nagtatanong ang bata. Yung textbook din kase dati ay iba ang textbook kase English talaga.*

		Parental attitudes minsan pag nagpapahomework ako halimbawa isulat ang numerong ito minsan mali ang pangalan ng bilang kinse , dos kase yon yong nakanayan ng parents.

Table 7 presents the challenges towards the use of MTB-MLE as a medium of instruction in Mathematics encountered by the teachers in Bicol.

Curriculum alignment highlights both the challenges and successes in aligning the Mother Tongue Multilingual Education (MTB-MLE) approach with the Mathematics curriculum in Bicol. Teachers express difficulties in translating certain mathematical terms into the mother tongue, necessitating the use of English for explanation. However, they also emphasize the importance of alignment between the curriculum and teaching practices, acknowledging the efforts made to ensure coherence and effectiveness in instruction. Teachers demonstrate adaptability in addressing challenges, such as providing translations for difficult terms, and recognize the value of implementing MTB-MLE despite its complexities.

Ensuring effective curriculum alignment requires ongoing collaboration and communication between educators, curriculum developers, and policymakers. Educational authorities should provide comprehensive guidance and resources to support teachers in aligning MTB-MLE with the Mathematics curriculum, including translations of difficult terms and clear guidelines for implementation. Additionally, professional development programs should equip teachers with the skills and knowledge needed to effectively integrate MTB-MLE into Mathematics instruction, fostering a deeper understanding of curriculum objectives and instructional strategies. By promoting alignment between the curriculum and teaching practices, educators can enhance the effectiveness of MTB-MLE in Mathematics education and improve learning outcomes for learners.

Teacher preparedness reflects the challenges and efforts involved in ensuring that educators are adequately trained and equipped to implement MTB-MLE in Mathematics instruction. Teachers express varying levels of preparedness, with some feeling confident in their training and others acknowledging the ongoing nature of professional development. Despite challenges, such as the transition to online training during the pandemic, teachers demonstrate a commitment to
continuous improvement and recognize the importance of training in enhancing their effectiveness as educators.

Enhancing teacher preparedness requires sustained investment in professional development opportunities that address the specific needs of educators in implementing MTB-MLE in Mathematics instruction. Educational authorities should provide ongoing

training and support that is aligned with curriculum objectives and instructional priorities. Additionally, mentorship programs and peer collaboration can facilitate knowledge sharing and skill development among educators, fostering a culture of continuous learning and improvement. By prioritizing teacher preparedness, educational stakeholders can enhance the quality of Mathematics education and promote positive learning outcomes for all learners.

Parental involvement underscores the challenges and importance of parental support in facilitating Learners learning in MTB-MLE Mathematics education. Teachers note the impact of parental attitudes and engagement on learners' success, highlighting the influence of factors such as parental availability, educational background, and willingness to support their children's learning. Challenges arise when parents lack the time, resources, or understanding to effectively support their children's education, leading to disparities in Learners' outcomes.

Promoting parental involvement requires targeted efforts to engage and support parents in their children's education, particularly in understanding and supporting MTB-MLE Mathematics instruction. Schools can provide resources and guidance to parents on how to support their children's learning at home, including translations of curriculum materials and strategies for reinforcing mathematical concepts. Additionally, schools can foster a culture of collaboration between educators and parents, encouraging open communication and mutual support. By addressing barriers to parental involvement and promoting a supportive home learning environment, educators can enhance learners' success in MTB-MLE Mathematics education.

Part III. The Coping Mechanism of Teachers in Addressing Challenges Encountered by the Teachers in Teaching Mathematics Using Mother-Tongued- Based Multilingual Instruction

Table 8
The Coping Mechanism of Teachers in Addressing Challenges Encountered by the Teachers in Teaching Mathematics Using Mother Tongue – Based Multilingual Instruction in Tagalog

Theme	Sub-theme	Experiences
Coping Mechanisms for Addressing Challenges	*Curriculum Alignment*	*Pinag - aaralang Mabuti ang lesson at gumagawa ng mga instructional materials na mas maiintindihan ng mga learners lalo ma yong mga salita o terms na kanilang ginagamit dahil minsan may mga salita pa rin sila na hindi maintindihan.* *Para mas Madali nilang matutunan Yong lesson mas pinapadali ko yong mga words na mhihirap Mas madali nilang maexpress yong sagot nila pag sila ay may mga group activity lalo na sa Grades 1-3.*

		Nagproprovide ng materials upang mas Madali nila maintindihan upang mas lalo silang maging confident sa paggamit ng mother tongue.pu Mas Madaling matutunan ng bata *Teachers can search and prepare the learner's strategies and methods in learning for the proper execution of lessons so that learners will understand it easily.*
	Teacher Preparedness	*Kapag MTB malaking tulong sa mga guro dahil nga mas nauunawaan din at mas naiipaliwanag ng guro ang mga lesson.* *Through different strategies and a more Interactive approach* *Prepared naman po dapat talaga ang mga guro.* *Siyempre dapat lagi tayong prepared laging gagawa ng paraan para maituro yong lesson* *Challenges face in preparedness help teachers to become more flexible in implementing strategies in order for the learners to understand more easily* *Yong mass training po mam pioneer kasi ang grade one noon pero sa tagal naman po nasanay.*
	Parental Involvement	*Minsan may mga parents na use sa ingles terms kay. medyo nahihiorapan sila pero ipinaliliwanag na lng po naming para mas maunawaan nila ito kapag may mga meetings* *Through parent academy naipapaliwanag sa mga magulang yong kanilang mga problema at natruturuan sila ng tama about MTB-MLE.* *Involving parents like sa mga meetings trainings para maintindihan nila ang gamit ng mother tounge instruction sa Mathematics.*

		Pagbibigay ng assignment para mas magkaroon sila ng time na magkasama and maging bonding na din nila. *Parents should be aware so that they should participate in the learning of their learners to help them and learned develop their skills* *Pagbibigay ng assignment para magkaroon ng update at learning ang bata at the same time magkakaroon sila ng time sa isat isa.*

Table 8 presents the coping mechanism of teachers in addressing challenges encountered by the Teachers in Teaching Mathematics using Mother Tongue – Based Multilingual Education in Tagalog. Curriculum alignment highlights the strategies employed by teachers to address challenges in implementing Mother Tongue Based Multilingual Education (MTB-MLE) in Mathematics instruction. Teachers emphasize the relevance of using the mother tongue in facilitating learners understanding and communication, particularly in group activities where learners can express their answers more confidently. MTB-MLE has also improved Learners confidence and learning outcomes, making it easier for them to grasp mathematical concepts. Teachers play a crucial role in searching for and preparing appropriate strategies and methods to ensure the effective execution of lessons and enhance Learners comprehension.

Encouraging the use of the mother tongue and implementing interactive and Learners-centered teaching strategies are key to addressing challenges in curriculum alignment. Professional development programs should equip teachers with a diverse repertoire of instructional strategies that cater to the linguistic and learning needs of learners. Additionally, schools can foster a collaborative learning environment where teachers share best practices and support each other in implementing MTB-MLE effectively. By promoting teacher innovation and collaboration, educators can enhance curriculum alignment and improve Learners engagement and learning outcomes in Mathematics education.

Teacher preparedness highlights the importance of ongoing training and support for educators in implementing MTB-MLE in Mathematics instruction. Teachers recognize the benefits of MTB-MLE in enhancing their understanding and explanation of lessons, particularly through the use of different strategies and interactive approaches. However, challenges exist, including the need for teachers to continuously adapt and find ways to effectively teach lessons. Mass training initiatives have been instrumental in introducing MTB-MLE, but ongoing support is essential for teachers to become more flexible and confident in implementing strategies.

Strengthening teacher preparedness requires sustained investment in professional development programs that provide ongoing training and support tailored to the needs of educators. Mentorship programs and peer collaboration can facilitate

knowledge sharing and skill development among teachers, promoting a culture of continuous learning and improvement. Educational authorities should prioritize the provision of resources and support to ensure that teachers have the necessary tools and skills to effectively implement MTB-MLE in Mathematics instruction. By investing in teacher preparedness, educational stakeholders can enhance the quality of Mathematics education and promote positive learning outcomes for all learners.

Parental involvement underscores the importance of engaging parents in supporting their children's learning in MTB-MLE Mathematics education. Teachers recognize the challenges faced by parents in understanding and supporting MTB-MLE, particularly when English terms are used. However, efforts such as parent academies and regular communication help bridge the gap and facilitate parental understanding and involvement. Assignments and activities also provide opportunities for parents to spend time with their children and support their learning at home. Promoting parental involvement requires collaborative efforts between schools and families to provide resources, information, and support for parents in understanding and supporting MTB-MLE Mathematics education. Schools can offer parent workshops, resources, and regular communication channels to facilitate parental engagement and understanding. Additionally, educators can provide assignments and activities that encourage parent-child interaction and support learning at home. By fostering partnerships between schools and families, educators can enhance parental involvement and promote positive learning outcomes for learners in MTB-MLE Mathematics education.

Table 9
The Coping Mechanism of Teachers in Addressing Challenges Encountered by the Teachers in Teaching Mathematics Using Mother Tongue – Based Multilingual Instruction in Bicol

Theme	Sub-theme	Experiences
Coping Mechanisms for Addressing Challenges	*Curriculum Alignment*	*Dito sa min Yung mother tongue instruction mas nahihirapan sila kaya English na ginagamit naming kase mas naiintidihan* *Dapat ang Curriculum guide ng Mathematics ay nakaalign diin sa mother tongue* *Pag ang mga learners ko ay bicol binibicol ko rin siyempre para mas maunawaan.* *Dito sa grade 3 sinisimulan ko na English mas nauunawaan nila para mas hand ana sila sa grade 4* *Don sa mga terminilogies na dapat malaman nila lalo na pagdating sa next level tinuturo ko na din.* *Ang mother tongue naman ay align kase nga mas naiintindihan nila pero pagdating sa grade 4 English na.*

	Teacher Preparedness	*Syempre mahirap, so bilang paghahanda bukod sa binibigay ng mga trainees, kung hindi effective sa kanila kailangan mong gumawa ng paraan para maiangkop o malaman kung ano ang effective sa mga bata.* *Pag prepare ang teacher, Kinakaya lagi naman at school heads and master teacher kasi nga sila madalas nadalo sa mga trainings. Pero dapat laging ready tayo, pag may bagong curriculum kailangan natin i-adapt para lahat ng nasa curriculum ay maituro natin sa mga bata.* *Prepare ka lng lagi gumagawa ako ng mga instructional materials na makatutulong at mas effective sa kanila para mas maitindihan nila ang lesson.* *Dapat si teacher ay maraming visual aids/instructional Materials para mas maintindihan ng bata.*
	Parental Involvement	*So kung ang parents sana ay malalim ang involvement sa bata mas magiging motivated o gaganahan mag-aral ang mga bata. Sinasabi naming ang mga problema sa mga bata para alam ng mga magulang. Ganun ang nagiging hirap ng isang teacher kapag involve na ang magulang* *Kailangan talaga natin ng tulong ng parental involvement, hindi lang yung slow learners ang kailangan turuan sa bahay, kailangan ay lahat sila. Meron tayong meeting kung saan tinatalakay natin yung problems and kung paano sila makakatulong sa bata, kaya humihingi ng tulong sa magulang na turuan sa pagdidisplina ng mga bata. Mayron tayong gc kung saan ibinabahagi natin ang mga updates tungkol sa bata at sa nangyayari sa eskwelahan.*

		Kapag may meetings sinasabi sa mga parents ang problema sa mga bata lalo na sa Mathematics. *Patawag ng meeting sa parent's para mas malaman nila ang mga problems and issue ng bata lalo na pagdating sa kanilang learning sa Mathematics.*

Table 9 presents the coping mechanism of teachers in addressing challenges encountered by the teachers in teaching Mathematics using Mother Tongue –Multilingual Education in Bicol

The coping mechanisms for curriculum alignment in Bicol emphasize the importance of ensuring that instructional materials and teaching methods are aligned with the curriculum to enhance learners' understanding and skills. Teachers highlight the effectiveness of using the mother tongue in instruction, as it facilitates better comprehension and communication among learners. However, challenges arise when learners transition to higher grades where English becomes the medium of instruction. Despite this, teachers adapt their teaching strategies to ensure that learners grasp the necessary terminologies and concepts, thus maintaining alignment with the curriculum.

It implies that educators need ongoing support and resources to ensure that instructional materials and methods align with curriculum objectives. Professional development programs should focus on equipping teachers with effective strategies for teaching in multilingual environments and transitioning learners between language mediums. Additionally, collaboration between educators and curriculum developers is essential to ensure that instructional materials are culturally and linguistically relevant to learners. By prioritizing alignment with the curriculum, educators can enhance the effectiveness of instruction and promote positive learning outcomes for learners in Bicol.

The coping mechanisms for teacher preparedness highlight the importance of continuous professional development and adaptability in addressing challenges in implementing Mother Tongue Multilingual Education (MTB-MLE) in Mathematics instruction. Teachers emphasize the need for flexibility and resourcefulness in adapting to new curricula and finding effective teaching methods for learners. They also stress the importance of visual aids and instructional materials in enhancing Learners understanding and engagement in the classroom. Enhancing teacher preparedness requires ongoing support and training that addresses the specific needs of educators in Bicol. Professional development programs should provide opportunities for teachers to learn and share effective instructional strategies, adapt to new curricular requirements, and utilize visual aids and instructional materials effectively. Additionally, mentorship programs and peer collaboration can facilitate knowledge sharing and skill development among teachers,

fostering a culture of continuous learning and improvement. By investing in teacher preparedness, educational stakeholders can enhance the quality of Mathematics education and promote positive learning outcomes for all learners.

The coping mechanisms for parental involvement underscore the importance of engaging parents in supporting their children's learning in Mathematics education. Teachers recognize the positive impact of parental involvement on Learners' motivation and academic success and actively seek to involve parents in their children's education through communication, meetings, and assignments. By fostering collaboration between educators and parents, teachers aim to address Learners' needs more effectively and promote a supportive learning environment both at school and at home.

Promoting parental involvement requires collaborative efforts between schools and families to provide resources, information, and support for parents in Bicol. Schools can offer workshops, communication channels, and regular meetings to facilitate parental engagement and understanding of their children's educational needs. Additionally, educators can provide assignments and activities that encourage parent-child interaction and support learning at home. By fostering partnerships between schools and families, educators can enhance parental involvement and promote positive learning outcomes for learners in Mathematics education.

According to Tortola (2021), most of the teachers became innovative in finding solutions to address the needs and problems of the learners. Teachers spent time in surfing the internet to look for additional resources since the Mathematics book has very limited resources. They downloaded instructional materials needed like worksheets and enhancement activities to enrich the learning of the learners. Some teachers claimed that when they encountered difficulties in deep terms or highly localized in Sinugbuanong Binisaya, they would ask the senior teacher or the co-teacher who was familiar with the terms. One way to make lessons easier to understand is the use of context clue. During classroom observation, the teacher simplified an unfamiliar term to simple Binisaya term. In situations like this, there is a need for a fluent teacher in the medium of instruction or in the mother tongue of her/his learners.

Part IV. Program to Enhance the Sustainability and Effectiveness of Using Mother Tongue in Teaching Mathematics

The program aimed at enhancing the sustainability and effectiveness of using the mother tongue in teaching Mathematics encompasses various critical aspects. Firstly, it is imperative for governments to officially endorse and support the integration of Mother Tongue-Based Multilingual Education (MTB-MLE) in Mathematics instruction, allocating resources and developing programs. Curriculum developers should ensure alignment between Mathematics curricula and MTB-MLE principles, incorporating culturally relevant content and indigenous knowledge. Furthermore, comprehensive teacher training and professional development programs are essential to equip educators with the necessary skills and strategies for effective implementation. The production of high-quality instructional materials in local languages is also vital to support teachers and learners in

the learning process. Additionally, fostering parent and community involvement is crucial for garnering support and creating a conducive learning environment. Regular monitoring and evaluation mechanisms should be established to assess program implementation and inform improvements. Finally, ongoing research and knowledge-sharing initiatives are necessary to document best practices and inform policy and practice. Through these concerted efforts, stakeholders can contribute to the sustainability and effectiveness of using the mother tongue in teaching Mathematics, ultimately promoting inclusive and culturally responsive education for all learners. The complete proposed program is in Appendix

DISCUSSION

Table 2 presents the positive experiences of teachers utilizing Mother Tongue Based Multilingual Education (MTB-MLE) in teaching Mathematics in primary education, particularly in Tagalog, three main themes emerge from the data: Learners Engagement, Conceptual Clarity, and Teaching Effectiveness, each highlighting specific advantages observed by the teachers.

In terms of pupil's Engagement, teachers report that learners understand lessons better and can answer questions more readily when taught in their mother tongue. This improved comprehension leads to more active participation and immediate responses to teacher inquiries. Furthermore, using Tagalog reduces learners' fear or shame, encouraging them to participate more willingly in classroom activities. The cultural relevance of commands and instructions in Tagalog resonates more deeply with learners, fostering a sense of connection and comfort in the learning environment.

When it comes to Conceptual Clarity, the use of the mother tongue simplifies problem-solving for learners. Mathematical concepts and problems explained in Tagalog are easier for learners to grasp and analyze. Teachers also find that instructions given in the mother tongue are clearer, helping learners to understand and complete their lessons and exams more effectively. This clarity leads to improved cooperation among learners' as they can better comprehend and follow the tasks assigned to them.

Regarding Teaching Effectiveness, teachers observe that learners' mean percentage scores have improved, indicating better academic performance. The use of Tagalog encourages all learners to participate in activities and solve problems correctly, demonstrating the effectiveness of this teaching approach. Additionally, teachers find it easier to prepare materials and conceptualize teaching strategies when using Tagalog, which enhances their overall teaching effectiveness. Despite some challenges in translating technical mathematical terms, the overall benefits of using the mother tongue outweigh these difficulties, resulting in more effective teaching.

It implies that the positive experiences of teachers in using Tagalog as MTB-MLE in teaching Mathematics underscore its potential to enhance learning outcomes and

promote learners' engagement. By addressing challenges and leveraging the benefits of MTB-MLE, educators can create a more effective and inclusive learning environment that caters to the diverse linguistic needs of learners in primary education.

Table 3 presents the negative experiences of teachers in teaching Mathematics in primary using Tagalog as mother tongue based multilingual education.

Teachers face significant challenges in teaching Mathematics using Mother Tongue Based Multilingual Education (MTB), particularly due to language barriers. learners, especially those from different linguistic backgrounds, struggle to grasp mathematical concepts presented in Tagalog, even though they are more accustomed to their mother tongue. This leads to difficulties in communication and comprehension, hindering effective teaching and learning. To address language barriers, educators need to adopt diverse instructional strategies that cater to the linguistic diversity of learners. This may include providing bilingual or multilingual resources, offering language support programs, and fostering a culturally responsive learning environment. Additionally, teacher training programs should focus on equipping educators with the necessary skills and tools to effectively teach Mathematics in multilingual settings, thereby improving learner engagement.

The reception of Mother Tongue Based Multilingual Education (MTB) in Mathematics varies among learners, influenced by factors such as language background and instructional support. Some learners may struggle to understand mathematical concepts presented in Tagalog, leading to confusion and frustration. However, with adequate support and encouragement, learners demonstrate resilience and willingness to learn, highlighting the importance of fostering a supportive learning environment. Educators must prioritize creating inclusive learning environments where learners feel supported and valued, regardless of their language background. This involves providing individualized support to learners who may struggle with language comprehension, implementing collaborative learning activities that promote peer interaction and support, and celebrating linguistic and cultural diversity in the classroom. By addressing learners' diverse needs and fostering a positive learning environment, educators can enhance learners reception of MTB in Mathematics and promote equitable access to education for all learners.

Resource limitations pose significant challenges to the implementation of Mother Tongue Based Multilingual Education (MTB) in Mathematics, impacting the quality of instruction and learning outcomes. Teachers often lack sufficient instructional materials and training opportunities, forcing them to create local materials and adapt teaching strategies to address resource gaps. This not only consumes valuable time and effort but also affects the effectiveness of teaching and learning. Addressing resource limitations requires a multi-faceted approach that involves both policy-level interventions and localized strategies. Governments and educational authorities should prioritize investment in education infrastructure, including the provision of adequate instructional materials, training opportunities for teachers, and support for curriculum development in local languages. Additionally, educators can leverage existing resources more efficiently

through collaborative networks, sharing best practices, and tapping into community resources. By addressing resource limitations comprehensively, educators can enhance the implementation of MTB in Mathematics and improve Learners learning outcomes.

Furthermore, a balance between mastery of the facts of higher order thinking skills translated into the native dialect must be forged by the teachers in their choice of a teaching strategy, selecting appropriate teaching strategy and suited for the level of the learner, and mastery of prerequisite knowledge or concept as translated in the native dialect (Ball, 2010) as cited by Tortola (2021)

Table 4 presents the positive experiences of teachers employing Bicol as their Mother Tongue Based Multilingual Education (MTB-MLE) in teaching Mathematics in the Bicol region focusing on learners engagement, conceptual clarity, and teaching effectiveness.

Teachers observe that using MTB-MLE significantly enhances engagement, especially when lessons are translated into Tagalog or Bicol. Most learners are Bicolano, and they respond better to instruction in their native language, leading to more productive lessons. This approach helps learners comprehend better and participate more actively. Teachers note that learners understand problem situations better in their mother tongue compared to English, which was previously used. Although there are challenges with terminology differences, especially when transitioning between Tagalog and Bicol, the overall engagement and confidence of learners have increased. This boost in confidence is attributed to their improved understanding of the lessons, facilitated by the use of their mother tongue.

Using the mother tongue in teaching mathematical concepts enhances learners' understanding and clarity. Teachers find that instructions are clearer, and learners' grasp mathematical terms and concepts more effectively. When learners speak and learn in their mother tongue, they can express themselves better and engage more meaningfully in problem-solving activities. This clarity extends to specific instructions, making it easier for learners to follow along and respond accurately. Teachers report that 'earners immediately understand and apply instructions when taught in their mother tongue, reducing the need for repeated explanations. This immediate comprehension leads to smoother classroom interactions and better academic performance in Mathematics.

Teachers experience improved teaching effectiveness with the use of Bicol as MTB-MLE. Daily instruction in the mother tongue helps learners understand lessons more easily, leading to better academic outcomes. Although there is a noted challenge when learners transition to higher grades where English is the primary medium of instruction, the foundational understanding built through MTB-MLE remains beneficial. Teachers find that using materials in the mother tongue makes lessons more effective and helps learners quickly grasp and retain mathematical concepts. This effectiveness is particularly evident in exams, where learners demonstrate quicker understanding and accurate responses. Teachers emphasize that being effective in their instruction is crucial for expanding learners learning and understanding. Overall, the use of the mother tongue

proves to be an effective strategy in enhancing the teaching and learning process in primary Mathematics education.

The positive experiences with MTB-MLE in Bicol highlight the need for educational policies that support multilingual education, especially in regions with diverse linguistic backgrounds. Developing comprehensive bilingual or multilingual resources can help standardize terminology and improve understanding. Providing continuous professional development and training for teachers in MTB-MLE methodologies is essential to equip them with effective strategies for engaging learners and enhancing conceptual clarity. Allocating adequate resources, including textbooks and teaching aids in both Tagalog and regional dialects, is crucial to support MTB-MLE. Additionally, involving parents and the community in the educational process can reinforce classroom learning and provide additional support for learners. Regular assessment and feedback mechanisms can help identify best practices and areas for improvement, ensuring the sustained success of MTB-MLE programs. By addressing these implications, the effectiveness of teaching Mathematics in primary education using MTB-MLE in Bicol can be further enhanced, leading to better academic outcomes and Learners' engagement.

According to Englis, & Boholano (2021), the use of mother-tongue in teaching Mathematics is effective in acquiring Mathematical knowledge. The teachers are well-prepared in terms of content and instructional material preparation. Moreover, the contextualized and innovative model in teaching Mathematics using mother-tongue helps in acquiring basic skills in Mathematics hence, in order to help the Mathematics teachers in making use of this model, this finding would be a great help to the primary teachers in Mathematics as well as the institution the value of contextualization and innovation as core functions in teaching strategies where the school administrators will continually support the teachers development plan and provide the tools and equipment needed on teaching.

Table 5 presents the negative experiences of teachers in teaching Mathematics in primary using Mother Tongue Based Multilingual Instruction in Bicol

The experience of language barriers in Mother Tongue Based Multilingual Education (MTB-MLE) in Bicol underscores the complexity of linguistic diversity in educational settings. Teachers face challenges in translating mathematical concepts from Tagalog to Bicol, as some terms may not have direct equivalents. Additionally, Learnerss may struggle with deeper concepts like problem-solving due to language limitations, impacting their comprehension and learning experiences. Despite efforts to bridge the language gap, such as using English for clarification, challenges persist for both learners' and teachers, particularly when learners come from different linguistic backgrounds.

The reception of MTB-MLE in Mathematics among learners in Bicol varies based on individual abilities, linguistic backgrounds, and previous experiences with Mathematics instruction. While MTB-MLE may be effective for some learners, others may struggle, particularly if they come from different linguistic backgrounds or have varying levels of mathematical proficiency. Teachers play a crucial role in supporting Learners

understanding by providing language support and adapting instructional strategies to meet diverse learning needs. However, challenges persist, particularly when learners' transition from day care to Grade I, where they may encounter difficulties due to language preferences and writing conventions.

Resource limitations pose significant challenges to the effective implementation of MTB-MLE in Mathematics instruction in Bicol. Teachers lack adequate instructional materials, including books and digital resources, impacting their ability to deliver high-quality instruction. Despite efforts to supplement resources with internet access and teacher guides, limitations persist, leading to reliance on shared materials and improvised teaching methods. Additionally, challenges arise in accessing indigenous materials and ensuring equitable distribution of resources across schools.

It implies that language barriers require a multi-pronged approach that acknowledges the diverse linguistic landscape of the classroom. Educators should collaborate with local communities to develop comprehensive language resources that cater to the specific needs of learners, including translations of mathematical terms and concepts. Professional development programs should focus on equipping teachers with strategies for effectively teaching in multilingual environments, such as code-switching and incorporating culturally relevant examples. Moreover, educational policies should prioritize the inclusion of diverse languages in curriculum development and instructional materials, ensuring equitable access to education for all learners. Enhancing Learners reception of MTB-MLE in Mathematics requires a holistic approach that addresses individual learning needs and linguistic diversity. Educators should implement differentiated instruction strategies that accommodate diverse learning styles and abilities, providing additional support for learners' who may struggle with mathematical concepts. Furthermore, collaboration between educators, parents, and communities is essential to create a supportive learning environment that values linguistic diversity and promotes academic success for all earners. By fostering a culture of inclusivity and support, educators can empower learners to overcome challenges and thrive in Mathematics education. Moreover, resource limitations required systemic changes at both policy and practice levels. Educational authorities should prioritize investment in educational infrastructure, including the provision of sufficient instructional materials and digital resources, to support effective teaching and learning. Furthermore, professional development programs should equip teachers with the skills and knowledge to utilize available resources effectively and adapt teaching strategies to meet diverse learning needs. Collaborative efforts between government agencies, educational institutions, and community stakeholders are essential to ensure equitable access to resources and promote educational equity in Bicol and beyond.

Table 6 presents the challenges towards the used of MTB-MLE as a medium of instruction in Mathematics were encountered by the teachers in Tagalog. Curriculum alignment highlights the challenges and successes of aligning the Mother Tongue Based Multilingual Education (MTB-MLE) approach with the Mathematics curriculum. Teachers express varying degrees of ease or difficulty in implementing MTB-MLE in Mathematics instruction, depending on their familiarity with the curriculum and the training they have

received. While some teachers find it relatively easy to align the MTB-MLE approach with the curriculum, others struggle due to complex mathematical terminologies and lack of training. Despite these challenges, teachers acknowledge the benefits of using MTB-MLE, particularly in helping both teachers and learners understand lesson objectives and execute activities effectively. Enhancing curriculum alignment requires targeted support for teachers, including comprehensive training on curriculum objectives and strategies for integrating MTB-MLE in Mathematics instruction. Professional development programs should focus on building teachers' capacity to effectively translate complex mathematical concepts into mother tongue languages and adapt instructional materials to suit diverse learning needs. Additionally, educational authorities should provide ongoing guidance and resources to support teachers in aligning MTB-MLE with the Mathematics curriculum, ensuring consistency and effectiveness in teaching practices.

Teacher preparedness underscores the challenges faced by teachers in implementing MTB-MLE in Mathematics due to inadequate training and preparation.

Promoting parental involvement in MTB-MLE requires targeted outreach and support initiatives that empower parents to actively engage in their children's education. Schools and educational authorities should provide resources and information in languages accessible to parents, including translations of curriculum materials and guidance on how to support MTB-MLE at home. Additionally, parent-teacher collaboration platforms and workshops can facilitate communication and collaboration between educators and parents, fostering a supportive learning environment for learners. By promoting parental involvement, educators can enhance the effectiveness of MTB-MLE in Mathematics education and promote positive learning outcomes for all learners.

Melencion (2017) as cited by Tortola (2021), stated that some teachers are asked to teach some other language or vernacular, multilingual dialects that are unfamiliar to them. These points to the difficulty of using the MTBMLE since there are different variations of the mother tongue even in one locality.

Table 7 presents the challenges towards the used of MTB-MLE as a medium of instruction in Mathematics were encountered by the teachers in Bicol.

Curriculum alignment highlights both the challenges and successes in aligning the Mother Tongue Based Multilingual Education (MTB-MLE) approach with the Mathematics curriculum in Bicol. Teachers express difficulties in translating certain mathematical terms into the mother tongue, necessitating the use of English for explanation. However, they also emphasize the importance of alignment between the curriculum and teaching practices, acknowledging the efforts made to ensure coherence and effectiveness in instruction. Teachers demonstrate adaptability in addressing challenges, such as providing translations for difficult terms, and recognize the value of implementing MTB-MLE despite its complexities.

Ensuring effective curriculum alignment requires ongoing collaboration and communication between educators, curriculum developers, and policymakers.

Educational authorities should provide comprehensive guidance and resources to support teachers in aligning MTB-MLE with the Mathematics curriculum, including translations of difficult terms and clear guidelines for implementation. Additionally, professional development programs should equip teachers with the skills and knowledge needed to effectively integrate MTB-MLE into Mathematics instruction, fostering a deeper understanding of curriculum objectives and instructional strategies. By promoting alignment between the curriculum and teaching practices, educators can enhance the effectiveness of MTB-MLE in Mathematics education and improve learning outcomes for learners.

Teacher preparedness reflects the challenges and efforts involved in ensuring that educators are adequately trained and equipped to implement MTB-MLE in Mathematics instruction. Teachers express varying levels of preparedness, with some feeling confident in their training and others acknowledging the ongoing nature of professional development. Despite challenges, such as the transition to online training during the pandemic, teachers demonstrate a commitment to
continuous improvement and recognize the importance of training in enhancing their effectiveness as educators.

Enhancing teacher preparedness requires sustained investment in professional development opportunities that address the specific needs of educators in implementing MTB-MLE in Mathematics instruction. Educational authorities should provide ongoing training and support that is aligned with curriculum objectives and instructional priorities. Additionally, mentorship programs and peer collaboration can facilitate knowledge sharing and skill development among educators, fostering a culture of continuous learning and improvement. By prioritizing teacher preparedness, educational stakeholders can enhance the quality of Mathematics education and promote positive learning outcomes for all learners.

Parental involvement underscores the challenges and importance of parental support in facilitating Learners learning in MTB-MLE Mathematics education. Teachers note the impact of parental attitudes and engagement on learners success, highlighting the influence of factors such as parental availability, educational background, and willingness to support their children's learning. Challenges arise when parents lack the time, resources, or understanding to effectively support their children's education, leading to disparities in Learners outcomes.

Promoting parental involvement requires targeted efforts to engage and support parents in their children's education, particularly in understanding and supporting MTB-MLE Mathematics instruction. Schools can provide resources and guidance to parents on how to support their children's learning at home, including translations of curriculum materials and strategies for reinforcing mathematical concepts. Additionally, schools can foster a culture of collaboration between educators and parents, encouraging open communication and mutual support. By addressing barriers to parental involvement and promoting a supportive home learning environment, educators can enhance learners success in MTB-MLE Mathematics education.

Table 8 presents the coping mechanism of teachers in addressing challenges encountered by the Teachers in Teaching Mathematics using Mother Tongue – Based Multilingual Education in Tagalog. Curriculum alignment highlights the strategies employed by teachers to address challenges in implementing Mother Tongue Based Multilingual Education (MTB-MLE) in Mathematics instruction. Teachers emphasize the relevance of using the mother tongue in facilitating learners understanding and communication, particularly in group activities where learners can express their answers more confidently. MTB-MLE has also improved Learners confidence and learning outcomes, making it easier for them to grasp mathematical concepts. Teachers play a crucial role in searching for and preparing appropriate strategies and methods to ensure the effective execution of lessons and enhance Learners comprehension.

Encouraging the use of the mother tongue and implementing interactive and Learners-centered teaching strategies are key to addressing challenges in curriculum alignment. Professional development programs should equip teachers with a diverse repertoire of instructional strategies that cater to the linguistic and learning needs of learners. Additionally, schools can foster a collaborative learning environment where teachers share best practices and support each other in implementing MTB-MLE effectively. By promoting teacher innovation and collaboration, educators can enhance curriculum alignment and improve Learners engagement and learning outcomes in Mathematics education.

Teacher preparedness highlights the importance of ongoing training and support for educators in implementing MTB-MLE in Mathematics instruction. Teachers recognize the benefits of MTB-MLE in enhancing their understanding and explanation of lessons, particularly through the use of different strategies and interactive approaches. However, challenges exist, including the need for teachers to continuously adapt and find ways to effectively teach lessons. Mass training initiatives have been instrumental in introducing MTB-MLE, but ongoing support is essential for teachers to become more flexible and confident in implementing strategies.

Strengthening teacher preparedness requires sustained investment in professional development programs that provide ongoing training and support tailored to the needs of educators. Mentorship programs and peer collaboration can facilitate knowledge sharing and skill development among teachers, promoting a culture of continuous learning and improvement. Educational authorities should prioritize the provision of resources and support to ensure that teachers have the necessary tools and skills to effectively implement MTB-MLE in Mathematics instruction. By investing in teacher preparedness, educational stakeholders can enhance the quality of Mathematics education and promote positive learning outcomes for all learners.

Parental involvement underscores the importance of engaging parents in supporting their children's learning in MTB-MLE Mathematics education. Teachers recognize the challenges faced by parents in understanding and supporting MTB-MLE, particularly when English terms are used. However, efforts such as parent academies and regular communication help bridge the gap and facilitate parental understanding and

involvement. Assignments and activities also provide opportunities for parents to spend time with their children and support their learning at home. Promoting parental involvement requires collaborative efforts between schools and families to provide resources, information, and support for parents in understanding and supporting MTB-MLE Mathematics education. Schools can offer parent workshops, resources, and regular communication channels to facilitate parental engagement and understanding. Additionally, educators can provide assignments and activities that encourage parent-child interaction and support learning at home. By fostering partnerships between schools and families, educators can enhance parental involvement and promote positive learning outcomes for learners in MTB-MLE Mathematics education.

Table 9 presents the coping mechanism of teachers in addressing challenges encountered by the teachers in teaching Mathematics using Mother Tongue-Based Multilingual Education in Bicol

The coping mechanisms for curriculum alignment in Bicol emphasize the importance of ensuring that instructional materials and teaching methods are aligned with the curriculum to enhance learner's understanding and skills. Teachers highlight the effectiveness of using the mother tongue in instruction, as it facilitates better comprehension and communication among learners. However, challenges arise when learners transition to higher grades where English becomes the medium of instruction. Despite this, teachers adapt their teaching strategies to ensure that learners grasp the necessary terminologies and concepts, thus maintaining alignment with the curriculum.

It implies that educators need ongoing support and resources to ensure that instructional materials and methods align with curriculum objectives. Professional development programs should focus on equipping teachers with effective strategies for teaching in multilingual environments and transitioning learners between language mediums. Additionally, collaboration between educators and curriculum developers is essential to ensure that instructional materials are culturally and linguistically relevant to learners. By prioritizing alignment with the curriculum, educators can enhance the effectiveness of instruction and promote positive learning outcomes for learners' in Bicol.

The coping mechanisms for teacher preparedness highlight the importance of continuous professional development and adaptability in addressing challenges in implementing Mother Tongue Based Multilingual Education (MTB-MLE) in Mathematics instruction. Teachers emphasize the need for flexibility and resourcefulness in adapting to new curricula and finding effective teaching methods for learners. They also stress the importance of visual aids and instructional materials in enhancing Learners understanding and engagement in the classroom. Enhancing teacher preparedness requires ongoing support and training that addresses the specific needs of educators in Bicol. Professional development programs should provide opportunities for teachers to learn and share effective instructional strategies, adapt to new curricular requirements, and utilize visual aids and instructional materials effectively. Additionally, mentorship programs and peer collaboration can facilitate knowledge sharing and skill development among teachers, fostering a culture of continuous learning and improvement. By investing in teacher

preparedness, educational stakeholders can enhance the quality of Mathematics education and promote positive learning outcomes for all learners.

The coping mechanisms for parental involvement underscore the importance of engaging parents in supporting their children's learning in Mathematics education. Teachers recognize the positive impact of parental involvement on Learners motivation and academic success and actively seek to involve parents in their children's education through communication, meetings, and assignments. By fostering collaboration between educators and parents, teachers aim to address Learners needs more effectively and promote a supportive learning environment both at school and at home.

Promoting parental involvement requires collaborative efforts between schools and families to provide resources, information, and support for parents in Bicol. Schools can offer workshops, communication channels, and regular meetings to facilitate parental engagement and understanding of their children's educational needs. Additionally, educators can provide assignments and activities that encourage parent-child interaction and support learning at home. By fostering partnerships between schools and families, educators can enhance parental involvement and promote positive learning outcomes for learners' in Mathematics education.

According to Tortola (2021), most of the teachers became innovative in finding solutions to address the needs and problems of the learners. Teachers spent time in surfing the internet to look for additional resources since the Mathematics book has very limited resources. They downloaded instructional materials needed like worksheets and enhancement activities to enrich the learning of the learners. Some teachers claimed that when they encountered difficulties in deep terms or highly localized in Sinugbuanong Binisaya, they would ask the senior teacher or the co-teacher who was familiar with the terms. One way to make lessons easier to understand is the use of context clue. During classroom observation, the teacher simplified an unfamiliar term to simple Binisaya term. In situations like this, there is a need for a fluent teacher in the medium of instruction or in the mother tongue

Summary

This study was conducted to explore the experiences of teachers in teaching Mathematics using Mother Tongue – Based Multilingual Education across South Luzon. The qualitative research is designed to gain in-depth insights into the experiences, challenges, and strategies of teachers in South Luzon. Qualitative research is well-suited for exploring complex phenomena and understanding the lived experiences of participants. This design allows for a nuanced exploration of the multifaceted aspects of MTB-MLE in Mathematics instruction. The study is to be conducted across selected elementary schools in Quezon and Bicol Regions. The researcher chose schools in Quezon, namely, Pedro Cabangon Elementary School Located at Brgy. Mascariña, Quezon, Quezon and Del Pilar Elementary School Located at Brgy. Del Pilar Quezon, Quezon. While across the Bicol Region, Dygico Elementary School Sta Elena Camarines Norte and San Pedro Elementary School San Pedro, Camarines Norte. The researcher

participants are composed of 6 teachers in Quezon District who are actively teaching MTB-MLE and teachers from Grades 1-3 in Dygico Elementary School and San Pedro Elementary School. The choice of South Luzon is based on its linguistic diversity and the significant implementation of MTB-MLE in the region.

The research population for this study encompasses educators based in South Luzon actively engaged in instructing Mathematics through the Mother Tongue-Based Multilingual Education (MTB-MLE) framework. This diverse group of teachers represents various linguistic backgrounds and spans different educational levels. To ensure a comprehensive and representative sample, a purposive sampling technique will be utilized. near the researcher's These chosen schools were specifically identified for their implementation of MTB-MLE in Tagalog, and Bicol languages, aligning with the study's focus on multilingual instructional contexts. The primary data collection instrument will be interviews and observations. An interview guide will be developed, consisting of open-ended questions designed to elicit teachers' experiences, challenges, strategies, and perceptions regarding MTB-MLE in Mathematics instruction. The interview guide will be pre-tested to ensure clarity and effectiveness.

Findings

The study yielded the following findings.

The study yielded the following findings.

1. The positive and negative experiences of teachers in teaching Mathematics in primary using Mother Tongue - Based Multilingual Instruction.

    1.1 The positive experiences of teachers in teaching Mathematics in primary using Mother Tongue Multilingual Education. Mother Tongue Based Multilingual Education (MTB-MLE) in Tagalog. Learners Engagement, Conceptual Clarity, and Teaching Effectiveness, each showcasing specific benefits observed by teachers. Teachers note that learners understand lessons better and can respond more readily when taught in their mother tongue, Tagalog. This improved comprehension leads to more active participation and quicker responses. Additionally, using Tagalog reduces learners' fear or shame, encouraging more willing participation in classroom activities. The cultural relevance of Tagalog commands and instructions resonates deeply, fostering a sense of connection and comfort in the learning environment. The use of the mother tongue simplifies problem-solving for learners. Mathematical concepts and problems explained in Tagalog are easier for learners to grasp and analyze. Teachers find that instructions given in the mother tongue are clearer, helping Learners understand and complete their lessons and exams more effectively. This clarity enhances learners’ cooperation as they better comprehend and follow assigned tasks. Furthermore, teachers observe improved academic performance, as indicated by higher mean percentage scores. The use of Tagalog encourages all learners to participate in activities and solve problems correctly, demonstrating the effectiveness of this teaching

approach. Additionally, it is easier for teachers to prepare materials and conceptualize teaching strategies when using Tagalog, enhancing their overall teaching effectiveness. Despite some challenges in translating technical mathematical terms, the benefits of using the mother tongue outweigh these difficulties, resulting in more effective teaching. The positive experiences of teachers using MTB-MLE (Mother Tongue-Based Multilingual Education) in teaching Mathematics highlight its potential to enhance learning outcomes and promote Learner engagement. By addressing challenges and leveraging the benefits of MTB-MLE, educators can create a more effective and inclusive learning environment that caters to the diverse linguistic needs of primary education learners.

1.2 The positive experiences of teachers in teaching Mathematics in primary using Mother tongue-based Multilingual Education. Mother Tongue-Based Multilingual Education (MTB-MLE) in Bicol. Teachers observe that using MTB-MLE (Mother Tongue-Based Multilingual Education) significantly enhances Learner's engagement, especially when lessons are translated into Tagalog or Bicol. Most learners, being Bicolano, respond better to instruction in their native language, leading to more productive lessons and active participation. Although there are terminology challenges, the overall Learners' engagement and confidence have increased due to better comprehension of lessons. Using the mother tongue in teaching mathematical concepts improves learners' understanding and clarity. Instructions are clearer, and learners grasp terms and concepts more effectively, leading to smoother classroom interactions and better academic performance.

Teachers also experience improved teaching effectiveness with MTB-MLE. Lessons in the mother tongue result in better academic outcomes, and while transitioning to English in higher grades is challenging, the foundational understanding built through MTB-MLE remains beneficial. The use of mother tongue materials makes lessons more effective, helping learners quickly grasp and retain concepts.

The positive experiences with MTB-MLE in Bicol highlight the need for policies supporting multilingual education. Developing bilingual resources, providing teacher training, and involving the community can enhance the effectiveness of MTB-MLE, leading to better academic outcomes and Learner engagement.

2. The negative experiences of teachers in teaching Mathematics in primary using Mother Tongue-Based Multilingual Instruction. ,

2.1 The negative experiences of teachers in teaching Mathematics in primary using Mother Tongue Multilingual Education. Mother Tongue Based Multilingual Instruction (MTB-MLE) in Tagalog. Teachers face significant challenges in teaching Mathematics using Mother Tongue-Based Multilingual Education (MTB-

MLE) due to language barriers. learners from diverse linguistic backgrounds struggle with mathematical concepts in Tagalog, leading to difficulties in communication and comprehension. To address these issues, educators need to adopt diverse instructional strategies, provide bilingual resources, offer language support programs, and foster culturally responsive learning environments. Teacher training should equip educators with skills to teach in multilingual settings, enhancing Learner's engagement.

The reception of MTB-MLE in Mathematics varies among learners, with some struggling to understand concepts in Tagalog. However, with adequate support, learners show resilience and willingness to learn. Educators must create inclusive learning environments, provide individualized support, implement collaborative learning activities, and celebrate linguistic diversity. This improves Learners' reception of MTB-MLE and promotes equitable education.

Resource limitations also pose significant challenges, impacting instruction quality. Teachers often lack sufficient materials and training, leading to resource gaps. Addressing these limitations requires policy-level interventions and localized strategies. Governments should invest in educational infrastructure, provide instructional materials and training, and support curriculum development. Educators can leverage resources through collaborative networks and community involvement, enhancing MTB-MLE implementation and improving Learner's outcomes.

2.2 The negative experiences of teachers in teaching Mathematics in primary using Mother Tongue-Based Multilingual Instruction. Mother Tongue-Based Multilingual Education (MTB-MLE) in Bicol. Language barriers in MTB-MLE in Bicol complicate education, as translating mathematical concepts from Tagalog to Bicol is challenging. This affects learners' comprehension and problem-solving skills, despite using English for clarification. The reception of MTB-MLE in Mathematics varies among learners, influenced by their linguistic backgrounds and prior math experiences. Teachers play a crucial role in supporting learners, but challenges persist, especially during transitions from daycare to Grade I. Resource limitations, such as insufficient instructional materials, further hinder effective MTB-MLE implementation, despite efforts to supplement with internet access and shared materials.

3. The challenges towards the use of MTB-MLE as a medium of instruction in

Mathematics encountered by the teachers.

3.1 The teachers in Tagalog encountered challenges in using MTB-MLE as a medium of instruction in Mathematics. the challenges encountered by Tagalog-speaking teachers in using MTB-MLE as a medium of instruction in Mathematics are Curriculum alignment poses difficulties for teachers in effectively integrating MTB-MLE

with the Mathematics curriculum, with varying degrees of ease depending on their familiarity and training. Despite challenges, teachers recognize the benefits of MTB-MLE in clarifying lesson objectives and activities. To enhance alignment, targeted support through comprehensive training and ongoing guidance is necessary. Teacher preparedness is hindered by inadequate training, emphasizing the need for professional development programs tailored to address curriculum alignment, language proficiency, and instructional strategies. Improving teacher preparedness is essential for equitable and effective MTB-MLE implementation. Parental involvement varies, with some parents actively supporting their children's learning while others struggle to engage with the curriculum. Promoting parental involvement requires outreach efforts, accessible resources, and collaboration platforms to foster a supportive learning environment and enhance the effectiveness of MTB-MLE in Mathematics education.

3.2. The teachers in Bicol encountered challenges with the use of MTB-MLE as a medium of instruction in Mathematics. The challenges faced by Bicol-speaking teachers in implementing MTB-MLE as a medium of instruction in Mathematics are Curriculum alignment poses difficulties, particularly in translating mathematical terms into the mother tongue, but teachers emphasize its importance for effective instruction. They demonstrate adaptability in addressing challenges and recognize the value of MTB-MLE despite complexities. Ongoing collaboration and guidance are essential for effective alignment, requiring support from educational authorities and comprehensive professional development for teachers. Teacher preparedness varies, with efforts needed to ensure continuous improvement through tailored training and mentorship programs. Parental involvement is crucial for Learner’s success in MTB-MLE Mathematics education, requiring targeted efforts to engage and support parents in understanding and supporting their children's learning at home. By addressing these challenges, educators can enhance the effectiveness of MTB-MLE in Mathematics education and improve learning outcomes for learners.

4. The coping mechanism of teachers in addressing challenges encountered by the Teachers in Teaching Mathematics using Mother Tongue – Based Multilingual Instruction

4.1 The coping mechanism of teachers in addressing challenges encountered by the Teachers in Teaching Mathematics using Mother Tongue- Multilingual Instruction in Tagalog employed by Tagalog-speaking teachers to address challenges in teaching Mathematics using Mother Tongue-Based Multilingual Education (MTB-MLE). Curriculum alignment strategies focus on utilizing the mother tongue to enhance Learners understanding and confidence, particularly in interactive group activities. Teachers emphasize the importance of professional development programs to equip them with diverse instructional strategies tailored to learners' linguistic and learning needs. Encouraging teacher innovation and collaboration fosters effective curriculum alignment and improves Learner engagement. Teacher preparedness involves ongoing training and support to enhance educators' flexibility and confidence in implementing MTB-MLE strategies. Sustained investment in professional

development, mentorship programs, and peer collaboration is crucial to ensure teachers have the necessary skills for effective instruction. Parental involvement initiatives such as parent academies and regular communication channels help bridge the gap in understanding and support for MTB-MLE Mathematics education. Collaborative efforts between schools and families, including workshops and activities, promote parental engagement and enhance Learners learning outcomes.

4.2. The coping mechanism of teachers in addressing challenges encountered by the Teachers in Teaching Mathematics using Mother Tongue –Multilingual Instruction in Bicol. The coping mechanisms employed by Bicol-speaking teachers to address challenges in teaching Mathematics using Mother Tongue-Based Multilingual Education (MTB-MLE). Curriculum alignment strategies focus on ensuring instructional materials and methods align with the curriculum to enhance Learners understanding. Teachers highlight the effectiveness of using the mother tongue in instruction but adapt strategies as learners transition to English-medium instruction in higher grades. Ongoing support and resources are essential for teachers to maintain alignment with curriculum objectives, with professional development programs focusing on effective teaching strategies and collaboration with curriculum developers. Teacher preparedness emphasizes continuous professional development and adaptability in implementing MTB-MLE, with a focus on effective instructional strategies and the use of visual aids. Ongoing support and training tailored to the specific needs of educators in Bicol are crucial for enhancing teacher preparedness. Parental involvement initiatives aim to engage parents in supporting their children's learning in Mathematics education through communication, meetings, and assignments. Collaborative efforts between schools and families, including workshops and regular meetings, promote parental engagement and support learning at home, ultimately enhancing Learner's outcomes in Mathematics education.

5. The program proposal can be made to enhance the sustainability and effectiveness of using Mother Tongue in Teaching Mathematics. To enhance the sustainability and effectiveness of using Mother Tongue in teaching Mathematics, policymakers should officially endorse MTB-MLE integration, ensure curriculum alignment, provide comprehensive teacher training, produce high-quality instructional materials, foster parent and community involvement, establish monitoring mechanisms, and promote ongoing research and knowledge sharing. These efforts aim to create inclusive and culturally responsive education, benefiting all learners.

Conclusions

Based on the findings of the study, the following conclusions are drawn:

1. The findings revealed that Mother tongue-based Multilingual Education (MTB-MLE) significantly improves instructional practices and Learners' learning outcomes in primary Mathematics education. By using learners' native language, MTB-MLE enhances engagement, comprehension, and problem-

solving skills, fostering confidence and active class participation. Despite its benefits, MTB-MLE presents challenges for teachers, including language barriers and resource limitations. Translation difficulties and inadequate instructional materials hinder Learner's comprehension and engagement in Mathematics learning.

2. According to research findings, implementing MTB-MLE for Mathematics instruction faces challenges such as curriculum alignment and teacher preparedness. Comprehensive alignment between curriculum objectives and instructional materials is crucial, along with targeted professional development for teachers and fostering parental involvement.

3. The findings of this study, teachers employ coping mechanisms to address challenges in MTB-MLE implementation, including ensuring relevance and comprehensibility of the mother tongue in instruction. They utilize interactive approaches, prepare instructional strategies, and emphasize continuous professional development and parental involvement to support Learner's learning.

4. To enhance the sustainability and effectiveness of using Mother Tongue in teaching Mathematics, policymakers should endorse MTB-MLE integration, ensure curriculum alignment, provide comprehensive teacher training, foster parent and community involvement, establish monitoring mechanisms, and promote ongoing research and knowledge sharing. These efforts aim to create inclusive and culturally responsive education, benefiting all learners.

Recommendations

The following recommendations are hereby suggested:

‘

1. Since the findings revealed that using Mother Tongue-Based Multilingual Instruction in Mathematics faces challenges including language barriers, resource limitations, translation difficulties, and inadequate instructional materials that affect the Learners' comprehension and engagement in Mathematics learning, it is recommended to DepEd officials to establish teacher training programs focused on MTB-MLE implantation strategies and provide ongoing support and resource for Learners School Heads.

2. After seeing the result of the study that using Mother Tongue for Mathematics instruction faces challenges such as curriculum alignment and teacher preparedness and comprehensive alignment between curriculum objectives and instructional materials is crucial, School heads may target professional development for teachers to support them in implementing Mother Tongue Based-Multilingual Instruction by providing leadership, resources, and professional development opportunities.

3. In as much the findings revealed that teachers face challenges in Mother Tongue-Based Multilingual Instruction, including ensuring relevance and comprehensibility of the mother tongue in instruction, hence they may utilize interactive approaches, prepare instructional strategies, and emphasize continuous professional development and parental involvement to support learners' learning. Include encouraging teachers, to embrace Mother Tongue-Based Instruction as a pedagogical approach and seek professional development opportunities to enhance skills in teaching Mathematics using the mother tongue.

4. According to the findings of the study the learners struggle due to complex mathematical terminologies and lack of vocabulary, teachers may provide instructional materials such as flashcards, and vocabulary words written on strips of paper for the learners to become more active and participate in Mathematics lessons conducted in the mother tongue and seek assistance from teachers when needed.

5. Since the study of Experiences of Teachers in Teaching Mathematics using Mother Tongue-Based Multilingual Instruction is limited only across South Luzon, future Researchers may conduct research studies in a wider range to evaluate the long-term impact and effectiveness of using Mother Tongue-Based Instruction in teaching Mathematics.

Compliance with Ethical Standards

All participants, including educators, administrators, and other relevant stakeholders, provided informed consent before their involvement in the study, which was initially acquired by the researcher. The participants were informed about the purpose, procedures, potential risks, and benefits of the study. They were also given the freedom to withdraw from it at any time without incurring any penalties. Confidentiality and anonymity were also maintained to protect the privacy of the participants, ensuring that their responses and personal data were kept private and not disclosed without their express consent. In addition, the research was conducted with honesty, integrity, and transparency of fraud or manipulation.

Acknowledgments

The researcher extends her heartfelt gratitude to the Almighty Father for giving her abundant blessings such as gifts of wisdom, skills, caring, and health, for her to be strong and determined in every obstacle that comes along the way, as well as to endure all the hardships and pains to finish this great undertaking The researcher also expresses his appreciation to the following persons who extended their most valuable assistance for the realization of this study.

Marinduque State College, for being the instrument of the teachers to pursue their dreams and continue their professional development.

Eastern Quezon College, Inc. for being the strength and back of the teachers and administrators to improve and develop professionalism in the province of Quezon Dr. Leodegario M. Jalos, Jr., Chair, Extended Graduate Program for MSC, for being an

approachable and accommodating professor, as well as for sharing his expertise in the field of research and management.

Dr. Melchor B. Espiritu, Dean, Eastern Quezon College, Inc. of Gumaca, Quezon, for his humble assistance and meaningful insights to finish this manuscript.

Dr. Annalyn J. Decena, Adviser, for being an approachable, accommodating, hands-on adviser and for always being there to give valuable updates for the improvement of this manuscript.

To Dr. Diosdado P. Zulueta, Dr. Julieta Q. Nabos, and Dr. Melchor B. Espiritu for being on the panelists and giving constructive criticisms, positive suggestions, and support for the improvement of her manuscript.

To Engr. Nelson Rufino M. Montejo, the statistician, Ms. Cristina S. Atienza, her editor, and Dr. Susan B. Pineda, her copy editor, for their great help and efforts in accomplishing this study.

To the District Supervisors and School Heads, for giving their permission to conduct this study in their respective districts and schools.

To all her friends and colleagues, for their moral support and encouragement to accomplish this study.

To the respondents for being approachable and accommodating to her. And above all, to ALMIGHTY GOD.

ABSTRACT

This research study focuses on the innovative utilization of Banana Blossom *(Musa balbisiana colla)* with Fortified Sagip Nutri-Pack for Macaroon Production. The methodology employed involved a comprehensive approach, utilizing a variety of preparation tools, equipment, and specific ingredients tailored for creating banana blossom macaroons. The study's developmental procedure included stages such as harvesting, peeling, washing, boiling, chopping, and squeezing the banana blossoms, followed by measuring, mixing, baking, packaging, and labeling the final product. Sensory evaluation was conducted with 60 respondents from different age groups using a 9-point Hedonic Scale to assess the acceptability of the macaroons based on appearance, aroma, taste, and texture. The nutritional analysis revealed that the banana blossom macaroons are nutritious, offering significant levels of dietary fiber and essential amino acids. The cost and return analysis demonstrated a consistent return on investment of 40% across all treatments. The shelf-life study indicated that these macaroons can maintain quality for up to ten days at room temperature and up to a month when refrigerated. In conclusion, incorporating banana blossom in macaroon production presents a promising innovation with potential for commercial production, highlighting its feasibility, nutritional value, sensory appeal, economic viability, and shelf-life.

Keywords: *Banana Blossom, Sagip Nutri-Pack, Macaroon Production, Nutritional Analysis*

INTRODUCTION

In recent years, the Philippine Congress has enacted various laws to enhance Filipinos' nutritional health, reflecting a broader commitment to public health through dietary improvements. Notably, the Department of Education (DepEd) has implemented policies that regulate the sale of nutritious foods and beverages in schools and mandate feeding programs (Lawson, 2012). These legislative and policy measures underscore the government's dedication to fostering healthier eating habits among the population, particularly among school-aged children.

This study explores the culinary application of banana blossoms (Musa balbisiana Colla) as a primary ingredient in macaroon production. Banana blossoms, or banana hearts, are low in calories and contain small amounts of essential minerals such as calcium, potassium, phosphorus, copper, and zinc (Singh, Singh, & Yadav, 2018). Additionally, they are rich in antioxidants and have a lower natural sugar content compared to banana fruits, making them a potentially healthier ingredient for various culinary applications (Poem, 2013; Palczak et al., 2020).

Traditionally, macaroons are recognized as cookies made from sweet meringue and ground almonds, offering a distinct flavor and texture that enriches the sensory experience (Palczak et al., 2020). The choice of macaroons for this research is driven by their cost-effectiveness and popularity, particularly among students at Isabela School of Arts and Trades who favor baked goods like traditional coconut macaroons.

Incorporating banana blossoms with the corn-based SAGIP Nutri-Pack into macaroons could significantly enhance the nutritional value of these snacks. The SAGIP Nutri-Pack is a fortified blend containing corn, mung beans, sesame, cacao pod husk, malunggay (Moringa oleifera), and turmeric powder. This mix offers a comprehensive array of macro and micronutrients essential for maintaining bodily functions and preventing nutritional deficiencies (Reyes, 2017). Including these ingredients helps prevent anemia, neuritis, and memory disorders and protects against cancers, infectious diseases, high blood pressure, and strokes (Reyes, 2017; Bernardo, 2018).

The Corn-Based SAGIP Nutri-Pack was developed as a supplementary mix of food by the College of Education at Isabela State University-Main to combat malnutrition (Bernardo, 2018). This study aims to further this initiative by enhancing our understanding of the culinary uses of banana blossoms, locally known as "Susup" in Ilocano. The research will be implemented in the school canteen of Isabela School of Arts and Trades-Main, as part of the ongoing Income Generating Project (IGP) "Project Bake It With You (Bakery Product Making)" undertaken by the researcher.

Importantly, this initiative aligns with DepEd Order No. 13 Series 2017, which outlines policies and guidelines for promoting healthy food and beverage choices in schools and DepEd offices. This policy encourages the provision of healthy, nutritious, and affordable menu options, setting standards for food choices and promoting healthy eating habits among youth and DepEd employees (Department of Education, 2017).

The municipality of Benito Soliven in Isabela stands to benefit significantly from the outcomes of this research, given that bananas are a central agricultural product in the region. Utilizing banana blossoms for various food items can enhance the town's recognition as a leading banana product producer not only in Cagayan Valley but also in the entire Philippines. Similarly, the City of Ilagan would benefit, as the product incorporates a corn-based ingredient, a source of agricultural pride in the city (Philippine Statistics Authority, 2020).

Therefore, the primary objective of this study is to investigate the development of food products utilizing banana blossoms, focusing on their nutritional value and sensory qualities when combined with a Corn-Based SAGIP Nutri-Pack. This research aims to determine their suitability for macaroon production and as a nutritious snack option for school canteens. Overall, this endeavor contributes to achieving several Sustainable Development Goals (SDGs), particularly "No Poverty," "Zero Hunger," "Good Health and Well-being," "Decent Work and Economic Growth," "Industry, Innovation, and Infrastructure," and "Sustainable Cities and Communities" by introducing this innovative product (United Nations, 2020).

Research Questions

Generally, the study aimed to determine the acceptability and nutritive value of Banana Blossom with Fortified Sagip Nutri-pack for Macaroon Production. Specifically, it sought to answer the following:

1. What processes are involved in making banana blossoms with Fortified Sagip Nutri-Pack for Macaroon Production?
2. What is the nutritive value of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production?
3. What is the level of acceptability of the banana blossom with corn-based Sagip Nutri-pack for macaroon production of 1000g, 900g, 800g, 700g, and the original recipe in terms of:
    a. Appearance;
    b. Aroma;
    c. Taste; and
    d. Texture
4. Is there a significant difference in the evaluation of the food experts, food technology students, and consumers on the prepared banana blossom with corn-based Sagip Nutri-pack for macaroon production in different ratios?
5. What is the cost analysis computed for the different treatments?
6. What is the shelf-life of banana blossom with corn-based Sagip Nutri-pack for macaroon production at room temperature?

METHODOLOGY

A. Materials

1. Tools and Equipment

Table 1 below shows the preparation tools and equipment that will be used during the conduct of the study.

Table 1. Tools, utensils, and equipment used in the conduct of the study

PREPARATION TOOLS	MEASURING TOOLS	CUTTING TOOLS	MIXING TOOLS	PACKAGING MATERIALS	EQUIPMENT
Sterilize knife	Measuring cup	Sterilize knife	Rubber scraper	Small round plastic container	Blender
Spatula	Measuring spoon		Wooden spoon	Medium rectangular plastic container	Stand Mixer
Collander/Strainer	Digital Weighing Scale		Mixing bowl	Macaroon liner	Gas range
Chopping boards				LDPE plastic Bags Food Packaging	Electric Oven
Piping bag					
Disposable gloves					
Utility tray					

2. Ingredients

Table 2 shows the proportion of ingredients to be used in the preparation of banana blossom Macaroon with Corn-Based Sagip Nutri-Pack. The recipes used for Coconut macaroon in this study are based on the standard recipes in the Bread and Pastry Production NC II Module.

Table 2. The proportion of ingredients used in Baking Banana Blossom with Corn-Based Sagip Nutri-Pack for Macaroon Production

Ingredients	T1	T2	T3	T4	T5
Corn Based Sagip Nutri-Pack		100g	100g	100g	100g
All-Purpose Flour	1000g	1000g	1000g	1000g	1000g

Desiccated Coconut	1000g				
Boiled and chopped Banana Blossom/		1000g	900g	800g	700g
Butter	678g	678g	678g	678g	678g
Eggs	810g	810g	810g	810g	810g
Granulated Sugar	820g	820g	820g	820g	820g
Condensed milk	1900g	1900g	1900g	1900g	1900g
Vanilla	18g	18g	18g	18g	18g

B. Developmental Procedure

1. Collection and Preparation of the Material

Banana blossoms were harvested from the Banana Farm in the town of Benito Soliven, Isabela. Detach the Banana blossoms from the Saba variety with tightly packed bracts. The tough outer layers shall be removed until the pale pink leaves appear which are tender and edible. The edible bracts removed were immediately submerged in clean water to avoid discolorations. This process of removing the leaves, and then the smaller fronds was repeated until the leaves became too small to peel. At this point, just chop off whatever remains of the stem, and slice or dice the smaller leaves and small heart at the center. The fronds and bracts submerged in boiling water were chopped before it is squeezed to remove the bitter taste and pongee smell. The Macaroon will be prepared using the proportion of chopped banana blossom with the ratio of 1000g, 900g, 800g, and 700g for the treatment samples. The flowchart for making banana blossom macaroons is shown in Figure 3.

After measuring all the ingredients, preheat first the oven to 350 degrees F. Prepare the macaroon molder. In a mixing bowl, cream the butter, sugar, and eggs. Add condensed milk, all-purpose flour, and vanilla. stir in the boiled and chopped Banana blossom. Use a pastry bag and fill the mixture into it. Drop the batter mixture into lined muffin pans. Bake at 375 degrees F. until golden brown. Remove the baked macaroon from the oven and keep it cold.

The same procedure will be done for the experimental products by using separate baking utensils to eliminate contaminations that will affect the organoleptic characteristics of the product.

For better understanding, the flowchart (Figure 1) below shows the process followed by the researcher during the developmental stage of the product.

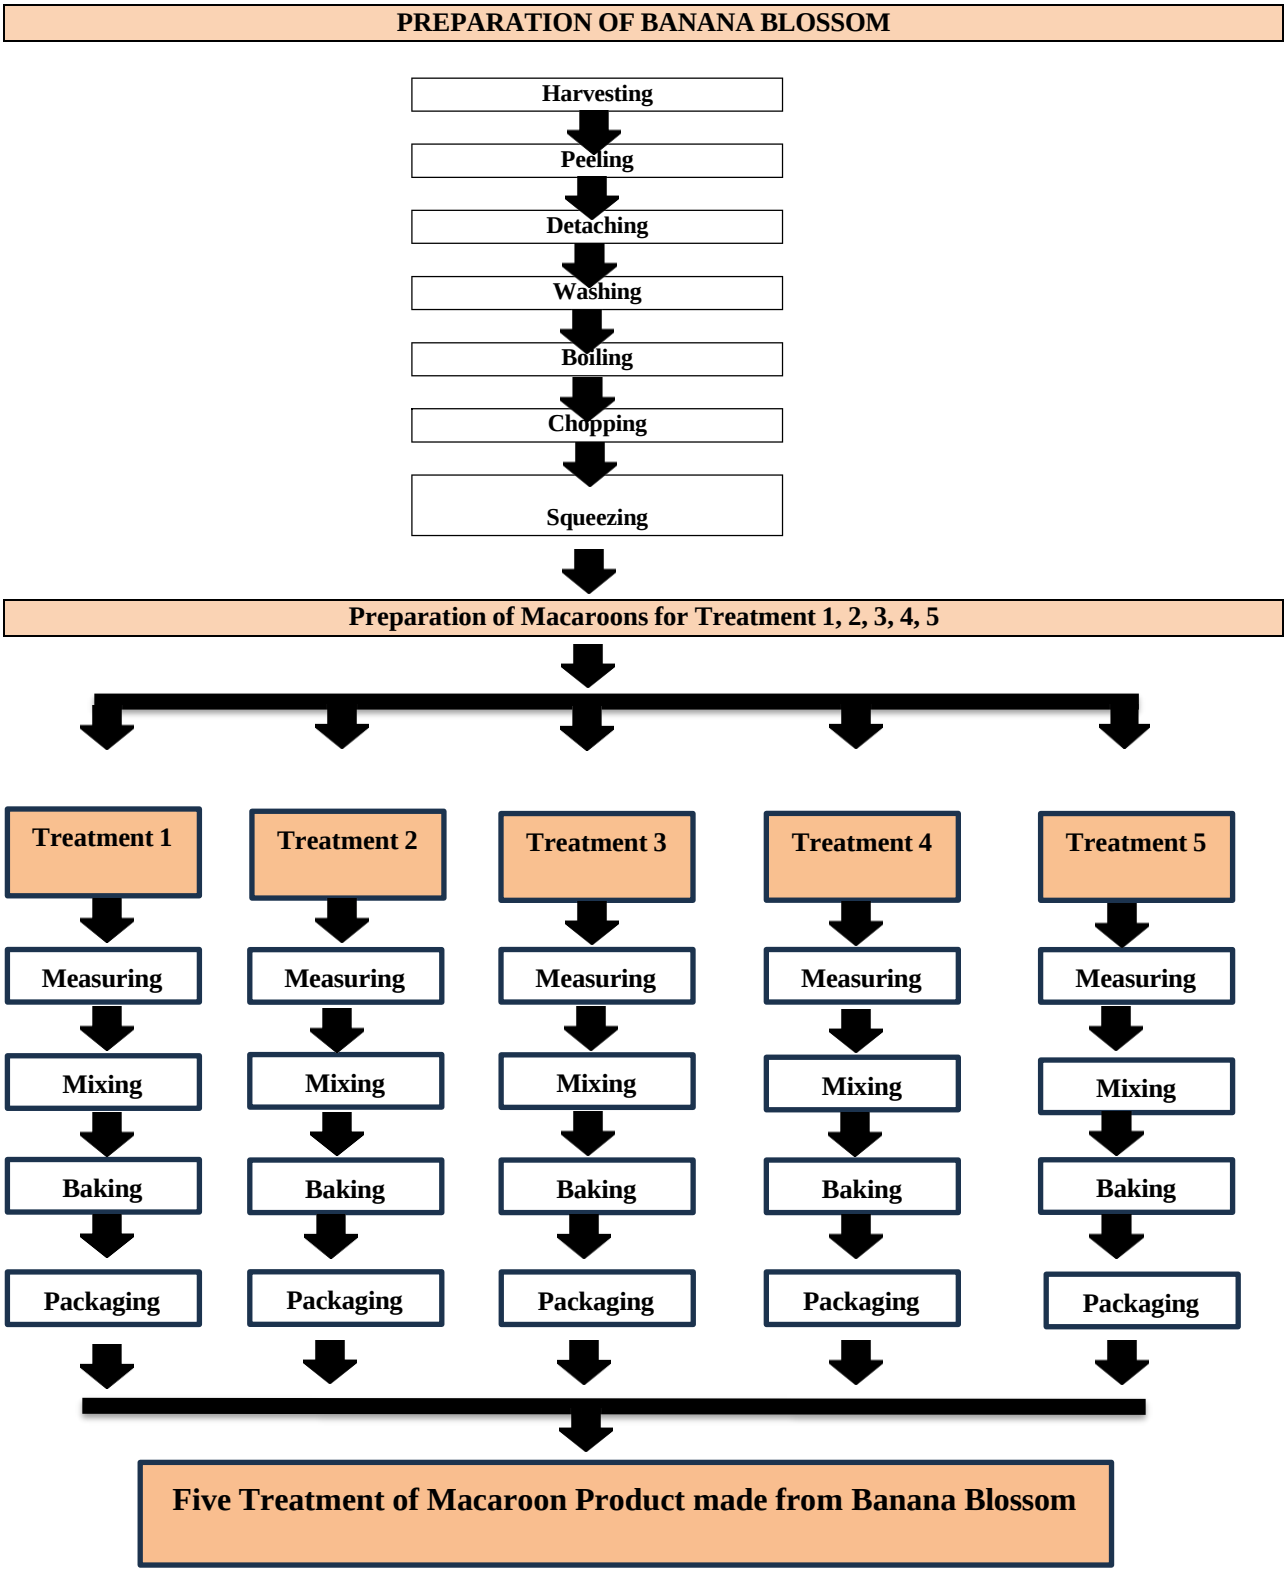

Figure 1. Flow Diagram of the Procedure in Baking Banana Blossom *(Musa acuminata Colla)* with Corn-Based Sagip Nutri-Pack.

Data Gathering Instrument

This study used a modified instrument from Aggabao's (2017) experimental study entitled "Macaroons with shoots from different species of bamboo". The instrument was modified to suit the objectives of the present study.

Data Gathering Procedure

Permission to conduct the study through sensory evaluation was requested from the respondents, consisting of children, teenagers, adults, and experts. After permission was granted, the administration of the sensory evaluation followed. Directions concerning the accomplishment of the questionnaires was discussed by the researcher with the evaluators personally. Copies of the checklist forms were retrieved after being completed by the respondents.

The Department of Agriculture assessed the developed food products to determine their nutritional value. In addition, to determine the shelf life of the food products, the observation method was used to identify changes in the appearance, aroma, taste, and texture of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production. It was conducted at the Regional Food Technology Development and Incubation Center; Integrated Laboratory Division of the Department of Agriculture Regional Government Center, Carig Sur, Tuguegarao City, Cagayan.

C. Treatment of the Study

The proportions of ingredients of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production are the same except for the main ingredient which was the chopped banana blossom. A different ratio of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production was used as the main ingredient in making macaroons.

The treatments to be used in this study are as follows:

T1 = Commercial Macaroon
T2 = Corn Sagip Nutri-pack (100g), All-purpose Flour (1000g), Banana blossom (1000g)
T3 = Corn Sagip Nutri-pack (100g), All-purpose Flour (1000g), Banana blossom (900g)
T4 = Corn Sagip Nutri-pack (100g), All-purpose Flour (1000g), Banana blossom (800g)
T5 = Corn Sagip Nutri-pack (100g), All-purpose Flour (1000g), Banana blossom (700g)

D. Sensory Evaluation

The finished products were subjected to sensory evaluation. Sixty (60) respondents from varied age groups shall be selected and properly oriented on how to

evaluate the products using the 9-point Hedonic Scale. The samples were arranged and evaluated.

Sensory evaluation was conducted at the Bread and Pastry Production Laboratory Room, Isabela School of Arts and Trades, City of Ilagan, Isabela to determine the acceptability of the experimental product in terms of color/appearance, odor/aroma, taste/flavor, texture and general acceptability of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production. The instrument for data gathering contained a score sheet using the 9-point Hedonic Scale.

The range of scale is interpreted as follows:

	Range	**Qualitative Description**
9	8.50-9.00	Like Extremely
8	7.50-8.49	Like Very Much
7	6.50-7.49	Like Moderately
6	5.50-6.49	Like Slightly
5	4.50-5.49	Neither Like nor Dislike
4	3.50-4.49	Dislike Slightly
3	2.50-3.49	Dislike Moderately
2	1.50-2.49	Dislike Very Much
1	1.00-1.49	Dislike Extremely

A sensory panel was composed of sixty (60) individuals who will be identified as (20) food experts, (20) food technology students, and (20) consumers. The qualification of the panelists in terms of age should be 12-60 years old. They will be screened to be non-smokers, not liquor drinkers, and in good health during the sensory evaluation.

The treatment samples of 1 piece of macaroon were tasted and subjected to sensory evaluation by the panelists. The panelists evaluated the samples according to their color/appearance, odor/aroma, taste flavor, texture, and general acceptability using the Hedonic scale ratings. Requiring the respondents to rinse their mouths before tasting each sample was strictly observed as a standard procedure to ensure the credibility and validity of the result of the study.

E. Experimental Design

There were five treatments of the study (T1-301, T2-302, T3-303, T4-304, T5-305) which were assigned randomly to the experimental units within a block (BLK1, BLK2, BLK3, BLK4, BLK5).

The grouping of the experimental units per block was as follows:

Table 3. Arrangement of the **5** treatments (T1-301, T2-302, T3-303, T4-304, T5-305) and blocks of Banana Blossom Macaroon with Sagip Nutri-Pack Powder.

BLOCK						
1	301	302	303	304	305
2	302	303	304	305	301
3	303	304	305	301	302
4	304	305	301	302	303
5	305	301	302	303	304

RESULTS AND DISCUSSION

Product Development

The banana blossom fortified with sagip Nutri-pack in macaroon production underwent different stages of development starting from harvesting, peeling, detaching, washing, boiling, chopping, squeezing, measuring, mixing, baking, packaging, and labeling. Through these stages of development, careful observation and analysis were done to come up with banana blossoms fortified with sagip Nutri-pack in macaroon production.

Preparation of Banana Blossom Macaroon in Five Treatments

The development process started with the creation of banana blossom macaroon with sagip Nutri-pack in four different treatments. The procedure began with peeling the cover of the banana blossom detaching the flowers, washing it after, and removing the buds. Boil the blossom with a small amount of salt to prevent darkness in color until thoroughly cooked, then drain and allow to cool. Chop with a knife and chopping board or grind the banana blossom with a blender then squeeze to remove the excess water. To present the measurements and ingredients systematically including the original recipe of Coconut Macaroon as a control variable in the study, a table is provided.

Table 4. Measurements and ingredients in the preparation of Coconut Macaroon

Measurements	Ingredients
1000 g	Desiccated Coconut
1000 g	All-Purpose Flour
678g	Butter
810g	Eggs
820g	Granulated Sugar
1900g	Condensed milk
18g	Vanilla

Procedure

The process of making coconut macaroons begins with accurately measuring all required ingredients and preheating the oven to 350 degrees Fahrenheit. Meanwhile, prepare the macaroon molder by lining it with appropriate liners or lightly greasing it to prevent sticking. In a mixing bowl, cream together the butter, sugar, and eggs until the mixture is smooth and well combined. Next, add condensed milk, all-purpose flour, and vanilla extract, and stir in the desiccated coconut until evenly distributed.

Once the mixture is ready, transfer it into a pastry bag for easier handling and pipe the batter into the lined macaroon pans, filling each mold to the desired level. Increase the oven temperature to 375 degrees Fahrenheit and bake the macaroons until they turn golden brown, which typically takes about 15-20 minutes. Carefully remove the baked macaroons from the oven and allow them to cool completely.

After the macaroons have cooled, store them in a microwaveable plastic container or transparent plastic wrapper. Seal the container or wrapper to maintain freshness, and label the packaging with the product name, ingredients, and production date for proper identification and traceability. Following these steps ensures the production of delicious and visually appealing coconut macaroons that are ready for storage, sale, or consumption.

Table 5. Measurements and ingredients in the preparation of four different Treatments of Banana Blossom Macaroon.

Measurements				**Ingredients**
T2	T3	T4	T5	
1000 g	900 g	800 g	700 g	Boiled and chopped Banana Blossom
1000 g	1000 g	1000 g	1000 g	All-Purpose Flour
100g	100g	100g	100g	Corn Based Sagip Nutri-Pack
678g	678g	678g	678g	Butter
810g	810g	810g	810g	Eggs
820g	820g	820g	820g	Granulated Sugar
1900g	1900g	1900g	1900g	Condensed milk
18g	18g	18g	18g	Vanilla

Procedure

The process of making the four treatments of banana blossom macaroons begins with accurately measuring all required ingredients and preheating the oven to 350 degrees Fahrenheit. Meanwhile, prepare the macaroon molder by lining it with appropriate liners or lightly greasing it to prevent sticking. In a mixing bowl, cream together the butter, sugar, and eggs until the mixture is smooth and well combined. Next, add

condensed milk, all-purpose flour, and vanilla extract, and stir in the boiled and chopped banana blossom until evenly distributed.

Once the mixture is ready, transfer it into a pastry bag for easier handling and pipe the batter into the lined macaroon pans, filling each mold to the desired level. Increase the oven temperature to 375 degrees Fahrenheit and bake the macaroons until they turn golden brown, which typically takes about 15-20 minutes. Carefully remove the baked macaroons from the oven and allow them to cool completely.

After the macaroons have cooled, store them in a microwaveable plastic container or transparent plastic wrapper. Seal the container or wrapper to maintain freshness, and label the packaging with the product name, ingredients, and production date for proper identification and traceability. Following these steps ensures the production of delicious and visually appealing banana blossom macaroons that are ready for storage, sale, or consumption.

Report of Analysis on the Nutritive Value of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production

The report analysis on the nutritive value of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production is shown in Table 6 below.

Table 6. Report of analysis on the nutritive value of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production

Lab No.	Sample Description	Crude Protein	Crude Fiber	Crude Fat	Moisture	Ash
		%	%	%	%	%
FT-24-0070	Treatment 1 For Banana Blossom, T1	4.29	1.63	13.28	24.17	0.84
FT-24-0071	Treatment 2 For Banana Blossom, T2	4.65	1.87	13.11	25.15	0.99
FT-24-0072	Treatment 3 For Banana Blossom, T3	4.47	1.41	13.60	25.46	0.95
FT-24-0073	Treatment 3 For Banana Blossom, T4	4.83	1.72	14.48	19.62	1.00

The outcome showed that the standard macaroon crude fat and the resultant crude fat differed little. Consequently, no evidence eating banana blossom macaroons can raise your chance of obesity or other linked health issues like high cholesterol and cardiovascular disease.

Based on the given result with its content of crude fat (13.28, 13.11, 13.60, 14.48 g/180 g) and total carbohydrates of 13 for treatment 2, 101 for treatment 3, 37 for treatment 4, and 108 for treatment 5, as is evident in the table, the Recommended Energy Nutrient Intake per 180 grams of the macaroon was 26% for treatment 2 and treatment 3, while 16% for treatment 4 and 28% for treatment 5. The sagip Nutri-pack enriched banana blossom macaroons can give customers extra energy so their bodies can work and function as intended.

Furthermore, the analysis report reveals that the crude fiber product content containing 1.63 g, 1.87 g, 1.41 g, and 1.72 g/180 g from treatment 2 to treatment 5 can aid in increasing the weight and size of stool as well as softening it. This means that those with stomach issues can benefit from these dietary fibers. A minor amount of protein (4.29 g, 4.65 g, 4.47 g, 4.83 g/180 g) is also present; this protein provides 11% of RENI for treatments 2 and 4, and 12% for treatments 3 and 5. Additionally, protein can provide amino acids, which the body needs to repair some of its muscles and bones.

Lastly, the analysis report reveals that out of all the treatments involving banana blossom fortified with Sagip Nutri-Pack for macaroons, the final treatment involving 700 grams of banana blossom had the highest nutrient content that had been tested.

Banana blossoms offer a noteworthy content of dietary fiber and well-balanced essential amino acids, making them a valuable addition to a healthy diet. These blossoms are abundant in macro elements like calcium (Ca), potassium (K), chlorine (Cl), and sulfur (S), as well as essential microelements such as manganese (Mn), zinc (Zn), and copper (Cu). Additionally, they contain alkaloids, glycosides, steroids, saponins, tannins, flavonoids, and terpenoids. Studies, including those by Tasnim et al. in 2020, suggest that the high levels of dietary fiber and polyphenols in banana blossoms contribute to various health benefits. Extracts from banana blossoms also act as natural antioxidants, aiding in the prevention of oxidative stress. The presence of these bioactive compounds indicates significant therapeutic potential, as highlighted by research conducted by Mapanao et al. in 2022 and Mostafa in an undisclosed year.

The Level of Acceptability of Banana Blossom Fortified with Sagip Nutri-Pack in Macaroon Production

The following table shows the level of acceptability of the banana blossom with corn-based Sagip Nutri-pack for macaroon production of 1000g, 900g, 800g, and 700g, and the original recipe in terms of appearance/color, aroma, taste, and texture.

Table 7. The level of acceptability of the original recipe of Coconut Macaroon in terms of appearance/color, aroma, taste, and texture

Treatment 1 Coconut Macaroon	Mean	Standard Deviation	Description
Appearance/Color			
a. Pleasing combination of colors and forms.	8.27	0.88	Like Very Much
b. Even, golden brown.	8.35	0.88	Like Very Much
c. The macaroon looks delicious.	8.30	0.89	Like Very Much
Grand Mean	8.30	0.77	Like Very Much
Aroma			
a. The coconut macaroon had a distinct aroma.	8.28	0.99	Like Very Much
b. A strong aroma emanates from the coconut macaroon.	8.18	1.16	Like Very Much
c. The coconut macaroon stimulates appetite.	8.30	0.87	Like Very Much
Grand Mean	8.25	0.90	Like Very Much
Taste			
a. The coconut macaroon had a sweet, wheaty flavor.	8.28	1.28	Like Very Much
b. The coconut macaroon is delicious.	8.40	0.92	Like Very Much
c. The taste of the coconut macaroon is just right.	8.35	0.90	Like Very Much
Grand Mean	8.34	0.86	Like Very Much
Texture			
a. The coconut macaroon is tender.	8.37	0.86	Like Very Much
b. The coconut macaroon is velvety and moist.	8.17	1.08	Like Very Much
c. The coconut macaroon is light, not compact or soggy.	8.12	0.92	Like Very Much
Grand Mean	8.22	0.84	Like Very Much

Table 7 shows the acceptability of commercial coconut macaroon as a controlled variable **Treatment 1** in the study focused on four key sensory attributes: appearance, aroma, taste, and texture. The evaluation utilized specific descriptors for each attribute, providing mean scores and standard deviations to quantify the level of acceptability.

For appearance, the macaroons were rated on three criteria: the pleasing combination of colors and forms (mean = 8.27, SD = 0.88), an even, golden brown color (mean = 8.35, SD = 0.88), and overall visual appeal and deliciousness (mean = 8.30, SD = 0.89). The grand mean for appearance was 8.30 with a standard deviation of 0.77, indicating that participants generally "like very much" the visual presentation of the macaroons.

In terms of aroma, participants evaluated the macaroons based on the distinctness of the aroma (mean = 8.28, SD = 0.99), the strength of the aroma (mean = 8.18, SD = 1.16), and the ability of the aroma to stimulate appetite (mean = 8.30, SD = 0.87). The grand mean for aroma was 8.25 with a standard deviation of 0.90, suggesting that the aroma was highly appealing to the participants, who "like very much" the scent of the macaroons.

The taste was assessed by considering the sweetness and wheaty flavor (mean = 8.28, SD = 1.28), overall deliciousness (mean = 8.40, SD = 0.92), and the balance of taste (mean = 8.35, SD = 0.90). The grand mean for taste was 8.34 with a standard deviation of 0.86, reflecting a strong positive reception where participants "like very much" the flavor profile of the macaroons.

Lastly, the texture was evaluated on the tenderness of the macaroons (mean = 8.37, SD = 0.86), their velvety and moist consistency (mean = 8.17, SD = 1.08), and their lightness, avoiding a compact or soggy feel (mean = 8.12, SD = 0.92). The grand mean for texture was 8.22 with a standard deviation of 0.84, showing that participants "like very much" the textural qualities of the macaroons.

Overall, the coconut macaroons scored consistently high across all sensory attributes, with grand means reflecting a high level of acceptability, indicating that participants "like very much" these macaroons in terms of appearance, aroma, taste, and texture.

Table 8. The level of acceptability of Banana Blossom Fortified with Sagip Nutri-Pack In Macaroon Production of 1000g in terms of appearance/color, aroma, taste, and texture

Treatment 2 Banana Blossom Macaroon	Mean	Standard Deviation	Description
Appearance/Color			
a. Pleasing combination of colors and forms.	8.37	0.88	Like Very Much
b. Even, golden brown.	8.35	0.80	Like Very Much
c.The macaroon looks delicious.	8.32	0.85	Like Very Much
Grand Mean	8.34	0.74	Like Very Much
Aroma			
a. The blossom macaroon had a distinct aroma.	8.28	0.88	Like Very Much
b. A strong aroma emanates from the blossom macaroon.	8.23	0.98	Like Very Much
c.The blossom macaroon stimulates appetite.	9.60	0.34	Like Extremely
Grand Mean	8.70	3.54	Like Extremely
Taste			
a. The blossom macaroon had a sweet, wheaty flavor.	8.22	0.88	Like Very Much

b. The blossom macaroon is delicious.	8.42	0.87	Like Very Much
c. The taste of the blossom macaroon is just right.	8.50	0.70	Like Extremely
Grand Mean	8.38	0.69	Like Very Much
Texture			
a. The blossom macaroon is tender.	8.43	0.77	Like Very Much
b. The blossom macaroon is velvety and moist.	8.43	0.77	Like Very Much
c. The blossom macaroon is light, not compact or soggy.	8.48	0.70	Like Very Much
Grand Mean	8.45	0.62	Like Very Much

Table 8 presents the evaluation of the banana blossom macaroon, referred to as **Treatment 2**, focused on the same four sensory attributes: appearance, aroma, taste, and texture. Each attribute was assessed using specific criteria, and the results were summarized with mean scores and standard deviations.

For appearance, the banana blossom macaroons were judged on the combination of colors and forms (mean = 8.37, SD = 0.88), the evenness of the golden-brown color (mean = 8.35, SD = 0.80), and the overall visual appeal and deliciousness (mean = 8.32, SD = 0.85). The grand mean for appearance was 8.34 with a standard deviation of 0.74, indicating that participants "like very much" the visual presentation of these macaroons.

Regarding aroma, the macaroons were rated based on the distinctness of the aroma (mean = 8.28, SD = 0.88), the strength of the aroma (mean = 8.23, SD = 0.98), and the ability of the aroma to stimulate appetite (mean = 9.60, SD = 0.34). The grand mean for aroma was 8.70 with a standard deviation of 3.54, suggesting a high variability in responses but an overall strong positive reception, especially notable with the "like extremely" rating for the appetite-stimulating property.

In terms of taste, the macaroons were evaluated on their sweet, wheaty flavor (mean = 8.22, SD = 0.88), overall deliciousness (mean = 8.42, SD = 0.87), and the balance of taste (mean = 8.50, SD = 0.70). The grand mean for taste was 8.38 with a standard deviation of 0.69, reflecting that the participants "like very much" the flavor profile, with a slight inclination towards "like extremely" for the balance of taste.

For texture, the evaluations considered the tenderness of the macaroons (mean = 8.43, SD = 0.77), their velvety and moist consistency (mean = 8.43, SD = 0.77), and their lightness, avoiding a compact or soggy feel (mean = 8.48, SD = 0.70). The grand mean for texture was 8.45 with a standard deviation of 0.62, indicating a strong preference, with participants "like very much" the textural qualities of these macaroons.

Overall, the banana blossom macaroons in Treatment 2 received high ratings across all sensory attributes. The grand means suggest that participants generally *"like very much"* these macaroons in terms of appearance, aroma, taste, and texture, with

particularly high marks for aroma and texture. The variability in aroma ratings, indicated by the higher standard deviation may reflect diverse preferences among participants, but the overall positive reception is clear.

Table 9. The level of acceptability of Banana Blossom Fortified with Sagip Nutri-Pack In Macaroon Production of 900g in terms of appearance/color, aroma, taste, and texture

Treatment 3 Banana Blossom Macaroon	Mean	Standard Deviation	Description
Appearance/Color			
a. Pleasing combination of colors and forms.	8.45	0.62	Like Very Much
b. Even, golden brown.	8.47	0.79	Like Very Much
c. The macaroon looks delicious.	8.53	0.75	Like Extremely
Grand Mean	8.48	0.64	Like Very Much
Aroma			
a. The blossom macaroon had a distinct aroma.	8.60	0.72	Like Extremely
b. A strong aroma emanates from the blossom macaroon.	8.47	0.81	Like Very Much
c. The blossom macaroon stimulates appetite.	8.53	0.65	Like Extremely
Grand Mean	8.53	0.63	Like Extremely
Taste			
a. The blossom macaroon had a sweet, wheaty flavor.	8.43	0.74	Like Very Much
b. The blossom macaroon is delicious.	8.62	0.71	Like Extremely
c. The taste of the blossom macaroon is just right.	8.58	0.74	Like Extremely
Grand Mean	8.54	0.67	Like Extremely
Texture			
a. The blossom macaroon is tender.	8.47	0.81	Like Very Much
b. The blossom macaroon is velvety and moist.	8.43	0.81	Like Very Much
c. The blossom macaroon is light, not compact or soggy.	8.50	0.70	Like Extremely
Grand Mean	8.47	0.70	Like Very Much

Table 9 presents the assessment of the banana blossom macaroon **Treatment 3,** the sensory attributes of appearance, aroma, taste, and texture were thoroughly evaluated, resulting in high levels of acceptability as indicated by the mean scores and standard deviations.

For appearance, the macaroons were judged on the combination of colors and forms (mean = 8.45, SD = 0.62), the evenness of the golden-brown color (mean = 8.47, SD = 0.79), and their overall visual appeal and deliciousness (mean = 8.53, SD = 0.75). The grand mean for appearance was 8.48 with a standard deviation of 0.64, suggesting

that participants *"like very much"* the visual aspects of these macaroons, with a slight inclination towards "like extremely."

In terms of aroma, the distinctness of the aroma (mean = 8.60, SD = 0.72), the strength of the aroma (mean = 8.47, SD = 0.81), and the ability of the aroma to stimulate appetite (mean = 8.53, SD = 0.65) were evaluated. The grand mean for aroma was 8.53 with a standard deviation of 0.63, reflecting that the participants *"like extremely"* the aroma of the macaroons, indicating a strong positive reception across the board.

The taste was assessed based on the sweet, wheaty flavor (mean = 8.43, SD = 0.74), overall deliciousness (mean = 8.62, SD = 0.71), and the balance of taste (mean = 8.58, SD = 0.74). The grand mean for taste was 8.54 with a standard deviation of 0.67, showing that participants *"like extremely"* the flavor profile of these macaroons, emphasizing their high palatability.

For texture, the evaluations considered the tenderness of the macaroons (mean = 8.47, SD = 0.81), their velvety and moist consistency (mean = 8.43, SD = 0.81), and their lightness, avoiding a compact or soggy feel (mean = 8.50, SD = 0.70). The grand mean for texture was 8.47 with a standard deviation of 0.70, indicating that participants *"like very much"* the textural qualities of these macaroons.

Overall, the banana blossom macaroons in Treatment 3 received exceptionally high ratings across all sensory attributes. The grand means suggest that participants generally *"like extremely"* the macaroons in terms of aroma and taste, while they "like very much" the appearance and texture. These results indicate a strong positive reception and high acceptability of the banana blossom macaroons.

Table 10. The level of acceptability of Banana Blossom Fortified with Sagip Nutri-Pack In Macaroon Production of 800g in terms of appearance/color, aroma, taste, and texture

Treatment 4 Banana Blossom Macaroon	Mean	Standard Deviation	Description
Appearance/Color			
a. Pleasing combination of colors and forms.	8.52	0.62	Like Extremely
b. Even, golden brown.	8.68	0.60	Like Extremely
c.The macaroon looks delicious.	8.63	0.58	Like Extremely
Grand Mean	8.61	0.51	Like Extremely
Aroma			
a. The blossom macaroon had a distinct aroma.	8.52	0.77	Like Extremely
b. A strong aroma emanates from the blossom macaroon.	8.50	0.75	Like Extremely
c.The blossom macaroon stimulates appetite.	8.55	0.67	Like Extremely
Grand Mean	8.52	0.64	Like Extremely
Taste			

a. The blossom macaroon had a sweet, wheaty flavor.	8.55	0.65	Like Extremely
b. The blossom macaroon is delicious.	8.65	0.61	Like Extremely
c. The taste of the blossom macaroon is just right.	8.58	0.67	Like Extremely
Grand Mean	8.59	0.54	Like Extremely
Texture			
a. The blossom macaroon is tender.	8.58	0.62	Like Extremely
b. The blossom macaroon is velvety and moist.	8.42	0.74	Like Very Much
c. The blossom macaroon is light, not compact or soggy.	8.57	0.70	Like Extremely
Grand Mean	8.52	0.60	Like Extremely

Table 10 shows the sensory evaluation of the banana blossom macaroon in **Treatment 4** showed highly favorable results across all assessed attributes: appearance, aroma, taste, and texture. The means and standard deviations indicate a consistently high level of acceptability.

For appearance, the macaroons were rated on the pleasing combination of colors and forms (mean = 8.52, SD = 0.62), evenness of the golden-brown color (mean = 8.68, SD = 0.60), and their overall visual appeal and deliciousness (mean = 8.63, SD = 0.58). The grand mean for appearance was 8.61 with a standard deviation of 0.51, suggesting participants *"like extremely"* the visual presentation of the macaroons.

Regarding aroma, the macaroons were evaluated based on the distinctness of the aroma (mean = 8.52, SD = 0.77), the strength of the aroma (mean = 8.50, SD = 0.75), and their ability to stimulate appetite (mean = 8.55, SD = 0.67). The grand mean for aroma was 8.52 with a standard deviation of 0.64, indicating that participants "like extremely" the aromatic qualities of the macaroons.

For taste, the macaroons were assessed on their sweet, wheaty flavor (mean = 8.55, SD = 0.65), overall deliciousness (mean = 8.65, SD = 0.61), and the balance of taste (mean = 8.58, SD = 0.67). The grand mean for taste was 8.59 with a standard deviation of 0.54, reflecting that the participants *"like extremely"* the flavor profile, suggesting the macaroons are highly palatable.

The texture of the macaroons was evaluated based on their tenderness (mean = 8.58, SD = 0.62), velvety and moist consistency (mean = 8.42, SD = 0.74), and their lightness, avoiding a compact or soggy feel (mean = 8.57, SD = 0.70). The grand mean for texture was 8.52 with a standard deviation of 0.60, showing that participants generally *"like extremely"* the textural qualities of the macaroons, although the moist consistency received a slightly lower rating of *"like very much."*

Overall, the banana blossom macaroons in Treatment 4 achieved exceptionally high ratings across all sensory attributes, with grand means indicating that participants

"like extremely" the appearance, aroma, taste, and texture of these macaroons. This suggests a very strong positive reception and high acceptability for this treatment.

Table 11. The level of acceptability of Banana Blossom Fortified with Sagip Nutri-Pack In Macaroon Production of 700g in terms of appearance/color, aroma, taste, and texture

Treatment 5 Banana Blossom Macaroon	Mean	Standard Deviation	Description
Appearance/Color			
a. Pleasing combination of colors and forms.	8.78	0.45	Like Extremely
b. Even, golden brown.	8.62	0.55	Like Extremely
c. The macaroon looks delicious.	8.68	0.50	Like Extremely
Grand Mean	8.69	0.39	Like Extremely
Aroma			
a. The blossom macaroon had a distinct aroma.	8.67	0.63	Like Extremely
b. A strong aroma emanates from the blossom macaroon.	8.70	0.59	Like Extremely
c. The blossom macaroon stimulates appetite.	8.80	0.55	Like Extremely
Grand Mean	8.72	0.52	Like Extremely
Taste			
a. The blossom macaroon had a sweet, wheaty flavor.	8.73	0.55	Like Extremely
b. The blossom macaroon is delicious.	8.78	0.52	Like Extremely
c. The taste of the blossom macaroon is just right.	8.70	0.56	Like Extremely
Grand Mean	8.74	0.48	Like Extremely
Texture			
a. The blossom macaroon is tender.	8.60	0.64	Like Extremely
b. The blossom macaroon is velvety and moist.	8.67	0.60	Like Extremely
c. The blossom macaroon is light, not compact or soggy.	8.75	0.60	Like Extremely
Grand Mean	8.67	0.55	Like Extremely

Table 11 presents the evaluation of the banana blossom macaroon in **Treatment 5** revealing an exceptionally high level of acceptability across all sensory attributes: appearance, aroma, taste, and texture. The results, reflected through mean scores and standard deviations, demonstrate that participants *"like extremely"* this variant of macaroons.

For appearance, the macaroons were assessed on the pleasing combination of colors and forms (mean = 8.78, SD = 0.45), evenness of the golden-brown color (mean = 8.62, SD = 0.55), and their overall visual appeal and deliciousness (mean = 8.68, SD =

0.50). The grand mean for appearance was 8.69 with a standard deviation of 0.39, indicating a strong preference for the visual presentation of these macaroons.

Regarding aroma, the evaluations considered the distinctness of the aroma (mean = 8.67, SD = 0.63), the strength of the aroma (mean = 8.70, SD = 0.59), and their ability to stimulate appetite (mean = 8.80, SD = 0.55). The grand mean for aroma was 8.72 with a standard deviation of 0.52, showing that participants *"like extremely"* the aromatic qualities of the macaroons, with very consistent ratings across different aspects of aroma.

In terms of taste, the macaroons were judged based on their sweet, wheaty flavor (mean = 8.73, SD = 0.55), overall deliciousness (mean = 8.78, SD = 0.52), and the balance of taste (mean = 8.70, SD = 0.56). The grand mean for taste was 8.74 with a standard deviation of 0.48, reflecting that the participants *"like extremely"* the flavor profile of these macaroons, with a slightly higher mean for deliciousness.

For texture, the macaroons were evaluated on their tenderness (mean = 8.60, SD = 0.64), their velvety and moist consistency (mean = 8.67, SD = 0.60), and their lightness, avoiding a compact or soggy feel (mean = 8.75, SD = 0.60). The grand mean for texture was 8.67 with a standard deviation of 0.55, indicating that participants "like extremely" the textural qualities of these macaroons.

Overall, the banana blossom macaroons in Treatment 5 received the highest ratings across all sensory attributes among the treatments, with grand means consistently indicating that participants *"like extremely"* the appearance, aroma, taste, and texture. These results demonstrate an exceptionally strong positive reception and very high acceptability for this treatment of banana blossom macaroons.

Comparison in the Level of Acceptability of Banana Blossom with Corn-based Sagip Nutri-pack for Macaroon Production as Evaluated by Groups of Respondents

Table 5 reflects the evaluation of the banana blossom with corn-based Sagip Nutri-pack for macaroon production, assessed by food experts, food technology students, and consumers, revealing several significant differences across various sensory criteria and treatment variants.

Is there a significant difference in the evaluation of the food experts, food technology students, and consumers on the prepared banana blossom with corn-based Sagip Nutri-pack for macaroon production with different ratios?

Table 12. Comparison in the level of acceptability of banana blossom with corn-based Sagip Nutri-pack for Macaroon production in different treatments across groups of respondents

Variant	Criteria	F-value	p-value	Comparison	Decision	Remark
T1	Appearance	6.31	0.00	p-value< 0.05	Reject Ho	Significant
	Aroma	7.25	0.00	p-value< 0.05	Reject Ho	Significant
	Taste	3.31	0.04	p-value< 0.05	Reject Ho	Significant
	Texture	8.60	0.00	p-value< 0.05	Reject Ho	Significant
T2	Appearance	7.86	0.00	p-value< 0.05	Reject Ho	Significant
	Aroma	1.09	0.34	p-value > 0.05	Accept Ho	not significant
	Taste	8.76	0.00	p-value< 0.05	Reject Ho	Significant
	Texture	6.52	0.00	p-value< 0.05	Reject Ho	Significant
T3	Appearance	3.05	0.05	p-value = 0.05	Accept Ho	not significant
	Aroma	4.92	0.01	p-value< 0.05	Reject Ho	Significant
	Taste	4.37	0.02	p-value< 0.05	Reject Ho	Significant
	Texture	6.15	0.00	p-value< 0.05	Reject Ho	Significant
T4	Appearance	2.76	0.07	p-value > 0.05	Accept Ho	not significant
	Aroma	5.79	0.00	p-value< 0.05	Reject Ho	Significant
	Taste	4.86	0.01	p-value< 0.05	Reject Ho	Significant
	Texture	6.75	0.00	p-value< 0.05	Reject Ho	Significant
T5	Appearance	1.20	0.31	p-value > 0.05	Accept Ho	not significant
	Aroma	3.71	0.03	p-value< 0.05	Reject Ho	Significant
	Taste	2.58	0.08	p-value > 0.05	Accept Ho	not significant
	Texture	1.54	0.22	p-value > 0.05	Accept Ho	not significant

The evaluation of the banana blossom with corn-based Sagip Nutri-pack for macaroon production, assessed by food experts, food technology students, and consumers, revealed several significant differences across various sensory criteria and treatment variants.

In Treatment 1, all sensory criteria—appearance (F-value = 6.31, p-value = 0.00), aroma (F-value = 7.25, p-value = 0.00), taste (F-value = 3.31, p-value = 0.04), and texture (F-value = 8.60, p-value = 0.00)—showed significant differences, indicating varied perceptions among the evaluators.

For Treatment 2, significant differences were noted in appearance (F-value = 7.86, p-value = 0.00), taste (F-value = 8.76, p-value = 0.00), and texture (F-value = 6.52, p-value = 0.00), but not in aroma (F-value = 1.09, p-value = 0.34), suggesting consistent ratings for aroma among the different groups.

Treatment 3 showed significant differences in aroma (F-value = 4.92, p-value = 0.01), taste (F-value = 4.37, p-value = 0.02), and texture (F-value = 6.15, p-value = 0.00), but not in appearance (F-value = 3.05, p-value = 0.05), highlighting that the visual aspect was uniformly rated while other attributes varied.

In Treatment 4, significant differences were found in aroma (F-value = 5.79, p-value = 0.00), taste (F-value = 4.86, p-value = 0.01), and texture (F-value = 6.75, p-value = 0.00), whereas appearance (F-value = 2.76, p-value = 0.07) did not show significant variation, indicating uniformity in the visual appeal among the evaluators.

Lastly, Treatment 5 exhibited a significant difference only in aroma (F-value = 3.71, p-value = 0.03), with no significant differences in appearance (F-value = 1.20, p-value = 0.31), taste (F-value = 2.58, p-value = 0.08), or texture (F-value = 1.54, p-value = 0.22), suggesting that while the aroma was perceived differently, other attributes were consistently rated across the groups.

These findings demonstrate that while some sensory attributes are consistently rated similarly across different groups, others, such as aroma and texture, can vary significantly, influencing the overall acceptability of the banana blossom macaroons.

Cost and Return Analysis of Banana Blossom with Corn-Based Sagip Nutri-Pack for Macaroon Production

Table 13. Summary of Cost and Return Analysis of Banana Blossom with Corn-Based Sagip Nutri-Pack for Macaroon Production

Ingredients	**Measurement**	**TREATMENTS**				
		T1	**T2**	**T3**	**T4**	**T5**
Corn Based Sagip Nutri-Pack	13 g		3.25	3.25	3.25	3.25
All-Purpose Flour	125 g	6.625	6.625	6.625	6.625	6.625
Desiccated Coconut	125 g	8.75				
Boiled and chopped Banana Blossom/	125g, 113g, 100 g, 88 g		5	5	5	5
Butter	85 g	19.125	19.125	19.125	19.125	19.125
Eggs	120 g	16	16	16	16	16
Granulated Sugar	102 g	7.65	7.65	7.65	7.65	7.65
Condensed milk	237 g	25.122	25.122	25.122	25.122	25.122
Vanilla	2.5 g	2	2	2	2	2
Additional Expenses						

Microwavable Container	30	30	30	30	30
Macaroon liner	5	5	5	5	5
Label	5	5	5	5	5
Other Operating Expenses					
Electricity	15	15	15	15	15
Fare	20	20	20	20	20
TOTAL UNIT COST (Php)	160.272	159.772	159.292	158.772	158.292

As shown in Table 13, the costed and estimated recipe was a 1/8 ratio of the original recipe, and the cost of the Corn-Based Sagip Nutri-Pack used in fortifying the four treatments differed. The amount of Sagip Nutri-Pack Powder in treatments 2, 3, 4, and 5 is Php 3.25.

The same amount of the other ingredients was alloyed for the five treatments; All-purpose flour, Php 6.625; Butter, Php 19.125; Eggs, Php 16.00; Granulated Sugar, Php 7.65; Condensed milk, Php 25.122; Vanilla, Php 2.00.

Treatment 1 used a desiccated coconut that cost Php 8.75, while treatments 2, 3, 4, and 5 used a Boiled and chopped Banana Blossom costing Php 5.00 for each treatment.

Additional Expenses

Additional expenses for all treatments amounted to Php 40.00 which includes Macaroon Liner, Php 5.00; Packaging Material Microwavable Container Php 30.00, and the Label at Php 5.00. In addition, other operating expenses such as Electricity at Php 15.00 and fares at Php 20.00 totaled Php 35.00.

Summing up all of the above expenses, the cost incurred in producing the products amounted to Php 160.272, Php 159.772, Php 159.292, Php 158.772, and Php 158.292, for T1; T2, T3, and T5, respectively.

Table 19 presents the summary computation of return on investment. It reveals that the ROI for all treatments was nearly identical, at 40%.

Table 14. Summary Computation of Return and Investment

PARTICULARS	Treatments				
	T1	T2	T3	T4	T5
Total Production Cost (Php)	160.272	159.772	159.292	158.772	158.292
Unit Cost (*Total Production Yield (7 boxes of macaroon x 12 pcs*)	160.272	159.772	159.292	158.772	158.292
Selling Price (*Unit Cost x 40% + Unit Cost*)	224.38	223.68	223	222.28	221.60
Total Sale (*Selling Price x yield (1 box of macaroon*)	224.38	223.68	223	222.28	221.60
Income (*Total Sales production*)	64.108	63.908	63.708	63.508	63.308
ROI (*Income x 100/Total Production Cost*)	**40.00%**	**40.00%**	**40.00%**	**40.00%**	**40.00%**

Shelf-life of the Banana Blossom with Corn-Based Sagip Nutri-Pack for Macaroon Production in Room Temperature

After production, the banana blossom macaroon was stored at room temperature between 25°C and 30°C. Furthermore, the following table displays the observation:

a. Shelf-Life of treatment 1 coconut macaroon at room temperature

Table 15. Shelf-Life of treatment 1 coconut macaroon

Days of Observation	Observation Results
First day	The coconut macaroon was nicely colored, smelled toffy, tasted sweet, and had a texture that was chewy, soft, and tender.
Second day	The coconut macaroon had the same observations as the first day: it was attractive in color and appearance, smelled toffy, tasted sweet, and had a texture that was chewy, soft, and tender.
Third day	The second day's observations were the same: the coconut macaroon had a nice color and appearance, a toffy aroma, a sweet and toffy flavor, and a soft, tender, chewy texture.
Fourth day	Similar observations were made on the third day: the coconut macaroon had a nice color and appearance, a toffy aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture.
Fifth day	coconut macaroon had a nice look and color, a toffy aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the fourth day.
Sixth day	The coconut macaroon was nicely colored, smelled toffy, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Seventh day	The coconut macaroon had the same observations on the sixth day: it was attractive in color, smelled toffy, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.

Eighth day	The coconut macaroon had a nice look and color, a toffy aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the seventh day.
Ninth day	The coconut macaroon had the same observations on the eighth day: it was attractive in color, smelled toffy, tasted sweet and toffy, and had a texture that was chewy, soft, and chewy.
Tenth day	The coconut macaroon was soft, tender, and chewy on the tenth day, and it tasted sweet and toffy. It also had a nice color and appearance.

b. Shelf-Life of treatment 2 banana blossom macaroon fortified with Sagip Nutri-pack at room temperature

Table 16. Shelf-Life of treatment 2 banana blossom macaroon fortified with Sagip nutri-pack

Days of Observation	Observation Results
First day	The banana blossom macaroon was nicely colored, smelled bonbon, tasted sweet, and had a texture that was chewy, soft, and tender.
Second day	The banana blossom macaroon had the same observations as the first day: it was attractive in color and appearance, smelled bonbon, tasted sweet, and had a texture that was chewy, soft, and tender.
Third day	The second day's observations were the same: the banana blossom macaroon had a nice color and appearance, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, chewy texture.
Fourth day	Similar observations were made on the third day: the banana blossom macaroon had a nice color and appearance, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture.
Fifth day	banana blossom macaroon had a nice look and color, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the fourth day.
Sixth day	The banana blossom macaroon was nicely colored, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Seventh day	The banana blossom macaroon had the same observations on the sixth day: it was attractive in color, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Eighth day	The banana blossom macaroon had a nice look and color, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the seventh day.
Ninth day	The banana blossom macaroon had the same observations on the eighth day: it was attractive in color, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and chewy.
Tenth day	The banana blossom macaroon was soft, tender, and chewy on the tenth day, and it tasted sweet and toffy. It also had a nice color and appearance.

c. Shelf-Life of treatment 3 banana blossom macaroon fortified with Sagip Nutri-pack at room temperature

Table 17. Shelf-Life of treatment 3 banana blossom macaroon fortified with Sagip nutri-pack

Days of Observation	Observation Results
First day	The banana blossom macaroon was nicely colored, smelled bonbon, tasted sweet, and had a texture that was chewy, soft, and tender.
Second day	The banana blossom macaroon had the same observations as the first day: it was attractive in color and appearance, smelled bonbon, tasted sweet, and had a texture that was chewy, soft, and tender.
Third day	The second day's observations were the same: the banana blossom macaroon had a nice color and appearance, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, chewy texture.
Fourth day	Similar observations were made on the third day: the banana blossom macaroon had a nice color and appearance, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture.
Fifth day	banana blossom macaroon had a nice look and color, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the fourth day.
Sixth day	The banana blossom macaroon was nicely colored, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Seventh day	The banana blossom macaroon had the same observations on the sixth day: it was attractive in color, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Eighth day	The banana blossom macaroon had a nice look and color, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the seventh day.
Ninth day	The banana blossom macaroon had the same observations on the eighth day: it was attractive in color, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and chewy.
Tenth day	The banana blossom macaroon was soft, tender, and chewy on the tenth day, and it tasted sweet and toffy. It also had a nice color and appearance.

d. Shelf-Life of treatment 4 banana blossom macaroon fortified with Sagip Nutri-pack at room temperature

Table 18. Shelf-Life of treatment 4 banana blossom macaroon fortified with Sagip nutri-pack

Days of Observation	Observation Results
First day	The banana blossom macaroon was nicely colored, smelled bonbon, tasted sweet, and had a texture that was chewy, soft, and tender.
Second day	The banana blossom macaroon had the same observations as the first day: it was attractive in color and appearance, smelled bonbon, tasted sweet, and had a texture that was chewy, soft, and tender.
Third day	The second day's observations were the same: the banana blossom macaroon had a nice color and appearance, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, chewy texture.
Fourth day	Similar observations were made on the third day: the banana blossom macaroon had a nice color and appearance, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture.
Fifth day	banana blossom macaroon had a nice look and color, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the fourth day.
Sixth day	The banana blossom macaroon was nicely colored, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Seventh day	The banana blossom macaroon had the same observations on the sixth day: it was attractive in color, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Eighth day	The banana blossom macaroon had a nice look and color, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the seventh day.
Ninth day	The banana blossom macaroon had the same observations on the eighth day: it was attractive in color, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and chewy.
Tenth day	The banana blossom macaroon was soft, tender, and chewy on the tenth day, and it tasted sweet and toffy. It also had a nice color and appearance.

e. Shelf-Life of treatment 5 banana blossom macaroon fortified with Sagip Nutri-pack at room temperature

Table 19. Shelf-Life of treatment 5 banana blossom macaroon fortified with Sagip nutri-pack

Days of Observation	Observation Results
First day	The banana blossom macaroon was nicely colored, smelled bonbon, tasted sweet, and had a texture that was chewy, soft, and tender.
Second day	The banana blossom macaroon had the same observations as the first day: it was attractive in color and appearance, smelled bonbon, tasted sweet, and had a texture that was chewy, soft, and tender.
Third day	The second day's observations were the same: the banana blossom macaroon had a nice color and appearance, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, chewy texture.
Fourth day	Similar observations were made on the third day: the banana blossom macaroon had a nice color and appearance, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture.
Fifth day	banana blossom macaroon had a nice look and color, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the fourth day.
Sixth day	The banana blossom macaroon was nicely colored, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Seventh day	The banana blossom macaroon had the same observations on the sixth day: it was attractive in color, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and tender.
Eighth day	The banana blossom macaroon had a nice look and color, a bonbon aroma, a sweet and toffy flavor, and a soft, tender, and chewy texture. These observations were made on the seventh day.
Ninth day	The banana blossom macaroon had the same observations on the eighth day: it was attractive in color, smelled bonbon, tasted sweet and toffy, and had a texture that was chewy, soft, and chewy.
Tenth day	The banana blossom macaroon was soft, tender, and chewy on the tenth day, and it tasted sweet and toffy. It also had a nice color and appearance.

Shelf-Life of treatment 1 coconut macaroon and treatment 2, 3, 4, and 5 banana blossom macaroon fortified with Sagip Nutri-pack at room temperature will last for ten (10) days and at Refrigerated chiller temperature will last for one month or thirty (30) days. Refrigerated macaroons will have a longer shelf-life than room temperature. However, the chewiness and soft texture of the macaroon will be affected.

Conclusions

Based on the comprehensive study conducted on the development, nutritional analysis, sensory evaluation, cost and return analysis, and shelf-life assessment of Banana Blossom with Fortified Sagip Nutri-Pack for Macaroon Production, it can be

concluded that the incorporation of banana blossom in macaroon production is a promising innovation. The results indicate that banana blossom macaroons fortified with Sagip Nutri-Pack are not only nutritious, with significant levels of dietary fiber and essential amino acids, but also highly acceptable in terms of appearance, aroma, taste, and texture. The cost and return analysis show a consistent return on investment of 40% across all treatments, highlighting the economic viability of this product. Furthermore, the shelf-life study reveals that these macaroons can maintain their quality for up to ten days at room temperature and up to a month when refrigerated, underscoring their potential for commercial production and distribution. Overall, the study demonstrates the feasibility, nutritional value, sensory appeal, economic viability, and shelf-stability of Banana Blossom Macaroons with Sagip Nutri-Pack, suggesting a promising future for this innovative product in the food industry.

Recommendations

Based on the foregoing findings and conclusions, the study recommends the following:

1. The creation of new products is highly encouraged. It is necessary to continuously innovate and improve the recipes for banana blossoms supplemented with Sagip Nutri-pack in macaroon production to meet changing dietary requirements and consumer preferences. Experimenting with diverse flavors, textures, and nutritional profiles may be necessary to expand the product line and attract a larger customer base.

2. Marketing efforts and educational materials should be used to specifically educate consumers about the nutritional advantages and adaptability of Banana Blossom baked goods. The distinct nutrient profiles of banana blossoms enhanced with Sagip Nutri-pack during macaroon production have to be emphasized to enable customers to make well-informed decisions depending on their dietary needs.

3. To increase customer pleasure and acceptability, more work needs to be done on refining the sensory aspects of banana blossom macaroons, such as appearance, aroma, taste, and texture. It is strongly advised to carry out sensory analyses and customer feedback sessions to pinpoint problem areas and adjust product formulas appropriately.

4. Adapted marketing tactics and product offers should be made to cater to the demands and preferences of various consumer categories. For instance, marketing aimed at consumers and culinary specialists should highlight the nutritional benefits and visual appeal of Banana blossom macaroons, to incorporate a more generic message for wider customer demographics. Therefore, collaboration with government organizations such as Outreach Programs in Barangay, the Department of Agriculture, the Department of Science and Technology (DOST), and the Department of Trade and Industry (DTI) is required.

5. It is strongly advised to use banana blossom fortified with Sagip nutri-pack for macaroon production as it offers a higher return on investment than commercial coconut macaroons

and can be found locally in the markets of the City of Ilagan and neighboring towns like Benito Soliven.

6. To increase the shelf life of banana blossoms in baked goods and decrease waste, it is recommended to utilize effective distribution and storage strategies. Ensuring that products get to clients in optimal condition may require investing in packaging technologies that extend shelf life, managing storage conditions, and establishing efficient distribution networks. Collaborating with the Department of Trade and Industry (DTI) is recommended.

7. It is recommended that funds be set aside for further research and development projects that will investigate the possible uses of banana blossoms in the creation of baked goods. Working together with dietitians, food scientists, and culinary specialists, new Banana blossom bake goods that cater to changing customer tastes and trends may result from this. It is necessary to work with the DOST, the DTI, and the school's Research and Development Unit.

Compliance with Ethical Standards

As the main author of this research, I affirm my adherence to the highest ethical standards in conducting this study and preparing the manuscript, ensuring the originality of the work, and rigorously avoiding plagiarism by appropriately citing all sources. I confirm that ethical approval was obtained where necessary, with all procedures involving human participants conducted following ethical guidelines, including informed consent and confidentiality. I have disclosed any potential conflicts of interest that may influence the interpretation of my research. Furthermore, all listed authors have significantly contributed to the research and preparation of the manuscript, and there are no undisclosed individuals who contributed to the work. This statement serves as my commitment to integrity, responsibility, and ethical compliance in academic research.

Acknowledgments

I express profound appreciation to my adviser for her unwavering support and expertise. My heartfelt thanks go to the respondents for their involvement in the study, my colleagues for their collaboration, and the school heads for their encouragement. I am grateful to my friends for their assistance and support. To my relatives and family, your love, understanding, and encouragement were invaluable. Lastly, I acknowledge the

divine guidance and blessings from God that have illuminated my path throughout this research journey.

ABSTRACT

The integration of technology in early childhood education is increasingly recognized as essential for fostering foundational skills in young learners. This phenomenological study explores the challenges faced by teachers in the North President Quirino District Division of Sultan Kudarat as they incorporate technology into early childhood classrooms. The objectives are to identify specific barriers, understand the impact of these challenges on teaching practices, and provide recommendations for effective technology integration. Methodologically, this study employs a qualitative approach, utilizing in-depth interviews with 20 early childhood educators selected through purposive sampling. Data were analyzed using thematic analysis to capture the essence of teachers' experiences and perceptions. Findings reveal several significant challenges: limited access to technological resources, inadequate training and professional development, resistance to change among educators, and difficulties in maintaining student engagement with technological tools. These barriers hinder the effective use of technology, leading to inconsistent implementation and varying educational outcomes. Conclusions drawn from the study highlight the need for comprehensive support systems, including enhanced access to resources, ongoing professional development programs tailored to early childhood educators, and initiatives to foster a positive attitude towards technological integration. Addressing these challenges is crucial for optimizing the benefits of technology in early childhood education and ensuring that young learners are equipped with the necessary skills for the digital age.

Keywords: *Early Childhood Education, Technology Integration, Teacher Challenges, Phenomenological Study*

INTRODUCTION

Incorporating technology can be difficult since there are "plenty of models to choose from; the problem is not that a useful model cannot be found, but that deciding upon a model can be a complex task" (Kimmons & Hall, 2018, p.29). When incorporating technology into the classroom, educators may encounter barriers that prevent or limit the use of technology. This article will be presented topically, with a study of integration models and the challenges that arise when implementing technology.

In the situated of President Quirino School especially, in the rural areas some of the schools are lack of equipment and poor children or students development because in the rural areas student doesn't have technology in home like TV, computers and even a cellphone to have access in any technology concern sometimes teachers barriers are poor connection or low speed internet that would interrupt the class also teachers cannot give more integration of technology to the class presentation because the early childhood are very sensitive of about technology.

The use of technology in classrooms has increased over the previous two decades, including in early childhood education (Tang et al., 2016). Effective technology integration with purpose and meaning can have numerous positive effects on younger kids (Bowen & Watson, 2017; Mustola et al., 2018; Quesenberry et al., 2015; Tang et al., 2016). It can be extremely effective, helping to boost both student accomplishment and student engagement in even the youngest students (Bowen & Watson, 2017; O'Byrne & Pytash, 2017; Tang et al., 2016).

The purpose of this study is to explore how and why early childhood teachers chose technology activities to integrate into their instruction, this study is influential because barriers that early childhood educators encounter when choosing the most appropriate technology activities to implement in the classroom were discovered. Also, this study has the potential to bring about positive social change in the students by informing early childhood educators about effective applications of technology that could contribute to student achievement.

While there are multiple benefits to deliberate and meaningful technology integration (Bowen & Watson, 2017; O'Bryne & Pytash, 2017; Tang et al., 2016), many early childhood educators do not use technology effectively. Rather than using technology to support or enhance instruction and encourage higher order thinking, many early childhood educators use it to digitally display information or have students work on computer programs for a set period of time (Smith et al., 2016). Furthermore, there is little research on how early childhood instructors perceive and use technology in their classrooms, or whether meaningful and purposeful technology practices are used (Smith et al., 2016).

This study explored the challenges faced by early childhood educators and identified coping mechanisms by completing in these gaps. This research intends to aid in the creation of useful strategies and interventions that might strengthen early childhood educators in the classroom based on the connectivist. The aim of this thesis that scholars George Siemens and Stephen Downes presented in 2005. The foundation of connectivism, also known as connectivist learning theory, is the notion that digital technology fosters interpersonal connections and opens up opportunities for learning.

Research Questions

This study aimed to determine the coping mechanisms of the Teachers challenges in the Integration of Technology in Early childhood classroom in the District of North President Quirino.

This research sought to provide valuable insight and recommendation to support, here are some ways of question to be answer:

1. What are the specific challenges faced by teachers when integrating technology in early childhood classrooms?

2. What are strategies do teachers use to ensure that technology is developmentally appropriate to young learners?

3. As a teacher in early childhood how do you defined Traditional methods and technology integration?

METHODOLOGY

Research Design

This study is qualitative research design, specifically phenomenological in nature of research. Qualitative research concerned with establishing answers to how is the phenomenon in question.

The Phenomenology is both a philosophical movement and a family of qualitative research methodologies. The term phenomenology refers to the study of phenomena, where a phenomenon is anything that appears to someone in their conscious, experience (Creswell, 2013). Phenomenology is to address a range of research questions. It elaborates on a series of guidelines to support researchers in selecting one type that is opposite to their needs. It is the study that explores what was experienced and focuses on their experience it allows to track the empathy and recognition of both the researchers and the participant subjectivity.

Participants of the Study

The Participants of this study were the teachers of North President Quirino, Division of Sultan Kudarat, Criteria have been established to select individuals who have significant experiences, particularly in the thirteen (13) schools handling Early Childhood Education (kinder).

The participants who met the researcher's specified inclusion criteria based on the study of Ngag (2023) where he considered experts who served as informants and source of data. By this way, he established the generalizability and reliability of the selectiion.

Sampling Technique

The researcher used a purposive sampling technique in the selection of the respondents. This technique will be non-parametric sampling in nature because the researcher will choose participants based on convenience.

Purposive sampling (also known as judgment, selective, or subjective sampling) is a sampling technique in which the researcher relies on his or her judgment when choosing members or participants of the study. Further, purposive sampling is used to select respondents who are most likely to yield appropriate and useful information (Kelly, 2010).

Data Gathering Instrument

The study employed a self-structure survey questionnaire crafted upon reading, thesis, and dissertations. The questionnaires are conducted through recording and Interviews.

In addition, self -structure questionnaires will be evaluated by experts in the District office such as the teachers holding Master Teacher items or supervisors in function in the field such as school heads and academic coordinators. The instrument will finally approved by the members of the panel before the researcher administers to the participants.

Upon approval by the evaluation panels and validation through the East-West Mindanao College Inc. validation tool, the researcher was authorized to administer the developed survey. Before data collection, ethical clearance was sought from the East-West Research Ethics Committee (EREC) to ensure that the research adhered to ethical standards, including participant consent, confidentiality, and protection of participant rights.

Data Gathering Procedure

The researcher sent a letter to the Dean of the Graduate School asking permission to conduct the study or approval of the chairperson of the graduate school. Then, a letter to the school division Superintendent, Supervisors, Principals, and participants of the study, before the survey questionnaires will be administered to the schools.

During the interviews, the researcher used video and audio recordings to capture the participants' responses accurately, ensuring that every detail was documented for subsequent analysis. The use of video and audio recordings allowed the researcher to focus on the conversation and engage more fully with the participants, ensuring that the data reflected the true sentiments and insights shared by the participants. This careful and systematic approach to data collection ensured the reliability and validity of the research findings.

Data Analysis

Thematic analysis was utilized to analyze the qualitative data collected from the participants, comprising interviews and focus group transcripts it involves the identification and reporting of patterns in a data set, which are then interpreted for their inherent meaning.enabling a deeper understanding of the participants' in Technology Integration in childhood classroom (Braun & Clark, 2006).

Thematic analysis, as outlined by Braun and Clarke (2006), is a method for identifying, analyzing, and reporting patterns (themes) within qualitative data. The process begins with data familiarization, where researchers immerse themselves in the data by reading and re-reading transcripts while noting initial ideas. This is followed by generating initial codes, where key features of the data are systematically labeled across the entire data set.

The next step involves searching for themes by collating codes into potential themes, then reviewing themes to ensure they accurately represent the data and are coherent. After refining the themes, each theme is defined and named to capture its essence and distinct aspects.

Finally, the themes are reported in a detailed and coherent manner, often illustrated with data extracts, to provide a rich, insightful narrative that addresses the research questions. This method allows for a flexible, systematic, and rigorous analysis of qualitative data.

Following data collection, the transcripts were systematically reviewed to identify common themes and patterns emerging from the participants' responses which patterened after the study of Ngag (2023). Through an iterative process of coding and

categorization, key themes were identified, reflecting the participants' perceptions, concerns, and insights regarding the agenda.

Themes were identified based on their frequency, relevance, and significance to the research objectives, ensuring that the analysis captured the essence of the participants' experiences and perspectives.

Scope and Limitations

This study was limited to the experiences of the early childhood teachers in remote area on how and what to use in terms of strategies. This study focus on Teachers concern in dealing pupils with integration of technology in school year 2024-2025. The Teachers participants are those teachers handling early childhood.

RESULTS and DISCUSSIONS

Challenges Faced by Teachers

Teachers face several challenges when integrating technology in early childhood classrooms.

First, many teachers may lack sufficient training and confidence in using technology effectively, which can impede their ability to incorporate digital tools into their teaching practices.

Second, unequal access to devices and internet connectivity among students can hinder equitable learning opportunities, creating a digital divide.

Third, balancing screen time with other developmental activities and ensuring that the content is age-appropriate are ongoing challenges that require careful consideration and planning.

Lastly, adapting technology to suit diverse learning styles and integrating it seamlessly into existing curriculum frameworks can be complex, requiring teachers to continuously develop and refine their instructional strategies.

Strategies Used by Teachers:

To ensure that technology is developmentally appropriate for young learners, teachers employ various strategies. They select educational apps, games, and multimedia that align with early childhood developmental milestones, ensuring that the content is suitable for the children's age and learning stage.

Teachers also monitor and guide children's interactions with technology to maximize learning outcomes and minimize distractions, providing support and direction as needed. Additionally, they incorporate hands-on, tactile experiences alongside digital interactions to reinforce concepts and skills, blending traditional and technological approaches to create a balanced learning environment.

Engaging parents and caregivers in discussions about responsible digital use and extending learning beyond the classroom is another critical strategy, fostering a collaborative approach to children's digital literacy and overall development.

Definition of Traditional Methods and Technology Integration:

In early childhood education, traditional methods encompass a variety of hands-on activities, including storytelling, music, art, and physical play. These methods focus on sensory experiences and social interactions to nurture holistic development, emphasizing the importance of direct engagement and experiential learning. In contrast, technology integration involves incorporating digital tools such as tablets, computers, educational apps, and interactive media into classroom activities.

The goal of technology integration is to enhance learning experiences, promote digital literacy, and prepare children for future technological environments. By combining traditional methods with digital tools, educators aim to create a comprehensive educational experience that supports both foundational skills and modern competencies.

Conclusions

In the light of the findings of the study, the following were concluded:

From the research, it is evident that while technology offers immense potential in early childhood education, its integration poses challenges related to teacher preparedness, access, and pedagogical alignment.

However, strategic approaches such as careful content selection, active supervision, and balanced use of technology alongside traditional methods can effectively mitigate these challenges and maximize learning benefits for young learners.

Recommendations

Based on the results, and conclusions, the following were recommended:

1. DepEd may provide comprehensive training and ongoing professional development opportunities for teachers to enhance their digital literacy skills and pedagogical strategies for technology integration. Ensure equitable access to technology resources and internet connectivity across all early childhood education settings to minimize disparities in learning opportunities.

2. Curriculum Developers may design digital resources and curricula that align with early childhood developmental stages, ensuring age-appropriateness and educational value. Provide clear guidelines and frameworks for integrating technology into early childhood curricula, emphasizing the importance of hands-on learning and play-based activities.

3. Teachers may continue integrating technology in ways that support diverse learning styles and developmental needs, while maintaining a balanced approach with traditional methods. Foster partnerships with parents and caregivers to promote responsible digital use at home and extend learning experiences beyond the classroom.

4. Future Researchers may conduct longitudinal studies to track the impact of technology integration on early childhood development over time, considering both short-term outcomes and long-term effects. Explore innovative pedagogical approaches that combine technology with traditional methods to optimize learning experiences and outcomes for young children.

Compliance with Ethical Standards

Informed consent will be diligently obtained from all school heads part of this study. They must possess a comprehensive understanding of the research objectives. Methodologies, potential risks, and benefits. Further, participation will remain entirely voluntary, and have the right to withdraw from the study at any juncture without encountering any consequences.

Anonymity and confidentiality to safeguard the personal identities of the teachers' responses, rigorous measures will be enacted to ensure safety and confidentiality. Rather than using the actual name, pseudonyms or codes will be used to ensure the privacy of the participants. The gathered data will be securely stored with access restricted solely to the research team.

Avoiding Harm Delicate subjects, such as the challenges inherent in their roles, will be explained with meticulous consideration for the potential emotional and psychological impact on the participants. The approach will be put to minimize distress and the support system will be readily available to guide participants should the need arise.

Acknowledgments

This study would not have been possible without the guidance and assistance of several individuals. The researcher extends heartfelt gratitude to Marjuni M. Maddi, Director General of MBHTE-Higher Education, for his wisdom and encouragement, and Crispin A. Soliven Jr., CESE Schools Division Superintendent of Sultan Kudarat, for permitting the study. Special thanks to Patricea I. Sandigan, MAED, School President,

for her unwavering support, and Emilia M. Lotilla, PhD, Dean of the Graduate School at East West Mindanao College Inc., for her invaluable input.

The researcher's adviser, Amiludin G. Masabpi, PhD, his expertise, encouragement and for the intellectual support to accomplished this study. Panel members Jaime Boy U. Ngag, Jr., PhD, for his professional ideas made this study possible and Leodie D. Mones, PhD, offered meaningful advice, while Michael A. Poblador, PhD, meticulously reviewed the content. Juliet P. Tambungalan, MAED, Academic Chairperson, very active to provided support,patience and guidance,and Josephine C. Pacete, PhD, District Supervisor of North President Quirino,Division of Sultan Kudarat and a validators questionnaires of researcher supported the study permit and for her assistance in the conduct of this study. and the school heads and teachers of North President Quirino District also contributed significantly.

To her classmates and friends, for the friendship, unforgettable experiences, and funny memories together during the journey of learning which motivated her; To her Husband, Parents and Siblings, for the undying love, guidance and support that made this intellectual endeavor more bearable, Above all, to ALLAH (SWT), for endless blessings and guidance on us in realizing this research paper. ABSTRACT

This study explores the dynamics of human-robot interaction (HRI) by integrating insights from cognitive science, robotics engineering, sociology, psychology, and ethics. The research aims to understand the factors influencing human perception and acceptance of robots, as well as the implications for individuals, communities, and broader societal structures. The study employs a descriptive research methodology, gathering data through questionnaires and direct perception from 30 respondents. The results highlight the importance of multidisciplinary approaches in enhancing HRI, including design, engineering, psychology, sociology, and ethics. Key findings include the prioritization of physical appearance, facial expressions, and gestures in designing socially interactive robots. The study concludes by recommending further research in understanding human perception, emotion, and behavior in HRI, as well as advances in AI, ML, and natural language processing for improving human-robot communication.

Keywords: *HRI, Robotics engineering, multidisciplinary*

INTRODUCTION

In the realm of technological advancement, human-robot interaction (HRI) stands as a frontier where innovation converges with human experience (Feil-Seifer, Matarić & Meyers, 2009). The fusion of human cognitive capabilities with robotic functionalities

has ushered in an era of unprecedented possibilities, reshaping industries, societies, and the very fabric of our daily lives (Šabanović & Jenkins, 2022). As we navigate this dynamic landscape, it becomes imperative to delve deeper into the intricacies of these interactions, understanding not only the technical aspects but also the profound psychological, social, and ethical dimensions they entail.

This study embarks on a multidisciplinary exploration into the dynamics of human-robot interaction, aiming to unravel the complex interplay between humans and robots across various contexts. Drawing upon insights from cognitive science, robotics engineering, sociology, psychology, and ethics, it endeavors to illuminate the mechanisms underlying HRI and shed light on the implications for individuals, communities, and broader societal structures (Dautenhahn, 2007).

Through a comprehensive synthesis of theoretical frameworks, empirical research, and practical applications, this study seeks to address fundamental questions surrounding HRI (Goodrich & Schultz, 2008). What factors influence human perception and acceptance of robots? How do cultural norms and societal expectations shape these interactions? What ethical considerations arise as robots become increasingly integrated into human environments (Chatzoglou et al, 2023)? By grappling with these inquiries, we aspire to foster a deeper understanding of HRI dynamics, paving the way for more informed design practices, policy frameworks, and societal dialogue (Mingfei, Zhenjie & Xiaojuan, 2017).

Ultimately, this study aspires to contribute to the burgeoning field of human-robot interaction, offering valuable insights that not only advance our knowledge but also empower us to harness the potential of robotics in ways that are ethical, equitable, and beneficial for all (Goodrich & Schultz, 2007).

Research Questions

1. What is the profile of the respondents in terms of gender?
2. How frequently do you interact with robots in daily life?
3. On a scale of 1 to 5, how comfortable are you interacting with robots?
4. What multidisciplinary approaches, combining fields like psychology, engineering, and design, could enhance human-robot interaction
5. What features or characteristics would you prioritize in the design of a socially interactive robot?

METHODOLOGY

The study utilizes the descriptive type of research. In the study, it will attempt to identify multi-disciplinary approaches such as Psychology, Engineering Design, Ethics, Sociology, to Human-Robot Interaction (Jevtić et al, 2012). The study also Include features and characteristics that would be used in designing socially interactive robots.

Participants

The study will involve 30 respondents, equally distributed across three groups:

1. **College Students (10)**: Students from various disciplines will be selected to participate in the study.
2. **College Teachers (10)**: Faculty members from different departments will be included to provide a diverse perspective.
3. **Administrative Staff (10)**: Staff members from various administrative departments will participate to represent the university's administrative side.

Data Collection Methods

The study will employ a combination of methods to collect data:

1. **Questionnaires**: Pre-developed questionnaires will be used to assess participants' attitudes, perceptions, and experiences with HRI. The questionnaires will be designed to capture both quantitative and qualitative data.
2. **Focus Groups**: Focus groups will be conducted with each participant group to gather more in-depth information about their experiences and opinions on HRI.
3. **Observations**: Observations of participants interacting with robots will be conducted to capture behavioral data and analyze the dynamics of HRI.
4. **Video Analysis**: Video recordings of the interactions will be analyzed to identify patterns and trends in HRI.

Procedure

1. **Recruitment**: Participants will be recruited through announcements on the university's social media platforms, email notifications, and flyers posted around campus.
2. **Pre-Testing**: Participants will be asked to complete a pre-test questionnaire to assess their initial attitudes and perceptions about HRI.
3. **Robot Interaction**: Participants will be introduced to a humanoid robot designed for HRI research. They will be asked to interact with the robot for a set period, and their interactions will be recorded.
4. **Post-Testing**: Participants will complete a post-test questionnaire to assess their attitudes and perceptions after interacting with the robot.
5. **Focus Groups**: Focus groups will be conducted with each participant group to gather more in-depth information about their experiences and opinions on HRI.

RESULTS AND DISCUSSION

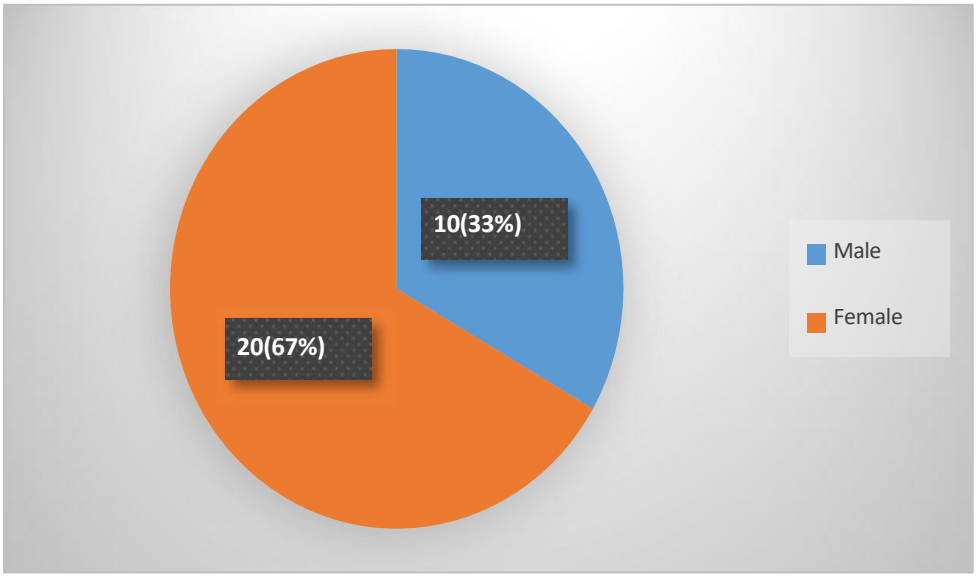

Figure 1. Demographic Profile of Respondents According to Gender

Figure 1 show that there are 20 female students, which is approximately 66.67% of the total students, and 10 male students, which is approximately 33.33% of the total students.

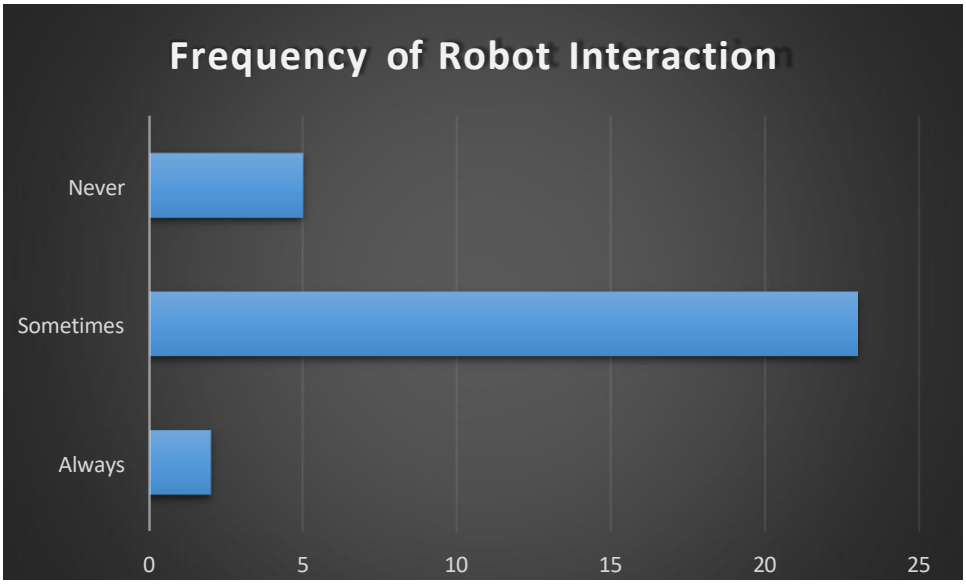

Figure 2. Frequency of Robot Interaction

Figure 2 results show that the majority of respondents (67%) has sometimes human-robot encounter, whereas 16.67% has always and another 16.67% has no robot encounter in their everyday living.

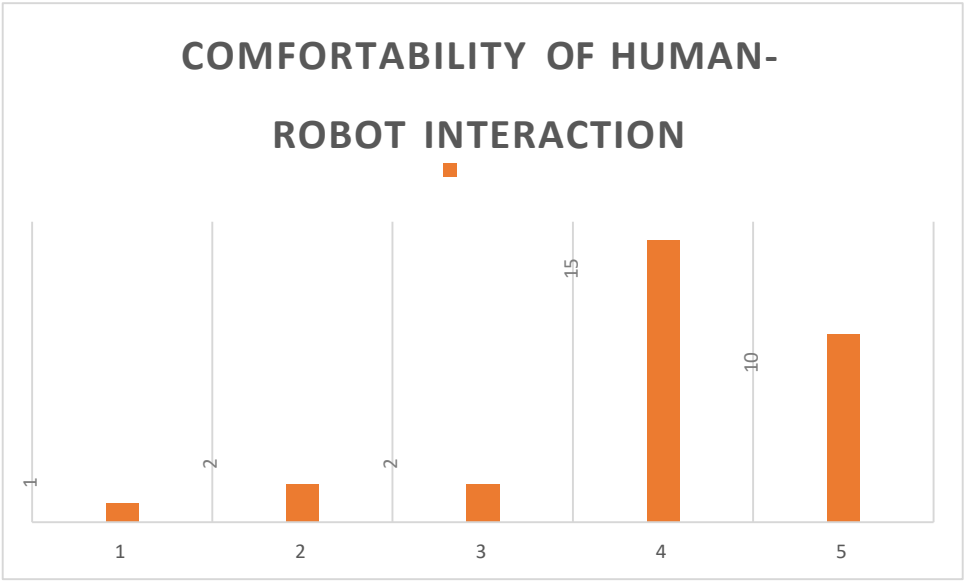

Figure 3. Robot Interaction

In Figure 3, the majority of the respondents (50%) said that on the comfortability of interacting with robots has a rating of 4, 33% with a rating of 5, 6.67% with a rating of 2 and 3 and 3.33% with lowest 1 rating.

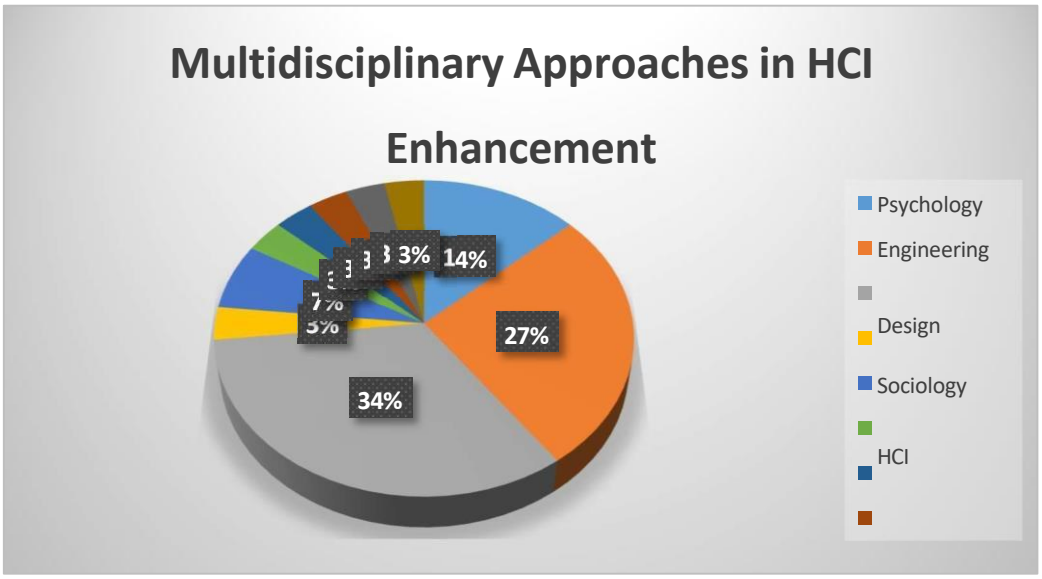

Figure 4. HCI Multidisciplinary Approaches

In Figure 4, among the multidisciplinary approaches, Design was given the highest priority (34%), next is Engineering (27%), Psychology (14%), Sociology (7%) the rest having 3% each in order to enhance HCI.

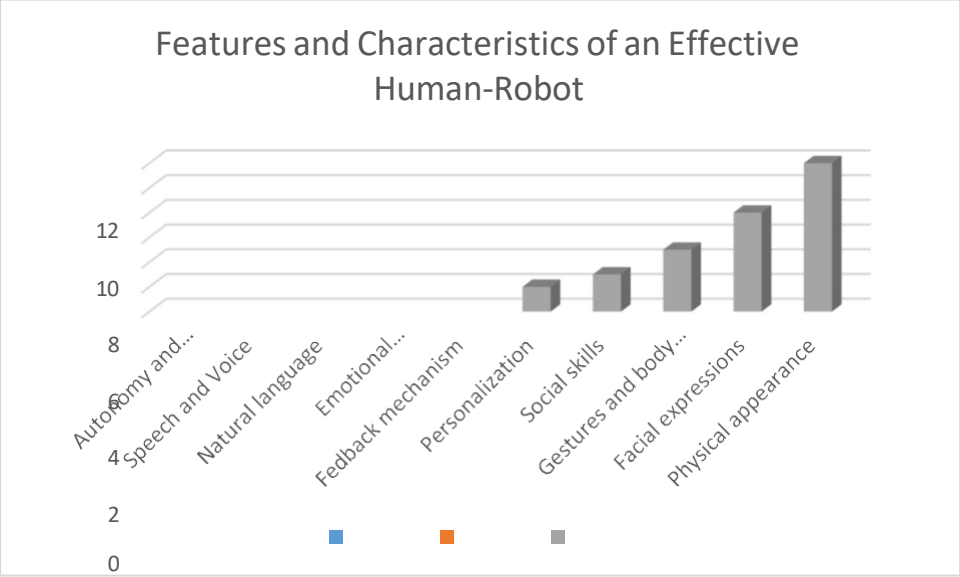

Figure 5. Features and Characteristics of an Effective Human Robot

In Figure 5, among the features and characteristics of an effective Human-Robot according to respondents the highest priority is given to physical appearance (40%), facial expression (27%) next, Gestures and body language (17%), Social skills (10%) and Personalization (6%).

Multidisciplinary approaches that could enhance human-robot interaction include:

1. Psychology: Understanding human cognition, emotions, and behavior to design robots that are more intuitive and responsive to human needs (Lench, Darbor & Berg, 2013).

2. Engineering: Integrating advanced sensors, actuators, and AI algorithms to improve the physical capabilities and autonomy of robots (Firouzeh et al, 2013).

3. Design: Incorporating principles of user-centered design and human factors engineering to create robots that are visually appealing, easy to use, and non-intimidating.

4. Ethics: Addressing ethical considerations related to privacy, safety, and the impact of automation on employment and societal norms.

5. Sociology: Studying the social dynamics and cultural factors that influence human-robot interaction, such as trust, power dynamics, and cultural norms.

6. Human-Computer Interaction (HCI): Leveraging insights from HCI

research to design intuitive interfaces and interaction modalities for human-robot communication (Berg & Lu, 2020).

7. Neuroscience: Exploring brain-computer interfaces and neurofeedback techniques to enable more direct and natural communication between humans and robots (Javaid, 2013).

8. Anthropology: Examining historical and cultural perspectives on technology adoption and human-machine relationships to inform the design of culturally sensitive robots (Steers, Meyer & Sanchez, 2008).

9. Linguistics: Developing natural language processing algorithms and speech recognition capabilities to enable seamless verbal communication between humans and robots.

10. Education: Integrating robotics into educational curricula to foster greater understanding and acceptance of robots among future generations (Foucault, 2010).

Designing socially interactive robots involves incorporating various features and characteristics to facilitate effective human-robot interaction. Here are some key considerations:

1. Physical Appearance: The robot's appearance should be appealing and non-threatening, with design elements that evoke familiarity and approachability.

2. Facial Expressions: The robot should be able to display a range of facial expressions to convey emotions and intentions, enabling more natural communication with users.

3. Gestures and Body Language: Incorporating gestures and body language helps the robot express itself and understand human cues, enhancing communication and engagement.

4. Speech and Voice Recognition: The ability to understand and respond to spoken commands and questions improves the robot's usability and interactivity.

5. Natural Language Processing: Advanced language understanding capabilities enable the robot to engage in meaningful conversations, comprehend context, and provide relevant responses.

6. Emotional Intelligence: By detecting and responding to human emotions, the robot can adapt its behavior and responses to better meet users' needs and preferences.

7. Personalization: Customization options allow users to tailor the robot's

behavior, appearance, and interactions to suit their preferences and personality.

8. Social Skills: Teaching the robot social norms and etiquette helps it navigate social interactions smoothly and respectfully, fostering positive experiences for users.

9. Feedback Mechanisms: Providing feedback to users about the robot's actions, intentions, and understanding enhances transparency and trust in the interaction.

10. Autonomy and Proactiveness: Giving the robot some degree of autonomy and proactiveness enables it to initiate interactions, offer assistance, and anticipate users' needs, enhancing its usefulness and effectiveness in social settings.

These features and characteristics work together to create socially interactive robots that can engage with users in meaningful ways, whether as companions, assistants, or collaborator.

Conclusions

The study highlights the importance of multidisciplinary approaches in enhancing human-robot interaction (HRI). The findings indicate that a majority of respondents have had some form of human-robot encounter, and the comfortability of interacting with robots is a significant factor in determining the effectiveness of HRI. The study also emphasizes the need for robots to possess certain features and characteristics, such as physical appearance, facial expressions, gestures, and social skills, to facilitate effective communication and interaction.

The multidisciplinary approaches identified as crucial for enhancing HRI include psychology, engineering, design, ethics, sociology, human-computer interaction, neuroscience, anthropology, linguistics, and education. These approaches can help in understanding human cognition, emotions, and behavior, integrating advanced sensors and AI algorithms, incorporating user-centered design principles, addressing ethical considerations, studying social dynamics, and leveraging insights from HCI research.

The study concludes that designing socially interactive robots requires incorporating various features and characteristics, such as physical appearance, facial expressions, gestures, speech and voice recognition, natural language processing, emotional intelligence, personalization, social skills, feedback mechanisms, and autonomy and proactiveness. These features and characteristics work together to create robots that can engage with users in meaningful ways, whether as companions, assistants, or collaborators.

Overall, the study underscores the importance of a multidisciplinary approach in enhancing HRI, and the need for robots to possess certain features and characteristics to facilitate effective communication and interaction.

Recommendations

In the light of foregoing findings, the following are recommended across multiple disciplines:

1. In Psychology and Cognitive Science, understanding human perception, emotion and behaviour in the context of interacting with robots.
2. Further studies must be conducted on empathy, trust and social bonding with robots.
3. Advances in AI, machine learning (ML) and natural language processing for improving human-robot communication.
4. Development of algorithms for autonomous and semi-autonomous robot behaviour
5. Designing user-friendly interfaces and ensuring safety in human-robot collaborations.
6. Designing aesthetically pleasing and functional robots.

Compliance with Ethical Standards

This study adheres to ethical standards set by the institutional and/or national research ethics committee. Informed consent was obtained from all participants involved in the study. The authors declare no potential conflicts of interest and ensure transparency by providing detailed information about the research methods, data collection, and analysis procedures. The study maintains the privacy and confidentiality of information obtained and adheres to the highest standards of ethical, professional, and personal behavior in performing their duties.

Acknowledgments

We would like to express our deepest gratitude to all those who contributed to the successful completion of this research study.

First and foremost, we would like to thank our research director, Engr. Jeffrey Leonen for his unwavering support, insightful guidance, and invaluable feedback throughout the entire process His expertise and encouragement has been instrumental in shaping this work.

We are also grateful to the faculty and staff of College of Arts and Sciences, Education

and Criminology (CASEC) for providing the necessary resources and a conducive environment for our research.

We extend our heartfelt appreciation to our colleagues and friends for their constant encouragement, constructive criticism and for always being there to discuss ideas and offer suggestions.

This research would not be possible without the participation of AMA University faculty, staff and college students who generously shared their time and experiences. Their contributions were vital to the success of this study.

Finally, we would like to thank our family for their patience, understanding and unwavering support throughout the journey. Their love and encouragement have been our greatest motivation.

ABSTRACT

In today's rapidly evolving media landscape, the influence of social media on political discourse has become a topic of increasing importance. This research explores the impact of social media on political discourse through a comparative analysis of mass media communication strategies. By examining how political actors utilize social media platforms in comparison to traditional mass media channels, this study aims to uncover the dynamics shaping contemporary political communication. Employing a mixed-methods approach, qualitative content analysis and quantitative data analysis were conducted to examine the content, tone, reach, engagement, and impact of political communication on both social media platforms and traditional mass media channels. The findings reveal significant differences in communication strategies employed across different media channels, highlighting the unique affordances and challenges presented by social media in shaping political discourse. This research contributes to a deeper understanding of the evolving role of social media in political communication and provides insights for policymakers, practitioners, and scholars working in the fields of media, communication, and politics.

Keywords: *Social Media, Political Discourse, Mass Media, Communication Strategies, Political Communication, Media Influence, Traditional Media, News Dissemination*

INTRODUCTION

In contemporary society, the pervasive influence of social media on political discourse is an undeniable force shaping public opinion, political narratives, and communication dynamics (Robertson et al, 2013). The emergence and widespread adoption of various social media platforms have revolutionized the landscape of information dissemination, altered traditional mass media communication strategies and profoundly impacted the political sphere (Subekti, Mutiarin & Nurmandi, 2023). As a result, understanding the intricacies of these digital communication channels and their influence on political discourse has become an area of critical importance for scholars, analysts, and policymakers.

The rise of social media platforms has revolutionized the communication landscape, significantly altering the dynamics of political discourse and information dissemination (De Choudhury & Sundaram, 2011). This transformation has been instrumental in shaping public opinion, political narratives, and the engagement of citizens in the democratic process. The pervasive use of social media as a powerful tool for communication, persuasion, and information sharing has redefined the traditional roles of mass media in political messaging and public engagement (Lane, Overbye-Thompson & Gagrčin, 2023).

As the world becomes increasingly interconnected through digital platforms, political communication has transcended the limitations of traditional media, enabling rapid and widespread dissemination of information, opinions, and narratives (Campos-Domínguez & Díez-Garrido, 2023). Citizens are now active participants in shaping the political landscape, with social media serving as a catalyst for public discourse, activism, and engagement with political issues.

However, the meteoric rise of social media in political communication has not been without challenges (Lane et al, 2019). Concerns about misinformation, echo chambers, the influence of algorithm-driven content, and the polarization of public opinion have surfaced as critical issues in contemporary political discourse (Barberá, 2020). Moreover, the speed at which information spreads across social media platforms often outpaces the verification processes, leading to the rapid circulation of unverified or misleading content (Muhammed & Mathew, 2022).

This study aims to navigate these complexities by conducting a thorough comparative analysis of traditional mass media communication strategies and the evolving landscape of social media platforms in the realm of political discourse. Understanding the interplay between these communication channels is essential to comprehend the nuances of how political information is disseminated, received, and interpreted in contemporary society. The investigation will explore the impact of these communication strategies on public opinion, civic engagement, and the overall democratic process, striving to shed light on the evolving nature of political communication in the digital age.

Research Questions

The research titled "Exploring the Impact of Social Media on Political Discourse: A Comparative Analysis of Mass Media Communication Strategies" aims to address several critical issues:

1. Transformation of Political Communication Dynamics.
   1.1 How has the shift from traditional mass media to social media altered the dynamics of political communication?
2. Influence on Public Opinion and Engagement.
   2.1 What are the comparative impacts of traditional mass media and social media on public opinion formation and political engagement?
3. Role of Gatekeeping and Information Control.
   3.1 How does the role of gatekeeping differ between traditional mass media and social media, and what are the implications for the quality and accuracy of political information?
4. Speed and Reach of Political Messages.
   4.1 How do the speed and reach of political messages on social media compare to those on traditional mass media, and what are the implications for political discourse?
5. Misinformation and Polarization.
   5.1 To what extent does social media contribute to the spread of misinformation and political polarization compared to traditional mass media?
6. Effectiveness of Communication Strategies.
   6.1 How effective are the communication strategies employed on social media compared to those used in traditional mass media, and what are the ethical considerations involved?

METHODOLOGY

Research Design

For the study titled "Exploring the Impact of Social Media on Political Discourse: A Comparative Analysis of Mass Media Communication Strategies," a mixed-methods approach will be employed to gather and analyze data. This approach will involve both qualitative and quantitative methods to provide a comprehensive understanding of the research topic. Qualitative Method: Qualitative data will be collected through content analysis of political communication on social media platforms and traditional mass media channels (Gondwe, 2020). This will involve examining the content, tone, themes, and strategies employed by political actors across different media channels. Qualitative analysis will allow for in-depth exploration of the nuances and dynamics shaping contemporary political communication. Quantitative Method: Quantitative data will be collected to measure the reach, engagement, and impact of political content on social media platforms and traditional mass media channels. This will involve gathering metrics such as the number of followers, likes, shares, comments, viewership, and readership

numbers. Quantitative analysis will enable the comparison of communication strategies across different media channels and provide statistical insights into the effectiveness of political communication efforts (Paatelainen, Kannasto & Isotalus, 2022). This study also utilizes a comparative research design to examine the impact of social media on political discourse. It involves comparing the communication strategies employed by mass media platforms with those utilized on social media platforms.

Respondents of the study

The respondents for the study consist of various stakeholders involved in political communication across different media channels. These respondents will be selected based on their roles, expertise, and involvement in political campaigns, government agencies, news organizations, and other relevant entities. The selection of respondents will aim to capture diverse perspectives and experiences related to political discourse and mass media communication strategies.

Political Campaign Teams:

Members of political campaign teams, including campaign managers, communication directors, social media managers, and strategists, will be invited to participate in the study. These respondents will provide insights into the development and implementation of communication strategies on social media platforms and traditional mass media channels during political campaigns.

Government Officials and Public Servants:

Government officials, policymakers, and public servants involved in political communication and public affairs will be included as respondents. These individuals may include elected officials, government spokespersons, and communication officers responsible for disseminating information and engaging with the public through various media channels.

Journalists and Media Professionals:

Journalists, editors, and media professionals working in traditional mass media outlets such as newspapers, television, radio, and online news platforms will be invited to participate in the study. These respondents will offer insights into the production, dissemination, and reception of political news and information in the media landscape.

Social Media Influencers and Content Creators:

Social media influencers, content creators, and digital media experts with expertise in political communication will be included as respondents. These individuals may have

significant followings on social media platforms and play a role in shaping public discourse and opinion through their content and engagement with audiences.

Academic Experts and Researchers:

Academic experts, scholars, and researchers specializing in media studies, political communication, and digital politics will be invited to participate in the study. These respondents will provide theoretical insights, methodological expertise, and critical perspectives on the impact of social media on political discourse and mass media communication strategies.

The selection of respondents will be guided by the research objectives and the need to capture diverse viewpoints and experiences relevant to the study.

Sampling Technique

Respondents may be contacted through purposive sampling techniques, professional networks, and snowball sampling methods to ensure the representation of key stakeholders in the field of political communication and media studies. Ethical considerations, including informed consent and confidentiality, will be followed in the recruitment and engagement of research respondents.

Research Instrument

The researcher utilized a questionnaire in the form of a checklist as the main instrument that was sent thru Google Forms. Also, it used the a 5-point Likert scale:1- Strongly Disagree 2-Disagree 3- Neutral 4- Agree 5- Strongly Agree for the second and last part of the questionnaire as the indicators in the checklist.

Data Gathering Procedures

The researcher follows the following data gathering procedures. Selection of Mass Media and Social Media Platforms: Identify a diverse range of mass media outlets representing various political affiliations and geographic regions. Select prominent social media platforms known for their influence on political discourse, ensuring representation across different demographics and political ideologies.

Content Collection from Mass Media: Gather a comprehensive sample of content (e.g., news articles, opinion pieces, editorial segments) from selected mass media outlets. Utilize digital archives, online databases, and content aggregation tools to access historical and current media coverage of political topics. *Content Collection from social media*: Employ social media monitoring tools to track conversations, trends, and interactions related to political discourse on selected platforms. Collect data using keyword searches, hashtag tracking, and user mentions to capture a wide range of content shared by users, political figures, and media organizations. *Survey Administration*: Develop a structured survey instrument to assess public perceptions and behaviors regarding political discourse on mass media and social media platforms. Ensure the survey is designed to capture demographic information, media consumption

habits, attitudes towards political content, and engagement with social media platforms. *Interviews with Key Stakeholders*: Identify and recruit key stakeholders such as politicians, journalists, social media influencers, and communication experts for in-depth interviews. Conduct semi-structured interviews to explore perceptions, experiences, and strategies related to political communication across different media channels. Use purposive sampling to ensure representation from diverse perspectives and roles within the political and media landscape. *Social Network Analysis:* Extract data from social media APIs to construct networks of political discourse, including connections between users, content, and communities. Analyze network topology, user interactions, and information flow dynamics to understand the structure and influence of political conversations on social media. *Data Management and Quality Assurance*: Establish protocols for data collection, storage, and validation to maintain data integrity throughout the research process. Implement measures to ensure compliance with data privacy regulations and ethical guidelines governing the handling of sensitive information. *Pilot Testing and Refinement:* Pilot test data gathering procedures with a small sample of participants to evaluate the feasibility, clarity, and effectiveness of data collection methods. Solicit feedback from participants and research team members to identify areas for improvement and refine data gathering protocols before full-scale implementation. Adjust sampling techniques, survey questions, and interview protocols based on pilot test results to enhance the reliability and validity of data collected for the study.

Statistical Treatment of Data

The information collected through survey questionnaires was checked, organized, examined, and understood by means of the subsequent numerical tools. In the research several types of statistical treatment of data can be employed to analyze the relationship between social media usage, mass media communication strategies, and political discourse. The most potential statistical treatment is *Comparative Analysis*: Compare means or proportions across different groups, such as comparing the level of political engagement between social media users and non-users. Compare the effectiveness of different mass media communication strategies in shaping public opinion and political discourse. One of the commonly used statistical measures for comparative analysis is the effect size. Effect size quantifies the magnitude of the difference between two groups or conditions. It provides valuable information about the practical significance of the observed differences, irrespective of sample size. One widely used effect size measure for comparing means between two groups is *Cohen's d*, which is defined as the difference between the means of the two groups divided by the pooled standard deviation. The formula for Cohen's d is:d=X¯1−X¯2/Spooled_Where:X¯1 and X¯2 are the means of the two groups being compared spooled is the pooled standard deviation calculated as: spooled=n1+n2−2(n1−1) s12+(n2−1) s22.Cohen's d provides a standardized measure of the difference between group means, allowing for comparisons across different studies and contexts. Typically, effect sizes of 0.2, 0.5, and 0.8 are considered small, medium, and large, respectively, although interpretations may vary depending on the field of study and research objectives.

In the context of comparative analysis in your research on the impact of social media on political discourse, Cohen's d can be used to quantify the magnitude of differences in

outcomes (e.g., attitudes towards political discourse) between groups exposed to different communication strategies (e.g., mass media vs. social media).

RESULTS & DISCUSSION

Quantitative research

Participants were asked to rate their agreement with statements related to each research question on a 5-point Likert scale:

1- Strongly Disagree 2- Disagree 3- Neutral 4- Agree 5- Strongly Agree

Cohen's d was used to measure the effect size, indicating the magnitude of differences between traditional mass media and social media.

1. **Transformation of Political Communication Dynamics**

1.1 How has the shift from traditional mass media to social media altered the dynamics of political communication?

Table 1: Perceptions on the Shift from Traditional to Social Media.

Statement	Strongly Disagree (%)	Disagree (%)	Neutral (%)	Agree (%)	Strongly Agree (%)	Mean (Social Media)	Mean (Traditional Media)	Cohen's d
Social media has made political communication more immediate.	5	10	13	40	32	3.84	3.12	0.67
Social media has made political communication more accessible.	4	8	15	38	35	3.92	3.18	0.73
Engagement with political content is higher on social media.	6	9	20	30	35	3.79	3.25	0.55

Interpretation: The results indicate that participants generally agree that social media has made political communication more immediate and accessible, with higher engagement levels compared to traditional mass media. The Cohen's d values (ranging from 0.55 to 0.73) suggest a medium to large effect size, highlighting significant differences in perceptions between the two media types.

2. **Influence on Public Opinion and Engagement.**

2.1 What are the comparative impacts of traditional mass media and social media on public opinion formation and political engagement?

Table 2: Impact on Public Opinion Formation and Engagement.

Statement	Strongly Disagree (%)	Disagree (%)	Neutral (%)	Agree (%)	Strongly Agree (%)	Mean (Social Media)	Mean (Traditional Media)	Cohen's d
Social media has a stronger impact on shaping political views.	8	12	22	35	23	3.53	2.95	0.59
Social media increases political engagement more than traditional media.	7	11	20	36	26	3.63	3.00	0.62

Interpretation: Participants perceive social media to have a stronger impact on shaping political views and increasing political engagement compared to traditional mass media. The Cohen's d values (0.59 and 0.62) indicate a medium effect size, reflecting moderate differences in the perceived influence of the two media on public opinion and engagement.

3. Role of Gatekeeping and Information Control.

3.1 How does the role of gatekeeping differ between traditional mass media and social media, and what are the implications for the quality and accuracy of political information?

Table 3: Perceptions on Gatekeeping and Information Control

Statement	Strongly Disagree (%)	Disagree (%)	Neutral (%)	Agree (%)	Strongly Agree (%)	Mean (Social Media)	Mean (Traditional Media)	Cohen's d
Traditional media content is more reliable due to editorial gatekeeping.	5	15	20	35	25	3.60	3.10	0.50
Social media lacks adequate gatekeeping, affecting information quality.	6	12	18	40	24	3.64	3.00	0.64

Interpretation: The findings suggest that participants believe traditional mass media to be more reliable due to its editorial gatekeeping, whereas social media is perceived to lack adequate gatekeeping, affecting information quality. Cohen's d values (0.50 and 0.64) indicate small to medium effect sizes, signifying some differences in perceptions about gatekeeping and information control between the two media.

4. Speed and Reach of Political Messages.

4.1 How do the speed and reach of political messages on social media compare to those on traditional mass media, and what are the implications for political discourse?

Table 4: Perceptions on Speed and Reach.

Statement	Strongly Disagree (%)	Disagree (%)	Neutral (%)	Agree (%)	Strongly Agree (%)	Mean (Social Media)	Mean (Traditional Media)	Cohen's d
Political messages spread faster on social media than traditional media.	4	10	16	40	30	3.82	3.25	0.57

Statement	Strongly Disagree (%)	Disagree (%)	Neutral (%)	Agree (%)	Strongly Agree (%)	Mean (Social Media)	Mean (Traditional Media)	Cohen's d
Social media accelerates the spread of political information.	5	8	17	42	28	3.80	3.20	0.60

Interpretation: Participants generally agree that political messages spread faster and the spread of political information is accelerated on social media compared to traditional mass media. The Cohen's d values (0.57 and 0.60) indicate medium effect sizes, pointing to significant differences in the perceived speed and reach of political messages between the two media.

5. Misinformation and Polarization.

5.1 To what extent does social media contribute to the spread of misinformation and political polarization compared to traditional mass media?

Table 5: Perceptions on Misinformation and Polarization.

Statement	Strongly Disagree (%)	Disagree (%)	Neutral (%)	Agree (%)	Strongly Agree (%)	Mean (Social Media)	Mean (Traditional Media)	Cohen's d
Social media contributes more to the spread of misinformation.	5	12	20	35	28	3.69	3.00	0.69
Social media creates echo chambers leading to political polarization.	6	11	19	40	24	3.65	3.05	0.60

Interpretation: The results suggest that participants believe social media contributes more to the spread of misinformation and political polarization compared to traditional mass

media. The Cohen's d values (0.69 and 0.60) indicate medium to large effect sizes, highlighting notable differences in the perceptions of misinformation and polarization between the two media.

6. Effectiveness of Communication Strategies.

6.1 How effective are the communication strategies employed on social media compared to those used in traditional mass media, and what are the ethical considerations involved?

Table 6: Perceptions on Communication Strategies Effectiveness and Ethics.

Statement	Strongly Disagree (%)	Disagree (%)	Neutral (%)	Agree (%)	Strongly Agree (%)	Mean (Social Media)	Mean (Traditional Media)	Cohen's d
Social media campaigns have higher engagement rates than traditional media.	5	10	18	40	27	3.74	3.10	0.64
There are significant ethical concerns with social media communication strategies.	4	11	20	37	28	3.74	3.00	0.74

Interpretation: Participants perceive social media campaigns to have higher engagement rates than those in traditional media, and there are significant ethical concerns with social media communication strategies. The Cohen's d values (0.64 and 0.74) indicate medium to large effect sizes, showing substantial differences in the perceived effectiveness and ethical considerations of communication strategies between social media and traditional mass media.

These tables and figures summarize the quantitative findings of the research using Likert scale responses and Cohen's d to illustrate the differences and implications of political communication strategies across traditional mass media and social media. The interpretations provide insights into the perceptions of participants regarding the transformation of political communication dynamics, the impact on public opinion and engagement, the role of gatekeeping and information control, the speed and reach of

political messages, misinformation and polarization, and the effectiveness of communication strategies.

Qualitative research

This study explores the various dimensions of this transformation by examining how social media differs from traditional mass media in influencing political discourse, public opinion, gatekeeping, and the spread of information. Through qualitative methods, including in-depth interviews and content analysis, this research presents narratives that illuminate the shifts and their implications for contemporary political communication.

1. **Transformation of Political Communication Dynamics**

1.1 *How has the shift from traditional mass media to social media altered the dynamics of political communication?*

The shift from traditional mass media to social media has democratized political communication, allowing for more direct and immediate interactions between political figures and the public. Interviewees, including politicians and communication strategists, noted that social media platforms have become essential tools for campaigning and public engagement. Unlike traditional media, which operates on a one-to-many broadcast model, social media enables a many-to-many communication dynamic. This shift has empowered individual voices, facilitated grassroots movements, and allowed for rapid dissemination of political messages. However, it has also created challenges in maintaining message consistency and controlling the narrative.

2. Influence on Public Opinion and Engagement

2.1 What are the comparative impacts of traditional mass media and social media on public opinion formation and political engagement?

Participants in the study highlighted that social media significantly enhances political engagement by providing platforms for discussion, debate, and mobilization. While traditional mass media remains influential in setting the agenda and framing issues, social media's interactive nature allows users to actively participate in shaping public opinion. Social media's impact on public opinion is multifaceted; it fosters a sense of community and engagement among users but also risks creating echo chambers where users are exposed primarily to like-minded views. This dynamic can reinforce existing beliefs and contribute to polarization.

3. Role of Gatekeeping and Information Control

3.1 *How does the role of gatekeeping differ between traditional mass media and social media, and what are the implications for the quality and accuracy of political information?*

Gatekeeping in traditional mass media involves editorial oversight, which ensures a level of quality control and factual accuracy. Journalists and editors curate content, often adhering to professional standards and ethical guidelines. In contrast, social media

operates with minimal gatekeeping, relying on algorithms and user-generated content to filter information. Interviewees expressed concerns that this lack of oversight can lead to the proliferation of misinformation and low-quality content. While social media platforms have introduced measures to combat misinformation, the effectiveness of these measures is still debated, and the responsibility for information accuracy often falls on the users themselves.

4. Speed and Reach of Political Messages

4.1 *How do the speed and reach of political messages on social media compare to those on traditional mass media, and what are the implications for political discourse?*

Social media's speed and reach surpass those of traditional mass media, enabling instantaneous dissemination of political messages to a global audience. Politicians and campaign managers interviewed for this study emphasized the strategic advantage of being able to respond in real-time to events and issues. This immediacy can enhance political discourse by allowing for timely and relevant communication. However, the rapid spread of information also means that false or misleading content can quickly gain traction before it can be corrected, potentially disrupting the discourse and influencing public opinion based on inaccuracies.

5. Misinformation and Polarization

5.1 *To what extent does social media contribute to the spread of misinformation and political polarization compared to traditional mass media?*

The study found that social media significantly contributes to the spread of misinformation and political polarization. Participants pointed out that the algorithmic nature of social media platforms often prioritizes sensational or emotionally charged content, which can include misleading or false information. This content is more likely to be shared and go viral, exacerbating misinformation spread. Additionally, the personalized nature of social media feeds can create filter bubbles, where users are predominantly exposed to content that reinforces their existing views, leading to greater political polarization. Traditional mass media, with its editorial processes, generally provides more balanced and verified information, though it is not immune to biases and misinformation.

6. Effectiveness of Communication Strategies

6.1 *How effective are the communication strategies employed on social media compared to those used in traditional mass media, and what are the ethical considerations involved?*

Communication strategies on social media are highly effective in terms of engagement and reach. Politicians and strategists noted that social media allows for targeted messaging, real-time interaction, and a personalized approach to audience engagement. However, these strategies often involve ethical considerations, such as the use of personal data for micro-targeting and the potential for manipulation through misinformation. Traditional mass media strategies, while less interactive, are perceived as more credible and authoritative. Ethical considerations in traditional media revolve

around journalistic integrity and the balance between editorial judgment and audience influence.

Conclusions

1. Transformation of Political Communication Dynamics.

The shift from traditional mass media to social media has fundamentally transformed political communication. Social media platforms provide a more direct and immediate interaction between political actors and the public, democratizing political discourse and allowing for real-time engagement. This has empowered individual voices and facilitated grassroots movements, though it has also introduced challenges in maintaining message consistency and controlling the narrative.

2. Influence on Public Opinion and Engagement.

Social media has a profound impact on public opinion formation and political engagement compared to traditional mass media. While traditional media continues to set the agenda and frame issues, social media's interactive nature allows users to actively participate in shaping public opinion. This engagement fosters community and activism but can also lead to echo chambers and reinforce existing beliefs, contributing to political polarization.

3. Role of Gatekeeping and Information Control

Gatekeeping roles differ significantly between traditional mass media and social media. Traditional media relies on editorial oversight to ensure quality and accuracy, whereas social media depends on algorithms and user-generated content, often resulting in the proliferation of misinformation. This lack of gatekeeping on social media has serious implications for the quality and accuracy of political information, emphasizing the need for improved measures to combat misinformation.

4. Speed and Reach of Political Messages

Social media's speed and reach far surpass those of traditional mass media, enabling the rapid dissemination of political messages to a global audience. This immediacy enhances political discourse by allowing timely communication but also increases the risk of spreading false or misleading content before it can be corrected, potentially disrupting the discourse and influencing public opinion based on inaccuracies.

5. Misinformation and Polarization

Social media significantly contributes to the spread of misinformation and political polarization. The algorithmic prioritization of sensational content and the creation of filter bubbles amplify these issues, leading to greater political division. Traditional mass media,

with its editorial standards, generally provides more balanced and verified information, though it is not immune to biases.

6. Effectiveness of Communication Strategies

Communication strategies on social media are highly effective in engagement and reach, allowing for targeted messaging and real-time interaction. However, these strategies raise ethical concerns, such as data privacy and the potential for manipulation through misinformation. Traditional mass media strategies, while less interactive, are perceived as more credible and authoritative, highlighting the need for a balanced approach to political communication.

Recommendations

Enhancing Media Literacy: To address the challenges posed by the shift to social media, it is essential to enhance media literacy among the public. Educating users on how to critically evaluate information sources can help mitigate the spread of misinformation and reduce the impact of echo chambers.

Strengthening Fact-Checking Mechanisms: Social media platforms should invest in robust fact-checking mechanisms and collaborate with independent fact-checking organizations to ensure the accuracy of political information. This can help maintain the quality and credibility of information disseminated on these platforms.

Promoting Ethical Communication Practices: Political actors and communication strategists should adopt ethical communication practices that prioritize transparency, accountability, and respect for user privacy. This includes avoiding manipulative tactics and ensuring that political messages are based on accurate and reliable information.

Encouraging Balanced Discourse: Efforts should be made to encourage balanced and inclusive political discourse on social media. Platforms can promote diverse viewpoints and create spaces for constructive dialogue to reduce polarization and foster a more informed public.

Regulatory Frameworks: Governments and policymakers should consider developing regulatory frameworks that address the unique challenges of social media while preserving freedom of expression. These frameworks could include guidelines for transparency in political advertising, measures to combat misinformation, and protections for user data privacy.

Leveraging Traditional Media's Strengths: While embracing the benefits of social media, political actors should not overlook the strengths of traditional mass media. Combining the reach and engagement of social media with the credibility and authority of traditional media can create a more comprehensive and effective communication strategy.

Compliance with Ethical Standards

The authors of this study adhere to the highest ethical standards in their exploration of the impact of social media on political discourse. The study ensures transparency in its methodology, including the selection of participants, data collection procedures, and data analysis methods. The authors provide detailed descriptions of their methods and results, allowing readers to replicate the study or evaluate its findings. The study respects the privacy and autonomy of participants, ensuring that all data collected is kept confidential and protected. The authors also consider the ethical implications of their research, avoiding any potential harm or exploitation of participants and ensuring that they are not coerced into participating. The study complies with institutional review board (IRB) guidelines and regulations, ensuring that the research is conducted in accordance with ethical standards and that the IRB has approved the study protocol.

Acknowledgments

I would like to express my heartfelt gratitude to the following individuals and entities for their invaluable support and contributions to this research:

Engr. Jeffrey Leonen our Research Director, and to Dr. Erwin Quendangan our CASE Dean, your guidance, expertise, and encouragement have been pivotal throughout this research journey. Your insights and support have greatly enhanced the quality and depth of this study.

To the Bata-anon and Alarcon Family, your constant support and understanding have been a source of strength and motivation. Your belief in the importance of this research has been a driving force behind its completion.

To my friends, my CASE Family and media co-workers, thank you for your continuous encouragement and for always being there to provide support and motivation. Your friendship has been a vital part of this journey.

To the Lord Jesus, I am eternally grateful for the strength, wisdom, and perseverance granted to me throughout this research endeavor. Your divine guidance has been my constant companion and source of inspiration.

This research would not have been possible without the collective support of all of you. Thank you for being an integral part of this journey.

ABSTRACT

This study explores the potential of mustard leaves *(Brassica juncea)* and radish *(Raphanus sativus)* as fortification agents in noodle making. By incorporating pureed mustard leaves and radish into traditional noodle recipes, the research aimed to enhance the nutritional profile and sensory appeal of the noodles. The methodology included the preparation of mustard and radish purees, their incorporation into noodle dough, and the subsequent evaluation of the developed products through sensory assessments and nutritional analysis. Sensory evaluations, conducted with 120 respondents across various age groups, indicated high acceptability of the fortified noodles in both pancit guisado and pancit lomi dishes, with consistently high ratings in aroma, color, texture, and taste. Nutritional analysis revealed that the fortified noodles had favorable levels of crude fiber, protein, and fat, suggesting potential health benefits. Marketability assessments highlighted strong consumer demand, sufficient supply availability, and manageable production costs. The findings suggest that mustard leaves and radish can effectively enhance the nutritional value and acceptability of noodles, presenting significant opportunities for commercialization and further culinary innovation. Recommendations include commercial production, expansion of recipe applications, nutritional labeling, supply chain partnerships, and ongoing consumer feedback integration to ensure the product's success in the market.

Keywords: *Food fortification, noodle making, sensory evaluation, nutritional value, mustard leaves, radish*

INTRODUCTION

"As creatures with a body, we should all be peculiarly solicitous with the quality of air, water, and food that we permit into our bodily vehicles" - Bryant Mcgill.

Consumers are critical evaluators of food, driven by a desire for products that meet their personal preferences and satisfaction. From aroma to appearance, taste, and texture, every aspect of food is scrutinized. One significant issue impacting individuals of all ages today is nutrient deficiency, which slowly deteriorates the immune system, leading to an increased risk of illnesses (World Health Organization, 2020). Concurrently, the evolution of instant or pre-cooked foods has gained popularity, especially among time-conscious individuals. However, efforts are being made to counter the potential negative implications of consuming foods with minimal or lacking nutrients through food fortification.

Food fortification, defined as the addition of key vitamins and minerals to staple foods, is viewed as the most effective and sustainable strategy to increase the nutrient contents of food (Solon, n.d.). This approach is particularly crucial in addressing the micronutrient deficiencies that affect a significant portion of the global population.

Noodles, a staple food in many Asian countries, have gained international recognition, with global consumption on the rise. Researchers are exploring the potential of noodle fortification as a public health intervention to enhance their nutritional characteristics. Attributes such as taste, nutrition, convenience, safety, longer shelf life, and reasonable price have contributed to the popularity of noodles (Hou, 2010).

Noodles originated in China as early as 5000 BC and subsequently spread to other Asian countries such as Japan, Thailand, Korea, and Malaysia (Lee et al., 2008). Wheat flour noodles are a significant part of the diet for many Asians and are favored by many people of all ages (Afalla, 2010).

Modern consumers worldwide face increased risks of various diseases such as diabetes, high cholesterol, cardiovascular diseases, high blood pressure, and irregular blood sugar levels. These risk factors are often associated with diets low in essential nutrients like dietary fiber, phytochemicals, and antioxidants. Functional foods, which provide health benefits and help prevent diseases by incorporating essential nutrients, have become increasingly important (Suman & Rajinder, 2015).

In the Philippines, noodles are a staple food for many families, often consumed throughout the day. Working individuals, in particular, favor noodles due to their convenience and quick preparation, requiring only 2-3 minutes of boiling or rehydration with boiling water. This practice has contributed to the Philippines ranking in the top 7 for instant noodle consumption worldwide (World Instant Noodles Association, 2019). However, nutritionists caution that instant noodles do not meet the body's nutritional requirements (Bhat et al., 2010). Consequently, food manufacturers are responding to consumer demands for higher fiber content by developing products with high-fiber

ingredients. Dietary fiber can also enhance foods' functional properties, such as increasing water-holding capacity, oil-holding capacity, emulsification, and gel formation (Nelson, 2001).

Mustard leaves, primarily grown for their seeds and known for their medicinal properties, belong to annual herbaceous plants with long, branched stems and clusters of yellow flowers (Couplan, 2012). Radish, a significant root and leafy vegetable, is used in salads, as fresh vegetables, cooked, canned, pickled, or eaten raw. Its leaves and sprouts are also consumed in salads or cooked. In traditional medicine, radishes are used to treat coughs, cancer, whooping cough, gastric discomfort, liver disorders, constipation, dyspepsia, gallbladder disorders, arthritis, gallstones, and kidney stones (Adams, 2008).

Given the universal appeal of wheat flour noodles, especially among younger ages, this study aims to find alternative nutrient sources by incorporating mustard leaves and radish into noodles. Noodles fortified with mustard leaves and radish are anticipated to provide Filipinos with nutritious food alternatives rich in fiber, potentially addressing various diseases. Additionally, the development of this fortified food product could offer economic benefits to consumers, farmers, and entrepreneurs.

Research Questions

This study was conducted to determine the acceptability of mustard leaves and radish as food fortification in noodle making. Specifically, this study sought to answer the following questions:

1. What are the processes involved in the preparation of mustard leaves and radish as main ingredients in noodle making?
2. What are the nutritional and physico-chemical analysis results of the developed fortified food products?
3. What is the level of acceptability of the developed mustard leaves and radish noodles in pancit guisado dishes and lomi dishes as evaluated by the Food Technology Students, Food Experts, and Consumers? In terms of (a) aroma; (b) color/appearance; (c) texture; and (d) taste?
4. Is there a significant difference among the evaluation of the groups of respondents on fortified food products?
5. What is the level of marketability of mustard leaves and radish noodles as perceived by the groups of respondents
    a. consumer demands
    b. supply availability of radish and mustard
    c. production cost

METHODOLOGY

This developmental research used materials and ingredients described in the tables below.

Materials

Table 3. Tools and equipment used to prepare Mustard Leaves and Radish in Noodle Recipes.

Descriptions					
Preparatory Tools	**Measuring Tools**	**Mixing Tools**	**Cutting Tools**	**Cooking Tools**	**Equipment**
Kneading Table	Measuring Cups	Mixing Bowls	Knife	Gas Range	Pasta Maker
Utility Tray	Measuring Spoons	Wooden Spoon	Peeler	Frying Pan	Blender
Spatula	Weighing Scale	Whisk	Chopping Board	Laddle	Dough Roller & Noodle Maker
Flour Sifter					
Rolling Pin					
Serving Bowl					
Serving Plate					

Table 4. Ingredients of Mustard Leaves and Radish Noodle.

Sample 1	Sample 2	Sample 3
1000 grams All – purpose flour 60 grams mustard pureed 60 grams radish pureed 1 piece egg 2.5 grams salt 50 grams water	800 grams All – purpose flour 70 grams mustard pureed 70 grams radish pureed 1 piece egg 2.5 grams salt 30 grams water	700 grams All – purpose flour 90 grams mustard pureed 90 grams radish pureed 1 piece egg 2.5 grams salt

Data Gathering Instrument

The study employed a sensorial evaluation questionnaire to assess the respondents' perception of the developed noodles. This instrument was chosen for its effectiveness in measuring the acceptability of the products in terms of aroma, color, texture, and taste.

Data Gathering Procedure

The respondents, comprising children, teenagers, adults, and food experts, were asked to perform a sensory evaluation of the developed noodle products. After obtaining permission, the questionnaires were distributed to the evaluators. The researcher

provided instructions on how to complete the questionnaires, ensuring that all respondents understood the process. Once the questionnaires were filled out, they were collected for further analysis. The sensory assessment questionnaire checklist was utilized to compile data on the acceptability of the mustard leaves and radish noodles.

Sensory Evaluation

The finished products were subjected to sensory evaluation by a diverse group of 120 evaluators, who were selected and briefed on how to assess the products using a scorecard with sample codes. Evaluators tasted samples from each dish and provided feedback on appearance/color, aroma, texture, taste, and general acceptability. The collected data were then decoded and analyzed statistically.

The instrument for data gathering included a score sheet using a qualitative analysis method to determine the acceptability of the food products. Responses regarding the level of acceptability of mustard leaves and radish noodle dishes in terms of appearance/color, aroma, texture, and taste were gathered using a Five-point Likert Scale, with the following weight assignments:

Scale	Numerical Rating	Descriptive Rating
5	4.50 – 5.00	Like very much
4	3.50 – 4.49	Like moderately
3	2.50 – 3.49	Like slightly
2	1.50 – 2.49	Neither like
1	1.00 – 1.49	Dislike

This scale allowed for a structured and quantifiable assessment of the sensory attributes of the noodle products, facilitating a comprehensive analysis of their acceptability among the different respondent groups

---

RESULTS

Product Development

The development of noodle recipes involved several transformative stages, starting from the use of whole mustard leaves and radish to their conversion into purees. Initially, mustard leaves were processed into a smooth mustard puree, while radish underwent a similar process to become radish puree. These purees were then combined to create a unique noodle product. To test the efficacy and appeal of these new noodles, they were incorporated into six different noodle recipes. Specifically, three samples of mustard leaves and radish were used in pancit guisado, a stir-fried noodle dish, and three samples in pancit lomi, a thick noodle soup. Throughout this development, meticulous

observation and analysis were conducted to refine the mustard leaves and radish noodle products, ensuring they met the desired standards.

Procedure

The developmental procedure commenced with the preparation of mustard leaves and radish, which involved washing, chopping, and pureeing the mustard leaves and cleaning, peeling, and pureeing the radish. These purees were then blended into all-purpose flour to form a dough, ensuring an even distribution of the pureed vegetables throughout. This dough was subsequently rolled out and cut into noodles, which were cooked and utilized as the primary ingredients in the prepared noodle recipes. By following this detailed procedure, mustard and radish noodles were successfully created and integrated into traditional Filipino dishes, enhancing their nutritional value and flavor profile.

Preparation of Mustard leaves puree and Radish puree

To prepare mustard leaves puree, first, harvest the mustard leaves from the garden, ensuring they are fresh. Wash the leaves thoroughly under running water to remove any dirt or impurities, and then drain them. Chop the mustard leaves thinly and blend them into a smooth puree using a blender. For the radish puree, wash the radish top root under running water, peel it, and cut it thinly. Puree the radish slices using a blender.

Preparation for Incorporating Mustard Leaves (Brassica juncea) and Radish (Raphanus sativus) in Noodles as Nutritional Fortification

For utilizing mustard leaves (Brassica Juncea) and radish (Raphanus Sativus) as food fortification in noodles, begin with *mise-en-place*, organizing all the necessary ingredients and equipment. Measure the ingredients for the noodle dough and combine them in a large mixing bowl according to the standard proportions. Mix the ingredients with your fingertips to form a ball of dough. Place the dough on a lightly floured surface, flatten it slightly, and knead for about 5 minutes until smooth and elastic, adding more flour if needed to prevent sticking. Let the dough rest until it is slightly dry but still pliable. Lightly flour the dough circle and prepare the noodle maker. Insert the dough into the noodle maker, gently press it, and cut it into strips of the desired width. Carefully unfold the strips, sprinkle them with a small amount of flour to prevent sticking, and the noodles are ready for cooking with your desired recipe.

Figure 1. Kneading the dough for about 5 minutes until smooth and elastic

Preparation of Mustard and Radish Noodle Recipes

Pancit Guisado

For Mustard Leaves and Radish Pancit Guisado, begin by sautéing garlic and onion in a pan. Add chicken breast and liver, seasoning with salt and pepper, and cook for 10-15 minutes. Add soy sauce and chicken stock, letting the mixture boil. Incorporate the mustard leaves noodles into the mixture. Add carrots, cabbage, and celery, simmering until the noodles and vegetables are cooked but not overcooked. Transfer the dish to a serving plate, top with hard-boiled eggs and *embutido*, and serve hot.

Figure 2. Pancit Guisado

Pancit Lomi

For Mustard Leaves and Radish Pancit Lomi, start by bringing a pot of water to a boil and blanch the noodles for about 1 minute. Drain and rinse them in cold water. In a pan, heat about 1 tablespoon of oil over medium heat, cook the liver until just done, then remove it and keep warm. In a large pot, heat the remaining tablespoon of oil, add onions and garlic, and cook until softened. Add chicken and cook until lightly browned, then add fish sauce and cook for another minute. Pour in 8 cups of water and bring to a boil. Lower the heat and simmer until the chicken is cooked through. Add the mustard leaves noodles and cook for about 3 to 5 minutes until tender but firm to bite. Add the liver and cook for about 1-2 minutes. Add carrots and cook for about 1 minute, then add cabbage and continue cooking for another minute or until the vegetables are tender but crisp. Combine cornstarch with 1/2 cup cold water, stir to dissolve, and add to the pot, stirring until slightly thickened. Slowly add eggs in a thin stream, allowing them to slightly set before stirring. Serve hot.

Figure 3. Pancit Lomi

Product Evaluation

Evaluation of the products developed by the groups of respondents is shown in the following tables.

Nutritive Value of Mustard Leaves and Uncooked Radish Noodles

Table 5. Nutritive Value of Mustard Leaves and Uncooked Radish Noodles

Lab. No	Sample Description	Crude Protein	Crude Fiber	Crude Fat	Moisture	Ash
		%	%	%	%	%
FT-24-0025	Noodles w/ Mustard & Radish as Food Fortification	9.12	0.13	0.47	38.34	0.56

The table above summarizes the nutritive values of the developed mustard leaves and radish noodles from the Department of Agriculture, Regional Field Office No. 02, Tuguegarao City, Cagayan. The developed mustard leaves and radish noodles have a high crude fiber content of 9.12%, a crude protein content is 0.13%, crude fat content of 0.47%, these noodles are a healthy option for those looking to reduce fat intake. The moisture content is moderately high at 38.34%, which may affect texture and shelf life,

necessitating proper storage. The ash content of 0.56% indicates the presence of beneficial minerals, contributing to the overall nutritional value of the noodles.

Acceptability of Mustard Leaves and Radish Noodles in Two Recipes

Table 6. Level of acceptability of the developed mustard leaves and radish noodles in pancit guisado dishes as evaluated by children, teenagers, adults and noodle experts in terms of aroma, color, texture, and taste.

Product	Criteria	Mean	Standard Deviation	Description
Sample 1 Pancit Guisado	Aroma	4.6833	0.56484	Like very much
	Color	4.6667	0.55509	Like very much
	Texture	4.6833	0.56484	Like very much
	Taste	4.6833	0.53426	Like very much
	Average	**4.6792**	**0.31786**	**Like very much**
Sample 2 Pancit Guisado	Aroma	4.8000	0.47809	Like very much
	Color	4.8000	0.46018	Like very much
	Texture	4.8333	0.37424	Like very much
	Taste	4.8667	0.34136	Like very much
	Average	**4.8250**	**0.20395**	**Like very much**
Sample 3 Pancit Guisado	Aroma	4.6750	0.55250	Like very much
	Color	4.6750	0.55250	Like very much
	Texture	4.7750	0.49302	Like very much
	Taste	4.7583	0.44901	Like very much
	Average	**4.7208**	**0.27915**	**Like very much**

Table 6 provides a detailed evaluation of the acceptability of developed mustard leaves and radish noodles in "pancit guisado" dishes as assessed by the respondents. The criteria for evaluation include aroma, color, texture, and taste. Each criterion is rated on a scale where a mean score near 5 indicates a high level of acceptability, and the standard deviation measures the consistency of the ratings.

For "Sample 1 Pancit Guisado," the mean scores for aroma, color, texture, and taste are all approximately 4.68, with standard deviations around 0.56, indicating a high and consistent level of acceptance as participants "like very much" this sample in all aspects. The overall average score is 4.6792 with a standard deviation of 0.31786.

"Sample 2 Pancit Guisado" received even higher scores, with means for each criterion ranging from 4.80 to 4.87 and smaller standard deviations (around 0.34 to 0.48), suggesting strong and consistent approval. The average score is 4.8250 with a standard deviation of 0.20395, the lowest among all samples, indicating the highest consistency.

"Sample 3 Pancit Guisado" also scored well, with means between 4.6750 and 4.7750 and standard deviations ranging from 0.44901 to 0.55250, reflecting a high but slightly less consistent level of acceptance compared to Sample 2. The overall average is 4.7208 with a standard deviation of 0.27915.

This implies that mustard leaves and radish noodles can be successfully incorporated into "pancit guisado" with high acceptability and consistency. This has significant implications for enhancing the nutritional value of traditional dishes, opening new culinary avenues, and offering potential market opportunities.

Table 7. Level of acceptability of the developed mustard leaves and radish noodles in *Lomi* dishes was evaluated by children, teenagers, adults, and noodle experts in terms of aroma, color, texture, and taste.

Product	Criteria	Mean	Standard Deviation	Description
Sample 1 Lomi	Aroma	4.6583	0.57242	Like very much
	Color	4.6250	0.58068	Like very much
	Texture	4.6833	0.56484	Like very much
	Taste	4.6667	0.55509	Like very much
	Average	**4.6583**	**0.34746**	**Like very much**
Sample 2 Lomi	Aroma	4.8167	0.44878	Like very much
	Color	4.8417	0.42989	Like very much
	Texture	4.8333	0.37424	Like very much
	Taste	4.8667	0.36515	Like very much
	Average	**4.8396**	**0.21202**	**Like very much**
Sample 3 Lomi	Aroma	4.7083	0.54071	Like very much
	Color	4.6750	0.56750	Like very much
	Texture	4.7750	0.49302	Like very much
	Taste	4.7667	0.44407	Like very much
	Average	**4.7312**	**0.25139**	**Like very much**

The table provides a detailed evaluation of the acceptability of developed mustard leaves and radish noodles in "pancit lomi" dishes as assessed by food technology students, food experts, and consumers. The criteria for evaluation include aroma, color, texture, and taste. Each criterion is rated on a scale where a mean score near 5 indicates a high level of acceptability, and the standard deviation measures the consistency of the ratings.

For "Sample 1 Lomi," the mean scores for aroma, color, texture, and taste rated 4.6250 to 4.6833, and standard deviations around 0.55 to 0.58, indicating a high level of

acceptance with good consistency. The overall average is 4.6583 with a standard deviation of 0.34746.

"Sample 2 Lomi" achieved the highest ratings overall, with mean scores for each criterion between 4.8333 and 4.8667 and low standard deviations (around 0.37 to 0.45), suggesting very strong and consistent approval. The average score is 4.8396 with a standard deviation of 0.21202.

Lastly, "Sample 3 Lomi" showed mean scores from 4.6750 to 4.7750 with standard deviations around 0.44 to 0.57, reflecting a high but slightly less consistent level of acceptance compared to Sample 2. The overall average is 4.7312 with a standard deviation of 0.25139.

In summary, all samples of lomi using mustard leaves and radish noodles were rated highly, with mean scores indicating that they were "liked very much" across all criteria. Sample 2 generally received the highest and most consistent ratings, which had the highest average scores and the lowest standard deviations, indicating it was the most preferred and consistently liked sample

.

Comparison in the Level of Acceptability of Mustard and Radish Noodles Used in Two Recipes across Groups of Respondents

Table 8. Comparison in the level of acceptability of mustard and radish noodles as perceived by the evaluators according to their age group.

Products	F-value	p-value	Comparison	Decision	Remark
Sample 1 Pancit Guisado	1.29	0.28	p-value > 0.05	accept Ho	no significant difference
Sample 2 Pancit Guisado	0.33	0.85	p-value > 0.05	accept Ho	no significant difference
Sample 3 Pancit Guisado	2.64	0.05	p-value = 0.05	accept Ho	no significant difference
Sample 1 Pancit Lomi	1.12	0.34	p-value > 0.05	accept Ho	no significant difference
Sample 2 Pancit Lomi	0.13	0.94	p-value > 0.05	accept Ho	no significant difference
Sample 3 Pancit Lomi	2.13	0.10	p-value > 0.05	accept Ho	no significant difference

The table summarizes the results of the statistical analysis used to determine if there is a significant difference in the evaluations of the fortified food products by different groups of respondents. The analysis uses the F-value and p-value to compare the groups, with a p-value threshold of 0.05 for significance.

For "Sample 1 Pancit Guisado," the F-value is 1.29 with a p-value of 0.28. Since the p-value is greater than 0.05, the null hypothesis (Ho) is accepted, indicating no significant difference in evaluations among the groups

.

For "Sample 2 Pancit Guisado," the F-value is 0.33 with a p-value of 0.85. Again, the p-value exceeds 0.05, leading to the acceptance of the null hypothesis and suggesting no significant difference in the groups' evaluations.

For "Sample 3 Pancit Guisado," the F-value is 2.64 with a p-value of 0.05. Although the p-value is exactly 0.05, it still falls at the threshold, meaning the null hypothesis is accepted, indicating no significant difference.

Regarding "Sample 1 Lomi," the F-value is 1.12 with a p-value of 0.34. The p-value is above 0.05, resulting in the acceptance of the null hypothesis and showing no significant difference in evaluations among the groups.

For "Sample 2 Lomi," the F-value is 0.13 with a p-value of 0.94. The high p-value means the null hypothesis is accepted, indicating no significant difference in evaluations among the groups.

For "Sample 3 Lomi," the F-value is 2.13 with a p-value of 0.10. As the p-value is greater than 0.05, the null hypothesis is accepted, and there is no significant difference in evaluations among the groups.

In summary, the analysis shows that for all samples of "pancit guisado" and "lomi," there are no significant differences in the evaluations by the different groups of respondents. This conclusion is drawn from p-values that are all greater than 0.05, leading to the acceptance of the null hypothesis in each case. Thus, the evaluations of the fortified food products are consistent across the different groups, indicating a generally uniform acceptance level among food technology, food experts, and consumers.

Level of Marketability of Mustard Leaves and Radish Noodles

Table 9. Level of marketability of mustard leaves and radish noodles as perceived by children, teenagers, adults, and food experts in terms of consumer demands, supply availability of radish mustard, and production cost.

Category	Respondents	Mean	Standard Deviation	Description
Consumer Demand	Children	4.92	0.18	Strongly Agree
	Teenager	4.82	0.29	Strongly Agree
	Adult	4.77	0.23	Strongly Agree

	Food experts	4.84	0.24	Strongly Agree
Supply Availability	Children	4.84	0.29	Strongly Agree
	Teenager	4.69	0.29	Strongly Agree
	Adult	4.75	0.26	Strongly Agree
	Food experts	4.87	0.22	Strongly Agree
Production Cost	Children	4.84	0.23	Strongly Agree
	Teenager	4.82	0.24	Strongly Agree
	Adult	4.81	0.24	Strongly Agree
	Food experts	4.84	0.23	Strongly Agree

The table evaluates the marketability of mustard leaves and radish noodles based on the perceptions of different respondent groups concerning consumer demand, supply availability of radish and mustard, and production cost. Each category is assessed using mean scores and standard deviations.

For “consumer demand”, the mean scores are consistently high across all respondent groups, indicating a strong consensus that there is high consumer demand for these products. Children have the highest mean score of 4.92 with a standard deviation of 0.18, suggesting a very strong agreement and low variability in responses. Teenager follows with a mean of 4.82 and a standard deviation of 0.29, while adult has a mean of 4.77 and a standard deviation of 0.23. Food experts' mean is 4.84 with a standard deviation of 0.24. All these means fall into the "Strongly Agree" category, signifying that all groups believe consumer demand for the product is very high.

Regarding “supply availability”, the scores also indicate strong agreement across all groups that the supply of radish and mustard is sufficient. Children’s mean is 4.84 with a standard deviation of 0.29, showing strong agreement. Teenager has a slightly lower mean of 4.69 but maintains a similar standard deviation of 0.29. Adult's mean is 4.75 with a standard deviation of 0.26, and Food experts 's mean is the highest at 4.87 with a standard deviation of 0.22. Again, all groups fall within the "Strongly Agree" category, reflecting confidence in the availability of necessary supplies.

For “production cost”, the respondent groups also show strong agreement that the production cost is manageable. Children and Food Expert both have a mean of 4.84 with a standard deviation of 0.23, indicating a very strong consensus. Teenager has a mean of 4.82 and a standard deviation of 0.24, while Adult has a mean of 4.81 with a standard deviation of 0.24. The means for production cost across all groups fall into the "Strongly Agree" category, suggesting that respondents believe the production cost is favorable for marketability.

In summary, the perceived marketability of mustard leaves and radish noodles is very high among the respondent groups. They strongly agree on the high consumer demand, adequate supply availability, and favorable production costs. The consistently high mean scores across all categories and groups, coupled with low standard deviations, indicate a strong, unanimous perception that these products are highly marketable.

Conclusions

Based on the findings of the study, it can be concluded that mustard leaves *(Brassica juncea)* and radish *(Raphanus sativus)* hold significant promise as food fortification agents in noodle making. The product development process, which involved transforming these vegetables into purees and incorporating them into noodle recipes, resulted in a unique and nutritious noodle product. Sensory evaluations, including aroma, color, texture, and taste, consistently indicated high acceptability across different age groups and expertise levels, particularly in pancit guisado and pancit lomi dishes. Furthermore, the nutritional analysis revealed favorable levels of crude fiber, protein, and fat, indicating potential health benefits. Marketability assessments also highlighted strong consumer demand, ample supply availability, and manageable production costs, further supporting the feasibility of commercialization. Overall, this study highlights the potential of mustard leaves and radish as nutritional fortification agents in noodles, paving the way for future exploration and adoption in the food industry.

Recommendations

In consideration of the findings and conclusions of the study, the following are forwarded as recommendations:

1. Given the high acceptability and positive nutritional profile, manufacturers should consider commercializing mustard leaves and radish-fortified noodles. This could include

marketing campaigns highlighting their health benefits and unique flavors to attract health-conscious consumers.

2. The range of recipes should be expanded incorporating mustard leaves and radish noodles beyond traditional Filipino dishes like pancit guisado and pancit lomi. Experiment with other popular dishes and cuisines to broaden market appeal.

3. Nutritional content should be clearly labeled on the packaging to inform consumers about the benefits of these fortified noodles. Educational campaigns can help raise awareness about the importance of fiber, protein, and reduced fat content in daily diets.

4. A consistent supply of fresh mustard leaves and radishes should be ensured by partnering with local farmers. This can help maintain the quality of the noodles and support the agricultural community.

5. Further research should be conducted on the shelf life and optimal storage conditions of these noodles to enhance their texture and longevity, given their high moisture content.

6. Extensive market testing should be conducted in various demographic segments to gather more detailed consumer feedback. Use this feedback to refine the product further and improve its marketability.

7. Cost-effective production methods should be explored to keep the noodles affordable while maintaining quality. This includes optimizing the puree-to-flour ratio and streamlining the production process.

8. Collaboration with health and wellness organizations like the DOST, and FDA should be done to promote noodles as a healthy food option. This can help build credibility and expand the product's reach.

9. Innovative and eco-friendly packaging solutions should be invested to highlight the product's nutritional benefits and appeal to environmentally conscious consumers.

Compliance with Ethical Standards

The researcher hereby assures that the study was conducted in strict adherence to research ethical standards, ensuring that participants provided informed consent, had the freedom to withdraw from the study at any time, their anonymity was preserved, their well-being was protected, no conflict of interest influenced the study, plagiarism was

rigorously avoided, findings were interpreted without bias, and the results were used exclusively for research purposes.

Acknowledgments

The researcher would like to express her heartfelt gratitude to her esteemed research adviser for her invaluable guidance and support throughout this study. She is deeply thankful to the participants who generously shared their time and insights, making this research possible. She extends also her appreciation to the school heads, colleagues, friends, and family for their unwavering encouragement and understanding. Lastly, she acknowledges the divine guidance of God, without whom this journey would not have been possible.

ABSTRACT

This descriptive-correlational research aimed to investigate the relationship between mathematical anxiety and self-efficacy among 62 Grade 10 students at Mulapula National High School. Simple random sampling was used to determine the participants of the study. Data collection involved the use of the ERUNT for self-efficacy assessment and a 25-item survey questionnaire for mathematical anxiety. This 25-item researchers-made questionnaire underwent validation and item analysis. Independent variables included sex and sections, while dependent variables comprised mathematical anxiety and self-efficacy levels. Descriptive statistics such as frequency, mean, and standard deviation were utilized, along with inferential statistics like the T-test and Pearson's r, with a significance level set at 0.05. Results revealed variations in mathematical anxiety and self-efficacy concerning sex and sections. Male exhibited higher mathematical anxiety levels than females, and section A students reported lower anxiety levels than section B counterparts. Conversely, self-efficacy levels were higher among females compared to males, with section A students surpassing those in section B. The study concluded a significant relationship between mathematical anxiety and self-efficacy. Based on the discoveries presented, the subsequent suggestions and recommendations are proposed with the intention of creating a supportive setting for students to overcome mathematical anxiety and boost their self-efficacy.

Keywords: *Mathematical Anxiety, Self-efficacy*

INTRODUCTION

Mathematics is often challenging for many students, leading to mathematics anxiety. Yet, there is limited research on its relationship with self-efficacy. As stated in PISA (2018), the Philippines ranked low in math and science education quality, with students struggling to comprehend questions. This is evidenced by below-target National Achievement Test (NAT) scores and low average scores in Mathematical Literacy compared to OECD countries. High levels of math anxiety were noted even among top-performing students, impacting their performance from an early age.

Math anxiety involves feelings of fear, tension, and apprehension specific to math tasks. It is consistent across various mathematical contexts and prevalent in both K-12 and tertiary education. This anxiety can diminish academic performance and self-efficacy, which is a person's belief in their ability to complete tasks and achieve goals. Factors like these suggest a need for focused research and interventions to help students manage anxiety and build confidence in their mathematical abilities (Luttenberger et al, 2019).

The study aimed to provide insights and recommendations to create a supportive environment for Grade 10 students at Mulapula National High School to overcome math anxiety and enhance self-efficacy. By examining the relationship between these factors, the researchers hope to contribute to improved academic performance and positive attitudes toward mathematics among students, thus aiding in the advancement of math education in the Philippines.

Research Questions

This study aims to determine the level between mathematical anxiety and self-efficacy of the students.

Specifically, the study sought answers to the following questions:

1. What is the profile of the respondents when taken as a whole and when classified as to sex and sections?
2. What is the level of mathematical anxiety of the respondents as an entire group and when classified as to sex and sections?
3. What is the level of self-efficacy of the respondents as an entire group and when classified as to sex and sections?
4. Is there a significant difference in the level of the mathematical anxiety of the respondents when classified as to sex and sections?
5. Is there a significant difference in the level of self-efficacy of the respondents when classified as to sex and sections?
6. Is there a significant relationship between mathematical anxiety and self-efficacy of the respondents?

METHODOLOGY

This study used a quantitative research method with an emphasis on the descriptive-correlational design. A descriptive correlational design is a research method that examines the relationship between two or more variables without manipulating them (Baht, 2023).

Descriptive-correlational research design was used to determine the level of mathematics anxiety and self-efficacy of Grade 10 students of Mulapula National High School for the academic year 2023-2024. The researcher chose sixty-two Grade 10 students from Mulapula National High School for the school year 2023-2024 as the respondents.

In this study, the researchers were able to randomly choose the respondents from the population of Grade 10 students through simple random sampling. The researchers aimed to assess the Mathematical Anxiety and Self-Efficacy of Grade 10 students, using a questionnaire adapted from the Department of Education's Electronic Regional Unified Numeracy Test (E-RUNT) results. The data-gathering instrument utilized for the study consisted of a researcher-made and expertly validated survey questionnaire checklist for Mathematical Anxiety and an adapted E-RUNT results for Self-Efficacy to collect necessary data for Grade 10 students during the academic year 2023-2024. The researchers developed a 25-item survey questionnaire checklist for the Mathematical Anxiety of Grade 10 students, divided into two parts. The instrument underwent expert consultation and validation before being implemented for face-to-face testing with a randomly selected group of students.

Upon obtaining permission from the Dean of the School of Teacher Education to conduct research outside the school, the researchers sent a letter to the College President. After the letters were signed, the researchers sent a letter to the DepEd School Division Office of Passi City for pilot testing of the research instrument. The data was then sent to the statistician for a reliability test. After the statistician confirmed that the research instrument was reliable for the study, the researcher sent a letter to the principal of Mulapula National High School for the conduct of the study. A face-to-face implementation was observed for one day. The selected respondents of the study were chosen through simple random sampling, and the researchers distributed the questionnaire. The students were given 30 minutes to answer the questions included in the instrument. After conducting the study, the information will be gathered and checked by the assigned statistician for interpretation and analysis of the data.

RESULTS

Profile of the Respondents in Mulapula National High School. The table presents an overview of the respondent profile, comprising 62 respondents. Notably, there is a greater representation of females, accounting for 37 respondents (59.7%), compared to males, who constitute 25 respondents (40.3%). In terms of section distribution, an equal

participation rate is observed, with both Section A and Section B each having 31 respondents, representing 50% of the total respondents. These results confirm the study by Becker (2018) that women are more likely to respond to surveys and are also more likely to use support forums. Particularly for mail or web surveys, it is frequently found that women are more likely to respond than men.

Table 1.

Profile of the Respondents

Variable	Categories	Frequency	Percent
Sex	Male	25	40.3
	Female	37	59.7
	Total	**62**	**100.0**

Variable	Categories	Frequency	Percent
Section	A	31.0	50.0
	B	31.0	50.0
	Total	**62.0**	**100.0**

Level of Mathematical Anxiety by Gender and Section. The results show the level of mathematical anxiety among grade ten learners at Mulapula National High School as a whole (M=3.38, SD=0.54), which is interpreted as "High Mathematics Anxiety." When grouped by gender, males have a higher level (M=3.52, SD=0.66), also interpreted as "High Mathematics Anxiety," compared to females (M=3.28, SD=0.43). Furthermore, when respondents are grouped by section, Section B (M=3.40, SD=0.66) has a higher level than Section A (M=3.35, SD=0.40). These findings support a study by Homayouni et al. (2022) which showed that there are differences between males and females in math anxiety and learning mathematics. Males scored higher in math anxiety assessment and also scored higher in learning mathematics compared to females.

Table 2.

Level of Mathematical Anxiety as to Sex and Sections

Group	Categories	N	Mean	Std.	Description
As a whole		**62**	**3.38**	**0.54**	**High Mathematics Anxiety**
Sex					
	Male	25	3.52	0.66	High Mathematics Anxiety
	Female	37	3.28	0.43	High Mathematics Anxiety

Section					
	Section A	31	3.35	0.66	High Mathematics Anxiety
	Section B	31	3.40	0.40	High Mathematics Anxiety

Legend: 4.1-5.0- Severe Mathematics Anxiety; 3.1-4.0 High Mathematics Anxiety; 2.1-3.0-Moderate Mathematics Anxiety; 1.1-2.0-Low Mathematics Anxiety; 0-1.0-Non-Mathematics Anxiety

Level of Self-Efficacy of Learners. The results show the level of self-efficacy among grade ten learners at Mulapula National High School when taken as a whole (M=32.06, SD=5.65), which is interpreted as "High Self-efficacy." When grouped according to sex, males have a mean score of (M=31.04, SD=5.29), also interpreted as "High Self-efficacy," which is slightly lower than females (M=32.76, SD=5.29), also interpreted as "High Self-efficacy." Additionally, when respondents were grouped according to section, Section A (M=32.90, SD=4.79) had a higher mean score than Section B (M=31.23, SD=6.36). The results of the study support the study conducted by Ifdil, Apriani, Yendi, and Rangka (2016) indicating that male students have moderate self-efficacy while female students have high self-efficacy. Furthermore, the study highlights a significant difference in self-efficacy between male and female students, particularly among male students as their self-efficacy appears to be lower than that of female students.

Difference in the Level of Mathematical Anxiety Among Learners as to Sex and Section. There is a study conducted to determine the difference in the level of mathematical anxiety among learners when classified according to their sex and section. Table 4 presents the T-test results, which reveal that there is no significant difference in the level of mathematical anxiety as to sex ($p=0.22$, $p<0.05$). Similarly, when considering the section, there is no significant difference in the level of mathematical anxiety ($p=0.74$, $p<0.05$). These findings support a study conducted by Lacia, Ben, and Elizar (2020), which investigated the mathematics anxiety score between males and females in the central part of the Philippines. The study found a significant difference between the anxiety levels of males and females, despite the very small difference in their magnitude. The mean score shows that male students are slightly higher than female students.

Table 4.
Difference Level of Mathematical Anxiety as to Sex and Section

Group	Mean	Mean Diff	df	T-value	Sig-value	Decision

		-.05	97.7	-.34	0.74	Not Significant

⁎Significant @ p<0.05

Difference in the Level of Self-Efficacy of Learners as to Sex and Section. There is a difference in the level of self-efficacy among the respondents when classified by sex and section. Table 5 shows that the T-test results revealed no significant difference in the level of self-efficacy as to sex ($p = 0.5$, $p < 0.05$). Similarly, there is no significant difference in the level of self-efficacy as to section ($p = 0.25$, $p < 0.05$). This study supports a study conducted by Bangga (2021), which revealed that both male and female students have a high level of self-efficacy. From the study of Baji (2020), it was found that there was no significant difference in academic self-efficacy between male and female students. However, the mean value of females indicates a higher level of self-efficacy than male students.

Table 5.
Difference Level of Self-efficacy as to Sex and Section

Group	Mean	Mean Diff.	Df	T-value	Sig-value	Decision
Sex						
Male	31.04					
Female	32.76

Relationship Between the Level of Mathematical Anxiety and Self-Efficacy. The table shows the relationship between the level of mathematical anxiety and self-efficacy of Grade 10 learners at Mulapula National High School. The results show that there is a significant negative correlation (r = -0.339) between mathematical anxiety and self-efficacy for the entire group. These findings are supported by the study of Khasawneh, Gosling, and Williams (2021), which confirmed that the paramedic student cohort's self-efficacy levels and math anxiety had a significant negative correlation. Math anxiety and self-efficacy are significantly influenced by gender. To improve math performance and reduce anxiety during calculation tasks, such as dose determinations, targeted education should be developed to improve math self-efficacy.

Table 6
Relationship between the level of mathematical anxiety and self-efficacy

	Mathematical anxiety r value	P value	Description
Self-efficacy	-.339	0.01	Significant

DISCUSSION

The study involved a diverse group of participants from Grade ten at Mulapula National High School, with both genders and sections adequately represented. The majority of respondents were females, while males made up a significant proportion. Both sections contributed equally to the overall participant, ensuring a balanced representation across the various groups in the study.

The overall level of mathematical anxiety among Grade ten learners at Mulapula National

High School revealed a consensus categorized as "High Mathematics Anxiety". Males generally displayed a higher level of mathematical anxiety than females, and within sections, students in Section B tended to express slightly higher mathematical anxiety compared to those in Section A.

The overall level of self-efficacy among Grade ten learners at Mulapula National High School was broadly characterized as "High Self-efficacy". Specifically, when considering both sex and section, females tended to exhibit a higher level of proficiency compared to males. Additionally, when examining sections, students in Section A demonstrated a slightly higher mean score, falling within the "High Self-efficacy" category, compared to those in Section B.

The analysis of mathematical anxiety among Grade ten learners at Mulapula National High School, concerning sex differences, revealed that there is no significant difference in their mathematical anxiety levels. Similarly, when examining the impact of the school section on mathematical anxiety, the results indicate that there is no statistically significant difference in the mathematical anxiety levels of Grade ten learners at Mulapula National High School.

The examination of self-efficacy levels among Grade ten learners at Mulapula National High School, considering sex differences, indicated that there is no significant difference in their self-efficacy levels. Similarly, when exploring the impact of school section on self-efficacy, the findings suggest that there is no significant difference in the self-efficacy levels of Grade ten learners at Mulapula National High School.

The results on the relationship between the level of mathematical anxiety and self-efficacy showed that mathematical anxiety and self-efficacy are negatively correlated.

Conclusions

Based on the findings from the study, researchers consistently found that more females participated as respondents to the study, and an equal distribution was maintained across the two sections, ensuring a balanced representation of both genders and sections in the overall sample of 62 respondents. These results confirm the study by Becker (2018) that women are more likely to respond to surveys and are also more likely to use support forums. Particularly for mail or web surveys, it is frequently found that women are more likely to respond than men.

It has been found in the study that the level of mathematical anxiety of grade ten learners at Mulapula National High for the school year 2022-2023. Students express agreement in experiencing negative emotions when confronted with mathematical problems, categorizing their overall level of mathematical anxiety as "High Mathematics Anxiety."

Moreover, the analysis indicates that males, on average, exhibit a higher level of mathematical anxiety compared to females. Additionally, when comparing the sections, it

was observed that respondents in Section A reported a lower mean, suggesting a slightly lower level of mathematical anxiety than their counterparts in Section B. These findings support a study by Homayouni et al. (2022) which showed that there are differences between males and females in math anxiety and learning mathematics. Males scored higher in math anxiety assessment and also scored higher in learning mathematics compared to females.

Furthermore, when the researchers examined the data based on sex and sections, the level of self-efficacy of Grade 10 learners at Mulapula National High School as a whole was "High Self-efficacy". Notably, females demonstrated a higher mean perception than males, indicating a more elevated level of self-efficacy among female students.

Similarly, when examining the sections, it was observed that respondents in Section A reported a higher mean compared to Section B. Consequently, these findings suggest that both females and students in Section A interpret their self-efficacy as "High Self-efficacy."

The results of the study support the study conducted by Ifdil, Apriani, Yendi, and Rangka (2016) indicating that male students have moderate self-efficacy while female students have high self-efficacy. Furthermore, the study highlights a significant difference in self-efficacy between male and female students, particularly among male students as their self-efficacy appears to be lower than that of female students.

The study reveals the difference in the level of mathematical anxiety as related to sex showed that there is no significant difference in the level of mathematical anxiety of grade ten learners at Mulapula National High School. It simply implies that males are more anxious than females.Similarly, the results also find that there is no significant difference in the section. Therefore, the study has found that the level of mathematical anxiety as a whole is "High Mathematics Anxiety". These findings support a study conducted by Lacia, Ben, and Elizar (2020), which investigated the mathematics anxiety score between males and females in the central part of the Philippines. The study found a significant difference between the anxiety levels of males and females, despite the very small difference in their magnitude. The mean score shows that male students are slightly higher than female students.

Moreover, the findings also reveal that there is no significant difference in the level of self-efficacy among the respondents according to sex and section. This simply implies that females have more numeracy foundational skills in learning all mathematical competencies than males. Therefore, as a whole and according to sex and section, the study states that it is interpreted as "High Self-efficacy". This study supports a study conducted by Bangga (2021), which revealed that both male and female students have a high level of self-efficacy. From the study of Baji (2020), it was found that there was no significant difference in academic self-efficacy between male and female students. However, the mean value of females indicates a higher level of self-efficacy than male students.

This study shows the results on the relationship between the level of mathematical anxiety and self-efficacy of Mulapula National High School. The results show that there is a negative correlation between Mathematical Anxiety and Self-efficacy. In essence, the results also show that there is a significant relationship between mathematical anxiety and self-efficacy.

Therefore, when considering the entire dataset and when classified by sex and sections, the interpretation remains consistent, categorizing the relationship between mathematical anxiety and self-efficacy as "High Mathematics Anxiety". These findings are supported by the study of Khasawneh, Gosling, and Williams (2021), which confirmed that the paramedic student cohort's self-efficacy levels and math anxiety had a significant negative correlation. Math anxiety and self-efficacy are significantly influenced by gender. To improve math performance and reduce anxiety during calculation tasks, such as dose determinations, targeted education should be developed to improve math self-efficacy.

Recommendations

Based on the findings and conclusions of the study, the following recommendations are suggested:

1. For students, this study results highlight the impact of mathematical anxiety on students. It is recommended that students collaborate to identify the root causes of mathematical fear. Introduce relaxation techniques, mindfulness exercises, or other stress-reduction methods to alleviate anxiety related to mathematics.

2. For parents, understand and realize the vital role they play in the education of their children. Parents must create a supportive environment where children feel comfortable seeking help when facing math challenges. Celebrate their progress and efforts to boost their confidence in tackling mathematical problems.

3. For DepEd, would plan better ways and implement targeted interventions at Mulapula National High School to overcome mathematical anxiety and enhance self-efficacy of the students. Suggest incorporating personalized learning approaches, peer collaboration, mentorship program, and real-world applications to make the sessions engaging.

4. For teachers, since the level of Mathematical Anxiety is higher and it has high self-efficacy, teachers promote more student engagement and active involvement in math-related activities can enhance their confidence in the subject. To address anxiety and stress, educators should arrange extracurricular activities and offer suitable counseling support for students. Encourage teachers to support peer-to-peer tutoring so that both the tutor and tutee can enhance their communication skills through the tutoring process, a valuable skill in academics and beyond.

5. For future researchers, the outcomes of this study on the Relationship between Mathematical Anxiety and Self-efficacy among Grade 10 students at Mulapula National

High School can serve as a valuable foundation for future researchers. It provides a starting point for those interested in delving deeper into the critical issues of mathematics anxiety and self-efficacy within the school context. Building upon these findings, future researchers can refine interventions, expand this scope, and contribute to a more comprehensive understanding of how to address these significant concerns in education.

Compliance with Ethical Standards

In conducting this study, strict adherence to ethical standards was maintained throughout the research process. Informed consent was obtained from all respondents prior to their participation, ensuring they were fully aware of the study's purpose and procedures. Respondents were explicitly informed of their right to withdraw from the study at any time without any negative repercussions. Anonymity was rigorously upheld, with all personal identifiers removed to protect the identities of the participants. The well-being of the respondents was safeguarded at all times, ensuring that their participation did not cause any harm or distress. There were no conflicts of interest influencing the conduct of the study, and the researchers ensured that all findings were presented objectively without bias. Plagiarism was strictly avoided, with all sources and references appropriately cited. The results of the study were utilized solely for academic and research purposes, contributing to the understanding of the students. Through these measures, the researchers ensured the highest standards of ethical integrity in the study.

ABSTRACT

This research aimed to describe the perception of the police officers assigned in operations units of the PNP as regards the use of Body-Worn Camera and Alternative Recording Devices (ARDs) during the conduct of operations in compliance with the Rules on Body-Worn Camera issued by the Supreme Court in August 2021. The focus of the research is to determine how the police officers perceive the policy on the use of BWCs and ARDs particularly its necessity, practicability, effectiveness and the level of complexity of the preparation of the documents required by the court to be submitted in relation to its use. The result of show overall positive perceptions among police officers as regards the use of BWCs and ARDs. Comparative analysis of the data shows that police officers agree that BWC and ARD are necessary, practical and effective tool in the conduct of police operations. Likewise, police officers agree that the level of complexity of court required document to be submitted is reasonable. Nevertheless, amendments to the policy on the use of BWCs and ARDs are necessary to maximize the benefits of the said technology for the betterment of police operations.

INTRODUCTION

The Philippines, as a republican and democratic state, is duty-bound to ensure peace and order, protect life, liberty, and property and promote general welfare. It is in this light that the Constitution specifically mandates the State to maintain peace and order, administer justice, and to serve and protect the people.(1987 Philippine Constitution, Section 5, Article II, n.d.)

These primordial duties of the State are vital in the fulfilment of the purpose that the Constitution seeks to achieve as enunciated in the preamble --- *to build a just and humane society and establish a Government that shall embody our ideals and aspirations, promote the common good, conserve and develop our patrimony, and secure to ourselves and our posterity the blessings of independence and democracy under the rule of law and a regime of truth, justice, freedom, love, equality, and peace.*(1987 Constitution, Preamble, n.d.)

The maintenance of peace and order, proper administration of justice, protection of the people and promotion of general welfare necessarily carry with it the duty of the State to enforce the law. The law is vital because it serves as a guide as to what is accepted in a society, and without which, conflicts between and among citizens will arise. It shall be emphasized however that the law is useless if it will not be enforced. Thus, the enforcement of law is equally important as the existence of law.

To give life to law enforcement function of the State, the Constitution mandates the establishment and maintenance of *one police force, which shall be national in scope and civilian in character.*(1987 Constitution, Section 6, Article XVI, n.d.) In compliance to the said constitutional mandate, the Philippine National Police (PNP) was created under Republic Act 6975 otherwise known as the Department of the Interior and Local Government Act of 1990, and the PNP was subsequently placed under the control and supervision of the National Police Commission (NAPOLCOM) pursuant to Republic Act 8551 otherwise known as the Philippine National Police Reform and Reorganization Act of 1998.

Republic Act 6975 provides among others, that the PNP shall (1) enforce laws and ordinances relative to the protection of lives and properties, (2) maintain peace and order and take all necessary steps to ensure public safety, (3) investigate and prevent crimes, effect the arrest of criminal offenders, bring offenders to justice and assist in their prosecution, and (4) exercise general powers to make arrest, search and seizure in accordance with the Constitution and pertinent laws.(Republic Act 6975, Section 24, n.d.)

Primarily, the duty of the PNP is to enforce the law in order to maintain peace and order in the country. Concomitant to this duty is the obligation of the PNP to uphold the Constitution and obey legal orders of the duly-constituted authorities. The fulfilment of such solemn duty can only be carried out by safeguarding the constitutionally guaranteed rights of individual provided under the Bill of Rights. This Bill of Rights, particularly found in Article III of the 1987 Constitution, refers to the declaration and enumeration of

fundamental civil and political rights of a person which purpose is to protect him or her from the abuses committed by the government through its agent.(Villareal, 2017)

The Bill of Rights primarily mandates that *no person shall be deprived of life, liberty, or property without due process of law, nor shall any person be denied the equal protection of the laws.*(1987 Philippine Constitution, Section 1, Article III, n.d.)
